When it comes to feeding you, moving your soul, everything else, creating methane gas, we can use natural radiation sources, which is in the nature. (When it) comes into space flight, you need nuclear plasma Technology. These are called, nuclear reactors. I can produce it anytime, but I don't give an opportunity again to hooligans like Belgians,

(2:30). to bring this technology to a halt, once now with the health side, and with the space side.

You're all dying of diseases which are curable, you're dying, you're suffering from the pains in your physicality, which should not be there, and, it's all in my palm. You keep a nation of the hooligans, you pay for it, you suffer with it.

I have given the knowledge free, but I cannot do any more for you. The same your flying car, your UFOs, your flying system from Beijing to Tehran, or whatever, is on hold, till IAEA and Americans, and others accept that, this new plasma Technology nuclear has to come into play.

We have no choice, if you want to go that way. In a way, it's very good because now instead of going the physical matters state, we are going very fast in the plasma and the energy state. So, it's a very good stoppage, that we don't go, because then you get distracted by it.

You go from the city of Brasilia to New York, go to the airport, get from wherever you are to go, to fly and everything. It takes you maybe half a day. John did from Argentina to come to the conference in Brazil, I think two days (by bus). Or use the new knowledge and do it in second.

So, it's good in a way, but if you want to have a flying car, if you want to have a flight system, (2:32). IAEA has to produce a certificate for Keshe Foundation, to be able to use nuclear plasma technology, that it can move physicality, then we are done, you have your car tomorrow.

If we could get to the soul of so many of you yesterday on a telephone line, through our system, which you've never done yourself. You cannot do it, unless you have the remote control from here. So, you see how hard it is, you have to live with the physicality. Rick, would you like to tell us what happened yesterday after I left? Or would you like to tell us what happened in your workshop?

R: Well, when you came in and directed things to some degree, you sort of interviewed different people in the workshop and got their experience of what you offered, and that was quite revealing. Different people had different responses, of course, but some similarities as well. For example, there is a feeling of fields and a feeling of sort of a bubble around some people, that talked about their experience. After you left, I don't think we carried on too much longer. We got into some of Brigit images and kind of went off on a different tangent, but very appreciative of your intervention there, you could call it. (2:34). It was a beautiful experience. I think we should experiment more in those ways.

Q: Alexandra .. Are the people who have had contact with this new system in a closer way going to experience any physical, emotional, psychological, intellectual and behavioral changes? What transformations can this system bring to people?

K - From the people who've been through the system, we have spoke, we have about nearly 100 people gone through the system up to now. With a few we have spoken, they tell us, yes, they have changes in physicality, they have changes in emotion, they have changes in behavior, they have changes in eating.

As I said, yesterday, and people came here this week. Now that we know what happens, your journey starts, from the time you leave this place. We just, in a way, sell you the ticket, you carry the rest of it.

The changes are fundamental for some of the people. We had a lady here on Tuesday, in a helping wheel frame. She came in with a lot of back pain and everything else, we wanted to see how we can, she wanted, apparently, for what I understood, wanted to see one of her relatives, but when she came out of the system, she said, (2:36). I can move, I can do this, I can change that. We have this a lot. A lot of people report to us changes in their habit, they don't fight with each other anymore, somebody says, I'm more calm, I don't get angry anymore.

These are the things, we bring all these 100 people, also now together the next couple of weeks to assess the after process, what happen then, and then see what happens. Then see what is interesting.

One of the interesting things for me is the lady, which went through the process, after she met Christ, bless his name, in a physical dimension. I want to know what happened to, what was that, what was the next, what contact she has made, what is there that it brings us knowledge. We have a very direct, detailed explanation of his dressing, the color of hair, the eye, as I said, the feature, the voice. The interesting thing is, we didn't have this till this Tuesday. Because these are certain questions. It's like you come out, you see, we look to you very friendly, but it's like a questionnaire, we have to take care of everything.

We said the new systems, we changed the system as of Tuesday. Because last week, we had no work here in presentation, what you call, testing. But the development of the new technology has gone on. This is a question we asked from many people from the beginning. Did you smell anything? Did you have any emotional?

The new system gone in since yesterday or Tuesday, people now tells us they can smell. A lady was telling us she can smell the water of the bath. (2:38). They can smell the environment they are. It means, in the process of perfecting the system, now we have covered the emotion of the smell, which wasn't there till last week. So, as we are progressing, we are adding to the knowledge, now the smell is part of it.

Many people come into the system, they cry. We ask them, they say, we don't know. It’s just tears, it’s just wet tears that comes out. I sometimes come out and get the tissue paper for them. They don't even know why they're crying. But, I know why. Because the trip is with the Soul, and the Physicality is inside, sees the emotion and it reacts. Physicality reacts within the dimension of the envelope of the soul, and they just are in tears. As the

guy said when he came in, he told us this, it’s like a fog inside, it’s a fog, I can hear you, but it's like a fog. Like being in the water and hearing your voice. I said yes, because your soul has covered you, you still listen to my physicality.

In the time of dream, now, the Soul goes out, and coming and going information, you gather some of it, you call it a dream. Now you're inside it, the soul is doing it without you being involved. So, it looks like you are, in a way, as we said. Many people will say that. We just heard you said something and we did it.

The strangest thing is, it was important for us in the trials. What happened if you move one people, one person from one unit to another and vice versa. We could do this for the first time this week. We switched people from one unit to another because they're a slightly different, and they could carry on with the same dream. So they could carry on with the same, what you call, a dream, but what we call the process of the soul being in work, (2:40). talking to mother. I asked him, can you move. They go to the other (Unit)), and they carry on speaking to mother.

Because the environment of the room is a shell, they are part of it, but it’s important for us, because now it shows we can do the transmutation easily. This was a key point for us, to be able to take people, to move chairs from one unit to another, and carry on. So, now we are ready to do the transmutation. Because we keep the environment of the room as it is, we keep the environment of the system as it is. The two systems are connected. It should be a flip of a finger, very soon, to transmute. Put you in Chair number one, system, and take you out of Chair number two, and it won't be a magic.

As I said last week, the people in the lab have started, they are working on this, Dean if you can bring it here, that we can transmute you through a system like this. If you don't want to go anywhere, and you're going alone, you're welcome with your suitcase. As I said, I put you in one port, side of this port and I'll take you out of the other side of the port.

You're used to go to airports and spend … 18 hours flight, you go into transmutation port and you're there instantly. Don't forget the gift you're taking with you for mom. You can't say, mom I forgot, it takes a long time to go back. She says, go back home, it takes you two second, bring my gift. No more, "Oh, I forgot to bring you something," because I never bought it to bring it down. (2:42). Now, you go back in there, it takes two seconds. Last time you paid 1,000 Euro to get across, this time it's free.

Q: .. Can you explain a bit more about the meaning of instantaneous when it comes to soul travel? Using the field of plasma does distance not exist? Or is it just so fast?

K - It's so fast, people who've been on it. Are there any Knowledge Seekers online who been to the system and they took a flight, they can tell you, they took actually, what we call, transmutation. How long did it take you from the time you were told you can go till you got there? Do you have any Knowledge Seekers in the background who can tell us? Do you see any hands? They do this instantaneously.

If the people online who's been here and did the trip, they can explain, it’s instantaneous. A funny thing is, when you listen to some of them, they go and pick up their mom, or the dad, or the girlfriend, and then together they go somewhere else. It's instantaneous.

Something very interesting, strange, has happened here in some of the tests. (2:44). It’s that we had somebody from Nepal, I think, a few weeks ago, two or three weeks ago a guy came and he said, I went to Nepal and it was so nice. I went there with my girlfriend. I said, how did you? He said, my girlfriend is in Nepal, I went there, I picked her up and we went together wherever they went. Strangely enough, because that line with Nepal is open in the system, we had a couple here yesterday who actually were born and raised European, but in Nepal. She said, I could smell the water, which is passing, because the water has a smell in Nepal. So, it’s instantaneous. She said. it was there, I was there standing on the bridge with the waters. It’s a scenery, that she knew, she lived in Nepal for 30 years. So, it's there, and it’s instantaneous. You can go, and do, and see people and go to another position. You don't travel anymore, you go to. This is the beauty of it.

People come here, their only wish to see their father, or mother, or whatever, and they come out with tears and joy, that they have managed to ask, why, and whatever, do you want to go for a dinner and the rest of it. They come here to look for answers. We are not here to answer. We are travelers of the space. And, as always say, we provide the aircraft which is your, what we call, not aircraft, the craft, which is your soul. As you usually get on the aircraft, the pilot doesn't care, he's not concerned if you are sitting in your chair, you're playing with your child, you're hugging your lover, you are planning to go once you arrive at that point of the station to somewhere else. His objective is to get you there. (2:46). So, the dreaming and physically doing things is your job. This is the same as what we do. We are not there to influence your mindset. We are there to create a new transportation system, and we are getting there.

R: Steffania had mentioned in the chat, every time Mr. Keshe talks about the flight system, the feeling of being in the system in my body comes back instantly. So, it's a form of instant communication, I think.

Any other question.

Q: .. Good day, Mr. Keshe, good day everybody else. I'm so happy, that you are showing the team with you, whatever you have always said for years and years. And that is something, as I said in Tuesday, when I listened to your past interviews of 2011, 13, 14 and every time you had the same discourse, you were talking about the same things, the same creations, the same logic. And that's extraordinary. Because sometimes we are septic (skeptic), we are septic people around us. So everything you do is being examined.

That's, wonderful. (2:48). And I congratulate all of us, humanity and above for having you. Now that Knowledge Seekers can develop all that for the betterment of life of everybody. And I thank you for you having a look on the children, which are the weakest of the society these days, which are not realized as their rights for life. And I know that

cost you very much, that has cost you all you have had. And you're still there. And we are proud of you, I think a lot of us, and will in future be proud of you. Thank you very much. I have no words to thank you.

What I was going to say that, I wrote on the chat about the technique for firefighters, if there's anything, because there is forest fires in summer with this dryness of the woods in here, everywhere, it soon will start. And I'm as you know, I'm emotional and I feel very sad about these trees, which take very long time to come back, and they cannot save themselves. It's us to save them, and the side effects and future. Is there anything to the point of utilization at this moment? Because we know about the CO2 Gans for fire, but is there anything that we can suggest to others, to anybody, (2:50). around us, or maybe the mayors, or authorities, or anybody who wants to listen to. Is there anything to offer to them at this moment?

K - Yes, but we have to actually deliver it, to show it, and this is part of the future teachings, that we show this, how it's used for fire, and how it will stand the course of, what we call, the annual fires. These fires are needed, we cannot, just because it doesn't suit us, trying to change the course.

Some of the fires, I know it costs heavy, but it's part of the cycle of the life on this planet. It brings new life, it cleans the past, but it brings a new cycle of the motion within the structure of the planet.

Some fires are accidental. But natural fires we see, it's part of the life of this planet. We try to interfere with it, we'll pay heavily for it. We have built our homes in the path of the woods, the woods didn't come to make their homes in our path. The way we get diseases and we die, the way we get earthquakes and happens to our cities. The lifecycle of the plants, trees, grown in certain areas, are there to create conditions or survival for this planet. This is something we have to accept. Then we see, not all fires are bad, we build our homes, in where they decided to be, and how to regenerate. So, if it comes to a house fire, (2:52). if it comes to other things accident, yes. A system technology is going to be delivered.

We're doing something in the background, that once it takes shape, fundamentally changes everything around the foundation. How the technologies will be delivered, how fast we do things, and speeding up the delivery (of the technology). But just bear with us. As you said, what I said in 2011, 2012, still now shows its validity. Give me a few more days and weeks, till we deliver the other side. It needs to be done. We have invested a lot of time and finance on it. You Knowledge Seekers helped us a little bit in past 2 or 3 months to bring that into, closer to reality. That's what it is.

They will not do it for us. We have to do it for ourselves. To do that for ourselves, I set out a new course for Keshe Foundation about 8 to 9 months ago. I set out to bring a new change, in a way, to set up a new structure for One Nation, One Planet. I have instructed our team to transfer all my assets, which is in my name to the Keshe Foundation. The process of transferring the assets of the Foundation back to, has a started. So, this is part

of the same course, Keshe Foundation Austria, share and assets holding in Markray, other assets held in my name on the trust of the Keshe Foundation. Started the process of transferring back to the Foundation, which means I carry no assets, even though I'll stay as a trustee. (2:54). In that process, we have started a process of One Nation

Gradually needs to set up the Universal Council structure as an entity, and the Earth Council as an entity, and bring them to manage. You have the two heads of the Keshe Foundation there, the two beautiful women there, to make sure everything gets through in a slow process. Then you have the backbone for, what I call, national assets of the Keshe Foundation which will be equally responsible by all the Universal Council members to see.

One Universal Council member cannot say, I want this in my country. We want it for the whole planet, how we plan it, what is the best efficient way for all of us to have it. It's not lobbying for factories and research centers, it's lobbying for all of us to benefit by it.

As I said, the transfer of the assets to Keshe Foundation, which I've been the trustee for a long time, has started and it's taking shape. Soon you as Knowledge Seekers have to start taking charge. How you want things to be done, and then, if agrees with what the Foundation has, will be transferred to reality.

All the, what you call, companies, all the factories, all the assets in names of organizations, which I built up through past years, now it's officially getting transferred back to the Foundation. As I said, I'll stay as a trustee, till in the future, I'm sure, the two heads of the Keshe Foundation, the two ladies, will become the trustees hopefully. Then it goes on to the next generation. Then, we have to structure a One Nation government (2:56). through assets of the knowledge, what we get as a knowledge, and what we go to the next step as a knowledge.

I came with nothing, and I go with nothing, because I have everything which I want in the Universe. It's you humans who are attached so much. But, I don't live a life of poverty, and slavery just for others, to be a hermit. I live the life of pleasure, because I have everything I need, I created everything for you to have the same life. So, you better learn from me to live the beautiful life, and not to live the life of the past, to be suffering because you want to serve. With the pleasure you serve much better, than with the slavery.

Q: .. I used to hear about the floods in Bangladesh at the time. And I'm happy we have a good teacher in Bengali language, very proud of. What about these floods…

K – They are needed again. See where the flood is, see how Bangladesh was divided. Bangladesh is in the back end of Central Asia, which all the waters from the top comes and it goes into the Indian Ocean. It was India, and India, when it was India, they had the same problem. It's a cycle, cycle of the life. You hear about the what you call it, the floods in Bangladesh nowadays.

I remember in 1990s, we were in our business working heavily with Bangladesh, because it was mainly cheap labor, more than anything else, and it was easier to do things there. I remember, there was this massive flood, go and check it on the News. After the flood we got our containers back. I never seen so many cockroaches of different colors and shapes and sizes in our containers. (2:58). Which the containers were in the port when the flood came, and it was there, and it cooked, it literally cooked everything. Whatever was seized in the clothing, with the cottons we bought, it became an animal, in that container with the temperature and the moisture. These floods have been there for years. I saw it firsthand, the results we had when we received our goods.

So, it's needed. It brings life to that part of the world. Mankind should move from these places. Or would we come to the time, as our friend says, I want a floating car. Can we make floating houses, that in time of these things, dangers, and they move somewhere else. And when it's finished come back in. They go to North Africa. They go up to 300 kilometers further up. With the new system, maybe we don't need to become refugees and flood up. We just go to somewhere nice and new, and when the flood is over, we go back home. It is going to be a lot of changes with new technology, I can see. The life of the man by mid this century will not be the way we know it today, with this technology. No way. It cannot be.

Q: .. (3:00). Can I speak in German please? …. (3:02). <Speak in German, difficult understanding >

Translation: .. Is there a possibility that the Foundation has a device .. Is there a possibility of the foundation to protect nuclear plants, and Mr. Keshe already said that we have the possibility of a generator, which builds a plasma field around atomic plant. So, even if a nuclear explosion comes away like in Fukushima, or Chernobyl, the plant will be protected, and no radiation will come out?

K – This technology exists. I developed it in the 1980s. The structure of, (3:04). a thought to do it came early at that time, and it is part of the development, which over the years I have brought into, what we call, being able to do so. It can be done. I know Germany made the decision to move out of nuclear industry in some ways. But yes, knowledge is there, and technology is there to do it.

You've got to remember, I've got to explain. I don't know if you remember, I'll explain. In Queen Mary College, University of London has been one of the very few universities with its own nuclear reactor. But at the beginning of nuclear industry, there was not much knowledge about the dangers of the nuclear reactors. If you go to Myland (a street in London), where Queen Mary College is, there used to be a building on the corner of the street, off Myland, and the side road, which goes right through Queen Mary, and that was a nuclear engineering department.

In the basement, there was a whole, the whole building was built on a hole of about 12 meter deep. (3:06). We had a floor on the ground, then we had a huge basement, where the first prototype nuclear reactors for research, more or less in the western world, was

built. Then they realized that this nuclear reactor is literally in the center of London, but nobody knew, except the university people, graduates like us, and the government. So what happened was that, this is Myland Road, where the university is, you have a road which comes off it, and in this corner you will have the nuclear reactor. Here you have the union's of the university, and then the rest of the buildings. This was here in the basement of the nuclear center.

This was moved a year, two years before I became a student. What they did, they moved it up the road. Those of you who know London call it, the ?? Bowl. They say, if you hear the bells off the Bowl, you're a real Londoner, because it goes back to the Thymes. Here just by Bowl, there is a very small river which comes into Thymes river. The university and the government decided to move the reactor to this side. So, we used to have a minibus going in and coming on a regular basis. This was my second home as a nuclear, becoming a nuclear reactor scientist, as well as the only ones in Queen Mary College for some years. I had a lot of freedom. (3:08).

My final thesis was, about the radiation leakage out of this site. I proved in my thesis, that if this is the nuclear reactor site, the fields, what they thought when the reactor was centered here, will be contained in this dome (inside the building of the reactor itself). With testing, changing nuclear fuel rods, and proving, we showed, actually, the peak (of the radiation fields) was sitting outside the nuclear reactor building. People outside the reactor building were receiving more radiation, than actually the scientists inside the building.

I submitted this in June 1981, and immediately with the same instruction, immediately by beginning of 1982, the site was closed down. During this test, one of my main concerns was at that time, that, what happens if this reactor exploded, and how we can hold it in?

In that time, the conclusion of the research, which was submitted to Queen Mary College and it was submitted to British nuclear government authorities was, that the explosion will reach beyond, into central of London, and passing West Ham and the other side, and it goes Liverpool Street, the banking system, the stock exchange, and it was decided rapidly they cannot take a risk.

That critical test to show, that the peak of the nuclear radiation was outside the building, rather than inside, was critical. I decided at that time what happens, how we do it if it happens. (3:10). It was no use putting, as we did in Chernobyl, blankets on it, it was, (to) holding it in.

I set out to develop the technology, that pulls the radiation inside/. The easy way of it is, the technology we know now, is embedding below the housing of the nuclear reactors, a massive gravity system, which has radiation capability spectrum, which means, anything which does (leak), will go back inside. This, due to the transfer of number of other reactors around the site, will be spread and controlled. (They would put other reactors around the site to pull the radiation in, besides the main Gravity reactor under the Nuclear Reactor). This is the only way we know at the moment, we can contain nuclear reactors

explosions. Where we centralize it (the radiation fields), and pull them in. As we have, like the way, the stronger (fields) feeds the (weaker) .. , we spread it (the radiation fields) around, and they literally become a satellite system. This is available, it costs not much, it's just that you drill a bigger hole in the ground, when you're digging (the original hole for the nuclear reactor), you go a few meter deeper. You'll find, if this is your nuclear reactor, you go somewhere deeper, and then you set your (plasma) reactor inside it (the hole).

Any explosion like Chernobyl, the (nuclear) radiation will go inside. You get debris (flying out of the reactor), no problem. But nuclear field radiation, even as debris's, will be centralized (and pulled back into the reactor site). Then if you look at it, another angle of it, this is your basement, you create number of (plasma) reactors around the site, so you spread the energy (of the nuclear radiation) and you control it (nuclear fallout). Because in growing and spreading, the (nuclear radiation) fields will be given to the environment within the ground floor below, which (the plasma reactors are) already buried, you'll have no contamination.

We know this technology. If you if you were in the oil business, before Iraq and Kuwait war, (3:12). a lot of you know that there were two or three very rich American companies, if you had an oil explosion on an oil well. What they used to do, if you had an oil well here, and you had a fire, that you couldn't control. The Americans come, sit back 500 meters away, drill a hole (horizontally to the oil well) and then close the tap of the oil well to it. Then they used to control it.

Now we can do the same thing. Even the present nuclear reactors, (you can) go underneath the concrete base (of the nuclear reactor), and build this (plasma reactor under the base) do it.

You know what happened with this (capping the oil wells American style). Nowadays this is obsolete, it’s a joke, what the Americans do. Because when Saddam Hussein came, and he blew all the oil wells of Kuwait, the Americans (were) invited everywhere, because (there were) about 400 or 500 oil wells burning, they couldn't control it. It would have taken six months for each one of these to be done.

A beautiful Iranian company came with two jet engines. The whole thing was to stop the fire. They put the reverse of the jet engine on it (the fire coming out of the oil well). They started literally cleaning up, by just blowing the fire out (with the jet engine), and the rest was just capping it. They were paying millions to the Americans to do this. They collected all the millions, and went back to Romania.

So, it's in the same basis, we dig even the present nuclear reactors, we go to, below concrete base, where the reactor is, and establish (a central gravitational plasma reactor), drill holes (for other plasma reactors) around the (nuclear) reactor, and do the job.

Any other question?

Q: I want to give some knowledge for all the Knowledge Seekers, (3:14). for the seed f the problems, of the mess on this planet right now. I know you speak in Farsi, so in English there is one extremely important word missing, and in Farsi it's called, "??mafeck" But not ??. Do you know "mafeck" Mr. Keshe?
K- What?
Q: "mafeck? in Farsi, as far as I understood.
K – "mafeck" means succeed.
Q: Yeah, in English, it's succeed or well done. But it's a big difference, "mafeck" to do it well or to succeed.
K- To succeed? It is achievement. If the word ?? has been .. translated.
Q: You think a word, then you say it, then you do it. When this word is missing, you cannot do it. This is the reason why so much mess is going on, on this planet. First by the Englishman, and then by the Americans on this planet right now. That's what I want to give knowledge to all the Knowledge Seekers.
K – Yeah, but it's been all of us in different times, in different countries, different rulers have brought different mess, and we all live as part of the results of centuries of abuse of each other.

Any other question?

The beauty about today was the introduction of the methane gas and the control of what we call, plasma technology for energy. This is why we came here today. That's why I called it, a Blueprint. Other things we talk about is a sideline to what is actually a blueprint today, this machine. (3:16). This machine in its simplicity will change the structure of the energy, energy construction, energy use, supply, control of nations by the others.

I think we still can show. Klaus would you like to measure again for the third time, that the thing is still works. We can increase the .. gas production, but it's too dangerous, it's methane. We can show you the test, we had a fire, a backfire into the tank. ..
Am I allowed to show that, Klaus, you don't mind? The burning. (Klaus says,) I can show anything. Okay, we show you.

This is why we don't want to put the ignition on this, because on a test during the weekend we had the backfiring of the methane into the system. For that reason we preferred not to. Because it left the marks in our system. … You can see, the pipe is totally black. We don't want to have these incidents here, because it's critical to understand what we do. (3:18). You can see the pipe totally black inside.

We have tested it, it burns, and it's just to be safe we do not open it here. In the background, if you can see, another Horizontal Enhancement Unit is getting assembled, it's on the table of production. This is our lab in Austria. So, this system actually burns, it does do what it says. Would you like to…

You see it is no gas, no methane. Oh, you saw the blow. It goes even up to 4 bars. But give it time, it goes up to 3 bars. It just calls on demand.

If we leave it, it'll become a massive production. It can produce, this is a continuous production. So it's not one off, or false.

Q: … (3:20). How long will it take to fill a normal size gas bottle in a car?

K – You don't need to fill up, that's the old fashion. Now your system, is your gas bottle. The system is set, you call upon it as you need it. You saw it with the test in Tehran. When they started burning, the bubbles became faster. If you can pick that picture frame from Tehran you'll see it.

We can increase the production, but we are in a confined space in the exhibition, and as part of our lease agreement, we cannot do anything with the fire here, it is against the regulation. But we've showed you the burnout in the lab over the weekend.

Q: I just wanted to announce that I just started a website called, ??.org, which means ?? which directly points to the gas enhancement generator, so that everybody can read it in German, English, Italian and French.

K - Thank you very much, any other question?

About receiving donations in Brazil

Q: Jefferson … (3:22). Here in Brazil, we have difficulty making donations to the Keshe Foundation, because Paypal doesn't accept the use of our currency for international transactions. And many Knowledge Seekers do not have an international credit card. Could the Keshe Foundation open a bank account here in Brazil?

K - We have a bank account. Keshe Foundation is a company registered in Brazil. Keshe Foundation is the majority shareholder, it's with Rafael. You can make donations to the bank account of Keshe Foundation, and the funds will be used by Keshe Foundation Brazil for Brazil. The accounts are reported annually to us, just like the Australian Keshe Foundation, and others. If you cannot send money out of the country, Keshe Foundation Brazil is a registered company of the Keshe Foundation, and is nearly over two years.

It has an active work, donate to your own country bank account. It's no problem, because we get the report from Brazil, and you have a trusted man as a trustee of the Keshe Foundation, Rafael in Brazil. You should have no problem in Brazil to make a donation to the Foundation to the, what we call, subsidiary of the Keshe Foundation which is Keshe Foundation Brazil. Rafael, what is the name of the company, and can you say it in Brazilian, in Portuguese, and release the bank account. Are you there Rafael? (You are translating.)

Could you explain to where they can make donations and the bank account of the Keshe Foundation in Brazil, please? (3:24).

Ra: Yes, we are arranging with our accounts regarding this, because they tell us that since we are a company, it's a limited company here. We need to resolve some issues regarding this, to receive donations. We are dealing with this, but once we settle this, we will release our bank account. So, all the Brazilian community can donate to our company.

K- Let me explain to you what we can do. It's a very easy way to get around it. You sell a pen for a donation, for one cent. People can pay you a 1,000 euro to buy a pen from Keshe Foundation. You are a company. You understand? So, if you cannot get resolved the matter to receive a donation, you sell a pen for a price. People can pay the price of the pen as they like, do you understand?

Ra: Thank you Mr. Keshe, for this. We have even a Knowledge Seeker here in Brazil that she deals with this part of selling shirts also, and this was the idea that came in our community here, to sell a shirt and people can, by buying a shirt…

K- .. The easiest way is a pen. (With) the shirt they can say, the color is wrong, it's not my size, or whatever. But, if you make a donation, this is the price you pay so much for the pen.
Ra: .. we are going to organize ourselves.
K- You can trade and just put in there donation. Just put one item for sale, and that item is a pen. (3:26).
Ra: Okay, thank you very much Mr. Keshe, we're going to organize ourselves for this. It's much easier really, because we're having a lot of problems with this part of the donation here, for our company.
K - You actually are a trade company, you can sell things. And say, if you need it to be delivered, please state, you (the buyer) pays for the shipping. So, a lot of people just pay for a pen, they don't want it to be shipped. Do you understand?

So, you can pay, or a Paypal account into, and then your annual account shows what you received through donation, so you are sorted.

You have to remember, that you put in there, "I buy this pen for the price I want to pay."

Any other question? (3:28).

…

K - Thank you very much for being with us this Thursday, 440 something, and hopefully next week we try to give you something new. Keshe Foundation is working on a technology, which creates a clean water drinking water system. Once it's completed, it'll be addition to perfection, with a producing water and food from the same water. (3:30).

That bubble (on the screen) is a methane. It was a myth, that the animals have to die, that their body and the gases, create oil and gas, from the composition (referring to that the oil companies said the oil comes from dinosaurs). We can see how easily methane is

produced in a natural conversion of the plasma fields of the Sun into matter state of the gas. Look, (another bubble), another life.

Next week, we go back to normal teaching, unless there is something, which is about to happen in the Keshe Foundation, we are expecting it. If completed, as expected, we'll let you know. (Probably referring to millions spent with an organization to bring the technology out).

Please understand, this one I want to clarify, especially in the Italian community, it has caused a lot of misunderstanding with this generator. This generator is, what is in public here, is for demonstration to show that the system produces energy. The generator you buy is for a 2 kilowatts energy system. It's different than a plasma system, which is supporting to reduce your electricity bill. You can buy both systems and interconnect them (together). Or you just buy the generator and insert the generator. Because I know a lot of Italians had a lot of problems with it.

It will be a very small size, smaller than this refrigerator. It's a 2 kilowatt generation power system, that will be delivered. The big box is just a demonstration to show that they produce this power, it's a continuous power production.

I think it's been put at 10,000 Euro, you have the gas production system, which is now on, and you can order it and purchase it. We'll try to get this out as fast as we can. (3:32). The same with the CO2. CO2 is not for this presentation of today. (Today's presentation) is primarily for the governments, for the change of the course, in the Russian gas boycotts. We use this presentation for government officials to view, to test and to expand as fast as we can, in the coming days.

Thank you very much for today. Thanks Rick for being there. And you never know I'd have another surprise for you for the next Workshop (Plasma reactor Group).

R: We look forward to surprises Mr. Keshe. Thank you very much. Thank you for continuing to surprise us even though even now, a dozen years later and many, many hundreds of workshops. And we still get some beautiful surprises. Thank you.

K - Thank you very much. I hope you enjoy it. I think the best thing is for you knowledge seekers, to purchase the Energy Gas Units as fast as you can, that we can put it in. Then the governments and can see the change. Then you can invite the press to your house, you can invite other people to you to see it. That will bring the whole thing quickly to an end, from the hands of the boycotts from the Press.

When you use it, it will go by the word of the mouth.
Thank you very much for today. Hopefully we'll see you next week or if something happen interesting we'll tell you beforehand.

Proofing complete.

443 KSW July 28, 2022

END

444th Knowledge Seekers Workshop; August 4, 2022

(Quick Index 22p Introduction , Proofed and Transcription done, need to do, Key Phrases, Words,) (Auto transcription from Elias)

Gas Units are for elevating STM and planet; Iran developing nuclear bomb - walk away; New Emotional Covid; Transmuting the envelop;

Topic Index:

64th birthday Mr. Keshe; Reveals true reason behind Gas Energy Units - to elevate the soul of the planet; Gas is in plasma state not the same as matter state gas; Burn as much as you want and leave them running in the atmosphere when not using - elevates the Soul; Mr. Keshe regrettably steps away from Iranian government for pursuing higher enriched nuclear material for a nuclear bomb - but not from Iranian nation; Will move production of new units to another country; America leader proud to kill a man - is unacceptable; China and Russian behavior has to stop; The process Man is going through - will be the same for Universal Community; Liquid unit - like diesel and petrol; Breathing the Gas elevates the soul - 3,000 to create Dome of Peace around planet; Mitra choose Earth to start change that will spread throughout the Unicose; 444 is luckiest KSW; Covid mutating into Emotional Covid - depression and suicide; If needed will do Covid Blueprint Day; new method Gans's to use; Gas Units can also be used for Covid; Winter flu in the summertime - why Covid rising in summertime; Universal Community never interferes with other races - evolution is beauty of creation; T is explained in simple way everybody can understand; Summarizes what has been happening with Flight simulation systems; The purpose was to create an envelop - and with that move the soul; This has been accomplished; Transmutation of people from one system to the other will start; May do more tests on Rick's program; Passenger of Universe have been in systems - waiting to go home; UFO is matter state low knowledge; Language groups carry same field strength - multicultural travel; CO2 plasma gas already tested in Ghana - puts out fire brings back to life, does not kill like CO2 matter state; Heal old burn scars; Growing teeth for old people; Mobile phone system could be used for retrieving criminals; Planet expresses emotion through weather and earthquakes; Rick shares his emotional and gas allergy problems; Importance of smell during transmutation; August 7, 2022 fake Belgium court case against Mr. Keshe expires - will launch massive health application around world; Love of God taken from nation of Belgium - observe what happens to them over next centuries - like the Jews; Souls who refuse to accept T - will still learn and evolve; Twinity system of the Earth - will have same life as earth; In November FS will have 4 units to travel the Universe (2 units are for solar system); Souls can never harm each other - make agreement - law of plasma; When you see killing or accidents - interaction of fields - processes to learn from; Stereo system to listen through the soul;

Gas systems for farming; Cannot change the past what ancestors did - but can change the future .

ENGLISH TRANSCRIPTION

(:12).

Mr. Keshe birthday 8/2 ,, videos .

(:22).

K- (:24) . Thank you very much. Good morning to you as usual, whenever wherever you listen to this series of Knowledge Seekers of the KF SSI. It feels much longer than 64. It looks like 6,400 years. It's teaching, which is going on for years and years, and somehow, somewhere, we manage to break through in some pieces, and bits, and get some knowledge done, and some sharing. There will be hopefully better days to come.

In a way, today, after the last two weeks of the Blueprint workshop, with the production of the Energy system, and the Gas system. There's been a lot of questions by the Knowledge Seekers (KS) in respect to these systems, and what it is, and how it is, and what's the difference?

Initially, we showed the energy saving system, which is put in the first part of the demonstration by the Iranian team in Tehran. That system is primarily to optimize the use of the energies in a way, by doing so, allowing your nation to benefit by it. You look at your own saving, but you got to understand. When we speak about the energy saving unit, which was shown, and a lot of people can, what we call, use it. (:26).

It's not that you are saving 50% of the real power supply coming into the house. You save 50%. But, if a large number of people are connected to this system, you save massive amount of finances for your nation in building power stations. And spending for infrastructure and everything else.

As I said, we always look at what saves, what we save in the house with this unit. But the prime position of it, is when you build up to even 80%, it means, if the other people using the same system, and the technology (T) becomes common, it means instead of building five power stations to feed the same group, now you need one power station. Because you're all producing, and you create a condition, that soon the system becomes self-supplied.

One power station is $10 billion. One power station $30 billion. It means the saving for your generation, and your future generation. Your children don't have to pay for the energy you are using today. That's why we are doing today. When we use energies, especially in countries, which are going more and more nuclear, or even the dams, even the power stations gas power, fuel power stations. We're using the power today. We build

the power stations today. But the loan on power stations, (:28). are paid over 30 to 50 years. We enjoy the time, we burden our children and grandchildren with our pleasures of today.

This is what the power generation today means. It doesn't come out of nowhere. Even when you buy solar systems, you borrow and you put, and then it's just for the time when it's short time. Long term power generation, which most of us depend on. It's the joys of today, that our children will pay for, our pleasures of today. The fridge, the freezer, the air conditioning, we pay something for it, but the loans are paid by our children, with the interest on the end of it. The worst condition is the nuclear power stations, that our great grandchildren will still pay, for the ice we took from the fridge today.

The power Enhancement Units, this what we call, what we showed in Tehran, is for you to take less, that future generations don't have to depend on it.

When we showed the generators in what we call, last week, two weeks ago, on the Thursday teaching. That generator is totally different ballgame, a 2 kilowatt generator, or a 10 kilowatt generator, which Keshe Foundation has put up, for sales to be added. Understand what we do with it.

If you go on the Keshe Foundation website Sales, we specially put this on, since yesterday. (:30). Because a lot of people have a very big ?? I buy a two kilowatt generator for 10,000 .. Euro. Or if I buy a 10 kilowatt generator for 60,000 (Euro). I can buy the same power generator in a diesel, or (another) fuel, for maybe 2 or 3 thousand, or even 500 Maybe, maybe 2000. Yes, you do

Take a 10 kilowatt generator, you buy a generator very cheap, yes? You can buy it for about 2 to 5,000 Euro. With the Keshe Foundation generator, this is what you pay, and are not responsible for. With the other generators, which you have, and you can buy, is the story of the same, with the power saving unit. This will cost you anything depending what kind of fuel you use between 10,000 to 30,000 Euro a year to buy oil for, to burn, burn in the society, burn in the environment. The same goes here on a full supply, you're running up to 60,000 Euro, every year. Every year you have to pay for this. This is why most of you don't have a generator. Because the burden of running it, is permanent.

And at the same time, all the things, which now become fashionable with it, comes with it, Global Warming, (:32). environmental damage, oil production, and everything else.

So when we put a two kilowatt or 10 kilowatt, for what KF has put up for sale, this is it. You accept responsibility for that period, and that's it. It lasts maybe 5, 10, 20 years. If you go for 10 years, you save 100,000 Euro. If you go for 10 years on the 60k, it will save 2 to 300,000. And we still don't know what the speculation on the oil prices will be in the future. Use gas, but you've seen what happened with the Russian gas pipeline.

This is why we brought in the power generator. You will stand responsible for what you use today. You don't leave any mess behind. There is no burning to leave things behind.

We can introduce in the coming time, gas generator using the Gas production system. But when we have introduced our gas production system, which will be down the road very soon, there'll be no environmental damage.

But again, it's a conversion to a conversion, where the power generators are conversion of the universal energy into what we call, energy you use. So when it comes to buying a two kilowatt Keshe Foundation generator, future cost is zero. You buy two kilowatt generator for next five years, 10 years if you can use it full, it will be about 100,000 Euro. (:34).

If you go with a 10 kilowatt Keshe Foundation, your cost is zero. When it comes to 10 kilowatt full time, you're talking about 250 to half a million expenses, ?? next day. This is where we come to change. This is where we bring the change.

This is where the change sits. Nothing is left for the future generation to pay for. No damage left for future generations to cover and clean up for. We take responsibility for our own. We take responsibility for what we create and we use. This is where the difference comes. When it comes to present power generation you buy? Where is going to be the next fuel? When is the gas going to run out. When it the fuel going to run out. This is where we come into play. Where we come to change fundamentally, the totality of the work.

If you lived in Africa. If you lived in the countries where you depend on generators, on a frequent basis, you know exactly what this means. (:36). Bringing the tanks, finding the fuel all the time. If it's not going to run out. Generator is there, is the rest of it going on. All the repairs and everything. Keshe Foundation generator is a solid state, there are no moving parts.

Then it comes, what's next? Can we use these power generators in our motor vehicles? It's not bound to the house anymore. It's bound to what we can put in our cars. Do we pollute. Do we leave a cleanup for the next generation. This is where, now you can see the figures. You can see exactly what it means. New technology. New Life. New way of doing things, that we don't burden our children with ??

I am, as a nuclear physicist, an advocate of the nuclear technology. But in a way, in a hidden way, in these technologies is hidden universal, what we call, nuclear science. That's how the energy is ?? produced. Then ?? with it becomes everything else. Now it's time to bring that change in. It's time to bring this position, that we understand.

Coming to the Gas production Units, (:38). it is the same. The gas production units are there, made for you to bring the change. To bring the next step, to bring a new dimension (D) in the production of gas.

Where while you're using the gases, while you're using the structure of the gases, your Soul elevates to a new D. You're not using a gas in the matter state, you're using a gas in the plasma state. What is the ingredient of the methane gas? (CH4) Energy (H) and connection (C).

Isn't it the way you control your breathing? You'll find a way, to connection. With a matter state gas you don't have this. It's a matter ?? Isn't the Gas production unit, a way to elevation of the STM?

You've seen this. You understand it? As we said, when it comes to gas production of the CO2, with the man's system, you put the fire out. With plasma technology, you put the fire out, but you elevate the STM. (:40). You allow the man to live. It's a different, but the same name. It's different, as it brings things together.

As I said in the teaching last week, you say you use, we produce CO2, as you saw in the machine, CO2 gas. What happens when you add this to a drink? You get, what you get on the street. What happens when you put a plasma CO2 in the drink? Isn't every bubble, an elevation? We have found shortcuts, but fast shortcuts to bring mankind, the Soul of the Man (STM) to the position of the understanding of walking away from conflict.

We're not selling a, .. Gas unit or CO2 unit. As you're buying. Yes, I get the methane gas, I get CO2, whatever I need for my fuel. But by burning that fuel, putting it in the back of the car, putting it up the chimney in the house? What do you do, ?? with it. What the planet Earth did not give to the man at the outset, to make Man a peaceful man, now the system in a bigger structure does.

Don't forget I always said, one single atom can cover the U. (:42).

The introduction of the Gas units. The introduction of systems, which we brought you from the beginning of the time, past few months, I've told you, these are universal systems. Those of you who come close with working with these units. The EU for energy, the EU for what we call, Gas production, you will feel the change. You will understand the change. You will see the elevation of the man. Nothing I bring is coincidental, or for the sake of just bringing something.

The target is peace. The target is to bring peace. The nations who go for war, they'll walk away from it. Later on today I'll explain to you why I have broken ties with the Iranian government as of this week. I do not see any need for nuclear purifying in the new cycle of what we call, fast, what I call, death machines to go into operation to produce more pure enriched nuclear material for weapons.

This is not the need for a nation. The nation is suffering with hunger, and flood. We do not need to make a nuclear bomb. Purifying more to push, (:44). that one day we use it, and we show our power. The power of the knowledge in Iran is beyond nuclear. and Iranian leaders are blind to it, or try to be blind to it, to show they can to do, to force others to listen to them. They should show the power by knowledge, and not by weapon.

It is regrettable, after 45 years of supporting the Iranian government's in different shape or form, with scientific work. I walk away from the Iranian government, but not from the Iranian nation. Yesterday I attended the Iranian embassy, and my points are very clear.

Iran does not need to purify anymore, and the use of the centrifuge, the new Six Series, is absolutely not in the interest of any nation, not even Iran. We have floods, which thousands of people have died in past two weeks. We need to help those, ?? ?? that one day, to threaten the State of Israel, or America. And we take them because of their power.

The amount of the information and knowledge spent on nuclear weapons technology at the moment is unacceptable. A nation suffers, because the few want to prove they are bigger and better. My point is very clear with the Iranian government. You lost one of your leading scientists and your supporter. But not the Iranian nation. We cannot support a nation, or a government, which is bent for nuclear weapons. Even though we gave so much. (:46). As they say, we can produce nuclear bomb as we wish. For what reason? When you have a plasma technology, which is more powerful, and can bring more credibility, comfort to the nation, then weapons.

The nation has to be a peaceful. The same goes with the support for the Chinese. Creating war condition in the South China Sea, for territorial demand should be stopped. ?? Let Taiwan with love and care, and technology, and everything else, which they have to add to them, for them to be part of it. Not threaten by force. We see the same thing with Russia and the Ukraine.

We introduced this new technologies to stop war, to stop conflict for resources. Not for superiority. Superiority of the nation should be in the knowledge, and how to serve, not how to kill, how to destroy. I asked repeatedly, to the Iranian government officials to take the path of peace, and not the conflict. The what I call, feeding gases, as they say to Sirius six centrifuge, to create more higher level of uranium and plutonium, for them to be a nuclear power, to whatever they want to do, is not acceptable. Not to me, and not to those who are the "man of peace." Because we know what is the reason behind it. (:48).

It is regrettable to withdraw the support on the nuclear side for the Iranian government, not on the other side. And this is the paramount for our work. We need the nuclear technology to reach the nuclear plasma technology, to be able to become "man of U." Not to have power to show we can, and that we can kill, and do more damage. Wisdom was to negotiate. Wisdom was not to what I call, ?? ?? the problems where we need to support the nation.

The T of the Keshe Foundation will be diverted to another nation for expansion, and peace application. This will be shown very soon to the KS. We move to guarantee the work we do, to guarantee the work of peace, and not to there for the others to use our technology, to create more mayhem, be it China, be it Russia, be it Iran, be it United States.

What I saw this week, Americans being proud of "Missiling" a man on his balcony, because is the head of al Qaeda, is ridiculous. It's unacceptable. It becomes more unacceptable. Killing has to stop. The reason for it is very simple. (:50). We have shown you the Enhancement Units (EU) for flight. And if we had, and we have the collaboration of nations who are in this game of the, what we call, plasma technology, like the United

States, like Iran, and the others, you don't need to kill. You bring these people, you transform them.

You bring them live, and you show, you understand the elevation of the Soul, will do the job. There should be no more "missiling" and bombing one, or the other, or trying to get one, and be proud of it, that we did it. "Missiling" a man on a balcony, the worst man on Earth, is the same man, he is still ?? Should be done with the new technology, that in a way, we can transmute them.

Most of you, some of you have tasted it in the teaching with Rick, last week. We should not find solution in killing. We should not find solution in destroying. With the new technology, we have to find solutions in transmuting, in bringing to understand, and maybe, maybe we all get elevated by understanding.

The whole process of the KF teaching is peace, bringing peace, creating the condition to bring peace, not just by talking it. We are not a Greenpeace walking down the streets, and paid by the Russians, and spend down the road, after the what we call, (:52). the peace talks of the 70s and 80s, in the pubs and what, god knows somebody paid for us to show we talk.

We bring the knowledge, and the energy units, the Gas units, which was brought out, is part of that process. Let me explain to you something which is very easy, maybe you'll understand how I have ?? explained ?? before and you're responsible for it. You will have to work with us with it. It's not you may work with us, for it.

The CO2 GANS unit, which now is as part of the Gas Units of the Keshe Foundation for sale. You dictate, I want methane unit, or I want a CO2 Unit. You as the Human race created enough CO2, and you created mayhem for yourself. We as Keshe Foundation, CO2, doing the same, we elevate the Soul of the planet, and the CO2 released, brings the elusive what we call, elevation of the man, and the STM, the animal, the cat, the dog, and than the rest.

If your CO2 could create such a global warming as you are working on. Can you imagine you're running a CO2 plasma systems, as a gas. Conversion of one into the other. Transforming the CO2, (:54). absorbing the systems, and returning it back as a food for humanity. What this planet could not give, I have given you a system to do.

Now you understand what is on the table, what in the past two weeks has been brought in. You use the fuel to burn, and at the moment when you have the methane gas, and you burn it, you get a CO2 and you get water. The same with the KF, but the CO2 you use, for burning methane, will elevate the Soul of the planet. The water you produce will bring the nourishment to the seas and the oceans in the plasmatic condition, to bring a peaceful condition.

We are selling you the CH4, methane Gas units. You're happy that you got a cheap gas. I am happy, that I start changing the man, the animal, the trees. and the seas and the oceans

back to life. What the planet missed to add, we add as an energy into it. You're man's CO2 brought mayhem to you, in what we call, the Global Warming. The Keshe Foundation plasma CO2 brings it right. The ?? expansion of the soul. (:56).

Now you understand. Now, you see how easily when you understand the technology, you can bring the change. You wanted to buy the Gas unit, if I can use it, and benefit by it. You wanted to buy the CO2, if I can make it ?? ?? Buy the units, and let it run outside when you're not using it. And change the condition. You go every Sunday and you throw (Gans) water of CO2 to the rivers. Now with this we change the atmosphere. It is not going to end. It's not going to cost you anything. When you're not using the gases, you let it flow in the air. When you need it, use part of it, and again add to it (let it flow in air).

The condition and motto of Keshe Foundation has been on the website. "We're here to serve and not to be served." Don't look, I am going to close the gas, because I'm not using it. Leave the gas open, and let's elevate the soul of the planet.

The change, bring the change. When the animal doesn't kill. When through the waters when you're burning. It gets fed into the pipelines and to the rivers and the oceans. Burn as much as you like. There is no end to the energy of the universe. (:58).

Now you understand what has been put on the table. What the past two weeks Blueprint, as you looked at it, was to your own benefit. If I get a cheaper energy, if I get something else. Now you understand. It's you serving humanity, serving the planet to bring the change and the mayhem, which our previous generations, and ourselves has brought on this planet.

Gas pipes from Russia what does it bring us, more mayhem. Where do we go from here? How do we add to this knowledge? Which other ?? games I have to play for you, to understand, KF is not a game. It's not for your generator. It's not for your what I call, Gas units. It's not for when you're sick.

The beauty of it is when you use these systems, would you ever get sick again? Or would you need to eat, because now you're in a plasma condition. When you put a CO2 or a methane gas in the house, you're always afraid of what happens to it. Now, when you burn the methane, you're feeding yourself with the free energies of the ?? Gans's (gases) you produce. (1:00). The air man breathes is the way he elevates himself, and lives on this planet. The introduction of the Enhancement Gas Units, is for that purpose only.

You look for the benefit in the pocket. I look for the change in humanity. We gave you the Gans's, we give you through the energy, now we give you through the essence of your Creation and life. The air you breath. Because the gases you use, is the conversion of what we call, the energies of the universe, in what your ?? body does. Leave the doors and windows open all the time when you use the system. Let it feed this what we call, this burden sick planet.

What I've done is no different, then what I've done in the process of the use of the system, in past 10 years. (1:02). Look what we have taught you, even in your Diabetic Cups in your diabetic life, in using our systems in one way or another. I gave you the Gans's to breathe, I gave you the Gans's to drink, and I gave you the Gans's to cover the body. To walk away from sickness.

Aren't we doing now the same thing? We are giving the gases for the planet to breathe. We gave you the waters, and we gave you the plasma energy units, you fed the surplus of the planet, in the waters, with the Gans energy, it ?? needs connecting to the universal system, feeding center of the planet. Now with it, the gases we have covered you. The body of the man is no different, than the universal system. It's just to translate how to feed it.

I knew how Corona, we told you to wash yourself, breath from the Cup (of Life), and drink from it. You breathe, you release the gases to bring the change of the air. You are doing the same thing with the waters you throw in the ocean, and with the energy units. We create transformation of energy across the planet.

Knowledge of the Creator is the same, it's how you use it, which counts. It's just different body, one is a human body, and one is a planet, but the ?? work is the same. (1:04). This planet breathes air, and that breathing effects its emotion, how exactly ?? people ?? The water it creates, how it ?? ??

We have a beautiful saying in Farsi, we say, " ?? ??? " "drops, drops collects and then one day these drops become an ocean, a sea. This is what we do drop, drop, ?? from the system. The system of this planet with the "CO2" and the Global Warming, and all the damages we put into the waters, and the rest of it.

Now it's time for repair. We paid using the cars, we paid using the electricity to damage the planet. Now we pay to repair it. The system is the same, there is no difference. We have to entice you with the Methane Gas Unit, and show it to you. The CO2 Unit, because the Russians have cut, and you're not getting enough gas in Europe, and the rest of the economy collapses. We use the opportunity to heal the planet. (1:06).

I was talking to a KS in the past few days and I explained, and it was understood straightaway by the KS. In the Islamic world you are asked once in your lifetime to pay a visit to Mecca, it's an obligation. What does this do? As a Christian you ?? visit to Jerusalem. As the Jew, you go to the same place. How many millions of people go to these places every year? As a religious obligation. And who gets wealthier. The family of those who ?? founded, and those who stayed and saw how it has grown.

But wasn't the purpose to bring the Soul of the Man (STM) to unite. And all these, and now its become commercialization. Now you have to understand what the next cycle is. How the next cycle is set. The cycle this time is for the whole of humanity. Not just a few to benefit ?? ??

This is why in the Keshe Foundation I've said many times, we don't make temples. Nowhere to go to pray, except within yourself, in your soul and the elevation of it to serve the others. The understanding of the purpose, of the knowledge, which is important. Not how much it serves you, how much you save.

Where we sit, and how we bring this technology, and how we brought the technology is important. Now you understand why we have set out for this technology the way we have. (1:10). You got to realize this process for the man and the ?? , applies in the same way, and the same level, in the Universal Community. We say we take energy from the cosmos, we take energy from the environment, to give you the generators, but this energy comes from somewhere, and it cannot be put back in, to the same environment polluted. It has to be in a virgin, that it becomes a lifesaver, it becomes for the expansion of the use of the Universal Community. This is where all our work has been. Maybe financially, the new systems benefit you, but morally it repairs the damage, which you have done in the past, your own generation, and the generations before, and the ones to come.

In the coming months, we'll introduce a liquid production. (1:12). In a way, very much like the diesel and the petrol you use in your cars, that while even you're using these fuels in your cars, you're changing the planet for good.

In the moment, when you sit in the back of a car with the exhaust blowing, you smell the CO2, from the engine, and the rest of the damage. Very soon, you'll want to be behind that car because of the energy it releases, elevates the environment, the man, and the STM. In a way, as I said, the time of refining is over, and then what happens?

While you are driving in your little car, happy, using the technology, you're feeding the man on the street, both by the energies and by Soul. At a moment in our fuel tanks, we add additives to make it run smoothly. Using the new technology, we add additives, to feed those who get the exhaust. How many of you had a Cup with the orange, and the others. How many of you have been an environment of the Enhancement Units and you don't eat. Now you understand the implication of the new technology we brought.

We use your own cycle of the knowledge, (1:14). to change the position of the humanity. But we cover it under the materials, you feel comfortable with. We don't need to become allergic to diesel or gasoline by being near to it. We recover, we elevate our Souls and everything else, which comes with it.

Now you understand the purpose of the Blueprint weeks, and all you were interested, "why does the light blinks?" That was to blink the light of your soul, maybe you understand. Now having these Gas units, having these Energy Units, is a combination of the work. When you have an enhancement power supply energy 2 kilowatts. When you have a Gas Unit in your house, switch it on, then you've added the energy saving, which again saves on this one, which allows you to create the cycle. You just again looking at that.

But what I look for, you create the environment in your house, in your life. Ask yourself very soon, why is the shopping basket getting smaller and smaller? Why the fighting and discussion, and aggravation in the house, has changed to love and care. Why more birds and animals come to my garden? (1:16). Why my environment, and my neighborhood feels better, because it's getting what we call, the byproduct of that (the systems fields).

You were happy with the paintings on the wall, or (Gans) additives to your paint. Then you're in the room ?? ?? With the new system the whole environment ?? of that room is set to change. But the beauty of it is again much, much deeper, if you understand it. And that is a simple process. Different enhancement systems creating different conditions of the soul, in different parts of this planet will link up, because you're using the same source base, in the M fields in plasma condition link up very ?? easily.

Now you understand why I pushed for the 3,000 Gas Units when you volunteered to take ?? ?? for sale . 3,000 dots across this planet will (reverse) most of the damage of the CO2, on this planet very much, very rapidly. Now you understand that process. (1:18). Creation of the Dome of the peace, comes with every animal to be there. You cannot go and feed every ant, you cannot go and reach every lion. To feed him the Gans's, to make him calm, or whatever, or to feed him, that he doesn't eat. This process does.

The more Gas Units we put into the environment, the faster we'll achieve this process. Now are you worried if I get my generator, that I paid less gas, or will the time come, that you understand your generator, generates the condition, that no man kills, no man kills for anything.

Then one surprise to all of you, will come, and I'm sure you'll be shocked by it, is when you create this condition. When you elevate the Soul of every man ??. Would we create in a simple word, the new child of the man. The "man of Mitra".

The love of Creator fills every creation on this planet, and not just yours. Without your knowing and in the future generation understand, (1:20). the most significant part of the whole teaching of the Keshe Foundation in past 17 years, was the past weeks. Where the course of Humanity, not just for saving himself, but others, will bring change in new Generation of ?? the man. The air our children will breathe, will be the air of peace. The air and the water they drink will bring the ?? knowledge that they will not kill.

The systems we put out, is to compensate for what this planet from the beginning, fell short of. If you have the wealth, buy as many of these Units, and give them to your enemies. Wrap (rapidly) it around the world, that we bring the change. ?? ?? Enhancement Units the ?? receiver, change the course of humanity.

The Blueprint has actually started today. If you remember the Gans, that we started the MaGrav Blueprint Day. We showed you how to make the coils and you were interested in how, which turn, right turn or left turn, that I can save something, to show. The Blueprint of the past two weeks is today. (1:22). Now we show you how to put it together, to bring that change and benefit to humanity. It's time for change, but this time

the change comes for us to serving the others, and in the process we might be served too. Then you see the difference. Then you see the change.

Mohammed made it obligatory to go to Mecca. We make it obligatory to have a system in the house, for you to serve the others, and that becomes your Mecca, to serve yourself, and others ?? more. It's your responsibility. This job does not finish here on earth, you are becoming the passengers of the U. It's your responsibility wherever you land, or you become the soul of the Creation of a new cycle, to make sure your soul is the provider of the Totality, that no race you create, will become ?? burdened and a danger to the others.

Put these around the prisons and put these systems in the hospitals. Very soon all the wards will be empty. They won't break out, to create ?? They will be let out, (1:24). because they have elevated the understanding process. They become to serve the humanity. Humanity is not, that now you know, you don't do. Humanity is not to do and then ?? the difference.

It's the responsibility of you KS to make sure this process fast, and as efficiently as possible, is done. Why you still benefit by it, by maybe reduction in the fuel, or reduction in the electricity bill. But in fact, you set up the process of the change of the planet.

As I said to a diplomat very recently, the gun policy becomes plasma policy. One kills and one gives life, but it's more efficient. Because nobody suffers with it. There's no father losing his child, and there is no mother, not seeing the child dead, or the child waiting for the father t come home. Accidents and incidents happen, but doing it ?? (deliberately) cannot be. That's the whole purpose of the new systems we brought you.

You know something, (1:26). when we looked at in the whole structure for you to understand. In this picture, when you breathe the air, as I taught before breathe, the air passes through the nose, then at a point closest to the soul, to elevate the STM.
That's why we give you that breathing system. Breathing system is for man for elevation of the Soul. And the residue of what is matter state will go to the lung as energy. Now, every one of us breathes that's energy, all the time. Can you imagine what the next generation of us will be?

The elevation of this, elevating the Soul of the Totality of this planet, will elevate the Totality of the Unicose. As it takes from it, ?? gives more to ?? it. And now you know why Mitra choose earth. He has gas. He has water, and he has elevation of the fields of itself, to lock into the Universe, and we need to pass on, to change, to bring that ?? peace. Mitra did not fall in love with earth for the beauty of it. She could see the implication of what it can ?? deliver ??. The seed which ?? would bring to the world, and the U. ?? ?? ? ? condition of a peaceful U.

There is more purpose to the STM, then just the animal behavior.

One day, this teaching of 444 (KSW) become the lucky, ?? as the Chinese believe in. (1:28). It's the luckiest teaching you have ever received. If you understand it. If you

understood what was shown in the past two weeks Blueprint Days. In the last two weeks Blueprints, we showed you how to make the coils. Today we showed you how to connect them, to bring that saving and serving of humanity.

This is the best gift I could give you on my birthday at the time. I gave you the life of birth, of the new cycle of the souls of the ?? Creator. Maybe you understand what I said, in the Intro, when you listen to, that the human race will change, and this change will be beyond ?? imagination.

Our presidents will not go and shout, that we killed a man, we missiled him direct. They will be proud to serve the man, by elevating all the Man. ?? balcony or in the ?? mines and the oceans as a fish. I hope, I brought you home the biggest gift humanity could ever receive. And I hope we do not have to in a way, bring the knowledge this way to man. (1:30). But in essence that's the way you ?? receive it, You had to see the whole process to ?? believe in it, ?? to deliver it.

We go for a break and come back, then we answer any questions you have. There is another point, which I will go back to it after the break. Which again has to do with a lot of us, and that's going to impact a lot of us, ?? for past 2 years. We'll call it, the "Covid Blueprint Day." We will speak about it after the break, that you might have found some answers to you, in this part of what I brought.

Proofed to here >>

>> BREAK <<<< 444 KSW August 4, 2022 (1:36).

K- Yes, we have to say something, which is important, maybe for us to realize. We see the situation, that we are coming back with the whole problems with Corona in a very drastic way, with the winter time there could be. A new generation of Corona has been ??. We saw this from last year. Now, we've seen it for the second time and in a larger scale.

In all the Coronas we watched, we monitored, you know the papers ? , we always consider different shapes and forms of Corona, what is going to. And when one of them considers to be there, to touch the emotion. We have seen this Corona, the new version, and a number of Knowledge Seekers have been touched by it. (1:38). The new version of the Corona, which we have seen, we are ?? observe it to be, we are aware of it, we have

had it before, we know how to handle it. It’s the corona, which touches the emotion. This Corona is of a higher order strength, as it’s mutating, and can lead, and show the signs of the emotional conditions.

We have seen, reported to us, different emotional conditions, which if need be, we'll cover it in a specific teaching, separately as a Blueprint. But, if you get touched by the new Corona, emotionally feel different. Last time was physical pain and everything else. This time, we're getting reports of a very drastic conditions, and some of them lasting much longer, physically and emotionally because now the emotional will touch the physicality too.

So, you please be aware, that if we see this continue, the Keshe Foundation will put a special Corona session as we did two years ago to cover this process. This new Corona needs a totally different approach, but in a way similar to before, where you have to elevate the Soul very rapidly.

Our people who have been, tested positive with this new Corona, they report to us suicide, depression, and all sorts of things they are facing. (1:40). The physical pain is much worse than before, because they had it before. Now we had it in three or four of the Knowledge Seekers around the world, who have had this new Corona. It's very drastic.

So, we set out to do a blueprint for Emotional Corona, if we see this expands rapidly. But again, as I said, the emotion of the man is to do with what we breath, more or less, it can be affected. We will go into the condition of the creation of, what we call new gas units, which we’ll literally, breathe around the house to elevate the Soul. We will go through a process of, what we call, Corona Enhancement Breathing Unit. But we are waiting to see the extent of this new version, but we are not getting involved in it. We just change the environment that it creates condition for this.

If you get entangled with this new version of Corona, let us know very rapidly and we'll see how we can help. It's not that easy, some of you, we've got about three people in the Keshe Foundation in different parts of the world, battling with this in the past couple of weeks. We try to find, what we call, a comprehensive solution, as we did with the first cycle of Corona.

The first cycle of Corona was a physical, now it’s physical and emotional, but because it touches the emotion, physical part becomes harder. (1:42). We'll bring this to you, we're waiting to see if and how extended this thing is. We've seen it in Europe, we’ve seen it in Asia, we’ve seen it in the US. But it comes in a different way.

The European version has been horrendous, and we've seen the same in the Asian one. But it could be is, why we are not jumping and panicking is because, if you remember, the African swine flu, which we've got involved. In the summer, in the northern hemisphere, is always cooler. African swine, which is a high temperature, what we call higher temperature flu, which is in Africa is more or less, has now appeared in the Covid. Which means now we have a very much African swine flu behavior, which is a heat level

virus in the northern hemisphere in the summertime, which we are not used to it, and the effect of it is drastic.

We are observing, we want to know if any of you Knowledge Seekers, or somebody you know has been touched by it. It's a summer version. We never had a summer flu this way. This is why we still see continuation of the Covid in the summertime. Because if you were with us in China, (1:44). when we handled the African swine flu, which is a high temperature, what we call African temperatures virus, which in the North we are used to, viruses are mainly in the autumn or winter. Now this virus has mutated like Africans swine, into summer flu condition. That's why the governments still see continuation of increasing Covid.

Some of these Covid's, because of the higher energy now interface, interact with the emotion. We were expecting this, something was obvious was going to happen. If it changes to summer, and we saw a consistent increase of Covid in the northern hemisphere during the summer, and conversion was imminent. Especially in much higher temperature areas like Middle East in what we call ??, Arizona and that side of the part of the world. Where the heat is consistent with the flu coming in, you will see that conversion of summer flu's, which is a high temperature, and we are not used to it as such. Because it's higher, our emotion works at a higher order, than our physicality. So, now effects are emotional.

But we had reports of these. We saw this last autumn, and the autumn before, it creates a massive depression. A lot of weird psychological things comes with it, the depression, psychosomatic side. If this carries on, we might see it, converts back into the winter side. And if it goes, that ?? winter time, (1:46). we have to watch the suicide rates around the world with the people who had Covid, which we were expecting, but not so drastic, as we've seen it, now.

So please be alert, we are not doing anything, or explaining anything extra. It's just that you have to elevate the ?? , and the shift of the emotional energy out of the body as rapidly as possible, or increase the emotion of, to be able to be in a level, that the virus cannot reach it. In a way, it cannot reach the level of the strength of, that can interact with.

So now as I said, even when we were talking about the Covid, last year, the year before, in space, these are the viruses, that we will encounter. Especially when we reach what we call, the central galaxies, when we reach new stars, these kinds of energy packages is very common and these high energy centers. We've seen this in the Universe with specific areas, and it touches on specific races. There are races, which never go near a star, they never enter the zone of the high fields of central galaxies. Because the spectrum of the energies effects their operation, their lives. So, it's not something uncommon.

Now we've seen it, now we know it. But we start seeing what we call, "Emotional Covid" appearing around the world in higher rates, than what we saw last year, and the

year before. We saw it for the first time ?? a number of people last autumn, but it disappeared, it just diminished. (1:48).

But, this year, now we've seen it in the summertime, and I said to Rick, we might have to do a Covid Blueprint, that you understand. But primarily be aware of it. We got people here, Knowledge Seekers who can tell you what happened to them. We prefer them to stay in the background. But some of you in this room, in the chat room are listening, in other channels, already have been affected, and we've been in touch with.

So be very much aware. They tell (ask) me, what is the solution for it. At the moment, we see a solution of a new Gans's to be released, and that it becomes a breathing all the time. You cannot confine yourself to whatever. Became the problem with Covid before. It was somatic, had to do with the body. Now it's somatic and psychosomatic. Because now Covid reached that.

The possibility of the virus to reach the level of the energy of the soul. is very, very rare. It's impossibilities, but still possible. That we'll see another dimension, but we do not expect it in the human race. The human race is of a structure, which has the capability to mutate itself. When it mutates we'll see new features of man. But man will survive, because of this characteristic, multitude of fields which create the Soul of the Man. Man will evolve in the shape and color, and all sorts when we see the Soul condition. We saw a couple in a very rare conditions in China, if you remember, (1:50). But that is a very rare condition to see. But the next phase of this autumn/winter Covid, could touch the emotion.

As I said to one of the Knowledge Seekers yesterday was to follow the death rates, suicide death rate. If we see an increase in suicide death rates in the next 12 months, majority of it will come from Emotional Covid.

We try not to call it, a "Covid Gas System," but we try to release a system, which can tackle this, because it's a very, very specific. It has to be done in a very specific way. It has to be done in a way, that the body of the man can handle it. To take this extra energy out of the emotion, or emotion, which are supposed to reach a level of satisfaction, is blocked by being received, that creates depression.

In a way, your soul cannot feed your physicality, physicality in the lack of it, what we call, depression. Is very much, what I explained the depression before, is that my soul does not want my physicality. That's what we call, depression, can be explained in a true sense of the Creation. When the soul does not support, one does not want to support physicality, but the soul of your physicality (STP), what you call, the "Spirit," is there to overcome it, you get .. Covid. (1:52). When the STP, the STM has blocked to reach the STP, this is what we call it, "the point of no existence." We call it, a suicide. But we have to be aware of these things and monitor it.

As we saw last year, a lot of that was put by heart attack and other things, which was the side effects of the Corona. A lot of these places were ??. Now we'll see a lot of suicide, if

this takes shape. We have to watch it, it's the mutation of the standard Corona, to what we call, the same as what we call, ?? (summer) flu, to the summer level, which is a slightly different threshold, it's a different combination of fields interactions.

Any other question.

Q: How many of these Gas units must be sold to change the atmosphere, so that it can elevate all the souls of this planet? And why don't we ask the universal community to assist with the elevation of the soul and planet? (1:54).

K - The more we get this distributed around the planet, the faster we can achieve. We're meeting some organizations in next few days to see how we can do it.

Universal community never interferes, this is their law. We never interfere with no race in space. That'll be the same for all of us. Evolution of science, evolution of the race has to come from the race itself. Because we don't ?? interfere, what else we change, which is the part of our understanding. If you've been on the biological field courses, when they take you to rivers, or they take you to a field, and you're supposed to analyze what's happening in the fields, or what's in the river, whatever, they always tell you, when you pick a stone up, when you pick an animal up, put it back where you got it, you can't interfere with his life.

This is the law of the Universe. Man has to find a solution for it, a permanent solution for it within his Soul, not enforced ?? change ?? man ??. Evolution is part of the beauty of the creation. It's not like everybody has to become a communist, that everybody has become equal, the same. The Soul decide, the race decides how much, and where they want the elevation to be. (1:56).

Q: Dr. Guatua … Thank you for bringing this revolutionary T to the world and has promised to bring peace to the whole world. That is to say we'll witness a new world that we have not known. A world without wars.
K- We hope, we hope.
Q: I'm sure… You have said, you have T that cannot even be imagined by man, and I agree, in the history, in the recent days .. there has been such a flood of T release. For example, the all purpose flight, Mobile experience can now be booked online through the KF website. In fact you demonstrated this in Rick's class, last week, The Plasma Rector Group … I would have loved to be part of that. Now I have a question about that. (1:58). Could you please explain what this technology means, how it works? What is it, that you send through the mobile phone to a man in far (away), or in rural Kenya, for example, that would make that person, holding a small mobile phone, to become a traveler of the universe. Or to come instantaneously to Linz in Austria, and manifest in his or her physicality. This is the question Mr. Keshe, please explain in a way that ordinary people could understand.

K - As the, what I call, illegitimate son of the king of Belgium said to us when we met him up around this time, some 2005, you write everything so simple that the common

man can understand. You have to make it more complicated, that it shows his power, how it is. We explain it in a very simple way that everybody understands.

First of all, there's something I have to mention. Since this week, because now the system's has completed, the way we wanted to do. We asked for over 100 people to test the first phase, and many of you Italian and Germans, and people around the world. We had a couple of people yesterday from Brazil, or the day before. We have people from all over the world coming to the center, and they're still booking for the test.

We announced two or three days ago, we want now volunteers who want to go through transmutation. (2:00). You came up to know, and you told us as I said in the other teachings, I went on last Sunday, in the American teaching. You came to us, we will run into a couple of hundred soon, maybe. It was interesting to hear what you saw with the uncle, where your flew, or whatever. That was for us to perfect the system the way we wanted.

Some of you came couple of weeks ago, we started putting you in two different, in the system 1 and system 2, and we moved you ?? alone, to see which system allows us to have you, only fly through the Soul. Literally people who've been with us in past two weeks, we told you, we sat down and explained to him individually, what happened. Why we put you in the system, when we put you in the system.

The system 1 was connecting the physicality to Soul of the Physicality (STP). We still could see you talking about going to uncle, or doing that. When we put you in the system 2, there was no emotion. There was emotion of the feeling, of being there, but you couldn't dream.

We covered it with in two, three days testing it became very clear, that what we need to do, and we managed to produce a system, which literally moves the soul. This was the purpose of the last two weeks.

Now, this is important for us, because as I said, in the teachings of the before, it was very simple. I'll repeat it again, that you all understand. In the first three or four weeks, we brought you in, and we put you in different chairs, (2:02). and then we put you in the system to see the physicality, the STP and the STM. What we did in the system, we tried to expand the dimension of the STM to literally to come out, and see how far it comes out.

In the second system, we always had people talking about this part, they could still see up to there. When we put them in the third system, it became totally the soul part, they could feel the pressure on the body, where the rest of the body didn't matter. In the first part, people when they sat in the chair number 1, they felt the pressure the emotion, the physicality pressure. The second one (Chair), they felt the pressure being extended to dimensional of the existence, which we cover it by the stomach and intestines. The third one (Chair 3) was totally concentrated in the center with the Soul, which people always talked about, this was like expanding.

What we saw, we literally brought you to this position. The whole purpose of the first four weeks was to come to a position, that we can only create number three for the whole body. Then we put you into the two systems (this was the new setup), the last two weeks, this one (first system) had the condition of the STP and the Soul itself. In that process in the other machine (second system), we just went directly for the Soul.

Those of you in the past two weeks came in, mostly you talked about see the uncle, and bla, bla. I went there, and I did that. (2:04). But t was, we kept on asking you. Did you touch them? Did you feel them? Or did you sense their behavior, and you converted it.

Then, in the system, which was introduced last week (another new setup), we wanted to know anything. And you said, "nothing happened to me, but I feel the field, I couldn't dream anything." I'm not interested in your dream. I was interested in the envelope.

In this system (?? the second setup), when we put you in the first system we're interested in if we can create this envelope, but you still have the freedom to dream or to get in touch with somebody.

In the system (most recent one), we developed now, we are not interested in what you dream. I'm interested in what craft I can do, to move you. I've got the envelope. This was the whole target of the past weeks, to see how we can create the envelope. As you've seen all the chairs are done with. We don't use the chairs (anymore). Because we had to test the technology, if we can touch the physicality, if we can touch the STM, and touch the Soul.

We've got it, and then we have to perfect the system. We eliminated seat 1, in the second system, which became in the past three weeks, to this one. If you came, we just put you in one chair, because this system (the second system) was getting developed. This system (the second system), came into operation last week. We put you in this (system 1) and we moved you there (system 2). Or we put you in this (system 2) and we moved you there (system 1).

All the ones coming from this unit (system 2, said,) "nothing happened. (2:06). I didn't see anything. Did I do something wrong?" (I) asked them, "did you feel the pressure? Did you feel anything?" (They answered,) "there was something." But when they go to the other unit, first unit (system 1), "oh, I dreamt about my auntie, and I went for a walk on the Moon."

So, it showed us that we have created the elusive field force of the STM.

We don't want to know what's in the envelope. We are interested in the envelope (itself), because in this envelope, is you, with your physicality and the Soul. That's all I'm interested in. This is all I was looking for.

But as you know, in research, you always have to eliminate everything until you get to the one you want. But we didn't eliminate, we understood. So, those of you who come to Linz, now we invite you very directly. It's on the Keshe Foundation website. We are looking between 30 to 50 people. We have a number of people who already booked to come to Linz. Starting from around the week, the sixth, Tuesday or Wednesday, 16th of September.

We have a very clear target, the systems now has been set by our team, that we want to put you in this system (1) and collect you in this system (2). In a way we want to do the transmutation using the envelope we have created. (2:08).

Then we want to know if we can carry your soul, that you will feel you're in the second system. Or, as we hope, we bring your physicality with us. But you can't be sitting in this system number one.

You know, when people come to Linz, we noticed, they come in the scruffiest condition, the way it is, or they are dressed up very nicely. But what is important for us, we don't want to take you here (put you in system 1) and pick you up naked in this one (system 2). Because we move the soul, but the physicality of the clothing may not fit in the transmutation.

So, the systems now have been fitted. It's just the last bits to it to be done, by the September ??. Is that we will transfer the Soul, the Physicality, and the STP, but of the solid state matter. You could have a stone as I said, or key in your pocket .. of the STM, and you could have a plant with you. We can't tell you, only people who have no plants, don't want to take any flowers to the lovers in New York, we can't take (you). Those who have a flower taking for a lover to New York get on a normal jet plane.

So, we have now adapted the two systems like this. So, we are asking for 30 to 50 people. It's on the website you have to go and do the transmutation system. We put a price of 2,000 euro on it, because it's complicated. We won't take more than five people a day. (2:10). We want to move from there (system 1 to systems 2).

The reason we introduced the STP and the matter state is that, if you have a hip replacement, we don't want to leave your hip behind, because we haven't foreseen matter state, which is titanium in your hip bone. So, we move you all from there to there (system 1 to 2).

Go on the website, we need this. This is a prelude to be able to transport you on a mobile system across the world. We need 30 to 50 people, that we perfect this system. I've tried to get all the bits of you on the other side, don't worry. We hopefully, we get you all there.

Those of you who want to be part of this process, we need you to reach us as fast as possible, that we know how to organize our work after the holidays. Keshe Foundation Center goes into what I call, hibernation for next two or three weeks in a big way till

about 22nd, 23rd (August). Then we open up (again), but we still do the first phase, not the second phase (transmutation) with a lot of people. But after the 16th of September, we go into the flight mode, which means we go for transmutation. This is very crucial for all of us to do. Very crucial for all of us to compete in a very fast way.

We need 30 people, because in 30 people from different races, different languages, we gather enough database to be able to apply. Please sign up, even today and join this transmutation process. (2:12). We need it, to be able to complete.

Then what happens in October, November, we create a condition in our system. Through this we connect through your mobile phones, to you. Once we complete the 30, 50 volunteers in next couple of months, then we will go to the Austrian government asking for immigration officers to be present in Linz, Enhancement Unit. We need your passport, we need your standard application of, what we call, visa, that Austrian authorities allow us to bring you into Austria.

It won't be a process like, we just pick you up. Those we bring through the mobile to Austria, you have to go to, most probably, a normal visa application entry. If you're European, you're not needed, because on the documents we receive from you, just the immigration officers need to be there to confirm your entry.

Hopefully if you go correct, the next stage for us is, from Austria, in the Enhancement Unit, we send you to Washington, or to anywhere else. We have to have all the permissions from the governments, to allow. The American government to allow you to enter their territory. These are the first things till it's done and then we'll find the solution to do it. Then this process will complete us for, what we call, transmutation. (2:14).

Sometime by the end of the year, if we get all the things sorted out, or sometime next year, or two, then our processes is, Linz to Moon, and then we collaborate ??.

We always use the fastest way to achieve, and one of our fastest way at the moment on this planet is, all of you have a mobile number, the mobile number uses your GPS, and position, and the energies needed to transmute you from one place to another. That's why we need your mobile. We have the first link connection magnetic field through the field of the phones. So, in a way, we say to our system to create a bubble at this position, and this bubble is already connected to our system in Linz, we just called the bubble back.

This is the process, which will apply. Those of you who were with Rick, we just wanted to test from Linz, with systems we have, that you were in many parts of the world, I don't know, 5 or 10 different countries. We wanted to see if we can create simultaneous bubble.

In a way, if our system was ready, I could have brought all of you back into Linz on Wednesday in Rick's teaching. We could have brought you in, you meet as a Soul, you're aware of each other. We've done that with a husband and wife. So, it's not something we don't know what to do. We know exactly what to do with it.

Then you will tell your physicality's, what color dress he was wearing, or whatever. (2:16). It's a physical interaction, the way your dream (of) your mom, she was wearing a blue dress. Now you'll see that, in this communication.

In next few weeks, I might pop into Rick's teachings, because it's scientific work, he does there. Maybe do a couple of tests like this, but we don't announce it. We don't know if we're going to do it. But primarily we use the teaching sessions of Rick for this purpose, of the world communication, and how we do. Then somebody in these units, we must probably chose in a specific way to bring them. Some of you sent us your telephone numbers. This is my number, you can "beam me up Scotty." It's not going to happen that way.

We have to decide, we have to see at a position where we are, and then randomly test and bring. Then, as I said, in October, November we have to have the authorities of Austrian government present in the Linz Center, that if you bring anybody in, they can issue the visa, and confirm the entry. Otherwise, we become human traffickers, we become Soul traffickers, and we don't won't to be involved in that. So please, do as fast as you can, register for the transmutation test in Linz that we can complete our work.

Q: Thank you
K- Those of you who came in the first wave, you are the best candidate for the second wave. Because since you left, your soul is still working, so you have a connection, you have ?? setup a line. We can reach this transmutation much faster. (2:18). If you can afford it, or you can come back as fast as you can, or register today. We still got a month and a half to go, to register and come in for this transmutation.

We will invite people with implants, but not the heavy ones, that we can test it in the beginning. We will keep you maybe with a few items in your pocket, to see if we manage to transmute you with all your goodies in your pocket. That's why we tested it the last week, the people who came in past last two or three sessions. We didn't ask you to take everything (out), or empty your pocket, because we were preparing for this to be done.

Any other question?

Q: (Stephanie) .. You said, that the gas and the energy system, are still the (crumbs of the cake) and the big cake is the flying system. … Can you go more deep in that?
K – In what?
Q: … … (2:20). We only think about the crumbs of the cake, but the main focus for you is the flying system, because it can give much more.

K – We are a space Technology system. So, everything we do is to that end, for all needs of the man. If you go to the space with the MaGrav systems and the reactors, we need to feed you soul, so we showed you how to make water, Gans, or whatever. If you go with the soul, we have to understand the diversity of the souls. But one of the things which will come up, as I said, we have had Passengers of Universe in our system. And I've seen

them. But what about if you want to send these passengers of universe back to their home?

Not to send them back (to get rid of them). (If) they want to go back, if they want to go home. They've been here for thousands of years, maybe more. They were waiting for a technology to appear, that they can do so.

Now we will see a number of, what we call, guests on this planet going through our system. I've seen them inside the system, and it's very. I don't pay a blind eye to it, I just know it's there, they have the right as the rest of us. (2:22).

In the process of transmutation to the other positions, we have to understand a lot of things about the position we are sending people to, or beings to. This I was discussing with our development, in the past couple of days, that in the future we need to have a combination, we cannot just be single line, man to the Moon, or man to the Mars.

As we understand technology more. We'll bring that condition, maybe by sometime next year or two years, you can go to different positions in the universe using this Technology, till you learn, and then you do it yourself.

People in the universe do not go to the airport, or to craft position, they do it through their own Soul. If they're still in the matter state, you'll see them in UFO's. I said before, when we see UFO's, you are still seeing, creatures a little bit more knowledgeable than man, not much.

There is a difference between a motorbike and a jumbo jet, the gap is not that big. Once you know, you can expand the size of the bike, you can get it to fly and then you can rocket the same bike. So, it's a notch. But, if you go beyond the knowledge of the physicality you travel through the dimension of the STM. (2:24).

This is a biggest problem for many religious leaders, because now they have no control. They cannot deceive. This is where a lot of you run into problem with the clergy. They are not prepared to let the abuse go. It's your fault, there's something wrong with your understanding, of the new knowledge. Not that they have to stop the abuse.

Any other question

Q: Stepahnie …

K- Can I say something to the KS, .. the Italians. We have seen due to .. We've seen through a lot. I stay in the Enhancement Unit area, whatever, mainly to understand the Soul, and the culture of the Soul. The same as goes with. That's why we've got a Universal Council for Italian, the German, and the others. Amazing enough, you lot recording what we always said, you proved us, that way as well in the test, that you all carry similar soul wave, or what we call strength. Italians are the same, and the Germans are the same. Age groups, we see, the young take a different dimension, the old take a

different dimension, even this is very, very interesting how they split. (2:26). So, we would like to have as many Italians, who've been through the process, back in as fast as possible.

We would like the Germans to do the same, because many of them came, they've been through the process. Re-sign (up) for transmutation. Most probably, we will stop people for what we call, "the standard booking" (first time flight). Flight system, we take the tickets (off), because we want to go for transmutation. So, people after the first week, we come back on 22nd, 23rd.. From there on we only book for transmutation. We need to do that, because we have completed the first cycle.

So, we would like those who came to Linz, as you were the first test cases, .. and you felt the effect, the emotion and all the things, which you felt, to come in, to become the, what we call, the next generation for transmutation. Because your soul has already been there, you understand, you've been. It's been elevated, and we can reach this much faster.

People who come for the first time they come with a lot of anxieties, and (when) they come back for a second time, (they say,) it's totally different. We have one on Tuesday, we had one guy, he came last week. He said, it's totally different. Because the first time.

We would like the Germans, and all the others, who came the first time, to come back to (go in) the transmutation unit. Book it straightaway. Because I want to put the Germans and the Italians in the system. I want to put French and Italians in the system, together. (2:28). This becomes important for us in a multicultural flight system. So, I know many of you, even the Italians have been for a second time, come in for the third time, come in to become part of the transmutation. We want to see. Because you've already been there, it's very easy for us to complete the cycle.

We try, in the transmutation, try to record on flight. It's for us to see how the energy moves. It's not for public demonstration. It will never be released to public, it's just, but for us to follow the fields, and we have the field detectors. We want to see how the fields move from one to another.

So transmutation of the Soul will be primarily our work in the first phase, and then the physicality. We have a switch, we can control it. We can let the soul move to the other unit, where we are happy with its position, and it is happy with its position. (It) allows us, we transfer the physicality. Everything is well structured in what we do, and how it do it.

So, if any of you want to do that amazing flight. Most probably when we go into transmutation from another position with a mobile, those who've been with us we ask you to now, come back in, that we can bring you to Linz. (2:30). Most probably the first candidates will be from Germany, Austrians and the French and Italians. If you live in Rome, how fast we can be bring you in to Linz. As it has less implication, political deploy, border control and everything else, because you're free to travel and it allows us to test very fast.

But we have not opened that channel yet. We wait till we finish this. So, if you're Italians, and you've been to the Center, and you went through the experience, and you're still experiencing it, please re-sign again. Especially those who came the second time, because we've seen a lot of changes in them in their report. So, we have ?? quite a lot to move you very rapidly, and we just want a limited number of places, 30 to 50 people, no more.

Q: .. She wants to spread the Gans in the water, in the lakes and the river like we used to do. She asked which Gans you suggest?
K – We usually do the CO2 and the Zn.
Q: If I speak too much let me… about the forest fires, a big problem. (2:32).
K – You spoke too much already. … Come on, carry on.
Q: It's about the forest fires. For example I know a doctor who flies especially in Australia to work with burn patients, because every year the fire is a big problem in Australia, and in Italy and Portugal.
But you say that with the CO2 system now, you will be able to stop the fire, not killing the people in the fire, or animals or the plants, but also you will help to re-grow faster the vegetable and whatever was burned?

K – The tested we did in Ghana and then in a couple of other cases, shows us the burn recovery is much, much faster without any scars.

We understand it why, but this is what you will see. Because you regenerate it, at the level of the cell energy plasma, so all the plasma stays in balance, so you don't see burn (scars). When you see a burn, the scar on the skin, is when different energies have come into operation from the blood. That's the reason. When you use Gans's for burn you don't see the marks, because you touch the soul of the cell, not the physicality of it, and the physicality is conditioned to what comes to it.

Q: So, if the fireman have the CO2, can they have the CO in their tanks?
K – This is a special. There is a special way that we produce CO2. You got to understand, that we have to do a lot of expansion on this, (2:34). and it needs to be understood much more.
Q: The vegetation, the forest will grow quicker?
K – Yes. You see, CO2 (matter state) in a fire, kills. CO2 in the plasmatic condition at night, is the life of the plant. That is the difference. The CO2 you produce is in the plasma state. CO2, but in conversion to the matter.

Any other question?

Q: .. First of all, you said about the fire burning, for recovering with plasma. Can we do with this with scars, that are already from a very long time ago? Is that also, another way to handle it?
K – You mean the old scars from burning? (2:36). Depends how you use it, it can be done, yes.
Q: You still have opportunity to change.

K- Yes. It depends how it's done. It's like the amputation, if you have a fresh amputation you can re-grow the leg. But with the old one, the brain cells are already disconnected, or switched off. You have to switch (it back on).

If you look at the Horizontal unit, it's for growing legs for whatever. Because if you look at it, we trigger the brain, again for the cells, which are switched off, to switch on, for them to start producing the cells in the, controlling the cells in the leg, which is amputated. This is why I keep on, in the few presentation explaining, that the Horizontal Unit is for re-growing organs, or whatever. If you got a transplant, need a transplant, damaged kidney, you go into the Horizontal system, and you can literally regenerate the cells of the kidney.

Each Enhancement Unit has been built for a certain purpose. Yes, in certain ways, how we control the enhancement units, you can get rid of the scars from burning, or you can even, for example, change tattoos. It's all possible, now the knowledge is there. (2:38).

Q: .. I want to know when you send your spaceship to China?
K – There is no spaceship, we send the souls, we get your souls back. It's easier. Spaceships takes a lot of time to build.
Q: So you mean when the Mobile simulation started to you can do that, right?
K – Yes, it's quite possible. Yeah.
Q: Is it possible that you can arrange, like, for this test, that Chinese to join this Mobile test now? Because I'm already starting to broadcasting, and more and more people that never heard about Keshe Technology, are starting to starting to know this, what are we doing the test. …

K – We have a problem with the Chinese government most probably is, if they like us to do that ship. The complication with this technology it just starts. That's why we did it this way, we opened it publicly, a lot of people get involved, that the government cannot shelve it. That was the whole purpose of it.

Governments don't mind if you grow more carrots, or get the cows sorted out. But they might if their citizens get involved, where they go, what to do, what they might say? So, that's why in Austria we do the transition in European nations, because we don't have that complication of visa and movement. (2:40). So, once we start hitting the transmutation, with the Chinese we need full understanding. You've got to realize the implication of remote transmutation.

If you have a listening device and you know where the criminal is, using a mobile phone, you don't need to go look for him. You just dial a number and he is in your hand. If you want to get a president who is a criminal, you just use his cell phone number while he's asleep, you catch him. Let his soul talk, what is the criminality. Implications are huge, massive.

Any other question
Proofed to here

Q: I hope I find the first Chinese girl to fly to Austria to attend in the test.

K – I hope so, we'll see. If the Austrians allow the Chinese to come in, with the Corona. Let's see what comes up, now we are waiting. Please, as I said, come to Linz, we need to complete this 30 to 50 people, and then we need to have people who already have been in, and they can go through the next phase. (2:42). We call it, the test pilots. We need to do this tests, to pilot the system, accumulation.

Any other question

Q: Brazil … He made the five Cups, (2:44). but he noticed that the first Cup in the bottom, and the second Cup, they broke a little bit. He's asking if this is normal, if there is an explanation for these Cups to break.
K – Not really, it depends how they broke, where it was, and what was in it.
Q: In reality these cups, they cracked a little bit, these two cups. He said that in his room he has the dynamic system that he made, with the Gans also. He don't know that maybe the fields interacted with the 5 Cups, and made these cracks in the two cups.
K – If you have impurities, or bubbles, or whatever, which absorbed a whole different energy, than the rest of the cup, you'll get these things. It depends on the impurities of the surface, because it's energy, how much can they hold? If there is a metal in it, if there is something else in the Cup, (2:46). if you have a space gap like a bubble in it you don't see it, a macroscopic bubble, and it gathers the energy, it's like you turn on a heater, and it releases energy, the energy allows this to crack.

Q: This process of transmutation will be possible to do through the cell phone, or just by going through Linz, to make this through the Units, from one to the other?
K – At the moment we're doing it through Linz, until we complete the system, for the mobile. You can book for the mobile, but you have to wait till we complete it. But we cannot complete it till we do these tests in Linz first to complete the system. (2:48).

Q: Azar .. You said many times, the emotion is the key between the physicality and the Soul. If we understand this, and be able to play with it, we can change our look, color, transmutation, transportation, anything we want, we can do through emotion. So, one example, and then you said, that we already are doing it, but we don't pay attention to it. You made an example, .. let's say you are a 12 year old boy, and I come to you and I say Mr. Keshe, you're very handsome. And then you blush, you become red. So, there was an emotion there, that automatically made you blush. So, there was an emotion, there was some change in the body that changed your color…
K – That wouldn't make me blush Afar, that would make me happy.
Q: .. Now you're 21 year old and I come to you and say, Mr. Keshe, you're very handsome. But this time you look at me, straight in my eyes and you say, thank you very much, and you smile. So, there is a shift here between the 12 years old, and 21 years old. (2:50). So, was it better when you were 12 years old, that you let your emotion automatically shows up, or the time you learn to control it?

K – I remember both of them, and the both were very pleasurable. But you have to understand what entails at that time, and place and moment. Let me explain something, which I explained quite some time ago, if we understand it. You talk about the emotion blushing, or being happy, or whatever, because it's a interaction between the field of physicality and field of the STM. You blush, you might shy, you might get angry.

Weather is emotion of the Earth

Have you ever understood, that the weather around the Earth is that emotion of the Earth, are one part of it? Have you ever understood that the weather, what we call it, the weather, is the emotion of the planet at a given time and position? It's a psychosomatic reaction of its interaction of the fields inside, with his environment outside.

The same with the earthquakes. The same with other things, biological exchanges, or whatever we see in the oceans with the rest of it. Was the Earth angry when it was a storm? Or was it was very shy, and just rumble because of the earthquake?

It's the same thing, it's manifestation of physicality, (2:52). in respect to interaction of the fields. Do we see the emotion of this planet in his gaseous part as much as the solid part? Or in the water part, liquid part? Well, the answer is yes. But, because we don't see anything we got used to it. But when we change the condition of the atmosphere, would the Earth still get angry, to see such huge changes in the planetary system? And to what extent? It's all respect to what energies we use, we consume, and how we allow the fields to interact.

Q: .. Say you are teaching. We come to the ?? maturity, for example, now I know when I'm sitting in the seat of the soul, or I am sitting at the seat of my P.. I see my emotions, and I see my thoughts. So when you are sitting at the seat of the Soul, it is always the same, it is always joyful, and it's just so different, than the seat of the physicality (P). But then there is this, then you go to life very, like you see life differently. I mean, but the only thing is, sometimes suddenly, these emotion comes that get you unexpected, that you have no idea where you come from. But how does this happened? You think there's something catches you unexpectedly. I cannot figure out how this come about. I mean, how does it show up this emotion unexpectedly? Without you understanding them? (2:54). It feels like you're not in control of it, but I want to know how does it show up. Is it my interaction with the rest of the environment, or is it part of me?

K – Combination of the three. One cannot be without the other one. So it's interaction of the 3, which gives the condition and what you observe.

Any other question?

Q; Thomas has <Problems with audio> (2:56). ….

I have a very little question about the Horizontal Unit. One of the biggest problems for the old people are the teeth. Is it possible to do something whenever it is available to us, for the teeth in the H Unit.
K- Can you tell me what you mean?
Q: You know, a lot of people loose the teeth when they are aging, or they have already lost all the teeth. It's very uncomfortable for people, (2:58). and it's one of the big problems in care for old people. Is there anything that the Horizontal Unit will help for this problem?
K – You mean for the teeth? (Yes). Yes, you have to go to Afar (dentist).
Q: … It's just was a question, because you said that you can re-grow if the connections in the brain are not yet all dead. Now for the teeth it's maybe a little bit different than amputated or lost leg.
K – No, it's just a different process which our body is tuned for. We have to see why .. Why we grow one set of tooth? Why we can regenerate if you break a bone, again and again? Where the structure in the body has set to not, to reproduce.

This question of the teeth has been around my neck from the beginning of the time when I started the technology. Can you do that? Can you make it grow? (3:00). Can you make a system that it does? It can be done, but you have to understand the principle behind it, how it's done. From the beginning of time of the technology, this has been a question. I always been asked. Yes, it can be done. But you have to go to the root of, .. the growth of the tooth.

Any other question?

Q: .. How to connect the soul of the body, to the STM in an objective, direct, and linear way?
K – It's already connected, otherwise you don't exist. It connects according to what it gives, (3:02). and what it has, what environment it lives in, or survives.
R: So maybe the question would be. How can we become more aware of that connection?

K – The development of this Enhancement Unit is part of it. .. I don't know if you have anybody, what I call, you know how I put you on the on the spot, last time. If we have any Knowledge Seekers who have been through the system, and they would like to tell us what happened to them, since they left the system. Is there anybody there who wants to put their hand up. ?? they don't want to ?? What happened through the system. If any of the people been there, and they tested it, and what happened to them.
R: I know Stephanie has talked about that ..
K- Anybody else …

Can I ask you something Rick? You went through that test last week while you were online. What happened with you during the test? Did you feel anything? Did you have any interaction with yourself, and understanding?

R: Well, I did actually. When you were directing our attention to try visiting different locations. Then you mentioned the grandmother and the mother, I think. (3:04). Then our

grandfather actually came up, you suggested to visit your grandfather. I tried that, but what came up instead was my father. I got a strong impression or a visual image of my father and in kind of strange posture, a strange emotion, it's called sheepishness, or that funny look. It's hard to describe, it's a kind of a strange emotion. What I got from it actually, what I sort of figured out is that. Because I went quite deep inside myself during that time somehow, and I described how I felt this sort of liquid around me and so on, and I felt like I was in the womb. Well, what it is, I think is I connected with my father, before I was born, and his emotion, of finding out that his prized wife and lover is pregnant with the first baby. This was a year and a half into the marriage or something, I think it took him a bit of a shock. He expected to spend more time with his lover and my mother, before bringing the kids into the scene. So, I think there is some question whether I would even be born at that time. He had to go through an emotional response inside (3:06). before he fully accepted me, and loved me and so on. As I was growing up, and all that, but I know there was something there, because I've experienced that when I got married, and had a step son, and all of that, and I could feel that tug of the emotions, where you want to be with your lover. But yet the child is there, as well. That you've created.

K – But have you had any experiences since that time? Have you had any, any other experiences since last Wednesday?

R: Well, when I mentioned, I've gotten hit with the fumes from gasoline and so on from my job. That really sent me for a total loop. That was last Thursday, and I'm just recovering now. It's taking me a week to basically my brain to gather from all that. So, I had quite a shock at that point. It was hard to make. I just totally lost my connection with everything at that point.

K – When?

R: Thursday, my time, which is after the workshop, and I slept for a few hours. Then I went to work and I just got overexposed to gasoline fumes. When that happens to me, like you're describing suicidal, dark thoughts and all that kind of thing. It's my whole life collapses at that point. Anything I try will fail, and I get clumsy, I drop things left, right and center. Normally I'm not so dropsy. It's sort of a big collapse. (3:08). You were mentioning about Corona well, many of the symptoms that I get from both air pollution from ?? fumes, basically, and from various solvents, and especially gasoline, which is one of the worst. They crossover with many of the symptoms of Covid action, and especially when you add in the suicidal thoughts that you mentioned. If you look at one of the worst problems they have in northern communities in Canada, especially with the Aboriginal kids, is they sniff gasoline. They can't afford drugs basically, or there's just a cheap high and they sniff gasoline, but it really is hard on the brain, it really affects them and they can lose touch with their emotions and become almost like a vegetable basically, you get amnesia, you lose touch with yourself, and they become suicidal.

Suicide is one of the major problems, it is the major problem that they have with the children, the Aboriginal children and northern communities. So, there's a relationship

there between the symptoms, let's say, of Covid and some of the that new variation that you mentioned of Covid that seems to affect the emotions more directly. So, I'm hoping that through the knowledge you gain with the new variation, it will also help with those that are get under the influence of the fumes, and solvents and other various things like that as well, (3:10). which affects a lot of humans. So, over 10 times more humans die from air pollution, than from Covid. So, it's a pretty big issue.

K – Okay, let's see what we can bring in. But it's interesting to see what people (tell us), because we see a lot of people who go through the Enhancement Unit, they've been back for a second time. We see how they react in the second time. They tell us what has happened to them, since the first time, how things have changed in their life.

This is important to us, because we would like to know when we transmute people what happens after to them. How do they change? If you travel through the Enhancement Unit with a problem you had with your son, or you had a problem, as you had (Rick) with your breathing, or whatever, allergy, what happens to it? Has the condition changed with the son? Has the allergy's changed? We are monitoring these things. This is part of the monitoring, because it's what is going to happen, how would it facilitate.

It’s like if you. We notice how we accommodate people now in the Exhibition Center, in the flight zone. Before we used to hold people for, it's just like every other structure. We hold people on the top floor till the time, is for them to go into the system. We used to bring them down, within a few minutes they do all the paperwork upstairs, and we used to put them in the flight system.

We noticed that when they go in there, they're sitting in there waiting there, all this time to fly. You know, they just get excited, or they talk to others, and they get a pre-mindset. (3:12). When they come in we used to take them to flight, and this gives them like a shock. It’s like a massive shock to their system.

Now we bring people down half an hour before going through the test flight. They settle, they see people coming and going. They see somebody coming out of the room. It just changes (they are more relaxed), and we get a better response. We get a better approach to the whole thing.

These are the things, we see people who come a second time, how (it has) affected their lives. Some of it is fundamental. They say (it effected them) in a beautiful way. But now, when we transmute you from one (system) to another, what's going to happen?

What pains you release? Because we've seen a lot of people coming in with a lot of psychological pain, which manifests as physical, when you .. expand the fields of the Soul for the flight, it does this cycle part in the brain. Then you see that they don't have any symptomatic signs when they come out.

We are monitoring this, and people tell us different things, how they did, how they interact with, how they interacted with people inside, how they interacted with their

family and their relationships. As a couple said, they have found the lost love, and it brought them very close to each other, because they ?? through the children, they disappeared. Now (the love) it’s back and it's worse.

So, we want to know the progressive after time of the system, (3:14). and how when we start transmuting people, what's the progressive (development) after they left. It’s not just a flight system. Did you have a cancer condition? Did you have another condition? I know one of the Knowledge Seekers on last Wednesday with Rick, has shown different signs and different .. dimensions. She says she's coming to the Testimonials to tell you what has happened.

What is the dimension of us? Do we become a peaceful people. As we heard from one of the Italians building a relationship with a brother, lost for 20 years. This is the ultimate goal of the work, of the change. Processing, evolving, elevating, in that process reaching to new dimensions.

It's interesting, as I said before, in one of the chats, if you were with us in the first three, or four weeks, it was different, than the last two weeks. The last two weeks is, as we just talked about, the interaction of the STP, and the STM, very interesting situation, which is part of what we wanted to develop. Now we achieved it.

Is as I said in one of the talks. You come in, you sit in the system, and we asked you many questions. (3:16). What we talked about, interaction of the STM with the STP, which gives us what we call, emotion.

Emotion can be in any sense of smell, laugh, joy, whatever. Creating psychosomatic emotion like a smell, is a very difficult job. If you tell people this, they say it's impossibility. So, what was interesting with us in the last two weeks, is people who go through the system, they are telling us they can smell.

So, we have managed to create, to confirm in a way, that we have created the STP, if you call it, in interaction with the STM, that from the environment you can smell. With joy - we had, with touch, we know we did. But a smell is something different. Taste is something different.

In the new Enhancement Unit, we have achieved this, in the past two weeks. People tell us, they .. were born in Tibet and left Tibet. The lady said, I could smell the water from the rivers of Tibet. Because I was standing on to, water passing, like I was on a bridge, and I could smell the water. We had people this week, who have said the same thing. We've had other people, who now tell us, that we have managed to create a condition, that we can even interact with the smell.

We can interact with the taste, we interact with how maybe you didn't like, let's say, cheese. Now you love cheese, (3:18). because the interaction is set, why you didn't like cheese. What was it. So, it's very deep the work of this process.

Smell is something which is non-tangible essence, and we can replicate, we can transfer it, we can produce it, you produce it in the system. Which means, we managed to bring the system, which is Soul of the Physicality and the Soul of the Man interact, and we have an input into it, that we allow it to exist within each other.

This actually proves in a very solid way, when we say that the Soul of the Physicality envelops the man. Now you smell, the same as you do in the dreams. In the dream you smell fire, or you smell a flower. Now, this could be replicated. Now the system proves to be correct. Emotion into senses. Why do we become allergic to something, with the smells, it's ?? with people. Now we can enhance it, and remedy in a way, from what was causing the reaction, we process the problem.

Any other question?

Q: This is Jacob from Switzerland. I had a problem in my youth time at school. A colleague came with a bottle and he says, this smells very nice, you have to try it. So, I tried. I took a deep breath and it was ammoniac. (3:20). This burned something in my nose that the basics I did smell, still. But a lot of fines like flowers or the smell of the lake was gone, was completely gone. I didn't smell it anymore.

Since I was in the system in Linz the second week, then it came back again (my sense of smell came back). Now, last week I was in Montre, and the smell of the water, the flowers, walking the shoreline, and even the gases from the ships, I smelled again. This is a big change.
K – So, in a way it's reset.
J: Yes, definitely.
K – How long were you not be able to smell?
J: 40 years, approximately.
K – How does it feel?
J: Wonderful. It's indescribable when you walk the route and you smell the flowers again, it is unbelievable. It is definitely since I was in the system, then it started. I noticed when I get back to the hotel, and it was more and more. Now it's wonderful. I enjoy it very much.
K – Welcome to life.

We see this quite a lot with the changes people have in their life, in the past four weeks. We see this with a lot of people with the Covid, which they loose their smell. It can be done. It's with the taste, it's with love, it's with anything to do with creating emotion. This is what I said, when your soul expands, it balances the cells, which are unbalanced. (3:22). Even the emotion conversion.

We know this knowledge for over 10 years, more, Because I realized we interact with the smell and taste through the system. When we had, I think he is a KS, he is still here, he used to listen in the background sometimes. He is a Pakistani origin, from outside Birmingham. He went paralyzed at age of 19 from the upper spine, neck. (It came from the news) of his father's death. He was in a wheelchair. He was brought to us in the age

of 43, 44, he came in with his children and grandchildren. But to overcome the pains of the paralysis and the rest, he took to cocaine, not cocaine, weed, marijuana, to subside the pains of it.

When he went through using the system the first day, he called back the next day and he said, Mr. Keshe, I have a problem, weed and cigarettes which they've been the only thing comforting me now, (if) I touch they smell of manure. I can't even put them to my mouth. But the thing is, I don't have the pains anymore. This is the strangest thing. Without touching weed to kill the pain, I don't have no pain either, but everything tastes and smells like manure, I can't bring it anywhere near to me.

We realize we can interfere with the emotion, and with this. (3:24). Because in a way, he saw these things as a byproduct of the pain of the loss (of his father). He didn't want to be addicted to these things, but with the pain of the paralysis. Now he was changing. He didn't need it.

Then a few months later, I remember when he came in again in a minibus from Birmingham to Belgium with his family in it. Lots of people, carried ?? him. He was put in a wheelchair out of the car, they all came to see what happens to their grandfather, and their father. Two, three months later, he flew into Belgium. We have videos of him walking in, after 20 odd years, he could walk. But the most interesting was, he could smell the manure. So we knew we could can interfere with the emotion of the smell. Now, you have one of them who has been, and that's nice to hear. ..

J: What I also can say is that the connection is constant. Now it's a fixed connection, it's not interrupting anymore.
K – What do you mean by that?
J: It means that I have this feeling. I call it, a "MaGrav pressure condition" in my head. That was when I was in the system. It was also when I start using the MaGrav in my car and at home. Now it is constant. Before it went away, in between, but now it stays.
K – It becomes part of life.
J: Yes. What it also can say is that all the Gans's, I think this is from the beginning when we made the first Cups together, and the first Gans seven years ago. The body starts to balance, on the skin, inside of the body, (3:26). it's all balancing. My feeling says, that if a body is balanced, there is no possibility for a disease.
K – That's usual.
J: Because I was with colleagues, or people together who had Covid, and it never touched me. It feels like a protection. I don't know if it was lucky or. Other people who were at the same position they got it, they caught (the Covid). They had it.

Fake Belgian Court Case finishing

K – Let me tell you something very interesting. I want to extend on what you said. Today is the 4th August. On Saturday, Sunday, a five year restriction on the false accusation by the Belgian government on me finishes. Keshe Foundation will launch a massive medical teachings around the world. The fake case had a five year restriction on it, which finishes

this week. We can bring a lot of changes. We open a lot of health data, which has been there. Part of it was stolen when we kicked the Belgians out, and it's in the documents.

But what is interesting when you say, it balances it stays, and it stays a long time. We had a Dutch gentleman who was multiple cancer, prostate with the hips. His love was to sit on the horse, he couldn't sit anymore, because he could break his hip, because of the porousness of the hip bone, and a lot of other things. Wealthy Dutch pig farmer. I just saw him by coincidence, (3:28). I remember I met him by the Cathedral in Brussels, at that time with Dirk. He said, I have all the wealth in the world I want, but I'm dying of the cancer. I said, we have not much experiences. (He said,) I am on your guinea pig, do whatever you want.

At that time, we understood very little about the effect of the soul and everything. Anyway, he went to the point, that the doctors could not understand why his cancer was not going anywhere, and it stopped. .. When he went and they took the MRI from his hip bone, it was stronger, than before he had the cancer, because it started re-growing the cells on the bone, the holes were bridges, like when you break your bone, you get a calcification to strengthen, to bridge it.

He went enjoying going horse ride, because used to horse ride with a young lady, which he used to enjoy, and he couldn't do it. His way was to walk with the horse holding the leash of the horse, other hand when the lady was on the on the horse. Now he went back to horse riding. He said to his children, what I received from the Keshe Foundation, I don't have to worry about it anymore. The only thing is going to kill me is if a double-decker bus hits me.

Strange enough something happened to him and he had to go back to the hospital. He received the wrong injection and he died of it, six months, a year later. It was very strange emotion. (3:30). For a life you save, has to go down with an accident somewhere else. I met this guy just before I left for my first trip to Tehran. Goes in a very deep way that, the change is, once you go through it, is permanent.

After next week, I unleash the knowledge of the medical application, after the 7th of August. It's a five year ban. We had to keep ourselves safe from this hooligan nation of Belgium, damn the nation. How many people have suffered, and how many families have lost their loved ones. Curse on this nation. The only nation, which ever never, we'll allow to go, and pass any limitation of the humanity. We always need to keep sign, of what we call, "the worst", for others to remember.

After next week, we start unleashing the knowledge of the plasma technology, in what we call, the process of life. Then you will see the marvels of this technology, in what I call improving one's life.

J: You know, for years, I'm thinking every week, there cannot become more (new knowledge), it's not possible. So many things came and still, it's always a miracle still, to see what happens, and what comes.

K – It is there. We had to protect the Foundation. And we unleash the knowledge of the what we call, "processing of the KF." I kept away from it, (3:32). to keep myself alive, and we saw how it touched many people. I have to listen to many people suffer with different things. Knowing, having the knowledge was the biggest pain. Seeing a father losing his son, child dying in front of the Father, where the knowledge is in the palm of our hand, and we could not do.

I go back in teaching the health application in a very strict way, but I'll change the world of science of medicine in the coming weeks. Five years of restriction by court in Belgium to keep the Foundation ?? fraud was kept out.

I take the love of God from this nation, and you know what happened to the Jews. Let's see what comes in the centuries with this ?? nation. Even though I have a blood ?? within.

They caused so much pain. I watched so many people loosing their families, loved ones, where we have the knowledge. A nation of pedophiles, abusers and everything else. We were embedded, and infiltrator directly within it. As I said in the last two teaching, I would release for you as knowledge seekers to know how, and the way, we were being infiltrated by pedophiles. Because the biggest pedophile family was sitting without us knowing, within the Foundation. With court cases, prison sentences, and still going on abusing young boys. Now you know why how much we ??. I'm so glad I'm finished with this. I'm so glad that the Foundation can exist without it. Don't look for the name, you know, look for another name in Flanders (Belgium), you will find out. One of the first and biggest families in pedophilia, was sitting within the Keshe Foundation. (3:34). The way they use it by the king, was they had the ransom. They took to ransom. Prison sentences and the documents are still with the police of Belgium. Because it's so deep after 40 years, 50 years they're still keeping it because the family is still ??.

Q: .. What happens to the souls who refuse to accept the technology, or the change?
K – That is their prerogative. ..
Q: So they are allowed to suffer more?
K – You don't suffer. They learn from, they elevate, they elevate through.

J: We, the Dutch group, we'll try to come in September.
K – You have to book now, please go straightaway, because we don't want to carry on for months, for this just because we get paid. We want to finish it very rapidly in September, October. It's not like the first time we gave you half an hour. To expand the soul to bring it to the right position, to be able to transmute it, and then when we transmute it to solidify it, it takes time.

J: I know this from Wednesday, it was much better somehow.
K – What do you mean?
J: With the mobile system. We tested it, (at Rick's group). It was different.

K – Yes, because it is ??. You got to understand, that the Keshe Foundation team in the background developing this technology, (3:36). literally works holidays, they were off this week, they came on Monday to put things in on Tuesday, you understand? You have the most beautiful team working with Klaus. We have a wonderful working team working in Tehran. It's not one system.

We have the most beautiful team in one of our research centers, some of them are there to do. The technology literally changes hour by hour. I'm sure by September, the system will be far ahead of what, even we have developed today.

At the moment when you come into the system, a lot of you don't observe things. There are literally two different systems. One is gravitational, and one is a human life. In the new system getting developed, hopefully might be ready for September, October, is one unit doing both. Both units sustaining life and gravity, which is unique, it becomes a planetary system. Then we have again, as you've seen now, you have two systems, which transfer fields across and maintains position.

In the new system they becomes like a Twinity system, will sustain life. If we find the what we call, the soul of the , what we call, the Twin System of the Earth, we'll find in it, life the same as the Earth, that's guaranteed. (3:38).

If mankind is looking for a similar planetary system as Earth, that it contains life, you will find that within the Twin System of the Solar System of ours. We do the same thing in the new systems in the Enhancement Unit. The new twin system is set to do it.

When you come in September, maybe you'll still see the two, but when you come around October, November, you will see four units in the system. Then we start a system very much like the Solar System, and Galaxy System in the four. Allows us to transmute to you to different positions in the universe.

You've been there you know it works.

J: I also had the experience in my life. I was a few months together with my Soul twin, and the disconnection this ?? that happens. We couldn't continue then. So, we had to split and it took me many, many months to process it for myself. Now it feels like you're coming home, and you can leave it as it is. That is something you cannot describe with words. So, we really look forward to come, we try to come together as a Dutch group, Galib, and Francine and Freed, we'll try to do our best to come together.

K – Yes, it will be fantastic. Galib is still in Austria, he has come back here to support. To help us with anything.

J: He made a nice group, the Flying Dutchman, and a woman. We're together in contact and exchanging all the time. It's wonderful.

K – Please book it straightaway, (3:40). because I love the Dutch mentality. And the way you look at things, it brings a new insight into our work. As you know I'm a child of Phillips as I always say.

It rubs under the machines. The beauty with the whole structure is to be able to deliver a complete cycle. Not just the physicality, the emotion. It's when you say, I met with a twin soul. It is where subconsciously or consciously it's always been there, not satisfied.

J: Yes, I knew it all my life that it would happen, I didn't know when or where. In the later time, I knew even where, because I felt it when I was in the area. Then when it happened, .. it was there, it was very clear from the first moment. It's the same with the system.

K – Yes, it is connecting and building up. These are the Testimonials we are looking for, that it's not preset. You were there, and you happened to be there, and you can explain it. It brings a lot of joy to people. It's amazing when I heard about the Italian lady, when I hear about people who built bridges of years of hate and discomfort, becomes pleasure to be with. A lot of missing time. Children who are looking for the father, from when they were young, now they find the father. They know physicality is not the father, but the Soul is there. A lot of pain. This is the beauty of the knowledge. When you share it freely, it's amazing what it is. How it can be done. (3:42).

Thank you very much. Please book, because I love to have the mentality of the feeling of the Dutch in the system. It brings a lot of freedom. It's the way you've been brought up. To you is natural, but it doesn't exist in other people, in other cultures and understanding. We need to be embed it. The freedom of the soul as you carry in Holland and in Dutch.

Any other question?

Q: Salomea … Hello everybody. I like just to have a little testimonial because my friend Dean from Romania sent me the registration from last Plasma Reactor Group. When Mr. Keshe came, and he asked me to listen to this and I start, I listened and I tried to fill it .After 20, 30 minutes, I feel very, very well after being connected with this registration video which had all the information's and I don't know (3:44). what had in between, the emotions and thank you very much. Because I had pain on my left leg and after going out from my body, I have seen my electrical body and I have seen here on my left leg, a lot of lights. In the middle of my body it was black, but starting from my chest, and on my heart, on my throat, on my front and on my head it was lights, shining light. So, I have seen my body laying on my bed. After, I realize that my body was not from flesh, it was only an electric body. I mean, maybe it was a Plasmatic body and seeing all this light, and after 30 minutes I was feeling very, very well, I didn't feel any pain. Thank you very much Mr. Keshe, I wanted you to understand this, that our friend from Romania Dan Balis asked me to do this experiment after and I wanted to share with you because it was amazing for him. (3:46). Also amazing for me, and it's just lovely that we can be in contact at the emotional level with the flight system, even at distance, if we are able to do it, if we are able to understand gamma rays, gamma, the state of consciousness, gamma,

alpha, beta, theta, delta. I think that this is the secret, if you can understand this radiation in your body will radiate. You can fly, and you can go anywhere, at an instant, everywhere at the speed of light. … But this is my understanding. … I hope I'm correct
K – Thank you very much. (Mr. Keshe tries to stop her ..)

Any other questions?

Q: .. When the soul shows itself to you, how do you position yourself according to the others, for you not to harm without knowing? I'm trying to understand the details to be more careful.

K – When a soul manifests itself to you, you're already there, not to be harmful. You cannot damage a soul. (3:48). The soul always takes its position. A Soul always sets to see, but you are witness to conditions, but not too harm.

We, I hope our knowledge seeker doesn't mind, we don't release the name, but he was on the line telling me something in the past recent. The way he feel things is different than before. We interact with more care, we interact with more love, we interact with different touch, because souls cannot harm each other.

This psychosomatic manifests itself in our life. This psychosomatic condition is when you touch, when you get in touch with another soul, or you have been given access to another soul. Is, you are safe, you can do.

Sometimes we witness, sometimes we are part of. We think we harm, but in a way, we see the steps of the opening in another dimension. (3:50). So, when you see a soul, when you're interacting with another soul, or another soul interacts with you, it's already pre-agreed by the law of the plasma, by the fields of the Universe, you cannot harm. Not yourself nor them.

But you can be witness to a process, which the interaction of the souls, explain to you in that dimension. You see somebody get killed, you see an accident, you see somebody falling off a cliff, you see cutting yourself or somebody cut themselves. These are not, you are witness to a process of the interaction of the field, which happens in the dimension of the Soul. Or you're there to see it that you become witness to it.

We should not be worried about these things much, as the life takes its own process, and we learn from it, we elevate from it. Don't . It's part of the process of learning and elevating are also to the point that we become the givers, then takers. (3:52).

Any more questions.

Q: Does it have to be an Apple phone? Can I use a Chinese phone?

K – The reason I was pushing for the Apple phone, is that we get no losses and no interference. Apple has created a perfect stereo system. As I said, if you put a music on

and you can hear it through your soul, vibration of the fields in the brain, not through your ear, it's good enough. But we tested some of you, in that test last week, they listened to it through, .. a laptop or a computer.

Q: Will it be possible to make this transmutation without using the telephone? Will we do it through the soul as well?
K: In the future yes. As we learn more, yes.

It's something very nice, that comes just as a testimonial. I'll read it for you. Just came through one of our channels, it's on Keshe Foundation store. I read it to you. It's somebody who has been through, I don't know who it is. I'm not privy to the name of the person. It says, after I moved to the second chair, I felt the soul of my daughter. We got together and we were connected. (3:54). My soul with my daughter's soul, were connected with a pink ribbon, that later became red. I felt energy through my body. After I moved to the third seat, I felt sadness, because of the soul of my husband. I felt his soul. After that, I felt harmony and with every change of the seat I felt more and more in harmony. However, all the time I was with tears in my eyes. I did not want to go to the moon.

This is why when you're in the system we ask you if you want to go anywhere, and people refuse. The beauty of it is, that we find the inner peace. When I read this, it's emotionally beautiful in what people will achieve through them being in the center. But to me, confirmation of the envelope you're looking for. That we can transmute.

Do we need to transmute you to the other system, if your soul wants to be with your daughter in New York? Or your soul wants to be with your loved one, mother or grandmother who passed years ago. In the structure of the new flight enhancement center we provide the facility. You are the pilot. You decide when that ship, which is your Soul, takes you. We prefer to learn in our side, where we did, that we have monitored. But what we do, if you decide to visit your loved ones, or go somewhere else, (3:56). and when we call you back in a time given, you come back in the system.

In this process of the transmutation in the system, the other side you visit will confirm your citation. In most cases. Which means, if you go to somewhere, your grandchild or your grandmother lives, and you haven't seen for 20 years, they confirm your citation, that you've been there. They've seen you, they talk to you, and they felt you.

This is the, what we are looking in this new evolution of the next 30, 50 people. We guide and assist. But at the end, if you heard from the beginning, you're the captain. Many people go into the flight system they don't want to fly, they want to go, where they want to go, to go see their daughter, or their grandchildren.

As we had with a guy two or three weeks ago. He wanted to feel his grandchildren in Paris. That was the only reason he came. Many people don't want to take the .. I don't want to go to England. I want to go somewhere else, but I want to go to that place and you go.

You get that freedom and then once you learn it, (3:58). as many knowledge says, we connect to the system, and we go where we want, or we get what we want, or we find the peace we are looking for. The Enhancement Center Unit in Linz will become the focal point, the first system, which connects humanity through the soul. Does not matter the dimension of time, space and place. Those who lived before us, those who live with us, and those who come in the future as part of us.

None of you has started that phase, to see through this ?? , the souls of the universe and the souls we created, have plan for humanity. It's not foretelling, it's understanding the structure, because we are all connected through one common Soul of the Creator. It's interesting what is to come.

As I always say, if you come in and we can't do, you don't feel anything, come for a second time. Let's have a look, you test it. We have never failed yet. It's this time for the soul to mature. I would love to see if we're in the process of the transmutation, some of you will not turn up in the other system.

I know the souls, which are not from this planet will come, we'll see them. Because through it, they have found the solution to be in touch, be part of the society they came originally from. We've got to learn a lot. (4:00). All of us.

Any other question?

Q: With the gas unit if it is placed in the middle of a farm patch, will it benefit the plants? (K- Yes) Or will it be better to spray it on or add it through the fertilizer irrigation system?

K – ?? , it will do. You need to create a condition of flow, if you understand. You need to create that gradient, from one point to the other, to come in the field. The best is to place in a position, or to cover one end of the field to the other. It works up to two kilometers, we know that. Put it (this way,) we measured 2 kilometers. ?? we have 1, 3, or 4 , so we say 2 kilometers work.

If you buy a system for farming, tell us beforehand, because we'll add an additional thing to the system, which will become, helping you with the growth of the agriculture. We develop this, it will be marketed very soon, it's not something new. Because we know farmers get disenchanted, (4:02). or they get fed up by watering the Gans's, or. The harvest is good when you put it in, and when it is good when it is five or 10 centimeters, when it goes to a half a meter, try to get this huge machinery over the mole. Watering them is God's job, and they give up.

This new system with the gas, and with the system we embedded in it, is a solution for covering. In the future, we'll (do) the satellite job. If you buy two systems, or even 4 systems to cover the center of each farm. The way we've tested, and we know it's this. It is very easy.

When you have a field like this, if you put a system here and a system here, you cover this. If you do this, you cover this. And you'll see the change in the growth respectively. Or, I don't know if you can reach the center of your farm, one here and move this around.

This system, if you tell us, you are using it for farming, we'll accommodate a different process for it, that it works 24 hours a day. It replaces the watering, replaces the Gans production, the heavy jobs that you used to produce.

Any other question? (4:04).

Q: Can we and should we solve some problems that our ancestors had, such as some premature death of the parents, which caused orphan-hood or perhaps even the negative influence in the current life? Or how to do it?

K – No, we cannot change the past. We are made of it. If you want to change the past and you can see how many children are born from that life, and then how many things happened, you can't change it.

You can change the condition of now, that the future will change, but you cannot go and change the past. (4:06).

Sorry I just had to check, our Knowledge Seekers are listening to the teaching, that if you we were going to show you something, if it was ready, not yet, maybe next week.

Any other questions?

Q: .. Would be good to put together priests, rabbi and mufti. We'll see what happen, we may bring the peace on the planet Earth.

K – ?? bring their souls, forget about their physicality. It's just the way it is, the way it works with these people.

Thank you very much for today, I hope you had a true Blueprint Day, in many senses or essence of the work. We would like you please to book in for the flight system. And then we complete our process, we complete the process so we can test, we can confirm. If we get it right, the next process with all of you, will be how we can travel the spans of the planet and of the universe.

The most important thing for all of us is what I call, the gas units, now you know what's the purpose. (4:08). How it to change for us, all of us. It's there to bring us, unless we are there ?? for ?? use. Then that's a different thing. We still do our job in the background.

Thank you very much for today, Rick. Thank you very much for all your greetings. The man is getting old, but the brain still works, which is the good part. So far so good. This

time was a very harsh time, as I always said, but at least we get into somewhere, concluding .. the final chapter.
Thank you very much. And hopefully see you next week.

445th Knowledge Seekers Workshop; August 11, 2022

(Quick Index , 24p Proofing & Transcription done need to do; Key Phrases , Words)
(Auto Transcription by Elias)

Transmutation is same as what is done in CO2 Gans Box; Turn Soul inside out to transmute; Transport millions of souls in Gas Bubble; Teaching on Deuterium - mechanism of transmutation of elements in body through glands; (This workshop contains immense topics - MUST study

Topic Index

In transmutation need to carry all of the man - memory of the Soul; Evolution is instantaneous on arrival; Transmutation is just like Orange and Cup - transfer energy emotion of orange; You already did the first transmutation - you were really on the Moon, it was not a dream - next step is to bring the physicality; White part of CO2 Gans is like the body, and the energy of it is the Soul; Man is nothing but Gans's; We make a Gans of the man in the EU and move the energy; You can be used as a Patch; EU is a Gans Box; When Soul leaves it passes over the brain cells and transfers the information to the memory; Turn Soul inside out that it encages the body, but still a remnant STM exists in center of head, (this is the thread to get back to the body); Schizophrenics are living closer to Soul, multiple Souls can manifest in multiple bodies; EU can take all of the Souls in a body to manifest them in their own body, exactly like when you make a Gans of an alloy, you get multiple Gans's; I am the Methi - because I can explain the knowledge of creation; I have traveled full spectrum of the Plasma - therefore I can teach you all the knowledge of Creation; Man decides how much of the creation he wants to learn; You come from the fractions of the fractions of the Original M Field - why you lost memory of Creation. I come directly from the Source; We put all the fractions together in the EU - make a new race of man; Fractions come from Me - how can you not be Me; Transmutation by governments is top secret - while KS are buying tickets; You can be put in gas bubble to travel span of U; This is reason for Energy and Gas units, not for burning;

Pedophiles spreading fear about Nano Materials; Do not touch Nano and Gans till you know how much you absorb - it feeds you; Doctor using plasma T to process his own

cancer, he is head of Cancer hospital; In EU when STM expands across all the cells of the body some may be at the strength of hormones - why you feel so good; The STM from earth has distinct features by which it is known in the U; Be proud to be born in this time of transition; Will do megawatt power generators; About paying taxes for privileges - same with T; West is used to stealing from other countries, thinks it is their right to steal; Annual payment to KF for use of T - fund U Council and KF programs; Transmutation was taught years ago, both private and public teachings; Create light in hands; Total vacuum does not exist - always some fields around; Each planet has a specific type of Gas Bubble to transport it's citizens; With Gas bubble don't need a pilot; Knowledge is always hidden inside something else; Can fit whole planet inside bubble to transport it; Gas in Nano State means Gans; You don't learn transmutation - it's part of the memory in your DNA - connected to knowledge of U; Conscious memory belongs to the D of physicality; Souls have emotions worse than man; Specific Gans for weaning people off drugs; Gas Units for farming have to also reach roots then 200% yield increase; Gas bubble technology is what was meant by " one drop in the fish tank to create a fish - the drop contains the soul of the fish - then it manifest in the water; How we carry a mixture of different souls in EU for transmutation; I came here in a bubble - will leave in a bubble; Our soul was created in D of U - like children of Mitra - created as souls (don't need physicality); All the prophets came from same soul; Methi and promise of "milk and honey" STP and STM ; the time is now; Promised Day is understanding the knowledge of creation; With Gas Units you can take all souls in whole family and move to another position; Understanding knowledge of creation depends on openness; How STM creates physicality - transmutation is reverse - expanded STM gives to the weaker remnant STM in center of head - secret to transmutation in U; 34th health teaching; Since you couldn't understand how to transmute can use EU to learn again; HARP is irrelevant and all the other conspiracies; We create the new conditions on earth others will follow; Comes from detachment; KF invested millions with company to bring out T - waiting to see if they defrauded us;

Teaching on Deuterium; H - D - T , D is the balancer between H and Tritium in adjusting the plasma energy for transmutation of elements in the body through the lymph and glands like thyroid, etc .. Has to do with neutrons in nucleus , plasma adjusts back and forth - Deuterium is the mechanism; Same behavior in C14; Becoming the strength of the Soul of the Creator - get access to the whole knowledge of creation; Souls don't hope they create conditions for it to happen; Preparing the final step towards understanding world peace; Need as many people as possible to come to Linz and do transmutation - make to the change faster;

ENGLISH TRANSCRIPTION

(:14).

K- Yes, Good morning good day to you as usual, wherever and whenever you listen to this series of Knowledge Seekers or Keshe Foundation Spaceship Institute. We are back

in, .. as I say, as usual, how we can add to the knowledge and share knowledge and maybe bring a little bit of change to someone's life somewhere.

The process of the teaching in the past few weeks with the presentation of the units, the Energy unit, and the Gas units has brought a new phase to the work of the Keshe Foundation. In a very short while we will introduce new systems, (:16). which will be added to the collection of the Enhancement Units (EU), where we create conditions of life, maintaining life, and what we call, being able to transmute life from one position to another.

As all of you know, or most of you know, we have gone into the phase of what we call, transmutation. Which means, initially at Linz center we'll take an object, a person, a condition, and transmit it from one system to another in the center. We, as we said, looking for volunteers, to be at the center, for us to be able to start these tests of transmutation.

Essentially, this will bring us the knowledge, confirmation of the knowledge, and confirmation of the development, to see if we can transmute. We don't transfer anymore. It's not a "Back to the Future," and it's not whatever you call it. It's a transmutation, where we transfer the essence of life, and with it, we carry the content of it. Up to now we had the skin of the man, and the contents, was all ?? and the life, and the soul within it. Now the soul is the envelope, and the body of the man, the content.

In a way, we are stepping into a very unknown knowledge. But at the same time, we are stepping in the knowledge of the Creator. (:18). Known to the Creator, understood by the world of the Creation. For man it will be very interesting. As I said to one of the Knowledge Seekers (KS), the first man who said the Earth was round, they put him on the ?? pole. Now you can imagine if the clergy could get their hands on me, what they do, if I tell them we transmute by the soul.

But in any case, the man has become more open minded. Man understands more knowledge, and man can see what I call, the step in the development of the what we call, the knowledge of the man in the D of the world of Creation. For many of you, it's interesting to be able to do something, or something I wish for. But it's not a wish anymore, it's the reality. It's what we said, and what we are doing, is that, we go into the phase of transmutation.

Which means we transmute the energy. We don't transfer the body. To do this, you need a vast knowledge of the Creation, to be able to condition it, that it takes shape in a correct way, needs more knowledge. Not by from us, but knowledge from Knowledge Seekers who work with us, to understand it, to be able to carry it out, to be able to bring the change, in the next step in the knowledge of man.

What this will do. What is important for us, is when we carry the man, we carry all of it. It's emotion, confirmation of existence, it's memory. The memory in the world of the man, is in the brain of them. (:20). But where is the memory of the soul? How do we

confine and bring the dimension (D) of the memory of the soul, in the dimension of the physicality (P) of the man?

In a way for the first time, we allow the brain, physical part of the man, to connect to the brain, energy part of the soul. This has never been understood. If we say, that the soul remembers where the mother is, to connect with, or where the father was 20 years ago when he died, today, that he can connect with. So memory of the soul exists. This is how he connected itself. This is how he gathered the energy.

But go back to the older teaching, "I made man in the image of myself." If a man has a brain, and a memory, so it has to be in a structure of the non-tangibility, in the dimension of the Soul of the Man (STM). One of the biggest problems for the future development, is to be able to carry the memory, the information of the soul, when you carry it across. It's no use taking the man across when he has no memory, who he is, what it is, where he's been connected to.

And then at the same time, keep the connection between the memory of the man, and the memory of the soul, connected, the same, that you don't end up somewhere else, having some information, which is not relevant to the body, you carried across, because the physicality.

But at the same time, as the soul changes, when the body goes through the transformation to fit the environment, then what happens to the memory cell of the body of the Man? What does this mean? Is that, (:22). in the space where we land on the Moon, there is no oxygen, do we need the lung? There is no water to drink? Do we need the digestion system. There is no food, if you're going to live as a man of the Moon, not taking food from Earth to the Moon. In another position the universe, what is the water here to us as a way of life, is a killing machine in that environment.

So, how does our body transfers from one to another, in the process of the transmutation? To what extent Man will understand this? It's like me dropping you in the ocean, in a submarine, and then throwing out in the deep ocean, out of the submarine. What happens to you? What would it be? Would you mutate? If I send you out of the submarine in a dimension of the physical man, you die. The pressures, lack of oxygen gives you a few seconds.

But if I throw you out of the submarine, in the dimension of the Soul, you live. This is the difference. This is what is coming out of. If that dimension where you land in the ocean is a highly acidic area, you burn, if you go into dimension or physicality of the man. But in the dimension of the Soul, you're energy, you transmute, you adjust and connect to the energies from that acid, allows you to live. And you transfer this information back to the physicality, (:24). and the physicality instantaneously takes the shape, which is needed for you to survive in that position.

Where you see the shrimp living. Now you get to know the life, the way, the shrimp in depth of the ocean, in acidic condition, lives. You don't need thousands of years of

mutation. The mutation comes out of the survival, through the information, the energy of the existing life in the environment, that it's transferred instantaneously to the Soul ?? and the Physicality of the man. Which means you take immediately, the shape, the dimension, that you need to survive, your soul needs to survive in that environment.

On Earth, adapting to a new environment, to a new way of food takes millions of years, thousands of years. Through this what we call, evolution of the physicality, many die of cancers of different things, because it cannot be adjusted. But you don't have that chance when you land in the new space, in a new position. What does this do? How much knowledge do we need, to be able to go through this transmutation and transfer, at the same time?

The process, the understanding, the completion of the life, has to be instantaneous, in the memory of the man, in the DNA of the man. We remember DNA changes, what is needed to. Now, the DNA change, or RNA change in the energy level of the Soul of the Man, has to instantaneously transfer into what we call, DNA of the man, (:26). at that time and position, to convert, to be able to survive.

This the only way, that the man will become the true traveler of the space. Otherwise, you're welcome to the backward, to what I call, ancient way of the traveling in the space, through the one point to another, through the UFOs. As long as the man sticks to a system machinery, or a flying system like UFOs, or your airplanes, you still in the D of physicality, limitation of time, space and position.

When the man and the what we call, citizens of the Universe understand the knowledge of the transmutation, then it's a different ballgame. Then you come, to become exactly like what we gave you, and you could not understand it. You have the orange, and you have the Cup. When you taste the water, it's a water. When you put energy packs around it of different Gans's, now it transmutes the taste, the flavor, the energy of the orange into the water.

That fish, that shrimp lifestyle, becomes that orange for your soul, to understand how to change, transmute directly into the dimension of the life in the physicality of the man, that the man will be still a man, in the dimension and structure, that he can live, coexist with the shrimp. You do not become a shrimp. (:28). Now you understand how the transmutation and transfer from the dimension of the Earth, to another, in the dimension of physicality will take shape. This is what is to come.

This is what is on our hand. And this is what, we ask you to come to Linz. We need to do as much transmutation within the structure. And then while you're here, if you came from Canada, to see if we can send you back to Canada. You don't need a visa to go back to Canada, because you're the citizens of Canada. You don't need a visa from Brazil. When you come into Austria. We don't need to interact with no one. We get by in interaction with the governments and whatever. Your government doesn't care how you enter Brazil from Vienna. Nobody asked you a question about it. This is one of the fastest ways, that

we promote the traveling of what we call, Knowledge Seekers from immediate vicinity areas of the Linz., Germany, Italy and then throughout the world.

When you're here, you go back home. Nobody asks questions. The only problem is, you have a stamp on your visa, how did you get him in? In Austria, they see you, you're still here, but you don't exist. "I left, you forgot to stamp my passport." This is how we will develop the next step in the space technology. This is how will come in the coming time, (:30). as our systems, understood by our team, and produced. We create the condition of transmutation to the Moon, and we send you to the Moon. We land you on the Moon. And then you will come back and tell us, if you stayed in the dimension of energy, the way a lot of we are doing in the Enhancement Unit. Or you transmute to transfer to body of the P, and feel the dimension of the life on the Moon.

Many of you who came to us, and we asked you, and you said you been to the Moon, or you been somewhere, and you felt the sand, and you touched the stone, you actually physically have been there. But in the dimension of the fields. All of you who traveled with the system, you went to the oceans, you swam, you actually have been there. The first transmutation has already taken place. You're already, leaving the physicality here, with the connection of the soul to it, have taken the first excursions into the world of the Creation, and none of your up to now knew.

When you were in our system and Linz and you went into the Moon, when we asked you, destination Moon, and you felt the sand, you felt flying. You touched the stone, and some of you read, the what I call, transcripts or whatever, signs on the stone. You have actually been to the Moon, but in the dimension of the energy, and the Soul. (:32). Where the other end of it was connected to you in our system.

So all of you who've been through the what I call, Enhancement Unit, and you're traveled somewhere, or met someone, or have been there, met mom and dad, you actually traveled through the transmutation, it' not a dream. As I said yesterday, in Rick's Teaching, Workshop, it's you, who have to understand, and learn, that from now on, man has two dimensions of living. The physical life, you are here, the energy, or a soul life, which travels the world, and you say, I was in New York this morning, and did this and this. ?? Don't say, you're crazy, could be here.

Now we understand, we have been through the dimension of the Soul. This is why if you go back to the teaching a few weeks ago, I said, we will not laugh at you when you come out of the system, that you did something. It was very interesting to a lot of you, "oh I became a mermaid, I became a fish, I went to the Moon." The only thing you have not understood, all these people have been to transmutation through the dimension of the energy.

For the first time, mankind has become the traveler of the space through his own decision. Not by, what I call, "the monkey suit." (:34). The monkey suit, Americans are used to, Russian space agency used to, and others is for the dimension of physicality. You

don't see the rays of the Sun arriving Earth with a monkey suit, they travel in dimension of the fields.

Now, all of you who came to Linz in the past four or five weeks, and you went to places, and you met people, you met your father who died years ago, or your brother, you have actually been there. You have actually traveled the dimension of the physical life in the package of the soul. The memory of the physical life through the Soul of the Man's connection, connected to the soul of the brother, or the father who died years ago.

The reality of it is, when you make the Gans's, the CO2, you see a fuzzy white things from interaction of the fields, which make that color, and you say it's a CO2. But the energy field of the CO2 connects to the zinc in the, another Gans, to another. I put the cell of your body, which is made of Gans's, and it's got the energy dimension, and it nourishes it. And you change. The Gans's in the Cup, or the energy fields of it, goes through. It's the same now. You are. Your soul is that Gans, and the fuzzy things you see is your physical body.

Now you understand how easily the knowledge of the Creation has been transferred. You are nothing but a bunch of Gans's. It doesn't matter if it's the liver, the kidney, the leg, or anything else, you are that fuzzy bit. And the energy, which holds that fuzzy bit, you call it, a Gans, is your soul. (:36).

Now you understand, now you can understand the limitation of it. Before you becoming a Gans, you were a piece, you were an atom on a cell combination of the copper. Before you become that soul, become that package of the Gans, you were the body of man in the physical dimension.

Now you understand. Up to now, you did not know how to make Gans's. You went, you bought caustic, you Nano coated, the plates, and then you put the plates against each other in a different connection. And then you create your Gans's. You managed to free the energy from atomic, from the condition of physicality to energy. You came to us, in a physical body of the Man, we put you in a system, we allow your system to become Gans's, and then in a interaction as a Gans, who do you see? This is you, the Mother, the Father, and the rest.

Now you understand. You did not know how to convert the matter into energy, and then use that energy for whatever you need. Now, with the new system, we do the same for the man. We transfer the energy of the man, ?? in a matter of state, into energy of the man into the energy system, what we call, the STM.

In a way, we make a Gans of you, in the systems. We allow you to make Gans of yourselves. (:38). We just create the condition of the ?? salt, the condition of the expansion of the fields, to come out and manifest themselves. That atom of copper on the surface of the copper wire, will stay in the matter condition, unless you create a condition for it to be separated, as a Nano, and then to become totally on its own, as an energy.

This is what exactly we do with you, and the body of the man in this systems. Then now, you're an energy. Where do you want to go. Doesn't matter if you're a Gans and I put you for process of energy production. Or when you're a Gans I put you as a patch for somebody's cancer. You still release the same energy.

Now you understand the process of the Keshe Foundation is. Now when you're in that position, I can take you anywhere I like. Or I tell you the direction and you take yourself to that position, through the connection of the fields, which are there to interact.

Do you see every time you go to mom's house, unknowingly mom will be there? Or does your mom wants to see you every time you go home, to see her. So it's the same when you are in the bubble of the dimension of the Gans of the physicality of your soul. You make contacts. Is this person, there, ready to create the condition of approach. (:40). I wanted to see Mom, but I couldn't. Mom doesn't want to see you, she's asleep. There's nothing wrong with it. I wanted to see the Pope, but it didn't happen. The Pope is busy playing with something.

Now you understand, there is no difference in the process of our systems as a production of the Gans, which have been busy with for past few years, or transmutation of the man.

Now we understand the next step. Now, we understand exactly the way the magnets, Rick used to play. Now, the magnets are the soul. When you put a magnet in a patch of many magnets, some of them don't move. Those who are immediate do. But even though, this has already a connection to it. No contact, I'm not moving, I don't need to move. Papa is not home today. Or if the Papa has been waiting for you, and you come with a dimension of the Soul, you sit, you chat, you have everything you want, you come back happy. I met my dad, and this and this, and that.

Is it a dream? Or now it's the reality to understand, that we can do both at the same time. And the beauty of it is, if you go back to the teaching of the past. Do you remember what I explained to you? Your souls is in the center, and your brain is here. (:42). When you go to sleep, the soul manages just to go, maybe contact the brother or the father. But it communicates with the "Memory Soul" of the Man. And in the process of going back and forth, crosses the brain, and part of that information stays with the memory of the man.

Now, the whole process is upside down. The man's soul is there, and the brain of the man is in the center. Then you transmute, and still going through, to Papa, or whatever you want it to be. But this memory bank of the energy dynamic structure of the soul, will embed that information, still in the memory of the man. Then when you come in the dimension (D) of physicality, you remember it exactly like a dream, but it's not a dream anymore. With a man and his brain, you took a taxi to, and went to see the mom. With this (flight system FS), you take the dimension of the energy.

This will take a total new D in the life of the man. As I said, it takes a lot of understanding from us. Then maybe as I said, it brings a new understanding to the "beautiful people," what they call schizophrenic. Because man itself has made the

dimension of a schizophrenic, in the dimension of the encapsulating the STM, in the physicality. Now on the soul takes open, (:44). and the physicality has to remember.

Now, how do we respect ourselves? When we say to our family, I went to see Papa, and that's what it was, he was nice. We had a meeting and we had a tea. Papa died 20 years ago. "Oh, you were in the dimension of the Soul, you transmuted." You did not transfer, getting a taxi to go to see the father, he was no home, you just went to the grave. He has no place to be in the D of physicality. But in the dimension of the Soul, he is still part, and connected. Now you understand the difference.

Now you understand how clearly I could explain for years, to respect the "beautiful people." They live more in the dimension of the Soul, than in the dimension of the physicality.

I am the Methi. I am the Messiah of my own soul, to understand the knowledge of the Creation. It's your responsibility to become the Methi's and Messiah's of your own soul, and no one else's. To conquer the knowledge of the Creation. To understand the process of the Creation. To understand the process of the Creator, which created the creation. In the English language, (:46). we say, "we got into his brain," we got into the way he thinks, and we can predict what his next action is. Now try to get into the way and the brain of the Creator and how He thinks, and then you'll find beauty in Creation.

We have lived the schizophrenic between our Soul and physicality, and we call, those who live in the dimension of the Soul, schizophrenic. But in fact, they lived in the dimension of. When you're in dimension of the Soul, does not much need, for big space to have 10 brains, can operate out of the same.

When we bring these "beautiful people," who have two or three souls with them, one decides to go to New York, one decides go to the Moon, and one decides goes to Vienna, and we have one physical body. What do we do? If one decides to manifest itself in New York, while the other one wants to do the same thing, because he just saw a beautiful girl, and he wants to show the beauty of physicality, sorry, the body sits in New York.

Now you understand the dimension of the change of the role for man. Understanding the memory of the soul, or understanding the memory of the physicality, because in fact, when you put a schizophrenic, (:48). to man, you call him with three souls. He will be able to manifest himself in all three dimensions, in the dimension physicality of the point, the time, and the place. In China who will look like a Chinese man. In America he will be blond and blue eyed, and in Africa he'll be a black man. But it is all one P.

Remember the orange and the Cup. In New York he'll be a doctor. In Africa, he'll be a wildlife saver. And in Vienna, he'll be a dancer, what he wanted to do all his life. Now he has a chance

In a way, what the womb of the mother could not do to create a triple, we do, bringing that soul of the three, into dimension of physicality, and allowing the souls to expand.

Then you find out, Mama, I have three sons in the D of physicality, but in three different places.

They will all be the same. They'll feel the same about you. And the memory will be exactly, what they corrected as the dimension of singularity of the physicality. Very soon we'll show this in Linz. We'll bring people with this kind of condition of the three souls in physicality, and we show them in the dimension of 3 physical bodies. Then I wonder who will be the schizophrenic, (:50). the man who has not understood, or the man who appreciates the beauty of the Creation. As I told you with this new knowledge, a new and beautiful time has opened up for man.

Don't forget, because you're so physical, I explain it to you, if this was a problem for you. When you have an alloy, you have different materials embedded in this alloy. What do you do? When you make a Gans of it. Each one of them will make its own Gans, doesn't it. And it will show the property of that material, be it the Zn, be it the Cu, be it the nickel. Isn't this the same (as with the schizophrenic manifesting different physicality's)?

Now we understand and we can explain the condition of the Creation in its true meaning, and not in the fallacies the man has made for himself. If you go back to a longtime ago teaching of before, I said, in the future, the captains (of the UFOs) become those we trust our soul with, and they let us go, where we go. Wouldn't this be (the schizophrenic with 3 souls inside) be that the captain? Carry the soul of many passengers. And when it comes to the time and the place, the souls will take, and manifest themselves in the D of physicality, which they want. (:52).

Now, you understand, I am the true Methi, that I can explain that, in every condition and position, to bring the knowledge of the philosophy and what we call, understanding of the source of the Creation in both dimensions, and the essence of the Creation. Now, we understand and we can explain the true cycle of Creation, from the Creator to the man and beyond, scientifically. Not with hypocrisy, and what we call, literature.

This is why, it has come the end of religions, and the end of what they called, the abuse of the STM. There is no place for theology, when you know that science of the Creation. There is nothing left but emotion, and dimension of existence.

Many of you had a problem with understanding this process. Now we can see how simple it is. We had the same knowledge 10 years ago, but you could not understand it. You could not explain it. Now we have systems we can do.

I wonder if a mother who has a schizophrenic child comes to us in Linz and sits in the transmutation room, and watches her three children, maybe two as a girl, and one as a boy manifest in front of her, and tell her the things they've done with her and how. And she remembers all of it. (:54). Would she accept the existence of the three physical life of the man in that dimension, of .. her own Creation? I will do this in a very short time.

The new system is getting set up, is set for this job, to be able to transmute, confirmation, and bringing many souls together to travel to one destination, in a point in time, and space. We tested this with you, but you were not aware.

How many of you have been with me in the transmutation room, and I had appointed, maybe five of you in the room, and I said, "he is the captain," and the rest of you, the passengers. (Wasn't the) captain, was aware of his passengers. While the passengers were not aware of the Capitan, where he was going to, and when they come out, and we talked to them. We have proven this to be correct.

Now, in coming time, we'll see the change. We'll see those who you dreamt, you spoke and you put in the what we call, sanitarians, you put them in prisons, you put them everywhere, and you called them schizophrenics. I will make you to be ashamed of your own conduct. How we put them in metal Institute, where we are the "mental's," because we didn't understand the process of the Creation

When you see an alloy, do you call, it a mental, or a metal? Or do you use its beauty. Now that you can separate it, (:56). you can enjoy the energy of all three at the same time, in whatever you put in that mixture.

Now we understand more about the process of the Creation. Now we understand more about, understanding of the process of conversion and simultaneous transfer, and transmutation to them.

As I said, the creatures of the universe, ?? ?? the knowledge man has been given. That they thought he was so backwards. Now he has become one of the ?? key ?? figures in the knowledge of Creation through the Messengers of Methi.

In a way, we connect your soul to the soul of the Creator. That's all it is. For you to understand the total process of the knowledge of the Creation, from the beginning of the time.

There is no need, and there is no room for theology, when there is no theory of the Creator. Where you face the fact, you understand the Totality. It depends, which level of the energy of the Creator, you can be graceful enough, to transmute yourself to. Then as part of the teaching, if you remember, I always showed you the plasma as this (a spiral). It's you who has to understand, (:58). how much of the process of the Creation, and the knowledge of the Creator you have understood.

It's the knowledge which gives man the closeness to the Creator, not the physicality, and praise, as charlatan jobs, in mosques, and in churches and the rest.

It does not need to be a farmer, or a king, to get to one or the other (to get to the center of Pl). The knowledge of Creation, is open to every soul. It depends what the soul has the capability, and openness to receive, and to understand, and to be part of the point, time, and position, in that knowledge of Creation.

With me, I have traveled the full spectrum. And with you, you see the part of my time, with this time and position (at the beginning of spiral). That's why I always said, there'll be no magic for the work of the KF. Because we explain to you the Totality of the knowledge, from point of the Creation on. It depends how much of it, and which part of it you can understand.

(audio drop …) total knowledge of the Creation, and it's for the man to decide where he wants to be. (1:00). Now you understand the process of the knowledge. How you have access to knowledge, whatever you want, because I have traveled the full path. And you are just the time of a frame, position and time and space. (You are just at the beginning.)

You came from the fractions of the fractions, and fractions, and divisions, to become. Where we come directly from the source to the same position. That's why you lost part of the memory of the Creation. (Because it keeps getting split.) Otherwise, even these (??) were created from cycle of the origin of this, at one point or another.

Now you understand, why we asked you to come to Linz. We want to put those fractions together, that with it, will make a new race of the man. That you all are connected to, not by nationality, but direction of the soul. That's why we asked for more nationalities to come, to imprint, to create the connection of the knowledge of the Totality.

Now it's up to you, which path you take, and how you will travel the span of the universe. How you will go to the next step of understanding the Totality of the Creation. "I made man in the image of Myself," because you came from the fractions of the divisions of Me. (1:02). How can you not be Me.

Today's teaching is very strong, and is very in-depth, but it's for you to understand. And it's for you to be able to connect to, to be able to share with your own physicality and the soul. The knowledge of Creation is simple. Man has made it difficult for him, to connect to it. And that's why you're in the shamble of the position, and the time, and the place you are today.

It's just a matter of how, and what your extension is, and what you understand. A few minutes before this teaching, I was online with some officials of a government. Some of the Knowledge Seekers here were in that meeting. I said something very simple to one of them. I said, give me your telephone number, and I'll bring you to Linz. He said these are secret ?? things, we cannot talk about. I said, the Europeans are buying tickets for that position. What is secret to you, is now, Knowledge Seekers in Europe, working with, living with, and they have access to. They are buying tickets to do it. (1:04). And for you it's confidential, and you cannot talk about it

Isn't this the situation we have with some of our lives at the moment. It just depends on the span of the knowledge, and understanding the Creation. The Knowledge Seeker translating, wants to be in the transmutation. And the same guy, from the same country, to him it's confidential, and secret, and cannot be spoken. But to you Knowledge Seekers

have already bought tickets to come to transmute. It's how ignorant we are about the knowledge, which brings us the ignorance in accepting the knowledge.

The process of the teaching is very simple. Now we understand more. Now we understand the Totality. Now we see the Totality. As I said, the break point will come for us in the next few weeks. When we show you in the transmutation, and then transmutation and the transfer at that same time. Do you want to fly, or do you want to go to. How many of you in the flight system (FS), I have given the option of? And how many of you when you come out, you say, I flew to Moon. And those we asked you to transmute, you say, I went to Moon. (1:06).

Now, you understand, everything is set, to mature the STM in the right direction and D. Then it comes, the biggest question for you at this moment, why did the Keshe Foundation brought in the Energy and the Gas Units?

If you cannot make the bubble of yourself to come out with, I can put you in a gas bubble of mine. When you don't have a car, and you want to go from A to B, don't you get a taxi? Or you get on a bus. The plasma transmutation of the Gans's allows us to speed up, for those of you, and the objects, which you cannot, they will not be able to do that by themselves.

It's not for you to burn the fuel. It's for you to learn a new package of life, with no physical structure inside, that we put, we encourage, to place the STM and the STP of the Man, within it. We created our own envelop. And you are only happy with the energy of burning it.

I remember years ago, (1:08). when we had some friends, who came and haven't seen their family for decades, were taken to a so called, "having a meeting," to a party of the family they haven't met for years, decades. What they did, they called a doctor to be ready, that if any of the guests, or the one who have come in, they get over excited, and they might have a heart problem, or they faint. That there is a doctor for them to support.

Do we need to bring doctors in the enhancement center? When we show the mother, the physicality and the feature of the three souls, which have the dimension of physicality in front of her? Would she be able to handle it? Or would she be able, or would she have a heart attack? Or do we elevate the Soul of the mother, to see the children first in the dimension of the Soul, that can accept them in the D of physicality. Either way, it's the same for ??

One of the reasons I pushed for two Seats in the transmutation room, was this. That when we do, those who we know have two souls within them, and we call them, schizophrenic. That when they manifest from one system to another, there is 2 Seats for them, and they can manifest themselves in the dimension of P. But would the mother and the father be able to accept the 2 children.

Or would they come to terms with it, when they tell them, (1:10). how they played games with them in the dimension of physicality. "Mom, do you remember this?" That was mine. Mom, do you remember that? That was the other one. And do you remember? And the mother knows all of it, but now knows who was the doer of it.

This is what you're doing with you in the dimension of the singularity, we put you in the machine, and allow the soul to expand for you to be able to manifest it in another dimension in a world of schizophrenic, to the physicality of the Man, in the dimension of the both.

We go for a break, we come back, and we take questions. But I hope today you understand more. Now you understand why we asked you to come in to the dimension of the transmutation. As many people as we can take, to go through this process. It will give us a chance to compete more the whole structure of the soul of the created on this planet. Make your way to Linz, and let us bring humanity to peace, first with oneself, and then through ?? ?? on this planet

R: … (1:12). 10 min Video

<<< BREAK >>> 445 KSW August 11, 2022 (1:23)

(1:24).
Q: Did I understand correctly last time, to be a volunteer for the transmutation in the first trials, still cost 2,000 Euros, is that correct?
K- Yes, you still have to register. Running that center has expenses, tens of thousands a month. We moved the systems there, you are not paying the Foundation, you are paying to cover the cost to keep everything running there and be able to develop. This is what it means to cover the cost of the, what we call, the running that Center. You will see people when you come in, three, four or five people there. It's an Austrian wages. The rent, the lighting and everything else. The place has to pay for itself. All the people that come as visitors they don't pay anything, it's free. We get 20, 30, 40 people a week, they go through the Center. The expenses has to be covered.

Q: .. Someone was spreading fear recently in a German plasma channel, saying it's poisonous and extremely dangerous to touch a Nano coating. (1:26) Supposedly the particles go through the skin and with the blood into the brain. I do not believe it, it was

never a topic like this. But many others, especially new people were frightened in the group. Can you say something about this?

K- We always advise you not to touch the Gans's and not to touch Nano materials. Nano materials doesn't go into your blood and the rest of it. The one who bring the scares are the Belgians and the pedophiles in Germany, we know who they are.

Anyone you see coming up with these scares, just go back on their IP and see where they end up. If they should ?? truly, they want to be who they are. It came from the Belgians initially. Then the Germans picked up on it. Because as I said, we don't go into that, we've been long enough with this ??, we got rid of the Belgians and the Germans with what we've done. Now and then they pop their head out to do.

We advise you not to touch Nano materials because you updated ??, you attach your energy, they feed you with energy. If it is dangerous, you look at all the products nowadays you buy in the market, this is Nano particles, Nano blah, blah, blah. If Nano material was something dangerous, why, but how come when it comes to the Keshe Foundation.

These are a bunch of pedophiles and thieves who up to that could manage to scare some people away. But with the knowledge and understanding, you go into any shop, you go into any pharmacy, you buy products which have Nano particles with it. So, how come when it comes to Keshe Foundation, it's wrong?

They use people's innocence for this. We advise you not to do, because of the energy transfer. When you're in touch with a lot ?? or too much energy, it’s the same with the Gans's. (1:28). We always tell you don't digest the Gans's, but use the Gans water.

They are like the priests, they live of the ignorance of the knowledge of the man. We advise you, don't touch it from the beginning. Don't inject them, because ?? till, particle is not what it does. We have doctors who inject themselves with Gans's, they know what they're doing. We have men of medicine who do a lot of things with us in the background, with the medicine. They are doctors, they take charge, and they know how they inject themselves, ?? We advise you not to do, don’t touch, don’t drink.

As I said yesterday, it's one of the greatest pleasures when we see things. As I said before, one of the leading doctors in cancer, head of a cancer hospital, having the cancer would have died about two and a half years ago, with a very bad lung cancer. He posted to us this week pictures from. I explained this in another teaching, I think yesterday with Rick. And this morning he posted something else, which was beautiful. It says, "Dear Mr. Keshe, I just woke up from a nap, and in fact, I have completely forgotten about the tumor in my life."

This doctor, this physician is the head of the cancer hospital. As I read yesterday, it’s a pleasure to read this. If you go to Rick's teaching. He sent me pictures of him and his daughters in the forest. He said, "today I'm taking my two daughters for a walk in the

park. (1:30). Thank you, dear Mr. Keshe. If it were not for you, they would not have me, as a father today. I cherish my life now, and love everything now."

Two or three days before that, he sent us a picture. He is a forty year cancer specialist, head of a major hospital, with him playing basketball with the hospital basketball team. You can imagine how much energy you need to be active with the young people in the hospital to play basketball. He is proud to be himself. Monitoring himself in the hospital, where who would have died two and a half years ago from the tumor, from the intensive lung cancer.

We advise people to do things, if they are men of knowledge, all his colleagues are expecting him to die, I think two years ago. He still have the tumor, but that tumor has become part of the structure, as he said, he doesn't even think about it.

You have to know what you do with the technology. You have to understand what you touch, when you touch, the way you use the material. (1:32). He is one of the leading cancer specialists, head of a major .. cancer hospital. With all the diagnosis he's had for years, he knew he would die. But the only thing was different with him, he was a Knowledge Seeker.

He knew and he tried this on his patients over years in the hospital. He knew it’s the only way that he can survive it. Now he is. You should see the pictures of him in the forest with his daughters. It’s not just talk, you see him in the actual full basketball outfit, playing and on the field.

If you do it the wrong way, you don't understand. But he did (understand). We have a full report, everything he’s done from past months, and months and months. How he injected, the way he injected, the way it’s the sequence of the things he did, the way he used the Gans's. We advised him what Gans's is to make, he made the Gans's himself for himself. Nobody else made for him. In his office in the hospital he makes Gans's for himself. He's the head of the hospital of cancer. But he knows how to use it.

As I said yesterday in the teaching with Rick, the only people who lost in the world of medicine was the Europeans, because of the lying and cheating of the king of Belgium. Chinese are using it extensively in many places, doctors are using the technology. (1:34).

They (the Belgians) use fear, they took us to a fake court. It’s finished, since Sunday. We are free to teach, to touch, to help doctors, to help the others. The five year ban on us is over. But a lot of Europeans died because of it. A lot of nations, European nations and the others paid for it, for the lies and cheating of the Belgians. But Chinese leading doctors use it. South Americans, Africans doctors and scientists use it.

As I said, you are like the pheasant who put their head in (the sand). You didn’t see your backside yourself. The king of Belgium got you. How many of you have lost your loved ones in past five years? We couldn't teach you, we couldn't expand the knowledge of medicine. (Now) we’ll expand it heavily.

The only thing we didn't know was that, the biggest agent of the Belgium was in bed with us. One of the biggest pedophiles in the world, the whole family. All (of them with) prison sentences, and we didn't know, that they were working together to side (track), to literally scuffle the technology (T) down, living a schizophrenic life. Being a loving life and working with ?? pedophiles, with prison sentences, long term six, seven years. The whole family. You paid in turn as Knowledge Seekers for the fake documents. (1:36).

Don't touch it (the Gans and Nano), because you don't know what you are touching, in what level you absorb energy, and how you absorb the energy.

Don't be scared. Do not be scared at all. But don't touch, till you know how much energy you absorb. It's like Gans's, we give you the dosage of Gans's. We don't come an measure your Gans's. We tell you 50% of this, 70% of that, does this, does that. Then you understand not to be scared. If leading scientists, and doctors are using it and seeing the success with it, how can it be dangerous?

Any other question?

Q: .. Hi, Mr. Keshe. Thank you for the opportunity to go through the flight unit. My question is, when I had my children during childbirth, it was one of the greatest sensations of love I've had in my life. And we know that the woman at that moment, has high levels of hormones, (1:38). such as progesterone, cortisol, oxytocin, and then inside the room of the flight unit I had a similar emotion. I would like to know, if inside the flight unit, these hormones are also increased? Or are they just connections of our emotions with the love of the Creator? If you could tell me a little more about the possible physical changes, I would appreciate it.

K- It's mainly increase, in a way it's not an increase, it's the expansion of the energy of the soul, where the STM carries the spectrum of the energies, and hormones are energies.

As I always said in all the teaching, when the Soul of the Man expands, it crosses every cell of the body of the man to get outside. You know, when you go through a tunnel from one side to another, you pass every stone, which has made that mountain, you cross it, you cross the energy of it. This is the same. So, in that process, a spectrum of energies cross to reach the outside, where what we created there, what we call, the fields in the system.

In that process, some of these fields are at the strength of the hormones. And the hormones are in a way emotion connected. That's why we call them hormones. I explain them as the harmonic of the emotion with physicality. (1:40). In a way, if you call a hormone, in what we call, the structure, where connects the emotion to the emotion energy of a cell. In the physicality, …. we call it psychosomatic.

In the structure of inside the body of the Man, in the energy transfer, we call it, the hormones. The soul has a spectrum of energies, which some of it does it on that level. If

it happens to touch your field, you have that emotion they have. You've touched the work of that hormones as it goes through. Yes, you feel it.

We, when we used to do the tests, before these stupid cases, which were brought on lies and cheats by the Belgians, when the people used to use the system of the Keshe Foundation, which we used to build. By the way, we have a certificate from Homeopathic (institute) of Belgium to make the systems, and our license is still valid. We .. used to tell, for example, to the women, who went through menopause, where 10 years, 20 years down the line in their 60s, 70s. We always warned them. Because that those days we couldn't explain to the depths of, that we can explain today. That, be careful, that a lot of them used to get their menstruation cycle back.

You only get menstruation cycle if you touch the hormones. (1:42). So, it was obvious from the beginning, the energy produced through the plasma technology touches in the spectrum of the field, the hormones. Because originally a couple of ladies in Holland, in their 60s and 70s, which they started using the system, they came back and said, Mr. Keshe, we've got a problem. Since we started using this, our menstruation came back, it has become regular. We lost it 20 years ago down the line. I went through my menopause, what's happening?

Then we start looking at the structure, that plasma technology, as the hormones are plasmatic. So, we're building, we're creating hormones that others. We're creating fields at the strength of the hormones. This became very clear, that the plasma technology reaches the condition of the plasma of the hormones.

Many women; and it became very regular, and then we always had. When the couples came to us in their 60s and 70s. We always told them be careful as a grandma, you don't become a papa, or a grandfather you don't become a papa. Because now the extension of the survival of life has extended with the new technology. We've been, we know this does for decades now. That the plasma technology. The field works with the hormones, which is a field base structure, as what it is.

So yes, when you go through the system, that sits there. If you've gone through the system and you're in menopause, be careful, you could become a mama very quickly without you knowing it. Then we will see this coming up. (1:44). All the people in their 60s, 70s, you've been through the 50s, you've been through the cycle of the Keshe Foundation flight system, your body has tuned itself to perfection, when you were young.

90% of you if you go through the system the right way, can regenerate, to what we call, pre-menopause. Even with a man it's the same. It’s a part of the property of the elevation of the soul. We don't do (medicine). Our systems are not medical systems. Our systems are there to enhance the energy of the body of the Man. But in that way, you enhance the soul, and the soul expansion. When you say, "Oh, I went to the Moon, or I went to see the mama," so the soul has expanded beyond, that it's done the job. So, in that process passes every organ in the life of the man.

If you came to the Enhancement Unit test. In the first three Chairs, everybody talks about this. When they get to the second Chair, they're always telling you, they could not feel anything about their hips and up. It was like (being) in the fields.

In the first Chair, we prepared you for the dimension of physicality to become, the Soul of the Physicality (STP). Then in the second Chair, which was the STP, 80% of the people who went through, we're talking about, that they could see the legs, but above it they couldn't feel. These are the dimensions. These are the organs, like stomach and the rest, which are dynamic. Your legs are not dynamic.

Then when you go to the third system (Chair), (they said), (1:46). they could feel the expansion of the fields. They could fell the fields. Now we put all the three, in one. Then when you talk about the second Chair, (energy) going through you to the legs, so you have already interacted with the sexual organs, the ovaries, the testicles.

How many of men who've been through, had a prostate problem, they tell us, they have not much that problem anymore, it's easier. Because the expansion of the soul satisfies the what we call, the problem you had with your child, psychologically which created the cancer, and secondly, the interaction with the cells and the hormones. This process we understood, long, long time ago, before 2008, 2009. Now we see it.

Many women who cannot bear a child, most probably in the near future, by going to the resetting of the soul, and the structure, you don't need to go through all the other conditions you create to get pregnant. Because your soul in elevating, in enhancing the STM, will sort all that by itself. It's not our job, we are not a medical people. The structure is, by expansion of the soul, it's like, it's very much if you look at it. You know, you've got the microwave machines, and you put the material in ,to disinfect. The energy (of microwave) goes through them. It's the same thing, but this time, that energy is your soul. It elevates . Then it'll be nice to see, because we've seen a lot of things.

One of our Knowledge Seeker's mother was with us the last couple of weeks ago. (1:48). She came in a wheeler, a pusher, and she couldn't move. The when she went into the system, and she came out, she said, I can move freely. We've seen that many times with a lot of people.

We are out there as a health unit, we are not. We just by elevating the soul, enhancing the energy of the body of the man, the body puts itself in order. Some of this expansion of the soul, is at the strength of the hormones and does create a lot of things.

A lot of people, a lot of people I have watched in past weeks, they cry in tears. But they actually don't feel the tear on their face, physically. But they see the tears, but they collect it. I bring tissues, sometimes I go outside and bring napkins for them. Because they were not expecting that condition, where the emotion, the expansion of the soul touches the emotion of the physicality, where the tear comes from joy. We see all these things, we don't report it, because it's something we know, we add them, and we extend.

How many of you have been through the system, which you cried? Some of them cry. We have to tell them, can you please, you're disturbing the others in the room. But they are not aware of the tears, which comes from them, and they feel it. But they are not in the dimension of physicality, They are in the dimension of soul, but the physical body creates that emotion.

It’s an experience going through the Enhancement Unit. How you see it, and how it evolves. Yes, some of the energies are at the strength (of the hormones). It’s your soul, (1:50). it’s s your soul who created those hormones, in the dimension of physical life. So, of course you touch it

It's very interesting to see what comes up in the very near future with the expansion of the soul. As more and more of us learn how to live with it, and expand it and make it a beautiful life out of it.

Any other question?

Q: .. How will the goal of One Nation, One Planet come into play with this new technology, that allows the transportation and transmutation of the soul and physicality?

K- No borders. We can't track people anymore. No banking system, because we'll meet most of our needs. No restriction on governments to be abusive against their citizens. You don't like to live in this map condition, you move to another within seconds. No prosecution, because in putting you in prison to prosecute you, can move your body from the cell. There's a lot of things with it.

One Planet, One Nation, One Race you choose the place and space you want to live, where, what time, and where to be. There is no need for visas and all the things we created. We are better, you coming to us. (1:52).

Why the nations have created this visa business and passport business and restriction. Because we've stolen from you for long enough, now we want to keep it, you can't have it. That's all it is. The rest has to follow, because if you want to go with the thieves, they asked us to make you something. We give you a passport. Look at the whole visa situation and passport situation, in reality in the back.

There is no abuse. You'll be in Rome, Paris, in Tehran, or in Africa, or whatever, because they can't abuse you, because you can move on. Would there be refugees? Ends all these things. All these things will become in the history book of the man, very soon, very, very soon. The biggest problem will be the officials who think they can lose control.

These Gas Enhancement Units, which we put in the market now. You buy it, we try to make it, what you call, car conversion of it. Put it in the back of your car. Nobody can tell you how much you can drive. You don't have to have a fear, if you haven't any money to drive the car.

If you're paying 50 Euro a week for the fuel, which most of the people do to go to work, or shop or whatever, that's two and a half 1thousand you don't pay any more. That's half of the taxes to the government, which you don't pay, which you have to cover. (1:54). But the other half does not go to Saudi Arabia, we see the richest monarch, the most abusing nation of their own nationals.

As I said to the people we were with this morning, you sign a contract for hundreds of billions to get the supply, now you don't need. What are you going do with that 400 billion? It will come to our governments, these things very soon. That we need to be governed by one work, and sooner or later we set the scene. We imply and apply the scene, that it goes to the Universal Council. You will see it in a matter of handful of years. Universal Council will be one of the leading positions, even within the United Nations.

In the structure One Nation, One Planet, One Race is, I am a citizen of the planet Earth. That's all it is.

Then which part of it you come from? I come from the green part, called Europe. I come from the desert part, called Africa, the north part of the. I come from the forest side it's called, Brazil. We don't call ourselves, I am a Brazilian, I am a Chinese or whatever. They don't know you, they just see feature of the STM created on planet Earth.

As I explained to one of the Knowledge Seekers, when you travel in the depth of the universe, the soul of those who come from Earth is very distinct. (1:56). They know this soul comes from Earth. It's like you are a Chinese going into Paris and trying to speak French, or English. You're still Chinese, because we've seen that feature. Soul of the Man in the space has a feature, which is a feature of the strength of the souls from this planet.

The good thing with Keshe Foundation is that, we are not theoretical. We're delivering knowledge, science, technology, politics, all comes together.

Any other question?

Be proud you're born in this time and place, that you can see this transition.

My great grandmother used to say, I've seen how your great grandfather used to go with camels from Afghanistan to Palestine and come back once a year. I've seen how we went to the cars, and the bus, and the planes, and whatever it is. I've seen big changes.

With your little eyes, and your soul from now on you see bigger changes in a very short time, then our parents, our forefather seen in centuries. Because you're doing it for yourself, it's not somebody else to do it, that you don't need to learn how to become a pilot to, or to have a car to drive, or go to an airport to take a flight. All that now you're responsible, you're captain of your soul. (1:58) You decide, I put my soul into abuse or not.

Any other question?

Q: When you speak of transmutation is this the same as teleportation?

K- No. In the soul dimension we don't have telephones to teleport, and we have no television. Transmutation is when you transfer energies in the dimension of ?? life, in the dimension of existence, in the Gans dimension, in the strength, and your soul strength.

<problems with audio> (2:00).
Q: .. With the Gas Enhancement Unit and its uses in farming. I'm trying to get my head around it. It's just a gas released in the air, or can we put it through the fertigation? Or foliage spray?
K- Explain exactly what you want.
Q: The Gas. I'm trying to understand if that can be used, like, is it just released in the air? That's how they do it in the glass houses?
K- Yes.
Q: Okay, so they don't use it as a foliage, (2:02). like adding it to the water?
K- No, no, no, we got away with that. That was one of the biggest problem we had with the farming. Watering with it. Now you keep it at the level that it can be done. You don't need to switch it off. (Leave it on) continuously the wind will. The gas will expand itself.
Q: So the unit, do I place it, let's say on my farm? I place it in the middle of the property?
K- Yes, you can do. It depends which way is the direction of the wind. The things will grow better, .. down the wind, as they call it.

But no, in principle, no. In principle, you can use it right across the farming. It replaces it. You know, we're doing farming tests here in Austria. We've done a number of farming tests for the big agricultural site. It's very difficult to keep. Now with this technology it's becomes much easier. You can change direction and, what I mean, the strength for different harvests as you change every year.

Q: I'm just trying to understand, also with the donation, a while ago it went for 2,000 Euros. What was that for Mr. Keshe? Was that for the Gas unit? No?
K- We stopped that one. Now it's No, it was for, we were trying to spread the system, the Gas systems right across. Now it has become a product, which people are buying, it's easier. (2:04).

With the application of the Gas unit. Let me explain to you. With the application of the Gas Unit is huge. The implications of it is, it will be devastating for some nations, once it's implemented. You got to realize, governments don't need to import fuel anymore.

African nations who energy has been the biggest problem don't have that problem anymore. We should not see the shortage of electricity anywhere in the world. Because you can produce a gas, you burn it, you run a small turbine, you have the power generation.

Q: I'm just thinking that I sent 2,000. Now with it online, it's more than 2,000. It's 5,000. So, what do I do now? Do I have to send another 3,000?
K- No. What we've committed ourselves to before that date, will stay the same. … You already have one of the systems there, which we sent you, with all the problems. I hope we don't get the same problem with this one.

The units for the plasma energy units, which is sold is already getting completed in the factory in Tehran, the main structures for them has been built. It's ready to be completed. So, in September, October we will start shipping out, those who have booked with it. (2:06).

You will see in the coming cycle all the Pain Pens, and Pain Pads and many of the products will come out of Iran. The Enhancement Units will be part of that system. Energy Gas Units will come out of Iran and Austria. We'll soon announce a new development in that part. We should be in a much easier point to .. distribute and expand the work.

Q; I've talked to some people, that have tomatoes in glass houses today and mentioned about the CO2 Gas units, Enhancement Unit…
K- They don't need to keep on buying gas to burn to create the CO2 for theit tomatoes, which is tradition.
Q: Also the heating system that you're, the power generator standalone unit. Will that 2 kilowatt unit wouldn't be enough for the big glass house growers , they would have to ...
K- No, no, no, no. Let's talk about it different way. When you use a CO2 gas with our system, you should not have a problem with the frost, and that kind of thing.
Q: So, the temperature is consistent? Is that what you're saying?
K- The environment takes what it needs from it. (2:08). It's something we noticed long time ago, and it'll be part of that. It certainly heat, if you want to do it.

We have a 10 kilowatt generator, which is there now. We put a 10 kilowatt and a two kilowatt. Soon we can offer up to one megawatt power generators, because we go on the back of the Gas production turbine system. That's totally different. We'll offer very soon 100 kilowatts, and one megawatt power stations, what I call, gas plasma power stations. I am doing some work on the background to see what the competition takes. But our prices is as usual, 3 to 4 times more than, the national prices or international prices, because with our system you don't buy any gas to burn. You understand? It's already saved.

We had it and we took it off, we'll put it back in very soon. So, we will sell 100 kilowatts and 1 megawatt power stations, to be done.

Q: The CO2 gas unit. It's there a dial, that you switch the dial and it's methane, or you switch it to hydrogen or…
K- No, no, it's a different structure. You cannot change one to another. No, no, no, no.
Q: Okay, I thought it might be as easy as switching a switch, you know?

K- No, no. They are structured, they're produced different.

Any other question? (2:10).

Please book as much as you can. We want 30, 50. Now we're going to as many as we can for the transmutation. We try to send you back (home) in the very near future when you're here, as I said before. You still book a two way ticket, but you may get a refund on the back, in the news. We already done, the knowledge is there, the technology is there. We have built the system. It's just that, the next couple of months it'll be that way, we try.

As I said, if you want to see the mother and the grandfather or whatever died years ago, you went to the Moon, we managed to send your soul. Now we just got what you call it, package it, that we can send the body with the soul at the same time. So ??.

Any other question?

Q: .. Josafa .. Mr. Keshe, thank you for being there and for having such a wonderful team inside the Exhibition Center. Dr. Klaus and Dean who were the first to greet us after the experience, or like caring older brothers with a baby. First question. Mr. Keshe, when I reached an expansion point in the unit, something incomprehensible happened. (2:12). It was like a panoramic view and double positioning. But there was a loss of the space time dimension, and all that became out of body emotions. Were those emotions always there? Was I born with this complexity? Or was it just created and achieved in that moment? It was like a double positioning, and there was an awareness in both.

K- This must be from the two Brazilians who came. We especially opened the system for them last week, last Tuesday. It’s always there. It’s by the expansion of the soul. It’s always there. It's just we were not aware of it. I heard that they enjoyed the trip. I heard that they enjoyed their flight. They had a wonderful experience with the system. If they would have come a couple of months later, we would have send them back to Brazil without the plane.

We experience these things all the time, but we put it on, something happened or accident. Now we know we are in charge of it, we can create it as random, and as we want.

Q: ... When I became aware, that the connection between people was the source of the process, that's when the whole process happened. We noticed the heartbeat. Could you explain about that? Is this a psychosomatic perception? (2:14). Or are the positioning of the chairs compositions, that make each entity present a connection of the system?
K- I don’t understand. Can you repeat that?
Q: When I became aware that the connection between people was the source of the process, that's when the whole process happened, and we noticed the heartbeat. Could you explain about that?

K- Yes, it’s the emotion, it’s a psychosomatic. You feel that emotion. Suddenly it’s there and your physicality reacts to it. Yes. It's psychosomatic. We are not expecting this. We

hear from a lot of people who go through the system, it’s the excitement, it’s what I call, awareness of unknown.

We become aware of something, which we were not expecting, and now it's in front of us. We are part of it.

Q: About if it's normal to pay taxes for privileges. (2:16). So, he's saying, isn't it the same now, even with the plasma technology, we'll have to pay for privileges?

K- It’s not a privilege. No, it's not privileges, you. Having a tarmac road, is it a privilege or a right? Having a light on the street, is it a privilege or a right? Having a fire brigade to be there, is it a privilege or a right? It’s the right for having all of them. But to have them you have to pay for them, to have that privilege.

So, when you come, and you are a skilled worker, and you go to the government, and say, I built the streets, I helped to build the streets. You buy the machinery, you don't pay me anything, because I have everything, then the government won't charge the others, because it is free and everybody does the same.

You expect to be paid for what you do, but you don't expect for other people get paid to create that condition for you to be able to do.

I had a beautiful principal in my business life. People who worked for me, they can tell you, before I started the Keshe Foundation. A percentage job of my annual profit of the companies was given as a bonus equal to all my staff. (2:18). If you're a director, you got 500 pound. If you're a cleaner, you got a 500 pound. If you were a doorman, you got a 500 pound. What they got as a bonus, or whatever increased salary didn’t count. If you work for one of my companies, before I moved into Keshe Foundation. I paid, I calculated, let’s say this year we made so much, divided equally amongst all the workers. From the doorman to the cleaner, who used to come to the company, from the CEO and everybody else, they all got the same 500.

The doorman and everyone, they're very happy, because 500 was .. equal to half of one month's salary. For the CEO and the rest was a big problem. How come we get the same as they do? I said, this shows he worked the same as you. If he's not there to clean your office, you'll be sitting in a heap of it, nobody will come to your office. If you don't work, he doesn't have a job. So, when it comes to this level, you're all equal to me.

It was very hard for the top people to accept. It was their .. always get more, to show they are important. But this equal distribution of the what you call, bonuses was always a pain in my back. But I always said, my staff on the lower level loved it. The ones on the top were always unhappy.

But is it a privilege or is it a right? It's a privilege for you to have the cleaner to be in your office, to clean, the office, that it can show, that you are the boss. Without him, get a

broom, wash the toilet and everything else, and the passage. And the door man, if he's not there, you try to get open the gates for everybody else in. (2:20).

So, we have to understand what is a privilege and what is a right. Having a tarmac on the street with the lights is a privilege. For that privilege, you pay for people to do it for you. It's not your right. Africans live without it.

When I went to Russia, and to Russian satellite countries, and Eastern Bloc, just in early 1990s in business, we were shocked, it was cultural shock. We were used to in England and in Europe, at night we go to the street , the streets are lit. No, no, not in Kazakhstan. Not in Romania. Not in Bulgaria. Not in Moscow. Not in Uzbekistan. Nighttime, some streets might have had lights. You could see people hundreds, thousands of them walking on the pavement at night, still shopping, and everything else.

Having a streetlight is not a right is a privilege you have, because you stole from the others to be able to have it. So, when we give these systems. You have the Gas systems, you still have to pay taxes. Because you're still using that road to go somewhere. You still need the police man, if we have no more criminals, the police won't exist either anyway, but everything else for you to go to the hospital, to go to, to anywhere you go.

The lighting, the streets to be all perfect, to be clean. We haven't built a city cleaning system itself yet. (2:22). When we do that you don't have to pay, then becomes a right. That time is a privilege, somebody has to do it unless you do it.

So, when you speak about the governments, you have no rights, what they charge. Because you use the privileges they give you. They are abusers, definitely. But people who talk about, it's our right. You say you have to pay. Yes you have to pay. We make the gas free for you. We make the electricity free for you, we make your food free for you, that you can use the energies of the universe and the rest of it.

But do you go shopping? Do you go walking on the street? Have you ever walked in Africa with no tarmac, and when it rains. It takes you one hour to do 10 kilometers. Here you do 140 and 50 kilometers in an hour and you think you're right to go (shrrm) down the motorway?

Get your facts the right way. You've been privileged too much in the west by stealing from the others for centuries, now you think it as become your right. This time you want the right to be privilege, you still buy the systems, you still pay for it. And you have to pay the people to do the things for you.

You've stolen so much in the West for centuries, that you see that you're right to do it, and your right to have the privilege of the light, the streets clean, and everything else. (2:24).

Any other question?

Let me explain something. This is not culture of the West. It's the cultural of everywhere. I hope very soon, it's not only we can announce, but the Keshe Foundation. But it will be announced by the government, we started discussion. The Keshe Foundation Gas production units, we will sign agreements very soon with one of the world major governments.

As a privilege for that government to have the rights to energy for its citizens. I hope this will be done in the next few days, in couple of weeks. We announce and the KF will sign an understanding, contract, understanding and agreements with one of the world leading nations for the production of gas.

Now the governments realize what they're going to be with them, we already have agreements coming up with two other nations. The thing is, as I always said to them, not having and buying gas, is it your right or your privilege we give you, to be able to serve your citizens.

You will hear about it. We're not just sitting here waiting for you to buy one unit. Hopefully, in the next few months, you will see the Gas Production Unit massively. This is my aim to do, and one of the world's leading nations. (2:26). We're waiting for them to draft up. As I said to them, ?? they said to me, draft up an agreement. I said, no, you draft it up, because it's your nation, that is going to use it.

Our Knowledge Seekers been in that negotiations with us, they are on the panel today. We have two or three Knowledge Seekers here who have been in two or three negotiations with us. The Gas production unit is not just one unit, which you see, if I buy. We will deliver it to the governments, and as a joint venture with the governments very soon. In next few weeks and months, we start mass production, financed by the world nations, which they use the gas for their use.

As I said, Keshe Foundation selling a pad and a pen, and other ones trying to copy and obscurity, is finished. Government need, .. to support the gas and we announce it. As we sign agreements, remember, as we gave the Keys when we announced it, I'll sign agreements with the governments, .. different governments for the Gas unit and the Energy units. We'll announce it from the next week or two. We have become a player in the world of energy, with governments, and they appreciate and they understand what it is.

We play hard to get. Because otherwise the habit is, the guy is stupid, they don't understand. We understand, but what we get is for the Foundation. I'm sure in next couple of weeks, we'll announce the first agreements with two or three of the world leading nations. Investing in the gas production units for their nations, car use and the rest. (2:28).

It's thanks to you Knowledge Seekers who are setting everything up in the background, doing all the hard work. We are too busy to be in production for bigger scale. So, we

share, that it becomes more beneficial to more people faster. And we saw collaboration with governments and big corporations, ?? before we do.

As I said, once we start announcing major government signing agreements with Keshe Foundation energy, the others will follow it rapidly. We'll try to get this done as fast as possible, in the next week or so. Then we'll see what follows on. Because it'll be announced by the governments not by the Keshe Foundation.

Any other question?

Q: What are you most excited about in this coming phase of the development of the knowledge of the universe?

K- Transportation, transmutation, but at the same time the energy, and the gas, and the food. We have seen the games played, within even in the food section. How people tried to use the Ukraine condition for boosting up, hyping up the energy. We've seen in the past week dropping. We've seen how they were in such a hurry to export food out of Ukraine, and the boat is still hanging in the ocean. Nobody wants it. (2:30). Because the Russians are pushing it in the background. We allow you to ship it, but we don't allow you to sell it. Because most of these nations need us, and if they need us, they don't buy it. They just wanted to show the Ukrainian ??. This comes when the we start getting into.

You've got to understand it very simply. Now when we offer this technology, the gas production to a nation, they become a energy producer. They don't need to bring anymore. That is a massive saving for a nation.

As I said, if you get China opening one coal power generator a week, which they did for years. They opened one power station every week, coal based. Now we've seen all of it. They are trying to close the coals. But it can touch the economy. But they import some of their coal from Australia, which keeps them on the limbo. They import the gases on the others from the other places, it keeps them in limbo. This will change the structure of the economy of a lot of nations. Selling gas and selling oil. Now, everybody has an oil well, or a gas well in the back of their car. (2:32).

This is the pattern of our work. So, we become a gas oil corporation work. As I said to all of them, we want 50% of the income. They say, Mr. Keshe you're greedy, how come? I said, I want it upfront, and I want a share of the profit, and I want user a payment. Which is like Microsoft, as I explained to three of them up to now.

You buy a software from Microsoft, you buy the license you pay it monthly. So, it's the same. You buy a technology of the Keshe Foundation, you put them in the back of the car, you don't pay the fuel costs anymore. But I want so much per year for using my technology. This is my right. Then this finances the One Nation, One Planet, that we can provide services for those who can't pay, we can create more knowledge and technology.

Now in negotiations with parties now talking to us in the governmental level, I'm not a naïve guy, don't forget I've been in the international business, I know exactly what I can ask them, and how I can push.

You want my gas system. You are investing billions in other countries to ensure and guarantee supply. Now you don't need to, it's in your home, it's at your base. You might still produce so much electricity with it. You charge people for the electricity you produce. I want a share of it. It belongs to the Keshe Foundation. You produce my units to put in people's home in the car. No problem. You make $100 profit, 50 is mine. Now they don't care where you buy your television from. (2:34). But the government sends you a bill for using television, you have to pay. I want that too, part of it. Because you're not paying any more gas bills. You don't pay any more fuel bill.

I have set the basic structure of the One Nation, One Planet, One Race. It's coming up. But we tried it with the Pad, we tried it with the Pens. Now this has come. I've worked on this level for 20 years. I know exactly where to push them. You will see it.

The way I put the Key out, started with the African nation of Sierra Leone, the ambassador announced, I accept the Key, because my nation want to have a difference. And I got the American President to beg for it eight months later, after he was reelected. You will see what it will be happened with the Energy unit. You look at it, "Oh, there is a Gas unit. Gas units means trillions for the governments. Leading governments are running problem with it. I sign the first contract, the first memorandum of understanding with one of the leading world nations, that the technology is needed. The rest will run like a rabbit to get it.

You still have to pay for it, because it is not a privilege and the right, it's obligation to bring balance. You watch, in next few days, next few weeks, we'll announce one by one, which nations are signing contract with the Keshe Foundation for the energy supply and the gas supply.

All of it goes to the Foundation. I came with nothing, I'll go back with nothing. But I'll change this planet. With science, technology and understand of it.

Watch the space, (2:36). who we'll announce have signed the agreements for the energy supplies. In next few days we'll hear one by one ??.

Any other question?

R: Maybe watch this spaceship. That will be the new saying, watch this spaceship.

K- But it's the fact, it's the way it is. We played, we learned, we got the knowledge seekers to understand. Now we share in a very big way. This is what is our right to do. We developed the technologies of Keshe Foundation, it's our right to see our wishes becomes reality for our followers.

Don't expect anything from the Keshe Foundation free. The freebies have all gone, but if you need it, you get it free.

R: Also Mr. Keshe, I think it's true that once we have the flight technology and other plasma technologies fully implemented, there'll be economies of scale, that we can't even comprehend right now in terms of. Well for example, you mentioned roads and that is a big part of taxes go to pay for roads. But if we have the flight system we don't need roads anymore then perhaps we'll just pathways for people to walk and there will be a lot less wear and tear on that infrastructure and we'll have less taxes. (2:38).

K- How you going do with the energy you absorb for the food? You've got to burn it. We still got to do it. We still go walk in the street, we still jog, and we do everything else.
R: Yep, we still like to take a ride on the donkey once in a while in spite of having all the other options so I guess we'll ??.

K- Any other question?

Q: .. I'm very much interested in transmutation. To me, that's the ultimate step. Like all the spaceships, it's very obsolete. So how would one focus on training oneself to do it, by yourself to be able to transmutation without additional training wheels? I'm sure there's ways to use training wheels to get there. But how would you aim towards being able to do it just by yourself with your soul? Are we able to, if we were to use that current transmutation unit, would that help us along the way? Or would that transmutation, is it, needs to be different of, in order to provide the training service?

K- This is not the first time done. Many people can do it. Man has a lot of abilities, which he has denied it to himself, by time, but still is in our DNA. You can extend your soul and you can transmute. But sometimes you need a hand. Sometimes you need to be trained. (2:40). Our process is giving a hand and training and those who can do it themselves, they can do it. A lot of people claim they do, they have done, and a lot of people actually do it. I see a few Knowledge Seekers now, that it is become fashionable claiming it. But I see some Knowledge Seekers, who actually do it and they can achieve it in a very different way.

But it's not something that you need a system for it. One of the ways to do it, is the mobile system, which we can reach to teach in a very fast way. So, it's not exclusivity, but … there are plenty of cars outside on the street. You have to learn how to drive before you can get in them. That is all it is.

Q: .. Would you have any specific advice for training to drive that vehicle of transmutation for yourself?

K- I taught it. I remember, with Fabio sitting in front of me in Barletta. He was laughing and I was laughing, and he was going, "they don't understand, they don't understand, shacking his hand in the air, they don't understand." He understood what I was talking

about. So, if you go back to the past teachings it's in there, I already taught it. But you were too greedy for other things, you didn't see it. It's in the teaching.

If you go to all the teachings in Trane and Barletta, (2:42). you'll see it in there. Because I remember Fabio understood it in one of the teachings. Because, don't forget, Fabio translated the books into Italian, so he knew all the writings, and he knew what is where. He was our cameraman and the soundman in Barletta and in Trane. So he was in all the teachings when I was teaching. But because he didn't have to learn, he wasn't there as a student he was there as a listener, but he could think, because he read the books. He found out, and he said, they don't understand. They will never understand, till we give it to them in a cup. You can do it, it is in the teaching.

Q: Would you be kind enough to point to which specific teaching?
K- I don't remember what I had for breakfast, let alone what is in the teachings. Two or three times it has been taught, not just once. It was taught clearly.

One of the teaching was done with Dr. Eliya Kostova, in one of the main teachings. It is in one of the medical teachings with Eliya Kostova. When we spoke about emotion.

Any other question? (2:44).

R: Stefania mentions in the chat, in the Mojhans originally we didn't have any machine, we didn't use any machine, but we were trained.

Q: Can you expand on plasma vacuum?

K- There is nowhere in the universe, where there are no fields. But there are methods to extract certain strength fields from that soup. There is a specific way. It's like, literally, looking at the Plasma of the Universe as an egg. It contains the yolk and the white. You can extract the yellow from it, but you cannot destroy the shell. We can extract the white from it, and leave the yellow and the shell.

In a way, we always have that cocoon of fields. (2:46). To create a plasma vacuum, you have to decide which strength you ?? don't want not to be there. Understand, as I say, "do the vacuum job on it," how to bend the fields from getting to there. It's a very simple knowledge. It's something you can do very easily.

So let's say, from 1 to 10, you don't want the 3, there to be. You cannot take the 3 out, but you can divert the three from certain positions. In the world of plasma you can not destroy, you accommodate.

This is what the job is. You create minimum amount of a given field, to reach in a specific area, which you need. In the vacuum machine of today, we don't reach taking all the atoms out. We decide, we go -2, -3 , -4 . How much we allow to stay in. Which strength to stay in. When we create vacuum in the vacuum machines of today, we decide how many particles is still allowed there, because we cannot reach them. Total vacuum

doesn't exist, and especially in the world of plasma. It's is impossibility, if you understand the knowledge if creation. Absolute impossibility. (2:48).

It's like when you build a dam, you put a diversion to get the water away until you build the dam, and then you put it back in again. It's the same game. You have to create the dam, to divert the fields you need, then at the same time you still have to let it go. You can't block all the water, you still have a seeping water going through as another water in the back of the dam you want to build, it comes in. It's the same process, it's just having the knowledge how to do it.

One of the biggest problem we have in the world of science it .. comes from some of our past scientists lack of knowledge, that you cannot bend the magnetic fields in some cases. They say, you don't see it, only the stars can bend the magnetic fields, or whatever. I can bend the magnetic field of a 2 penny coin. We can target magnetic fields by bringing them to position.

So you have to let the dogma of the past go away, and look at the new science, and then you see it, very easily you can do it. You can divert it and that one is diverted you create the ?? magnet.

I said to one of our Knowledge Seekers very recently in our research, all of you knowledge seekers work on entry and exit of the fields, clockwise and anticlockwise. By God, so many of you are so far wrong. We have one Knowledge Seeker in China who is just trying to ?? to find out. It's there but he cannot see it. Chao Jin in China, (2:50). he works in a beautiful ways with the fields. I'm trying to explain to you, I love the way the guy works. He has started seeing where all of you have made mistakes, even in your MaGrav systems, in setting it up. Chao Jin is the first person who has actually moved into that bracket of understanding. I love the way he works, the way he understands the technology.

All the things you've done it's upside down, but you're happy and I don't interfere, because of all the accidents and mistakes of the universe man is created. So man is not even an accident. So let's see what his mistakes mean. But working through the principle of the science, plasma, Chao Jin is the only one who has started understanding where everything has gone wrong.

Any other question?

Q: .. I remember you speaking in a teaching that you created a specific condition, that allows you to carry many souls. Can we say that these souls are present all the time with you? And when you wish to communicate with them, they manifest instantly in their physicality? (2:52). Or can we say, trust another pilot to take control of the spaceship, physicality? (Separate question, I guess, Could you talk about the relationship of the extra cavity that you possess and its relationship to soul feeding?)

K- I think what we talk about collection of Souls, it's not, you don't imprison. You cannot capture souls. It's a close, you have a contact with, where you are connected to, which they ?? are there.

This collection of souls, I think today's teaching in the gas section, I explained. When we say, we give a captain. The captain has a direction, and a soul and a decision. When I put the soul of many within the gaseous condition of one envelope, I don't need the emotion of the captain to be. The package arrives, and delivers the packages which are there, for it, if you understand what it means. What exactly it means is, with giving a freedom, or trusting the soul of many to a captain to deliver. The emotion of the existence of that captain can interact.

When we come to the gas level, if you understand it, if I can embed all the souls in here, I transmute one. This is the reason we brought the gas production. In a way we look what's inside the gas as a plasma, not what it does for you burning. In the future, it will become much, much clearer, as you understand.

It's like, you know when you go to party shops, (2:54). and you buy big balloon with a lot of balloons inside it. This is the gas units we're trying to. Let you understand, it will be. It's the envelope that we're looking for. You are looking for, how much does it burn.

Because that gas balloon in the dimension of the energy, this can be faster transmutation, then trying to get too many, each one going to a place. It's in a way, plasma technology, what we call in the ?? Gans plasma, as a gas is the key to transmutation of the souls of the future. And then I explain.

Because very simply, is, you have a CO2 let's say gas, you call it, or you've got the hydrogen (H), or the helium, or whatever. In the hydrogen I can transport the STM from Earth. Because if fits it. On the plasma of the Gans of CO2, I can do the Martian. I cannot do the Martian in here (H), because it doesn't fit, it doesn't survive.

The purpose of the showing the creation of different Gans or plasma, this is what I told you in the last week teaching. That when you get the CO2 in the gas bubble now, it's just to put the fire out, or you get a bubble to your soft drink. The CO2 plasma Gas unit carries the emotion. (2:56). If it can carry that, that it gives life, then you understand it's the new envelope that you need. For me to build a brick to put you in it, and a thing. I have to become matter. The bricks of the universe transformation comes through ..

(The God is begging for money, if you can hear it in the background, the church bell is ringing, it's 12 o'clock, the priest needs to be fed. He needs people to go in and pay them, for a lot of lies about the soul, which they don't know.)

Anyway, so, this Gans, the Gas unit is. Primarily, I always got you interested, in what you were interested, but in the very near future, if you saw in the gas production unit. (Rick, can you access the video of when a bubble comes out. If you see the gases come

out of it, as a bubble, in the system.) If I can separate this bubble, and embed in it, or transfer in it, so many souls, where do they go?

I need to transmute that. It's my envelope. I don't need a pilot, I don't need to find someone. But each bubble, it carries, it guarantees the survival of certain structure of souls, we call it, a CO2. What about in the universe where there is no C, and it's not made, they are made of Sodium (Na) , or something. So, I need to be able to create an envelope from them (the element of whatever is there Na or CO2) , that they can travel it in. Now, you understand the real purpose of the new gas production.

We are in the Space Technology, transmutation. So, everything we do has to end up in that purpose of application. (2:58). I always hide it inside something else. Now you understand why you got the Gas units. It's not for you to burn, or put your fires out. It's to see how the next envelope is strong enough to carry the, what I call, the Soul of the Man in a very specific way.

I can expand that bubble to cover a planet. So, I take the whole Soul of whatever is created on it (the planet).

We used this technology some time, far back time. Where a planet was in danger. We could see one planet to explore, and we could see one planet to collide with life, habited life in it. This technology, this understanding was developed, that we take all the souls, but the physicality within it, and it worked. I know exactly how it works. And I know where this race lives now. So, it's not unknown, it's a well now knowledge. It's been tested.

R: I got the least one of the videos showing the gas production.

K- It's in the lab, we saw it in Tehran. We saw it in the lab in Linz last week, or the week before with Klaus. Where the bubbles come up. I'm interested in those bubbles. (3:00).

You see those little bubbles. In the future I show you how to capture it as a plasma. Then how it becomes the next transmutation system of the future. The life of man to travel collectively, depends on that bubble in the depth of the Universe.

I want to show you something, we shared it with the governments, now we can share it with you, with the permission from Klaus. The methane gas we couldn't show for safety reasons in the background. (Rick, I'll send you a video, which I would like you to share. This is from the Keshe Foundation, what you call videos.) You can see how successful we are and why the governments listen to when we put things through. .. Here in this video you see only one or two bubbles, because of the safety reasons. We play it for you. When you see this one it's the same system. It produces gas on both high and low level.

Then you understand how powerful this technology is. .. (3:02). This is again the same methane detector you saw working. (Plays video of Methane gas bubbles) You see the bubbles coming out of the system. You see there is no gases (present). The detector picks

up the low (level) first. It has to analyze it, and watch (it's starts beeping fast). Each arrow on either side (of the detector) is for high and low pressure. We produce gas methane in a huge amount.

But in the future, these bubbles are the means of transportation of different races of the universe. Because they are (what we call), Gas in Nano State (means Gans). They are plasmas in Nano state coverage. (3:04). They are the secret of man's transportation in the universe. Once the man understands the potential of it.

The way he (the bubbles) comes from the bottom to the top, it goes from one Universe to another Universe. But you're only interested to see how it burns, and that's the nature of the man.

One bubble, is one spaceship, and I can put in there millions of Souls.

Everything we do, as I said a few weeks ago, is now the knowledge of universe, we are teaching. Not for you to have a gas free business. But we are here, we got to keep ourselves entertained. But you have to understand the principle behind it, how it works. You're happy with the spaceship. This is the way you transmute.

Any other question?

Q: .. For those who go through the transmutation process, (3:06). do you expect, that all of these volunteers will be able to learn or remember this transmutation ability across the board? Or does it have to do with the level of consciousness of the being? Or is it still only if we…
K- No, it's a privilege even to a dog or a cat. Let alone the man. That's why we ask you to bring your dogs, and cats or whatever. We touch the soul, not the animal.

R: So whether a person or being, any being. Whether they learned or remember something about that process, is that relevant in a way?
K- They don't learn, it's part of .. let's put it that way, it's part of your DNA in ?? the memory, if you can put it that way.
R: So it'll be ingrained regardless of what the…
K- It's not ingrain, it's connected. It's connected to the knowledge of the universe.
R: Regardless of our conscious memory of it…
K- Yes, conscious memory belongs to the physical dimension of the man.

In the dimension of soul you don't have consciousness. It's everlasting existence.

R: What about the memory of the emotion?
K- It's part of the connection. In the physical life, we live all the time. But once we see a picture, which we have a connection, we hear a song, (3:08). we smell a flower, it brings a specific emotion. We don't walk all the time with that emotion. You understand? So, it's the same. It's a memory bank, stock positioning of the field strength.

Souls have emotions worse than the man. Of course they do, man is created out of their structure.

Any other question?

Q: .. Is CH3 and Zinc mixed Gans, all right to help wean people off drugs? It's running rampant here in New Zealand.
K- It's rampant in everywhere around the world.

The combination to get people off the drug, is a very specific, and is very specific for specific drugs. It's already been developed by the Keshe Foundation. It's in our arsenal, of materials. But we are not in the game to battle (with drug) cartels. In time, man will move away from this. Speaking of battles, I already have one, for 10 years with the smallest one in the world Belgium). (3:10).

From what is going to come from the ?? Gas production with the government, we started seeing the demise of the nations, and people who, what you call, blocked and created mayhem for the Keshe Foundation. Because their hand opens up by themselves, we don't need to do anything. It's the same, we don't need these kind of things. We just carry on teaching and developing and it come by itself.

Any other questions?

Q: .. Regarding the CO2 gas in the farm situation. Can he attach one tube splitting the gas from the unit, into 4 ways, then the CO2 gas can be distributed more evenly around the farm. Would that work?
K- Yes, you can pipe it out. Randomly, sooner or later it will hit somewhere in the pipe, at the end, or in the beginning.

We saw that in China. In China, where we did the test. .. If I remember correctly. (3:12). We had this thing here that were growing corn. Then if I remember correctly, we had the strips, one, two strips here, and then we had two or three strips somewhere else nearby, where they placed our ?? Gans tank somewhere in the middle.

These people had to go through this maize, it was actually maize corn, because they were growing there. Watering the section, which was for us, they were testing. What was interesting, okay, we got the increase in the rice and everything else. But was interesting. The corn along here were growing different than the rest of the fields, because the Gans tank was here. So the tank itself and then going in and out, distributed fields, which the corn here. Because I went there, I checked, I wanted to see and I knew exactly what I thought it would do. So, you have the radius of the field interaction.

So, in your farm, if you have a farm like this, and you place a gas unit in the middle, and pipe it. It's constantly at the bottom level. As it rises up, it goes down.

In the, I think was yesterday or was in American teaching, where we had the Romanians talking about the dome they're building. I explained to them, you build the dome, but now you have on the base of it, to make a cover that the dome fields go everywhere, not just there. If you're making a dome for agriculture, it's not just making a dome. (3:14).

Excuse me, this is the land, the roots are here, the soul of the plants is here. You got to reach the soul. So, you dig in, you place some of your dome material below the level of the vegetation, that the fields actually reach the soul to enlighten. Here (without giving fields to the roots) you create 20% increase. Here (dig down to reach roots) we increase 200%, because you satisfy the soul, to see the beauty.

So, a lot of little things which Knowledge Seekers don't understand, don't want to understand.

When you water farm with the Gans's, the water will go, the energy will stay very, very thin on this level (the surface) . When you use gases, you still have to place below level, plus what you would radiate across the land. Without you, your gas might be that much, and it goes up and enriches there. So your plant will grow totally different with a new gas technology, then when you had it (mixed) with the water.

But you have to tell us how you want. Because these containers (the Gas Systems) are sealed, if you open them, you damage the Unit. It's a different thing. You have to tell us what you want to grow, the way you want to grow, and then we tell you how to do a mixture, how to add it for what purpose.

A small change brings a lot of difference in agriculture. (3:16). Before we keep on watering it, and you get fed up, the plant ?? grows so much. This machine (Gas Unit) is there 24 hours, it (the plants) take off. But don't expect to get the same harvest from the ?? corner ??. You have to tell us what you're building, what you're doing, and we'll build a system for it.

This Gans unit, ?? with the gases, will give you .. a complete coverage. Cover it under the ?? soil, but you have to make these deep downs (below the soil), that you cover the root, and the soul of the plants. Then you have, which grows on the surface. Then you have the top, and this gradient creates a vortex of ?? corn.

The beauty of it is, we saw this in China, when the wind comes and the vegetation goes flat (blows the plants down), because of the gravitational magnetic field of the wind ?? you produce, they'll (the plants will straighten up) go back up again.

This, the following of the flow of the magnetic field, which ?? raises them. Because within them there's a flow of ?? (N fields). That allows them to stand up, to come back up. I said to a farmer, in the future, if you're planting trees, and you have a wind, and the winds blow and your trees (blows the trees over). The ones which are Gans, will they'll come back (up). (3:18).

You'll see a lot of changes even in the harvest. I watched this, these are the things I observe. Even when you have tomatoes you might get this tomatoes (growing), and you're happy they are straight. But it produces 10 small tomatoes, but this tomato (with) inclination, gives let's say 20 tomatoes, if it's in that angle. Now the Gans will decide this, now you're trying to keep it straight

The world of agriculture changes, but on the other hand, the way we are going, in a few years time, who will need the agriculture. When you can feed with the energy of the universe, what you need. When I said we don't take no energy, no food, no water with us into the space, now you understand how.

When you're in a bubble of the gas you take energy from it, what you need, and everybody is fed in balance. Because of this gas condition, it takes from the universe, and it gives what it doesn't need. It's a perfect transportation.

As I said once, maybe I can say it in a different way. There is a gas bubble which carries the strength of the Creator. Now who would like to get in. Who will have the privilege to get into it, that he can hold on. If he doesn't match, he doesn't exist.

I came in one, and I'll go back in the same. (3:20).

You can destine, position of your gases. That has the opportunity of the life, which carries, and the position and dimension where he wants to go. If you travel with Keshe Foundation systems, which you are doing in the Enhancement Unit, there no way we can lose you in the universe. We got you by the toes, by the strength of the string. We always bring you back.

Any other question?

Something very interesting. Some of you who've been in the Enhancement Unit, especially in the past two weeks, because it's getting to (be) a perfect system. When we come in and we ask you, can you finish, you say, no, we want to stay. We haven't finished yet. When they come out, they say everything is blurry. We know you're there. We hear the voice, but we don't see. Like you're telling us to go somewhere, or do something, but it's not a physical visual seeing a thing. Then I say, yes. Then you go in and say, (3:22). "can you can you finish your session?" (They say, "no, no, no, no, I'm still there." So I go out, wait another five or 10 minutes. I go back in again. (They say again), "no, no, no, I haven't finished yet." So, in your dimension of the soul, you still have control of the physicality, to hear, to convert the information. It's very interesting, how this things, is coming up in this space development and how we can transmute you.

Any other question?

Q: Stefania .. Does the CO2 has envelope? Can we call it a spaceship?
K- What?
Q: Does the CO2 has envelope? Can we call it a spaceship?

R: I don't know how to interpret that. I guess she means the CO2 has a range to the fields, or has a certain bubble around it, sort of a bubble. (3:24). Can we call it a spaceship? Oh, it's wrong spelling, CO2 Gas envelope, Can we call it a spaceship?

K- Since when? I don't know what it means by spaceship. Can you get in it? Yes.

Any other question?

Q: .. So, that would be the bubble, that you refer to when you say, that you can put a drop in the aquarium and it creates a fish or a man?
K- Yes, now you understand. You carry the soul of the fish in it. When you leave it in the water, it becomes the fish.

K- … We carry on a little bit. We are waiting for the news, by 1:30, we should receive that news. (3:26). If you we don't receive, we have to do other things with it.

The process of the expansion of the knowledge from now on, comes in understanding the process of the work of the universe, and how universal systems work, and how we take dimension and direction.

In this process, in this understanding, in this change of condition. In the universal space system you have to watch, you have to be as part of it, to be protector of your own fields, and at the same time protect the others. It's not just, because I want to go, and I go because I want to. It's, am I allowed to? What would be the consequence of, if I'm not allowed to? Would the end of one, become the beginning of the other.

So, these processes when we start teaching you about the expansion of the systems, and the universal systems, is primarily to understand the totality of the structure, and how we need to understand the totality. Would a system be able to carry on working? (3:28). Would the system be able to interact with its environment, without taking from it, without forcing itself on it? This is what will come in the future for many people to understand this process, to be able to go through the .. transmutation.

This is how in the future space technology, we understand what fields are endangering us, or are we endangering them? It's not like you drive down the roadway, and I'm just happy where I'm going, it doesn't matter what happens with the others. Whether the speed I do, whether I take the left or right turn to pass as fast as I can. It's the way that you interact, and how you interact, and the way you interact, and how you allow the interaction to take shape. This is important for many, many new conditions of the space technology that we have to learn. (3:30).

The understanding of the process of transmutation is different, than understanding of the process of transferring. We have to understand the totality of this process. Are we doing both, or are we reading the right signs? How do we read these signs? How do we execute these mixtures of information? How do we end up with one system in respect to the other? How do we bring a mixture together, when we are carrying the soul of the matter

state, the soul of the plant, and the Soul of the Man, and mixture of man with mixture of different souls of matter state and other things?

In the upcoming systems we have to understand to be able to do. To be able to transmute and transfer at the same time. To be able to dig deeper in understanding of the totality. (3:32). In how everything is done, how everything is carried out. How conditions are created for each one.

A combined transmutation and transfer will become part of the future development technology. Or would it be like now, you get on the plane, we send you your luggage after you with the next flight. You go and we send you the flowers for your lover to New York on the next (flight), because we can't carry mixed, … souls in our transportation. This is part of.

If you take this to the next step, what happens where we have a mixture of the Soul of the Man, and other creatures of the Universe? What happens when we carry a man from Earth, and a being from Planet Zeus, and somebody else from somewhere else? How to fit them in? How do we create a bubble that all can fit in, the way they do in the universe.

These are the teachings to come. This is what we as Knowledge Seekers will bring for, to understand most of it and all of it in a coming time. (3:34).

Q: Azar When you said you came with the bubble, and that you're going leave with the bubble. How?
K- I know. It's…
In a way, we come as a soul, and we'll leave as a soul. But the STM is created on this planet. Our soul was created in dimension of universe, that's the only difference.

Here when you create a child, then you create a soul. We come from the dimension where the soul is created without the physicality. Then we take shape in a position and time. We come in that bubble as a soul. (3:36).

This is what is happening now with the children of Mitra. They are born through that process, but they take the dimension of the physicality. When you put the children of Mitra in the transmutation system of the future, you will see it. Their physicality doesn't exist. They take shape of the Creator in the dimension of the fields of the universe.

Q: Mr. Keshe, when you want to leave, are you going to take your physicality with you, or you going leave it here?
K- It's irrelevant.

Q: I mean you said you said we shouldn't leave your physicality .. ?? as a garbage ?? .
K- Put it this way, when we go we take everything. We don't we don't leave anything behind. Has anybody seen anything of Mitra, or Moses, or Jesus? It's the same soul.

When you're a dentist, in your surgery you wear whites and you are a dentist. You take it out, you get in a car or a taxi you are a passenger. You go home, you put another clothes, you become a mother. You go to bed you put another clothes on, you become a wife. Has it changed the structure? In a way, the change of physicality for us doesn't change the soul, which carries it. (3:38).

When you're in the surgery you tell, your people I'm going home to cook tonight for my husband. Does the husband know what you're cooking? But you already decided it in the surgery, that he's going to have what. Because you already planned it. Because you knew that was what he's going get. So, it's the same. We come a thousand years before, but we know what we were going to cook in thousand years, and we say, this is what's going to happen. It's that the way, the promise of Methi has come.

Q: But Mr. Keshe, with your teaching, what I learned. When you talk about when you go to, you are a dentist, and you're a mother, and you are a wife, this and that. In you're teaching, I'm none of that, because .. at that moment I just played a role. I don't own it. Because before .. you think you're all of it. But then you're not that, because when you look at the soul, it's multi-dimensional, it's universal. So, that's just something that we carry, while I'm working with physicality. But in reality it just doesn't have a meaning for me. It's just a moment I'm a dentist, and then the next thing you know I'm a mother, and then the wife, and working in so and so. But you don't you have any attachment to that. You know, when you become a doctor, in some ways, people hold their head in a certain way, and say, "I'm a doctor," and they are proud, I mean. ..

K- Put it this way. I just change your words, and add other words in it. Momentarily I am Moses, momentarily I'll be Jesus, does it make any difference? (3:40). It's the soul of the Creator. So, it doesn't matter what put, you put on it. Then momentarily you promised, the guy will come, and that will be the time of the "milk and honey." Because we know when that time of milk and honey is. It's when the milk is water, and the honey is the texture. One is the STP and one is the STM, which gives you the pleasure and the taste. So, it is irrelevant.

The beauty of it is, when you're faced with the time of milk and honey, it's so good that you still prefer to be the slave to physicality. That's all we are doing. The time of milk and honey has come, but it's so sweet, that none of you can believe it. It's your time, and your time of existence. This is what many of the Knowledge Seekers will come to understand. In understanding the knowledge, is understanding knowledge of the Creation, is that promised day, no more no less. But you're still waiting for, God knows, this will come on a white horse (Kalki), and the rest of it. (3:42).

There is a very big understanding, and now it's a noose around the neck of a couple of governments, and clergy, and the religious people are faced with it, in respect to the Keshe Foundation. We know exactly where these governments sit. Three states in the world, actually four are totally, what I call, mixed up, on what to do with the Keshe Foundation. How to let the knowledge go (come out), or stick to the dogmas that they created for themselves.

Because, if they accept the Keshe technology, as a technology it's to their benefit. But if they accept the Keshe technology, and the technology of both, what I call, ethics, and what they call, theology and science, it's their demise. It's the end of it. Isn't this the problem we have now in Iran with the Keshe Foundation. The president of Ayatollah Khomenei sitting in their offices for weeks and months, understood.

If we accept, we have to stop. Then what would it bring back for them? But wouldn't it be to the benefit of the nation, (3:44). or humanity, to understand what's happening and allow the next step of the knowledge to come in? Or do we want to carry on with what we've done, with the stealing and everything else, because when it's done, it's there.

There's a very big problem in this process for a few states at the moment in respect to the Keshe Foundation. When it opens up, they can't stop, they cannot stop it. That when, has come. The time has arrived. Now, the biggest problem they have is, how long can we contain it, to keep what we have, because once the "cat gets out of the bag" we have nothing.

As somebody close to the Iranian structure told me, the biggest fear of the Iranian clergy is not anymore Israel, it's Keshe Foundation. But on the other hand, it's what they've been waiting for, they don't know how to handle it. They think they can handle Israel with a nuclear bomb, how are you going handle the soul, which is not there in physicality. That's the biggest problem.

As I said, once one of these religions collapses the rest will follow. (3:46). So, in the background they are all working together trying not to get out, keep the cat in the bag as much as you can.

If you look at the teaching of past 3 or 4 weeks. You're all got so baffled and bamboozled as we say, with the Gases, Gans's, free energy, the lights comes on, goes out. Today you found out, the actual structure is a new type of transportation.

How many of these can you produce in your house, and you put all the souls of your family in it, and escape the states you cannot live with. But, what happens when you appear in another state? All the ?? tools, in your pocket you carry, worth nothing. When everybody can create gold, your gold has no value anymore, if you take from one to another.

Or you just do what the Jewish people did during the Second World War, or do we need a revolution. Eat your gold, and diamond and jewelry, or stick it to a blanket of children and get them through borders as toys. Did the wealth mean anything? Then you find out that you can't carry, and you still bury it. My great, great grandmother used to tell me, (3:48). how they came out of Russia. When the Russian Revolution came in, they were Jews from Iran. So, they were given a choice, to go to Poland, or go back to Iran?

My great grandfather said, we are Iranian origin. He said, we are Iranian Jews. They chose to come back through the port from Georgia, through .. the Caspian Sea, to another port where the Iranian government accepted the Jews back to Iran. Being a wealthy family, they buried some of the wealth (in Russia, to come) back (after) a time when the revolution finishes, they go back (and get it). My cousins went back in 1990s to find where it was buried, or whatever. But the other members of the family decided that they had wealth in stones, diamonds and jewelry, they swallow it, because in the clothing they were checking everything.

The Russians became aware of this trick, so they kept the Jews crossing through Caspian Sea to Iran, for days in the camps with one toilet. So, what they did, whatever you ate after a few days comes out, and they collected all the jewels. It didn't work anymore, because they already ate it the day before. So they lost. So we can't even carry the wealth with us.

This is the same process, the same understanding. This jewel of the knowledge, cannot be taken from no one. It's a jewel on its own and its stands on its own, it has value to ?? whoever holds it. It is not a wealth that you can carry with you. (3:50). It's a wealth that you have attained, you have to attain it, you have to possess it, understand it, and it's attaches to your soul. And that's all the big difference.

Once you understand it, would you accept a religion? It's the jewel of the knowledge of the Creation, not the jewel of the man, that they can hold on to, and ?? loose. More and more Knowledge Seekers become aware, understand, and the more technologies we put out ?? process with them. As I said, you touch, you burn.

Understanding the knowledge of Creation is dependent on one's openness to understand the science itself, science of Creation. Then theology doesn't exist in it and physicality doesn't exist in it. Because once you understand, you understand the totality, and do anything you like. This is this is what I always said, it's the time of Mitra. Where you can live in both dimensions, now you don't have the restriction of one or the other. One doesn't become a ghost of the other one, as we say. (3:52). How much of a ghost, and how many ghosts do you want to carry?

Is the process of change from the soul level to physicality any different, then the processes you know? One of the points that a lot of you will have to face, you'll come to understand very soon, which is sitting in the teaching. Is the process of what we call, transmutation. The process or what we call, conversion.

Transmutation Process

In the process of the physicality, we take the STM in the center of the body of the man. We say, that the soul is in a higher order, as it goes out reduces in strength, in interaction with the environment, creates condition of physicality of the man.

Now, the process is reversed. Now you have the soul and physicality with it connected, sits in the center (of the Soul). (3:54). Where you're actually still have remnants of the soul connected to (from center of head to new boundary). It's an inside out situation. How, if the Soul of the Man, is strong enough to in reduction and interaction with the fields of the environment, can ?? leave the physicality. How does now, what we call, soul reduces enough to have interaction with the STM, inside the man.

Here we lose strength that way, here we lose strength this way. In this direction we contain the man. In this direction, because of his structure, the man contains the soul. When the man learns this process of reduction, man will conquer transmutation in the Universe.

It goes back to original teachings, which we always said. The stronger gives to the smaller, to become (equal with itself). If you understand this process. If I can, in a way draw it for you in another way. (3:36). How can the stronger feed the weaker, and the weaker, become equal to the stronger. The reverse condition of this and how to do it is the key to transmutation and transportation.

Here your transport the man, here (extend STM over P) you transmute the man, but the field energy in connection is the same.

As I said a few minutes ago, this process I have taught, in the teaching in Barletta and Trane. Somebody says, 34th Health teaching. So, somebody has been quick trying to find out. She says, it's in the 34th Health teaching. This teaching is open to medical people only. But, the teaching is in the public teachings as well. It wasn't a shared privilege, but in the other one (?? private teaching it) was explained fully in detail.

So, you have, when you ask, what do we have to do? Okay, how we can transmute, how we can transfer from one to another? How we understand this? If you go back to the ?? private teachings, some time ago. I have always told you about, if you hold your hand, and try to create a light within the hand. That light is the STP at the strength ??. Then you understand how things are, and how the situations are. How he can go between one to the other.

But, in that process is not just the light, it’s the emotion of the existence, the emotion of the, what we call, the totality of everything. How do we understand this? How do we come to the point, to be able to transmute between one and the other. (4:00). We create that light within the hand of the man, within the dimension of physicality. It’s like the flight unit, where the STM is there.

Do you open your hand suddenly to another soul of the physicality, to reach the Soul of the Man, or do you embedded to encage it? What is the next step? What is the totality of understanding? What is to be done? How do we expand and extend the knowledge? It's the process, which we need to understand. It’s the process, which we have to understand, in which way we can play with it.

Can we transmute between one and the other, now we understand it. (4:02). If we allow the STP to be embedded within the Soul of the Man, would it then take a new shape in the new D and position? All of this comes from understanding of the teachings, and it's all within the teachings. There's nothing extra, there is nothing hidden.

It's just now we explain more, in more detail. What exactly has been, and is, and is going to be done. What we taught in the past, you couldn't do it in your hand. Now we do within the machine, till you learn to do it ??.in your hand. In a way, by extension of the soul, to show that you didn't die, because your soul expanded, because you still got a part of it within your physical dimension. But you could go and do everything and come back.

Or do you want to taste it, you want to smell it, you want to touch it in dimension of physicality? We sit in Tehran, and he wants to see how Niagara Falls is. Do you need to get a plane to go there, or you send your soul where it is, to feel it, to taste it, and enjoy it while you're in Tehran? Or do you actually want to be there to feel, to be on the boat, to go up the river and see how far you can push the boat to the to the wall of the falls. (4:04). And get the sensation of it.

Or you just want to see them in pictures. Now you have that choice. To stay home and go with the soul, or go with the soul and come and take the physicality with it. This is the option you have. We have shown it in the system. It's not a dream anymore.

Over 100 of you have tasted it and tested it. The minute you come out of the machine, where the soul takes its position within the center of the brain of the Man, you are back in ?? human, and many of you say you feel the weight, somebody comes back, you feel your back physically. How many of you have tasted it now? So it's correct. Because it's tested by many of you randomly, from different parts of the world. All of you who come out of the experience, you always say, especially when we had the chairs, people say now we feel the weight, that bubble is gone. That bubble is your soul.

Now we'll put this bubble in other bubbles, but many bubbles to travel the same position. You all want to go to New York. Going to New York will be an easy time, because you can do it now with your soul. You want to go to another destination in the universe, (we get you) in that bubble, that you all end up in the same position, because you don't know the destination. You heard about it's such a beautiful thing, in such a planetary system, in such a galaxy, in one of the universes, and you want to go and see it.

The beauty of the new knowledge and what we'll bring, is that man (4:06). will be so busy sightseeing and going around the universe, that he doesn't have time to create wealth, to stick yourself to physicality, and be attached to this planet. Tourism is the best thing universe has ever created for the souls who can elevate themselves to that level. Then you understand and you can see. Then it becomes easy to work with, to understand, to enjoy, and sit and be part of it.

Up to now when we taught, 8 year ago, 10 years ago, 12 years ago, it was just a talk. Now we have a system. It's ?? not a system, because over 100 of you have been through

it. A lot of you are coming to Linz in the next step. If you understand what commotion this will create, when we show we can put you in one chair, and take you out the other chair, and scientifically explain it. And show the elevation of the soul, expansion of the soul. Then, can you deny it? Then (what) would be (the) position for clergy ? (4:08). (Long silence .. is communication to the Soul ..)

If you look at it and the systems are all set, in next few weeks when we can complete this process, how many of you, would you be able to accept anything? Would you then be able to know more. Accept, (4:10). or would they accept their position and the dimension? What would be the answer from those who always?

What would be the outcome for us and public, once we show this?
What is the outcome of our own, with ourselves? What can we do? (4:12).
How would we handle it?
In what sense we will be able to elevate our souls to create that transmutation?
Would our soul be able to, in a way our physicality to accept this?

Would we not become shocked ourselves, if we end up in China and we look like Chinese, or we become a black man in Africa?
What will be the consequence? (4:14).
What can we do for us not to be shocked from it?
Would we be in a position to accept the changes with us, transmutation with ourselves, before we can do?

What will be the next step for humanity?
Would our soul be at the strength, that allows our physicality to go through transmutation if we see the ?? right for it, to allow that to happen? (4:16).

Then the situation comes to all of us to be able to understand, what is the next step.
What is the consequences of this evolution, this knowledge to the man?
What would bring us?

What will cause, where you have no borders, you become all citizens of One Nation, because you decide where do you want to be, how do you want to be, and where do you want to go and how do you want to go. (4:18).

Would the humanity go to the next step?
Would us be able to accept this new condition?
Would the society accept this change?
Would the people who make governments, allow this to happen?
How far can we do this? How far can we go with this?
How much can we handle with this?
Would our society, is our society ready to accept the work of the system sitting in Linz? (4:20). How can we go to the extent, to be able to do this work, this extension of the knowledge and technology?

The Pandora Box of the knowledge with other technologies, sciences we open slowly, slowly as we digest it.
But what happens with this new technology, the way it has come?
Social structure comes into it and there's a lot of things which come in.
Would our .. leaders ?? of government? Would allow the change? Would allow this to happen? Because they'll lose everything they worked for. Or they have to mutate, to a new ways, to explain to their people how this can be done.

This new technology, this simple system, we put in Linz, that many of you have gone through, is the beginning of a massive change for us.

We have shown the expansion of the energy within us, where we can go, what we can do, how it changes us physically. The expansion and extension is massive, when you can go through the expression of the inner energy of you, and many of the diseases, and pains, and sufferings you had, through the expansion of energies processes itself. (4:22).

Extension of the life of man. It's not 60 anymore, it's 100, 200, 1000. How do we structure our social securities? How do we structure our life pattern?

Implication of it is not just a simple flight, implications of it come. This is what I've said, you appear in one place and the other, but what happens to the next step.

Social structure is what will be needed for that One Nation, One Planet, One Race. Can the people in Africa again having access to such a simple system, live the life they live there. How many will come into New York, London and god knows, Western Europe or in other countries, to just have the benefit of a light on the street, a pavement, a tarmac, a doctor.

This new technology will bring us to adjust a balance state, that we do not need to sell, we share equal. The implication of a very simple system you went into in Linz, and you saw the uncle, or you went to the Moon, is much deeper than what you can think.

But we had to show it in a mass numbers, large numbers, 100. A number of people on Rick's teaching the other day. (4:24). So, you have to understand what is the next step for elevation of the STM, for understanding of the new technology, and in a way a new social structure, which we have to accept.

Do we sit and watch?
Do we take and teach our leaders, it's not anymore, what do you call it, the gas supply. It's not there anymore food on the table.

If you remember in the teaching some time ago, I explained that how many people from Gambia, and Ghana and Kenya will live in the jungles, (4:26). somebody take one of these units in the middle of jungles and they say, you can all go to New York, will take the trip? What is the control of the West on it, what it the control of the other nations on it?

How many of you will actually take your flight and go back to live in Africa with nothing, and for a long term?

Would the mankind be ready for this change? Because it's here now. We have shown the condition of the bubble.

One of you asked how can you create a vacuum. The way you blow up a balloon, we can expand these gas units, gas bubbles, to the size to fit every soul on this planet. So, who wants to live in thousands from jungles of Brazil, into the central of London?

You think you are strong enough like the Israelis, which they found a tribe of Jews in Africa and they moved the whole nation, the whole village, or town into Israel. (4:28). The society accepted them because, they are the Jews. They have their problems.

But can our society accept these changes? Can we do what they did with the Mayans, suddenly they emptied the cities to go somewhere? Where? The question comes even Mayans. (The people in Brazil.) We find no sign of civilization, what happened to them suddenly?

Did they reached this point of maturity, or were they invited by those who understood, for them to move out, but in dimension of UFOs, whatever you want to call it? Would the human race take that step, to understand what is to come.

Now you see the dilemma. Now you understand the position (4:30). which the new technology has brought us. When we found the technology with the cars, we made the roads, we paved them, we put traffic lights, we put lines in the middle of the roads, and we creates new conditions, that we all understood, that we start following. Gradually internationally we accepted, this is a red light, that's a green light, this is where we go, that's where we don't go.

When you travel from one country to another the rules are the same, because we agreed internationally. Now how do we accept the rules, the universal? We don't eat you. We don't kill you. Because this is the rule of the universe. Would we be able to contain all the man, not to kill in the space. Or do we make it as part of ingrained physical life for that?

These are all the processes, that human race has to answer to prepare, in a very rapid time, in the next few weeks, and months, and years, as the number of these, what we call, units are spread around the world. Even if we ship one person from US to here, in what we call, Vienna, or in Linz, (4:32). and the authorities sees that transportation has changed within a second, Americans are sitting, and the Austrian Ambassador is sitting with a guy in a system, and he is here the next second. They say, he is here. You can see the evolution, you can see the change.

What would the governments do? Can they stop the development of the technology of the man, which I don't think so? Then it becomes into, what I call, the cycle of life. This is what comes the change.

I explained to you, when we showed the Blueprint in past two or three weeks. You always thought it was just the gases. No, it's the evolution of transmutation, transportation, energy and everything else.

If I can put you in that bubble, in that water, and in that water, I put all the things you need for energy. And put you in the bubble, and (then) take you out of the bubble (somewhere else). Exactly what happened with the orange and the water (Orange and the Cup), and you're fed.

Do you need the expansion, and extra, whatever. Now they charge you for tomatoes, and rice, or whatever. You can't afford (to buy the food). Or you have the energy (from the systems.). (Then it) doesn't matter what price they put on the tomato, I'm not hungry to eat the tomato. Make it a $100 a kilo, and make it zero. I have no need for it. Do I need to get a lamb when I am not hungry, when the energy I needed in my body is compensated for.

The changes are huge. The expansion of it is huge. What about if we add into these energy as a bubbles, the way you do with the (4:34). .. (Gans) gas waters in the swimming pools, and when you swim in the pool you get all the energies you need. You just go for one minute swim, from one length to another, this is good for .. the energy of today.

This is not a theory. Alekz has done it in Nigeria, when we put that pool out. We tested it, and we know what are the capabilities of this technology. In fact, if you literally remember this, what we call, swimming pool condition, which we created in Nigeria with embedding Gans's, or whatever. Now we can exchange it with, what we call, bubbles. Wouldn't this will create a new condition for all of us?

Now it's a reality, but in a much faster way, in a much, much controlled way. What will be the next for our people who use the food, and prices, for control? What happen to the three families, which are controlling the food of nations? All the grains we use are controlled by them.

We all remember this picture. We've all seen this pool in Nigeria. It's not a theory. It's a working system, where we could heal (4:36). the wounds of the hunger of the man, with a food for man.

Then it brings us to a new point, a new dimension, a new understanding, that are we structuring a new society with this new technology?
Have we very silently brought a new lifestyle and everything else?

It is not going to be hidden, in a way, much longer with what comes out with energy crisis. Technology which can fulfill it, will be known by everyone. It's exactly like the Blueprint, (4:38). when we gave the Keys to all the government's in the USB stick. When we enter negotiations and the gas comes to be known. If it works for the gas, it works for transportation, it works for the food, and the rest of it.

Then you understand why we set up the Universal Council, that the soul of those who serve should be there to serve humanity, not by elections. Because you don't carry any soul, when it comes to that (the elections ??). You understand the Soul of the Man and the connection to the bubble and the Soul of the Man of the same man.

The whole process is, in a way, upon us, but by choice. We chose to become Knowledge Seekers, and we chose to understand the technology more. Many of us are taking that step. This is one of the reasons I keep on saying, please try to get to Linz, that we can embed majority souls of people into it.

How far, how deep we'll go? We don't know. (4:40). But sooner or later, the same as when we gave the Key, as I said, now the knowledge of the energy what man needs, will become. Remember, those of you who have been on the foundation a long time ago, when we gave the Key and we put. How many of you went to your governments, this is what is there. How come they can have it, and we can't have it? And we started building the pressures. And we saw the example, as I said before, with the Italians going to the Italian Parliament and the rest of it.

How many Germans are going to sit and watch the Chinese walking with the energy technology, when they have to cut on heating and everything else, this winter? We are in the right place, right time, and the right way, to break the technology through. But on the terms and conditions of the peace.

Once we deliver the gases in a mass order, and there is no need for a huge power station to support. Do we need the nuclear power stations? Do we need to burn the coal, fire stations to create so much mayhem? Do we need to carry on polluting? The race will be that, everybody has to have this because it is for the protection of the planet, and governments saving money. The only people will cry with this new technology, especially with the energy, will be the Saudis. There'll be less children and less woman to abuse in the palaces. (4:42).

The change with this simple gas unit is huge. But if you understand it, and you can implement it, and you can, in a way, bring it to the position, that it's the same for everyone.

Are there any questions?

Q: Salomea .. A question related to Project HARP, for climate change, control. If you know something about this, and how we can have a contra Project of HARP with the T ?

K- No, let me explain to you. I know nothing about HARP and I heard a lot of things about it. There's a lot of other things about HARP. In fact, is nothing to do with our technology. We are not here to fight other things, other people that. We are here to set the course. Nothing to do with us what they've done. The Hiroshima bomb, the atomic bomb, the hydrogen bomb, whatever, whatever, the pollution of the air with the CO2, and the rest of it.

If we are going to do, what other people do. We're going to do with them. It's going to take a lot of our time. We set the course, we set the technology. (4:44). It's for man if he wants to carry with the past, or changes to the new, and we start a new structure. So, this is irrelevant to our work.

Any other question?

The energy used to fight, or to overcome, is not needed. By introducing new technologies you create that new condition.

Any other question?

Q: .. Where can I learn more about that (swimming) pool?
K- The pool is part of the Keshe Foundation Nigeria. It was built by Knowledge Seekers.
R: Okay, so they should be able to contact through KF Nigeria ? … (4:46).
K- But this is obsolete now compared to what is here. This was the first proof of the T by Alekz when he went to Nigeria. It's the dinosaur age technology compared to what is now available. But it had to be done, to bring that proof out.

Q: Jalal. .. You know, what just you said, about the problems and trying to involve with all what humanity is doing, as bombs, and everything. Really, it takes a lot of energy, and this is exactly, we should go away from it. We should concentrate on the knowledge and bring it to the level, which is really needed. This goes with all aspects of our life. Wherever we go, where there are problems with everything. You know, it's really amazing if we just think about it. Leave everything what they are doing, they have to do what they are doing, and concentrate with what you are doing, (4:48). because this will last forever. They and one time, they will come to it. They have no choice, because they will see the beauty of it, they will be touched.

K- We don't have a .. problem with this. It's what I call, understanding it, which will bring us the change, and if they understand, to bring the change.
Q: Do you think they will not see the beauty of it? As you say, if someone travel, go from one place to one place in a second, what they will say?
K- What can they do? The knowledge is here.

Q: So, I think. I know 100% Mr. Keshe that you know, it's already planned since, as you say, since thousands of years. So, let them kick and do what they do.

K- The beauty of the process is, that we create a condition, and they will comply with it. (4:50). We don't force the condition, for them to comply. That's a big difference. When they do it themselves, is different than when we force them to do it. That's how the condition has been. The introduction of the Gans unit and the introduction of the Enhancement Unit. These are all creating the condition, that forces them to accept the condition. That's the whole thing we can do. No more, no less.

R: And for those who persist in being trolls for the technology and being a nuisance, there's the two magic words you told me years ago, that solved a lot of the anguish and anxiety, I had about dealing with trolls. You said, Ignore them. And I said to myself, how can I ignore them, they're there all the time, I'm always dealing with them and so on. But those words were perfect, because by simply ignoring them, it's one of the hardest things to do when you're attached to dealing with such entities, and always trying to rationalize with them, or set them straight, and, you know, change their ways, or whatever. Just ignore them. And that works so well and made my life much simpler. I thank you for that Mr. Keshe.

K- It's part of the life we need to have, (4:52). part of the process we have to accept and to live with. Not much we can do, not much we can do.

It comes from detachment. It comes from what we have agreed to do. To what extent we are prepared to take steps to bring the change? It's primarily the condition we have created. What we see, what we have, what we think.

Any other questions?

Q: .. I would resume (summarize) the whole thing with an old English saying, let them boil in their own soup.
K- Yes. (4:54). There is no much we can do.
Q: No, they have to realize what they're up to.
K- Yeah. We have to see how we can do this and how the situation will change with the present position.

Q: We had the teachings about two years ago, we already have the Gans's to mix it with the paint to paint inside our homes and change the whole environment. This is changing the whole environment of the Earth, and humanity. Thank you very much.

K- The structure sits in how we expand this knowledge. In a way, if you understand, it took 10 years to teach the Gans's, and it took two or three years to teach the soul and understanding of the soul. It took a few months to bring it to the position of the new Enhancement Unit, transportation, and Gans's of the gas. Now, in a way it brings us a ?? snooker position for every individual, and very soon for our governments.

That they go to a position, that the nationals need to be fed, (4:56). or we allow the hunger to take over, we allow the shortage of gases, and fuels, and the rest of it. The

beauty of this is, it’s not one person anymore, knows the basic, and the others. It’s millions of people know the basic and the knowledge.

As I was told before, the spread of this technology has been faster than any religion in the history of man. It is with the science and the technology, which we have, and we need, and we can do and take care of it. There's nothing else we can do with it. We, very patiently over the years, taught, and taught, and taught. Over years, we brought everything step by step in. It's been a torturous time. But it has served the purpose, as we call it. It took a long time. It took longer than we expected, but in a way, we have brought in the knowledge in a measured way to be in that position. (4:58). So, in a calculated way we have gone forward.

Any other question?

Q: .. Could tell us the news you're expecting? Which you probably won't tell us until you get the news.

K- We're trying to hold it back for some weeks, and we're still waiting. They're trying to sort the matters out in the background. The Keshe Foundation has been defrauded with a massive amount, and they are trying to tell us it’s not. We said, we go public with the name of the company, and the people who are involved in it. They’re trying to tell us, that they’re trying to sort it out.

It goes back to, many of you can remember a few weeks ago we asked you to support the Keshe Foundation for the move, for what we are working now. We've been told to hold back, and it'll be done. So, we are giving them a few more hours. As we said, we're going to go public today (5:00). with the frauds, which has taken place, or this is not a fraud, it's just taking time, it’s taking too long.

We will address this, even if it means we put on, what we call, I call it a, Blueprint of Fraud. That how we were defrauded. We still believe in these people, that they will comply with what has been signed in agreement by the Keshe Foundation and them. If that don't take place we’ll come to you, that you will know and collectively we have to take action against the structure and organization, two different governments in different states, and different bank system, which allows this kind of thing to take place.

It is not for us, we still, they've been telling us for some weeks and today is the deadline. We told the management of the Keshe Foundation, is not holding back anymore. It’s just trust that, we will give them a few more hours, and then we'll go out with it.

Because that ?? the changes, and the future of the Keshe Foundation is there. Investment done by the Keshe Foundation in a very large sum, and with the help of many Knowledge Seekers to get to this point.

It has been going on for some weeks and months in different shapes and forms, and today was the deadline, because they told us that there is nothing to hold it back. It will be

done. But we hold back a few more hours. The management of the Keshe Foundation wants to hold back. Maybe they'll complete it as they say, today.

If not, we'll come back to you and we explain, we'll release all the documents. It's the assets of the Foundation. We'll see how will take shape. (5:02). I was told I have to release all the documents and things today, but we're just trying to be a little bit patient, till, they say to comply with what they said they've done, and it's been done. We trust them to be correct in their conduct, but it's a drawing line. We have drawn the line today. The board of management of the Keshe Foundation has been patient enough. You might call it, and we give all the details with the name of the people, of the companies, and everything else involved in it. But at the moment we prefer to stay for a few more hours silent, till we see what happens.

Because this will change the future of the Keshe Foundation internationally.

Q: .. Mr. Keshe, I have a small memory of a teaching where you said, that when we digest food, that food through deuterium is converted to feed the soul of each cell of the body, according to its need. Forgive me if I misunderstood, but could you expand a little on this knowledge?

K- It's the energy. You see, when you're a hydrogen (H) you have a different requirement to exist. If you are a Tritium, you have a different conditions to exist. When you are a Deuterium, you're a balance condition, fundamentally as a matter. But, all the Deuterium's are not the same. Deuterium itself has isotopes, (5:04). of energy package, not in the essence to be one.

This balance of deuterium, and interaction with hydrogen, or tritium in different cells, allows the creation of the radiation, or feeding. Deuterium is intermediary balance condition plasma. But of a different order of strength.

As we spoke a few weeks ago about the isotopes of the plasma, it's a strength difference. But you have a basic strength of, what we call, M and G. Any deviation, when one says, constant, it creates like the isotopes we are used to in the matter state.

It's the whole principle of the working of the glands, thyroid glands and the rest works on it. Thalamus and thymus work on this. They're more saturated by H3 than hydrogen. They deposit that energy into deuterium. That deuterium brings the change in energy level in conversion into, if you're short of potassium or calcium or whatever. Then it converts into plasma energy, that becomes a muscle tissue, whatever you need. (5:06).

Deuterium is, as long as it stays, especially within the lymph structure as a plasma energy, is not used. It's balanced. That's why we have lymph's everywhere. But, once it comes into the position of lower energy, it feeds. Once it comes to a higher energy, it absorbs, but it still keeps the structure of the hydrogen, or what we call singularity of the center, what we call, nucleus, and what I call, the ?? collector which is the electron.

You have to look at the knowledge of the plasma and understand the conversion between the plasma, and the matter, or Gans state. Then you understand more, in how and what, and the way things are done in the process of creation. Most of the creation works in this way. You don't have huge nuclear, what you call it, materials. You always have deviation with absorption of one, or reduction in the other, and a balance point, which deuterium create that balance. It got one electron, one proton. And hydrogen, what we call, proton. As in the deuterium, as neutron plus proton. As one center is nucleus.

Where in the hydrogen you only have a proton and it's all. In the tritium you have a neutron, which is trying to convert itself. The ultimate goal of, literally what you call, (5:08). deuterium, is to create that balance position between the two extremes. One trying to absorb, and one trying to give.

It's the same right across the universe, even when it changes to carbon 14, we see the same behavior. Carbon 14 in the space doesn't travel just to go somewhere. There's an isotope of carbon 14 in one level of energy different, than the other one, that allows it to be transmuted. It's part of the transportation system in the future, deep space transmutation. You can use that kind of understanding. You tune into it, it's literally your track, it's not your truck, it's your track. It's the way, you know to go from A to B, that's the track you need to go, if you're going to such a place. We travel on one of the isotopes of .. the deuterium, and Carbon 14. But in fundamentally, it's a deuterium in combination of the diamond structure field radiation, which is unknown knowledge to man.

Any other question?

Q: .. If we can touch or remember the Creator in us, then we could choose whatever form followed later on, up to the moment of today, in this present physical form here on Earth. Could you shed more light on this? (5:10).
K- Can you repeat it?
Q: If we can touch or remember the Creator in us, then we could choose whatever form followed later on up to the moment of today in this present physical form here on Earth Could you shed more light on this?

K- In a way, when you do that, if you achieve that, you will become at the strength of the Soul of the Creator, which then, through it is connected to all created. So, you have access to all the knowledge. It's very simple.

Through that strength of the Soul, of the strength of the Creator, you actually get access to whole knowledge of whatever is created. Because whatever is created is out of His division, of his origin, and M fields. Fields in the Universe always are connected to their source. It's the simplicity of it.

Any other question?

Q: .. The souls don't hope, it prepares conditions for things to happen. (5:12). That's what I understood you said, Mr. Keshe?

K- In so many ways you are not far off. We create the condition of the knowledge, that, that knowledge creates the condition for peace, and then it forces the man to abide by it.

If there is no other question we wrap things up for today.

K- Thank you very much. Thank you, indeed. Hopefully we learned a little bit more today. We'll gather more information in the coming time. More or less we are prepared for that final step towards world peace, towards the understanding of it.

The beauty of it is, as we asked you, please sign up, as much, as many as you can for the flight test. It's important because, I'll explain to you with more detail in the future. The more people from different nationalities and positions on this planet we can move, the less governments can restrict, it won't be just one. We need to do this in a very rapid way.

If you cannot travel (to Linz, you can) sponsor (someone). We have many people who want to do it, but financially cannot afford it. If you want to sponsor 5, 10 people to travel. We have many people around the world who want to take that step. (5:14).

It allows us to achieve what we are here set for. At the same time, what goes with other processes, the Gas units. More gas units we put across the, what we call, the less we have, we give opportunity to governance and ?? and we bring the change we are looking after.

In a way, it becomes, if you understand it, us as One Nation. What we bring as One Nation to this planet. We always said, we don't agree with the government's. Now we are there to govern the principle of the peace, and the knowledge and technology. How much you are prepared to see that change. How much you are prepared to see, to bring that change.

Up to now you always talked, now it's the time to actually take part in, and bring that change in. The more people we can transmute, the more people we can bring in a position and direction of the new knowledge, the faster we can change the situation, which is now here today, and many people suffer with it. As I said to one of the Knowledge Seekers, it's not the time to talk anymore. It's time to take steps and create the action to move, and if you can't do it, then you can create that for somebody else to do it. It's time to serve. We are doing everything we can, working around the clock to create this position, and the knowledge and technology. It's the time to move.

Thank you very much for today and we'll meet you in Linz, next time.

Proofing completed.

446th Knowledge Seekers Workshop; August 18, 2022

(Quick Index 25 p, topic Index ; Transcription, Proofing done ; Key Phrases, Words)
(Auto Transcription by Elias)

New offer of Combined Gas and Plasma Energy Units; You can loose STP; Knowledge to Man - gift of Mitra; Earth - unique way to love; Creator has a Creator;

Topic Index

The organization to promote KF, invested millions - likely to follow through; Remember Gans is a Gas in Nano State; Body is collection of Gans's; Gas and energy conversion from Gans's - new units; Glands do transmutation of elements - uranium; Lymph passes near glands for conversion; Detailed process how you are transmuted; KF send 20 people to Moon and Mars - invited NASA; Travel to other galaxies by 2024 - 25; True space program travels on energies of Universe; Other life forms on Moon - missing Armstrong audio; Moon is base camp for UC; Open colony on Moon; Shape of man different on Moon; received coordinates of Apollo landing site; Inertia of body is called "Spirit"; Spirit only involved with physicality; Different Inertias create different elements H, O ; Blowfish bone structure is Star Formation ; UFO lights tourists to earth; 2023 fulfillment of promises of past - new cycle will start; End of religions - by increase in knowledge; Families not miss us when travel space - always stay connected; Creation is clusters of plasmas inside other plasmas - detailed discussion - Center point is Creator - I made Man in image of Myself; Organs are like planetary systems; Spirit is STP; STM not allowed to burst balloon of STP - take new shape; Cannot "go back to future" because the souls of the cells, of STP are spread amongst countless beings - cannot bring them all back together - impossible; New offer of Combined Gas and Plasma Energy Units - 10 kilowatts; 70 people loyal to KF; 100 Euros royalty per year for 20 years; Christ only had insight into plasma knowledge - not an understanding of it; Same soul in all prophets - same soul speaks to you today; UC will learn from Man; Collection of Gans's called "man and woman" has biggest effect - change life; Gas Units in farming; KS having problems with families accepting them; Elevation of Soul comes from fields of U; Man gifted knowledge of Creation - jump trillions of years of evolution to close to the center of Plasma Spiral; Races with UFO's only slightly more advanced than man; Love and falling in love - Where you give everything to lover - uniqueness of Earth - what attracted Mitra to bring Creator to Earth; How a weak STP encages strong STM - spreading out of dynamic fields like fisherman's net; Break into Soul through breathing and digestion; Why "falling in love" only last 3 to 5 years - have to renew; When people come back from Moon - we'll see elevation of STM; Plasma solution for autism - cannot speak because of American Lobby; KS who cheated KF - demanding rights; Jewish community didn't cheat each other - thought KS would do same - wrong; When you leave you take physicality with you; You can loose the STP; Memory of different existences remains intact; Other peoples experiences available to you; Saturn's structure perfect teaching example of how plasmas work; World crisis part of bigger plan - accept T out of fear of demise; Soul has to want to receive elevation; Ancestor who saw Christ gave exact description - according to soul of Mr. Keshe; Is descended from both Moses and

Mohammad; DNA carries STP; Using Gas bubble technology to save races whose planets going to be destroyed - moving the souls, not P; Race in space who rescue beings in trouble; Cu -59 Inertia - 49 is plasma fields; Plasma light is instantaneous - matter state light is different - ?? - Using plasma for addictions - not fight with drug cartels - or end of KS; More on addictions; Suicide not allowed - Soul fails to mature for independence; Like murder - keeping a soul from maturing; Divine punishment - using fear to control; Converting fields to stone; Even Creator has a Creator ; Creation cycle ends with us becoming part of it;

ENGLISH TRANSCRIPTION

(:16).

K- Yes, good morning, good day to you as usual. Wherever, whenever you listen to these series of Knowledge Seekers up to Keshe Foundation, Spaceship Institute, in one corner of this universe in a spot of plasma of the earth. We come back to a full circle of teaching again, and again, and every time an Intro decided, brings back what was supposed to be taught. In the next couple of hours of sharing knowledge, we bring back a lot of new understanding, new ways things is done, and to be done.

As usual, at the beginning of the Keshe Foundation teachings, if there are any matters, we bring forward. As I explained to you last week, at the back of last week, we have a problem, (:18). regarding the finances of the Keshe Foundation in respect to a group. And since then, at the back of last week, we're going to expose. The organization is trying to find a way to sort it out, hopefully in the next week or two. We'll come to some conclusion with this matter.

It was important that you know, that we work openly, the way we open our patents, and the way we share knowledge. We bring the problems of the Keshe Foundation directly to the Knowledge Seekers (KS), that we all know, and we share, and we take steps, that these things does not happen.

Yes, it brought harm to many of us, and it has brought a lot of hardship to many of Knowledge Seekers, this, what I call, intrusion in our, what I call, the discretion, acts of us trying to expand the Keshe Foundation, and abuse, or whatever happened.

I thank you, for you. And many of you're asking what it is. You will understand in the coming years what we have done. But it was important for us, after months of work, and investing millions into it from the KF, and support of you Knowledge Seekers, some of it, to bring this to an end, as it was dragging on every week, to next week, and the next week. We brought this as we ?? like, but in fact, it was, we were in the hands of the people who are supposed to know what they are doing. And so we waited, a couple of more days or so. We were told, they will try to fix it. Hopefully, we'll start a new era with the Keshe Foundation from now.

Going back to the teachings, and going back to what we said, up to now, in the what I call, the horizon of the teaching.

First of all, today, we are in a new location, you might hear noises, or whatever, which has nothing to do with our work. It's a background noises we are in a public place. You'll hear a lot of cars, and people passing, or whatever.

One of the parts of the teaching, (:20). what is important, it's been important to many of us in past few weeks, has been the transmutation systems, the flight system (FS) in Linz. And then the introduction of the gases, as the Units. Many of you might think, what does this have to do with the other, energy and a gas, because don't forget are important. When you speak about the Gans, is a Gans, is a Gas in a Nano State.

So, the body of the Man is the conversion of the GANS, because we our body is made of Gans's, it's a collection of Gans's. So, we have to understand the structure of operation, and making of Gans's from the fields. Otherwise, we cannot produce what we call, Gans's. And you have seen it, we showed it as gases and as energy conversion.

This is very fundamental. This is part of what I call, cornerstones of understanding the whole structure. We do not need plutonium. We do not need uranium. We do not need to carry different materials. As was the Intro very simply, you just need one element. This is what is done in your Thalamus and your thymus. Everything arrives as a lymph, and then in these two glands, in combination of work with each other, they decide how this lymph, which is a mono energetic.

When you cut yourself, you see that white liquid, clear transparent liquid, that is from hydrogen. It has the capability to plutonium, uranium, and other materials, which are unknown to man. What happens, it enters the environment, (:22). enters the vicinity of the two glands working together, in a very specific condition, and then it takes orientation. It comes to be a calcium, and it becomes to be a potassium, it becomes to anything else, even uranium in your body.

>>

So, it's the behavior energy, not matter energy state. In this process, we have to understand it, why? Because now in the process of the Enhancement Unit (EU), we make it into one plasma. This is your soul. And then the ingredient of the structure within it, which is your physicality, and the Soul of the Physicality (STP). The soul of physicality is very simple, the STP is that nucleus. The interaction of the totality creates the dimension of the gas, the dimension (D) of the Gans, the dimension of the Soul.

We don't look at the proton, and the electron, or the neutron, we look what effects they create, in the dimension of the Creation, as a field. So, now you understand how we will transmute you.

Going to the transmutation. Many of you came and are still registering to come in to test flight. You come into to test simulation. Some of you have now signed, to become Mobile Transmutation. Some of you are coming in to Keshe Foundation Center to be transmuted from one system to another. This (the test flight) took us six years, six weeks, eight weeks, and we are still in progress. This (Mobile) is still to come by around October, November, (:24). if everything goes correct. And this (transmuting from one system to other) starts in September. We know where we are going. We have developed the technology. Our system is set even today. Today, for the first time we opened the door the door to man, in true space T.

Sometime from the beginning of the January of next year. We offer you 2 flight systems. We land you on the Moon, or we land you on Mars.

I have a invited the head of NASA Mars 2030 operation to join the Keshe Foundation, to bring the whole process into unison. What does this mean? Once we can transmute you and test you in September, many of you have registered, then we bring you in.

The first person to be transmuted has already been chosen. He'll come from another continent, into Europe. Those of you who need to come in, and still carry on for transmutation from system one, to system two, and three to four, will go into September, October. Here (flight tests) we have passed over 100, and we're still getting people registered. Mobile transmutation, we're still getting registered. The same with what we call, transmutation within the enhancement enter.

We'll only accept 20, and 20 people for Moon and Mars mission. What does this mean? It means we take you from the Enhancement Center (EC), (:26). and we land you on the location on Moon. We transfer two people at the same time. To have evidence of what we change, and how we change, that the other one can see us. We allocate up to three days for this process. For landing you there will take us a few seconds. For bringing you back, it takes us a few seconds, but the process is to see how you behave, and how you look. You will not look as a human on the platform of the Moon.

Sometime after, when we qualify enough, to understand this out of the 20 transmutations to Moon, we'll go to Mars. Mars is important for us because Moon has characteristics of the Earth. Mars is unknown energy pack, even though we know it.

Sometime in 2024 - 2025, we'll choose another Solar System in this galaxy, and there on, other galaxies. The process is unstoppable. We cannot stop this process, because the knowledge is gathering, and the position has been created.

So from now, I'll accept the first 20 people who want to land on the Moon, preferred to be a couple, preferred to be people who know each other. We have put a cost of 25,000 Euro for this process. We have put a cost of 50,000 for Mars. Don't forget the future relies on what we establish today.

The Moon and Mars comes as a donation to the foundation, (:28). as we'll use different locations and research positions of the Keshe Foundation to complete this process. I close the Moon and Mars gap, within the next few days. I know many of you would like to do this. But then after applications we receive, donations we receive, we decide which one goes, and which one comes first, second, third, and fourth.

As you remember, when it came to the first man, was Armstrong, and we always remember. We don't remember much who has been in the second, third, and other ?? ?? So 25,000 is what is set, for to take you to Moon. Don't forget the pay quarter million, 1 million, to be a few seconds in the air, to the other space agencies, which use rockets.

This position for us is important. Because we want to see how our bone structure will change. We want to see how the Soul of the Physicality, and the Soul of the Man, and the Soul of the Moon will create a new feature for us. And why we do in two's. and maybe four's, is to witness, to see the other, to see how we will come. This operation of the Moon, transportation and transmutation (T&T) will start early next year.

But we have to understand this. Those of you who come with us to Moon, you will come back as a different person, because you will see the world of Creation through the transmutation. You will become mature to understanding of the soul of the Creator. You'll become to understand you are different.

In a way, traveling the depths of the universe makes you to become a new being. (:30). A new understanding, a new comprehension for Totality of the knowledge of the Creation. Those of you who came to Keshe Foundation, those of you who came to Linz center and felt the change, touched by how your soul was, and how your soul can travel. Now, it's what we came here as Keshe Foundation Spaceship Institute. As of 2023, we become a truly space program on the levels of the energies of the universe.

We will sign a contract with you on the flight pattern, which means we decide, and how we decide is our decision. You might land on the Moon, you might land on the Mars, and you decide life is so peaceful, is so beautiful, that you do not want to come back, the decision is yours.

There has been a controversy about if there are other creatures on the Moon. We heard, we listened, for past years, there is always a talk a two minute session missing from Armstrong's, and communication of the Apollo, to what we call, Cape Canaveral, to the American Space Center. The controversy has been, that Armstrong reported seeing other creatures across the great. The claim that he has encountered other life style, and it cannot, it could not be heard by the world of public.

If he did, or if he did not, we, as the Knowledge Seekers (KS) will see the true form of them. There is no corner of the universe, (:32). which is not habited. There is no corner of the universe were a kind of lifestyle doesn't exist.

You know, when people go to conquer Everest, they go to the camp, and they go to the final camp, before the final onset. Many people of the universe, to see the beauty of the Earth, use the Moon for that purpose. The final planning, the final position. Because the life on this planet is so physical, everything is observed and can be seen. So the Moon has been used by Universal Community who come, as what I call, the final landing, before the launch to earth. To come and see where Mitra was, how Mitra felt.

And soon these lights will increase as we go to the Moon, to come and see the children of Mitra. The new generation, the daughter of Mitra, and life on this planet. So if, and what has been a mystery about Armstrong's two minutes silence, and missing of the voice communication, will be clear to us.

But the most important thing for us will be, for the first time as we travel through the dimension of the Soul of the Man (STM). Would we see the soul of the creatures of the universe, or would see the physicality of the men of the universe? This is not anymore to what we assumed, what we thought, what we guessed. It's the reality, the first 20 people on the Moon will bring us back. They all will feel the same. (:34). They all will feel as they are created from the structure of the interaction of the fields of the STM, the Soul of the Physicality (STP) of the Man, and the Soul of the Moon.

The important thing for us when we bring you back is, how you will interact with the society here. How you will change, how your emotions, how your physicality change. Would you be riddled with cancer when you go, and how would that cancer be when you come back? If you were a scientist in a knowledge of the physiology, would you come back with a knowledge of the physiology of the universe? Because now you've become a Universal Community person, being.

The first 20 People will be for us an enigma. We have to understand, through the Soul of the structure of the Creation of the universe. I will be videoed. To you, you'll be on your own. But to you I'll be video. I'll be there to observe, to see, to understand how you as humans learn, how you bring the knowledge back, how much you become the true humans.

Keshe Foundation has truly entered the Space Technology as of today. We have tested the engines, we have tested the passengers, we have brought you to become the Mojhans, "the brother of love." And with it, we have brought the total understanding of the Creation. (:36).

I will close the Moon and Mars landing sessions within the next few days. It does not matter what wealth you carry, we choose those who have sincerely came as a souls, to serve. You have to understand, this could be a one way ticket. Not to die, but to be born in the dimension of the Soul of the Creation in the universe. You might decide to come back in time, and visit. You might come back with us, and bring us the knowledge and the technology. You might come back and bring us the love of the Creator.

The Moon and the Mars transmission of flights, will be the same time, exactly like when the man went to the Moon. I watched it on the roof, wondering what man will do, and what he sees. Some 55 years later, I'll be there on the Moon, to see what actually man become. What he will behave. Would he still kill. Would he behave correct, with the Universal Community on the Moon?

Those of you who went to the Moon and come back, will not be the same as before. You'll be knowledgeable to knowledge of the universe, (:38). where the matter state becomes irrelevant.

By mid end of next year, we'll open a colony of man on the Moon. Because then it's easy for us. Then we understand more, and then from there to Mars, and then the next, and further on. There is no position on the Keshe Foundation, what I call, sales point, to fly for the Moon and Mars mission. You make a donation to the Keshe Foundation direct, and ask to be on the flight system list.

It will be interesting for us to have a couple. It will be interest for us to have a brother and a sister. It'll be interesting to us to have friends. It'll be interesting to see how they react. It'll be important for us if, what we call, visualization of the information, when you come back is visualized, not recorded on camera. It'll be in a different dimension and direction. And we will see how the technology will bring a new dimension to all of us.

This way, for the first time man becomes a true member of the Universal Community. (:40). The Moon mission starting from beginning of 2023, is what we call, the opening of new knowledge. Opening of new understanding.

What will be interesting to us is, once you reach the Moon, how come you have all knowledge needed to live on the Moon. When you land on the Mars, how come you have all the knowledge, you know what you have to do. You know what to eat, you know where to go, you know how to absorb the energies of this planet. It'll be interesting how the Knowledge Seekers watch, and learn, and understand the new space technology.

In a way, from 2023, we truly join the Universal Community. Because we go to universe, we leave the village of Earth, and where we learn how to educate ourselves with the knowledge of ?? tomorrow The most interesting part will be, how you come back. How you will be graduate into the knowledge of the universe. And then the first people who come back, they'll have access, they'll have the knowledge to become the true teachers, to understand, to be able to elevate the Soul of the others with the knowledge. Not prophets, nobody else. But as a normal being, (:42). how you transfer knowledge, how you teach, and how you bring, not only the human race, but other races of the universe, to understand the process of the Creation, and the way we have taught you.

We will, we will teach, we carry on teaching. And in that process, we'll create a condition of the common knowledge for all of us. In a way, from the humans, to the stone, to the animal, to the trees. To everything, which exists on this planet, to become knowledgeable

about the life and Creation. 2023 the space missions of Keshe Foundation, it'll be the beginning of what we call, the cycle of change.

We will see the establishment of the world peace. We will see the establishment of One Planet, One Nation, One Race. We see in that process, when we can transmute you to any position in the universe, the end of religions. We'll see the end of governments, and we'll see the end of what we call, injustices, on the name of the governments.

Because the process will come so transparent, that none of us will dare to bring a separation. We will see the end of the racism, as we all unite to become the conqueror of the peace in the universe. It becomes like a football match, (:44). in a country. When they see national games, from one ball club to another, we fight, which team, which side? When they come to the national level, and international level. We stand for our nations, we don't care which team we supported. Because it is us.

Then now man comes united to be one soul for the universe. It does not matter what race, what position on this planet we've been born. We'll strive to change the condition, where man will not be known as an animal. But all of us will change by ourselves to become the banner of peace, banner of knowledge, and to be proud to be from blood of Mitra, where the Creator came from. Then the process will become beautiful for all of us.

As I said, always it's hard to find to start a new structure, new religion, new country, new dimension. But when you give, and people come themselves, they will change themselves. I always said, the whole of the humanity has to change to accept peace, we will become peaceful. We'll become that followers of "One Nation" football team, irrespective of our color, and race, and which position in that nation we come from.

This will be engraved in the structure of the life and the STM. Now you understand what we write as One Planet, One Nation, One Race, as ?? true, transmutation & transportation of the Man to U. (:46). Man will change, we become One Nation, One Planet, One Race to the citizens of the universe.

It will be interesting, when we put a black man, a Chinese, a white man, and a yellow man, or other color of the man, short, tall, different color of eyes into these systems. How would they look on Moon and Mars and in the U. Would the black man, become white on the Moon, and the white man become black on the Moon. Or all will appear as a grey silverish light. Then those of you who were racist by the color, and those of you who tried to change your color, and saw abuse, because of the color, all become equal. Would the people of the universe sees us as different color, or we are all silvery colored men of the planet earth. Then it'll be interesting to see when a black man comes back into Linz, and when a white man comes back to Linz.

These are not fairy tales, these are realities which you have, and some of you have already started going through it, through going to Linz, and going through the operation to transmutation and transportation in Linz. Book your ticket from the flight, from

wherever you are on this corner of this planet, (:48). to join us in 2023, to travel to different destinations to Moon and Mars and beyond.

It was interesting, one of the Knowledge Seekers in past few weeks has sent us the coordinates of the landing on the Moon. Saying that somebody who was there, worked with NASA, gave the coordinates. If your guy who works with what we call, Apollo system, and has more information for us, let us share. Contact us and let's take it further.

At a young age of just prior to going to university, I met one of the most beautiful, serene women in the world called, Mary Hardy. She was part of the NASA mission to Apollo. She was one of the key members of the Apollo landing. I came to know her well, and shared a lot of knowledge, with her beauty. She lived in England in Oxford shire. I made a lot of time to see her, to understand how the Americans got it wrong, and how what was. Little, or whatever knowledge she could give me, compared to what I had, showed me with all the minds of what we call, NASA, they still have not understood the Totality.

In this process, mankind has become to understand the totality. It's not anymore NASA mission. It's not any more Russian Space Agency, or the Iranian Space Agency, (:50). it's the human race on the banner of Keshe Foundation Spaceship Institute, as One Nation, One Race, One Planet, we will enter, and we will leave the village of Earth. Not in the physical dimension (D) of the physicality of today. Not with what I call, the "monkey suit," but with the suit of the Creation, with the suit of the knowledge of the U.

Join me with the excursion to the Moon, to start with, and if you decide you want to do the Mars and the Moon, it will be all the same. Develop with us, to deliver man into space, man into the Universal Community, and become the first ambassador of man, where the man goes to universe, from the human race. Not man goes to space as a monkey suit, as a man.

The citizens of universe will envy you, that how you super-passed them. Being such a small village, in a very corner of this universe. You have access to the Knowledge of the Creation, and what they dreamt about for billions of years to achieve.

Join me in Linz, and my soul will travel with your soul, to make sure that you're safe, and you come back safe. In a way, we don't drop you into the ocean. (:52). We'll come to you. We'll come with you, we hold your hands to learn how to live in ocean of the universe, magnetic fields.

The time for man to enter a Universal Community has come, We don't look at it, if it's the first of January. It's Islamic calendar, or Jewish calendar, or whatever calendar. The time comes when the man matures, and the point of maturity has come to be. But as I said, the whole race has to see, the whole race has to do, and the whole race has to feel, to become One Nation.

As I said once, to one of my children, what happened when we teach the other citizens of the universe to play football? Will they all become the supporters of the Earth souls,

playing the game? Then we have no nations and nationalities. Would it be nice to introduce the game of football, the beautiful game, which actually the ball is the essence, the ?? side, the way the universe looks and moves. Would we kick it with physicality, or we would bring the motion of the ball of the universe with our knowledge, how we own it, how we change it. And in the game the ball becomes the universe and the Unicose.

Here we use the physicality to create the motion. There we create the knowledge of creation to sustain and play football, (:54). with Universal Community. Join me in Linz, we might bring you back to Linz a couple of times prior to the final test, to bring, to put everything in position. Do not expect that you come into the system, and the next time you're on the Moon. We have to structure, we have to put you through the system, till you settle directly for that transmission and transmutation. The most interesting part will be, how anxiously we citizens of the Earth, wait for your return.

I wonder if the Americans left a camera, that when the man of Earth goes in front of it, and switches it on, and powers it somehow, will transmit back to what we call, Earth to show how the man looks. What happens when the systems on Mars are retriggered, and the power supply is established, the communication line set, what and how citizens of the Earth, will see the citizen of man on Mars and Moon.

The process of understanding the transmutation is very simple. In the past, even with the teaching, the earlier Intro of today, we confirmed, we have shown the understanding of the plasma, (:56), where the fields of the totality of the electron, proton, and neutron, as a energy pack is noticed.

One thing which many of you will understand, because we haven't been through it yet, is that when we send you to the Moon, from the Earth, you will not feel much difference except when you enter the atmospheric condition, field forces of the two planets. But what will be interesting, which will come to us, because we don't travel in dimension of the physicality, we traveled in the dimension of field forces, when we send you to Mars, how would you feel? I'll tell you exactly how you will feel. You'll enter a plasmatic M field, of the atom of the earth.

Here you cross into the plasma of .. Earth condition, including the Moon, and then when you enter the Earth, you'll have atmospheric condition of the Moon. (audio drop ..) (:58).

.. of the Earth, when you work with plasmas.

The present what we call, Astrophysicist, the present missions to Mars have never, they have seen glimpses, they see changes but they don't understand, that they actually enter the plasma fields of the totality.

This we know in Solar System (SS), with the Sun in the center, and different Mars, and moons, we have the same structure which we call, the SS. When you enter the Solar System, you enter the zone, then you enter the zone of the fields, and then you enter the zone of the planet, or the moon of the planet. This entry and exit is important, and will be

vital to understanding of the transmutation of the elements. If you look at it, when I create the man in what I call, in his own dimension, and I expand your soul, and you become a bubble. It's the same, it does not matter how, and what's inside, (1:00). the Totality, which creates dimension within the plasma.

Now, you understand, why we went this way, why we went through the enhancement technology, why we went through every other aspects. What will bring us to this point? How we will change when we enter this plasma, into this position, or to this position, or even to the center.

In the teaching of the past, for some of you who have not understood, or in some teachings, none of you have understood, is that we speak about the planet, we speak about the gravitational magnetic field of the planet. We speak about Inertia. In the world of the science of the Creation of the man, we speak about the STM, which is gravitational magnetic fields of the Totality. (1:02).

Proofed to here >>

But, what is that elusive Inertia, which we have chosen another word for it. We call Inertia as the interaction of the matter state field strength. We call Inertia in the body of the man, the spirit. When the soul interacts with the Totality of the fields of the universe, where the Spirit, or Inertia, involved only with the structure of the physicality of the existence, of the planet or the ?? body.

When you travel to another dimension, with another gravitational magnetic field, the soul will still stay the same. But now, the spirits of the man. The Inertia of the internal field forces of the man, has to deal with the Inertial field forces of the planet. And this will give the new shape of the man, as the man will be different, and the shape of the man will become of the dimension of the existence, of the planet, position, and the place. How you interact, how the fields interact? Would you become like a fish, in the oceans of the liquid of the planet, you become the bird in the skies of it, or you become a man on the ground of it. (1:04).

Now, you understand the isotopes and how look at the plasma interaction. As I said, Man has chosen many words for the same thing. We call it inertia in the world of physics. We call it, the spirit in the dimension of the life of the man.

Then mankind becomes wise to understanding the totality, and knowing how he will behave. Different Inertias have created gold, oxygen, and the rest. What would your Inertia in the dimension of the plasmatic condition with Moon, will create a new you. Would you be the structure of the gold or the hydrogen?

The Totality of the knowledge sits within the structure the Enhancement Units within Linz. From everything which the man is made of, we have created the fields. Do you need a bone structure on the Moon. Do you need a bone structure in another dimension in

the U. Or would you stay, to become new structures we have never known. A combination of, a totality of. A way that allows us to be. In the D of the physical man, (1:06). we are just as it is, bone stuck to each other, to create the …. the shape of the man.

When you look at the structure of the fish, some fish have that bone structure, which we are familiar with. Have you looked at the structure of the bone of the blow fish? Isn't it made of connection of the star bones? As he blows himself up, the structure of position becomes loosely connected. So, man will change in that dimension and direction.

If the field the strength of our STP in a condition of another planet cannot support the structure, will become the same as the worm. But would us, as a structure, dig into the ground of the planet, or shall we be a flying worm. The interaction of the fields of this flying worm, would it create a light with the environment of the planet?

What many of us have seen as a cigarette light shape floating. Would the structure of us, (1:08). not support a skeleton, and we become the ball of lights, many of us have seen. With intelligence, knowing where it goes.

Now, we have now even brought you to understand what do you see as a cigarette lights in the sky, or a ball flying around, is a being with intelligence, knowing where he is going. He is going fast to another place. He has seen the Niagara Falls, he wants to go see the pyramids of Egypt. This is his aura, it's interaction of the STP, and the STM, with interaction with the fields of the gases of this planet.

Then you understand there is life beneath us, within the sphere ?? different life structures and layers of this planetary system.

There are cavities within the structure of every planet, that does not contain anything, but fields, and new life in these fields has been created. A life that lives by what is available to it the time, place, and position. As I said many times, there's even life within the center of the Sun. It cannot be any different, because if the fields in different strength lead to the Creation of the man, the fields in a higher order interaction, it has to create condition of life. It has to create condition of the maturity of understanding of the time, place, and the position

As I said, we gradually open your eyes to the truth, that when you land on the Moon, (1:10). a flying light does not become a prophet to you, if he shows you something. You just take it as another sign of the Creation, another beauty of the Creator. I made an image of Myself, but the beauty of it is, that I have many images, as I interact in different fields, in different strengths. I made life in the image of myself, and not only that, life exists in every dimension of the U. It's the interaction of the spirit of the man, or creature, with its environment, which decides the shape of the being, and ?? the essence of the intelligence of the being.

I made the U the image of myself, as a light, as a soul, as a sun. And the physicality comes from interaction of the Sun with its environment, to manifest itself as planets, and the moons, or as a man, and the creatures on the planet.

In 2023, the fulfillment of the promise of the past will be completed, not by us, but by you as the passenger of the U. (1:12). A new cycle will start for the man, a new understanding. It will be like the first flights by the Wright brothers. And now we see where the flight system has taken us, from jumbo jets to Airbus 380, to rocket propulsion, and what we call, "other labs."

I'll make men so busy with the new knowledge in the next few weeks, that man will not have time to go to war. Man will see no essence in conflict, but in Unity. We'll bring the end of the religions, as men becomes aware of the soul and STP, and does not need no interpreter, and no abuser. Religions will unite to fore stand this new knowledge, as it brings and end to them. But they'll find no match, to what is to be delivered. By elevating the soul, we'll walk away from religion, as we become religious ourselves, in understanding the work of the Creator, with no interpreter needed.

This time it's not the Americans, or the Russians to go to space. This time it's me who goes to space. It's me who decides is me who is the ambassador of the man, and it's me who has to be the best.

In so many ways, you'll become the same, you'll become the first Armstrong and Wright brothers, and the rest all together in one go. (1:14). And then we'll see how you will land, how you will behave, and then you then you come back. And there is one thing, we have not sworn you to secrecy. As you have to teach. You have to share and to understand the totality.

Join me on the Moon and Mars and then the universe is yours. Because once I teach you to walk and talk you will understand how to connect to the rest of the Universal Community without any curtains, without any intermediaries. Where you become the man of peace, you will become the ambassador of man, in the U.

Something which those of you who go to these excursions, onto the Moon, and onto the other planetary systems, and into the space, will be that your families will never miss you, because you will establish a connection through the soul. They will feel your presence at all times. Where in a dimension of the physicality you have to go to see, or to be with, here you are with all the time. This sense of missing, goes out of the window. The essence of everlasting omnipotent and presence, becomes the what I call, "the lifestyle of the man who goes into this change."

Then we understand we just don't need the connection to physicality of us, we're alive, (1:16). we make connection with those who we have lost, or have not seen, or have been in the past, in our lives. Where now there is no restriction of the time, position, and the space. The soul of the son, the soul of the brother, the soul of the mother, soul of the friend who passed in one condition or another, years ago. As we live in the dimension of

the space and time of the universe, and not the physicality of man, which is restricted by his position and time.

Welcome to my world, and where I came from, and welcome to the life of the man in ?? spirit, as part of the Universal Community. join me in Linz, to become, to take the first man into space, and join us in the space, that we understand the Totality of the work of the Universe. The true race, for human race, to become part of the Universal Community has started.

We keep you in the essence of the STP of the Man, as long as you wish on this planet. Beyond this planet is yours, and your soul, you become the captain of your life. Would you like to come back to the life and pains on this planet? Or would you like to be free from everything, and be part of the Universal Community and travel the span of the U. Because once you've learned, you cannot forget it.

Let's have a break when we come back. (1:18). And then the answer questions that might be asked. In the second part I'll give to you a new development in the Keshe Foundation in respect to the Energy and Gas Units.
(Shows part 2 of Intro video ..)

<<< **BREAK** >>> 446 KSW Aug 18,2022 (1:27)

This is the second half of our show. (1:28). And Mr. Keshe usually takes questions during this time. Or has something else you'd like to say first, how would you like to begin Mr. Keshe?

K- We'll have some questions to answer if there is, and then we'll come back, and everything else?

Q: … . Last Monday during the discussions about the technology that we do every Monday, in our Brazilian group, we listened to the recording of the plasma Reactor Group, where you made the transmutation test with the Knowledge Seekers at Rick's teaching. Many of us in our group had different and interesting experiences, while listening to the recording of this teaching with our headphones. My experience was a being in a place that I call, deep space. This place was all dark with billions of points of light. So I would like to know what this place is, or is it irrelevant to think about it, and what would these points of light be?

K- I haven't been there, I don't know. It's what we see, and what you understand from the timer and position, (1:30). and then you explained. This is what I said, if you remember at the beginning of the trials before we started in Linz. That we accept, we have to accept what is sent, and what people see. Some people will exaggerate, some people will make some things up. But, in fact, if you've been to Linz, and you've been through the process, and when you come out, we always ask questions, sometimes very deep question sometimes, some of the Knowledge Seekers go through such emotional condition, that they don't even want to talk. We've had two or three cases which the Knowledge Seekers just want to leave. And they say, we come back and give you a recording. Because the emotions so touched, and what they've seen, and who they want to, to understand. They want to mature to what they have been through in the system, how they came in touch with their own soul, experiences they do. So, what do you see? We have? You have to explain to us, because we were not there.

Q: … My first question is related to the Unicose. .. We have a Sun in our Solar System, which the planets rotate around, the moons rotate around the planets. We have a Sun in our galaxy, and our solar systems rotate around that. We have a Sun in, in the center of a universe, and the other galaxies go around that. (1:32). The universe is part of a cluster of universes in the Unicose, I believe off the top of my head, you said it was between six and nine universes that make a cluster. That cluster is one of many clusters of universes. Do these clusters rotate around a Unicose Sun? This is my first question. Thank you.

K- As many planets, and moons, and whatever rotate around the Sun, if you understood the Totality. So, the Unicose rotates around one Sun, which is the Creator, the Soul of the Creator, where all the energy comes from. When you look at the drawing of the Unicose, especially in the back of the third book, that center point is the Creator. The rest are on their own, their own clusters of their own clusters, of their own cluster.

If you compare it to the Soul of the Man your own brain has its own Soul. Your kidney has its own Soul. Your heart has its own Soul. Then within it, there are other sections, compartments of the fields of the strength to clean up the zinc, let's say in your kidney, and another part to clean any vitamins D's. The vitamin D's become little galaxies.

Then within the galaxies you have different tissues, and the cells, and they become these direct planetary systems, and whatever, whatever. But in fact, the essence of life of this cell in the kidney (1:34). which does certain job, is connected to the soul, which has been there ?? in the center of. And that's the same. The whole Unicose evolves and fed by the Soul of the Creator within the center. All these Universes are those clusters of kidneys, and whatever, different galaxies of it.

Q: .. That really does give more comprehension to, "I made man in the image of myself." That's beautiful. I'm very grateful. My second question is related to the technology that you are releasing. The Flight Systems, the Transmutation Systems. More towards the Flight System. How does the Flight System that the Keshe Foundation has built, how does it differ from using the Flight System of the Soul of the Man? What are the differences there, please?

K- What do you mean by that, explain yourself?
Q: Well, with the reduction of the STP, and the correct conduct, activating your Carbon 14. Well depending on the person, I guess, certain practices, people are able to fly around this universe, possibly other universes. Humans are able to do this, just using their soul, their STM, (1:36). because of the reduction of the STP, and their conduct, they can fly around space. How does, for instance, is there any difference in that flight between a human using their STM, and the flight system that has been built and it's been tested in Linz?

K- The system built Linz gives you the opportunity,.. to show the beauty of your Soul to yourself, and nobody else, and to teach you how to reach it. It's a tool for you to get to know how to operate. Where your soul is. We don't do anything else. The flight. We call it a Flight System, but in fact, in reality, it's an expansion system of the Soul. In a way, it's the key to unlock the STM from the prison of the physicality of the man.

When we go back to a lot of teachings. When we talk about from the beginning, that the STM, what you call the Spirit, or you call the STP has imprisoned the STM. If you learn the other parts of the teaching, where like a Tokomak in a plasma condition, you cannot hold the plasma (1:38). unless you have another plasma, which can contain it. So, your spirit has created a net around your soul, by field energy, nothing else.

Q: Could you just explain what do you refer to as spirit?

K- STP. In a cultural, in a religious, you call it, the Spirit, Holy Spirit. The Holy Spirit is your STP.

In the work of the Enhancement Unit, when we put you in it, we in a way, dilute this (the STP around the body). That allows the STM to expand beyond. But still, this (the STM) has a limitation to what it expands to. Where it gets out (draws long shaped bulging of the STM through the weak points of the STP around the body).

If you have a balloon. Then you force this balloon, you fill it with air, and then you force it, you put pressure on it. What does it do? You see a little bubbles sticking out. Because now the field pressure creates this. In the world of Plasma Technology, we don't put a pressure on it, we dilute the strength of the fields of the spirit, the STP, (1:40). and then the soul decides to go to brother, mother, another position in the galaxy. There's no difference.

We don't let this to blow up and the balloon to explode. We allow to reduce that, that this becomes the new shape. Now, the spirit or the STP is diluted inside. It will be very interesting in the coming time, when man matures in more detail in the knowledge, you will see your physicality totally different. Now, we look at the physicality of the Man in a physical dimension this way. But when we become mature and we look at our spirit, or the STP, we will not see this shape (normal shape of man on earth). No way. We will see a field transition.

You know, the best way I can explain it, and I usually explain it this way when teaching children. Is you go on a rope, yeah? You go on a rope, and this is your body, and you try to balance on this rope. You move your arm up, you move an arm down, you put a leg up, you pull the leg down, and you find your balance to stay on the rope. But your shape doesn't change.

It's very much the same as we'll see in the STP in the dimension of energy. We see everything in a compact. In physicality, you move a hand and a leg to balance yourself. (1:42). In the world of plasma, you create balance with your other systems in the environment.

One day when you understand this, this becomes very clear, you understand how, what the job of the Enhancement Units (EU) are. As I always said, we give you a Rolls Royce. It's beautiful. It's full of everything which a man has dreamed of, ?? ?? of perfection ??. In the knowledge of the man, we give you the knowledge of the Creator. It's that Rolls Royce. Now you know, you have a Soul in it. But the only difference is, that Rolls Royce is on the street, it doesn't belong to you. Unless we give you the key for it.

It's the same with your Soul. The Rolls Royce, the beauty of your soul is there. Now with the Enhancement Unit, we give you the key. The richness, the luxury of understanding the knowledge of the creation. That's all it is. Here, in a way, the key to the knowledge of the Universe. Here you have a key for the physical matter to say you have reached ?? ?? . With the Enhancement Unit, we give the key to be able to enter to the knowledge of the Universe. That's all it is.

It's not a magic box. It's understanding the work of the Universe. Understanding what it is, and how we create that condition. I don't decide where you go. I don't decide, how part of physicality manifests itself in that dimension. (1:44). I've asked many people who've been through the system. I said, you know, did you have a drink with your father or your brother, or whatever who died years ago? Yes. Could you bring it back? No. Because you're in dimension of the energies.

If you go in the dimension of physicality, and you went to New York, and saw your brother and he shared a glass of wine with you. You can still have ?? the glass in your hand, because you're in the dimension of the ?? (the brother is still alive so he is our D).

But in the dimension of the, ?? when your grandfather (already) died, when you met, you are in the dimension of the Soul, because there is (he has) no physicality. Because he has lost, he has exchanged the maturity of the STP, the Spirit is gone, as you call it.

It's a difference when we travel you with the system. The spirit and the soul are together. When you die, you leave the spirit of the Totality behind. That's why you cannot come back to create it. Because the, what I call, the composition of the physicality to become another part of other creatures, does not allow it to come back. Because if we going to bring all the pieces of the spirit of the man into creation, to come "back to the future," as you call it, you'll be a piece in the worm, and God knows, the lizard, and the fly and

everything else. The spirit of whatever they ate, and whatever children that were created from them, during the time of your death on this day. So it's impossible.

But the dimension of the soul you don't have the spirit with you. You have the soul, the energy of the soul. That's why I said, if man knew what happens to him after death, he has no dimension of physicality, and when this soul takes position in another dimension in the universe. Then in that position, if it decides, if the conditions created in interaction with the fields of the Inertia of the environment. (1:46). Then you will create its own physicality through the Inertia. Or what we call, "the new spirit will be created." Because he has to slow down, and in that slow down, it changes. It's the same with the Soul of the Creator, when it comes down, it (He) reduces (in strength), and becomes the man. But in essence, the fields of His creation.

Are there any other question?

Before we go to another question, there is something important. Absolutely beautiful, what is going to be announced by the Keshe Foundation. In the past few days, and past few weeks, and years, we have promoted the generator by the Keshe Foundation. In the past few weeks, we have brought you the Gas production unit and what we call, the Plasma Power Unit. Where the two kilowatts we have put for 10k (Euros), and the 10 kilowatt we have taught for 60k.

Keshe Foundation in this (Plasma Unit) we produce electric power, in this (Gas Unit) we produce gases. We have and we will introduce in the next short time, maybe by next week, a new 10,000, what we call 10 kilowatt Energy unit at a cost of 10,000 Euro. Where the beauty is, this power unit is and will supply (1:48). you the energy to 10 kilowatts, and as part of it, a Gas Production. Where what we will do is, at your system you have your (own) generator for your electricity, and you have a gas production for your heating and cooking or whatever you want. The hybrid, a combined bred. Never been done before.

So what we do, we feed the gas production out for you. Do you want to burn, you want to cook and we feed the same gas to what we call a gas generator. A 10 kilowatt gas generator now is on the cards for 10,000 Euros. You've got to understand. You go and buy a gas generator for 600, 800, 2,000 (Euros), whatever. But you have to keep on buying fuel for it. This technology, this way you don't need (to buy fuel for it). It's forever lasting.

There'll be some elements you need to continuously to add, which costs (almost) nothing. But in essence, what we call, a combined unit of electricity and gas as an energy source is on offer from the Keshe Foundation for 10,000 Euro.

We will market it, we'll just working on it for the next week or two. Then you will see one system. On one side you have what we call, the pipe to add to your house, and one side the pipe will fit into a standard generator, a gas generator. So, the hybrid system allows, the combined system, allows us now to see the full energy demand of our house.

We try to limit this to maybe 1,000 or 2,000 to begin with. Because it's a complicated system, we have, to purchase the other parts. (1:50). We're not getting involved in the power generation side (you buy your own standard gas generator). But this is today's (offer), if you buy the energy Enhancement Unit for the power, you only get the electricity, and it's two kilowatt.

We are not changing. Those of you who bought one, and ask, "can I change it to one." We'll try to help you to do it. But from next couple of weeks, we allow this to come into operation. There is a discussion that about 72, maybe 73 people who trusted the Keshe Foundation 4 or 5 years ago, and bought the MaGrav generators, at around about 2,000 Euro.

There's a discussion in the Keshe Foundation. These units for your loyalty to us, will be given to you by very, very little change of cost. As long as we cover our cost. You trusted us, you stayed with us. We try, even if it means, we try to give it to you, as the cost of what you paid for the Foundation for it, we'll try to do this. It's only 70 People left, originally there were hundreds. We refunded all of you. Those who stayed with us, with what we call MaGrav generators, this unit is available, will be available to those. We have a list of it, we know who you are. There'll be an offering, we leave it your discretion to pay the balance, or a little bit more, whatever, to cover our costs. But you'll have the combination of the gas and what we call, the new system, that allows us to come to the next generation of the work.

Because what it is, it's very simple. Your gas is in plasmatic state, your energy unit, electricity, even it ?? lights you, is in plasmatic condition. With another plasma condition system, which we'll market very soon, you'll have your food, you have your whatever you need for, your processing of whatever. (1:52) So, the system as a whole, will become a feeder, will create generation of water, and will get you what you need.

So, the new, what we call, combination, Enhancement Unit for energy and for gas, will come to it. Don't forget, gases are the essence of the Creation of the Gans's, which are the essence of the energy the body of the man works.

With the electric power, we create the condition of the physicality energy. With the gases we create the condition of the Gans's energy. So, with the two, you will understand soon, we'll market the feed, the health, what we call, the processing, and everything else that you need in the house.

You can make a donation for this in the Keshe Foundation, and internally we transfer it to a sale when we market it. But it will be limited, because it depends how much and how we can bring the gas generators for you. In a way, you don't need to pay the fuel, and it's a lifetime system.

But all these systems has 100 Euro per annum, what we call, royalty fees to the Foundation. So, for next 20 years, you pay 100 Euro per year for all the gas, energy and

electric bills you have. Then hopefully with the other parts added to it, the water and the food will come to it, which is nothing.

So, if you were waiting for when the Keshe Foundation would reach that completion point. Now, we have brought the system in, we're working on it. Maybe next week or two, we will release it. (1:54). Those of you who bought the gas unit, or you bought the energy unit, you have to top it up to the figure it is 10,000 Euros plus the shipping. So, even some of you who bought the, what you call, the system from Iran, which is built for what we call, power enhancement, like reducing the cost of the electricity. If you want to top it up, to change it, we can do so. So, you have a full generator and a gas supply together in one, what we call it, system. This makes it very easy for us to operate. In a way, we have brought a new era in the world of science and technology. Where you don't need to buy supplies anymore. You create it yourself. You have the electric, and you have the heating, and the cooking and whatever you like to do with it.

If you don't want to use the energy side, you can tank it as a gas and run a gas car operated and have the energy in the house for your electricity. 10 kilowatts is a very good, what you call it, level of consumption, it can meet all the demands of the house more or less. Unless you put 10 cookers on and 20 water heaters, and 10 heating ovens, and you live in a castle. But then you need about 10 of them. For ordinary man, 10 kilowatts it's absolutely perfect. It meets all the demands.

As I said, hopefully, we'll have come to understanding with one of the world leading nations. The proposals has been done, it's just to be signed in next few days. Then it'll be announced by the government, hopefully in through contractual agreements. That is and it will be allocated to one of the most leading nations in the world. Then we'll see how the others follow. (1:56).

In a way, in the western world, in Germany, they do not need to see the reduction (in production). The factory can buy two or three of these, and can run the factory, or in combination of the higher generator, the gas generator, and take the supply. No company, no factory needs to be shut down, because of the shortage of energy. As this will meet the whole demand of the economy of the world.

As I said to one of our close allies and what we call, companies we collaborate with. To .. transfer this technology very rapidly into Africa in the next few weeks. Keshe Foundation collaborates with many organizations around the world. This allows us to in fact, to bring the power supply of both. To bring the change, to bring that needed change. Africa power production has reached limitation, they cannot buy gases and there were other things. Especially with the rise in the price of the fuel.

Now, every village, every town in Africa has the same opportunity and position as with the rest of the world. Where the Keshe Foundation will back, as part of its ?? profits of its corporations to expand this. We have reached collaboration with some of the major corporations to be able to expand this very rapid. On the back of this will come the what I

call, the Enhancement Body Units, which are totally, totally revolutionized in the new system and structure.

So, for those of you who wanted to buy the generator. We can even allow you to buy. Go to the website of the Keshe Foundation, buy the two kilowatt and put in the text, (1:58). for the new integrated system, for the new, what you call, gas and energy, and we will take it that way. If you want to purchase one, don't go to the one which is a 10 kilowatt for 60,000 Euros. Go to the one, which says two kilowatts power. But in the notes put, "for the new combination system gas and energy." Then you'll get the full set, you don't need to change.

But when in time, in the next couple of weeks, we will change that. But you have this. And then we take all. If you just want a generator, you buy a generator. If you want a gas unit, you still keep your gas unit. If you want the combination to meet all the demands of the house, it's there. But this combination of the gas and energy unit, will come with a supplementary units very soon, where you can just add into the house, and generate all the clean water you need. You can add in the house and get all the energies you need for feeding the household, and everything else. Even your dog will not need to be fed. It's the beauty of it. It will come very nice. You will see it very soon.

It took us a long time to deliver it, but this combined system, which satisfies all the needs of the energy of demand of any household. As you understand, I think very soon, in the western world in next couple of years, these units becomes compulsory. When you build the house you have to have this unit in it. Which means the government does not have to connect to you. Doesn't need to put that cable lines down. Doesn't need to put what you call, gas pipes in. It'll save billions for them, and it creates a new condition of independence.

So, in a way you're welcome to the combined system of the energy, all you need, gas and electricity. (2:00) It's available in a good amount. 10 kilowatt is a fair amount for any household. 2 kilowatt there was ?? about three kilowatt. As I said, we had 70 odd people who stayed with us, they committed themselves, and stayed with the Keshe Foundation. We'll find a solution to cover our costs. A little bit here and there, and we'll find a way to be able to deliver those to you. Then you'll be contacted through the email by the Keshe Foundation, in next few couple of two or three weeks. As we've been discussing in the Foundation, how to support those who supported us and stayed with us.

Any other questions?

R: Thank you. Mr. Keshe, there was a couple of comments there about the microphone being, people having a hard time with it. I find the audio is actually very good right now. But they're asking to move the microphone.
K- I think they've got excited with the news.
R: A little bit away from your mouth, perhaps? There is a suggestion to try a different microphone.
K- We are not going through that, playing we've been…

R: We are not going through that, no. Thank you for the suggestion. You wouldn't believe what we've already gone through to get to the point…
K- Even had Rick resigning from the noise, "I cannot work with this, get a new one."
R: In one point it was just too much.
K- No. iPhone headphones is perfect for us.
R: Sometimes it might get a little close or sometimes your voice is just naturally more deeper. You know, it is just the way it is sometimes.
K- It's just the way it works sometimes, it goes too deep.

Q: … (2:02). All this knowledge that you have been passing on for 8 to 10 years based on science and universal knowledge. And we are now reaching the level of transmutation. My question is, how was this same knowledge passed at the time of Jesus Christ, since the knowledge of the physical body, the planet and the universe at that time, was very small and different from what we have today? Thank you.

K- Christ didn't have the understanding of it. But he had an insight of. It's a big difference. But you've got to remember one thing. You talk when you speak about Christ, you talk at the level of the ?? soul of his character. The soul of the Christ is the same as Moses, and Muhammad, and the rest. A man in different outlets, but it's the same man, and the same man speaks to you today. It's not the position, it's understanding to be able to share in time, place and the space.

The teaching is not just for man, the teaching is for the totality of the creation. As I said, when you talk about the Universal Community, then it's not just the village of the man, it's the totality of the universe which learns from the man. (2:04). So, it's just how you understand it. It's the same Soul, it's the same man in different clothes. But, the STP is aware of the knowledge of the Soul, but it's not able to share, because it's not there. People are not ready, beings are not ready for it.

Q: … I am studying the Health teaching on the uvula held in 2014. You said that the uvula is the Twinity of the thalamus. With this knowledge, can we change the morphology of the uvula through the contact with the fields of the Gans's of Zn and CO2, and thereby change our emotions in the brain?
K- Can you explain?
Q: Let me just reread the last part of the question, I think, can we change the morphology or the shape I guess, and use of the uvula through the contact with the fields of the Gans's of Zinc and CO2, thereby change our emotions in the brain? (2:06).

K- Every time you come in touch with any plasmatic field, or collection of plasmatic fields, it will ?? effect you. The best sign, the best way to understand. If you come in touch with the plasma of a Zn or CO2 you might go through, because it's Gans's, some changes. But we all know when we come in touch with Gans's, it touches our emotion.

The biggest one is when you come in touch with a collection of Gans's, we call it, "a man and a woman," and we fall in love. We change. Because now it's change of emotion. Because the field strength received and given is so much. So, we don't interact. We might

never seen, never touched, or come physically in touch with the person, but we fall in love with, and we change our life with it.

The best example of this is the ex-president of Kazakhstan, Nazarbayev. In 90s, usually the presidents of the Eastern Blocs, or Communist Blocs, whatever. Make sure always there is a news about them at the beginning. The first news is always about the presidents, or the government. They watch, because they want to see what they say, how they propagandize. I know this, because I used to work with the family of Nazarbayev, personally. Nazarbayev sitting, he is not a president anymore, he moved a couple of years ago now. Sitting, watching to the night news to see what the propaganda is. There is a news broadcaster for the first time on, and Nazarbayev fell in love with this woman on television, on the screen. (2:08). The woman never saw the outside world for a long time. She was just picked up from the television station, taken to the palace. They have a child from each other. I think a couple of children up to now.

It's just, a world leader fell in love with a woman on the screen, the touch of the fields. She changed his life. Nazarbayev changed with this love affair, by just receiving the fields. We've seen this many times. Do we need the Gans's to change our emotions? Do we need Gans's to be there? With the combination Gans's of what we call, the fields of life, makes us to fall in love, makes us to understand, make us to change feeling.

So yes, it touches emotion. Because we look at the Gans of copper and zinc. But the biggest punch to this, the biggest collection of Gans's is another being, be it a dog, be it a cat, be it a man or woman, that's all it is. Emotions through interaction of the fields.

Any other question?

Q: … You didn't talk much about the power Enhancement Unit, which several of us have purchased. (2:10). It was my understanding that the power Enhancement Unit helped the power of course, but then it also had many other effects, such as helping you at the soul level as well, the environment of your house and stuff like that. Do these new units …

K- It's the extension of the same, it's the extension of the same system.
Q: Okay, so it will accomplish the same things at the soul level and for use of energy production?

K- Yes, because. Go back to what we said about the CO2 Gas Unit. That the CO2 gas unit is not the gas in the (matter state) level of what we use the CO2 for, let's say, drinking, or for putting a fire out. It does that. But it carries a conversion of energy of the Gans, which means gives life, connects to giving life.

It's very interesting. We can put two people in the same room with a fire and use a Gans CO2 based structure. One will die and one will survive. The soul which survives still wants to be here. The soul which will find the physicality, uses the energies of the CO2 with connection to the environment, to elevate the Soul to leave the physicality. Point of death. But elevated the soul.

You might find a husband and wife in the bed in a fire. The wife lives, because of the love of the grandchild. (2:12). The husband let's go, because he had enough of the pains of this life with the cancer and the rest. It's the soul which decides.

The units which come out is the extension to that. If you buy the Enhancement Unit, that's what it does, it has. But if you go for the other one, all technologies we delivery, is a combination of elevation of the soul, and the food, and the rest of it. You will see what you bought. But as the technology evolves, we showed you three weeks ago, we showed you the gas power production. We showed you the power generator, the week before that. Now we see a combination, but the energy it produces, is a Plasmatic energy in the house. The gas you burn is a Plasmatic, it's not just a matter state gas.

That's the beauty of it. You'll feel the change. It's like when you put Gans's around the house, or bottles, or you fed a tree. Going back to our friend in Australia, Antonio, which is always around with this thing. If you, as we said last time, if you put a CO2 unit, or a Gas unit in the center. This is your fields. Now makes it much easier for you. Because if you have the Energy units, like light bulbs around the field, you'll create that condition. The light shine all the way through to the roots, to the top of the ?? heart. (2:14). These are extensions to the present knowledge that we add to.

There is no need for fertilizers anymore, if you understand how to work this thing. How to produce the gases, that is in combination with the lighting, or the fields and itself. No harvesting, you don't have to worry about how many times you water it. As you go back, go back into the documents about the growth of the harvests in the Mongolia. We did with the Chinese authorities. We were mature, two or three weeks before their harvest, a week before their harvest. In those times, the birds came and ate a lot of it, they were getting fed up. They've never seen so many birds eating. Even after the birds, all the complaints we had, that the birds were still eating, we still had, if I am correct, 72 kilogram they produce and we used 240 odd kilos. Can you imagine how much the birds have eaten in those two, three weeks when the harvest was already ready.

While we're waiting for the fertilizer (used), harvest to be ready. This was only 27, more 56 days of experiment with the rice and 27 days with the wheat. We were 49 kilogram in a wheat. In those 27 days we added, I think, if I remember was about 132 kilos. (2:16). So, it's the essence of the elevation of the soul of the plant. It's not just a plant fertilizer. It's a different world.

You convert this expansion of the fields in harvest, into expansion of the Soul of the Man. Then you can see what it does. Creates mayhem with the West. This is why many of you Knowledge Seekers have a problem with your families. Because you've been touched by the Gans's, you've been touched by elevation of the Soul. The physicality is there, because you have to deal with it. But they see it, "Oh, everything is wrong." But they don't seem two ?? horns, and two things and you don't eat. But when your soul has been elevated. Then you see the light, you see the understanding of knowledge.

How many of the Knowledge Seekers have had, or have problems with your family? Because if the technology is correct, why don't you do this, why don't you do that. But the technology had to be brought to the point of the maturity, that everything is ??. Meanwhile, you receive so much energies from the Gans's you made or whatever.

You're satisfied inside, with the energies of the elevation of the soul. Now it's time to bring that change of physicality. The systems are set to do that, the new systems. When we show the first transmutation, you will see the change in the world about what ?? we talk. When we put the knowledge beyond other points. The way we showed you with the gases and the air. Electricity now with a power production, we put everything beyond question. The biggest problem the Western world has with Keshe Foundation is, how to handle this, and how we can bring the change, and how we can literally forget about what is being pushed and written. (2:18).

You see, the elevation of the soul comes from the fields of the Universe. If you are closer to the center, then stronger field you'll see. Then more stronger soul you will have. The more powerful existence you become. Most of the people we see, we say, they have a lot more of knowledge than we do. They come from the more inner circles of the Creation (deeper inside the plasma spiral), but because they can go to the other dimension, we see them.

Man is on this strength (at beginning of spiral), the ones who have the UFOs and ?? things, they come from this strength (a little bit deeper in the spiral). This is the limit they have reached, but they still can go lower. When they come to us, we think they are god. No, are still elevating their souls with the knowledge of the creation.

But, with today's teaching with the man, we have brought man to this point (very close to center of spiral). If man understands it. He has not much left to reach the essence of the Creation. This is where these people are envious about the man, how he has jumped the gap. And that is the gift of Mitra, being the lover of the Creator.

When you fall in love you give everything. Doesn't matter if you're hungry, if you haven't eaten, you have clothes. This is what our Creator, with His own creation, has brought man to. All trillions of years for all this to expand, to get to the man today has been jumped by one love. Then you understand the power of the emotion. (2:20).

I think he has even surprised the Creator Himself, what He has done to Himself. This is why Mitra fell, understood the essence of the love within the creation on this planet. With all of the problems we had, loving in the man's level is one of the most beautiful things the universe knows. Unconditional giving of everything, to be able to elevate.

Any other question

Q: .. I had another question of a different subject. Concerning the soul and the STP. I've always considered the soul to be the most powerful of the two. How is it that the STP is able to enslave the soul, if the soul is more powerful?

K- Have you seen the fisherman? The net on its own (folded up) has no strength. But when you spread the net, you catch the biggest fish on this planet. It's the same. The spread of the mesh of the fields, engages a lot of fields of the soul. That's why I always explain, you know, just explain with a balloon. The balloons out, when it's weaker, and he comes back and says, I had a dream. You didn't have a dream, you had a soul travel. When you keep it tight, you keep it in. (2:22).

Look at the Tokomaks. Look at the new fusion .. reactors they do. Look at the CERN. We have a very powerful center, but a very weak dynamic system engages all the fields, that's all it does. When you look at the tokomak system, when you have this huge plasma created by the magnetic fields. Then you create a compress, to create a central plasma to create fusion, they call it.

It's a very powerful system in the center. But with, plasma it's a connection of fields. When you spread it so much, you contain it. That's all it is. The STM is in the center. The dynamic blood flow contains it, spreads around it. It connects to all these links. That's why when you elevate part of it, it changes. I've been through this many times.

This is how when we eat emotionally we change. Because our nose is positioned to pass directly beyond the .. breathing, and the digestion system in the mouth. The two continuously elevate. That's the only way we manage to break into this soul.

That's why different foods effects our emotion and physicality. Because this net, gets effected. This is why if you go back to the teaching of years ago, I used to say, when you fall in love, it last three to five years. After that you have to renew the love. Why do you keep on telling to your lover, I love you, I cuddle you, and kiss, or whatever. You make love to reconfirm and be confirmed. (2:24).

Because you create a new love, new understanding. The way you love your wife today after 30 years of marriage, is different than the way you when you fell in love with her 30 years ago. If you kept that love of strength going, you still her love the same. That love you created, it brought in a different combination. But during the time of 30 years you have eaten different foods, you've been breathing different air, and everything else. So, the energy of what you fell in love with, is changed.

It takes three to five years. It's the same with the cancer. When you have a wish to die within five to seven years, we see the sign of a cancer. It's the same with the food, with the falling in love. You use, you consume different energies, and that energy, brings an elevation. So, we understand this. Now we understand it more or less fully in the dimension of physicality.

Any other question?

Q: Mr. Keshe, could we listen every day with our headphones to the Plasma Reactor Group recording, where you made the remote transmutation tests with the Knowledge Seekers?

K- You can listen every hour, every minute, what do you get out of it? That's what it counts. (2:26). What does it bring you? What does it change in you? How does it elevate your soul? How does it elevate the ?? strength of your soul? That's all it counts.

In the coming time, when we bring back the people from the Moon and the Mars, you will see the Soul of the Man's elevation will change. It's not just that we send people to go, we bring the changes, to bring that change. The Messengers of understanding the new world of creation. We are not making you celebrities. We are not making a new cult. We had a guy from the Core Team forcing himself, "I am the core team, I have to." No, it's the elevation of who you can elevate. How you can elevate the energies and whatever. Of yourself and the others, what you can give for them to elevate their soul. So it's irrelevant.

Any other question?

Q: We've seen many new Knowledge Seekers coming into the group from Brazil looking for a solution through plasma technology for autism, and they want to learn how to make Gans to eliminate mercury. (2:28). Can you enlighten us on this topic? What do Knowledge Seekers need to understand in order to bring balance and understanding into their lives?

K- I don't go into this because it opens a big Pandora's Box, especially with Americans, with autism and everything else. But there is a way to overcome the autism through the technology, and in a very rapid way. With it we bring a new dimension to life.

We will test this with the new units for Autism. Autism is a very tricky game. Very, very tricky, how to create it. In the reports to (US) Senate , now, whatever it comes, confirms the connection of the substances to the immunizations, what you call, the injections we received. So, we know this. You have to be very careful with this. These lobbyists are very strong and they can do all sorts of things.

But in general, autism can be changed very rapidly, very, very raptly. It's very much like a blindness. There is a solution. There is a pattern with it. They have to have a system with it. Autism is reversal, 100%.

As I said, till last week we were strained by the, what we call, restrictions by the fake court in Belgium, 7th of August, past. (2:30) But now we are very much involved in a very direct way, with a high level scientific world and the public, in changing and bringing a new dimension into the .. health application, and what I call, improving the life.

We have a certificate from the Naturopathic of the Belgium to produce the systems. We put it directly to you doctors. How to do it and the way to do it. Autism is as easy to change as you drink a glass of water. But you have to understand how and the way it is. But anything to do with other space of, elements, taking of the elements, Alzheimer and that kind of thing, Parkinson's, has already fast track to do.

I don't know if you've seen it, but we did it in China. In China, what we did to get the guy literally running after five days, and wanting to drive. We've seen that many times. It's the same process. There is a solution for all this Autism, ADHD, Fibromyalgia, Alzheimer's, Parkinson's, and the rest of it. It's not a big problem. It's not only the problem of Brazil. In Brazil you can talk about it. The other sites they kill you for it.

We saw Peter in Belgium, when he exposed these things, (2:32). even took the thing to the Parliament, to say the guy is insane, and put him in a mental institution. These ?? lobby's are very, very powerful. We have the same thing here in Austria. We have one woman doctor who's very well paid by the lobbyists, and she causes most of the problem for the Keshe Foundation. In a way, she is a prostitute in her, what I call, PhD to get paid to stop the Keshe Foundation. We have this directly in Austria now with one woman.

We had the same thing with Belgium. When I came back from Iran, I was requested to go to the office of the Prime Minister of Belgium ?? with Dirk. A woman came in and she was, what we call, ?? windmills ?? and she had to stop everything the Keshe Foundation (was doing), because she was getting well paid as a lobbyist, as a member of the Cabinet Advisory to push her way.

But the new generator plasma unit we launched today, will put an end in all this, because there is no mystery. When you can produce 10 kilowatt, and you can gas the house. There's nothing to question. In the, what I call, the Health processing system of the Keshe Foundation is very direct, we elevate the Soul. There is no sign of physicality. We've seen it. Many people who've been through the Enhancement Unit, they tell us what change has brought them.

Any other question?

Q: (2:34). .. What elements do we have to add to the combined gas power generator from time to time? I would like to know more about making plasma gases.

K- That's a part of the technology of the Keshe Foundation, we do not let it ?? out. You cheated us. You betrayed us. We see you're incompetent to do it. So, we carry on doing it in the way we should ??. You cheated yourselves, not us. Us as a Foundation we did. I learned this very much from the Italians.

Then we learned from the Italians again. We had a visitor from Italy to Keshe Foundation, the 11.11 guy. He wanted to do whatever he wanted to do. He lied to us. He came in to video, and then he didn't get his way. He went to destroy the Keshe

Foundation, another Italian, what I scam job. So, we learned from experience, not to let things go, till we have a full control and we can bring the full change back.

A guy wrote to me from Iran, you have to tell us how you make the gases, it's our right. It's our right. You're right is animal right, not the Universal right. You behave like animal, and you live like animals, and you expect to have everything to become a more powerful animal to do more damage. It'll not be done, this time we do it. We learned from what we experienced, of the past. We go back to governments, we work through governments to have, everybody has the same. We learned a lot from Italy.

We learned how, we have found out recently how Italian factory was handed over to the Italians. The warehouse manager slept with the closest person in the Keshe Foundation. Now you know how we lost it. (2:36). Were told how to do it, and the way to do it in bed. So, we learned with how we share, who we share our bed with. These are the things we're learning.

I came, I set up the Keshe Foundation in a very clear way. I trusted that the Keshe Foundation people will be like the Jewish people, I always dealt with in my business world. In the Jewish community when you work, nobody betrays no one, more or less. Accidents can happen. But it brings solidarity, it's your work. I never lost a cent in the Jewish community, 20 years of work. If it happened, it was looked after as a mistake and it was corrected.

When I set up the Keshe Foundation I believed the Knowledge Seekers will come from that kind of mentality. They would be correct people. But I found out the most dishonest people come on the cover of the Keshe Foundation, to deceive, steal and do everything else, as Knowledge Seekers. So, my attitudes in past two or three years, totally has changed.

We treat you exactly the way it was before. People we trust enough we work with them, and we expand with them. The rest have to be dealt with, what I call, governments. That's the best way to do it. Because then everybody gets the benefit of it. It's irrelevant. We won't teach, we do not put technologies out for you all to go and try to ?? disguise it up, and damage the others, and try to damage the Foundation. (2:38). You made us wise. You want us to see what you're capable of. So, we protect the rest.

Any other question?

Q: If I take the trip to another galaxy and find the planet I wish to stay at there. What happens to my physicality here when I want to stay there?

K- You take it with you. You're still connected. But it goes with you. In a way you can, in a way you have to understand. You can transmute. On Earth, because everything is the same field strength wise, you can manifest yourself in 2 dimension. When you go into a different strength it's a different game play, if you don't understand what to do.

You can loose the STP. These are the things man will learn accordingly.

In time you'll learn, what you can do and what you cannot do. As I said, you become that ?? child when you pick up the hot coal and you put it in your mouth. You know ?? it's burning. You don't do it the second time. (2:40).

Any other question?

Q: .. When traveling to different places through the dimension of the Soul, will my memory of the site I previously went to, remain intact?

K- Yes, of course. You will find out, in the coming time when you do it the correct way. Memory of the others (travels or experiences ??) becomes your memory in the universe. That's why you (can) speak the language.

We have this with the two Brazilians who came on the 2nd of August to the Keshe Foundation Center. We had many, we had English people coming in and going and we tried to speak English with them. I wasn't there, I was told by the people who were looking after these two. If they are in the panel they can talk themselves.

Apparently one of them explained he doesn't speak very good English, but he was speaking of fluent rapid English. Till he was questioned, and then he stopped back to (his poor English). We learn languages, we don't learn, we connect to languages, through the enhancement structure. We learn through. The enhancement is the universe. It's a replication (of it). So if we can go into a system. We've seen this with many people who come to Linz. Go in with a (broken) spoken English, and they come back and they speak, (a very good English and) they can explain themselves.

Because they tap into as we said, the language. When you go from England to China, and you go through the transportation system, (2:42). you will have to have somebody to explain to you. You need a translator. But if you go through the transmutation system, I wonder if you need one. Unless you decide to. We've seen it with the Brazilian couple who came to us on the second of August. If they're on the line, bring them and let them explain to us. We tap into the language (with this). That's why we say, we need as many people (as possible) from around the world. That's why on the translation it says, American English, New Zealand/ Australian English, or English UK. Each one carries different essence. One is a pavement, one is a sideway, or a sidewalk, whatever you call it. Yes, it does.

Any other question?

Q: Jalal … First question. In the past teaching you said, the best place I can take the man to learn how to travel the space is, Saturn. Is that still exist in the plan of the Foundation?

K- You can go anywhere. You see, Saturn has many moons, and many conditions and the conditions between the conditions. You look at the moons of Saturn, we look at how

these moons interact, what they create. When you look at the Saturn with its moons you see a beautiful atomic structure. (2:44). I am sure released the paper on the Structure of the Saturn. Saturn has a very composite structure, where it's superimposed. Then you have the ring of the Saturn, which sitting outside. Then you have the moons of it, and the rest of it. Then you have the ice rings. These ice rings are confirmation, are layers.

This layer connects to this ring, for example. This layer connects to the ring. This is of the Hydrogen, this is of the Helium, this is potassium, or whatever. Different Inertia field forces. So, when you have the moons here of Saturn, it's not just a moon. It's what's the interaction between the fields are there ?? of it. Then the interaction with the center.

So, with 11, 12 electrons you get a very good, what you call it, diversity of the fields. It teaches you a lot before you go into space. It's, what I call, molecular structure of the plasmas and the field control.

When you look at any gaseous planet, you see the rings. Those rings confirm to you what Gans's, what ?? are sitting, creating different Inertias. That's why you see in the rings of Saturn different size, (2:46). what you call it, ice blocks. This is how your electrons work in that structure. Your electrons in the outer boundary has different energy system, and the interaction, then the ones in the ?? inner one. It's just because of the field forces they carry, nothing else.

Q: And the hexagonal shape of it?
K- On the top, on the north pole, you mean?
Q: Yes.

K- That is, I explained it in the same paper. I've explained this before. Go back into the Medical Teaching, I think it's in there somewhere. The hexagonal shape of the top layer, or what you call it, the North pole of the Saturn is very simple. You created it with your skin.

You look at your skin. Your skin has this shape (hexagonal) if you look it very close. This shape comes from interaction of the different layers of Gans's, or Nano materials. When you look at the inner skin, the second skin, or whatever, then you create the hexagonal shape of the skin. The outer skin is a mirage of interaction or fields. Each one layer, creates two of the sides of the pressure. If you understand it. Look at your skin to see it.

So, when you look at the poles. (2:48). On Earth we have it as well. The north pole of the Earth, we have a very small hexagonal shape. Because we have a very loose combination of it. The interaction of the fields of three layers, Gans's layers, and the structure of inside creates this hexagonal shape, which brings the stability. It's in the Gans's state.

These layers are moving with different speeds and different, sometimes directions. This creates the interaction of the fields. Totality creates the shape of the hexagonal on top of

the planet. We understood this long time ago. It's been explained in teachings. I think it is in one of the books maybe.

But the hexagonal shape of the field. You create, you put a reactor with the three layers, with different Gans's, dynamic, you will see a field hexagonal on top of it. It's the balance of the fields. When you have more layers, you see more complex fields.

Q: Second question. We see the situation now around the world with drought, and lack of energy use, and all of that. Is that device what you're showing today, is the beginning of the solution for them?

K- In so many ways, (2:50). man has created part of this. In so many ways, as I say it's in the bigger plan. I always said, man will accept this technology not out of the beauty of it, but out of the fear of his own demise. We're getting to that point, we're getting to that point. Everybody looks at it as an economical way to make money, to earn money, and the rest of it.

It's very interesting, very, very interesting. I received a report video of the Parliament of Iran. The discussion in the Parliament, a member of the Parliament asks, how come the minister, who was the guy who wrote the paper against the vaccination, now has become a member of the cabinet, he is in favor of the vaccination. What has changed? As somebody wrote very simply, the bank account. You understand?

Q: Yeah, this is the problem we…

K- This is the problem we have. But in time we change. We are in the right place, right time. The pressure on the Keshe Foundation is beyond. They are trying. But on the other hand we see them, they come to us begging for their lives. They bark like a dog, but when it comes to them with a cancer, they are as tame as a snake.
Q: I wish they open another account that we can elevate their souls.
K- We'll see, we shall.

K- Thank you very much. Jalal, join us in the group 20 people.
Q: Keep it a secret.
K- Don't keep it a secret. (2:52). Join us in the 20 people. You have the rights.
Q:: I will be there Mr. Keshe.

Q: .. With the elevation through the Gas Units, if all souls have access to both physical and soul dimensions what will happen to the trees physically through elevation?
K- What you mean?
Q: Well, he is saying that the elevation through the, I guess the CO2 gas units, if all souls have access to both the physical and soul dimensions, what will happen to essentially the trees physically?
K- They all get. The trees, and the shrubs, and the animals, and the stones will get the same elevation. (2:54). It's not exclusivity of man. That's why we brought it up this way.

R: Will they change physically? I guess would be the question.
K- Yes. Yes, of course they do.
R: So trees might hover on over the Earth instead of being having their roots?
K- No, not really. It's all a point of balance isn't it. Not really, ?? have they uprooted, no. In that level of work it's totally different dimensions.

R: We have a question from Jefferson, again from Brazil. Brazil has been quite popular today.
K- Very active, hum. They don't stop. We have a guy called Rafael, he doesn't stop, they don't stop.

Q: … I would like to help reduce or eliminate hunger in the world. If I use the Gans produced by the cup of food, which you explained in the 358th Knowledge Seekers Workshop, in a stellar configuration made with dynamic reactors, will I be able to feed the people close to the structure?

K- You can feed anyone through the structure. The beauty with the understanding is, if you understand it in a way is, we say in English you can take a horse to water, but you cannot make it to drink. You can create the dynamic structure of the food. (2:56). But if the soul is not there to receive it, you can make as many food systems as you want.

Haven't we done that with the man? Haven't we sent so many Messengers to elevate the soul of the man? How many have listened, and how many have the ?? strength. Those who chose. Those who wanted the elevation. Otherwise it is said, the rest has been, maybe, not a waste of time, but another slower process.

Any other question?

R: I'm wondering if the story of Christ and the bread and fish, feeding the masses, had something to do with the Cup of Food, of some sort technique. Do you have any inside information on that?

K- It's just a man puts a name on to it, as that. Call it the bread and wine and the rest of it. But in essence is the love and energy of loving and giving. But that's what people understood at that time. So that's what it came to be, what we know today.

Q: Okay, along those lines, we have a question from Trevor. He says, I also want to know, when we move to connect through the souls of our ancestors, to find the truth about the crucifixion of Christ, will it be like those people are there to witness what those souls saw with their own eyes? (2:58). Or will we be witness to history like we were present?

K- It's a combination of both. It's a combination of both. Who's been present? Who hasn't?

As I explained to you, we had a lady, we had two people. We had a lady, I have explained this before. She spent all her life trying to see Christ, to be connected to him. When she went through the Enhancement Unit, she came out, and she refused. She says, I don't want to be recorded, I do not want even to write it. Her husband was with us, he said, she refuses to.

Because he was aware of her emotion. She explained to us the color of the skin, the hair, the dress, the walking. She could explain to us fully about Christ. We have a good description of it. It be fits into, what I call, what we always said, Where he came from, would he be any different?

But the communication with him. So, you can now explain a lot. She was of the, what I call, demeanor structure of Middle East mixture, at the time of Christ. It was very interesting. She is not a white Italian, as you call it. It was very interesting.

So, I went through the soul dimension. Her ancestral line was present during the time of Christ. ?? time of crucifixion. The communication lines was, in the line as it was. It was very interesting going into this. (3:00). We had people who came through the system, and they felt the presence of the Soul of Christ. We have two or three people who did this.

But not the manifestations as a physical dimension. We'll see this. Without a doubt Christ lived for 30, 30 old years, he came across hundreds thousands of people who spoke. They've seen him, they know him. Some lived with him, some shared bread with him, as you call it. These people, all of them had children. The souls which have been in touch with. The same as the memory of where the cell of your kidney will be. That memory of the talks, and his presence is within them.

It's in, what you call, the RNA side, not the DNS side, the energy pack. The memory goes back to the time of the creation.

If some of us reach that point, as I said, you can even see the Soul of the Creator to understand His language.

So, people who have seen, what do you call it, Christ, during his time in Palestine, as maybe children, they've seen him crossing. They, made him a frock, they sold a breade to him, they followed him. All these people still created children. Those children carry the exact memory of what he looked like. We carry the DNA, and we copy our parents, as they say, up to 500 generation backwards, which actually to, from the beginning of the time. Because otherwise, some of us won't have a kidney and some of us won't have an eyes, or whatever. So, everything is recorded and added.

So, they carry it. And yes. (3:02). If you have a descendant who came through Palestine, at the time of Christ, and you were there when it happened. Don't forget the population of the Palestine wasn't that big at that time, and where he was, or in Jerusalem. Few tens of

thousands and more or less it was like village, compared today. Everybody knew one thing or the other.

So, we all have, if you come from that ?? kind of background. I carry a Cohen, which means through my mother, I'm connected back to the generation. So, in presence it's very simple. Those of coming from that position, that direction are the carriers here. And on the other side they come from the blood of Muhammad. So, the presence is both. But the same soul.

I've been brought up amongst "Saheds" , which means the direct blood of Muhammad. ?? both from ?? ?? same line. And both from the mother's side. So, it must be understood, that we carry this with us, we've been present.

Any other question?

R: Can we also pick up those lineages, or those entities the Christ and Muhammad? (3:04). Can others pick that up through artifacts, or other connections with the past of the physicality type things?

K- I think most of us know, if you don't know. We don't have anything, which is actually belongs to Christ. But we have more or less most of the clothes, especially the later part of the life, of bless His name Muhammad. Every few years these clothes are displayed somewhere around the world by the Saudi royal family. I think very recently, three, four, or five years ago, they showed the cloths which Muhammad wore during his lifetime. They're treasured, they are kept by the, what we call, religious part of the Saudis.

So we can even, I haven't watched it. We can even go back to the DNA, and recreate many of the people even who touched it, touched the clothes, came in touch with (the clothes). Then with the present science and technology find the bloodline ??. In the Iran Shia ?? side, which is connected directly to the blood of Muhammad, many of what they call, ?? Imam, his descendants, great, great grandchildren, which some of the clothing, and parts have been kept, and people have touched. We can go back to the DNA.

This is a present science, it's not science ?? fiction. (It's) .. science that can fully support this. (3:06). It's not a fiction. So, yes, if you can find what Christ wore, even if you can find the cross he was put on, you can bring part ?? of it back.

R: Okay, that makes a lot of sense with the DNA, and so on. So, are our human bodies, or human sensors, sensitive enough to pick up on that DNA, and actually, perhaps to get that information? Even on a Nano level from a few ?? pieces of clothes. ?

K- Yes, possibly yes. Don't forget, the DNA carries the STP, so it had a connection to their Soul. It's not impossible, because now we understand the science. Unless you're a hypocrite, we can. Unless you are totally denying everything, which exist in the scientific world, we can do.

Don't forget, you go to China and you can choose the color of the eye of your child, the hair, and everything else. So, if they can interfere with it, they can rebuild it backwards too.

Q: .. If any of the Universal Community asked for help in the future, (3:08). will the intervention be justified?

K- It depends how it is, and what is the purpose, yes. Many times they asked for help, many times they received. It's not the first time. Cultures, societies, which have been pure in their work, and they lived a perfect life, in a way. When it comes to for example, their planetary system, or the environment system collapses, or is about to collapse, or when the soul of the community asks for help. The Universal Community responds. Done many times. And still do. There are a few going on at the moment around the universe.

Physicality forces, what we call, accidents for things to take shape. There is a society of ?? for this ?? , what I call, community in the universal work, that the job is like what you call, SOS. They are there to rescue the souls. They never carry the physicality, hardly ever. But carry those souls in all the same ?? It's not an easy job.

We hardly have lost civilizations by accident. They've always been preserved, in one way or the another. When you see the galaxies blowing up to pieces, they literally blow up, empty of living Soul life. (3:10). Majority is emptied. Because it's done ?? completely, what we call, billions of years, about to crash. We see it all the time. So, the facilities for moving is there. The knowledge is there to do.

It's a specific race, that has achieved the knowledge of the creation, who does this. It's a privilege.

Any other question?

Q: … The Cu 59, and you consider it 49. This difference in-between the numbers, is it the Inertia, in a way?
K- The first one is Inertia fields forces. The other one is a plasma field forces.
Q; Is it due to the condition, or this is what, this matter state appears?
K- Yes, it's due to condition. It's due to the Inertia of the Earth. It's the difference between Mass and Weight., 59 is if you look at it from the plasmatic world, is the Weight. (3:12). 50, 49 is the Mass.

Q: In regarding the spirit, in this condition?
K- It's the same. Condition to the position. Condition to the position.
Q: Okay. What you have of idea about this James Webb ?? telescope? And you know, we know in the Plasmatic way, there is no such a distance.
K- About what?
Q: This James Webb Telescope, the recent pictures.
K- I have no idea what you are talking about. I don't have time to look at these things.

J: Yeah, they showed the new pictures of the deep space. And they say this is from billions, and the beginning of the creation. And we know in the Plasmatic technology, there is no such a thing, whatever you see is there in the same time. It is only the distance in our Solar System, or our galaxy which it makes this time…

K- You see, you see the field strength in a matter state, we see the field strength in the plasma state. It's a Plasmatic ?? you are there. Not a matter state ?? you are there. You understand?
J: How can we distinguish this is Mr. Keshe?
K- When you go in the system, when you go into the Gans, what you call, the Enhancement System. This is where we don't allow any films to be taken from the Enhancement room. (3:14). But it's amazing. I've said this before, people tell you, we heard you, we hear a voice telling us. But we don't see, it is blur. I'm just about 20 centimeters away from them.

I tell them to go to the Moon. They say, we heard it. But in fact, it's my soul, which gets in touch, with their soul and says, go to the Moon. Physicality is just to translator. As simple as that.

I've had many, many people who went through the Enhancement Unit this. We heard the instruction. I instructed the soul, through the soul. But used the voice of the man, and the physicality is inside the soul. They hear it and they do it. Because, it goes back to the same point. Trying to give, to please.

When you don't give them instruction, they sit there for hours. Nothing happens, because they're just waiting for the flight to be ?? Vienna, as I call it.

Any other question?

Q: It's that because the people who is going there, they expect to receive? That's why, that is the difference?

K- Very much so. .. Very, very much so. We have this problem with the very Knowledge Seekers who come in. They sit there and they get nowhere. Because of the expectations. They say, "I just came here to give." But what is underlying? What is there? What does the soul doesn't want you to see? (3:16).

Q: This is always like this. It's also in the beginning of your teaching when Rick and others built this ball. And you told them, just there and see what happen. And after a while you said, you went there to receive, but you didn't want there to give. So, try now to give and see what will happen.

K- It's a condition. It's I always, I always said, if you learn it. I always take what is needed, and till it's not needed, the time will not be there for it. I've shown this to the Knowledge Seekers who were around me. When things happen, I tell them, because it's

not there, it's not time. They say, "oh this whatever." No, because we have to understand there's a bigger purpose behind it, not just what we want. That's the whole structure.

Q: One addition Mr. Keshe. Last week you asked about a past teaching for the Knowledge Seekers, I think if the Knowledge Seekers go to the private teaching in the 17th, or 18th of November 2015. No it's 18th of November 2015, in the private teaching. I think they will find what you asked last week, and transmute, and the filtering, and everything. They will be benefited from it.
K- What you mean by that? (3:18).
Q: The connection, which we targeted, what we want, and how we connect, even with the soul. I know you don't remember yesterday, what you eat for dinner.

…

J: … No, it is only for the Knowledge Seekers, because they have questions about where to find all teachings, what you mentioned. It's happened that in November 2015, 18th, it has a lot of this answering, of their questions. If they go there and see… (3:20).

K- You see, nothing has changed over the past 10 years. We just expand on the same thing. Then when you go back to the passage that it was there, we just built upon the more information to be there.

Q: The way you said it Mr. Keshe, and before about the 400th Knowledge Seekers Workshop you said, we will start teaching, and then you realized the knowledge was there, but you didn't connect to it. Then in a way, you will kick yourself, why you didn't see it?

K- I mean, it's like the new power generator. You lot will kick yourself, how you couldn't get your MaGravs working.
J: Don't mention my name.
K- By the way, how's your secret society going? Have you managed to do it?
J: Mr. Keshe, we are in what we call, vacation. I think we will start next week to join together. I think we will make the connection next week. I hope all. Of them is here but, you know…
K- I see them .. I see your team. I see the musketeers as I call it, in the background. I know how you working with it?
J: But as you said, we are working good.
K- You're getting there. I've seen your equipments on the table.
J: By the way, thank you Mr. Keshe.
K- You are welcome. .,. Join me, especially for the next year flight. (3:22). There's a reason for it.

Someone says, "hi, can I join the secret society?" No, they're very secret. I only know of them, because I monitor them on the Zoom. Not monitor, I've just been invited to be. When I found out about the secret society they…
J: Just ask them how much they will pay, no problem.

K- Thank you very much Jalal.

Any other question? … we are going to nearly to about 3 and a half hours.

R: Is that group still accessible through the private students .. group?
K- No, no, this is a very secret society. So, you don't want to get involved with them. How many of you are there, four or five? I think is in the group. They work very good.
J: We have one, we have one of them, but he never joined. You know, and he's in the background. In a way, sometimes he claps his hands, sometimes he laughs at us, you know, but he never joined.
K- Who's that one?
J: I will not tell his name.

K- Any other question? Shall we call it the day?

Q: .. Mr. Keshe, my question to you is, how, and what (3:24). is the Keshe Foundation going to do about drugs on this planet? Because they destroy the true purpose of people's lives. Thank you.

K- We have the knowledge. We have shown using it. But when you elevate the soul, and we are going through that process, this becomes irrelevant. We are in that track.
Q: Do you have a timeframe?
K- Not really. Because we've done it nearly 10 years ago. We can change addictions in minutes. And…
Q: If addictions can be changed in minutes, why does the Keshe Foundation not implement that now on a global scale?

K- Very simple. We have addiction of different kinds. It's like the guy told me, if you make gold, why you ask for donation. Make as much gold as you can and sell it. Man has to go through this process themselves.

Our factory in Tijuana, in Mexico is in the center of drug trafficking. Last week there was a big clash between different gangs, and killing each other, and burning places. We don't get involved, it's not part of us. It's part of the work of the elevation of the soul. (3:26). It has to be done, then when it's done, and when it's done, it will be done in totality.

We are born to be addicted, and we are rewarded by it, our sexual behavior is one. Falling in love with that. Which addiction do you want me to eradicate?
Q: Is that a question?
K- Yes, power is another one. And wealth is another one. It's all part of addiction. You look at it at cocaine, or whatever drugs. All addictions are part of the same.

(The solution) it only comes when the STM passes the STP, and then there is no addiction. This is why, when you listen to some of the Intros, when you look at it from outside, you just see stars. We don't see if the star is the soul of a king, or a peasant.

In time it will be sorted, in time it will not be there to be done.

We put out tomorrow, that we have a solution for addiction, and ?? (drug) barons cannot sell. Do you know what happens to Keshe Foundation? None of you will exist, you all will (makes a sound like … being killed). So we do it in the correct way. … This is part of the process.

What's your next question?

Q: .. My next question is actually (3:28). in relation to, it's about suicide. Now, you have mentioned, that when a human murders another human, they go back to the beginning, the beginning of creation. Am I correct in saying that?
K- In a way yes.
Q: You've also said, that suicide is not allowed. For people that have committed suicide. (what happens?)

K- Suicide is not allowed, because the soul hasn't reached its maturity. It's like when people commit a crime. You see, you can die, in the next minute, the minute before you cannot commit suicide. Because that minute of time is needed for the soul to reach its maturity of departure. That it can overcome the imprisonment of the STP.

Once the Soul of the Man, freed. It has no dimension, till it chooses, by his own strength, and by his own soul. It's like cutting a flower before it blooms. What was the purpose of planting the flower? It's forbidden, it's not there, it's just. You cannot leave a soul, not to mature to its point. This is why killing is such a heinous crime. (3:30). You don't allow the soul to reach its maturity to serve in the other dimension. That's all. We cannot steal.

Any other question?

Q: What actually happens? You've said that if someone murders another person, they go back to the beginning.
K- You have to compensate for what you've taken. That's all. You have less, once you ?? .

Any other question?

Q: Mehranez … With a lot of joy, I listened to the advancements. Now that we are in the mysteries of life, I permitted myself to ask about what they call about, they talk about the punishment, divine punishment, of a lots of people who did wrong by certain values. Now with your teachings, we can come out of these mysteries and say, okay, maybe the Creation of all these ?? at the time, created the anger of the Earth, the emotion of the Earth, (3:32). or maybe the beings over the sky. Or the destructive way of life they had taken, but it takes some time before they can destroy themselves. So, how was this thing called, divine punishment happened?

K- A lot of rubbish. There is no divine punishment. The divine punishment is that, you know you cannot do wrong, and you pay for it. And you pay with your ?? It's something people can't understand. So, they put that divine punishment.

The Day of Judgment is the day of the balancing of the book of your own soul, nobody else's. You've got to remember, there's 7 billion people on this planet, 8 billion soon. And all the time millions die. Every year, two years if you add it up, every ?? collectively. So, there is a collection of hundreds of millions from the time when life for man started. forget about the animals, the trees and everything.

Can you imagine the queue of people now queued up for the Day of Judgment? Can it exist? The divine punishment is you knowing, that when you're done, you have less to go with. That's all. That's divine, that's the secret. How do you want to do it? Do you want to punishment? Do you want ??, whatever you want to call it? It's just made up for people to be afraid of. (3:34). Reality, you're the captain of the ship, you decide where to anchor the ship. That's divine, and once you understand that responsibility.

Q: It's written that the ?? Lute people (Sodom and Gomorra) were doing wrong, some actions which is not good. And they didn't know it. They think it's fascinating, it's good. And God sent a prophet to say to Lot, this good guy, to the prophet, leave the city tonight and let those who were there, don't look back, and they will be destroyed. Just don't look back. And his wife looked back and she became a stone. So, how do you explain this.

K- What you have to see, what is the true about it. What it means. If you take the Soul STP and convert it in energy, you can become a stone. That's all, as simple as that. If you develop the energy of the STP, reaches the level of the energy of a stone in Inertia, you become a stone. That happens in your body, you call it tooth, you call it bone. That's why bones and teeth are only thing left when you die in the physical dimension. It is as simple as that. It's a knowledge, now we understand it. So, it's totally irrelevant.
Q: It takes time to become a stone?

K- It is instantaneous. (3:36)…

Q: Is it like the Mayan people? Some people you said get destroyed, they got vanished? Is it the same?

K- They didn't vanish, it's just that. You've got to understand the process. There were people in the human cycle, that they could manage themselves to stone, and back to a living thing. If you carry the soul inside. It's the same as you can become Chinese looking when you go to China, and you become African looking in Africa. It's just understanding the chameleon of the soul, not chameleon of the physicality.

Q: .. When you say, My wish is my command. We are creator. Some people say that, because, that's what you kind of. I have problem with this word, I'm creator. Because…
K- Have you had children?
M: In a way, yes.

K- Did you gave birth to any children?
M: Give birth, no.
K- So, you are a creator. When you're a mother, you're a creator of that child. But you can be no mother, but create the love for a child, and still create of a new emotion in that child.
M: Yes, I accept that. ?? I am big ??
K- No, who says?
M: Creator is kind of power.
K- No. If you create a statue, do you have a power, or a statue? Move, sit, left, right. We don't have that. It's what we envisage, (3:38). it's what suits us to, it fit us, and to fit our emotions.
M: Yeah, because we say there is only one God.

K- Yes, there are many Gods.

M: And when you say my command is my, my wish is my command?
K- It's my decision, it's my decision, and that will be it. I decide and that will be it.
M: But can I say that also?
K- Yes. You decide to go to the shop to buy the clothes, it's your command. You decided to go. If you see, the clothes doesn't come from the shop to you, does it?
M: Yeah. But it's not instantaneous.
K- One is in the dimension of the soul, and one is in the dimension of the physicality.
M: That's it.

Q: Please. You just said, there are many gods? Would you, do you want to wait until next week to expand on that?

K- The god is us. Translation of the god as a creator. Not translation of God as the big Creator of everything.

You understand? There is a philosophy, which we come into when man matures. Even our Creator has a Creator. Otherwise, how was He created? You understand?

Q: But where does that chain stop? Does it stop?
K- It becomes us, it comes back to us to become them. It becomes us as one. (3:40).

Q: Kind like, with the technology when you're feeding it back into yourself.

K- Yep. Thank you very much for today. Thank you for everything. Don't forget, please join us in the Moon and Mars excursion, as I call it. To bring in a new dimension. When you join us, we will not choose who will be the first. We'll leave it amongst you to decide, who will be the first to go through this process.

We'll introduce you in a way, for you, like in the Universal Council members, when there are too many to do, to become. We allow them to decide, who become the universal language member of the council. We'll do the same hopefully, with those who be the first

group to become the people who take the excursion to the Moon or to Mars. We leave it to the group to decide who will be the first.

There is a reason for it. I'll explain it in time. So, those of you who join us to become the first group to take man into space, the true way, not with the suit of the monkey, through the strength of the STM. You have to decide. Because many of you have to support that soul, with your soul. It's a callback (payback) time, as I call it. Then we understand. So, it becomes a collective effort of the human race, to adventure to that space and time, and then open the universe to man with the knowledge of the Creator, not the knowledge of the man with the monkey suit.

On another hand, (3:42). as I said with the generators, we have given you the biggest gift, that it makes man independent from everything else. If you want to go for it, just go through the system as 2 kilowatt generator and put in there, what do you have put in, and what do you want. Which one do you want.

Thank you very much for today. And hopefully we meet each other next week. Thank you Rick and everybody in background supporting the work.

446 KSW August 18, 2022 >> proofed

END

447th Knowledge Seekers Workshop; August 25, 2022

(Quick Index 20p - done, Proofed, Transcription done ; Need to do Key Phrases, Words,) (Auto transcription from Elias)

Creating a "tornado" of fields in the EU, and between the STM and STP - change world leaders; Tornado of fields; Interact with world leaders through Souls of KS in KSW, When plasmas have frequency; Soul expands and elevates - body rotates;

Topic Index

"Man of color" have gone through FS in Linz - system became complete; Transmute man within the envelope of his own energy; NASA going back to Moon - KS open café on Moon; UC negotiated place for man to land outside Solar System; M fields - Light bend; galaxies are curved; "Tornado" of fields in EU - and within the man between STP and STM; STM behaves same as Soul of Creator; During KSW we'll interact with world leaders through the soul of KF KS - need to mature; Collective transmutation of the fields of the human race; UC will take man different parts of galaxy; Transmute as a cat or stone to see how feels; KF not a cult; KF offered to help IAEA contain potential nuclear accident in Ukraine - this time openly not like Fukoshima; Plutonium like stones, has a soul; Man gifted Knowledge of Creation - respected by UC; Mario Trane a teacher of KF passed away - Flower of Life; Detailed explanation about Mitra - love of the

Creator - not a religion; All religions came from Mitra - Love of Creator; Only Messenger who wrote in own handwriting was Bahuala - writings unchanged; Chinese understand parts but lot of mysticism - not deep understanding of Knowledge of Creation; Blowfish bone structure is Star Formation (SF); Rib cage of man limits his intelligence; Flower of Life contains 2 SF that are opposite to each other, they keep creating new SF out of itself, continues to expand and grow out of itself - symbol of Creation; STM most advanced spaceship; Make tornado of fields within yourself; Only took single Soul of the Creator to create whole U; Jesus tried and got close to tornado but frightened of power; Cannot take another Soul unless they are willing; Spherical plasmas also turn back fields onto self; Whether or not you see your hands and feet it's up to you and your understanding; Vertical beings can multiple without seeds - out of the fields; Stopped smoking after 40 years - difficult to clean but can change lungs; Don't loose desire of addiction - satisfy need; How Thalamus and glands create plutonium - plasma state; Give birth at age 300; Lymph passes in vicinity of glands transfers fields; Mitra is not feminine energies - love of Creator; French president talking about soul - harsh times coming; Gas generators left with leaders to decide; Leaders want crisis to rule; KS take coming crisis serious - make food Gans's now; Warmer temperatures because coming closer to Sun - only a little from burning; Earth gains mass from fields of Sun; Plasmas don't have frequencies of themselves - but do when they interact with each other; Touch soul of cell - change it; Customer service on Telegram; Walk right away after 10 years in bed ; Body rocks and rotates when higher fields - tornado - shows T is correct; Souls expands and elevates creates tornados - body rocks and rotates;

ENGLISH TRANSCRIPTION

(:10).

K- Yes, Good morning, Good day to you, as usual. Wherever and whenever you listen to this series of Knowledge Seekers, Keshe Foundation Spaceship Institute, sharing knowledge with each other, and amongst each other, and maybe sooner than we think. Today, we are used to participants from us, from different parts of this planet. In a most probably repetition of the same number of teaching, will have teachers and knowledge sharers (from) across the universe.

The steps are getting faster, the approach to the final goal to bring to Universal Community is getting much, much closer. As many of you are aware, we are testing, we have started testing in the different aspects of the transmutation and transportation, expansion of the energy fields of the man, the envelope of the soul of the life, that we can transmute man within the envelope, his own energy not by ?? ?? .

We have had the pleasure of going back into the test table, going back on having Knowledge Seekers (KS) who come from right across the planet, to be here for a very short time. This week, we had people from Mexico, we had people from the United States, we had Azar, from Iran, and we had from Austria, other nations on this planet.

(:12). We had the first what we call, "man of color" from United States, who came for one day, just to leave the fingerprint of Africa on the system.

We getting closer to the point, that we'll come to understand the Totality. This week, as we are setting the systems up, getting ready for the next step. Three of our Knowledge Seekers who went through the process of, expansion of the energy fields of the Soul of the Man (STM). As our systems are already set, there need to be more, or less fine tuned, and control system completed. When to the position of wanting, knowing they could move from one unit to another. This was .. already preset in the system, but it's not what you call, connected, but it could not cross. Hopefully, within the coming days, within the coming weeks, we'll reach that point.

We started the transmutation and transportation. We have agreed for the first international transmutation. One of our Knowledge Seekers within the next few weeks, few days, as we pretest. For those of you who come to Linz, and those of you who have signed in for Mobile transmutation, and those of you who have signed in for what we call, "landing on the Moon and Mars," you need to bring with you a letter of consent. You need to send us a letter of consent, and notarized, which means you give us the consent unconditionally, and you accept all responsibilities to be part of this experiment. (:14). To be part of this, what we call, excursion.

As we know, our human friends are going back to the "monkey business" on Monday of shooting up the rocket again, into a space to go around the Moon, and come back in two weeks. We wish them all the best. We wish them success in their endeavors, as their what we call, cycle of knowledge has to complete part of the knowledge of the Man.

We wish the NASA corporation, and all their team success with their launch on Monday. We hope they learn more, and in 2024, what they hope for 2025, will be there to land again (on the Moon). By then I hope many of you and Knowledge Seekers will open a cafe and a restaurant, and a what we call, "a place for the men of the NASA" to come in and stay with you while you're on the Moon, and on Mars.

The development of the technology is rapid. The development of technology is so rapid that in a way, it takes our own teams to understand it, that we can implement it. So what we see in 2025, or 2024, our human friends from Earth come to Moon, and they encounter with you, as the passengers of the Keshe Foundation Spaceship Institute. They might not recognize you as a human, because you have taken a shape and a form to live on the Moon. But carry your passport with you, and tell them on Earth this is my name, this is my passport. Try to understand more, that we have to accept all knowledge's, and all sciences, and we cannot be arrogant in what we've achieved more. Maybe even by then, NASA might abandon the, what we call, this probe. (:16).

The reality with going further with this technology (T), or transmutation and transportation, is that we can, we have seen, and we start expanding the knowledge beyond. What does this mean? While we are teaching you, while we are testing on the systems for Moon and Mars, we are adding systems in the background, even without the

knowledge of our own, what we call, production team, systems to land you in different part of this galaxy.

We have negotiated with Universal Community (UC), and we have agreed where man can land. In a way, we will release the positions, that man will land out of his own Solar System, expected by 2024 -2025. Which means, we'll be able to transmute you back, which means we will be able to bring you back to Earth. But at the same time as you manifest yourself in a different dimension and direction, you will be recognized as citizens of this planet.

We have set out to achieve this, and it will take us what we call, by trial and error, by understanding more, to be able to transmute energy packs, and to transmute everything as an energy pack. Even the paper you carry in your pocket, the suitcase, will be carried as an energy pack, as a Gans of itself to convert to whatever it might look and stand on the position that you're at.

These are the knowledge's that has to be gathered, has to be understood, has to be extended. Many of you by the time you come in for the what we call, Mobile Transmutation, (:18). you will see landing in a new space, and new systems, and our transportation system has gone into operation of the production, as of yesterday.

In a way, what you saw as a Vertical Unit, now is getting to be, take shape in reality, then we do not need the systems which we have, and you are testing in for transmutation. We'll go back into the Vertical System. But in these systems, it gives us an ability and possibility to do much more. It's a more compact. In a way, we have turned, if you look at it, the present system, which sits in a horizontal way, into a vertical way.

So, when you come into the next system of the what we call, the Keshe Foundation testing, you might not even get to go into the present systems. You will be transmuted through the new Vertical system which is getting built on and getting done. The beauty with this is, that allows us more capability. We came from the big units, and then to this. In a short while you will see many of these, like a telephone kiosks, around the place, people go in to transmute.

As I said to one of our Knowledge Seekers in past few hours, please bring your passport. Carry it with you, that when you land, we have to authorize. We have to inform the authorities in Austria and the country you go to, you are in position to transmute. If they accept you, for us to transmute. We cannot break the law. And please those of you who signed to be on the Mobile Transmutation, those of you who come from the system to be done, transmutation in the Linz center. (:20). and those of you who have signed for the Moon and Mars mission, please carry a letter of consent, and a passport with you. We need that, otherwise we will not do it. It has to be notarized, that it's not by somebody just written.

The whole structure of the change is understanding more about the fields, understanding the reality. And in a way, moving away from a lot of dogmas, which we have created in a

world of science for ourselves. And by not understanding the Totality, we have created more mess with this.

One of the things which we as a Knowledge Seekers looking and understanding more better than most of the physicists around the world, is that, in what we call, we go forward with the next step, in what we want to do, what we want to add, and how we want to add things in.

What does this mean? This means that at the present time, the present world of physics has a big problem with magnetic (M) fields. We say we see fields bending near stars when there is a huge magnetic fields. Otherwise the magnetic fields, or light, which is another shape or form of it, moves on a straight line. This is absolute hypocrisy. Because it will come to you to understand, from the beginning of it, how we got muddled up with this hypocrisy, (:22). is that we draw our galaxies like this (a spiral). We see our galaxies as a flat fields. How do they become like? How does our Solar System has an oval shape? Where does the fields bend? Where does the light of the fields bend?

We accept part of the knowledge. And when it comes to other parts, we deny it, because it's suited for those who came up with it, to hold on to what we call, misunderstanding. This part of the what I call, bending like "Beckham" or bending it the way the fields will create interaction, is a cornerstone of the Creation. When you create a stronger field interacting with a weaker field in any direction, you create the what we call, deviation.

Once we understand this, once we can comprehend this process fully, those of you who were looking at what I call, these systems, will come to understand something very different. Even in our present in Enhancement Unit (EU). In the present EU, which you come and travel. When you come in, you enter the space which is hold by materials. We hold on to the reactors.

But if we look at the stars, we look at the moons, we look at the planetary system, (:24). there is no frame of work with them. So the next step for us, instead of what you enter into the Vertical or Horizontal, is creation of the field dimension rotation, that this field dimension rotation, creates this physical condition.

So in the next year or two, when you travel, when you enter, when you transmute. you'll transmute not in a box, not going into the framework, not going into the system, but creating the fields of the creation and then within it, create the dimension of your soul, to be in interaction with it, that it creates this transmutation.

So in the next few years, the next step of the growth of the science and technology with the Keshe Foundation, is not to build more Vertical, or Horizontal, or different system, but to create a dynamic field flow, through the interaction of the field of your own soul, with the Soul of the Physicality (STP), this dynamic, this, what I call, elusive part of understanding the knowledge, the science of Creation.

In a way, you entered the tornado of your own fields, to be able to release the fields, which entangled your soul, and with it, with the emotion of the Soul, to transmute yourself to any position. As I said before, and in the past, we talk about things years ahead. But when you come to it, in a few months time, in a few years time, you'll say, "oh, in the teaching of 446, or 7, he said about this." (:26). Because this is the next step of the knowledge, this is the next step of understanding.

What we have done, what we set you up to do, is when you come to the what we call, Linz flight zone, flight center, at the moment, you have two systems here in here. We have a stand in the middle with some chairs. We asked some people if they want to be. The old, what I call, dinosaur system, historical chairs are still there. But what we'll add to it, in the coming time, there'll be two systems here, which this will allow us to create that tornado (of fields in the center of the reactors).

Which means you do not need to enter the systems, you enter the field forces, that your body now goes into the enhancement system, and you sit on the what I call, the helmet flight system, which there are these in these corners. And then you see the expansion (of the soul).

In a new way, in the way that we are developing, that slowly everybody understands the process, you enter the room, and the creation of the tornado of the fields of your own soul, and the soul of physicality, will release your soul to be free from the shackles of physicality, and then you travel.

In a way in a very short time, in a very, very short time. There is no need for these systems (original EU). And once you learn how to walk, you can run, you can dance, and you can dance the whole of the universe through the D of the Soul, understanding the bending of the fields of the universe, into where you want to be.

Transportation though interaction of the fields of the body of the man is one of the most powerful systems, (:28). that man will come to understand and do. Then what happens to this soul when it travels? When you land in one Solar System, you will become part of one, when you land in another, you become another. It's the same as the fields of the Soul of the Creator, as He expands, as He enters the atmosphere, the condition of the Milky Way, and the Solar System, and then the planetary Earth, it creates the life of man.

What happened in the same rain, goes through the same galaxy, to the same Solar System, but this time on Mars, what would the life be. In a way, the STM will be here, will become to behave the same as the Soul of the Creator. But this time, as a Soul of the Man you have the decision. You become the captain of your own Soul. So, when you come to us in Linz, in the next few weeks, as these new systems are getting developed, they are totally very much the same, but totally different in a structure of the fields. We are preparing you for understanding, for the ?? rise ?? of that tornado. You do not need a Vertical system. You do not need the Horizontal system. You do not need to do much.

In a very soon, sooner than you think. We'll bring you as the Knowledge Seekers, to collectively, to interact during the teachings, with the soul of the World Leaders, the way I did a few weeks ago, going through the teaching of Rick's. This time, we come to you through some of the teachings, and collectively we interact with the soul of our leaders to abandon wars, to elevate the souls, as we did before and we left it to the Universal Council and the Earth Council, and what we call, (:30). the Core Team to elevate the soul of the world leaders. Now we will do it collectively.

In a way collectively, we will interact understanding the what we call, transmutation of the fields of a collective human race, the peaceful Knowledge Seekers will bring peace to our world leaders. We will bring collectively an end to war. If you understand the purpose and the position of this technology, the way we have delivered.

We were planning to do this today, but for some reasons, we will let it go for a while. But in a very short time, in some of the teachings, we'll call upon you to join as one soul to elevate the Soul of our world leaders, and walk away from every conflict, and prepare man for the next step to become man of Universe, to become a member of Universal Community.

The reason I abandoned it today, is because the soul of many of our Knowledge Seekers are not ready for that transportation, that transmutation. For that elevation, as we have to collectively, to be the same.

In a way, we are ready to change the mankind. In a way, collectively, as we've seen those who came to the system, and they felt they wanted to go to the other system, then they want to go to the Moon, and they've been there. We had a gentleman yesterday, who wanted, his purpose was to see the Christ, and he felt the fields of emotion. We had another person for another desire. So if your desires are there, and are met, and changes you. Now it's time to change the rest.

Then becomes our collective desire to bring that. It becomes through the knowledge and technology we have, (:32). the collective desire. As many of you around the world are together, we cross the souls of the world leaders from Australia to China, from South America to United States and Canada and northern Europe, in Iran and the rest. In a way, we become that envelope of love. In a way, we bring that change through, by understanding, that the fields of the universe can be bend, and elevated, and the Light of the Creator does not travel on the straight line. It bends in every direction, to create a just and beautiful Creation. So even man's physics has made a bigger mistake by denying the truth about its own Creator.

In the teaching of coming time, we do not show you how to make systems, and how to do things, but we show how it's done. Because these systems are not needed to be understood. The fundamental principle of transportation and transmutation needs to be comprehended by the what I call, the STP of the man, that allows the creation of that tornado, allows the creation of that motion to be where that tornado lands, and where that tornado will take off.

It's the desire of the human race to be peaceful. But now we start creating that motion, that condition. You throw Gans's in the rivers, and the oceans, and the fields, and the trees. Now, collective soul of the Knowledge Seekers becomes that Gans, that field, that elevates the soul of the mankind.

This is why we asked you to come in (to Linz), as many as you can. (:34). We had this week, a man from Australia. We have people from Asia, we had people from Africa, we reached people from Brazil and North America. And so the collective net of the revolution, of the what we call, creating the life of the peaceful man on this planet, for us, this week became complete.

It was interesting to have an Australian, and man in the color of the skin of the black to be at the same time, in the ?? in the same room. In the beginning where he came, and end, where he ended in Australia. The two dimensions of the expansion of the physicality of the Man started from Central Africa, to the end last points of Australia and America. The same day, same time going through the same process.

In a way, we brought an end to the completion of the all, what we call, travels of the physical dimension of the man. And now it's time to bring the soul of these physicality's to the dimension of travel to the depths of the space and time.

In the next few weeks, we have tested this before, if you remember, when we had the Italians with us. We told them to sit in the middle, though, when you come out of the system, and they came and they had a party. That was a prelude to see how we interact with souls collectively.

Now, the next step is when the Italians or the Germans, or whoever comes in. In a very short time, we do not need to go into the system. But the system allows to create that what I call, the tornado within the system, within the structure of your soul. These systems are not all equal. (:36). And the way they set up, they will create a rotation of dimension.

And in a way, the way in the units we interact with your soul with our system, now your soul within this room, will interact with the fields. In a way you'll become part of the field, your soul become part of the feeder, and part of the condition. And then you will transmute much, much easier.

Now you understand why we set up the EU in Linz, the way we have done. Now you understand what is the next step? Very soon we announce the collective transmutation as a group. Let's say you're in Tehran, 4 or 10 of you. We transmute you directly into Linz 4 or 10.

In a short time, we will ask for you for 3 things, as our system is getting set up. Those of you who go from transmutation by the Mobile system, we need your GPS, and we need your altitude, precisely. Don't guess your altitude, because you might end up two meters

away from the ground, it's a long way to fall. You want the space about 50 centimeter from the ground level. That when you fall, the fall is land, is soft. If we don't stand up on your position.

GPS for us is important to be able to position you the way it is. The condition for those who go beyond Earth, this will be set up directly through the understanding of the interaction of the fields to start with. And then we use the knowledge from the Universal Community to take you to different positions in ?? Galaxies. This is where the interaction of the fields of the work, (:38). and the knowledge of the man, will come in contact and development of what we call, Universal Community. How to guide you to where they've been, and how you can go. Even though they do not have the knowledge for transportation of souls of physicality.

As I said, the knowledge is growing rapid, we cannot stop, we will not stop, we still carry on with developing the man's need today with the gas, electricity, the food, and the rest. But on the other hand, as a well multiple multifaceted organization, the space technology will still carry on in a very rapid way.

Those of you who have signed in for any of the systems, for Mobile, for Moon, for Mars we'll soon offer you inter Galaxy, what we call, another position in this galaxy to travel. We will go through the same process, the same understanding, the same what we call, transmutation and transportation (T&T).

Many of you have just signed in. Three days if you have not completed your signing, your order will be cancelled. So we see a lot of people just making orders, "oh, I made an order." Your order within three days is cancelled, if you do not confirm and complete it. The same is with the Moon landing. The same is with a Mars landing. The same is with all your orders for your generators. Three days, if it is not paid. "I'll pay when I come and collect," has no meaning for us. It has to be complete, that we can complete our process.

Everything has to be, that we understand it is not temperamental of the moment, but is a conscious decision of the change.

In the coming weeks, (:40). when we understand, and when we bring you the position of the transmutation, we will be able to transmute you in any level, in any shape, or creatures you like to come back into. You always wanted to see how a cat lives. Now, with the systems to be brought up, you can live that level of life. To see what you do wrong in their eyes. To see how man has been doing wrong to them and what gives them pleasure.

You want to see how the stone feels in the river, and how a fish travels in the oceans. Now the transmutation is not just you as a man, the same, the transportation you can choose, as anything. It's the limitation of your own desire.

The way you took off, and you landed on Moon, and became the man of Moon. Now through the essence of the Soul of the Physicality we can do it, you become the animal

that you love, to see what you've done with it. You do not become the cat, but you come to see the life and the desire. The same as you go to China and never spoke Chinese, don't look Chinese. Now you look Chinese, speak Chinese, but inside your Soul of Physicality, you know, I am English, I speak English, but how come my words coming out as Chinese, and I understand everything.

It's the same way, then this way we understand how to change the Totality of the life on this planet. What we've done wrong. What we have not understood, and how much we can bring, to bring the changes the good way for Totality. It's the responsibility of the man to give this planet a safe and correct. It's the responsibility of the Soul of the Man to understand the soul of the life on this planet too. For up to now, we were not aware of it. As I always say, (:42). now we are aware of it, we are responsible for it. We have to be, the way we can elevate our animals not to kill, not to fight.

What's the use when we change our leaders, and Mr. Putin stands and sees the lion killing a cat, another animal. The elimination of the war. The elimination of what we call, Totality of the destruction has to be from all levels of the physicality on this planet. It's the responsibility of the human race. It's the responsibility of you as Knowledge Seekers, now that you know it, you have to change it. It's your responsibility. We are not a cult, we understand the process of Creation.

In past few days, many people say, my family say, I've joined a cult. Yes, you joined the cult to be human. You joined the cult to become perfect in everything and every matter. And if this is a cult, this is a scientific understanding of the creation, and not a cult. We are responsible. We are made. We're born to understand, we are responsible for what we do. Those who call you, you are a cult, tell them. This is the problem, you are already part of the cult, you think everybody else is like you - greed, stealing, and everything else.

You don't want to change your cult, because in this cult, nobody steals. Nobody does, because we understand the science. We understand the technology, that we can produce everything as we need, and treats the others the same. We are a scientific organization and not a cult. The cult of stealing, and thieving, and killing has been the manner of the man, to stop others to elevate. Now we elevate our own soul to understanding of the science of it, that, that will not happen to the others.

In so many ways, from now on. (:44). The steps are so fast, that as I always say, if you as Knowledge Seekers, you don't want to be a tomato. You had better catch up, with the knowledge we share. With the knowledge we dispense to you, in a very soft way, that could be understood from the layman on the street, to a professor of physics, in what I call, MIT. Even though, what I call, a farmer in Africa, understands more than a professor. Because there are no barriers of limitation of arrogance in this knowledge, and gaining the knowledge.

In the process of the teaching of and what I call, development, we have changed our course, that we do not sit here and tell you connect this or this. We create a condition that

through the work of it, you understand, this is what needs to be done through the soul. We stopped teaching of the physical condition of making the MaGravs, connect this, correct that. Now we create a condition of the teaching your soul, which is much easier, and much more profound. And in that way, I'm sorry, there are no MaGravs for the brain for you to make, because your brain is already a MaGrav itself.

You have to understand how it works. You have to understand how it interacts. In this process, we have to, we have no choice, but to rapidly extend the knowledge. This week, we have offered of the same knowledge to world leading governments and organizations to bring that next step forward. We have opened, as we did during the crisis in Italy, we opened the factory of Keshe Foundation and the Knowledge Seekers to help with the disaster in Italy. (:46). As many of you remember. We became part of the organization of what we call, civil defense of Italy.

In the same manner, in the same way, this week, we have offered the Keshe Foundation knowledge and technology, to the IAEA, atomic energy authorities in Vienna, that our technology can be used effectively, and all our systems, and KS available to support, if one of the reactors in Ukraine goes rogue, and we see a disaster.

In a way, as of beginning of this week, Keshe Foundation has become as what I call, disposed to the IAEA for any eventualities, if we see Fukushima condition. This is how the Keshe Foundation works. Mr. Grossi and the head of IAEA organization, are fully aware in communications, that the technology is there it to be. We have no patents, we don't support any patents, but our knowledge is at the hand, and will go to, what I call, man of understanding of the nuclear technology, that we become part of, if need be. This time openly. The last time we did, what I call, in background with TEPCO (Fukoshima).

So if anything happens, most of you who have worries across Romania, Bulgaria, and the rest. What happens if something goes to wrong in the war in Ukraine, that Keshe Foundation in that part of its operation, containing the radiation, and anything that might happen, at the disposal of IAEA and the world governments, to implement and deliver.

It does not matter, condemnation, as long as it is containing. Does not matter, (:48). holding and suppressing nuclear reactors, the condition of what we call, safe, what we call, process.

This is how it should be. When it comes to time of trouble for the rest of humanity. Keshe Foundation knowledge is not just by opening patents, but it's opening its factories, it scientists, Knowledge Seekers, to be there at disposal, to help to be there. To give the guarantees, that knowledge is there to support.

We thank the office of his Excellency, Mr. Grossi, in collaboration, and understanding the work, and hopefully, if we see any more what I call, wrongdoing in Ukraine regarding nuclear reactors, Keshe Foundation facilities, knowledge, technology as was available to TEPCO, is available to IAEA and the world governments to implement, to contain the contamination. That it does not harm more people, than what we think should not be.

This is, those of you who take after me, as my, what I call, followers of the knowledge, and you lead this foundation, as should be your attitude, and the way. In time of need, Keshe Foundation becomes an ?? NGO, or property of a nation, a continent, humanity to safeguard its purpose.

We have to understand, that a nuclear reactor is very much the same as one of our systems in Linz. We can tame it. We can control it. We can bring it under full control, to understand, that even use its properties for other purposes. For other interactions, other safe ?? (:50).

In being able to understand that we can bend the fields and change them into what we call, the operation of the system. In the future, many of you will come to this point. Many of you will become the decision makers on behalf of the Soul of the KF, and you have to behave the same. You're there to serve, does not matter ?? time, place, and position, and not there to be served.

For this purpose, many of you especially who are worried in border countries with Ukraine, we give you the surety that Keshe Foundation has completed, and we carry on with the process, with IAEA to safeguard the position, and if anything goes wrong with the nuclear reactors in Ukraine. Understanding this technology. Understanding and applying, and implementing the technology in a correct way.

In understanding of the process of what I call, how we can create a tornado of the soul of the reactor, that it brings back itself, to itself. We will not be constructed, but we have the ability to connect to bring back the fields, back to the source. The way we do with the STM.

Go back to understanding, in the writings of Bahuala, .. even a stone has a soul, let alone collection of stones called, plutonium and uranium. Is the understanding of the knowledge of the Creation, which is the responsibility of every soul. It does not matter in which dimension and direction, anywhere across the Unicose and U.

In the coming time, we'll teach you more. We'll bring more knowledge, to understand more and open your eyes, (:52). to the totality of the knowledge of the creation, step by step. As they say in Iranian, " ?? " , slowly, slowly we'll bring you to that point. We'll bring you to understanding of the knowledge, and transformation and transmutation.

Transmutation and transportation is not exclusivity of the STM, or the STP of the man. It's inclusive to every being, and every living things across the U. And man has to learn to respect it as a package of energy, which confirms life in one position or another. As a single field, as an ?? atom you call it. As a collective of fields, human body, or galaxy, or the universe, all has to be respected.

Once we understand this, once we comprehend this, then we come to the point, that we'll understand most of the knowledge of the creation and the Creator. As a Knowledge

Seekers we showed you, as I said, how to make MaGravs. As Knowledge Seekers now we create a condition for you to be able to understand the power of your own soul, the composition and condition of it. And how it shall be.

Understand the technology in its true sense, and not by its D of Physicality, and then we'll be at a point, at a position, then we'll be in the condition to elevate the Soul of the, what I call, the souls created by the Soul of the Creator, irrespective of the time, place, and position.

Then you understand why the Universal Community envies, the knowledge of man, which has been gifted to him. This is the time, (:54). and the place, as now earth has become the center of the knowledge of the universe and the Unicose. One day you will understand. One day your children and grandchildren across the universe will understand the respect of Universal Community for the race of the man, that the love of the Creator shines, through the love of Mitra, His children.

Let's see what we come up with, and how we stand the challenge. And let's see how many of you will go through that process of the transmutation of the soul, then the physicality. We'll go through a break, and we come back. And I hope in the very few sentences in the teaching, in the past few minutes, you understood the Totality of the knowledge of the Creation, and sometimes the hypocrisy of man, by the lack of knowledge he knows and how he bends it to suit himself. (:55).

<< BREAK >>> 447 KSW August 25, 2022 (1:00).

K- .. Yes, yes, I'm back. .. There is a notice from the Keshe Foundation and that is, with much regret and condolences to the family of Mario Trane, who was one of our teachers, passed away this week. And the Keshe Foundation, will run a memorial, as we usually do for our people. Hopefully next week, we do for all our teachers, and all his students. And we carry a good memory with us, as he was one of those teachers who had his own way of teaching, his own way of sharing knowledge. And I'm sure has brought a lot of joy, and a lot of what I call, new understanding and comprehension of the science of the plasma Technology.

As usual, we all age, and we all have a time lapse on this planet. (1:02). And some of us chooses their own time as the soul matures. Hopefully, he'll find his elevation, in what I call, position, in the dimension of the Creator in the Universe.

Are there any questions

R: I thought maybe we could have one minute of silence in the memory of the being of Mario, who affected many of us Knowledge Seekers in a strong way. He had a strong way about him that required you to be strong in order to handle his energy in a way, and set…

K- As a guitarist I think he had that. He could play the strings, and he thought the human race was a string, and when I push it , it will make a noise.
R: Many of his friends consider him to be the greatest, or one of the best guitarist in his ability. So, yeah .. dearly missed.

And he was also very much into the flower of life. That was our background image in today's workshop, it's one of Mario's drawings, many drawings of the flower of life, as he tried in earnest to get the Knowledge Seekers to understand what he understood about the flower of life, and about the frequencies and interactions of the harmonics, mostly, of that, were the basis of life that Mario believed in.

K- .. In a way, he understood it his way. As you said before at the start of the program, we have an interaction with him in the 60th Knowledge Seekers Workshop KSW), (1:04). that you understand the way he thinks, and the way things are with him. As you said, we'll take a minute of silence for the memory of his knowledge and his beautiful Soul.

R: Okay, we'll take one minute starting now.

<< One Minute of Silence>>

R: Okay, we can carry on with the workshop now Mr. Keshe. Thank you.

K- Are there any questions? Do we have any questions?

Q: WL .. (1:06). I have a question from a Chinese Knowledge Seekers to ask about Mitra. He said, you often mentioned about Mitra in your teaching, but Chinese people are relatively unfamiliar with this name. We're most familiar with Buddha, followed by Jesus, and Mohammed, in addition to local ancient sages, such as Confucius, and Lao Tzu. So, I want to know more about Mitra. I checked it on " name " , the most popular search site in China, and it said that, Mitra was a god in a very old Aryan religious system, and there was a religion called, Mithraism. So, when you talk about Mitra a lot it feels like you're reviving an ancient religion. Pardon for my direct feeling, I personally am not a big fan of religion, but I understand that the source of religious knowledge, is (from) enlightened people, who have nothing to do with the religious system. My request is, can you tell me more about Mitra? What she is? Where she lives? What is his relationship with men? Why did Mithraism emerge? What's the difference between Mitra with Shakyamuni Buddha, and Jesus? Please explain the details. Thank you

K- Mitra is the essence of the "love of the Creator," it's not a religion. Mitra is not a, what we call, beginning of. (1:08). Those who understood the love of the Creator for another created thing, they brought, they created the understanding of the love of the Creator to a path of life, they call it, Mithraism.

She is not a religion. She is not a path. Does your lover, somebody you love, the love you give to someone a religion? Or it's a path of emotion of understanding? Mitra is what Creator loved to show love to. It means, the essence of interaction of His own dimension of emotion.

So, when we talk about Mitra, Mitra is the essence of the love, the devotion of the Creator in understanding how creation can love each other. And with it, He fell in love with the whole created things. Mitra as the essence of the soul, when it interacted with the dimension of the soul of this planet, he fell in love with it.

As I said, many times, you go to the football stadium that 100,000 people in there. You don't fall in love with none of them. You walk out, and there is somebody outside of the football stadium and you just lose your life to it, and you fall in love with it. It's the same.

The soul of the love of the Creator in interaction with the soul of the Planet Earth, He fell in love with it. Its beauty, it's dimension of diversity. So, Mitra is not a religion. Mitra is the love of the Creator in giving, in being unconditionally in love, by the creation of it's own creator. (1:10).

It's like, in a way, the child of you. You created that Soul, you hold its Physicality. But the true love comes between the soul of the mother and the soul of the child. Dimension of Physicality will fall apart, mother dies, the child dies, but the love stays. This is what Mitra is. It's not a religion.

Those who try to explain the devotion of the Creator to his created things, created the Mithraism. The way, the path to love, unconditional, to talk good about it, to think good about it, and act good about it. Because if you do (don't), you can hurt the lover. That's all it is.

Then those who wrote, converted this condition, then they came to have others who followed it, and in traveled to see it. And people who traveled, they explained to him, or to them, what this condition of love is, and then would I merge from it.

From someone who went from the land of Persia, to Tibet, or wherever the Buddha was, and Buddha fell in love with the understanding of the love of the Creator. Then you have the Buddhism. The same with Christianity, Judaism and the rest.

These people did not travel. But in essence of the Creation, they understood the love of the Creator for His created things, which is Mitra. Then everything else comes from it. When you call Jesus, Jesus, or Moses, or Muhammad, they're all replication of each

other, as they came through the time of each other. Jesus was a Jew. Touched by the further understanding of the love of the, what we call, the Creator. (1:12).

He never wrote a single sentence. But people have made Bibles of it. Mitra never wrote anything, people made in the name of it. In a way, if you look at it, Jesus was illiterate in writing. But all this Bible, everything you believe in, is written by his, so called, disciples. He never put a word down.

Even the Mohammed, who traveled to Palestine, and saw that these people have a God, Creator, and us in Saudi, we worship statues. He never wrote anything. It was written as he spoke. The only prophet, the only messengers we know his own handwriting is Bahaullah, bless his name. That, there is no change, nobody can interfere (nobody interpreted, or changed his writing).

What we read about Moses, is written hundreds of years (later), (it can be) anybody's imagination. Torah is nothing but, what I call, a bunch of people's writing put together, as it suited them in the time and place.

Mitra never wrote, they didn't .. Mitra is the emotion of the feeling of the Soul of the Creator, and nothing else. It's not a religion. It's like when you fall in love with someone, what you write about him or her. It could be totally not what he or her is, but it's into your eyes, to your understanding of what is. So, when you talk about Mitra, we talk about the love, the devotion, the detachment, and what I call, embodiment of the true essence of the Creator to his created, what we call, Mitra. (1:14). So, don't count it as a religion. If love to you is a religion, so Mitra is to God.

Any other question?

R: That satisfies your questions Lin?

K- You never satisfy Chinese. I tried for three years living there, it doesn't work .. But they understand. Lin is there, what do you call her. We have been to many meetings with Taoist people, and with the others, they invited us to other places. Some of them have some ideas about our teaching, and who we are, and whatever. You understand that the whole structure of the culture of the Chinese is so beautiful, but is embedded in a lot of mysticism, and a lot of understanding of your own translation of the knowledge.

If Wang Lin wants to add to it, she can explain what they talk about us, what the Chinese Taoist and the others think of the Keshe Foundation and our work, or the return of Buddha as, what do you call it, there is a word for it. (Maitrea). Are you there Lin, do you want to add anything to it?
Q: Yeah, you want talk about what?
K- When you talk about the Buddha, how do you see the Buddha and the, what I call, mysticism of the Buddha?
Q: Mysticism about what?
K- Buddha, or Taoism.

Q: Yeah, for me, (1:16). I think no matter which kind of religion, or the sages, they all try to explain the truth about the creation, about the whole world. Just from their different point of view, or their experience.

So, I think just because of different people, and different location, different culture, and for that time, their expression. But, as what you said before, I think I asked you one question. I said, Oh, when I read something about Taoism, I think it's the same as what you teach. And you told me that, you said, no matter the people 2,000 years ago, or right now, if they are talking the truth, the truth has no different (the Truth is the same.)

K- You've got to understand that Lynn is .. spent time in Buddhist temples, and she's a true, what you call, teacher in Buddhism, or understands a lot of it. Anything else?

Any other questions?

Q: Salomea .. your teaching for today about peace, and what is our noble mission. You touched my heart, you touched my soul…. . (1:18). For Mario, what is his name? I know him. I'd like today to ask kindly you, to try to elevate ourselves, and together to elevate the soul of him, by enlightening us about the link between our technology, Nano technology in the seed, flower or Tree of Life. Thank you very much, much love to you.

K- What do you call the flower of life? You have to understand the structure. Rick, can you bring up what she talks about? A lot of people don't understand what is a Flower of Life. if you go to encyclopedia, you can dig it out.

If you look at this design. If you look at the , and in a way I understood Mario, but he, initially in his work, and he was very correct. Because he understood the essence of the fields, which in many teachings we went back on to, and a lot of you talk about it, but never understood it. But, he came to understand it, the way, the line of creation and transportation and transmutation is. Can you just show the picture of it? And if you want to read it what it says, and we can expand on it.

R: …. (1:20). So, they call it instead of Flower of Life, overlapping circles grid. It's a geometric pattern of repeating overlapping circles with an equal radius in two dimensional space. Commonly designs are based on circle centered on triangles, with the simple two circle form named, Vesica Pisces. We've seen that before, around the square lattice pattern of points. Let's see, if we can just have a look here at the traditional pattern, it might be something like this.

So, Mario drew a number of diagrams that were similar to this. Showing the way the Octave works actually. If we go back to both, the 56th KSW, where another Knowledge Seeker was talking about the Octave built into this pattern, and also the 60th KSW, as Mr. Keshe mentioned, where Mario and Mr. Keshe discuss it at length for about an hour, over an hour.

K- If you look at something very straightforward with this picture, Mario understood it and a lot of Knowledge Seekers have a problem to understand it. (1:22). Look at the points here, (Mr. Keshe adds 3 blue dots that form a triangle) … Then you'll understand what Mario understood, and a lot of you have a problem, or a lot of people have a problem, about this Flower of Life.

If you look at it, it's a Star Formation (SF). It's the essence of the motion of magnetic (M) fields. When you have a combination of the two of these (2 triangles one pointed up and one pointed down), which if you understand it, or you can see it, is these two points with the same center.

This creates the dynamic motion between all, which is the essence of the Creation. This is why this Flower of Life, is life, because in itself it creates interaction. And within itself, it has a common point with the other points, to create another cycle of life.

That's why it's called a flower of life, which means, through its dynamism, through its dynamic structure of the Star Formation it creates life. And it can expand into a bigger dimension as interacts with more points.

We have an animal which works on this basis, but they never understood it. Go and look at the buffer fish (Blow Fish). (1:24). Rick, if you can go to Wikipedia and bring the skeleton of the buffer fish, what we call it, Blow fish. Buffer fish has a very much loose, but very much contained structure of the, what you call, a flower of life. That is why it can expand. It can blow itself up and reduce itself.

It's like a cycle of life. You can expand it to any dimension, and has no limitation. When you look at these structures physically, then you look, that if, these lives are of this planet, or out of the creation of the fields of the universe.

If you can reduce this picture and bring the picture of the skeleton of the buffer fish, you'll see it. It's a very interesting understanding of the work of the star formation. In lose connection in the field structure, the fish uses the muscle tissue to hold, to contain the flower of life.

It's amazing how Creation adapts itself into these conditions, and to these positions. … That is the one. If you look at its skeleton structure, you understand. It still got a skeleton. And how it is positioned. Then you see a lot of similarities. Then, in a way, you can see the expansion of the Universe by, what we call, flower of life. This is a flower of life in the universe, not to physicality in dimension of the man. (1:26). Can you show it's bone structure? You have to go to a buffer fish.

Do you know the blowfish, the one if you eat part of its structure it can kill you. The Japanese are good at it?

<<Rick search for buffer Fish Picture … >>

Some refer to it as a buffer fish. But if you look at its skeleton, in places it has this ability. The structure is very much loose like the, what do you call, flower of life. It is the same shape. It's a combination of the loose bones in a star formation. It will give you a lot of understanding of the totality of.

If you can't find it, I can send it to you as an image, Rick. (1:28). …

We see the same kind of structure. When you talk about the flower of life, it allows to structure, to expand. Because life is not constant, life is not fixed. It's like the buffer fish, it expands. And to have that expansion you have to have certain physical structure field forces, then what we have ribs. Our ribs limits our expansion of our chest, and that expansion of the chest, limits our thinking way. The way we take energies. The way we grow. The way we shape ourselves.

The rib cage has brings limitation in man's intelligence, emotion, and everything else. When you have a rib cage like this, like a flower of life, then it's a different understanding, you absorb differently. If the rib cage of man was like this, like the buffer fish, we would have had totally different emotions, totally different understanding of life.

If you open this picture and look at the dimensions of the bone structure, then you understand more of it. Loosely connected, but always connected to the next cycle of energy. So, when we talk about this is, it's more or less, if you look at this bone structure, is very much a star formation, which means the expansion. (1:30). So, star formation, energy fields, are expansion fields.

I hope I answered your question. And the tree of life is the same. It's the extension to understanding of the more, but ?? to the base, what we call, the base of the tree. In the Persian culture, we make carpets called, "the tree of life." And you always put the tree from the point of entrance to a building, into a hall, into a house. As you walk in, and you become part of the life of the tree of the family. That is what is called, the tree of life.

Any other question?

Q: Dimitri .. Firstly, I'd just like to say with regards to Mario, what a beautiful soul he was, I interacted with him many times in the private teachings years ago.

K- A bit stubborn. (laughs) He was a little bit stubborn, he was very much set in his own ways and his way of thinking.

Q: Right. It's interesting what he used to teach. But a lot of the stuff, that he shared with the group, I comprehended to a certain level, and was able to continue the conversation, and have a to and a throw (back and forth) with him. Because he. Literally, because I comprehended it. (1:32). I liked what he taught. I really did. Big, a beautiful Soul. I'm sure many of us are looking forward to interacting with that soul again in space, in the future.

So, I have a few questions. They're very small questions, they won't take up much of your time. My first question is related to a discussion we were having in One Nation, One Planet, One Race this week. Now, as we know, we have STM, the STP, and the physicality (P). I know and remember, from a long time ago, from having a discussion with you, in regards to flight in space and the reduction of, at that time, what I called, the "soul of consciousness." And you clearly stated, it's actually the "soul of awareness of the truth." Now, everybody's talking about STM, the STP, and the physicality. Where do we put the "Soul of awareness of the truth," into that magnetosphere?

K- Explain yourself. .. Explain yourself, what you're expecting. What are you looking for?

Q: Well, a long time ago, in I believe it was actually public, a normal public workshop, I was having a discussion with you with regards to experiences I had, (1:34). which was flying around space, reduction of the STP and the feeding of the STM through interaction with other human beings, activating carbon 14, and allowing my STM to take care of the Totality of souls within the magnetosphere, my magnetosphere.

I clearly remember you stating that the, what I called, "Soul of consciousness." Because when you go into space using the Soul, there is more than one Soul in that spaceship, a primitive spaceship, the full sphere. Perfect full sphere. When that sphere is manifested in this dimension, you can feel it. I felt like the "Michelin Man," the "Stay Puffed Marshmallow Man," I felt really fat and big. Really. I felt like a blowfish. How synchronistic is that! That we've spoken about that today.

When the primitive spaceship of the Soul of the Man activates, you feel like a blowfish, alright? When that spaceship goes into space, you have the STM, and you have another Soul in there. That other Soul in there is a passenger. (1:36). It's an onlooker, it's an observer. The STM will do whatever it wishes to do, and you literally observe that.

In many ways, that's the basis of schizophrenia, but at an elevated level, that's in line with the universe. So, the discussion that we had in, and also, you know, the STM, that primitive spaceship, it will, when it does things, it will talk to you. But it's not verbal talk, its interaction from Soul to Soul. That emotion from the STM, the primitive spaceship.

K- Let me tell you two things. First of all, the STM it’s not a primitive spaceship. It’s one of the most advanced systems ever created. You call it .. yes, primitive in its condition compared to the Creator.

But in understanding, is one of the most advanced systems ever existed. Doesn't need containment, but carries all the emotion. Doesn't need, what you call, to be encaged, but it encages itself to the dimension, what we call, like the STP.

On the other hand, we have not understood the power of Soul yet. Man has not even entered to the dimension, to understand the power, the unlimited power which he possesses, and how we can use it. Even in teachings of today, as I said, to you is very

hard to understand, to create that tornado, (1:38). as I call it, tornado of the transmutation.

But, if you understand that your Soul is a dynamic Soul. Your STP is dynamic through the interaction of the field of your blood, and the rest. Then you understand. If you can control .. through the emotion of the Soul, the field strength of it, and bring it into interact with the field strength of the STP, you do not need the shape of the man. As you use the fields of the existence of the man, in essence of their Soul, and the STP. You can create that tornado.

It's like when we, in some of the teachings I always explained, if you put your hand out, and create a light, and then the emotion between the light, in your hand and the Soul, will feed you. You can create anything.

But, if you change this strength slightly, and strength releases more energies of the Soul, in interaction with the, what I call, the STP strength, you create that tornado. How is a tornado, is created? The change, the vast change between two dimensions on the surface of the Earth, and at the cloud level.

This is the same, but you create that little tornado of the fields, magnetic fields of the STM and the STP. Then man understands, there is a lot for him to understand about himself. We have just shown you how you can open up your Soul. You do not know what you can do with your Soul.

You're happy with maybe, reaching the Soul of a leader to change. (1:40). You can create hurricanes in the Soul of the World leaders, that they elevate so fast, they receive so much energy, that they don't even, they want to forget about even they want to be a human.

You haven't understood. It’s just that, when we say you need one soul to change everything, that's what it comes to. It took the Soul of the Creator to create the whole of the universe. You can imagine what one soul can do on this planet, which is embedded in the Soul of the Creator, which is the soul of Mitra, and it’s children, which is the creation of the love of the Creator.

This is what we need to understand this knowledge, when we spoke today about the STM and how you can create a condition without the system. Now maybe you get an insight what is to come in the teachings in the coming time. How do you go in the depth of the elevation of the fields, that by humbleness in the dimension of the strength of the STP you create that condition. You don't need the physicality.

When you get a tornado, whatever the tornado touches, it crashes to pieces, and you see the cows, and the buildings get thrown around in small pieces. But in the tornado of the physicality of the man, the STP of the Man, and the STM you open up all the fields, you open up all the fields of the man. You don't need the hand, you don't need the leg.

We know Jesus tried it once, and he got frightened by it. He was the only one. He was young and he was very, what do you call it, fearless in these things. (1:42). He saw it, he understood when he gave life, brought the dead to life, as he understood it. He tried this to see if he can create that condition, that it becomes a tornado of life. But the fact of it frightened him, and he allowed it to go.

Now we teach it, now you understand it. You will be (in awh,) that every created things, which have the STP, and the STM, and Soul of the existence, will be able to do everything you can ever imagine.

It's to come, as I said this morning, up to now we taught you about the physicality till recently. Now we tell you about the knowledge of the universe. This school is very tough. Very, very tough. Especially if you're attached to, what you call it, to the world of the physicality. And you don't have a choice, sooner or later, it becomes like a mobile phone. It becomes fashionable, and then some people lie about it, they have a beautiful phone and they have a thing .. patched up, and some people have a beautiful ?? phone, which is their Soul. And they all become the same.

Q: When you activate the STM, (1:44). and you reverse the jacket and the Soul of the Man is in taking care of the totality of Souls. When that magnetosphere, very advanced spaceship, not primitive, goes into space, can that magnetosphere receive other Souls, and take them into space as well, like an airplane, for instance?

K- What I always said is, you cannot take, you can give, that if that Soul wants to go. This is part of what we are trying to, and we've shown in the flight system. Where a couple go in the system, and one decides to go part of the trip, not all of the trip. And one decides to do a full trip together. You can, but it has to be accepted. You cannot force it because you can.

Any other question

Q: Mr. Keshe, the consent for the Mobile system, is there a form that the Keshe website has or can my friends sign as a witness?
K- It has to be notarized. (1:46). Because this is a legal paper. We are crossing borders. We are crossing borders and there are all eventualities. One of our Knowledge Seekers has written a beautiful one. We'll try to go through it to see, correct it legally and then we put it out for those who want to do it. But it has to be.

You're traveling on (your own) responsibility. All these NASA astronauts you see, they all sign these things, for any eventualities as part of the trial test, and it has to be done, it has to be. We are entering a science, okay, that looks different, but in fact is the same. It's a transmutation, taking somebody from one place to another. When you buy a ticket from an airline you consent to whatever happens, till they get you there. It's part of your ticket, if you read the condition of the ticket purchase. So, it's the same, but this time you stand responsible for it especially during the trial time. It's very interesting what is coming up how you will see it.

I just had a little note from our development team, it says, they're assembling it currently, the control system. We will see how things will come up.

Q: Dimitri .. Mr Keshe, may I just ask you another quick question? Sorry for jumping in here. I'm going back to this whole primitive spaceship thing, because I remember. (1:48). You see, the STM is a full sphere, a full, a bubble if you wish. .. Many other spaceships, they have the fields turned back in, on themselves, creating a flat bottom, creating a stability to fly. Many, many Souls are learning to do this, to create that stability.

So, you know, that's more of, in terms of, I don't want to use the word physicality, because it's got nothing to do with it, but I'm just going go with it anyway. In terms of physicality, a spaceship that has the fields turned back in on itself, is more advanced than a complete sphere, yeah?

K- In a sphere Plasmas we have the same. Fields turn in as much as they link in. They create that shield, we call it, this surface of the, what do you call it, the planet or the sphere. We have a wrong physical pictures in our head, that we have a south pole and a north pole, all the fields goes up through the south, goes in through into the south, and comes out through the north.

In fact, the fields come from all dimensions and all directions right across the whole surface of the planet, or a sphere when it is in the shape of plasma like Earth. So, that's what I said, .. they tell us you cannot bend the light, (1:50). But in fact if you cannot bend the light you cannot bend any M field. This is, what we put, this miss explanation aside, then we understand everything in the world of Creation is possible. And is, as we see it.

Q: Okay, thank you. One last question, I'm really sorry. When you've had these beautiful Souls that have gone for flights, in the flight enhancement system, many of them, they could feel in a different dimension, that they had hands, and they had feet, etc. Why when using the STM, when I was in space, why could I only feel my arms up to my elbows, and my legs up to my knees? Why could I not feel hands or feet? Is that because the flight enhancement system is incorporating more of the STP?

K- The Enhancement Unit is a complete understanding of the structure. On the other hand, what they feel on the Moon with their hands, or walking with their feet, is the extension of the connection of themselves with their Souls, nothing to do with the system. It's how they want to perceive, translate. It's like the way you translate the dream, when it comes from your grandmother in your head and you don't see there's somebody else's standing behind grandmother, but in fact there is somebody else, but you only see the grandmother. Do you understand? (1:52).

This is this is not of the system, it's the interaction of the translation of the information by your own STP inside the Soul of the Man, what we call it, vision blindness, if you want to ?? see.

Q: Okay, so if using the STM, I went to another dimension with other entities there. Not that. Let's just say my Soul of the Man went to the Moon. Do you think I would feel my feet and my hands?

K- It depends on you, that's all, it depends on you and what you want to accept between your STP and the Soul of the Man, which gets imprinted on your memory disks of the interaction. That's all it is. It has nothing to do with anything else, who can tell you what to remember.

It's like background noise, we have a lot of background noise, but there's a lot of noise there, we choose not to (hear it). It's the same. This is an individual process, nothing to do with Totality. It's ?? all it is. Thank you very much.

Are there any questions, Rick?

Q: Jalal, .. (1:54). My really, my deepest condolences for all the KS. But we are not. He's not lost, I'm speaking about Mario. Whatever he have put out, it's already there. And he will going to be benefit from what he left. We always elevate his soul. He tried hard to teach and as you said Mr. Keshe, he was really stubborn. But in a good way. He made his blueprint of his thoughts and ideas. So…
K- You had many hot discussions with him.
Q: Just now, he brought a smile to my face, because I was always in conflict.
K- I think he thought of you as a rebel, sometimes.
Q: Yeah. Yeah. Anyway. What we're trying, is adding to the knowledge in all aspects, and it is for the Knowledge Seekers to take from it. As we say, there is no right and wrong, it's always a learning process. Mr. Keshe, can I teach one minute here?
K- Yes, I'll go for a break.
Q: No, not so fast. What was your learning? What you learned in the university? It was system control, yes?
K- Yes, it was something called a nuclear reactor. I was supposed to, but I never learned it.
Q: Okay. It is always about system control. (1:56). When we have a system, we need to control it. And when we control it, we advance in that. So it's about the system control. You opened up this teaching in the blueprint back in 2015. I think you tried very hard, very hard to bring the KS only to this point. But maybe the Knowledge Seekers missed it, in a way. And, really, I would like the Knowledge Seekers to go to the blueprint in 2015. And especially go to the system control, if you understand it, then you can go to your system, and try to, in a way, control it.

We are doing it all the time. But we do not know the understanding of it. It's amazing what you just said before, Dimitri asked, that background they are working with the system control. It's all about system control, my dear friends. How you add, how you take to make a condition, for this condition to be a magnet. To be a bubble, to be a ray, to be whatever you want.

How much love, how much all other emotions. It's all energies, in respect to gravitational or magnetical, to give or take, or whatever. (1:58). MaGrav positioning in the small understanding. So, if you want to start to really understand it, go to the Blueprint. Make it in the matter state, we always say, and you say Mr. Keshe, we will bring the matter state to understand the higher position, the plasma, and then we will understand our position, and our physicality, and how we interact the Soul of the Man and Soul of the Physicality to make MaGrav position. So, there is no question Mr. Keshe, today. Dimitri, I think he took everything in the questions. So, thank you very much. Come back Mr. Keshe, your minutes is finished.

R: I think we're feeling empty without your question there Jalal, questions.
R: We were waiting for the punch line.
K- It didn't come. It's okay.
Q: Maybe, maybe I will jump in.
R: That's good. That's the old Jalal we need.

K- We saw a part of the understanding, and progressive understanding of what comes up, and what it is, not the totality. How we want to proceed to suit us.

Any other question?

Q: … Can a vertical beings create multiples souls independent of seeds? (2:00). We appreciate your guidance.
K- What does that mean?
R: Well, I guess he's asking if the vertical beings, which are plants and trees, can they recreate, or create another soul without seeds?

K- Yes, and is actually, is the cornerstones of diversity, in the vertical (beings). One thing which you got to remember, it's very simple. We talk about the first man, the first woman, and then we have the diversity. Or the first life, and we have the diversity as a fish, as a lion, as a man, as a mouse, and the rest of it.

The same thing exists in the world of creation of vertical people. They all start from one interaction of the fields. And the interaction of those fields with the other fields created the diversity. Then the seed was the confirmation of the same, repeat of the same. Nowadays is, what do you call it, they take the skin from one tree, and they put in another one, and they diversify the fruit. If a skin can do, so can the field of the plant. All the vegetation you see on this planet started with one interaction of the fields, which led to creation of the vertical. And the rest comes from interaction of fields and diversity of environment. (2:02).

Any other question?

Q: .. A few days ago, we listened to the Plasma Reactor Group recording when you did the Mobile transmutation test with the Knowledge Seekers who were present. After listening to this recording and having an intense experiences, despite being a smoker for

40 years, I immediately lost the desire to smoke. I feel that my body is clean. I would like to know if it is possible for the lung to be cleansed, even after all this time of being a smoker?

K- What do you mean by cleanse? To get rid of the nicotine inside, embedded? It will take years, it will take years. It's not something will happen overnight. You know, you take your car for a carwash, you take your lung for a wash and see how much they can take it out, and would you feel the same?

We had an experience yesterday with one of the Knowledge Seekers who came in. We usually don't ask questions, because all it is, we want to see if we can create the envelope of the transmutation. When he came out, he said, I had two Coronas, and the last one, the funny one, which came, and is supposed to be very dangerous. He said, I have like asthma conditions, he couldn't breathe. (2:04). He said, I went into the system as a dead man and I came back as a live man rejuvenated. He said, I can breathe now, I can breathe easy.

In a way, the breathing or cleaning of the, what you call, the lung is very much, it's on condition of what fields you can replace in it, and how much of those fields you can use. Many people who go through the Enhancement Unit with the breathing problems come out without it. We understand why. It is part of the. Don't forget the lung is the closest thing to the Soul of the Man in the expansion and interaction with the central fields of the, what we call, the Soul of the Physicality, which massive amount of it is always in dimension of motion in the heart of the man.

So, there's a lot of things can be done. But, essentially you might not be able to clean it, but we can bring a lot of change to it. It's nice to see that you had such impression. Many people have this impression when they go through the Enhancement Unit with the breathing. We saw one yesterday clearly.

R: What about that loss of desire to smoke, and some people lose the desire to eat and other things.

K- It's not a desire. We open up a field strength, which feeds, or satisfies that need. That means we get it from the, what we call, the environment of life, or the surrounding. (2:06) That's all it is. We satisfy a desire with the same field strength. So, you don't need to smoke. It's like that desire of hunger. When you're satisfied with the fields from the water, you don't need to drink or eat.

You have to understand, nothing is magic. You have to understand the principle behind it and what does satisfy that. It's the urge to smoke, it's the urge, the addiction to a cigarette, which gets satisfied. So you don't need. We've seen this for years with this technology, with the people with smoking. Many, many, many people have given up. Because in some certain fields within the system or emotion, you're satisfied, you don't need it. It's not the first time. I've seen this with many people.

As I said to all the Knowledge Seekers, most of the Knowledge Seekers who have come to Linz, your journey just begins in the system. It's just that like, we take you from Vienna to New York, and we let you loose in New York, and then the rest of United States is yours, where you go and what do you. So it is with the rest of the universe. This is a journey that we open up to the Soul of the Man. It's beautiful if people understand what opportunity, what condition has been created.

Q: .. My question is about transmutation and the process, that the body goes through. (2:08). In the 446 KSW, you talk initially, Rick, about the fact that the body can produce even nuclear energy, through the thalamus and the thymus. I would really like to understand this better, since when we study the thalamus we learned that it functions as a transmission center for afferent and efferent nerve impulses, transmitting and integrating various motor and sensory impulses. And the thymus is a gland that doesn't produce lymph, since the small intestine and the liver produce lymph. So, how exactly would this conversion of energy for the formation of the body capable of producing nuclear material, such as uranium and plutonium be? And how would hydrogen make these twists within these two systems, the thalamus, which I believe is not a gland, and thymus, which is a gland? It's not really clear to me. Thank you very much.

K- Oh my God. We need about 20 sessions of teaching for this. But principally, the one, the gland, is a conversion of the fields into dimension of physicality of a Gans, and the other one just provides the information and the strength of where it's needed.

If you read your own question, the first part about the one in the head, which is control physical dimension of fields, and one in the body, which is a converter, and it decides how to do and according to the need of the emotion, provides the physical strength of it. (2:10). When in your part of your emotion in your head, you want to get rid of the one who created you so much anger. Someone takes a knife and kills the guy. The father, by emotion, kills his, what we call it, prostate which lead to creation of, or part of the creation of the child who brought him so much pain.

It passes that information to the gland, and the gland creates a specific strength fields, which allows a specific point in that organ, which is called prostate, to become cancerous. Not to produce, stop producing, I don't want to create another like this. You've got to remember women stopped becoming fertile with the present time, not with our technology. But when you understand our technology you still can give birth, 200, 300 year old woman. By the present time of the condition of life, women become infertile around about 40, 45 or so, some earlier, some later. We call it menopause.

Man don't have that option. Man can create children till they are 200 to 300 years old. So the only thing is, which haven't gone through the evolution, is they want to stop what it causes, allows that sperm to go out to create that child. So, they want to put a block into it, you want to stop the process. So you give yourself a cancer, or you put a dam in and the dam grows, and you get a lot of things behind it, and then you call it a prostate cancer.

So, we see the emotion on the top gland, to dimension of physicality, how they control, and they interact to lead to generation, and condition and creation of physical man. That's how it is. Then when they do that, they need an element, which you call, the lymph, it is a passage. It's like, you know, when you put a, you've seen these tomatoes going through a machine, (2:12). and you've got a microwave to sterilize them, that's more or less how it is.

As the lymph passes the vicinity of the gland, the physical gland, it gets tuned to the strengths it needs, and it goes through to the next one. This one we need 20 of hydrogen, plutonium, and 20 hydrogen for calcium. Then this particle to this one, and that part goes to the other one. It's very, very intriguing how the system works.

Any other questions?

Q: .. So, Mitra would be like the interaction of the primordial masculine and feminine energies in action? Would this be the understanding of Mitra?

K- No, it's wrong. Mitra is the essence of the emotion of the giving of the Creator, in loving itself, in a way. Something sent to me by, I think I explained it before. People are asking about, how we can interact with Mitra. Mitra is part of the way we live. The way Mitra is, is our conscience, embedded within us. We know what's good, what is bad. We know what good thing is to do, and we know what good thing is to think and talk. It's us who chooses the wrong way.

Any other question? (2:14).

Q: .. The President of France, he told some days ago, that very harsh situation is about to happen, and he asked for the power of the Soul of the people to change this situation. So, regarding to this Alexandre would like to know about the units of gas and electricity. How is the negotiation with the European countries regarding this?

K- It's left with them. You've got to realize. I was talking with someone past couple of days. A lot of European leaders like to see this thing to come to head on, with people and the governments. The burden of the expenditure is beyond what they can accept. Actually what we see is some governments will push for unrest and conflict, due to these things. (2:16).

But the whole thing is on the table with the governments and they have to ?? ascertain, we have the same, as I said with the IAEA regarding the nuclear. But, Keshe Foundation is going to have its own development, and its own structure of work for these things.

There is a very big, big problem sits, especially in Europe and other structures, as there is a bigger plan behind it. The Ukrainians fought for getting the ports opened up to export grain. Now that is opened up, nobody's buying the grain, or grains are bought in black market from the Russians. What happened to all this cry, "we can't export." Who is

behind it? The prices increase, it serves the people who are just out to increase the control.

I was talking to one of the Knowledge Seekers last night, the fuel, electricity prices in England was told 17, 18 cents, and now is 80 odd cents in past six months. Five or six times more. The same in Italy, we were told it was 9 cents, now it's 50 odd cents. But, has the gas changed? Is it a different combination, is it a different material, is it something new? It's the same one, it's just profiteering, and how to use it. It's mainly used by governments for these things. But the situation in Europe is dying, it's a dire condition, it's going to be. At the moment, it's a nice time. Watch Christmas and New Year, into February and beyond.

I foresee once we start putting these units out, the government's will make it public, that people will start producing. (2:18). We'll see that. We are prepared for that, as now we're in negotiating with the government's for transfer of technology. We have to change it.

If you look at the, what do you call it, the Gas Units we put out. The Gas Unit prices has been increased to 10,000 Euro as of yesterday. The Energy Enhancement Unit Gas unit, combined unit, has been increased to 15,000 Euros. Plus we brought it from 10 kilowatts down to 5 kilowatts. Because to be able to meet the demand, and control the supply and demand. I can see, and this is the reason done It's not that we are making profit. Whatever we make it we are an NGO, and it goes back in (to the company).

But, we see that the manufacturers will not be able to supply the demand, which will create in coming weeks. It is on the card, it's not our talk. As you said, president of France, French minister warned about this 4 weeks ago. Germans are expecting a huge unrest in Germany. They enjoyed the time when the fuel was cheap from Russia.

Now they did not look outside and, what I call, the nuclear lobby was strong enough to, what they call it, not to build any more nuclear reactors. They walked their nation into a cul-de-sac, now they're stuck in it. We have a nuclear reactor which is built, it's operating, but at zero power production, in Austria. Now they're talking about opening up the reactor to meet the demand. Nuclear lobbyists, "no, we don't want it. (2:20). Let's see in the winter when you have no food to eat, what you want.

Europe has walked itself into a very, very tight situation. The same will come with the food and grain, with the rest of the world. We are in for a big change, and in that change will come with understanding a lot of things in different way. It's good for the technology, it's good for the spread of the technology when people can look at the plasma technology, and how they can feed themselves and how they can warm themselves.

As I said, maybe in the next few days we show you the new combined system of the gas and electricity. Then we'll see how the reaction is. Governments are watching it. It's not that they don't know. We have communicated with the German government, we have communicated with the European Community directly. They all know, they're thinking

about it, if there's going to be, and when it is going to be. But, it’s going to be too late by the time they think.

Q: … (2:22). Once Macron said that we need to focus on the Soul level in our prayers, on the Soul level. How we as Knowledge Seekers can help in this process with our soul, with our prayers?

K- We are already doing it. In a way, by understanding the work of the Soul we can do a lot. We hear a lot of world leaders, now they start talking about the soul, and then. Because they can't do anything else and to them is a mystery, people don't know what it is. So, we lead them to believe the soul will feed us, the soul will create electricity, and the gas for us. It’s a way of shortcutting their own shortcomings.

From what is coming out of the European Community, especially the European leaders, except Norway, Holland, and one which is partially, if you call, British. The rest are talking about the shortage of energy and the crisis to come. They expect unrest, they expect huge unrest. So, a lot of you will see shortages, or increase in the price of food, and the rest of it. (2:24). Then you'll see crisis with the rest of what comes with these kind of conditions.

Go back to your teaching. Go back to the knowledge you have. Go back into understanding how things are going to be. Very, very soon you'll see three, four days electricity to each area, than the seven days you're used to. If it goes that way. Then it goes back what happens to your freezers, you stashed it away (food), (so) .. you could have something in the bad time. It's all going to melt, if they're going to be there.

So, go back to the teaching, how you learned to use the Orange and the Water. Start preparing yourself for making Gans’s of these things, that next time there is no orange in the market. You can’t afford the orange, which is 4 Euro a piece, or 10 Euro a piece. You have made a Gans of orange, you have it ready, then that becomes your supply.

It might look funny to the others, but when you put the orange, Gans of orange next to a water, and you drink orange, you feel the orange, you taste it and you get the emotion of it. That's what it counts, and not what other people say. The same with all the nourishments, the meat, the chicken, the lamb, the potato.

Start adding up, start making Gans’s of these and jar it, like you do, like a jam. These become your future food stock. Our parents, our forefathers and most of us, we jam it, we jar it and we keep it. Now, it won't be there, the prices that are there, cannot be afforded. We’ve seen it today in European markets. Last year, we used to buy a tomato for 99 cents, this year we've seen it at 7.99 and 8.99. The same tomato, from the same plant, from the same farm. (2:26). It becomes beyond the reach.

You buy a tomato, make a Gans of it, you buy bread make a Gans of it, and you will receive the energy of it. This jar will last for centuries. You don't have to say, "oh, we used to have bread," you already ?? have it. Start getting ready for what is to come, as

they say. If it doesn't come, one day you're short of bread, you have it in the jar. This situation in Western Europe is extremely serious. Do not take it as a joke.

People will go to people's homes to take (steal) food. But they don't know what's a jar of Gans, let it be on the shelf. They won't touch it. But it's your food. You've been taught enough, you are well ?? versed, it is summer time. Buy the peaches, the apples, the pears, the meat, and prepare yourself for that change. With it you can give to the others, to be.

Always go back in Alekz's talk. He wanted an orange in the morning. He wanted a what do you call it, at night. Then he wanted to get drunk, and he did all three of them in one day, he was drunk for two days, from the same water.

Get prepared. You're in for a very, very harsh time in Europe, if this thing carries on and goes through. (2:28). If we gets further situation in Ukraine with the energy supply, then Ukraine was a supplier of energy into Eastern Bloc countries, which are the breadbaskets of the Western Europe. You're going to run in a bigger problem. France is the backbone of the electricity generation though their power stations. They run out, the rest of the Europe will sneeze very bad.

Any other question?

Q: Dean .. I'd like to just say something for Mario, because I was in the Private Teachings and Mario, as Dimitri said, did touch some flower life ley lines. I look at this interaction on the screen at the moment and it's full of holes, full of space gaps. Mario seemed to be able to connect some of the soul interactions that actually led to, some very big interactions that happened in my experiences. So, bless your soul Mario. I know you're still present with us in each and every moment, as all Souls are. So, I'd just like to say a big thank you to Mario for all his teachings and all that he did within the Foundation. (2:30). As you said, nothing is right and nothing is wrong. So, every interaction that Mario had, had a direct effect on many, many different Souls, in many different ways, in many fields strength that some of us will never comprehend and maybe not directly sense or feel. However, they are present in each and every moment. Thank you Mario. If you are able to transmute and be part of this interaction, in these very moments, please receive from my Soul to your Soul. Thank you for the beauty of your shining star.

Mr. Keshe transmutation, cannot be at any moment in any point in time. You spoke about the heartbeat of the planet, and you speak about the pulse. Is that pulse between ourselves and our Soul at such a speed, that the physicality is slightly unaware, in this moment?

K- What you mean, and what you're talking about?

Q: So, what I'm talking about is the direct communication between the physical body and the Soul. We have the heartbeat of the planet, we have the heartbeat of ourselves, we have a pulse, that pulse in that. For me, it's like the communication between what we see physically all around us in this very moment, and the Soul aspect. Is this constant? Does it turns on and off so quickly, that the physical body is unaware of it. Is it a direct

communication? Like a pulse, but it's so fast that we're unaware of it? That'll be my question. (2:32).

K- I don't still understand. What is so fast?

Q: So, is the interaction of the communication between the Soul aspect of. You say the Souls have another life, they're there, they're constantly in communication, and they're constantly consciously aware of each other, in each and every moment they're interacting, and guiding us, guiding the physicality. So, is that communication, is it constant? Is it always present in each and every moment, but so fast that we're unaware of it in our physical bodies in the slowed down fields?

K- It is there. It's like the air you breathe. Is there a position that you can't, there is no air to breathe? You go in the basement, you go in the loft, you go in the tunnel, you go inside the Earth. It's always there. They don't inject ?? it. It is the same way. It's always present.

You're talking about Mario. There is a message, which has come through the chat to us. I don't know how much it will help you. Apparently something might, some of you can help with it. It's been posted by our Knowledge Seeker. It says, "hello, everyone. I was shocked to find out my brother Mario Trane passed away. My family and I are in shock. In case some of you do not know, this Mario real name was Mario ?? , his brother all live in Florida, Georgia, and North Carolina, USA. (2:34). The cousins and other family live in Canada. I'll be flying over Bangkok to make arrangements for him. I have been in touch with the Canadian Embassy. If anyone can help us get the number or email address of the Canadian Condo association where he lived. Please help with any knowledge where they brought Mario to. Would help us great. And to thank you all in advance for the help you have given us. My name is John."

It's his brother. If any of you Knowledge Seekers know where he used to be, where he lived and where condo, wherever he is, that we can help the family to at least get the knowledge of the brother. If any of your Knowledge Seekers had contact with him in Bangkok. I'm sure one of our Knowledge Seekers in Thailand can help. Get in touch with me, or somehow we can get the brother to. Maybe he would like to take the body of the brother back home. If you have any knowledge of this , his place and time over, he's over, ?? he was, or where he lived. They apparently lost contact and they're trying to. A brother trying to find a brother.

Q: Thank you Mr. Keshe. That's as you just said that a brother. A brother to all of us. We're all brothers and sisters. And it's a wonderful thing when, when humanity becomes one, becomes brothers and sisters again, and understands the divinity within inside themselves. Mario's picture here, and his teachings shared a lot of knowledge and his family deserve. (2:36). Like all family members do. The beauty of his knowledge, this universal condition to be spread evenly and continuously in this moment, so that everybody receives the field strength, and Mario's loving attention, the care that he gave.

Yes, there were some moments where, like we all do, we have other thoughts and interactions. As you've rightly said many times Mr. Keshe, nothing is right and nothing is wrong, and every interaction is a field strength, is a plasma, that resonates and comes back, it flips, it changes its position. Sometimes we need that interaction, to see the other side of the plasma, to see the other aspect and to feel that strength, to feel the emotion. And then let it drift on by, and again the emotional experience from that interaction, to gently guide us and give us the new interaction, a new field strength, that will enable us to understand more. As you said, this technology is ever expanding. We are just touching the very tip of the very first step. And so it is unlimited. Mario's beautiful teachings and the drawings that he did explain this, to his understanding. From his understanding, many of us learned some very deep, knowledgeable concepts of the universal flow and energies. I have one of his devices that he spoke about, actually made this tool. I put some, some of the knowledge that Mario taught, and it was inverted, (3:38). inverted triangles, pyramids, however you want to describe it. And on the end of it, I put some, some of the plasma waters in certain points, like we see the points on this flower life grid that Mario drew out when he came to his position where he, just by interacting with the fields, the universe spoke to him and shown him many, many diverse and beautiful interactions that he took within himself, and then expanded upon, and drew physically and spoke about with words and intentions. That's the ethos of the Foundation. So, some of the interactions, whether they are, however they were. They all have a beauty. And we all experienced and learn from it, each and every single one of us in this very moment. And thank you, Mario, thank you. Thank you for the beautiful family of Mario, for bringing forward and for the Soul of Mario. It's the Soul of all of us, within each and every single one of us. Part of the Creation, part of the Creator. Thank you Mr. Keshe. Thank you.

K- Thank you very much.

Any other questions?

Q: Another question from Chinese. His question is about, recently, China Yangtze river region has suffered from very high temperatures. Also we heard a lot of reports, the same in Europe in past two years. (2:40). Also China has like some hail stones and tornadoes in last several years. So, he's asking is this because of greenhouse effect, or because of the Solar System is going to the higher energy of the universe, or some other reasons? Is this relate to the evolution of human and our planet?

K- This is a natural process. We just see part of it, as I said before, because of the present communication systems we have, we think it’s exclusively, we just have. These odd things has happened for centuries and thousands of years. Part of it, we effect, because of the way we have abused this planet, and part of it is, we reposition some of the, what we call, resources of this planet. Now we are in this problem with it.

So, get it in China, in Europe, we get it sometime in South America, we get it in Africa. If you go some 20, 30 years ago, Ethiopia was drought, and we had all these Ethiopians

children with nothing but the skin and bone. It's something we always been. Nobody knew, because of the lack of communication across (the planet), but now it's there, and it's continuous. It’s not exclusivity of China or Europe. We had a huge floods in Iran two or three weeks, where thousands of people have died, thousands and thousands of videos we see.

We see in different parts of the world, the climate change, it’s partially. We are entering, we are moving one level lower, into nearness to the Sun. (2:42). But this drop of, maybe, a few centimeters will create a lot of changes for the ice, and the temperature of this planet.

This planet will become inhabitable in coming time, the way we know it. We have a expansion, to a contraction. We have a pull at the same time. We are on the edge of the galaxy, we are getting pulled further in. So, our Solar System shell is getting under bigger pressure. Very, very small, we don't feel it, but it takes millions of years. Now that creates a new condition of life inside, which we are part of it.

Then we have the evolution of the dropping in (getting closer to sun), because as we lose the strength in the Solar System, as we rotate so much, with the rotation of the day and night of this planet, and the annual circle and other dimensions of motion inside it. Is, it cannot be compensated by it. Partially, it's the loss of the gravity, or the strength field in the center, we're getting pulled to the center of the Sun, at the same time. So, all combined together creates the new condition.

Has burning of the most CO2 gases, global warming has created this condition. When it move to a new position, the way creation of CO2 led to creation of sustainability of life, billions of years ago. Now we see the reverse of it, and so we see the condition.

Do you want to blame it on the heating, what heating, burning of the gases? (2:44). Maybe a little bit, but not much. Evolution of the planet, life is bringing a new condition.

We're getting closer to the Sun, so we're getting warmer. Doesn’t matter how we want to end it. We are moving into the center of the galaxy, closer by millions of kilometers, every day, every hour. So, that creates a higher temperature, higher field interaction. We are not just burning the fuel on this side. We've got the pressures of the fields from the Solar System, and from outside the Solar System on us.

The closer you get, the hotter it gets. We dropped in by, just go, nowadays they measure it. See how much. Rick, can you check it, you can see it? How much in the last century we come closer to the Sun, past decades. People measured the distance between the Sun and the Earth. How many centimeters have we come closer in past 20 years. I think all of you know how to Google. Ask Google, what’s the distance, difference between a hundred years ago and now. And that distance means higher temperature field, higher strength field from the Sun. So, they melt the ice. It’s very easy. Rick, can you just check?

How much the Moon has gotten closer to us in the past 50 years? There's a critical point, a certain point if you move on, you change. (2:46). Global warming was a very good Dutch game to sell a lot of trees, which had never got planted, to make money.

R: It seems that most of the consensus is that this Earth is moving away from the Sun, but very slowly.

K- It's moving into the Sun, the gravity of the Sun is pulling it. .. We don't see a planetary system falling out of the Solar System. They get generated, and they get pulled into. If we were moving out the ice should have grown, you get cooler.

R: I think they're talking about the loss of mass of the Sun, causes the Earth to go away from the Sun, rather than closer to it, because there'll be less gravity effect. Is the idea.

K- The gravity comes from the center of the planet, not from outside mass. Comes from the fields from the inside.

R: What about the force between the Sun and the Earth?

K- It comes by the strength of the Solar System Sun. (2:48). The field strength of the Sun compared to Earth is a huge difference.

R: So, if the fields strength of the Sun is decreasing, then wouldn't the earth …

K- No, it cannot decrease, it cannot decrease, no. The field strength inside cannot decrease. The gravity of the Sun doesn't change as such. Whether it changes, it transfers right across through.

It is like when they say, the temperature inside the Sun is so many billions, it cannot be, it's interaction of the fields. The heat of the Sun we see on top, is because of this interaction of its gravitational field and its Inertia mass. It has no relevance to what's inside.

We know this, because we've done tests. We have carried out tests now physically, we know this. It's not just a guess and a theory. Reactors, condition of the reactors show constant temperature in the center of the reactors.

This global warming with the burning of the fuel is, it's what they call it. If there's something else which doesn't add up, we look at the Earth, (2:50). in geological sense, we see layers on top of layers, which means the mass of the Earth is increasing by the compression of the field of the Sun hitting it or touching it. That has with the Earth, external diameter has grown by extensive amount. Due to the fallout of the interaction of the fields of its gravity with the Sun's gravity.

This air we breathe is continuously added to and converted to. It’s not constant, it's not a closed capsule. So, the mass on it. If you look at Earth. Sun is losing a mass. Earth is

gaining a mass, so it gets heavier. You've got to understand the Sun as a total is interacting with the fields of the universe, which they add to its mass, the same as Earth does. We are speck of dust compared to this Sun.

The Sun interacts with. Our atmosphere interacting with the Sun creates these layers of the soil we see on top of the Earth. The Solar System interacts with the environment of the Galaxy, and is continuously adding to its mass, not losing the mass. But, the addition there is in a Plasmatic conversion.

The physics, especially cosmic, and cosmos physics, and astrophysics, is so muddled up, they only take what they want to promote. They don't look at the totality of the. Because they never understood the totality of the knowledge.

R: That seems to be true, and me trying to look this up. (2:52). There's a number of conflicting ideas and theories. One of the latest ones is that, it's increasing the distance between the Earth and Sun. I mean, there's regular changes, that we know about that, between the Earth and Sun. But as far as the sort of yearly increase or decrease, they're talking about one micrometer, or a millionth of a meter is the yearly increase in the distance between the Earth and Sun. That's from Cornell University, at least.

So, I don't know, I think I'll trust what you say, rather than what's on the Internet right now. No one's out there with a tape measure, measuring it to the nearest micrometer, I am sure.

K- Yeah, but it's a dynamic surface, it's not a solid surface between the Earth and this Moon. We have a solid surface, we fix it. We've seen that thing, the guy goes out every day measuring the distance between the Moon and the Earth, the left the system with Apollo. They measure, this guy's job is just to measure every day the distance, if it's changed.

R: They put a mirror on the Moon, and they use a laser, to time the laser to find the distance, I think.

K- For the Sun, we have a dynamic. It's a dynamic ?? clothing system.

Any other question?

Q: .. We know plasma has no frequency, but I would like to know if, frequencies create plasma, and if plasma creates frequencies. (2:54). And if so, how can we relate plasma frequencies Soul, STP and physicality?

K- There are two or three things to consider, first of all, in plasma, we don't have frequencies. But in plasma compared to the other plasmatic fields, as it converts itself to one, they have a frequency. The field. The frequency comes when you want to penetrate, as I explained all the time, a dimension.

Between the plasmas we have a frequency, we create that frequency, as a stronger is trying to penetrate, or the weaker is trying to penetrate the stronger, either way you look at it, on the field strength dimension.

But within the plasma, there is no frequency. Because there is no resistance, it's a continuous expansion of flow through the same. Unless you have bits, which gather, they become like clusters, and then the field has to interact with it. Then that creates, that frequency in that part, in that specific position.

It's very, because plasmas are DC. If they interact with another plasma, the friction and penetration strength, we call it, a frequency, exists, otherwise they will just go through it.

This you see in the Enhancement Units, a lot of people come to the Enhancement Units, and then when they come out, they say, "oh, my pain is gone. I couldn't walk, I can walk." For you to change that in one hour, by the world of the medicines it is impossibilities. (2:56).

But if you touch the soul of the cell, then you change it. This is what a lot of Knowledge Seekers, they have not comprehended this. When we have a person who has been in bed for five years, ten years, four years, whatever, or in a wheelchair, and they start walking within two days. You show that to any physiotherapist, and doctor they'll say, this is a fake. Because now, if you have an arm injured in a plaster for six weeks, eight weeks, the arm freezes, and you have to get the joints moving, to get it going. You can't just, if you've got a broken joints and you locked it for six weeks, and as they take the plaster, just open in one go. It doesn't happen. Especially if it's frozen for years and operations (were) done on it.

How come that, we as Knowledge Seekers go through this systems and within a minute we come out of the room, or out of the system, we walk? This is what you think, "oh it helped." Because with the expansion of the Soul, with the enhancement of the soul of the cell, or the body, is the Soul which moves, and the physicality follows.

None of you can explain to me how we got the guy, which has been in bed for years, walking after two weeks, and they walk as if they've never been. Physiotherapist don't accept it, it's impossibility. But it does.

Because again, you enhance the soul of the cell, that changes the physicality, and people walk. People have no pain, they were locked on their own. Because we work with Gans's, and with the structure of the cell of the same strength as the body of the man. (2:58). This is how, they say, "oh, it's all gimmick, or this is a fake." You show me a fake, because I've faced this, many times. Even people don't remember it themselves, they are moving it.

Any other question?

Q: Hello. Mr. Keshe, I'm from Poland. I was already talked with you like two months ago on the Zoom. My question is, now the spaceship is for sale, yes? For 1 million Euro. Yes?
K- .. Yes, it's for 25 million. Yes. And only to governments.
Q: Because you know, I asked about this, you know, another healing machines what you have. But nobody answers from the (KF) Sales department you know? In Poland, there are many people sick, you know. Hospitals here is not so good. I think if there are a couple of machines, even one would be, went to Poland. So, there will be many clinics who wants to buy it. (3:00). Because the people don't know this kind of machine exists, even.

K- The systems are, if you talk about the space systems is 25 million. If you talk about the Enhancement Unit, we put at 1 million. We start putting these out, now that the other development is completed. We only deal with people who have a medical background operation.

Q: The problem is that the people, that they have the money, and they have this medical things, they don't know that this exists, you know, so I asked…
K- It's your job to do it.
Q: Exactly. But, you know, I write to the Sales department, you know, it's like already two weeks ago and nobody answers.

K- Yes, it's the summer holidays, give them a chance. Everybody is somewhere. Sales usually try to. We get this. Some of the sales go to the wrong place. Some of the links are closed, but people still send things, but they are not attended.

But, there is, they opened a much easier way recently, which if you're asking any question. If you go to Telegram at customer service KF, you usually get faster results, answers, than going to the emails, and whatever. It's called @customerservicekf.

Q: Because you know, that people don't want to wait. Okay, I will order first, and after I will get the answer, okay. They will want to come look at it first, how this looks, how it works. (3:02). Because the people don't believe that you said. I even, you know, I was using last month this kind of system with the make people in Poland, you know, I have a small system at home, but the, I use it the bigger system because I have problem with the arm after operation. And even my family was laughing, you know, you go in there, they don't help you, you know. Then after five hours (using the T), you know, around five hours, you know, I can drive a car without any problem, you know. I can lift my hand, you know, my arm and there is more flexibility, you know. So, the system, I know myself, is working, you know, even I using the machines, what they was made from the people what they just learned, you know, from the Foundation, you know.

K- That are a lot of people do these things, a lot of people put. This is why we opened the patents. We lead the Science, we lead the technology in the different ways and the Knowledge Seekers follow or add to it. We had a lady from Poland yesterday in the Enhancement Unit, and when she came out she says, "oh, I came to know the technology

and I helped some Knowledge Seekers in London, and they don't even take a day off work." They keep on building and selling these technologies. Then she showed me what they sell and what they do. These are Knowledge Seekers, one of them is somebody who used to work in our lab. He learned, and he is gone, and part of what he had, he added to, and he's busy with it. That's why we opened the patents for people to add. The way we do research is totally different than the others. That's why we don't open the Enhancement Unit and other things to public.

Q: And I have another question, if it's not a secret. Some of the machine is already in Poland, or still not?
K- No, no, nothing is Poland. (3:04). Whoever tells you is KF (@), is trying to fake it, as we call it.
Q: So, by the way, I sent you my invitation on the Linked. So, if you want to, you can accept it. I am using ..
K- We don't usually respond. Thank you very much.

Any other question?

Q: … I've got an image that we can have a look at here first. The question is, a seeker made this star formation with CO2 reactors. It feels very nice, subtle. The sensation is of being in the clouds, and super relaxed. It may be that a ship, trip has been made, or by being reactors are you pulling your energy? It's probably a loose translation there or something. I'm not quite clear on.

K- What? these are bottles of Gans's under a table, or something, am I correct?

R: Yeah, it says they made a star formation with the CO2 reactors. So, we see there's 1, 2, 3, 4, looks like 5 of them underneath the bed here. So, they seem to say that, it produces a sensation of being in clouds and super relaxed. (3:06). I'm not sure what the question actually is.

K- We had a Knowledge Seeker, he said, he has MaGravs, he has everything, he says that he doesn't feel any of the fields. He said, my friends cone and say, "wow, what an energy, what a thing in this house, blah, blah, blah."

He says, but I don't feel any of it. I said, because you're so physical and you want to be in control of everything. If you accept to receive, you're not in control of, you only control what you want, and you don't want to receive.

A lot of people make these systems around the house, and it has an effect. It actually interacts with the body of the people. It changes people, we've seen change in behavior. So, it depends what level of fields you are, and what it creates in you. It's nice to see things like this.

Next time, I presume this is a dinner table, maybe a working table, from what we see it, could be, with the table, with longs, with the legs or whatever. I wonder if you put a

water on top, and drink it. Will you still need food? You still sit at the table to eat, but you can be fed already from the system.

These will come in the future very soon. You know the old story with the Jewish guy. I translate into the Gans, if you understand it. The Jewish guy, you made a bottle of butter, a bottle of cheese, and honey, and then puts it in the locker. It was a glass locker room, and then locked it. Every morning he opened up the locker, (3:08). and gave a piece of bread to the children, and they rubbed it on the glass, and he said, "oh, you can have honey, and cheese, or honey and butter." That was their food.

Then one day he comes home, he was 2 days from synagogue, and he saw the children rubbing the bread on the locker. He said, "can't you go to school hungry one day? Do you always have to wait for me to open, to rub the glass."

In a way, if you put jars or Gans's of honey, and cheese and butter, that's how you will be feeding yourself. Very soon, it will become as common as ABC when the crisis comes. So, jars like this are, ?? not just for the CO2, add other things to them, then see if it satisfies the other part of the need of the physical life.

Any other question?

Q: .. Is it normal to feel this tornado in both directions? I had two experiences somewhat similar to this tornado. First was an interaction with the Cup of Man, where it felt like a clockwise and counterclockwise rotation. And it felt like my body was swinging. The other time I felt this rotation was the week we replicated the flight tests by phone here in Brazil. So the question is, do we control these fields through the STP or the STM to initiate flight? (3:10). … Still there Mr. Keshe? Your microphones are off.

K- My microphone was off by mistake. What I was trying, talking to myself was that. We see this rocking forward, and backwards, and clockwise, and anti-clockwise with many Knowledge Seekers that goes to the system, especially in the last systems we put up, we hear a lot about it.

R: Stefania talked about her experience of spinning, it was a pretty dramatic.

K- Yeah. This is the beginning of what I was explaining to you, when your system, when you settle down, you understand the work of the Soul and the STP, you will get this.

So, it's not talking just about the tornado and the way, that you create that system for yourself. We have already seen it. The systems are set to do this. The new reactors will create more of this condition of the interaction. The two new flight system, which are getting added to, getting ready for the transmutation, Mobile transmutation and, the what I call, the flights, are totally different, or amalgamation of the knowledge, to do this.

This is what you call, "tornado," or rotation clockwise, anti-clockwise. We've seen this, especially in past two, three weeks sessions with many Knowledge Seekers. I can say

50% of the people in the system, they talk about it when they come out, as they were rocking on like a clockwise and anti-clockwise. Yesterday we had about four people doing this. (3:12).

But, this shows that the technology is very correct. Because of the new setup, we allow the STP to expand, we allow the STM to expand, and the expansion in different strength create that interaction, and tornado, and rocking. And the physicality is too weak to stand such a, what you call it, strong fields. So, it goes with the wind. You become part of it and you rotate. If there are any Knowledge Seekers from yesterday, they can tell you the feeling they had. It is like rocking, and motion is there. I said as a joke, if you're like the Jewish rabbis banging their head against the wall, you know the rock back and forth.

But this shows, that the Soul has been elevated so much. Both, the Soul of the Physicality and Soul of the Man, that you feel this turning, this rotation, this rocking. What we teach is what you will see in reality, as it comes. This is one of the signs to show us that the systems are well tuned, well set to meet the demand of the man in a coming time, for everything.

Any other question?

Q: .. In what you were just saying, a question popped into my mind. (3:14). Is elevation of the Soul, is it an adding to the Soul? Or is it giving the Soul more space to expand?
K- It's a combination of both. But you don't need expansion to increase the Soul strength, for the use of the strength of the Soul.
Q: So, it's an actual giving more to the Soul?
K- It's actually Soul giving more, that the higher strength appears. The more you empty the cup, the more you're receive the cup.

Q: So, it's an expansion then?

K- It doesn't need to be expansion.

Q: Okay. Okay. I think I ..
K- It doesn't need to be expansion.
Q: The more you give, the more you receive?

K- The more you give, you give from the end. So, there is an end increases, to be a higher order, than where it was before. So, you receive a higher order. You operate on a higher order strength. What you give, in a way, ends backwards towards you, comes back to you. So, increases the strength. Container is the same, it's the man who changes the strength of it, through his conduct.

Please, those of you who are, (3:16). what you call it, booking for the Enhancement Unit flight simulation, especially for Moon and Mars, please complete your form as fast as possible. Because we might bring you in, in next few weeks for a pre-test. Or, we might run a pre-test video to prepare for the, what you call it, final assault, for the flight system.

Because we noticed with the other Knowledge Seekers, those who have been with us in the first, two, three weeks and they come back, They have started a process. So, we would like to start that process with you, that it's ready for the next step. It makes it easier for us and for you too, to go through the journey, and allows us to complete the cycle.

So, if you were, you have filled in the form, or you submitted it, but you haven't completed it. Please complete it as fast as possible. We bring you on different days then the Tuesdays, Wednesdays to, in a way, put you through the process of the training, or we train you online, till we have you ready for, what we call, the final takeoff.

Thank you very much for today. Hopefully we'll see how we can do, how we can contribute. Those of you who are going for the, what I call, the combined gas and electric units, please realize we will go on the order received for delivery. Because people are placing orders. As it's produced, as it's completed from January onwards, we deliver on a first come (first serve) basis.
Thank you very much. Hopefully we see you next week. (3:18).

(Quick Index 17p , Transcription Proofing done, Need to do; Key Phrases, Words)
(Auto Transcription by Elias)

Mikhail Gorbachev; Satellite Souls; Russia targeting Germany Central bank of Europe - Hitler failed - Banks succeeded; Summary of transmutation process - must read; New version of Corona - plasma solution - emotions suicide; ;

Topic Index

Mikhail Gorbachev biggest supporter KF - greatest man of peace; Transmutation system being fine tuned for September; Soul Expansion - people cannot see, but they feel and hear and carry out instruction; Held Soul condition outside of system - room became system; Husband & wife met as Souls - first time; T is 100% correct - have elevated and expanded STM; Need 20 KS to become "Satellite Souls" placed around the planet to transmute other Souls to them; Satellite souls will lead to One Planet; Proved the Third Eye is STM; Couple met as Souls in there home - could talk to each other during flight; Urgent development of T - ready for massive energy shortage in Europe as Russia cuts gas pipelines; US using 5Plus1 to get oil from Iran; North African presidents have to pay

bribe to Vatican to be in power; Take Souls as refugees to warmer climate during crisis; KS responsible for Souls who suffer; Third World War is silent economic war; Food shortage in Europe next Fall; More on Gorbachev and fall of Berlin Wall; Can't use system to get away from what you have done wrong; Can't lie to Soul; American Globalists and Germany; Russia targeting Germany because Central Bank of Berlin controls gold of all Europe and Vatican; How Hitler took all Central Banks with the gun - now they surrendered willingly assets to Germany - to be under control of Germany; Microchips limiting economic growth of Europe by China and BRICS; Hidden power of communists - through liberalism; We know everything because it all comes through the top; Five Stackers use of Gans; Possible Blueprint Day next Thursday on combined Gas and Plasma Energy units; New version of Corona - higher strength of emotions - depression and suicide - Plasma solution comes through Iran - soon; RNA is plasma while DNA is matter state manifestation; RNA is like a CD holds information to replicate; Flower of Life is only a symbol for understanding - no meaning in Creation; Each planet has specific emotion - planets just like lifecycle of man; Not everybody will want the T - but will be freely available; KF preparing to receive visitors from the Universe; Visitors come to enjoy physicality, rather than just experiencing fields; We have to mature so we can receive knowledge from other creatures of U; Now many body implants can go through the EU - check with KF; Summary of progressive developments with transmutation process - must read; Transmute each of the souls one at a time P, STP, and STM; Started with hovering chair in 2011; Had to get Belgians out of system to be where we are today; smallest nation battled with Creator - lost; State of Israel will fund T - land of Mohammad - Jesus- Moses; Prerequisite to save Germany - dismantle Belgium; U Community already interacting with earth - and governments - many of you are born out of field interactions - why you know the knowledge;

ENGLISH TRANSCRIPTION

(:12).

K- Yes, thank you very much. Good morning, good day to you, as usual, wherever, and whenever you listen to this is of Knowledge Seekers, obligation Foundation, Spaceship Institute, 448 sessions of, and hopefully we will make it a little bit longer a few more years. Thank you for being with us. And thank you for being part of this development. We had some wonderful trials and tribulations in past few days.

Before we start, as last time, we (acknowledge) the passing one of our beloved teachers. (:14). Many of you don't know, but we lost more than the biggest supporters of the Keshe Foundation (KF) this week, (Mikhail Gorbachev). Of hearing of his passing brought me a lot of pain. He supported the Keshe Foundation in a hidden way. He believed in the peace message of the technology. And in many of the teachings, a few times I always praised his way, his work.

Four or five years ago, he invited me personally to Rome, to a private conference he was giving. I went a couple of Knowledge Seekers to the conference, to meet him. On arriving he sent a private message through his secretary at the conference, due to illness, he could not take up the conference. And he apologized to me. In his way, I told Knowledge Seekers who were with me that, it was a sad occasions. When he was on location, he met with CIA, and exchanging some information, because they knew I would be there.

He understood the message of peace, and he is a man who walked away from conflict. He saw presidential position, not worth if one person is being killed. He always in his messages, and support of the Keshe Foundation, in a very direct way, carried the change has to come through peace and knowledge. (:16). He brought to many of us today what we see in Ukraine as a result of, he brought to millions the freedom of the Eastern Europe. What do you call yourself Romania, Bulgarians, Ukrainian, Armenian, and the rest, is through his wisdom. He was the true man of peace. He was the emblem of, power has no meaning if one loses his life. He tried everything for his nation, but the elements of the work outside, was much bigger than him told.

In calling the Western world, to help with Chernobyl, brought his demise. The Russian saw him, as that, the Russians had to do it themselves, but he knew he does not have the knowledge and technology, and the backing, and the mayhem, which was in 1986, which most of us didn't hear.

If Keshe Foundation looks for a president, who lives by the word of the peace, by the man who put everything ahead of himself, we need to look. We have to look the life of the Russian president. (:18).

In many times, in many occasions, I have praised his work, the way he walked away, from one of the most powerful seats on this planet. The point of accepting and negotiating with the Americans to disarm the nuclear weapon technology. Gorbachev was the true man of peace.

He negotiated from a point of strength, and he negotiated to see the change in position. My condolences goes to his family, I worked with some of them in a very close quarters in the past, and to the nation of Russia. I'm sure his Soul has found its place, and passing an age of 91 this week. He brought the change on every one of us living on this planet today. No man has ever. His action effected the humanity in the 20th century than his, not even Hitler. He was one of the most gentle, peaceful man, and he was the true man of peace. If it was anybody else, but him, we would have seen much of the ?? across Western Europe, and Eastern Europe during the life of … the Russian president, (:20). his Excellency (Mikhail Gorbachev).

Maybe the present world leaders learn from him. Maybe the present Russian head of state, and the American head of state learn from his lifestyle, that no power involved, worth more than one life to be ?? crushed, He stepped down from the Russian President with a lot of grace, within the structure of the soul of the humanity.

I would like to ask for a minute of silence for respect and honor for his life.

(Minute of silence ..) (:22).

Thank you very much, I hope a lot of you understand, one day humanity will realize what the actions of Gorbachev meant to a lot of us. And what is now the situation in Ukraine. If it was him, in his time, he would have had to keep the 15 satellite countries, and Russia together as one state, as USSR. The bloodshed we see in Ukraine today, would have happened inside Russia during his time. As the West was pushing by choosing a fake Pope, John Paul, Polish, to put pressure on him, to create a war situation, to split the nation.

He decided he would split the nation without killing. What we see in Ukraine, he foresaw, but in 15 states, and he decided, he would walk away from it. He did not let one single person to die, because of his pride, to be the president. To stay as the head of the most powerful nation on Earth at the time. (:24).

You got to realize the wisdom of this man, and understand the true man. I had the pleasure to work during communist time, with his regime. And after that with Yeltsin. And whenever I paid a visit to Moscow, to our offices there, or into Amati, I always said, I wish we would have kept Gorbachev. He should have stayed through the time of transition, but at least another 5 or 10 years, and brought the power change. A correct change, not the mayhem we saw.

Many of you don't understand this. You haven't lived there. I lived right through the separation of the USSR. Worked in some of its states, and understand, and especially in past few months, whenever I see the situation, the news from Ukraine, I always said, this is what Gorbachev walked away from.

He did not want to see the bloodshed, destruction of a nation, which he and his predecessors built. You've got to understand. Every building, every success, every agricultural success you see in Ukraine today, is because of the time of the USSR. It was a breadbasket of the Russia. And now it's become the breadbasket of the world. And he was not prepared to see, not a single Ukrainian to die. As he called it, always the greater Russia.

Now you understand how beautiful this man was. (:26). In many occasions, we came across his work. I always, I always said, the greatest man on Earth ever, is him.

He literally lived a life of exile, in his life. I followed him through, after the Russian, what we call, division. On many occasions worked in the background, met on ?? occasions, with his path, his way of work. I worked with the Russia structure when he was in power in 1980s, extensively, with the Russian army. He wanted the best, and we gave him the best. What we could get from West to have, during the Russian time of his presidency.

I saw how Yeltsin destroyed the nation, how he literally stole every piece. We had the offices near the "White House," in Moscow. And a few times I went there, I wish, I would have, I said this many times, never seen this position. If humanity ever builds a statue of peace, a man who walks away from the most powerful seat, not an ordinary president, a nuclear power, a superpower, to become an ordinary man, not to see a bloodshed in his country. The true Nobel Prize peace is symbolic. But the true man of peace, is real, which is Gorbachev.

I hope the new generation one day will understand what he did. And what you see today, how the West deviously planned, (:28). by choosing a fake Pope, a man of no integrity, as John Paul, to become, to put pressure through Poland, on Russia, to bring the church fake, ?? that did not exist that ?? much , to become to the point where he left the position as head of state.

One day humanity will know what the West did. And in all that, as we used to be cooperating and working during the communist time, and after communist time. Many times I discussed this with the, as a very young boy in my early, late, mid 20s. I asked the Russian generals, where we had an office in ?? Poland, why doesn't he do something? Why doesn't he hold on? Doesn't he know, we are all going to be without jobs. And they became all without jobs. Most of the Russian generals under him lost their jobs. Because when he went, everything else went with him.

But symbol of peace has to be the face of Gorbachev. Hopefully, many of us as KS give from our soul to him, as I know he has achieved what he set out. The biggest gift we can give, is elevation of his soul. I hope humanity will realize one of the biggest man, of the race of the man has gone ?? ?? physical D. (:30).

Teaching starts here

The teaching of today is very much interesting, as many of you know, we are working on the transportation and transmutation (T&T). And we were targeting to start the first transmutation sometime in September and onwards. So we are coming into the testing of the what we call, the fine tuning.

It's not that everyone who goes into the system will be the same, reach the same, and do the same. We put people in the framework of the what we call, the flight zone, for different testing, for different purposes, for understanding more in what we really want to do with the situation. How and what we achieved from one to the other.

If you remember, and you go back on the past teachings I always, if you remember, if you have you been with us, over 100 people now been through the process. (:32). Somewhere between a 100 to 150 people, and we need more. Do not stop coming in to add to the knowledge. NASA and other corporations choose and select. It's your soul who has to select you to be there, to add to the knowledge of humanity for what is to come.

It's not just I'm coming there to see something, what happened. I am coming there to add to the knowledge. And every single one of you who came in, has added to our knowledge. In a way, NASA failed last Monday in launching, because of the little value. We are launching humanity into deep space, into a new dimensions. And we cannot fail, because we have already failed as a human race for millions of years, anyway.

Many of you who have been in this room, and went through the system, in one way or another, while you were in the system, or while you were around the system, have had, have explained to us, what happened to you. Did anything happen to you? At the beginning, you're all interested in chairs. What happens in Chair 1, 2, 3, became "musical chairs," who jumps in the next chair, to the next chair. You jump in there and see what comes up? Am I winning the prize.

But in fact, in over past three months of testing, we got rid of these chairs. We haven't got rid of them, they're still there. But still we use them for confirmation of the work, with these seats inside.

Many of you who've been in the system, you were asked, while you're in the system, if you want to go to the Moon, if you want to go to see your family, or uncle, your cousin, your mother, you can do so. And people, as I said, (:34). sitting there, like in the airport waiting for a flight instruction, which gate to go to.

All the time when we talk to people, when they're sitting in their Seats, they hear us. They listen to us, and they say, "yeah, can I go.." They talk to you. But when they come out, we speak to them, (we say,) "can you see us?" They say, no, but we heard you, and we followed. They hear who comes in the room and goes.

In 10 - 20% the first time they say, no reaction, nothing happens to me. But after the second, or third time, the Soul opens up. Because they want to control the physicality. I'm here, but I want to know what's happening. I want to remember everything. So the soul is not there. I'm still in charge, I increase the blood flow, and I encage it tighter.

And 20%, which is now reduced to about 5%, is those who come in, and they want to see what's happening. So in fact, the more blood is going to see the consciousness, and unconsciousness, that stops them from the trip.

So we realize that in the earlier stages, who is actually not going anywhere, are the people who want to be in control, in charge, and they want to see the physicality. They don't trust the Soul to be in charge. I want to see. I want to remember. I want to be there. And zoom, there is no way the soul is going to go (for a trip). If we were shackled with one chain, now you're shackled with 4 chains, it's not gong to go anywhere. You put a dog watch, and 4 dogs on top of it.

We come to the point, that when we talk to most of the people, they listen, we ask them to go to the other unit, they move, they go to the other unit. They do all sorts of things, move everywhere. But when we ask them, says, when we give them instruction. (:36).

But in a very few cases, we ask them, did you see us? They say, no, we don't see you. We just hear the instruction, we follow.

What happens in reality is that, the Soul of the Man (STM) has grown to position of encaging the physicality (P) of the man. The way you dream, you say, and then you remember the dream, because you heard a voice, you did what it said, your physicality of you. You took where you went, whatever.

Now, the physicality hears, but it's got a leg of the soul with it. So it acts, it moves the whole caboodle of the Soul and the P with it, to the next place. In a way, you're in a balloon, but your legs are there on the floor, you walk it, but the balloon has encaged the Soul.

This was important for us to know, because in the point of the transmutation, and the process of the next few weeks. We have been very open. We show people in some cases, what has happened, what it is.

The transmutation systems are already setup to transfer you from one to another. I take them in, and I say, this is the transmutation system. But we have to understand more. What we actually do with you, is we poke you from the system into your soul. And then we transfer the energy across. For us, this effect of this balloon, this Soul expansion, that you hear us, you act, you behave, (:38). was very important to conclude and to understand.

And today, this week's testing on Tuesday, Wednesday, we targeted this. The target was to see what happens to the soul. It was me, and then we talking in the system. What we did this week, we run it a special test. Especially, the last test was that, we got these 4 people into the system at the same time. Four friends, 2 couples, and we maneuvered them, but kept 2 solid in position. We do not let 2 move. But we moved different positions in this data point.

And they were kept in the system for about an hour and a half, together. Then what we did, we asked them to take a chair, sit wherever they like. They sat, and they started talking. I said, please do not talk, very little, but just be together. Then, in a way to hold. You know like you hold the aircrafts in the air, until they are ready to land. After a few minutes, 10 or 15 minutes sitting there, they chat a bit. I could hear them in the control room, they're chatting with each other. I asked them to move to a different seat.

In a way, to hold. I put one in the STP, and one in STM, and in that formation. In a way, I kept them in the fields of the room. And then, (:40). we start, what I call, the extraction, to get them out. And to understand one by one, what is happening, and ask them when they were out, who they choose out of the three, that were left, and the two left to come out next. This was a reason we wanted to see what is happening.

When they came out, we individually spoke with them, when they came out. But if the first one was alone, the second one was with the first one, sitting next to each other. They

all explained what they did, what happened, what failed, whatever. As I said, I'm not interested in your ?? , in your talks, or who you saw on the plane, or whatever, as a flight. I'm interested, how did the jet perform? How was the performance of the aircraft? In its flight time?

They could not see each other - but they could feel - proof of elevation of STM

In this process, we asked every single one of them at the end of the discussion with each one. As there were 4 of them sitting together, did you see each other? Sitting in the center. Or did you feel each other. Or did you hear each other? The answer was clear, "we did not see each other." The husband says, I could feel my wife, I hear my wife, but I knew it's her. So in a first time, a couple has met as a soul. But both be aware of the existence. What you call, a soul mate?

The beauty with this is, this was the confirmation, that the technology of the space travel is 100% correct. (:42). That we expand the STM, and how man will see in the space. This was more or less the beauty, the crown, the jewel in the crown of the testing of past three, four months you've been with us. The beauty of how the two on this side behave, in respect to the two on this side. And concluding, confirming the beauty, the what I call, absolute perfection in the whole structure, that we managed to carry 4 souls together. But not in the dimension (D) of physicality.

This is important for us, that what was interesting, is that the environment of the flight room is what it's supposed to be. We have managed to create a flight system inside the room, not inside the system. Because when they walked out of the system, they should have lost that, what I call, the strength of the field of the soul, and they should have seen each other, (because) they were in an open room.

When you go for lunch, or a dinner, or meeting, or see your family, you see each other. You don't sit in a capsule. But this condition, this situation confirmed to the Keshe Foundation and our research team, that for the first time we can completely confirm, (:44). that we have managed to elevate the STM, to free the STM, that man feels the other, recognizes the other, exactly the way you do in your dream. And he, with it acts, a listens, and does.

So the encagement of the physicality for us, and to the whole structure of the testing, is confirmed. This will have a lot of implications and application in the coming weeks and months for the Keshe Foundation. It means, if we can do this in a satellite scale, anybody can move anywhere, at any time, as they wish. Once we encircle the field energies of this planet. Freedom of One Nation, openness into everything, and understanding the technology of the Creation

I need 10 volunteers today. It doesn't matter if you've been there. For a special test to come in. Go on the website and sign yourself in and put "a special." We know the Souls, which will do this. Doesn't matter if you've been there before or not. This is another test

the way we did with Rick some weeks ago. Go on the website, now, (:46). any of you, and book in for the flight, special flight test. It's a Mobile test.

Then we'll show you what this means. We'll show you what is going to happen. The test yesterday, and Tuesday has brought us such an advancement in the technology, that we should be able to bring transmutation, if everything understood completely before Christmas.

In understanding this, we can bring a lot of changes. The speed, from now on the way we go, depends on the participation of the Knowledge Seekers around the world with us. Not on daily basis, on hourly basis. It's now all of us, who has to push this through, and the implication of this is huge.

The application and completion of this phase within next week is paramount to the work of our flight system, in next few months. (:48). We'll call upon you and your soul to join us for the change. We want to increase this 4 in this room, to 10 people, to 20 people around the world within the next few days.

We want to complete this rapidly. Because after next week a new system will be installed. And before we install that, we want to complete this process. Maybe even by Friday. Maybe even by Monday. We will like to be able to establish the first "Satellite Souls," which will behave like these systems for us in the structure. We want to, not to bring you in, we want to structure, the structure of the satellites through the Souls. In a way, make a house out of this planet, and see how we successfully do.

Next week work of the Keshe Foundation is the final week before we go into flight mode. We call you 10 or 20 people to be present during the testing, which means, (:50). we extend our system beyond the what we call, the boundaries of the flight system. You as your souls, become that satellite system.

You will not need to move. You will not be transmuted. But you'll start. We'll tell you what to do. And when you put in a special system. In a way you become part of the Universal Community. In a way you'll be connected to Universal Council. Because this is the extension as part of. Today, we have Universal Council supporters who work as a supporter to Peter. Now we get the Universal Council supporters by the soul. This is important to me. It's important to the structure, to see, we can use the Soul of the Man who chosen to be, to be as part of this system.

Man launches satellites into space to spread the communication. The work of the Universal Community uses the soul, the energy of the fields of what we call, the structures.

Yesterday test was an amazing achievement, it was amazing to understand it, and to see it. When I told you, go back into the teaching. When you meet another creature from the universe, you don't see them, you feel them, their colors, the information they give you in the level of the Soul, tells you if it is the wife, or the friend. If I am food, or have I

received the food, I was thinking as a human. Am I in danger? Am I given knowledge? (:52). Am I given everything else? I do not see?

For the first time we've proven. You call it, the third eye? The third is the STM, the working of the STM. Would you be able to expand this, in what we've seen yesterday and this week in the center.

On Tuesday, the last test was again a couple. An extremely beautiful, a couple from Austria. And it was amazing how this couple were connected. We asked them, where would you like to go? She said, I want to go to Barcelona. I said to the man, where do you want to go? He said, I want to go, I want to go to New York. We let them loose in the two machines. I changed them from one to another, as part of the same test, because it's part of the process.

When they went, whatever they wanted to do, still in the machines. I usually don't speak open to them. I said to them, talk to each other while you're in that system and decide where both of you want to go. And I left the room. When they came out, I asked normal questions for understanding the expansion of the soul. And both explain what happened to them, what journey they took. I asked them what happened, (:54). When I told you, you can talk to each other and decide where you want to go. She said I wanted to go home, and I asked him to come home with me. And they both experience to go home together. They both went to the house and they enjoyed the house.

It was very strange for them, that they met in their home in the level of the Soul. And they enjoyed it immensely, both of them. The important part of this test for us was, even during the flight, you can talk to each other. We can send people together, as we do with the aircrafts. Now with the agreement of the soul. And strange enough, he didn't go with her to Barcelona. And strange enough, she didn't go with him to New York, because I asked them, they can travel together. I put them on the same system, back end and in the front, and I put them in separately.

The important thing for us was that, the both couple were in the system, and at the time. In a way, if, as a family, you decide to go on a holiday, to a destination, you all will go together, and you all will enjoy it. And then if you totally decide as a family, to manifest the dimension of physicality, you will manifest in D of P. (:56).

The true universal space travel in the dimension of Soul has been established. There's no doubt it's going to be there. The pleasure the couple had on their face, that they went home together. Because she decided, and he agreed to go, is an amazing experience and development in technology.

The same with the 4 people who went through the system yesterday, that they could feel each other in the level of the Soul. And they could be with each other in the level of the soul, and not see each other's P. And when I asked the couple on Tuesday, did you see each other? They said no, you're so beautiful, it was so peaceful. The lady spoke of the headache, because she would not get this round her head.

Now, what we want to do, is to get as many of you into become, that satellite beam, or point, for all of you across this planet. The more we establish in the next day or two, the better we should be able to connect. But be prepared to be available next Tuesday, Wednesday between 10 and six o'clock in the afternoon. 10 in the morning till six o'clock in Central European time.

We take two days of your life. But we expand, we test, before we test for transmutation In a way, (:58). you are on a test seat for 12 or 14 hours next week. Then we want to understand. We mark you on the map, and we want to understand, who, in which way we can satellite in different directions and D.

You've got to realize the progressive development today, is what we collectively as a race will achieve, and collectively what we do together, in Totality with each other and we see how, we collectively work.

I just received a message from Keshe Foundation team, preparing this for next week. I'll read it to you, very simple. It says, we are at the system at Uno, now to prepare the cables for new control, that you will become part of. Our team, our development team in Uno, now installing this system. Our development team has understood the concept of the technology, and is amazing. (1:00). One is KS, 2 is a Knowledge Seekers of the old time, and the rest are ordinary men from different corners of this planet. It's not us. It's all of us irrespective of color, race, and religion who is developing it.

It is part of what we can support. Let me explain to you why we suddenly stopped pushing for this very rapidly. Read the news, by order of his Excellency, the Russian president, Mr. Putin, the Northern line gas to Germany is fully cut off, as of this week. It's like cutting a gas to your home in the winter, and ask you to survive. No cooking gas, no electricity. You look at the bills, which are received in the western world by the homeowners and the businesses. Increase up to 5 to 7 times by Christmas. But this will not solve the problem. If the cut off comes to March next year, the tanks will be empty.

The negotiation with Iran is pushing faster, trying to get as much gas out of Iran, by bending every direction. To the extent that, for the first time the President of United States refuses to speak to Israeli Prime Minister this week. (1:02). Trying to get the West out of the mess, which is done.

But one thing which I see and I have explained, is that Iran is a close ally of Russia. You got to understand a 5th of the states of Russia, till early last century, was Iranian. That's why we have a close tie. Tajikistan, Uzbekistan, Tokistan, - "Stan," means state of Iran, it does not exist in the Russian language. The Iran has close ties with Russia, culturally, blood wise and the rest. Iran will not break the syndicate. Iran ?? just plays. But what's it going to bring, is very simple. Shortage of power, energy in the West.

As I explained to one of our nearest Knowledge Seekers yesterday while we were waiting for the tests, is a few years ago, we saw the "Spring Uprising," which was planned by the

British and carried out in, and started with 20 Italians in North Africa. And then we saw how Syria, and the rest got involved with it. Or the Kings gave the kingdom, control of, to the west. And they stayed as presidents, and a king.

Every president you see in Northern Africa, (1:04). still in the position and the kingdom, they paid the bribe to the Vatican. They're not there just because. Otherwise, they would have had the same destination, and destiny as Syria, and what we saw with the other state. You thought a spring uprising was just in two nations, the rest pay the bribe, what that Vatican asked, and they paid. Kings, and kingdoms, and presidents in other states of Northern Africa, now they pay a ransom to Vatican to stay in power. The Spring Uprising of the what we call, North Africa will become the "Winter Uprising" in Europe with a shortage of gases, and energy, and the prices of the food.

We had refugees from these countries. How many of you have seen the Syrians and others, across, past two decades into Europe? Now the Europeans become refugees, as they'll find the immigrants as a point of weakness to blame for, and then, themselves. And if the gas lines are not opened, the mayhem will be very deep. Keshe Foundation can produce several 100 maybe a few thousand power generators.

But we can make your souls to become refugees and other positions, which is warm, (1:06). during the wintertime. Immigration by the STM, now is an option. And then, would the other ?? nation accept it. I am not a dreamer, I am realistic? And it's a card on the table. And we have to explore every possibility.

How would we accommodate the refugees who came to Europe, to refuge now the Europeans, due to lack of the energy, see them as the enemy. And then, them, themselves running out of the energy of themselves.

It will take five to 10 years to replace any supply from Russia, and other points. Escalation in the prices will get worse. Saudis have bent backwards to stop Iran, to bring a power supply for them, to push the prices higher, that they can control. They have befriended Qatar, who is the sharer of the Iran gas reserves in the Persian Gulf.

Proofed to HERE >>

The politics and geopolitics will play mayehm on us, if we do not finish this transmutation system, that you registered your soul to be in the work. You register your soul to be the satellite. You will pass, you open a passage for millions of European Knowledge Seekers who understood the technology, and take refuge in New Zealand, in Australia, and America, to run away from the mayhem in Europe to come.

This is not a fear mongering. (1:08). This is what the foreign ministers, the ministers of the national security in France, in Germany, and some other states, have already warned us in public. As one nation One Planet, One Race it's our responsibility to look after our German friends. Germans have been devotedly, and heavily supported this project, and the reason for it is very simple. The race is aware of the hardship to come.

I hope we do not get to that point. But as a scientific organization we should be able to transmute millions of souls out of harm. Be it the refugees, who again have to move, become refugees somewhere else, that no one knows where. Or are the Europeans who have no food, no heating, and what do they say to their children. Now you understand the importance of the test yesterday in Enhancement Center.

The more Satellite Souls register as a "special soul." Do it today, not tomorrow. Do it now, not next week, I'll think about it. The faster we can bring this satellite position. We tested the satellite position through Rick's teaching a few weeks ago. Then we can transmute. We can test to bring this about. Europeans have not been refugees since the Second World War, and a lot of the rich ones are already buying their tickets to the other countries for winter holidays away from the energy crisis, which might come up in Europe and will not be there. (1:10). What about the rest?

We got used to Corona, working from home. What do we do when the home is not heated, and it's got the Corona of the energy. And if Corona hits us, the way we have seen it in the past two years, the combination will be literally hot.

So now you understand why we are doing this test. Now you understand why I'm asking you to join us today. Not, tomorrow. I might take up the position tomorrow or Friday. And test we do. When you make that registration. Make sure you put a "special case," which means your soul has chosen you, to be the satellite connection. The same, the machines are in the room. The space of the room has become, where the souls see each other, but the physicality is not there.

We are pushed to the new dimension. And we have the technology. As I always said, mankind will accept my technology, the technology of the Creation and the Creator, not out of the love, but out of the demise of itself.

You got to understand, if you live in different parts of the world, where the gas from Russia has no effect. You're responsible for the souls of those who will be effected by this. As a scientist, I will have everything in my home. I am comfortable, thank you very much. (1:12).

As the Keshe Foundation team, as it hits us, every member of the Keshe Foundation working team will receive generator and gas supply directly, freely from the foundation. It's our obligation to our team. I will not let, not a single to suffer. It's the responsibility of you to decide, in what is going to happen. If you are a German. If you are French, if you are New Zealander, or if you're Australian or you're a Chinese, you have to understand, the time has come for man, through his own mistakes, to move by force, to the next level of peace and understanding.

We are not used to refugees from Europe, except the Jews in the Second World War. Now we have to accept this situation of economical, gas, refugees, which is on us. It's

not, it's going to happen. 2 more gas lines into the West go dismantled. West does not have the energy to burn.

It will come to two points, the production of the Gas units, the way we are introducing, will become obligatory by demand, by need. As I said, nationalize it, the technology belongs to everyone. Or we go through the transmutation, we jump the physicality dimension of limitation

Those of you who understand the immensity of what is on top of us, (1:14). will understand we have entered the "Third World War," the Silent Way, through economical war, without a bullet to be shot. You got to understand the leadership of Russia already knew this will come, when they set it up.

The beauty of it is, you cannot bomb Russia to open their gas, because you bomb your own pipelines. The destruction will be worse. As I said the bending of the church in Moscow, is the same as Mrs. Thatcher said, women are not for bending, or turning. Russia will not turn. And the screw will be tighter and tighter, because the Central Bank of Europe in Berlin, controls the assets, and hold the assets of the Vatican. Now you understand.

We need you to be. We need to be part of, and that's why maybe, you became Knowledge Seekers. Assessment of the Totality. Assessment of reality is, what is with us. We need this to be done. We need this to be ready. If it comes, when it comes, to be able to lift millions of Europeans into other destination, even on the soul level, that they do not suffer. Exactly what Gorbachev did. (1:16).

Presidential being in the point of comfort in Australia, or New Zealand, or in South America, or in US, is not worth the suffering of one person in Western Europe. And we have the technology. We have tested technology. Now you understand why everything is coming to, in the right time, and the right place. A war without a bullet is this. And the economical war and the food control is the worst part.

Keshe Foundation and where we all live in Austria, 20 odd of us, and others we are safe. We'll hand over the systems to our Knowledge Seekers to be safe, no shortage. But the biggest problem is, 80% of us, are immigrants in Austria. Now you can see this game. You have seen the price rises in gas, and energy supply, and the fuel, and the food. And the others are playing a bigger game with many people's lives.

I remember Dr. Ellya Kastova saying, when it comes to save this planet, you have to take all the souls. She was aware of our power and what we do. She said many times, you can't leave the children behind, you have to take everything. And I said, no one will be left to suffer. (1:18). The immigration of the man is not from this planet. Immigration of Man's soul, is from the man himself, on this planet.

In next seven days, it'll be hectic for Knowledge Seekers, those of you who have offered us, on a special basis, to use the strength of your soul for transmutation, and

understanding how we can work it, to create that passage. In a way, I said to the Knowledge Seekers, Knowledge Seekers who come to this point, they become like Schindler, who created a passage for the Jews, thousands of them, through fake passports.

Now you do it as Schindler did, through their own dimension of soul strength ?? I hope we don't see more hardship. I hope we see resolution to this matter. But if not, we have to be ready. And to be sincere, I don't see resolution. Because I know the time for change has come, and it had to come this way.

It had to come through technology, which is not on theology, but in fact of working for man to understand the strength of his Soul, and the purpose of his creation.

In the next week tests in the center, you as Knowledge Seekers will be with us throughout the tests. Those of you who go through the special registration today, or tomorrow. The systems are set for transmutation. Hopefully, as our team says, they're installing it. (1:20). Everything by will of the decision of the soul, and understanding of the humaity, is getting ready for that test, for that change.

Maybe those of you who couldn't come to Austria, now you understand why. You have to stay where you are. And maybe that soul is there to create that change. That change for all of us. It's vital, it's paramount for all of us to be able to complete this process.

We've seen men for centuries going from one nation as a refugee to another. Now we will see that refugees of souls. And then it depends, if they want to manifest themselves, and become part of the society, and not the energies. This is the reality of the time, and place in it's what we kept.

In a way, the passing of Gorbachev could not be more timely, a man of peace, who tried to keep his nation, in a way, away from the destruction of itself, as we see now in Ukraine. But this will come to us as a humanity, as some of us, with a taste of power will like to prove we are more powerful.

In the dimension of understanding. In the D of the division of the fields of this planet, we have the knowledge, and in the coming weeks, as we add to it, we create this Satellite position with all of you who are within the structure of the Keshe Foundation. (1:22). It's your responsibility. Maybe that's why you became KS.

We'll go for a break and we come back, and we'll answer any of your questions, but today you understood the change. You have the Knowledge Seekers, who've been through it, to see the change. I hope, I hope we're on time to do what we want to do, before mayhem hits many of us to come.

As one of the Knowledge Seekers sent me an electricity bill, and as you see in the British way, every month, they're going to increase your gas prices, higher and higher. By January the choice is the heat to freeze, or the food to eat, for me, for you, and for every child in the house? As an ice cream man said in Italy, last year I was paying 900, this

year I'm paying 3,000. Where am I going sell the ice cream? There is no electricity to hold it together. I cannot pay for it.

Let's see if we can pay for us as a human race, to bring that change. As I said, my technology will be accepted out of the fear of demise, not out of its beauty. But when it does, its beautiful will show itself. Rick take a short break and come back and we'll see what we can do. (1:24).

<< BREAK >>> 448 KSW September 1, 2022 (1:29).

R: Here we are back again at the 448 Knowledge Seekers Workshop here on Thursday, September 1 2022. First, I can begin by saying there's a number of comments as tributes to Mikhail Gorbachev. Antonio says, "he is a hero to me and many others, a man who served his people and the world." And there is another couple of comments in the YouTube as well. Truly 777 Paulina says, "truly a great man of peace, God bless Mikhail Gorbachev." And Jefferson says, (1:30). good morning, everyone. Good evening. We lift the soul of Mr. Mikhail Gorbachev and we thank you for your fight for peace and harmony and so on. So just want to say that before we begin here

K- Yes, we are ready, willing and able, I hope. It's a beauty of understanding the work of Gorbachev. I, like many people in my age bracket were touched and lived through this change. When you saw the Berlin Wall coming down, when East Germany opened up, when the other countries opened up. Everything was because of decision of one man. Germany is united today because of his decision, not to fight, not to open a bullet.

And all the people who did that, all the generals were against him. I remember clearly, we had an office in northern Holland at that time in 1980's. Those of you who are Dutch know exactly where this little village is, this little town is. (1:32). Our offices were in the beautiful place, it was like in a small village center square in the "Dog" statue is Dutch. Because we frequently went there to our offices once or twice a week, sometimes. We got to know the locals. I was told that, what this village is known for. This village, somebody in the village killed one of Hitler's officers. And the rest of the village was not prepared to divulge who this man was, because they were there to get rid of the Germans. They knew a man has carried out this atrocity, or they assumed that it was done by a man.

Hitler, doing what his ancestors background did centuries ago. He killed every male creature in this community, man, dog, cat. To set an example, to force the villagers to tell

who it was, because many, killed, all the man, children, boys, all were killed. To set an example.

The strangest thing is, in this offices we worked, we worked with the Russian channels, the Russian military, with Eastern Bloc military. (1:34). Our counterparts were Romanian, Bulgarians, Russians, powerful generals, where we supplied the western goods on the barter basis to the Eastern Bloc. Some of my work is, I always said we took a big risks. What we did, we, the Russians, and the Bulgarians and the Eastern Bloc team working with us, wanted to. There was a time when Russians were asking for, especially elite Russians wanted western goods. Russia would not pay, there was no currency, but they had food. We used to take 330,000 jars of jam, and other things, per week out of Russia and Eastern Bloc, and give them what was the luxury items in the West.

That time was Levi's 501, toiletries, toilet seats, bathroom luxuries, which we had in the West. Special things which they wanted to give. You can imagine, 11 containers a week in the old Eastern trucks. If you remember trucks going from the East, they were pumping and puffing, all the way into England, and taking back, what was agreed to be given back. (1:36). Electrical goods, luxury items. So, I worked very closely. European operation was through my companies. I came very close with this structure of the Communist.

I could see when the turning point came. How the generals and military people we worked with were disappointed. They saw it as that, the Gorbachev sold them out. But Gorbachev had a wisdom, of not seeing what happen in Ukraine today, 30 years ago. I went through the change, I went to the poverty stricken, Russian satellites countries. The trucks, and things, and the carpets, which rolled out of Europe into Russia, Romania, Bulgaria, all the broken cars, damaged cars, which was not worth running, were getting trucked back into East, to give them the car, because they have no car.

Today, in Austria, when we look at the Ukrainians who are coming here as refugees, we see the most latest cars, Porsches, BMWs, Mercedes, ?? and the rest. Half a million, quarter million (dollar) cars. That time, they used to buy the cars for 200 - 300 (currency) crashed up, burned up. No insurance company allowed it to be (means the car was totaled out - no good). They took it back to Ukraine and the others to weld it, to mend it, to glue it together, that they could have something as similar as was the West. Now they ?? reached that ??.

We see the change. As my great grandmother used to say, (1:38). "with my little eyes, I've seen big things." We were pulled into bringing goods, anything from the East communist countries to be able to put things back, food back into the West, into the East countries. Hundreds of thousands of buckets, changing tanks to pianos, and the rest of it. It was part of this work. Part of the work of Gorbachev.

I can write a history book of the change of revolution from ?? to industrialists. As a businessman who was part of this change. I walked on the human shopping streets in Moscow, in Romania, in Kazakhstan, and Uzbekistan. Where people used to hold one

pair of shoes, one shirt on a hanger, whole day, on the streets. Hundreds and thousands of them next to each other, that somebody might buy that shoe, or somebody might buy that shirt. They could give it back to the wholesaler, to have something to eat.

We used to call it "human shop." They had no money to. I walked through the change of the time. In Bucharest I walked into a shoe shop. I witnessed a woman walking in with a shoebox full of money to give to the shopkeeper to buy a pair of shoes. Shoebox of papers, ?? instead of shoebox of a pair of shoes.

It all came because of Gorbachev. Lenin brought a new system, Gorbachev reversed the system. But, Lenin brought with a lot of hardship. (1:40). But Gorbachev brought with not a single bullet shot.

I respected him. In many of the talks I give internationally, I always saluted his courage. I was in Moscow when the Yeltsin, put the tank bullet into the parliament, into the "White House." I've seen the bullets through the hotel room and the mayhem which went in Moscow for the power. But in essence what we see, the problem of today with the gas, what we see with the Ukraine, is what Gorbachev walked away from.

We go back to questions, if there are any questions, please.

Q: Dimitri .. I've got a list of questions. But many of them, if not all of them, can be answered with a yes or no answer, to get through them quickly to allow other people to ask questions, or for you to share any more knowledge, if that's okay. (1:42).
R: Well, we usually restrict about two questions. But it's up to Mr. Keshe, whether he wants to do with that.
K- We answer the same two questions, don't go any further. Otherwise it will be all a one man show.

Q: Two questions. Just bear with me one second. All right, I'll ask the first question. I'll ask the others another time. The first question is related to what you've been discussing this morning. So the question is, can a Knowledge Seekers participate in being .. to help humanity with.
K- In being what? In being what?
Q: In being a Satellite, as you mentioned earlier, in this workshop?
K- Yes, that's why we are asking you. Go there, and register and do it.

Q: But the question is, is it possible for Knowledge Seekers to participate and be a Satellite, even if we don't have any money? I understand the Keshe Foundation needs money.

K- No, no, no, no, it's got nothing to do with the money. We put it up for people to register through it. We get thousands of people just "time wasters." We had a guy who actually came two weeks ago to Linz, forcing us, trying to force us to let him in, because he's a Knowledge Seekers into our factories, and the rest. And it's his right. We had to even tell the hotel people to put him out. He cannot .. Get the police of Austria involved

with maybe. We have a reason we do it this way. You have to understand, we have a structure, we structured things in certain way. (1:44). It's nothing to do with the financial way.

Q: Okay. So with that in mind, can I, I briefly looked on the link that was put up. And at the bottom of that page, it has a fee to pay. So even if I don't have that money to pay, can I register to be a Satellite to help with what's coming?
K- Yes, but we look at everything as it is. We are going to get thousands of people wanting to be Satellites.

The reason we are doing it is a special reason. We're going to link you up with telephone lines. It's not going to be. We're going to get a thousand people to want to be the Satellite. We are doing it especially for a special purpose.

We have a lot of time wasters. We have a bunch of crooks in Belgium and the rest of the Europe. We are monitoring a lot of things, you understand? It's not just, I want to be a satellite, and the rest of it. Even if you pay we refund you, if we don't agree with it. You understand? So, it's nothing to do with that side. It's something we want to manage to control and test. It's not economical, it's being able to do the job, the way we want to do it, and achieved what we have achieved.
Q: Yes, I understand. Thank you very much for that.
K- Thank you very much, thank you very much.

Q: I'll be reading my last question. My second question is, one elevated and taking care of the Totality within its magnetosphere?
K- Pardon, can you repeat?

Q: Yes. Once elevated and (1:46). taking care of the Totality within its magnetosphere, will the STM process and transmute irregular physicality conditions, (i.e. abnormal muscle growth due to injuries that were never attended to)?

K- That depends totally on the Soul itself, not on us. Why did you, what was the purpose? Why did it happen, injuries, or illness or whatever? Why did the Soul accept such a position?

And (do) you want to go to the system, and get away from what you've done wrong? You've got to understand, you can cheat every system, but not this one. Because your Soul is a witness.

Q: The injury came from weight training,
K- It doesn't (matter). It's irrelevant. That is irrelevant. You have to do it yourself.
Q: Alright, thank you very much for answering my questions today.

Q: .. Mr. Keshe, you must be aware that is not Russia and Gas ?? that it's not delivering, it's our government in Germany boycotting the Russian gas, driving prices into insanity. And as always, the Globalists in America profit, as we are now even buying American

fracking gas for insane prices. (1:48). And that is supposed to be a green government we have. I mean, it's obvious the real problem is the general suppression of new technologies. But, it is not right, if you keep saying that Russia is responsible for Germany not having gas. It's our own government moved like puppets on strings following an American Globalist agenda, without regard for the suffering of their own people.

K- Let me. I comment on that in a very simple way. Absolutely simple way. Ukraine is the reason for this position, and Germany wants to stand on the "Free, what we call, Europe." The speed that Ukraine was allowed to join EU, and become part of it in the past few months. Bypassing a lot of other things, and a couple of other Western Blocs, Western countries.

It's partially what you say is correct. But, partially you have to understand, that it's not much for, what you call it, for Germany to turn back and say, "no, we don't do." We'll pay in rubles. It's a power play. You've got to realize, you work on different understanding of different things. We work on understanding of, a totally different global condition. It was not.

The Central Bank of Europe sits in Berlin. Berlin sneezes, the whole of Europe catches cold. That's why Russia has targeted Germany. (1:50). You decided to transfer all your gold reserves, as Europeans, as an EU currency, into Berlin in 2000, prior to 2000. Germans are targeted because they are the central position of Europe. Nothing to do with you.

Germany went through the Second World War, to take control of Europe. When it failed, they set up the EU, European Community. If you look at the Second World War, as Germans, what did Hitler do? Directly went from one Central Bank to another. He drove all the way to Amsterdam, Amsterdam to Brussels, Brussels to Paris, into the Central Banks. Exactly what the British did in North Africa, a few years ago.

When depleting the reserves of the European nations, which Hitler took, taking all of it back into Switzerland, making guns and the rest of it. It didn't work with the gun policy. Now, economical policy, which was the main reason, was there.

And what's the position with EU? If you accept Euro as a currency? In 1990's, you transferred your gold reserve to Berlin, exactly what Hitler did. But this time you did willingly.

So, when you look, it's nothing to do with your government. It has everything to do with the German government. You took over Europe, (1:52). made the EU, and made the Central Bank in Berlin, exactly how it was in 1940's. Now you are the decision makers.

The other side of the coin is, why Russia is pushing to be paid in Rubles. Because now the BRICS is putting pressure on it, it's not just Russia, China is sitting behind it. It's a multitude of positions, and German government, over work in past 40 years, has ?? spoke

themselves as a central government, to win that position. You say the central operation of the EU is Brussels. Brussels has no teeth, if Berlin doesn't pay any money out.

I hope you understand exactly what I'm talking about. It's nothing to do. It's targeting the heart of the operation by the Russians. Secondly, it came, it would've come. In a way, Ukraine is an excuse. They would have found another way to come in. Vatican pushed with it and ?? now it has come.

Look at the situation globally, not just the German situation. You as Germans, we always respected you, we always admired the way you work. But, now you have to see how you've been targeted. Microchips, all the Chips in your cars, now they control the economy of the biggest industry, which is majority of your income. Mercedes, BMW, Volkswagen, Audi and the rest, are limited in production, because they're not receiving enough Chips through the Chinese operation, Taiwan and the rest of it. (1:54). Taiwanese cannot produce the chips, if the Chinese don't supply it.

It's not just oil or gas, which are under pressure. Growth of Western Europe has come to a stagnation, clamping down, to bring down the BRICS and dollars.

In a way, hidden power of communists, in a liberal way is pushing its muscle.

Look at the whole structure. German government has no, what I call, teeth to bite, because you don't have the raw materials. You are a big industrial country, in Western Europe, with all the natural resources sitting outside the continent. Now they're using that natural resource base on their strength, to bring pressure on the whole of Europe. Europe is only .. 10%, less, than world population.

When we offer this alternative gas production to the Germans, and the Austrians, and the rest, they are not interested, because they know it's too late. You can't patch it up. The story comes, what's going happen after Christmas, when there's a shortage of energy. (1:56). Massive shortage of energy.

As I said, I'm Iranian. I get a flight, I land in Tehran, how much gas do you want me? Go on the internet, we were just checking in because of the gas prices, the units we are putting out. The price of a gas, I think, it's less than one cent in Tehran, you can buy.

It's the structure we set up. You've got to realize. I was just sent by one of our Knowledge Seekers, that the Americans have taken over the Russian oil, and a little one says, the head of Lukoil was found, thrown out of the window in the hospital today.

I worked with Lukoil, I worked with Transnef, I know exactly how they operate. I know the top management of the Lukoil and Transnef, I worked with these people. I know their mentality. I know what they plan. The global condition to be superpower has not stopped these people. Before was nuclear, now it's oil and gas.

We'll see the resolution to Iranian situation in next few days. Everything is agreed. But, would that solve the problem. Where do the gas tankers come to take all the gases? Where does rest comes from? (1:58). You see, everybody is befriending everybody to benefit by themselves, in one way or another. How do we see, how do we understand it.

It's not telling you Germans, no. You decided to become the head of what we call, European market, in political and the others. Now you stand at the head, to take, as Nixon said, "the buck stops here." Buck stops with Germany and how you will respond. You are going to be much more cuts will come to Germany. It's not just this, your chips ?? , They planned it for you before. Why Mercedes went to two days working last year? There's not enough chips. If you go to any car company in Europe, before you used to rent a car for two or three months, they won't let you rent a car for more than a month. Because they're not getting enough cars from the car manufacturers in Europe, and they try to give the Japanese cars. Because Europe cannot, manufacturers cannot produce enough cars, they don't have enough chips.

Through economical restrictions and sanctions you shut out the Russian gas, see what they are doing with you, with the rare earth materials, and chemicals, and the pharmaceuticals, which is coming one after another. Europe has been put under pressure, because the Americans is ?? quick.

It's not that you buy gas from Americans at the same price, (2:00) everybody's trying, everybody's getting benefits by this war. Amazingly they're getting benefited, there's a lot of profit in it for those, for these few bullets, few tanks in Ukraine, has a bigger plan behind it for superpowers. You ask our Chinese, have the prices of food tripled, quadrupled in China. As the food has reached beyond the reach of the Chinese. Maybe few luxury items, but the rest, no. China absorbs it.

It's not blaming, it's understanding. It's the main point of what has come, what is the next, next pressure on the Western Europe will be the food. But you have to wait for that one, till next September, October, then you'll understand how bad it's going to be. Have you asked yourself why tomatoes are getting so expensive, which is in ?? the diet in western Europe, from like 99 cents to 3.99, 4.99, to 7.99 Euros. Most of the tomato growers in greenhouses use gas to plant, to create the CO2 to grow, and now the gas is expensive. That's why your tomatoes are expensive, and the rest.

Any other question? (2:02).

R: It's kind of ironic, they're trying to get rid of the CO2, and half the world, in the other half needs it to grow the plants.

K- When we started this Keshe Foundation Technology, near Antwerp, there was a tomato grower, who got to know about our Technology, and became a Knowledge Seekers. He invited me many times to his place, and he showed me how he has bought gas burners inside the greenhouses he had, to grow. He had to burn gas to create CO2 for

tomatoes to grow. He wanted us at that time, to give him a technology that they can replace this, because it was costing too much for gas. That's how I know.

With the trials we've done in different things we learned a lot. I remember speaking to one of the world leaders years ago, he said, you know something. I said what? He said, people ask us how we know about everything, he said, because I'm on the top, everything comes here and I have to see it, and I learn everything. Because then if I learn. If I don't know, I cannot make a decision. It is the same way with the Keshe Foundation. Everything tested on, this done, that done with people, with knowledge seekers with us comes up and we see it, we have a very broad spectrum of the knowledge about everything. So, you see it, it has happened.

Going back into work with Transnef and Lukoil. I've said that many times, I think the documents are still somewhere, if it is not stolen. I am only person we know, I was told, and we know, (2:04). that carry oil contracts in personal name, not company name. With that, I had to deal with Lukoil, with that I had to deal with Trans Naf. I know these companies, to get allocations, to get shipments, to get export licenses out of different positions, to ship through canals. I have huge experiences. Limitation of knowledge is not what was just said. If one day we find the documents we'll show you. You usually buy oil in the name of corporations. I was wealthy enough to carry oil contracts in personal name, I used to buy oil in my name. All the documents contracts are there. I know, I used to know the heads of Lukoil. I met them many times at two, three o'clock in the morning, and TransNaf in the Austrian Hotel in Armati, that was where we used to decide for allocation. These allocations came Russian pipeline, bringing all the Siberian and the mixed oil had to be given by Lukoil from Moscow, how much you could export out of Kazakhstan. They control the economy of the Kazakhstan by the pipeline, and I used to be part of it. When you work with the military leaders, before the revolution, before opening, these people became the next leaders, and we carried on the same friendship.

Any other question? (2:06).

Q: .. it has 7 parts .. I am studying here, but a conceptual doubt came up and I don't know if someone could give me a guideline. The question is, what would deep space be? And for not knowing what it is, I ask, 2- where is it located? 3- How would it be accessed? 4- And what is it in? 5- What is its importance? 6- What does the process of transmutation have to do with it? 7- How does the transmutation allow me to access it? These are all the questions about Deep Space.

K- Cosmologically deep space, we consider anything beyond Solar System, and beyond the Milky Way. It's deep enough. In a way, the distance is far enough. Forget about other galaxies and, what I call, deep space. But anything beyond our Solar System and our Galaxies considered as big as you call it, deep space. The way you live in Brazil, you want to see, to go to America, you decide how far and where you want to go, and ?? Russia. Are you interested to go or not? (2:08). We put many people in the flight systems and they say, we don't want to go anywhere, we just want to be here, and we want to go

see an uncle down the road who passed 10 years ago. So, not everybody wants to go, but now the knowledge and the facilities is there for you, if you want to.

Any other question?

Q: … What should we do with the Five Cups and Universe Cup Gans's? Should they be harvested to produce plasma waters? You said, that the Five Cups, if placed in a hospital would end almost all diseases, and that the Cup of the Universe would also be the Cup of Youth. So, can we make dynamic reactors with the Gans's of these Cups? And if so, what would be the effects?

K- Yes, you can do any combination, anything you'd like to do. That's not a problem. You decide what you want to add to it. The Five Cups, the Cup of Universe is a combination of understanding the Totality of the Creation, it's not just a cup you put in there.

The Five Cup is the man itself. What do you want to do with the man? Those of you who came to original Exhibition Center, in Design Center in Linz, were given an opportunity to go in the structure with the Cup of Life, with the Five stackers. (2:10). People could feel it, but it wasn't done the way it should have been done. But, people used to go in the center and feel it, because you create a dynamic flow between you and the structures. I think there were three of them stacked up and they were connected.

You will see in the, more or less the vertical operation of the system in the coming weeks, in Linz. Two vertical units are commissioned, and are under construction now. That will do a lot of things which the, what you call, the flight enhancement unit is supposed to do. In a more compact, more powerful way, it's set to be done.

We create that dynamism of the different stacks of the fields. Not that it is the same, it depends how you use it, how you understand it, and how you apply it. One of the things which we'll go back to is, (2:12). understanding in how the position will come in applying these Gans's. It doesn't matter if you apply it in a Gans water, you apply it in a dynamic system, you apply it in a gas system, or a liquid system. How we see it will come.

There is something I have to explain. We are trying, hopefully next Thursday, if we succeed, our team are working on it. I know they're capable. Next Thursday will be a Blueprint Day. We'll try, it depends if all the parts and all the things come together. Even though we are supposed to show and release the combined gas energy unit, by January of this year. We have brought the process forward that, we might show it as a Blueprint Day, next week. It could be next Thursday, could be next Friday, could be the following week after it. But, we try to bring, not only that Enhancement Unit, what we talked about this morning. The energy unit to show the combined five kilowatts energy unit and, what we call, the Gas production unit is in the process of getting completely done. We brought it up by three months, as fast as we could to complete it, that we can go for mass production, that we can be by September, October into production. But once, if

everything which was planned for next two or three months brought up forward now, next week we will show the combined gas and energy unit. (2:14).

It only comes by who books first, who receives first the order for a large quantity, past few days. We've said to them very clearly, "who pays," orders don't count. This will be available. If we can go into mass production, depending on the supplies, we'll deliver in September, October. But, we will show it first in the next coming days, that you can see what we're trying to do to run a cooker, that you can see you can cook with the gas with the same machine gives you electric cooker on the other side, and the lights, and the heating and five kilowatts is enough for a house.

So, if our team manages to complete it. We've been pushing it to bring it forward by at least two to three months, we'll show it, we'll do a Blueprint. If you hear a Blueprint Day next week. We will try to show you the combined gas and energy production unit. Because different parts of the system come from different parts of the world, if they arrive, and everything else. The basic has been put together. Then you will see it. But we said, it will be on the. It'll be another option to the, what we call, Western Europeans, in a rapid way to be produced.

Any other question?

Q: … Wang Line, (2:16). So, some Chinese is asking if this 5G signal will activate the grapheme inside the vaccine and cause illness for people?

K- I have no clue about this. I can't tell you anything about it. There is a lot of things talking about these things. But we have no data, and we don't, what do you call it, get involved in it.

You have to understand, the vaccine in China is produced by authorization of the Chinese government and majority is homemade. So, it's implication and application of the technology by your government, if there is such a thing.

R: That was one of the very first things that was banned and censored, was this relationship between 5G, and virus, or vaccine. You are not talk allowed to talk about it even.

K- No, no, there is a. Now we had Knowledge Seekers with us, they are here and with us, I hope in the teaching today. Many of the Knowledge Seekers have been hit with the new version of Corona. Many of them are reporting to us, the effects which we've seen with the others, depression, suicidal condition, and all sort of things. It's the same, we have seen the same pattern in Iran with disease. We've seen the same thing in China, we've seen it in Brazil, we see in Europe. (2:18).

The new version of the Covid touches emotion. It brings you to insanity. It's the increase in the level of the fields, that now has approached the, what we call, the emotion level,

which is higher than the physical condition. This is very clear to us. It's very, we've seen it, a number of Knowledge Seekers have been affected by it and we guided them.

We've seen in Brazil with a mother, with a child of six year old, other Knowledge Seekers asking for the picture of the child. These are all nonsense's. Never depart with a picture of your children to no one, for no reason. We have given our guidelines, our understanding to the family. They say that they have seen a response immediately, with the recovery of the child. I know a lot of you do by goodwill, but it can be other actions to it.

Never give the pictures of your children to no one, to do nothing with. It doesn't matter what level comes in, from the Universal Council, or from anybody else.

The new Corona has hit the family. We saved the family and the child, were affected badly, and it's a very simple process. We have put out in things, and all our advice through the handling of the Corona comes through our beloved friend Dr. ?? in Iran. He puts out as a doctor the solution, which Keshe Foundation has put out for these conditions.

Soon we'll release the new one to Dr. Bararpour from Iran. (2:20) He will explain how to handle the new Corona, as a doctor, he always done. In past few years he's been the spokesman for the Keshe Foundation in the new processes. In next few days Dr. Bararpour will again put out a new, what do you call it, procedure to handle the new Corona with the emotion. We're waiting to see if it gets much deeper, and we have more exact knowledge of how to handle things. I have spoken ?? ?? ?? now Dr. Bararpour to handle the new processes, to handle the new Corona.

Q: By the way, Mr. Keshe, I want to know what's the status of you have mentioned the Italian corporation, with Italian doctors for healing the patient. So, is it ready? When people can. (Italian company will provide KF plasma for specific diseases.)

K- The Italians are supposed to see us next week, or n the 16th, or the week after. We have to see how they come up, because they come up with a new structure, strategy and we have to see how they come up with. Originally was supposed to be one center. Now they have brought in a new ?? backer, with many centers. We have to see what they come up with, and how they settle the situation. But it should be done very shortly. This month we are hoping. We entered negotiation with the Italians in one center, but now there are many more of them, because they work on the license, or ownership of a bigger chain. They want to do this, and now they are bringing their, what I call, the boss. (2:22). Once it's done, it will be ??. But, primarily it's for Fibromyalgia and for other diseases, ?? Italians.

Any other question?

Q: Salomea .. I'd like to pay some tribute to our light for peace, Mr. Gorbachev. I met him in European Parliament in 2009, maybe, if I remember well, with compact ?? of the

word for water. It was a lovely movement, I don't know, manifest for the water of the planet. It was an instrument to make equality and bring the social justice at the planet level. And he was there and not alone. (2:24). He was with many other people involved on this subject, and I was so impressed by him. He didn't talk, he was just there present. And he was, accidental the history, I mean, in the direction of the peace, and we hope that such kind of accident. Will restructure the DNA of the history in the direction of the peace. I'm wondering if you as a genius, you can help humanity to restructure the DNA of the history, to bring eternal peace.

And now, my question is about the relation between the Flower of Life, the DNA and RNA. I would like to understand better this link.

K- Flower of Life is manmade. But the energy transformation in DNA and RNA is a reality of working. In some cases, fields interact and create new conditions. Then we can relate it, or try to relate it to a structure. It's balancing of the fields.

When you speak about RNA or DNA. With the DNA, we speak about the conversion of the energy to a tangible condition. (2:26). With the RNA, we speak about the fields of that structure. When the mankind understand this, we'll see the change in the technology and knowledge of the Creation, of what man tries to understand of it.

So, how the fields structure themselves, leads into how physicality in fields strength, observation of the man will take shape, and what we call it, the DNA. Our desire to create a structure to serve certain purpose, leads for the body to create that structure, but the fields of creating that, needs to be maintained, and kept and can be repeated.

You cannot put every single cell of the man into an egg, or in a sperm, that it will replicate. But it's like, you put all of the music in one CD, and one CD can do all the recording, have all the information in it, which you call, the RNA.

So, RNA and DNA, in a way is the same thing, one in the matter of state, one in plasma or energy state. Where by reduction it becomes a matter state from RNA to DNA. How these position themselves creates how, whatever we want to call it, but usually has a ?? structure, which leads a position of, whatever you call it, a Star Formation. We always call it, that it creates three base, and one control, and sharing altogether. (2:28).

So, flower of life has no meaning in the world of the Creation, it's just manmade explaining a physical observation of it. We don't see our skin in the shape of the flower of life, or our stars shaped as it. It's a dynamic, it take position. It is the explanation of the, what you call, physical manifestation. We try to relate it to something, that we can understand.

But it's not a permanent shape, it's not a, it's how the universe works on it. We don't see everything circulates and what do you call, a star formation in the universe. They take their position. They're in transition to make a stable condition or they reach a stable condition until the stability to come.

Any other question?

Q: Jalal … Mr. Keshe, now I know from your explanation, why I couldn't. You know, I kicked, I shout, I fight for coming to Linz. Since April, I have my all documents it's involved in it.
K- Did you get your passport?
Q: No, I couldn't. I think it is the purpose for me to be there is by what you announced today. I did want to come in physical, and I tried my best, and really, I tried my best. (2:30). But I didn't, I couldn't succeed that neither, maybe one month or two months more, maybe, if everything is okay. But I think the purpose of it as you said, it's that, I join this Mobile (transmutation). And yeah, that will be. I will join that.
K- Just register and complete the process, please. We need 10 to 20 people all across the world to be able to do that.

K- Thank you very much. How is your hidden secret society works?
Q: You know, they are all over the world now. I cannot. I cannot bring them in.
K- Have you managed to put your MaGrav together yet?
Q: Actually, Mr. Keshe. I told you last time, we are in vacation and all the parts of the team they are here and there. But, I am sure, I am now I am back to work, and I am sure next week we will join together. We will start.

R: .. how can an Iranian Knowledge Seeker can register and pay the bill? Do they need to come to Linz, at some point? (2:32).
K- You can come to Linz, or you can stay Mobile. Keshe Foundation Iran has an account, you can pay to Iran account direct. You don't need to pay outside, then get informed by our team in Tehran. The Iranians, let me explain to you something very interesting, which I explained before. Keshe Foundation in Iran has now evolved into one of our main manufacturing and operation systems ??. It's a registered company, you can donate or pay to the Keshe Foundation in Iran, to the accounts. It's on the website of the Iran Keshe Foundation, and they inform us, and then we process it from as a Mobile system. The Iranians cannot, it's hard for them to come to Europe, especially to Linz. But, in Iran, we can go through the process. You do the same thing as the rest do, but you make a contribution to, what we call, Iranian KF. The same as now with Brazil. Those of you who are in Brazil, you want to donate, you donate to Brazilian company of the Keshe Foundation.

The beautiful news is, as we said before, you're now aware, the Keshe Foundation as a space organization in Iran, as a company, is registered. We're waiting for the final announcements of it in the next few days, and allows, the company has been done, completed. Iran, it'll be the first Iranian Space company outside the framework of the government. Now we're doing the same thing in Austria, the same thing is done in US. (2:34). This allows us to transfer space technology in all levels within the Keshe Foundation without the restriction for intellectual rights, and all the other problems which we have with other countries. Because it's all done internally by the same foundation, the same organization.

So, Iran Keshe Space company is been established, and soon the same go through with, what we call, our team in Iran. Our work in Iran on the space program. Once we put everything in order, will be extensively increased. The same with Arizona, the same in Austria, as they're registered organizations, companies and we can go into massive work in that level.

There is something I have to explain, because I had to explain this recently to other Knowledge Seekers. The Keshe Foundation Spaceship Institute is a broad based structure. We work, for example, on the gas units and energy unit. We work on the space technology at the soul level. We work on a space technology at the physical level, what you call, flying system like UFOs and the rest. So, we cover a multitude of different applications of the space technology.

It's not just that you see what you see in Linz, that is the ultimate knowledge. (2:36). But, we still have a structure and work in physical movement, physical motion of materials, or people.

There are two different knowledge's, two different levels of understanding. In the space technology, we still will develop shipments of goods, humans, you don't like to go with the soul, I want to make sure I'm with my soul all the time, I want to go the physical way, I want to receive my TV from the Chinese in Shanghai directly to my house in Tel Aviv, or in New York. I don't want Amazon to be the middleman. So, I want to go from Tehran to Brazil to see my cousin, but I want to be physically there, or I can go different way, I prefer to be 18 hours or 10 hours there, I can do this instantaneously through my soul.

We are providing a broad based knowledge technology. So, to do these things, we need to develop technologies on the energy side, we need to develop technologies on the food side, on the health application, everything we have to consider, and we develop. The more broad based we become, the more aspects of the need .. of the man can be covered.

So, when we speak about the space technology, we're going to do this, it's just what's getting done. Even when you look at the Enhancement Units in Linz, they are physical structures we've built. They are not just talks, you come into a room you sit in the system, (2:38). you apply a system. Now we can get the system physically moved, or we can get this physically, produce energies. It's there, it's of it, has to be done.

So, as the Keshe Foundation we are a broad based knowledge, technology space. People say, if you can do with the Soul, why do you need the air craft? People want to see where they are, what they do. When we proposed the flying car in Ghent University, some 15 years ago, the understanding was, a lot of people don't like to hover, they like to have wheels, that they feel safe on the ground. How much of it is good, if you play a computer game whizzing around? Or would you like to put the grandpa in the backseat and whiz around, and see, and feels happy and come out alive on the other end. This is the extent of the technology, you has to satisfy all needs of the man and Universal Community whatever come.

There are many technologies will come to us, as we encounter with other creatures of the Creation. The magic has just started.

Any other question?

Q: (2:40). How many days should I plan to stay in Linz if I booked for the Vertical Simulation, and if it's okay to go straight to the Vertical Unit if I had not undergone the Enhancement Unit?

K- You don't need to go through anything. If we don't see you prepared to go through the conversion, we put other things in it to be done. We had this with a guy yesterday, and the day before. Very much in control, wanting to be in control of everything. First day he would not let anything go, yesterday was totally different, slightly more. It's the way you try to control the emotion. If some people come in and they just even entering the atmosphere of the building, they start the process. It is how much you control everything yourself, you're the captain.

We haven't advertised for the Vertical situation yet, we're building it. We haven't advertised for anyone using it yet, till we build it complete done, the way we want it, then we advertise for it. We were looking at the center construction yesterday and the day before, where to put these two units. We cannot put them in the flight zone. They have to be outside, but we put them upstairs, do we put them downstairs, there's so much electronics, .. the escalators, the lift, the metal structure around us is too heavy, if we move one person from one system to another, where to place it. (2:42).

We have not advertised for the Vertical system, not yet, till we are ready. It will be in next, I say, four weeks, six week maximum. But, the Enhancement Unit, we had a guy from Australia who booked five sessions last week and this week. The first time he was very excited, the second time was more exciting, whatever was there, the third time he couldn't go any higher. So, he said, I'm going to leave my other two payments for Mobile transportation, now with transmutation, and I will go back to Australia, bring me back from Australia. I said, okay. He left yesterday. Or he is leaving today or tomorrow from Austria. Some people booked three, four sessions, or two sessions. It's all to what you achieve, what you want to achieve.

But, essentially you're there for us to gather data and confirm the work of the system to go to the next level.

Any other question?

Q: .. My question is on electrical plasma, which is different to electricity of today or higher electricity. Has the electrical plasma ever given a name specifically. In some circles it’s referred to as the technology of light.
K- I don't understand. (2:44).

R: Has the electrical plasma been given a name specifically. Electrical plasma is different to electricity of today or higher electricity. I'm not clear what he is talking about. Like electron plasma, perhaps. You'd have to clarify it better Antonio. Perhaps you can reword your question.

Q: .. Happiness to you and all seekers of knowledge. Is the behavior of the Soul image, that you described today, where there is interaction between two entities, but cannot be seen in the protein based view of man, as described in your book as the principle of translucent dark zones?
K- Repeat that.
Q: Is the behavior of the Soul image that you described today, where there is interaction between two entities that cannot be seen and the protein based view of man. I think he means same as described in your book as the principle of translucent dark zones.

K- Translucent lights, not dark zone. It's what we can see, but it's not there.
R: He mentions in the same chapter you describe, (2:46). the science most beautiful insight about colors and bright of dark Universe, not understood by man. Again, maybe we need a little more clarification there.
Q: Each planet has its own specific emotion?
K- I fell out, can you go back? Can you repeat, please?
(repeats everything again)
R: We were talking about Josafa and these translucent zones, dark zones. It goes on to say, in the same chapter you describe the sciences most beautiful insight about colors and brightness of a dark universe not understood by man. Not quite clear to me, it's hard to read it clearly. I think he's talking about that there's more to be seen than through our eyes and more beautiful insights that can be seen that are not part of our protein based viewpoints, perhaps. (2:48). Any case, Danilo has the next question which is, does each planet have its own specific emotion?

K- What do you mean by that? A Planet is like any being, of course he has his own structure.

R: I guess we think of emotions, like certain gods and goddesses are attached, or identified with certain planets. Some of them might have, you know, certain jealous, tendencies, or the goddess of love is Venus, and so on. Are there any particular emotions that you see are attached to any particular planets that way?

K- Yes, they do create their own attraction. They do, yes. A planet is like a human being. He has his own emotion. He has its own anger. He has his own clouds and whatever. He attracts certain type of fields with it. That's why they behave in a specific way.

I've said this before, when you look at the Saturn, and Jupiter, and then you look at the Earth, (2:50). Venus and the rest. It's like a different state of emotion as they go through, and they join the Mother in the center (Sun). The young we see always are very active, they run, they create a lot of mayhem and everything else. We see the Saturn and Jupiter, young ones in the back, they gather everything, they create as many moons, as many

mayhem, and huge explosions of whatever you call on them. Then you see them, as they get older become like Earth, get closer to the final destination. They calm down a bit, and then they have nothing (Mars), and then they go in (to the Sun).

(There's no) difference between the Solar System structure and the life of the man. It's very, a lot of similarities, wanting to own, and control and have everything. As we get older, we give up everything, and we go closer to the final position.

Q: What is abduction? And another question, what are angels? Has Mr. Keshe ever had a physical interaction with such beings?
K- Pardon. (he didn't hear the first part of questions)
Q: He says what are angels, (2:52). and has Mr. Keshe ever had a physical interaction with such beings?

K- No, yeah, the world is full of angels, depends what you call it. Every being ?? has an angel, it depends how you see it, and how you behave it.

Q: .. What is the planned product timeline for the new devices? Now the Energy unit is being released, later the food add-on for replacement of eating with energies, then what is next? How do all these applications align with the bigger picture of universal change, manifesting as the incorporation of the transmutation process, into the Plasmatic common denominator of created races?

K- The jaw of physicality is chewing it, as I call it, and swallowing it, yet. You don't have that in the dimension of the fields. Just because we develop the technologies on the energy, and foods, and the transportation and transportation, would everybody wants to use it and have it? It's there. There's more to come, as we give the freedom.

You've got to realize, if you understood the rest of the teachings over past decades, people from the universe come to Earth, convert their Souls to physicality of the Earth to eat, to chew, to enjoy the pleasures of this planet. (2:54). Man, at the point of today, would like to put on the Soul level to see how far he can go, where he can go. But what happen when you see, when you reach, like the people yesterday? You come in touch with the Soul of your partner for the first time in the room.

What happen when you come in touch with the Soul of a planet, or a star, or an environment that you want to enjoy and manifest in the physical dimension? Then you need to transfer, then you need the facilities to be able to exist according to the strength of your Soul.

We provide that facility, or you provide that facility yourself, if you know what to do. So, excursion and conversion will be everlasting.

What is the use of coming here? They come in shape of race of man, and then enjoying that bite of an apple, or enjoying the smell of the beauty of a flower. Why did you come here for? Is it like the British who go to Spain and always go to the same Fish and Chips

shop. Why do you come to Spain to enjoy the Spanish environment, but your everyday go to the fish and chip shop? English food, English breakfast.

We have a beautiful say in Farsi, (speaks in Farsi), if you want to enjoy and be part of it, take the Totality of it, not just what suits. The job of the Keshe Foundation is that, we provide the technology, the knowledge, both for the man who is here physical, for those who become to physical to enjoy the life of man as man does, or for the man who wants to go out and see what's outside. (2:56).

The Totality of understanding of the process is completion of the process, in every dimension and every direction. When we become short sighted, we only think about our own thing alone. And that's where the problem starts. This is part of the, what I call, for you as Knowledge Seekers to understand the Totality, and in that process, we have to look after everything a man needs, at the point of need.

So, we do not go out of our way to create that condition which is half cooked, (2:58). which is half done, and which is, what I call, not mature. But in the process, we have to create a condition, that it's not any more beneficial only to the human race. The systems we put in operation has to be useful and applicable to all races of the Creation. Even though now you're only interested in the Enhancement Unit, or the Power Unit, or Energy Unit.

We have to create a condition that, when we have the visitors of the universe, when people come here to be part of us, do not go through the hardship of the Man. Everything is prepared for them. It's when you invite a guest. You don't give them what you like, when they don't like to eat it. You prepare everything, you prepare the best of the best for them. This is what we're trying to do.

Prepare man, not only to have a pleasure of what you cook yourself, but it's good enough for the others who come here or, what you call it, used to better standard, or better living than us. So, you've got to understand, that is part of the work of the Keshe Foundation. We are accommodating the Totality of, not only for human race, but the, what we call, the Totality of the race of the man, (3:00). and the races in the space. When we do this, we have to understand exactly what we are doing, the way we are doing it, and the reason we are doing.

We are preparing man and at the same time, not for itself alone, but for guests, that the race will receive by introduction of the new technologies. How fast we can get this done, how fast can we get these people, these beings and man to become at the same level of understanding.

It's no use bringing people who talk about different points of the universe, when our people do not even understand such a point exists, and the possibility of life in these conditions. Then it all becomes magic. This is why when we started this process, we told you, when you come out of the system, we listen to everything what you say, and respect it. Because it's you who has been there, not us. It's you who have explored, about the

dimension of your Soul to expand to that dimension, to that understanding. Doesn't mean that every one of us can. Unless we both decide to expand to the same dimension. (3:02). So, this is part of, this is understanding of, and this is the process of Creation.

We are preparing man to go out, and preparing man to be able to go out, to be part of this, this process of. You only look at yourself. When man goes to space, or deep space, we are looking at, we make everything prepared for man to receive visitors from the deep space. The way they are used to.

You know, nowadays when you go to a restaurant, to a hotel, they have a continental breakfast, and they have an English breakfast in the corner, that if there are English customers here they enjoy their food, or if you want to taste what the English have for breakfast. We are preparing that English corner, as I call it. That when somebody comes, or if you want to taste that, it's there for you to enjoy that.

Now I hope you understood. (3:04). We are not just preparing everything for man to go out, we are preparing man to be able to receive new, what we call, visitors, new dimensions in life. We are here to serve, not to be (served), we are here to serve and not to be served. This is our motto. We are here to serve the creatures of the Creation, not just man to be served, to help himself out of his own manmade disasters, I call it.

Any other question?

Q: .. If someone has a tooth filled with zirconium, can they apply for the Mobile test?
K- Yes, we passed those points. We carry people even, yesterday I was told with the implant, eye implant, or something like that, we had people with a lot of things going through. We put restrictions for us to gain knowledge, that our systems are correct, or we have to change things. Now we have gathered that knowledge. So, there is less and less things to, what you call it, to consider. (3:06).

Q: .. Can the mobile experience go through the phone connected with the internet Wi-Fi, without having the normal 4G cell reception?

K- ??We think so, if we can reach you, we can get you.

A lot of people are asking that there is no entry for the Keshe Foundation (Store) the the new, what we call, what we announced today for the Satellite (Soul). Just use the standard Mobile confirmation, just put your things as a Mobile. We have people who just wrote, we just registered. If you haven't paid, we just ignore it. This is the pattern, the Keshe Foundation system automatically considers it. We only see when it pops out, as this process is completed. So, if you have registered, I've registered, if you haven't completed the payment, it will not come up in our system. So, you have to go through the full process, we only see when the process is complete. So if you just went there and registered, I want to be Soul and travel, and not complete the rest of it, we don't see it on our system coming up.
R: So they have to pay the 2,000 Euro.

K- It’s the standard. We even accepted, the German community knows, and Italians know. We accept people for, what I call, donation from the Keshe Foundation systems. Those are different than when we do things. It's not that we do everything for ??. This week, the German Community collected for one person to go through the test and the Foundation offered parallel, the same to anybody else the German community gives a donation to. (3:08). We work in a very structured way.

It's not that we are all financially positioned, no, because it has to be done the way it is, everything is, has to go. Otherwise, we have everything, give us free. Your knowledge is ours, you have to ?? where can we develop the rest of it. So, the structure is very, very clear. And is set up, with people who made the reservation, and made the reservation, yes. But if it's not complete, that it comes at the end of the system, the process has been completed and can match, we usually don't see it, we don't apply with it.

Use just the Mobile, as I said, they are trying to fix a new entry for Satellite. But use that one (the Mobile test), and put a message on it, "this is for Satellite test." The pop out, we'll see it. I see while I'm talking in the teaching process. We go through a lot of communication in the background with everything from knowledge's or Knowledge Seekers who want to share knowledge instantaneously, with the responses to everything, and to security calls, and everything else. We respond to everything. But, it has to be correct, the way we structured it. Not the way you like to do it.

I can hear you clicking away.
R: Ops. I’m trying to respond to Dimitri in the chat here. Who didn't hear the question that he had about the connection with, between the cell phone, and the internet and so on. (3:10). Your answer was essentially, it didn't matter as long as the connection works. I was just going to say to him, in his case, his connection didn't work. So, perhaps you better think of a different way of doing it. Because then, in the time of crisis where the answer was right there for him, his system failed. So, it's kind of ironic. That's the test, though. Don't want to have it breakdown in the middle of communications, you know, critical communications with Mr. Keshe on how to land on the Moon, or something. or more importantly, how to take off from the Moon.

K- It’s Moore's Law, isn't it. It happens, when you don't expect it to be.

I just received another communication from our team, that they're getting requests from people, I think Antonio from Australia says, I have a mobile, that Mobile test stays Mobile test. The Satellite test is different. If you, they are trying to put up a Satellite test on (the website).

We need the Satellite test as part of our work. It's very urgent, it needs to be done. We test it, because before we go into transmutation, we need this to be completed. We've done that.

Put it this way, as I said to one of our Knowledge Seekers, that we don't want to bring part of you here, we want to bring all of you here.

The system is set in a very beautiful way, maybe as part of the knowledge shared, you understand how the transmutation work with us. When you enter the system, ….. (3:12). When you enter the system. We put you through, what we call, the expansion part, or we originally put in the Chair number 1, chair number 2, chair number 3 and the rest of it. But essentially, was for us to see if we can interact with the physicality, with our system, which the answer within the first day, two days, came, that's okay.

Then we put you through the other systems, the other chairs, to see if we can interact with your Soul, STP. We heard people telling us, the upper half was moving in chair number two, but they felt everything in number three. So by building a system, if you remember, we started with one system on the left, and then we went to the system number two, because we had to gather more information what we had to imply and apply. Then we added more things to number one, and then we changed number two, and we kept on going back and forth. Once we learned something, we added to the other one, and we brought it back, and forward to the other one.

In this process, we brought all these three into one headset, and then this headset on the left, they start getting combination of different connection between the Soul, the Soul of the Physicality, and the Physicality. Then we went to the point that we had no connection with any of them. So, in the system on the left, we came, that we connected the Soul of the Physicality and Soul of the Man, with the physicality of the man, and we watched it. We saw how it performs. Then we eliminated direct use of these systems.

Then, when I explained to you earlier on today, that we put the people on hold, was to keep them in a condition that, (3:14) what you call it, that we don't move them out to the physical condition, but we hold them in the environment, that the Soul is still active, till we want it, in a way we keep it on a hold, standby.

The new structure, which we are asking for you to join us, is more or less, we try to connect all of you to the system. Hopefully by next week, we have the whole system, in a way, that, if I put it in the right way, Physicality, and the STP. What we're trying, and what has been designed now, is that, we simply don't transmute you from one system to the other. What we will do is that, in this system we put you in, we expand, we allow your Soul to expand with your physicality inside it, we do the same with this side. We allow your, in a way, your Soul to overtake your physicality. That's why you sit there for maybe half an hour, 20 minutes, whatever.

Then what we do, we've done it a beautiful way of doing this thing, is that, now we consider (3:16). that with what we experienced yesterday and from our other work, we consider that nothing else exists in the room. This is how the new structure is.

Then what we do is that, we have systems set in the structure to transmute you between these two positions. The system has been built in a structural way, that first of all, we

transmute once the expansion takes place, your Soul into this direction, to the Soul level of the system, if you look at it. When we are satisfied that the Soul has moved and located in 2 positions, with the things we set up. Then we have systems built, it's a virtual systems. Then we go in for the STP. (3:18). We transmute the STP to see if the Soul of the Physicality would like to accept the position. Then when we're happy with this, we go for the ultimate goal of, physicality to be transmuted.

This is important to us that we reach this position. We are not just carrying you "zip" (instantly) across. We carry you in a system where you see, you feel first, the way. This is the reason we asked the couple to go together, where the two Souls went together.

We ask you both, in both chairs. If you have, you're happy to be manifested in the other chair, and if the person of the Soul in the other chair has arrived in the position and the time. Then we switch to the next one. Each stage has his own strength, he has his own technology.

It's taken me 40 years to develop this. There is so many universal systems hidden inside this system. So, when you come in, when you sit in the system, it's when we decide to move things forward.

Then, where do you come as Satellite people. (3:20). You'll be brought into the system. You're in Australia, another person is in New Zealand, another person is in New York. With combination, mobile communication we have with you, with the agreement of the Soul prior to move, we allocate a person they choose. You remember the four sitting in the middle, the husband and wife, they chose, they chose, they want to come to Australia. In this transmutation we open a channel to Australia.

If the person in Australia feels the Soul of the person. Have you arrived? Have we gone to the right destination? This part of the process, we checked with Rick, five weeks ago, four or five weeks ago. No one of you understood what we were doing. But that was the purpose of it. Now we have the Soul in a position, to be in another system, or pre-agreed to be in Australia. We'll return the Soul back to the system. Once we get the confirmation of both Souls in our system, and in Australia confirming, they feel each other, they're aware of each other's presence, the way it happened in the room yesterday. (3:22).

Once we establish this, and see how much we succeed, and how then we can transmute to this position, or back to the original seat, then in the coming time with the Mobile transmutation, we allow the people who go through this system, if they like, we have to adjust our systems. This is a literal physical system which is built, to transmute the Soul of the Physicality, when they can feel each other, they can see each other.

If you came to the Linz Center, we asked you specific questions. Did you see anything? Or did you feel it? All the people in this system has seen it, and felt it. People in this side, they don't see anything, they just feel it, because it's built totally for the Soul level. Then when the person in the room tells us, yes, I can see, I can feel the emotion of the man in Australia, and the man in Australia tells us, I can feel and see the person. Then we ask to

switch to physicality transformation. Then in that position, we should have no one in this room. You physically manifest yourself in Australia.

But the position is with customs and the rest of it, which we have to sort out, which is coming up in October or November. So, what in fact you as Totality are doing is, that's what we need to do. We have proven we can do collectively. (3:24).

So, when it comes to the point of the disaster or whatever, we use these Satellites Souls to move as many as we can. Now you understand the crucial point of wanting and asking for Satellite Mobile situation. Mobile was for you, Satellite is for humanity.

When you're in Australia and you make a call to Austria, how many satellites are used to connect you to? This is the purpose. But, when you are here, you're here, you cannot do anything, it's a physical communication. When you're on the phone, you're on the phone. When you want to go to Australia, how many airports you got to go through, it's the same. Now you understand the process, which from this week on Keshe Foundation is set to do. When you come in to, or past two or three weeks, you have come to the exhibition center, some of you who we saw, we can reach to understand, we took you back in the room and showed you the flight system, set in.

You physically seen the, what I call, "satellite dish" on top of the system. But, many of you are not aware of it, you just get too excited to sit, and you are not aware of what's going on. The transmutation system for this, without a control, has been sitting in there for past three, four weeks. So, when you come into Linz Center, (3:26). it's the process as, in a way, of the Chairs. Why did we build the chairs? We brought you in, you sat in Chair number one, through the physicality, through the STP, through the STM, and then we put you in the system.

When you went into the system you saw the expansion of the Soul, what did you do? What did we do with you? We put you back in system three, then to two, then one. Now, you understand why we did this. It's exactly what we are doing here. We move you, we expand your soul to the dimension of the, what we call, STM, with physicality, and then we move step by step.

In the future, this will be done automatically. In the future developments and production of units, this will be done very much automatically. But now, you see why we had the chairs, why you sat in Chair number one, and two and three. Now, the same knowledge as one, two and three, transfers you back into the Soul, into the dimension of the Soul of the Physicality, and physicality. All this you see now, planned 10 years ago.

The first flight system, the first, what we call, (3:28). transportation system as a "hovering chair," was designed to be shown in Hanover. Now, 2011, we're 2022, 11 years later. We had to get rid of the Belgians in our system to be able for you to get here. For 10 years, 11 years, I've tried to bring this out, but every time Belgians had their "mole" inside the bedroom, the betrayer. Now you have it, now you understand it.

Now you have seen the change. Now, you see when we opened the Enhancement Unit in the Design Center, why the lady called everywhere, produced two terabytes of information to Iranian government to get me executed. For humanity not to reach to this knowledge. They used to do it when I left the bedroom. Now they did it in public. Now you understand why so much was done to stop this technology. You remember they called the center to stop this, this is this, this is that. Now you see the devil. Now you see the prostitute. Now you see the betrayer. Now you understand how much you have paid for, with this knowledge, that would have been here years ago. (3:30). Prostituting our knowledge, their governments to stop that they can carry on with the abuse of the man. This is not, hasn't happened yesterday. Look at the transmutation, look at the flying system, it's all based on the same technology. Now you see it, now you feel it.

The smallest nation in the world went to battle with the Creator, and they lost, and they ?? the rest of it.

One of the prerequisites for saving Germany is dismantling of the state of Belgium. You will see, we'll achieve, whatever we said we'll achieve, we'll achieve. There should be no abuse of ?? left ?? as a king, as an empire, to, for the rest of the humanity to suffer with it. Now you understand what was, has been on the cards. When they knew we are about to release this technology in Linz, two years ago, we saw the mayhem. Personal calls, writing, going to see ambassadors personally, I'm a state of Israel agent and the rest of it.

Keshe Foundation will grow out of the state of Israel's funding, and Foundation and the work, because it's the place where Muhammad became a Prophet, that Jesus came, and where Moses appeared. (3:32). If we deny the truth about our own existence and path of belief, what do we have left to believe?

This technology, what we see, this is what will bring man to the point of glory in the universe, and not the demise, ?? and abuse in the state of Belgium. Now, you understand, why we are so adamant. Why we are so clear and continuous with this process, step by step. That it is understood, it's now not a talk, it's a technology, the knowledge of Creation has been translated to Totality of the knowledge, and this will bring us new dimensions. This will bring us to understanding more of. This will bring us to seeing, understanding, being able to, in a way, communicate with everything, which we need to know, what we need to do.

The whole structure has to be systematic.
Understand the system, the reason for the system.
The process of Creation, (3:34). how life exists, how energy in life is created.
How we create energy in our body.
How we convert energy of the plasma to energy of the heat in our body.
The process, the mechanism that the body of the man has chosen for this process.

If I teach you that, you will throw the whole biology and chemistry of the book of the man into the bin. This is the way we will transmute. This is the way we will transfer. This is the way we will understand this process.

The transmutation has to confirm and has to convert into transportation. This is the where and the point of the maturity. We transmute you to the dimension of the Soul. It's you who has to go through the transfer to physicality. That's why we call it transmutation and transportation. (3:36).

It's you who transfers that, to transport your own STP, to dimension of physicality, in the interaction with the environment of it. Why it's easy for us in the, what we call, our system to do, because we are in the same environment. As we showed yesterday, the people in the center had the Soul touch, not the physical touch. So, it's easy for me to do the first trials in the room, as the environment has been kept the same. That's why we do the transmutation trials in the house.

We do the Soul transmutation to outside, hopefully next week with the Knowledge Seekers. When we do the first trials, we are happy, we understand it, the system responds correctly, we go beyond the boundary. Now you understand how complete this process is. How much has been done in advance, in more. It's taken us two years from the Design Center to today. It has taken us all the knowledge to do. .. (3:38).

We have to understand the condition, we have to understand the process, we have understood the completion of it. We had to find people who could understand to translate, to transfer the technology, to translate it into mechanical system, to translate it into the physical dimension. That needs a lot of understanding.

Any other question?

R: ... There's a couple of comments. I like to read one from Kay in the chat, who says, bless your Soul Mr. Keshe, and all the challenges you've experienced in the past and all to come in the future. May the brightest light shine upon you to pave the way for your divine mission of the permanent world peace.
Another one … (3:40). With your contribution to the humanity in energy, transportation, etc. It is beyond me, that Mr. Keshe hasn't been recognized as the greatest scientist of all time.

Q: .. My question is, with regards to traveling in space, you mentioned that Souls travel in sets of four within the same magnetosphere. Could you explain a little bit about that, please?
K- What do you mean exactly?
Q: Well, you mentioned that within the magnetosphere of a spaceship, (3:42). whether it be Soul manifestation or a physical spaceship, I'm not sure what you're referring to, you mentioned that there is the Souls travel 4 at time, there's 4 of them.

K- In this test there is a 4. We find the combination of the 4 as one of the best. Because not all the Souls are the same, and you go back to the Star Formation. That's the reason. That's why in the flight system, we put 4 seats. We don't look at the position of the seats,

we look at the structure of the, what you call, the field dimension. That's what is important.

Q: Just quickly, in our lifetimes will we see universal family openly visiting and interacting with humans within the dimension of Blue Planet Earth?
K- They've been here in the lifetime of your forefathers, you've been blind to it.
Q: But in terms of the Totality of humanity, there's not been.

K- In Totality, has been a lot of interactions, it's daily interactions. Some governments are fully aware of these interactions. It's not. It's hidden. (3:44). It's like the guy said, why the Keshe Foundation is not known? They let you know what they want you to know.

They are amongst us. Some of your listeners are part of them, born out of their interactions, are partially there, in your, you know the knowledge, and you are visitors.

It's not hidden. To you, it may sound strange, but a lot of. I explained this to one of my children some times ago. I explain it to you if you understand it. In the England, when you go to Liverpool you see different nationalities, especially a lot of Chinese. And now we think that Chinese are here, just now. But the Chinese have been in Liverpool for centuries. But they're stuck in the back corner of that world.

If you go to Italy it's about the same. In Italy we have different nationalities making the nation of Italy, as the Romans brought from different parts of the world. But we've been blind to it, we call them all Italians. (3:46). Chinese in Liverpool, we can separate them, because of the colors of their face and everything else. But Italians, you can't say, to you they're all Italians just because ?? speak to them. But look into their face. They're not Italians. Look at their features. They're not Italian. But we have accepted them Italians.

There're 200 races, as part of the nation of today's Italy. Romans brought villages back with them. To become part of them, to understand them, and brought with them the souvenirs, now they have become Italians. We don't know the difference, we just go to Italy.

It's the same with the people from the Universe, they've been amongst us so much, they've changed the color of the yellow, black, white and every other color, they're so entangled in us, that we don't even see them ?? in us. But if you look ?? now. Most probably, if you've been around your city in past seven days, you'll come across quite a few. Maybe you have a ??.

So, when you speak this way, it means you haven't understood. Earth is not isolated. It's a common ground for the rest of the life, the rest of the universe, where the people come and go, and enjoy its beauty. It's us who has been ignorant to the truth, (3:48). we chose to be ignorant.

Thank you very much for today.

If there's no other question, we bring it to an end. As I said, please go and register as a Satellite member. We need it to do the process in the coming weeks, next two or three weeks. We might call up on you for a long time, as we develop. Somebody comes in and wants to go to Australia, we need somebody in Australia, somebody comes in and says, I would like to go, like yesterday, the husband wanted to go to New York and the wife to Spain. We need somebody in Spain, as much as we need somebody in New York. It'll be a busy time for your Soul. Even you might not be aware of it in the physical dimension.

I pay my tribute to His Excellency President Gorbachev. We hope, we know your Soul has found a new dimension, higher than the Pope, who brought him down. Even though he's still a cleaner in the bottom of the pits of the universe.

Thank you very much for today, and thank you for being with us to share knowledge.

448 KSW September 1, 2022 (English Transcription)

END

449th Knowledge Seekers Workshop; September 8, 2022

(Quick Index 23p; Intro, Topic, Transcription, Proofed Need to; Key Phrases, Words)
(Auto transcription from Elias)

Teachings of Emotions; feeling sound through Soul - Green tea; Body both Vacuum and Centrifuge conditions; Teaching on multiple vacuums inside each other - Solar System; Why Bones in center; Creating perfect Children; Actions of forefathers effects children; Transmutation by agreement only; One Nation policy; Cruise ship for One Nation; Video of Vineyard - 150% increase in harvest

ENGLISH TRANSCRIPTION

(:11).

K- Yes, good morning, good day to as usual, wherever whenever you listen to this series of Knowledge Seekers up to Keshe Foundation. We welcome back. And hopefully we'll learn a little bit more as usual, from each other and together. Today, (:12). we are going to go in a deeper understanding of transformation and transmutation. How do we transfer and how we transmute. This is, in a way, important to understand, as next week, we start the transmutation systems. Hopefully our team will put the last pieces together, which is getting done, all the cabling is done, it's just control panel to be added.

Then we attempt, we attempt to move man, with the new understanding of the world of Creation. Would we succeed, and how much we'll succeed, I'm sure will depend a lot on our understanding of Totality, and how we set our systems, and how willing the passengers are. People might come in with the willingness, that they want to be the first people to be tested for transportation from one system to another. But the soul says, "no, no," whatever you do, I'm not moving. Because I'm not ready. Because you are not ready, because whatever reason.

So, we will look into the Totality of the structure. We have set out to break new grounds and as usual, everything is much, has been step by step development. For all of us, we started about four months, three months ago with the first systems, with the first chairs and then we went from one chair to another, to see if the system is correct, and we amalgamated the, connected the whole three together, to understanding of. Then we started the new system with the expansion of the Soul, and expansion of the Soul of the Physicality (STP). And now we go with the transmutation.

Our very first trials will be in a way, understanding the work of our own system, to understand how they work. (:14). How do they actually respond. Does one receive and not want to give. We try to understand this in a deeper way, step by step. Up to now we used to take off 10 to 12 people a day into it. Now we are limiting it to four or five, we have to understand. We have to see if we can transmute the Soul first.

The first group of people will not see themselves by going from one (system) to another. But we try to see if they see, the dimension (D) of the feeling of the Soul from one system to another. This might take us a few days, it might take us a few weeks. But when we master the art of the transmutation of the Soul, in a way, we decide, with you, what you are going to dream, and all of you will have one dream. The chair on the other side and that's it.

You're not going to see the grandfather, you're not going to see the Moon, you are not going to Mars. Your aim is, "I want to be on that seat." Or I want to see, if I go on that seat, can I see me physically on this seat. Can I feel the essence of myself, on the seat on the other system.

We've seen people talk about having visualization, and some having the feel of the visualization. So it's not as easy as it will be. It's not just a valve of the gas system, as we saw with NASA last week, after spending $30 billion. A little valve has caused a problem, and they had to abandon, and god knows when it will be working. This time it's the dimension of the field of the Soul of the Man (STM). This time it's how you as a captain, decide to take off or not. (:16). It's not in our hands anymore.

Go back to the first time we announced this new systems. We said you're a captain of your own soul, you're a captain of the decision, you are the one who decides where to go. And if you noticed in the fields, in the past few weeks, we kept to this criteria. We come to you and we tell you, that would you like to take your plane? Would you like to go somewhere? Would you be able to decide. And then it's you who decides, I want to see

the grandma. I go and see I want to fly to the Moon, because I wanted to go. Some others come in with a different criteria.

Yesterday, for the first time, we had the most amazing experience on the flight system (FS). We had a couple, they've been together for 35 years, they know who I am. I'm sure they're listening. And the strangest thing with them is, we didn't know. We do not know who comes in. They've been Knowledge Seekers for two or three years. The lady is Russian, and the gentleman is German. When they came out of the system, I said, where did it go? His aim wasn't to go to Moon. His aim wasn't to go to Mars. His aim wasn't to see the uncle or the cousin. They both decided before entering the system. Or they discussed what they're going to do. To see the Russian version of Jesus Christ. Or what we call, in the name of Christ. (:18). And that was something. That's all they wanted.

And both, because they made the decision together, achieved it. One in the intention and dimension of the light, recognizing, and one in the D of visualization, as a field. This is very, and vital point for us. Which means from now on, what was the whole thing, which we decided with the other couples we had.

If you remember the week before, we sent them to go where they want and the couple went home. They wanted to go home and the wife took the husband home. So we could see that, when two souls agree as a soul mate, they do the things the same way in the dimension of the evolution and transmutation. And this couple decided before they come, they didn't want to go anywhere. They wanted to see the same man, the same thing.

And this gives us opportunity to explore what we call, collective transmutation. A family wants to go to Moon, we can now, if the sincerity of the whole three or four members of family, is to go to the Moon, they go to the Moon. If the little girl wants to go to the playground, and I don't want to go to the Moon, but I going to the Moon because the parents want to go, she'll be left behind. Because it's not to her satisfaction.

So it comes to the point of we cannot lie, and it has to be collective. It has to be the same thing. So when we put you into these systems from next week, you have to want to sincerely, to be transmuted to the other system.

The beauty with this couple, most probably they'll be the first couple, (:20). which we land on the Moon, because of the what I call, collective understanding of the work of the Soul, with being with each other's soul ?? bound, as I told them. We are looking for those of you who registered to go to the Moon or to Mars, but we are looking for those who can give us the indication of it. The beauty of this couple we put to the Moon. So in a way, we have found our first couple, that will be landed on the Moon, through the system, when we start hopefully. Is that they can see each other, they can feel each other, they can tell us what they see of each other, what they feel, how they look. As we discussed yesterday, we give them a camera. Or do they come back and we register the emotion in a different D.

Remember, the man could never say how the other man looks, till they find out a permanent ?? , when they start ?? doing your painting. We evaluated our understanding and we went further, we came out with the still pictures, and then we made the movies, and now the hologram.

New way of making photos without camera - through dimension of Soul

There is another dimension in transformation of the knowledge and the pictures, in a way, what I see, I transfer to you through the soul, you see what I see. There is no need for a camera, there is no need for anybody else, if I don't want you to see, to see.

This new dimension of visualization is unknown to man. But through the system we set up, and the way it is, is possible. In a way, when they come, if they don't want you to see the picture they saw, you don't see. If they want me to see it, I see it.

When you talk between the two of them, they tell you look up, (:22). both see the same pictures, as I see. The new transportation pictures and understanding is at the moment, unknown to man. At the moment is a technology, which we gradually introduce in the coming time.

So with this couple, when we land them on the Moon, and we bring with our picture into operation, that they can take pictures. But we teach them how to use the dimension of the Soul to memorize, to remember, and the beauty with this is, nothing will be hidden. You see the full dimension with the emotion of the picture, which at the moment, you don't carry that emotion, you see a video, you see the laughter, you don't know what's happening on the other side, who's making this person to laugh.

But now you see everything, because you go through the dimension of emotion, the sight of emotion, the emotion of the laughter. The emotion of the what we call, sound, everything together, will be transmuted from one to another.

So what's going to happen in the coming days now that yesterday was the final stage of our development. We were looking before transmutation is, that we want those who come. Maybe the first 10 of you will not transmute, because your soul is not there to do it. You will physically want to do it. So we'll see how much we can. Because we cannot force you. This is the beauty of this new technology.

As I said, You cannot force no one to do anything. But you can put it, as we say in English, on the plate, and if they like, they can take it. (:24). The new transmutation system opens a new life, a new understanding. It'll define, it will explain a lot of things that we as a human race never understood in the world of Creation.

(Noise of liquid here >>>) What does this mean? You heard a noise I deliberately made in the background. And I muted it.

You heard I poured a liquid, that's all you know. But with the new understanding of transmutation, as we carry the essence of the soul of the noise, you will know if it was a tea, if it's sweetened, the color of it, what kind of tea? Was it an orange juice Was it an apple juice? Was it sweetened apple juice? Was it a coffee, decaf or (regular)? Because this is the new level of the understanding of the emotion of the Totality, which the new cycle of knowledge will open to man.

You cannot say, "Oh, what am I drinking?" I'm drinking coffee, but in fact, you are having an orange juice. Those of you who are alcoholic, you're in a bigger problem, you can't dilute whiskey in coke, and said, Darling, I'm just having a glass of coke. Because darling, will feel the essence of the vodka, the gene, what you put in. And then as I said, everything in this new dimension is open to Totality. You cannot drive down the road full of alcohol and say, "officer, I had nothing." (:26). Sorry, the officer can smell anything you had, he doesn't need a meter, because he works on a different dimension.

So, you will see the changes which will come. This is what is to hit us all. And with it, will come the same. The universal energy system, which we will introduce in the coming time, all of you will receive from it, the energy, the food, everything else, which you need. Correction of miss-corrections, misguided works, and what man does to himself, all will be a thing of the past.

Peace will come on this planet, when the T of the Creation is understood, through understanding the knowledge of the Creation, and not by what I call, magic. Not by what it might be, what could be.

Next week, when we start the transmutation of the system, it will be fantastic to see if people can smell themselves from one machine to the other. What happens when we give you perfume to the dimension of physicality, does a soul smell, in the other machine.

In so many ways, a new era in the Space Technology, Space Technology of the man to travel in the deep space has begun. We have closed one side, one section of what we call, testing, that, from understanding of it, of building of it, we allow the Totality to take shape in a given D. As I said to our design people this morning, because sometimes they forget, is that we want our systems at the moment, only to be for human race. (:28). The system, when it's sent up, carries a specific system, that conditions, Earth condition.

It's beautiful to see other creatures of the U. But it'll be beautiful to see if we can handle it. If are own structure responses to the Totality. There's a very big question, what are we going to do with those who are from other dimensions of the Universe, and they enter the system. In a way, with the new setting, with placing of the conditions of the Earth into the parameters, we will know which one of you, who of you, are not from this planet. Even though you feel, you touch, you eat, you create children in the dimension of humanity.

This will open a new dimension. This will open for us to accept that we are part of the Universal Community and they're amongst us. We respect it and we have to honor it. It's not to stigmatize it's to respect and to understand.

In so many ways, the new flight system, which coming into operation, will tell us you are from such a planet, you want to go to Moon, we have to change our system to you, that you have the same pleasure as a man on earth. At the same time, we have to understand how we bring these positions into what we call, working. (:30).

Yesterday, I asked one of our team, who does all our purchasing, can you get me a laser beam machine. He goes off, comes back, he says, this is what I can get, a little laser in the hand. I said, my dear, I want a laser, (that is powerful enough, that I can point at the Moon, and I can send a man with it, down the line and know where he lands. Till he lands. ??

In a way attachment to the process. We have already started the process of the landing on the Moon. It's not that it's going to come. We have to prepare, our systems have to be set. One of the easiest way on Earth, I'll give you a mobile phone, zoom, I can take you across.

But for the time being, till our people get to know, and we can find them and bring them back. This is the easiest way to do. In understanding the Totality, and the beauty with testing with the Moon, is the Moon has a fixed feature positions towards earth. I don't land you on the crater, and I'll pick you up on the rocks somewhere else. Where I land you, I can bring you back.

That's why we said we do the dimension of earth, to the Moon. Because this way, we can check a lot of things. Now you understand the transportation and transmutation system, which is kicking in, is far reaching, and will have much more effect. It'll have new dimensions, it'll have new understanding. It will create a condition of the detachment. It creates a condition for us as a research team, to explore the limits of the knowledge of the Creation. (:32).

I just had a sip of the drink. You as Knowledge Seekers heard the noise. You've been set to do this. Some of you who came to the center, you should feel it. I'll do it again. You feel what the sip is, what the drink is? How does it taste? What kind of drink it is. And what's the emotion, which is created by, within me, that the knowledge is transferred to you. As you are part of the structure of Universal Community through D of the fields of the universe.

Just listen, and try to see. We did a test with Rick a few weeks ago. This is part of the same test, but in the different D. Just listen. And then don't think, feel through the Soul, what it is. Write it down. And then I come back to it later on. Then you understand what the difference is. Not, "Oh, I guessed was right." Write it down, that you get confidence in your own emotion. You understand later on, what you have to adjust, what was missing? And are you connected to the Soul.

I open my soul to the whole dimension of the Creation. Now you try to see if you're connected.

(takes of sip of his drink >>>)

I give you a clue, it's a combination of emotion of different nations, different cultures. You got to remember, (:34). I've traveled the span of the universe, I've traveled the span of this Earth, and I've chosen the best of the best, when it comes to purchase of life. And this drink, the drink I drink, has to give me pleasure. It's something that allows me to transfer my emotion.

The way, it's like a thirst, you're thirsty. We talked about it many times before. What happens when you touch that first, first drop of water in your mouth and you're thirst gets satisfied. Because water beyond entering, before entering your mouth is in a state of the matter. The minute it enters your mouth, your body, it's in the state of the Gans. It's in the state of the fields of the universe. And that's why that field travels the whole cell structure of the body of the man. The body next to you does not feel your thirst. It's only you who feels it. And when you take that first sip, every cell is satisfied.

So, we have to understand this. Last week I went through deliberately, in a different way. Asked about the centrifuge. How we do. How we work. How we look at the centrifuge. Many scientists have not understood. In a way, I referred to the centrifuge when we asked for the position of the Earth in respect to the Sun. There is no way, that the Earth is moving away from the center. (:36). And every indication of the knowledge is that, the Earth is moving to the center, if you understand the process of the Creation in a true way. Now, I explain to you why the scientists are 100% wrong.

First of all, if you just look at the physical position of the Earth and the Sun, yes, it could be moving away, whatever. But there are two major factors, which tells you, that they are getting pulled into the Sun. First factor, Earth is not stationary, it's a dynamic, and it's at the end of the string rotating around the Sun. So it's in a centrifuge condition. In a centrifuge condition, the heaviest always goes to the furthest out, and the lightest stays closer, to the center of the force.

Then, the major point, that no scientists, no scientific structure ever considered, Earth is in a vacuum condition of the Solar System. And the Solar System itself is in a higher density strength of the galaxy, and there on. So, the Earth is in two conditions. One is on the centrifuge. And secondly, on the vacuum.

What do we do in a vacuum? In a vacuum system, instead of creating centrifuge rotation, we create vacuum, and we get the same response. When you have a balloon, when you blow it, the lightest, or on Earth the lightest gases go further up. In the vacuum condition, the heaviest goes up, the lightest come to the center. (:38).

And this applies the same in reverse, with the Gans operation. Where Gans's is our amalgamation of the fields forces. This is why you see separation when you put Gans's on top of each other. Have you ever bought these colored sands, that you put them one

sand over the other, and then you see they are separated. You can see which sand is where, and what color is where, and how they are.

The same thing happens with you. When you put Gans's together. You create through the vacuum, that condition of separation of the field forces.

But if you look in a dimension of the plasmatic condition, the stronger fields, is in the center, and the weaker outside in the D of magnetical (M). But what Knowledge Seekers have not understood on the other hand, the gravitational (G) it must be heavier, stronger than the M, that fines its path to the center. This is how your Soul matures to reach the condition of separation from the physicality.

How do we understand all dimensions, and working within the dimensions from each other? How do we separate understanding of the centrifuge, working within the what we call, the vacuum, (:40). and then on top of it, understanding plasmatic field forces, which forces the condition of the stronger field to be in the center.

They all are dependent on the condition of the manifestation. They are all conditioned of understanding, the work, the interaction of the fields of the universe. Sometimes matter state in the vacuum condition takes the center place, because we did it heights, the strength of the field of the Gans plasma.

You see that in the bone structure of the man. The body of the man is a total vacuum, absolute total vacuum, and the condition of the vacuum, inside the body man is even higher than outside, space level. In the tests, during our work in Bruges, in Belgium, we tested this. We created a condition of different vacuum strength, and we've seen how it operates. We create condition better than atmospheric, beyond in the space level, we go to minus 13 - 14, if we push it. Where atmospheric, cosmic atmospheric is concerned, around about 12. And we see the performance.

But what is strange, man has not understood in Totality, is how come, if by the law of the vacuum of the body of the man, the bone is in the center. Because every other GANS is attached to it, your muscles, your lip, your skin is all connected. It doesn't work, (:42). it doesn't come into understanding of essence of Creation.

But there is a vacuum condition inside another vacuum condition, which dictates, that the heaviest goes to outside. What is this vacuum condition? But this vacuum condition to create that field forces, changes into the ray of light condition, which is an amalgamation and transformation between one to the other.

This is why your bones are the shape they are. They are spherical, in essence of the field, but they are cylindrical in essence of manifestation. Now, you understand why your bones has such a structure. Because you missed a very important field forces, which sits within it, which is your bone marrow. Bone morrow creates that condition, creates a field rotation, and that is why your body can suck blood out of the inner ends of the cell, and the lymph comes in through it.

Our scientists, our man of medicine are ignorant in Totality of the science of the Creation, and that is why you have problems with the immune system. Because they have not understood you have a vacuum, within a vacuum, you have a centrifuge system of the field forces, not in the matter state, and then it leads to the Creation of the body of the man.

The biggest problem. The most important part of the whole structure of the building of a body of the man, and you all talk about it, you see it in every living cell, doesn't matter vertical or horizontal. (:44). Why, why do you have a calcium in every cell in the body of the man. And what does the rotation of the Fe as a blood, with this centrifuge system in a solid base, brings to you.

What you have in the body of the man, in the structure, in the bone structure with the center of the bone marrow creating high field levels, that the bone becomes the centrifuge ?? out of body ?? weight and then in the matter state it becomes itself, the pinpoint of the holding on to the next vacuum condition, which is the muscle tissue, on the skin of the man. Then you understand how life is created.

We need to understand this. We have to understand this. Otherwise we cannot create life in other dimensions. We cannot go through the transmutation through the field level. Then in another dimension, you get your brain, and your foot, and your skull will be solid calcium. Because you made a slight error in understanding the process of the Creation.

These are all part of the structure of what we will go through, from next week in the Enhancement system. Understanding the true process of the Creation, and not with the problems and understanding the process of what's going on today, with many of us, in the dimension of the health, and the rest of it.

If you have understood, if you been across with us, and seen people who have been paralyzed, people who have paraplegic, people who had no movement of part of the body, and within days or hours, they start moving. How many times you used Gans's where it was frozen body, (:46). and then the pain is gone. Because you transform the matter state fields, which is converting to you, to the emotion, to the dimension of the fields of the universe, within the universe of your body.

Understanding the process of Creation is 90% of the problem of the man, even the most intelligent scientists on this planet. They are single minded, in the sight of the knowledge they've been educated, and if they understand a little bit more of, they become arrogant, and they don't understand the rest of it.

When you become Knowledge Seekers, you have to understand the Totality of the process of the plasma, Physics, Chemistry and Biology, and then the essence of emotion, and then the essence of the soul, which is the plasma of itself, before it becomes again, the cycle of the matter state.

If you push the two extremes, you come back to the same. How much you have not understood. If you increase the alkalinity so high, it becomes acidic. If you give enough, you become a taker. If you create such a huge potential, you become from the voltage to a current, and this is what no man has understood.

Now, in the next process of regeneration of the teachings of the Space Technology, you will understand the emotion of the cycle of the life. You don't say. darling, I feel what you're going through, for sure, you will feel exactly what he or she is going through, because you lock into the emotion of the Soul. And you don't say, "no, you don't understand my pain." My darling, I've connected to you to the field of strength, (:48). not as a barrier of the field strength of you and me.

Then mankind become knowledgeable in the essence of the Creation, in the essence of interacting with a Universal Community, not in the dimension of matter state, but in the dimension of the fields strength. And then it'll become interesting for us, because we tried this with you before, and some of you tried it, and did not work with you. Because you never understood the whole essence.

Some of the Knowledge Seekers before they come for the first trials with us. They call their cousins, or friends, or boyfriend, or girlfriend, or whatever, "I'm going to come and see you, I'm going in the system." And it didn't happen, even though the cousin was sitting on the other end, and waiting for you to arrive. What's the reason? The soul of the cousin says, "no, no." You want. I don't, because I know what it's going to create. It's not the time for it.

This is what we saw with the couple yesterday, and with the other couple last week. Both Souls wanted and both Souls achieves. If you remember, we put couples in the back and the front seats. We put couples across each other, to see if the couple behind, has nothing to do with other one. If they still achieve, and feel the same, even being in different position.

So in the past six, eight weeks, (:50). we have tested every possible combination of the understanding of the movement of the STM. Now ask yourself a simple question. Check your paper, and tick your paper. What did I feel? We had a KS very recently in one of the teachings, where she said, I had a dream, or whatever, and I could feel a person had a pain, so and so. Then we understood, how that feeling, correct it was. The pain was felt, because of the collection, and correction of the, and in a way, closeness of the souls, and it was 100% Correct.

Now, check the papers. What did I drink? What combination, and what pleasure gives me, in understanding of the ?? memory. Then you see how much you have gone, and where you are.

Those of you who have been around it, for long enough, you know, I love green tea, especially in the morning. This comes from my travels in China, and understanding the essence the beauty of the nation, and why they do it. How green tea is actually a Gans,

and in the first layers. And what they burn, and the first tea you take is Nano materials, which gives you the energy for a time. That's why a lot of Chinese are very slim, because they take the energy in the first tea. In a green tea they take, that first layer, because they burn it, they fry, in a way, (:52). they dry the black tea, it takes the shape quick.

So as a scientist for me, green tea gives me a lot of pleasure, but I carry the emotion of the nation, the culture within it, which has a lot of meaning to me. The other thing was a pure water, which the tea was made of. And I drink it very hot, a special way that I enjoy, to carry the energy. The other part comes from my background as an Iranian, which I like "sharbat", which is concentrated sugar, melted, and let cool down, and it sticks to wood, or a string.

It's the pleasure to have, because it's a rapid dissolved energy, especially to have when I teach. Needs a lot of energy. Those who have been around me, know, after 3 or 4 hours teaching, I am so exhausted, I need a whole afternoon, or maybe next day, to literally, recuperate from the time of the teaching.

Then with it brings the essence of the smell and taste of saffron, which this gives you an emotional elevation. Saffron to me has a lot of meaning, in essence of love and creation. And then when you take this sip, it revives, it revives the whole of the body of the man.

How many of you got all of it right? And how many of you got one of it right? And how much was on the knowledge of knowing, and how much of it was on the knowledge of the emotion? The beauty, the taste of green tea, the odor of saffron, (:54). with the sweetness of the sugar, as a human, which is the essence of his creation, and then the water of life. All at a very high temperature.

Now, what that emotion, what that ?? creates as the emotion within me, which satisfies my inner being, dimension of the understanding of the Totality. Then you understand how we will bring different cultures, different banners, different emotions, from different parts of the universe. Now that we become the travelers of the universe. Would you introduce tea to a man from Planet Zeus? The one who did to me, gave me a lot of pleasure, but how would you explain it, in the essence, then in physicality, that they feel the emotion of what you have, what you give. Is it love, or is it tainted with desire.

In the life of man, we will know how, and where, and the way we are connected. In the life of man, we will not, as I said many times, adultery becomes impossible. In the dimension of Universal Community, because the emotion of the Soul creates that separation. The emotional of commitment and connection, becomes, soul mate for life, unless some by agreement of the two has decided to separate. Not by agreement of one.

It becomes life without pain. (:56). The life within dimension of the universe becomes as true, as clear, as what I call, the light of the Sun, transparent and complete. In the process of Creation, in the process of transmutation, in the process of understanding the Totality, man from now on enters a new dimension of understanding of the Creation of itself, its own Creation, and the created, and that has created the Totality.

Would we have children with physical handicaps, once the man knows can create children with the essence of the Soul, and not the essence of physicality. And would these children be the light of the what I call, the true reflection of the Light of the Creator, as the created in the essence of the Soul of the Creator, and not the physicality of the being, with all its faults and Soul dimensions.

Now you understand the children of Mitra, in the essence of understanding will be pure, even though they live in a different dimension of P. We have to understand, that the dimension of the physicality of the Man, is on this planet. The dimension of the physicality of the children of Mitra is the universe, of wherever they go, they fit into the society, because they came from the lights of that society, of the best of the lights, not those which are tainted.

This is what Mitra did in essence of the Creation, bringing the best lights from every fields of the universe, to create his own, her own child, that will be the essence of perfection. And that child is amongst us. We have to understand it, and treasure it to understand, that the new life, not is the first child of Adam on this planet. But the first child in the whole Universe to start a new Creation, (:58). new D in life. But the whole of the Universal Community, as a total, as a Unicose.

It's a new cycle, that has a dimension of physicality of the point of place, but in essence it's the Soul of the Creator with it. Mankind will come to understand this. Mankind has no choice. As a Universal Community, we'll make it to understand. Now, you try to understand. You will see. You go through the emotion, if now that you know what I drank, and what I drink, you'll get the same emotion as me.

Did you smell? Did you feel? Did you feel the essence of my soul wanting to share with all of you, and not be kept with me, the beauty, the taste which it carries. Did you take sip from the Cup of Life of the Creator? Then you understand the Totality of the process of the Creator.

Did it enlightened the soul or did it freshen the physicality? Mankind in the new way, will break through a new understanding, that the physical dimension of life has meaning, but does not have the importance. It does not have the priority. It's not to be detached, and I don't want to be here. I want to be here, because I enjoy, I want to enjoy the Totality of. Not to be a part time lover.

In a way, (1:00). mankind will come to understand the Totality of the essence of the Creation. Mankind will come to understand how man will go through it. How man will feel it. How will come…. How will come to be, to be what it is.

Today later on, we'll introduce that.
We come to see the change.
We come to understand the Totality and we come to see what it will bring to us. It will bring, to bring, to change, and to create that understanding from the dimension of the

Soul of the Man, and how much of it we can understand, to do. What we can understand, and what we can do, and would it be in a position of Totality

We have to understand the Totality of physicality. (1:02). We have to understand the Totality of all dimensions, physical, emotional, transmutation, transformation, transferring from physical to what we call, transmutation and transfer, and vice versa, and understand the Totality.
How much can we change?
How much can we push to understand our own limitation. Humanity needs understanding of the Totality to be able to become the Man of universe, and this knowledge does not come freely, in how we transfer these energies across from each other. (1:04).

How do we comprehend the emotion of it?
Do we need to think to do or will it come to us naturally?
How natural does it come to us?
Then, would we always live in the dimension (D) of the soul?
Or would we live in D of physicality (P), or would we come to understand the border line, of which one is the soul, and which one is the P? Then comes the question, the big question for mankind, that those who we accuse of schizophrenic and multi-character, how would they spread? How would they share the singularity of the physicality? Or do we create another dimension of the problem for ourselves to understand their work?

Or would, if we have a schizophrenic in one system, (who) wants to appear in the other, (1:06). which other will manifest, or would they all two or three manifests themselves in another system, one as a man, one as a woman, one as whatever they want to be.

Then if we call in the creator, their parents would they have the comprehension of understanding? These are all problems. These are all situations. These are the realistic conditions, that we open from next week, by running the transmutation tests.

Where do we centrifuge your fields, and is the fields of one system, is matching the other one, that you will come out as a man on the other side. Very much, if we create another condition in the other system, will be the way, that say, you appear on Moon. The field strength of another dimension. But as a man, field strength. Then how would you look? How would you manifest yourself in the other system? Would you have 10 legs and 20 arms, because that's what you need on the surface of the Moon.

Now you go back to all the teachings we've done over years. (1:08). Where we always said, we have test trials before you go, you see how you come. Go back on all the recorded teachings, many times I referred to it. Now we have come to it. Now we will see. Now our scientists will create the conditions, that when you go on the Moon you'll see how you will manifest yourself and the others. The systems are physically made, they are in ?? bits.

As I said to them yesterday, I never let you in up to now. But from now on, you look from inside. What do we transmute from the other, from one side to the other? Do we get

the perfection in both systems, that both mimics the condition of the earth. We foresaw such a situation in our designs.

That's why last time if you remember, I said, we put the people in the center. Those who want to be still connected to Earth, and the other system does not match the condition they want, they'll be manifested in the center of the room. It'd be very interesting for you to understand. In one condition they will be manifested in the room, would you still see your other half, in image?

It will be very much like when you dream. You see yourself in your dream, in the mirror, and you see yourself back. (1:10). I went shopping and I bought such and such a dress, because you in a dream. In a condition of soul, you still see your dimension of physicality, because that's what it fits it. Now you understand, the Totality of the knowledge of space technology is absolutely mind blowing. But once you understand it, what will be the next condition?

How would you feel if you're amongst two souls? How do you test yourself when you're among two souls and know, the both souls sitting, and knowing, and understand each other, but not knowing that they see both. This is one of the dilemmas that you will face in the coming time.

You sit between two friends and you'll see the emotional feeling about each other. Where they don't talk to each other about it. It brings a lot of new dimensions. It brings huge amount of headaches for those who see it, but they cannot talk it, they cannot do it. But from now on, as more and more of us learn, we will not think that way, because you know, that the side sees, what is the use of thinking. (1:12).

Then it comes, does the man need the emotion of the language and the voice? Interesting times are ahead of us. In so many ways, the perfection in understanding the Totality is upon us, we have no choice. And then what we need to do, what we need to understand is, how perfect this life, the new life, the new dimension for man shall be. How do we assess it? How do we understand it? And then how do we collaborate with it, to be part of us? And how closely, and how far can we push this, for us to understand, for us and to be able to push the what we call, the manifestation of the Creation.

To what extent mankind will understand the teaching of today, and to what extent, it will be the beginning of the evolution, and the beginning of what I call, a new way of living.

All of you who come in from next week, you sign a disclaimer, that you come in according to your will, and it has to be notarized. Don't come in if you don't have the letter with you. (1:14). Then you will give us the right for transmutation and transportation, or transmutation and what I call, relocation. We don't make it. You have make it according to you, and bring it with you. You will not go in the System if you have not brought a signed letter, notarized, registered, that you give the permission to become the test pilots in this series of what we call, "evaluation and development of the new technology." It has to be with your free consent.

We as One Nation come to change the operation of ?? the nation, and that's the man's nation on this planet. In a very short time, Keshe Foundation with announce the establishment of One Nation organization. Which means the creation of Totality in considering the supply of food, energy, and everything else under the same banner, the same structure through Knowledge Seekers. We see crisis in the West. We see crisis around the world with the food crisis, and the rest of it, created deliberately or whatever.

As we have set up One Nation structure, and One Nation, One Planet, and One Race. Keshe Foundation will respond to this accordingly. We just waiting to see how this takes shapes, that is the best time for us to intervene. When your nations cannot supply you, when your nations cannot give you food, there has to be an alternative, as a, what we call, "Totality of One Nation." (1:16).

We'll open a new dimension in the patents, which you have, but you do not understand. With it, we'll release new technologies, that all can use immediately. That it takes the pressure off the hunger, heat, and the rest of it, from the life of the, especially the European and Western world.

As the Africans are well looked after. It does not matter how much the price of the oil goes up and down, if there is no gas, if there is no car to drive, as they live in the jungles. And the monkeys don't care. If they are loved by the man, or they are fed by the man, because they can feed themselves the same as the man in the jungle. Now you understand that the Totality of the knowledge and independence of physicality, has brought a pleasure to live in Africa, because you're already independent.

Let's see what comes up, and how, and how fast in next coming weeks, we can create the dimension of transmutation, that dimension of transfer, that dimension of further understanding, that by October, November, that time, we can bring you to Austria and ship you back home.

As I said to one of our Knowledge Seekers, as a couple, leave a phone at home, come in the car, and I'll send one of you back home in a different way. In a way, it means, we'll see the difference between the physical, and transmutation. And would the partner finds the other partner home, when he or she gets home? Was the desire to be home? The love is so strong to bring home. (1:18). This is what we tested two weeks ago with a couple, or last week with a couple. The desire to go home, was the same as the love was at home. Now you understand why we run these trials, that on the completion every soul gets what it wants, and what it needs, and what it has to.

Thank you very much for today. I hope you understood a lot more what is to come, I hope you understand the new knowledge, which is shared with you, far beyond the understanding of the present time. And then it will come like the first time introduced you to Gans's, and the different kind of energy.

Now we introduce you to a new way of living life in the Universe, and Man has no choice but you learn it, you can deny it, but you can run away from , because this time, you can't hide in the jungles of Africa, or behind locked doors. "What, it's got nothing to do with me," that it touches your Soul, and it has everything to do with you, it doesn't matter where you are. Rick, if you can take us for a break and we'll come back then we'll take it a step further.

<< BREAK >> 449 KSW Sept 8, 2022 (1:24).

K- Yes, we're ready. (1:26). There's a couple of things I want to mention and to bring it in. One is that, as you remember, from all time we tried to bring the Gans work into different dimensions of work, and of what we call, materials of the Keshe Foundation. How people call it, "their work," they bring different knowledge's, and different way of their understanding into their work. Today, we have two of these. One comes from the Keshe Foundation itself, in how we have commissioned work. And one comes from one of our beautiful Knowledge Seekers (KS) in France. He's done a lot of work in the past. We heard from him in a few years ago, two or three years ago. And now he's made a made a collection of his work, in regarding the agriculture. It's beautiful to see what he's done. He was with us a couple of weeks ago, few weeks ago, as he went through the Enhancement Unit (EU), with his beautiful wife. They went through the system. They, went together to see Paris, and we explained some of it to you. He has made a collection of work, his work has done over. This is a work of 2 or 3 years. It's not just normal work. And he made it available to the Keshe Foundation. It goes into the agricultural teaching. It's already put up. We wanted to show it as a whole, but it's a very long .. teaching. It'll be shown for teachings for other people who are interested in agriculture, in part of today's work.

The other one is, as we said, we always worked into the understanding how the technology can be applied in different ways and different, what we call, different manners. And how, (1:28). we will see the artists will use this technology for their, what we call, their artistic work. Keshe Foundation sometimes got commissioned two sets up paintings to be released, as part of a new generation of works by the Keshe Foundation. These works, now is completed, and today we'll see one of them, a pair of them.

There's a pair, matching pair. But with different dimension of Gans's. They've been put on sale on the Keshe Foundation website. So, you buy two pictures, and if you put them in the room, dimension of the emotion, dimension of the temperature, dimension of

changes in the room, we'll take, we will like to know. So, in a way, you buy an artwork, which becomes part of the research work too. But has a beauty. It has been made, and both pictures will be signed by me as a personal gift, for whoever takes it. This is one set, and this is the other set. They're parallel sets, and they've been done specifically by Keshe Foundation, for Keshe Foundation, by our Knowledge Seekers, people who understand our work.

This comes on the back of the same group of people who we introduced through their artistic work, the Cup of Life, and the Cups of the Pressure and the Cups of the, what we call, Sugar. It's, those Cups you buy they're artistic work, their mass production, as it is made, one individual by hand, by artistic. (1:30). This is the other one. There are two sets of painting. This one matches this one. And this one matches this one. These are in one meter, around one meter, and one meter and forty size. And one of them is 90 by 1.2 meters. They are big pictures, and they've been put on the website of the Keshe Foundation.

When you purchase these, you haven't bought an artwork, this will be followed for years to come. As I said, when you buy them, put them across (from) each other in a room, in a space. Stand in (the middle of) them, and see how it feels, what it brings you. One is loaded (Gans's) two to one. These are, in a way, scientific work, that one transmutes feeling, whatever, from one painting to the other. See what changes you'll see in another wall. You'll see (changes) over time, and take pictures of it. Then see in six months time, in a year time, how the colors have changed, how was your mood, how you feel, how it brought you joy.

We put these sets of work in 3,000 Euros a set. It's taken a lot of work, it's taking a lot of Gans's, or combinations of a thing, and a lot of thinking to go behind it to be done. They're both for sale on the Keshe Foundation website now. We will introduce work like this from now on, the a way, very softly we introduced the Cup of Sugar, and Cup of Pressure, and many of your bought, many of them. These paintings are individual artwork, these are artisans, and will be promoted through the Keshe Foundation for scientific, and evaluation of it. We know a lot of artists try to do this, and they do this because, and there's hardly. They just do it because they want to make ??. This is done the way we want it, and it's done by our people, (1:32). what they put in it, and how they put it in it.

We want to see, actually what happens in this environment. The changes in the color of this painting, for me is important. What happens in six months time? Do you buy a red and a blue, and you end up soon with a green and red. It's a live interaction. These are live pictures, these are what will come, that shows your emotion as you pass between the two.

Would you be able to see the changes when you sit, and you feel happy, and the color painting changes. And when you're sad, the color painting changes. You come home, you look at the pictures, "oh, she's angry today with me." You come in home and look at the pictures, "oh, she's going to love me today." We are looking for a new dimension in

understanding. It’s only two sets of these available. And we would like, when you buy you enter, in a way, as artwork. All pictures will be signed by me, because it comes from the Keshe Foundation. And we want to know the history of these paintings, they'll be valued in hundreds of thousands in a short time. If you're in the investment of pictures. And it will gain, because of its value, as a scientific value, that's what we are after. If you remember where we introduced the glasses (Vision Enhancement goggles) to you, for test, the understanding of the work with the people who fed us back with some information, gave us a very clear understanding of the Enhancement Units (EU), Traveling Units, and everything else, which now you see you're taking part (in) it. So, these pictures, these kind of work for us has a value. (1:34). It’s not just that we put something. Because it's going to bring something forward.

The other thing, which we will, we try to show it today, but there was, we decided, in a way, to go in a very rapid way to the next level, because we see problems in Western Europe. We saw the government of England is planning on 130 billion financial aid package for families to support with fuel, and maybe other expenses which come. We have seen the Austrian government yesterday has passed the two or three billion package to come in December. When actually you still have to get yourself through till that time, that they give some 500 Euro per family to support with the increase rise in food and other things. But the crisis will be much deeper than this.

Keshe Foundation has decided to go for a direct intervention of the Keshe Plasma, what we call, Gas and electricity unit. This Plasmatic unit is going under the evaluation and development in the next few days, as we shortcut a lot of things through it. Once completed, it will be shown publicly in the next few days. The 5 kilowatt brings us the gas to create electricity, and uses a gas generator. The new system uses understanding of the technology of the Plasma to create its own gas, and its own energy, and with it we will introduce the interaction of the fields of the food and everything else.

Once we show this, is one of the freestanding units, once our team managed to complete it, we will show it. And then it will be rapidly available to all the governments around the world. (1:36). We have to come to an agreement on an open patent basis, and what will come back, which means the Western Europe does not need to go through the, what we call, the recession which is expected.

Then we have to see how we will come to an agreement with governments to disperse with this knowledge so rapidly, and Keshe Foundation to become as the government backing governments, in running governments. In a way, we provide the technology and the knowledge to create the backing to the nations, to start the beginning of the process of One Nation, One Planet, One Race. To replace the United Nations as One Nation, as the nations are already united in knowledge and technology.

As I said, earlier on, we have set up and we are ready to, in a way, introduce, and with it the acceptance of "One Nation policy." Where the new knowledge with energy, the food and transmutation and transportation bring a new dimension. And we decide as Knowledge Seekers of the One Nation, how our language nations will operate. We start the

establishment of a "One Nation policy" through introduction of the technology available to every man at the point of need. They give you 500 Euro to be happy for a while, we give you the whole knowledge, the system and technology to be happy for a life time. Then you do not need to depend on the Saudis, and the rest, and the danger of nuclear attack by one or the other. Because the change has come, and we bring force and the enforcement of knowledge. (1:38).

Introduction of the new technology will bring the introduction of the new One Nation policy. You as citizens decide with it. Now, as I said, we opened the patents on the other side, which you read it, but you never understood it. Now you read it, and you understand it, and the new cycle will start. Next week is not just the beginning of the introduction of transmutation, but it'll bring the other parts, because the same energy supply will be used in our systems for transmutation, as the ?? technology with energy power. Let's see what we can do, and how we set up 20 years ago to bring the basis of One Nation policy into operation through its need at this moment in time.

Are there any questions?

Q: .. What does the Soul of the Man look like in the eyes of the Universal Community? Mr. Keshe said, they don't see the shape of the body, we are seen as spots of light.

K- How do you see the Sun? And how do you see the Mars, and how do you see the other stars? How come the Sun is a light to you, (1:40). and how come the planets have a matter state to you? Have you ever thought (about) that? Why when you look on one side you see the Sun as a light, and when you look on the other side you see the Moon as a matter state? Then you'll find answer to your question.

Conditions of the field balance, field condition, dictates the understanding, and observation and the emotion. In a way, if you understand it in an easier way, the tea is a matter of state liquid, till it touches the lips and the mouth, and it becomes an emotion. And then it still has the dimension of physicality, as we like to feel it as we consume it. It's the same condition. If I decide what to feel, you can feel.

A lot of people say to me, why you see everything and you let all these things happen. Because it has to happen, it has a reason, it has a cycle. I sat in China between a couple in the hotel, in a meeting. It was a very, very strange, strange meeting, and this meeting took place two or three times. Wang Lin was sitting next to me as a translator. But in a way, I didn't needed any translation. (1:42). I could read, I could see, I could feel the language of the two across the table, and understand the emotion involved in that meeting. It was very, very strange to hear what they're talking to each other, in the Soul dimension, what they were communicating, and what they were talking physically.

I got up, and I went for a glass of water, bought a bottle of water from the shop and came back. With my turn back to them, the conversation changed. I could hear, I could feel the emotion, the change, what they were talking to each other. I came back on the table, that was a deliberate job. And I saw how they changed in respect to each other, because either

way, by looking at each other, they were communicating something. I walked away from this meeting, it was a beautiful meeting. The gentlemen loves the Keshe Foundation technology and does a lot of things for us in China.

But it was interesting to sit and tell them, I can see everything, and I know what you are thinking, and I know your emotions, and your feelings and what was going on. I asked for a second meeting, or we met a second time. I wondered if they understood, (1:44). but in the background, through the Soul, I conveyed the message to the other one. In the meeting, the meeting was very different. Because the interaction between the two was totally changed. The emotional interaction was different.

I said to myself during that time, when will man understand. I see everything, but I close my eyes, I don't need to be told. It's the choice I have. I choose the man's way, to understand the man's way of living and doing. It's not my ignorance or my, what you call, "being simple." It's just understanding that you live in man's world. (?? That's how it's ??) said, it's a man's world. Man made a car. It's a man's world, and man has made this world for himself in his physicality, and we have to respect it.

But it does not mean you have to go with it, and do with it. Many times, those Knowledge Seekers that are very close to me always say, "Mr. Keshe, you see everything, why don't you do it? Why do you go through all this pain? Why do you do these things?" I always say, "I have to learn something from it. That's why we came here." But we see everything, the desires, the lies, the cheats, and everything else. Nothing is hidden. If you choose to go through the path of the Soul, and then you live that Soul life. (1:46).

Once one said, the worst thing with you is, when you withdraw your love, hurts more than actually knowing, that it's not there anymore. Because when we enter a commitment of life, we commit with the full life and ?? the emotion of the Soul and nothing else. With a full love. Because we understand, then the Soul understands. But when it's broken, we move away not to take the pain.

This is what, as Knowledge Seekers, more and more of you will understand. What you earn, what you learn, what you see, is in the light, or it is in the dimension of physicality? How do I handle the Soul, and how do I handle the physical side. This becomes part of our responsibility, now we are responsible for it. Now we are responsible for the Soul and the Physicality. Up to now we were responsible to feed the Physicality.

The Soul was there, that is somebody else's job, called God, heaven and hell and the rest of it. Now you have the God, you are the heaven and you are the hell for it. Accepting the responsibility of the both, to be in the path of life of Mitra. Do good, because when you do wrong, you do it to yourself. Talk good, because when you talk ?? wrong, you do it to yourself, and everything else which goes with it. And when you act it has to be perfect. Because you do it to yourself, psychosomatic. (1:48). Man has not understood that yet.

Any other question?

I was talking to one of the Knowledge Seekers quite some time ago. And he said, Mr. Keshe, we know what you're doing, and where you are, and if you're away, or you are at home, or you are whatever. And I said, how? He said, when your dog barks, we know you are home. If there is such a noise we know where you are. If you do this, we know what you're doing, and by the noises in the background we can tell you what you're up to.

Now, if you can extend to the knowledge of the Soul, you don't need to everything, the noise in the background, you touch the Soul. And you feel the emotion of what that noise of dog made, when it's made, or what happened when the other noise was made. It's interesting how fast Knowledge Seekers will become mature to this, now that the new technology is being opened.

Any other question?

R: Jalal had mentioned in the chat earlier, just after you talked about the green tea and so on. He says, I knew it was water and tea, and I even smelled the tea.
R: And I know for me, I can add that it was kind of strange. When you were talking about it, I had this impression that it was something sweet and hot. (1:50). And I couldn't figure out what it was. But here, strangely enough, here I was drinking a green tea at that moment. And not only a green tea, but it was my second cup of green tea. And that's the first time in my life, that I've had two green teas in a row. So, I was actually drinking it when you mentioned it. But my mind couldn't figure out what you were talking about, other than it was something sweet and hot. I kept thinking about coffee, but I thought, no, it's not coffee. What is it? I had no idea that you were a green tea drinker. So, that was quite interesting.

Q: .. Do you have a formula for the attorney. I think she means a form or something that can be printed out for people to take to the attorney to notarize? What do we put on that notarization?

K- .. First of all, about your tea. The green tea has a, what you call, connection to the Soul, because of the Nano structure, he has. When you put your Nano material in a given salt level, you know, it changes to Gans, and all stuff of our waters have ?? some salt. (1:52). So, green tea, the way it's made, it's Nano plated first, in a way, as you call it, has and creates different emotion, which in a way gives you.

If the Chinese understand how to use the green tea, or Man understands how to use the green tea, a lot of diseases will not exist. This is one of the reasons Chinese live a long, long, long life. If they understand it. If you make a green tea and throw the first water away, you have lost the process of the, what you call, energy, feeding the Soul, and then Soul deciding the ?? life.

If you drink it as a part. If you made the green tea usually, and you leave it in the pot it becomes a black tea, because the energy of the Nano particles is given to the

environment. Green tea is actually a black tea roasted, which is Nano coated. Traditionally, when they collect the tea, they take it to roasting, the same night, the man who cuts it, or cuts and roasts it in a pan, and it just stays fresh as it is, it keeps its ??, that gives it, its color and whatever. The emotion you carry with it and you receive from it.

Regarding the consent, you have to write it your language that, "I give my consent to Keshe Foundation, and all the operations and subsidiaries," to me to, or for my body and my, what you call it, Soul or whatever, to be used for testing, and evaluation, and elevating the knowledge of the man. This is done with my full consent, (1:54). and nobody has forced me or whatever, to do such a thing. And I give all rights to the Keshe Foundation to do in the time of testing, and I have no claims whatsoever.

This is important, if one of you Knowledge Seekers understood it, ?? you can type it, put it back on the screen, we'll put it on. And if you have a lawyer around, write it up and give it to us straightaway, we'll put it on the, what we call, platform plate (website). But we need this because we are entering a dimension of the testing, .. a very interesting job.

Any other question?

Q: .. Are you still looking for Satellite people? The ones not coming to Linz, but operating from home.

K- Yes. The more, the more we have, yes. Enroll, pay for it, and there. We have a lot of people who've done, I mean, we know the list of Satellite people, we will probably know, it'll be known, because they will be the point of focus. We have more, and more people joining to become satellites. It's good to have.

It was very beautiful this week. The groups came in, we had two Russians, or we had Germans, we had Polish, what else, they came from, the Austrians. Last week, or the week before we had our first Afro-American. More or less we are piling in all what is needed. We're still missing Chinese. (1:56). They have not come in yet. It's amazing what is, and how that system feels, and how people come with what expectation they come. But yes, we need Satellite people. Some of the weeks we still do some other things. It's that, the standard test flight tests will still carry on in the background with some people, as they come in. Then this allows us to perfect our system to understand what goes wrong.

But from next Wednesday. Tuesday, we are closed. We don't do any tests. Next Wednesday, 14th. We, as I said, we have four going through it, it will take an hour or two, maybe less. We'll succeed or we do not, it all depends how our technicians in the background setup the system. How we see, how we do. (Wednesday they start the tests.)

Our aim, original target is not to take one (person) to the other (EU), it's actually to see if we can transmute the Soul. We'll do that for a few days. And see what we get, how we get, how we see. Then we'll most probably test the Soul of the Physicality (STP) and the STM (to send) across after that. Then we'll attempt the full transmutation.

Our team is building the first two Vertical Systems for this job. There are four new systems under construction development in the Keshe Foundation. Where 2 of what you've seen, if you remember, the Vertical Units, which we showed originally. Now these vertical units as a transportation and a transmutation system (1:58). are literally getting developed to the standard, that we can start testing. This will be very interesting for us, in how our team will be there to bring this condition into, what we call, operation, and how we will change the whole structure, and the whole transmutation system.

Who will be allowed or who will not be allowed. What Soul allows you to go. If you're coming in to the system to escape, forget about it. It will not happen. If you come there to collaborate, to bring, share knowledge, you will find you'll be transmuted. You've got to understand you cannot cheat the system, because the system is you. We just provide (the system). You're the captain. We provide the facility. We give you the aircraft to fly it. We create the runway, in a way, to fly the aircraft, is yours.

You'll have to decide under what condition you really want to fly. And how far you want to push this, what we call, transmutation and the transportation. This Vertical System you see in the center is now getting set up, very much like the other system, ready for transporting, in a way, transmuting you from one unit to another. (2:00). We actually have a problem at the moment, where to put it. As you see just behind you, over there, underneath there are two large escalators right in the center of the exhibition. Above us, if you've been, it's like a huge metal structures of the back end of the rocket propulsion.

They're looking for where we can transmute without anything within the exhibition center. If we don't find a place, we move to a new location for this, because it has to be without interference. We'll see what comes up. Otherwise, we use, to go through the same system as before. As we have in the room, still, we actually, we have to find a location for this to start.

Any other question?

Q: Azar.. .. I'm always up at three in the morning on Thursdays when you teach, now it's five or four years. Before I ask my question, regarding the tea and coffee you guys talked about. This is something I learned, that coffee, tea, onion, garlic and hot pepper, not the black pepper actually, if you take them, it encages your Soul more. So, from 2018, when I learned that, I stopped taking them, because you can feel it. (2:02). Then when you go back to it, once in a while. If I go to someone's house, or traveling, it is in the food and, you know, I take it, but they have a very, very medicinal effect on the body, especially garlic and onion. But when you take it on a daily basis, it has a huge impact at the Soul level.

I don't know how much truth is in it. But I can see the effect of it, in case people want to know.

A question I have since on a teaching, that we do in Farsi, I teach the old teaching. When I listened to you, all these years, you teaching, you brought a lot of knowledge for humanity to free himself, or herself from the shackles of this planet, and release themselves from this painful living on this planet for people who are in physical level, because constantly they have to deal with every aspect of their life in either the food, or energy, or medicine, or survival.

So, at the end, when I look at it, my question is, it's up to us. Because you constantly, I mean, the real field, in every teaching you constantly bring the same thing, and maybe in a million, or maybe a zillion ways you are trying to tell us, you can go to this point. But ultimately, it's the humanity's decision, if they want to go through this path. (2:04). You cannot force them. Because I see you constantly, you cannot, you're teaching us, but you cannot take us and put us there. So, the action has to come from us.

So, the question is, at the end, the humanity can get to the point that you're trying so hard to, from the first day until now, no matter what, you keep repeating the same thing over, and over again. It seems nothing is clicking for a lot of people. So, it's also possible at the end we bring our own demise, rather than go to the path you're showing us. It's the decision that humanity in Totality make, and for you it's going to be a lot of suffering if humanity doesn't choose that path. And for you it's a very painful journey, because every single day, every single minute, every single second you keep doing the same thing over, and over again, and hoping that they get that. Are we getting it?

K- Azar, I want to explain to you something, how we get it and what we decide, with everything we go (through). Experience of life is a very good thing to go to evaluate.

When I was a student in the second year, (2:06). in London, I decided I wanted to live in the center of London, than living in the outskirts, in the outside. I rented the, what I call, a room, .. like an apartment with a separate kitchen, bathroom and everything else, right under the loft, the top where the build, the beams, walls, and everything else. It was like five or six stairs of flights, on each floor level, one or two doors, apartments. In those, the part of the building didn't have any ?? lights in Knightsbridge, London, Bayswater, you know, the kind of buildings they are. I had to walk all the way every day, up and down, to go to college and back. The college was on the journey to go from Central London, to East London to Queen Mary. That was another emotional track.

But coming home, being in college all day hungry, you have to go through this flight of stairs. It was just after the Iranian revolution. When I took that apartment it was no, nothing, but being in the Bayswater, to those of you who know, in the center, it became the only was an Iranian. So, it became a house of Iranian, that were literally all Iranian living in that floor, refugees, people came to whatever they settles.

I used to think about, what I was going to cook. I was sharing the house with another, the apartment with another Iranian boy, and … he was doing his PhD. Thinking about, (2:08). "oh, what I am going to cook, what is going to be ready, by the time when I get home." You walk the stairs up. If you know Iranian cooking, and the Iranian woman, the

way they cook, the food has a ?? certain smell. On the floor you pass, you smell something else. The other door you passes, you smell something. By the time you get to the top, you have five or ten smell. I always said, this house has ??, you know what it is, and the rest of it. By the time you get to the top you're confusing the decision you made at home, because with everything you smelt on the way up.

To make what you decided before you come home is a challenge. Because now you have all emotions of the tastes and the smells going through you, and how I like this, or I'll do that, and then making something on top, it was. Sometimes we had a joke with my friend. He said, "oh we were supposed to have this for dinner tonight, we decided yesterday, what happened, what changed? The smell (coming up the stairs). And sometimes when we used to get to the top, the other one was ??, We had a smell, that one, and that one, we are going to have this one, (regardless) ?? of what we decided yesterday.

This is emotion, how we can stick to it, and how we evaluate it, and how we understand it. Do we, and does it have an emotion with us. If you bring an Englishman going up the stairs, ?? (he doesn't have). It's just a lot of smell. But being Iranian has a different emotion, because the culture.

This is what we see, the Universal Council members have to understand, has to be from the language, understand. This comes to work when you come to work, and understand the work of human race. The desires, the change of emotion in interaction with other emotions, understanding of it, and being able to accept the pains of it, (2:10). as you try to understand it.

This brings a lot of solitude, it brings a lot of comprehension of the Totality. How we see it, how we accept it, and how far are we going to sacrifice to understand it? Is that sacrifice, brings us any gain? We fall in love with a partner, a totally different culture, different language, different things. And we try to satisfy it for that love, what we call, love. Then the cooking, then the language, then the way of doing things, and then you find out that it didn't work. It wasn't there, you understood, misunderstood and never been there.

A lot of people who work around me they say, .. I tell them, you don't speak English, you just speak English, the voice is English. But they don't understand the emotion, what it applies, what it implies. They say, you're not an Englishman, you are Iranian, how come? I lived there 30 years. I went as a young boy, I understand, I lived within the structure. Has the same value understanding to me as the, most probably more than what I understand in the Farsi language, because it's the time of the youth, when you understand emotions.

People who speak English they say, this is not what it means. It says in the dictionary, but it doesn't say the emotion of that word, its specific use in that dictionary. But with the Soul we don't have this problem. (2:12). It means exactly what it says, it implies and applies exactly what it is. This brings a lot of pain, a lot of understanding, and a lot of comprehension of Totality of the essence of a race. How much you are going to accept.

Q: Mr. Keshe, I understand what you're saying, because when I came here (to USA), I was only 20 years old. So, I've been living here for 41 years. Then sometimes when I go to Iran, because I don't understand certain things, the culture, I get into trouble. Like somebody says, come tonight to our house, and I say, okay. But then I realize it wasn't okay, because the people around me, like Yosef and Dr. Bararpour say, no, no, no, this doesn't mean that, so you can't just go.

K- We call it, "Tarof" (Iranian word that means you say something, but you don't really mean it, but you don't want to disappoint the person, so you say to come over, but you don't mean it.)

Q: Because we were in North. We were traveling in a city with Yosef, that was his family lived, his cousin came in. And then the cousin. They have a factory they make all those porcelain plates, and cups, and stuff like this. We went to lunch and then Yosef said, my cousin says come over tonight. I said, ok, let's go. And Dr. Bararpour said, no, you can't just go like this, because they just saying it. I said, what do you mean they are just saying? They just said, come, so it means come. So, do we have an argument about that. But then I realized, and sometimes some people tell me, oh, you can have this bracelet, and I take it on and say, thank you, but then I had to give it back, because it wasn't meant to.

K- We call it Tarof. But this is part of our culture. If you tell somebody else, even with us, we understand it, we have a problem. (2:14). I do that with a lot of people when I go to Iranian shops somewhere and they say, oh, Tarof ??, you don't need to pay. One day I actually walked out with it. They said, where are you going? I said, you said that I can have it free. He said, no, it was just a Tarof. I said, not with me, I don't understand it.

Q: I should have done. I've done the same thing in Iran. The guy says, is no problem. When I'm buying something I said, okay. Then he said, because I knew what does it mean. He would laugh about it.

But Mr. Keshe, about the, talking about the meeting in the Soul level and Physicality actually. I mean, a lot of us, since ?? understand it. Actually, if I didn't know what I know, the life would be so different, living in a Soul level makes life really easy, it's a playful and is joyful. Because even in the morning when I leave the house, I tell my husband, I'm going to physical world, I come back and I see you tonight. So, because I know I'm going out there, and I'm playing a role. If it was in the past, the way I look at it, if I act on it on a physical level would have been a lot of like, maybe tension and a lot of things. But when you look at it, at the Soul level, everything is pure, everything is crystal clear. Even when you go to that level, you can see people's intention, you can see people's play game, you can see people's lie, you can see everything, nothing is hidden from you, because it's very clear.

They don't know, that you know, you can see, but you see. For me it's easy to interact with people, because I can see everything clearly. So, I just play my role in that

interaction. The most beautiful thing is, when we go to the Soul level, and then with the, with the complete clarity and cleanness of your talk and your action. (2:16). Actually, sometimes I notice the whole. If you have a meeting with someone, or in a gathering, and you're speaking and other people, because of what they go into, because they enter the physicality, they're not familiar with the different roles, although they have a lot of tension, maybe a lot of assumption about different things, and they don't understand it, the way you act on a Soul level, suddenly, you see they actually come into ease with everything. And at the end, you see the whole, the person is changed in a way that you say, it's interesting. Like, as if you're holding a space and the way you acted, you changed them in a way, that you never thought is possible. This is a beautiful way that I think all Knowledge Seekers, that now they understand this, when they go about their life in outside, they just interaction with people, it just changes people. Then you don't even have to put much effort.

K- You know, something I said to one Knowledge Seeker once. She said, when I go to such a place, I don't feel good. I said, go inside, go in the room, see if you don't feel good, come out and wash your face and your head with, take it with you, a combination of CO2, and Zn, and something else. And go back into the meeting again, or go back into the same room again with the same people. See how you feel, if your emotion, your feeling, your understanding changes. And she did.

Then later on she said, never ask me to do this again. (2:18). Because I found out 80% of the wrong things I was looking, was with me, not with them. It brings out a lot of how we see with each other. You've got to understand, a sit in these sessions of Enhancement trials, and sometime simple things touches you, sometimes the emotion of single things touches you.

I'm sure the ladies listening, people who are around know what I'm talking about. This lady came to us very recently, and she went through the system. We didn't know anything about the background, I don't read anything about people who come in, then it gives you a pre-mind, preset mind of what to think, of what to do. She came out of the system. She says, she's got a breast cancer on the left side. That was after what she told me, that she went in the system, and she sorted out the problem, which she, or she managed to get to the soul of the mother and the grandmother. And between three of them they sorted out the problem which was never sorted, which was mainly to do with the love of the mother for the child, or whatever it is. She says she's happy she came, because she settled the score, or whatever, she settled the problem.

I said to her, maybe you have changed the condition of your cancer, when she told me. Because left breast of a woman goes with the mother and the daughter. (2:20). She has no children. I said, now you've changed the emotion, let us know if the cancer changes. If your body and your life changes. And what will be the outcome.

We bring that change through emotion, dimension of physicality. I'm sure with a high percentage, we will see a resolution to this cancer, because I know what has caused it,

what is the reason behind it through our research, and development, and everything else, and understanding the work of the Soul.

But what will be interesting is, what she will take from this experience. What would add to the beauty of the life, and life might end with this cancer, or (is) life going to be extended? Because of our understanding what caused it. So, it's not only the interaction of the people with our emotions, but the interaction of ourselves with our emotion, which is the biggest problem, which man will solve from now on. (2:22).

Death through cancer, death through self inflicted emotional psychosomatic will become a thing of the past for man. This will give a new dimension and extension to the life, physical life of the man. Because we will handle these emotions at the outset, not at the end set with a cancer and the other things, which comes with it. We'll see, and most probably, a lot of people will see more and more.

In these trials past few weeks, we have seen the effect of the expansion of the Soul and change of physicality. We see it, we've seen even yesterday and the day before in an amazing way. The gentleman with a Parkinson, who could only write one word, the word diminishes, goes in the system for the flight test, and comes out with being able to write 5 sentences without a stop. And he hasn't done that for 10 years. If you say that to anyone, they say, it’s impossibilities.

But in fact it's the Soul, which does the job. It's the expansion of the Soul to get ready to fly, balances a lot of things and the physicality is accepted. If you remember, when we brought the Chinese guy in a wheelchair, and a few days later he was running. We saw this yesterday, and in the day before in the Enhancement Center. (2:24). The speed which works, the speed which changes, because the Soul can fix the physicality, which he created, no medicine can. Now you understand what happened to the Chinese man and the other Chinese woman who went there. All we had to do was to understand the work of the Soul.

Any other question?

K- I hope you enjoyed your trip and experience with it.

Q: Yes, I did enjoy it. But also at the same time, I forgot to tell you that, you know, when I went to the unit the first day. Because I went to the one that you feel, and I felt the expansion of the Soul. You know, because I was sitting in the new unit. I didn't get the scared, because I said, Mr. Keshe is here. I said, when the feeling came, I didn't think about anything, at all about it. But then I realize, I had that feeling sometimes, a couple of times at home. But since I didn't know what is happening, I want to get away from it. I said, somebody may be attacking me. It wasn't a familiar thing for me. So, that experience, it teaches something about me. If it's happening, I should allow it to become further go, and expand more. I shouldn't try to distract myself and just say, please go away. So that was a good thing.

K- I think it was a nice experience for you and your husband. I think he felt it in a different way.
Q: Yes, he did. Because he sat in the machine that he could see and feel.

K- Thank you. (2:26).

Q: .. When do you get the date? Or where are you needed? And how long does it take with the mobile phone?
K- What do you mean by that?
R: I think like, she'll sign up on the website. I think she wants to know, when she would be notified. And how long does it take? How long does the process take?
K- What do you mean by that, how long does it take?
R: Probably, like is it over several hours, or I think you mentioned a couple of days.
K- It all depends in how. We inform you beforehand. Depends on the conditions, how we want to do and how we set things up. And how it will be done.

Q: Does Mr. Keshe know if you have the right Soul for this? Or can it be that he said, no, you're not right for that?

K- I have no right to decide, your Soul decides.

It's a beautiful thing, I've just received something for our, what I call, a lot of you who work with Keshe Foundation, people we have a what I call, news broadcast room. One of our Knowledge Seekers fills up all with the latest news all the time. There is not a day you don't get something from her, a few, or 10 or 20 things. She just sent something which inspires something. Maybe that's the reason she sends it.

It says, (2:28). the world's biggest cruise ship is set to be sold for a scrap before first voyage, as owners go bankrupt 1.6 billion vessel. Things with 20 decks. Very, very interesting. It triggers something, very interesting for us.

Could we acquire a ship like this to become the center of the world's government? A ship with everything, an independent nation, that we can float to any nation. It's a very intriguing thoughts. Would we be able to spend that kind of money? Would it be given for such a purpose? Or is better to be metal, the purpose for this is a very nice thing. It's a seed for thoughts.

R: What if you can make it fly? I saw that article. I couldn't believe it, that they'd have such a large ship, and they were brand new, and they're going to totally tear it down into scrap. They're threatening to do that, if they don't get a buyer.
K- I don't think anybody would go and do that.
R: It needs another, it needs some refitting to finish it off, like about $300 million dollars worth apparently.
K- Yeah, 1.6 billion. Just is, what is it. The American government spends in a day also for military applications.

R: It's like buying a country for that much. Like you say, you can move your country, or your World Organization.
K- It becomes a very good headquarters. (2:30). If you have some change in your pocket Mr. Crammond, 1.6 billion?
R: Maybe some of my relatives do, but certainly not me know. No relatives that I know.

K- Oh, we have to ask to the Mr. Bill Crammond . He died with the last, we'll have to ask the Crammond family.
R: Yeah, maybe I've gotten inheritance there somewhere. there's billions of dollars…
K- They hold all the Queen's wealth.

R: Exactly. Well, some people are actually going for that kind of thing. They're trying to get back the money they paid in interest over their mortgage for 50 years, and saying that the banks took that money and reinvested it. So, they should get the interest and capital from all that, instead of the banks. So, we'll see how successful they are at that.

K- What is interesting is that, if you can think about what we hear in the news. Where is this new Prime Minister of England going find 100 and 30 billion to support the present economical situation with energy and food? We have to understand, what is the population of England, 70, 75 million. If you give 10 euro to each, instead of 50. If you give 100, it's 7.5. If you multiply it by 20, which is 2,000 euro per family budget. It's about 130 person, .. that's 130 billion. (2:32). But where is this money is going to come from? That the government can guarantee to pay to his nation, for 70 million people, to take some pressure of the fuel crisis for next 18 months.

Then you understand how much governments have stashed away, what they're planning to do with, or what they haven't stashed away, and they're trying to take from ?? you.

This part of what we. How much do we pay when we go on the Moon, if you see the others? Has it got any value, what we call, value of money. A few meters above Earth, everything we fight for has no value. You could be there, or your Soul is there, it's no value to it. Absolutely no value to it. And what are we fighting for?

Any other question?

Q: About this teaching what put me to think the most is when Mr. Keshe says, "with the emotion of the Soul, you transmute to any position in the Universe." (2:34). I wonder what this emotion of the Soul is. What it is like, and in which condition we will reach it? What do we really need to achieve this condition and elevation?

K- .. What about if you say, or if you understand that you already have it? You denied it. You don't need to reach it. It's already part of you, it's already in you, it's already born with you, and you are because of it. That's all it is. That's all it needs to be. That's all it is, That's all it has to be.
That's all you need to understand.

R: Is our attachment to the physicality that prevents us from feeling that emotion normally?
K- What do you mean by that? (2:36).
R: Well, you say that this emotion of the Soul is present, but we don't recognize it, or we don't pay attention to it. Perhaps because our attention is busy with our attachments of the physicality. I'm thinking that this, that we have periodic times through the day that this emotion is available. If we don't allow our physicality to just kind of smear everything through as part of the general hubbub of life.

K- We prioritize. We give priority to our physical dimension, than to our Soul dimension. We've done that from the point of birth. Which one has a priority, and which one can do. If you're taught from the establishment of the fetus, that there is an option to live both. How would it be?

It's very interesting point, that we are aware of it from when we are in the womb of the mother. But we are not aware of it when it comes to physicality. Children hear the parents during the womb of the mother. But the Soul feels the Soul of the parents.

In extreme cases, we see birth with the psychosomatic damages prior, or immediately after the birth, (2:38). which means that the Soul has gone already through the phase of pain, whatever, and it has already gone through psychosomatic changes.

Children with skin disorder, children with digestion disorder, children with a breathing disorder, at the point of birth. What I always say, you look at the end product, go back and look to the, before end product, what caused it. How much battle has been between the husband and wife. How much battle has been between the environment of the mother, in different shapes or forms. Not necessarily shouting, and howling, emotional and the rest of it. You'll find out you can sort it out straightaway, if you have the right position. Not by creams or whatever, by elevating the Soul of the child, the infant.

If a child is created in the dimension of the Soul, you will not see so much illness, or whatever. Because it fits itself. It does itself, what it is. A child which is born in a house of love and care, a true love, a true care by both parents in its own levels, we see a different character. We see a different physical life which is a lot of love, but a lot of forces, who's the boss in the house, and everything else, not necessarily shouting. You see the child is always sick, always sick right through the life, because you touch the Soul which feels it. It doesn't need to be to be there physically, and the physicality manifest itself ??. (2:40). 90% of the children illness in the first years of life, all preset in the house in respect to the mother or father, and how they brought up, how they talk, and if it’s true love, and true understanding.

Parents don't understand this. A life which is full of adultery, and everything else and is supposed to be perfect, gives that kind of conditions. The adultery doesn't mean sexually, it means by thoughts, by, "oh, he likes this - (therefore) I do something else." I do something because he doesn't like it, (but) I like to do it, and the rest of it.

You see, it's very intriguing for people who understand the process of birth. You see from very beautiful parents, very beautiful children come. What's the reason for it? Genes? When you see some beautiful parents, some of the worst, not desirable children. When a man is happy with a beautiful woman, when a woman is happy with a handsome man with her, and I'm proud of being there. That happiness, that joy, creates a happiness in the fetus. It comes the same, it's a combination of the two.

Doesn't mean that other people can't do it. But the same, when you see the brightness out of it, it could be any color, any race, doesn't need to be very handsome, pretty children. Handsome, prettiness, beautifulness, (that comes) out of the conduct, out of the physical behavior, physical life, not the beauty of the face. "Beauty is a skin deep." (2:42). This is what mankind has to understand.

We learned a lot with the new understanding of the cycle of life, people more, and more understand. Then you understand, I always said that, but it's not cruel, but if you understand it fully. The true essence of one life child policy of China, if understood in the level of the Soul. To keep that one life, one soul to the point of his maturity, to perfection. It's more than enough to have one child. It's more than enough, it's like an army, to look after the perfection, for that single child. One day, man will understand it. You don't have time for more.

But nowadays we get them the best cloth, the best, but we don't nourish their Soul, that the best will come for its existence. It was very, very, very interesting how man will change soon.

Any other questions?

Q: … Good morning Mr. Keshe, (2:44). and a good morning to all present. Mr. Keshe, I was watching the 380th KSW, where you show a position below the Uvula, and explain that the higher force field of the air is transferred to the Soul of Man. Then you explain that the positioning of the mouth, and the nose is planned by the Soul of Man, for its own use. Further on you say that if we create a condition below the Uvula, we can expand the Soul beyond the physicality.

Then I moved to 125th KSW, where you explained the interaction of two reactors with two nucleus, and then you tell us to go to the first few pages of Book 1 with that understanding, and when I read pages 14-15 and 16 you talked about reactor technology, Fission and Fusion by Plasma Dilution, where it talks about plasma dilution and .. the Coulomb Barrier.

Then I continued watching the 125th KSW, then you call Douglas from USA where he talks about making a reactor with 2 nuclei, in which he had copper oxide in the center with water plasma CO_2 plus a drop of his blood, and in the outer ball CH_3 with liquid, to elevate the pH, and he talks about the plasma light, that he saw when he rotated the balls, and also tells that his wife saw him move in slow motion.

So, I ask you, … (2:46). at that point there is a connection between the CH3 carbons of the outer ball and the CO2 carbon in the center, and since Hydrogen is lighter than Oxygen, it expanded the fields? Was this the result of the Plasma dilution, and the breaking of the Coulomb Barrier as you talk about in the book?

K- The breaking of the Coulomb Barrier it creates, releases energy, and that energy is what we see as light.

I was explaining yesterday to one of our Knowledge Seekers, the body of the man, the energy within the body of the man is equal to 18 Hiroshima bombs. If you calculate roughly how many cells are in the body of the man, and how much that energy was, then you can find out the energy of each cell. Then each atom, which combination of it's work has made that cell.

But it's not just that energy which creates the light, it's the speed you release that energy to another environment, that the friction of it, releases the light. This is part that a lot of Knowledge Seekers again don't understand.

When you release a nuclear bomb, there's no harm done, it's just a massive energy. Unless, and until it hits your body. (2:48). That energy is counted, what effects will have on you. How much it enlightens you. How much it will move cells within your body, and how much other things can happen with it.

So, it's not how you connected the carbon and what was the energy, it's how you manage to release, with what speed, that one. So, we see this as part of the work. How we create that speed of release, and sometimes you can do it by stripping, sometimes you can bring it by collusion, and sometimes bring it by all sorts of movement. How we understand it.

You might not see the light as a visual light, or you might see the light at the Soul level, because that light still comes from interaction of the fields. Coulomb Barrier is another skin on the structure of the onion, still there is more inside it as you peel, one shell to the other, and the other. (2:50).

I just been told that the universal picture, the twins, has already been sold. So, it's only the other one left.

You've got to understand that the collection of fields and their interactions which creates, and how much you can add on, and what you can strip, which releases. This is part of the work which we are busy with, and understanding of it, will create a lot of mayhem for a lot of Knowledge Seekers.

Any other question?

Q: Mehranez … I'm glad that Knowledge Seekers are taking part in the researches. I hope one day it will be my turn. Now that you answered the questions about the physical

problems related to Soul, if you permit, I have a question of which, it's a long time I wanted to ask, but I didn't permit myself.

It's about a person who is born with the part of the eye, (2:52). the nervous system in the eye, the nerves of the eye don't work from the birth. Even though the father is a doctor, they couldn't say what it was. Only that the mother had fever, maybe for a few days. So, this person is a complete adult, very gentle, extraordinary memory, he could have with his eyes, which are very little capacity. Get a post-doctorate in abstract mathematics, and he remembers everything he reads. Very human, very outside the standard norm, kind person. Now he is adult is getting old, and I wanted to know. First of all, what does it have to do with the Soul of the parents, or environment at birth, does it have anything to do with that? Or is it just an accident? Is it just by something in this person who wanted to show even with these eyes, can do something? If there is something in future, to do with people who have low eye capacities to do things with their mind, or Soul or brain? Is there any future betterment for these people, when they get older?

K- It's a combination of everything. It's a combination. We've got to understand, if I can go deeper, because we have to understand it. (2:54). Some people might say it's cruel, but it's the reality of it. It's the combination of all what you said, plus the interaction the fields of the Souls in the dimension of physicality, of their forefathers.

The way we look at the eye of a child. We say, "oh, it looks like the grandmother, mother, grandmother used to have this color of eyes, or this color of hair, or this kind of hair," yeah. So, it is a collection. That's why they say, Bahaulla, bless his name, said something very, very interesting. He said, pray for your children 20 years before they were born, before they are conceived.

Most of the people in Iranian culture and Middle Eastern culture used to get married at 10 and 11. It means that the grandparents have to pray for the grandchildren to be born, not alone the parents.

This is what we say, go back to understanding of the true life of Mitra.

When you as a great grandfather, great grandmother, don't do, don't say wrong, don't do act wrong, don't do wrong, or think wrong. So, and your child learns from you, that perfect child to be born, the grandchild, or great grandchild is still perfect, because it's there, condition of the environment is there to interact.

But you create a perfect Soul. That with it, will use that imperfection to become a source of elevation of the others. We are here to serve, and not to be served, at every level. You understand? (2:56).

This is what we say, "what did they do, was it?" No, go back. If you inherited the color of the eye of the great grandmother, so you did her sins. So you did her beautiful work. It's not exclusivity, it's inclusively of all.

That's why when a race all work the same way, do good, and do everything else correct, the society becomes correct. Then what do you expect?

There is an understanding of the Totality, which is the biggest problem. We always look at the individuality, and single positions and phases. We don't look at the total.

Q: Well, I thought that his both sides, are from military family.

K- ?? military family. Who did they kill? Or what did they do? or who they supported? Doesn't go what you did, it depends. I mean, what kind of job you come from the background. It's what was the outcome of the background, the Soul of those ?? who you touched.

I was talking to a world leader, sometimes ago. Very, very influential world leader. His words were very touching. (2:58). But, his understanding of separation from it, was in a way very touching too. As the head of the state, the last say, if somebody is sentenced to execution, goes to him, or to the head of the state. He said, I cannot carry such a burden. So, I have put a group, they decide, that I don't have to carry, if there is a mistake in judgment. That I do not bring that problem into my bloodline, by killing someone who is innocent.

It shows how far this man has thought about even his action will affect his future generation. This is how we should live. I admire his work. I've done a lot of work around him, with him. It's amazing how, as somebody who never had to work in this life. He is born and bred with a silver spoon in their mouths, as we say. He could have anything, any man dreams, but as a head of state he does not want to carry the burden of his judgment, that it might touches his future generation.

This is how man should be. Then why do the grandchildren and children come with what we have? (3:00). And the great grandchildren, and God knows the whole race, or whatever, which comes from it.

Any other question?

R: .. I also wanted to know if you wanted to play the video of Joel Richard. The grapes video. Still want to play that as well? How would you like to proceed?
K- Yes, yes. Why not? Is Joel online himself, that he can explain? Do you see him?

I put the pictures of the two paintings, which is done during Uno center, they are a couple. One is already booked and sold. I think it's this one, it is the universal one. The other one is still available.

Let me see if we see Joel. Yes, here is with us. Let him explain the background to this video, and then we show the video. Joel, thank you very much for being with us. Would you like to explain the background to this work? What we're going to see please.
Q: Joel .. Hello, Mr. Keshe, hello, everybody,

K- Hi Joel, thank you very much for your hard work over years.
Q: Thank you. First, I just want to thanks Yvonne, Mark and Rick to send to use this video, and thank you Mr. Keshe for bringing us the technology and encouraging me to shoot this video. So, we have done it last year from March to…
K- Could you give us a background…. please. (3:02).

Q: I am a Knowledge Seeker living in France, in southwest of France near Bordeaux. I am studying with, during four years, and I try to help many farmers in agriculture. I spend the technology in France from east to west, and we are going from Bretagne to Marseille every month to spread this technology. So, near our town we have many vineyards and last year we decided with you. It's you who have given the idea for this video. We are shooting it from March to September, and during all this or this period we have shot every 50 days with drone and camera, to show you how the Gans were able to protect and facilitate the growing of the grapes.
Sorry for my English. Do you understand me? (3:04).
K- Yes. So, carry on please. Explain to us what would see in this video, please.

Q: .. We have started three years ago, and it was at the beginning. We have only one parcel to experiment with these Gans's. And after the first season we have seen that all the grapes were very, very good health, and they didn't have any diseases, during all the season. In (our area) we have many problems with several diseases and (for our grapes we had) nothing. We have continued one season again, and again, and again, and today we are harvesting now in 2022. And we have no problems. This is ?? (harvest is) beautiful, despite the weather, where it was freezing in the beginning of the year, and the bigger it was on July and August. So, if you want, you can. (3:06). Rick, you can play the video, if Mr. Keshe is ok.

K- We are perfect with it, it's just that we needed some explanation, that it's not just a video, but people understand the whole thing behind it. Rick, would you like to play the video, it's about 18 minutes.
R: Yes. Just to let people know it is in French, but it does have the English subtitles as well. Okay, let me just double check here. Here we go.

<<< **Video showing the application of the Technology on vineyards** >>> (3:24).

K- Thank you very much Joel. That was nice. Could you explain to us, because the thing was going too fast. What was the outcome of the harvest compared to the natural one? That others who don't see the video, they can understand it. People just listen to the voice recording. (3:26). >>

K- What I said was that because a lot of people listen to this as a recording, they don't see the video, or they just listen to mp3 of it. Can you tell us what was the outcome? What did you, what was the difference at the harvest increase, or reduction, the quality, or the quantity, or the color, or whatever?

Q: When you do one yard, we have laboratories which are testing the vines, the grapes, during all the season. And of course, we have a criteria of quality, and quantity, of sugar in the grapes and all are very, very good. We had no problem with that, and also our harvest is in abundance. (3:28). Many, many, many grapes, with many grapes.

K- Yes, but was the harvest more or was it the same?
Q: Yes, it was very, very more, more.
K- How much? What percentage?
Q: 150%
K- So, one and a half times more harvest. How was the quality? You had no diseases during the trial?
Q: No diseases, and the quality was very good.

K- Okay. How much does it cost compared to the chemical side?
Q: Chemicals on these parcels, cost 80,000 Euros per season?
K- And how much does your system cost?
Q: Nothing, Mr. Keshe.
K- No, I mean, you still have to buy the pipe, you still have to make the Gans.
Q: Yes, but 200 Euros, perhaps, maybe.

K- How much do they need to pay attention to? All the problems we have with agriculture, especially with black seeds, wheat, rice and the rest, to continuously keeping the system, the vegetation growing with the feeding with Gans's is very difficult. They just give up after about three, four weeks. Then it comes back to beginning. (3:30). But, how do they manage it? How often do they have to look after this system, the Gans's and the rest? Or once they put it in the beginning of the season, and that's it?

Q: Oh, no, I put it in January. And I am looking every month
K- But you go and fill them up?
Q: No, no, no, no, I don't have. Because many of them, the majority of the rings are four years old now. I have took several of them and brought them back to my laboratory. All the Gans's are staying inside the rings. No problem with that. But, we have definitively stopped with the sphere.
K- With the rotating a sphere.
Q: Yes, yes, … we are (just) using the rings.

K- Okay. Can I add something here. Keshe Foundation hopefully for this next year, coming up season, we will introduce a new kind of agriculture. The way we've done at the moment, we are busy with the flights and everything else, which is going on. It is something we've done. But then you don't need to harvest, or to put rings on it anymore.

New technology will be introduced, we already developed this, just we don't have time to bring it out in the market, or to show it. But this we developed, because a lot of seed growers like wheat, and the rest, need that to be benefited all the time. We explained in a

couple of teachings before. (3:32). I know our friend in Australia, and others in Canada, were looking at other aspects.

But this will not need any more watering or changing, you totally handle it .. in new way. We change the whole environment as a whole, not just a specific. And you can change the harvest. I mean, if this year, you want a slightly different kind of grapes, you can change the environment for that grapes, not the same as last year. You understand? So, it's very nice.

But how many farms are you looking after now? What is it? How many?
Q: In France we have many vineyards in Bordeaux. And now we have farmers in Bretagne .. is in the West of France. And we have farmers, which we are using for vegetables, and they are beautiful results. Very beautiful results, with more harvest than before.

K- Okay, that's beautiful. Thank you very much.
I'll leave it if there's anybody else who wants to ask a question.
Q: Thank you Mr. Keshe, thank you for all you do for us.
K- Thank you very much. But it's beautiful what you've done, and you put years of work into it, to show the change. It's amazing what Knowledge Seekers are doing around the world in their own field of work.
Q: Oh, yes, I thank you very much. But, and I can help everybody.

K- Thank you very much. If there are any questions, please ask. (3:34).

R: There were a couple of questions that Joel had answered in the chat, about the Gans rings. Do they have only Gans water? And you said, no, not only plasma water, we need solid Gans to stabilize the energy flow.

And Nikolai said, do you also put in amino acids? And you mentioned no, to that as well. There is a link in the chat for a better quality video. So that's good to see.
Q: Yes, I had put the link for the best criteria results ?? of the video.

R: Yes, thank you. And then a couple of good comments for thanking you, and bravo Joel.
And Hassan has a comment, the wine smell, taste and effect may take us to other parts of the universe, maybe. Maybe you'll have a special wine, you know, the galactic wine, or something, you have a special name for it.

K- Have you followed the wine sold? How do the people who consume it, feel like?
Q: Yes, we have begun now. (3:36). Because 2019 harvest is now in bottle, and they tested their taste it. It's very, very beautiful, beautiful.
K- But how does it feel? How do they feel, people feel with the drink? Because I remember, if I remember correctly, Lisa and Jim did some studies in the supermarket, and they saw people buying more of their products.
Q: Also our products are sold now.

K- Follow and see who drinks it? How they feel. If their drunkenness is more pleasurable the next morning after drinking a bottle, or is it the same as before. Someone says, how can we buy a bottle of wine, and these wines? You have to.
Q: I will send you Mr. Keshe. I will send you some bottles, if you want.

K- Yes, but we need the name of the brand. They are asking for, that they can ask for. If you give us the name of the brand they can buy, and we'll see if we can get the Knowledge Seekers drunk with it.
Q: All the harvest is sold now.
K- Yes, under what name?
Q: It is "Chateau Libby."
K- Okay, let's see if they can find it and they tell us what's happening with it. Thank you very much for the hard work. I know you're not going to stop.

R: One question, does he keep the tubes in a star formation? Or what other form? (3:38).
Q: No.
R: And I took this picture out of the video. Is this the formation that you use? Or is this just a demonstration?
Q: No, no. It's what I use. The weakest feed the strongest, it's all. We have no Star Formation.
K- Thank you very much. It's years of work in 18 minutes. It's not. It's not just ?? yet.
Q: Sorry for my English Mr. Keshe, and all the people.

K- Thank you very much. It was beautiful. Thank you very much for the presentation. Thank you very much. It's a long time since we have shown the work of the Knowledge Seekers. I hope a lot of us enjoyed and understand it, and I know a lot of people will use it, and we'll see what it becomes. Thank you very much Joel.

Is there anything else?

Q: Is it a pyramidal form? Is it a form of a pyramid? She's trying to find the form of the.

K- Grapes don't decide how they grow, do they? In pyramids or not. It's just how you distribute the fields.

As I said, this week we might show, (3:40). we try to show the new Enhancement Unit due to developments, new developments in, what you call it, the knowledge and extension of it. We'll try to do it next week, hopefully. Where we show the both, production of the gas and the energy unit.

We will put a cap on the sales of the generators very soon, that we can do work with other ?? science. People who place their order, please complete it. I know a lot of people are trying to get it done one way or another. Those people who wanted to do the Enhancement Unit for Moon and Mars, please complete this. Because we would like to start the preparation now, that we have you ready for the January, February. This might include even to bring you to Linz couple of times, to preset, to structure it the correct way

for the, what we call, the Moon testing. It's just that we bring everything together ready, that when it comes to January, February, when we start testing, we have a full, what you call, everything done in expansion of the Soul, we are understanding, we know what to do. Don't forget, we try to bring the succession ?? between three to five days.

It's not going to be you walking in and just taking the flight. In the future, ?? when you book, but for present time, in a way, we would like to prepare the ground for it, and we want to start in September, October to prepare you for that final, what I call, transmutation test. Please complete your forms, and the rest of it, which is connected to it. (3:42). We had a Knowledge Seekers ask us, cannot pay half of it now and half of it prior to fly. Yes, it can be done.

Please understand, you're entering a new space technology, where you won't take you hours to get to the Moon, it's instantaneous. Then we want to monitor what changes. After you come back, what monitors, we want to monitor what happens. The same as now, we monitor with some of the people who went through the Enhancement Unit in past few weeks. We are monitoring how's their response, what they do, and how things has changed around them. As we develop better, we want to understand how the process works, and how everything around us can be changed, can be affected. We'll see how things turn up in the coming weeks and days.

We'll literally explain it to you, as we go. This knowledge as it's learned, is shared, and no technology has ever been shared like this before. You see the patents three years, five years to come out, and then your limitation, of whatever. Knowledge shared literally step by step, day by day, amongst all of us, by all of us, with each other.

Thank you very much for today Rick. I hope those who buy the painting, or bought the painting, enjoy them, let us know exactly how it feels, and how what it brings to them. Thank you for today. And hopefully we'll see you next week.

Proofed

449 KSW September 8, 2022

END

450th Knowledge Seekers Workshop; September 15, 2022

(Quick Index 22 p , Transcription, Proofed Need to do ; Key Phrases, Words)
(Auto transcription from Elias)

Flight systems talking to each other; Satellite Souls will help bring change - each responsible for language; Process of Transmutation explained; Plants are also Gans; Change will be like hurricane; When family structure is bad - becomes normality - but STM can decide to change

Topic Index

Knowledge of Creator has no patents; Flight Systems have soul talking to each other; 2 leaders of world religions have died; Manifest dinosaurs from egg fossil - but MG fields have changed how would they look; Satellite Souls can have conferences instantaneously; What creatures will walk out of flight room; What is expected of man by U Community; Every soul will be enlightened - end of religions; Non-tangible Chip; Satellite Souls will be point of energy and knowledge transfer to their language group; When clergy take off frocks - come to you; Many of you will become enlightened; Also to transmute soul of animals and plants; STM and P protect each other; Your shape may change in if the fields are different; If STM does misconduct it will disintegrate; The pleasure of ascending to closeness to Creator; When man is ready bring cameras in to show the transmutation of soul to P; Neil Howe of KFTV passed away; We do not need to save the P - cycle of life goes on; More plasma paintings - you can submit own abstract artwork; Leading doctor to present cancer process;

Process of Transmutation is first STM goes over, then STP transfer inside it, if you feel your soul in over system and both souls agree - transfer the P; Physical features can change with different field strengths; Later will be taught how to preserve original shape of P; Transmutation process can be done by listening to audio recording - as done by Brazilian group; Crying in emotion of Soul - no tears; Tiredness comes from P trying to handle expansion of Soul; Belgian who poisoned Mr. Keshe was felt by system; Transmutation of Soul done in seconds, P takes 9 months to adjust - other dimension in U may be in seconds; But still have to mature the Souls; Child of Mitra is amongst us; Man will learn how to mutate; Soul knows how to behave in other dimensions of U; Chinese group would like English transcriptions; KF will translate soon into many languages; Xylem and Phloem of plants like the blood and lymph of body of man - everything that enters body or plants is in Gans state; No different between leaf and finger of man; How much can you accept to develop your Soul?; Adding your emotion and knowledge to a tool or something for other to enjoy - you increase your own knowledge; At moment no crystals in flight system - later will be able to take suitcase on flight; All creation has emotions not just humans - galaxies have emotion - explosion like brain hemorrhage; Sacrificing oneself is more prevalent in UC - but extremely rare with humanity; Why God preferred man to angels - Knowledge of Creation shared with man; Influential lady helping bring out technology in background - more than any KS will do; KF has powerful allies; About praying for U - is your Soul big enough to benefit Universe?; Your Soul decides not priests anymore; Others blame you when you share new Knowledge - ignore them; Learn not to just react to things - analyze them first; A major European government looking at Gas and Energy Unit - want to see it work first; Blueprint Day planned as soon as it is ready; Suggest gas and electric T added to building when it is built, as a standard; Waiting to release new Corona version - plasma process; Talks about how Queen most evil person - was hidden from public - explains some of her evil deeds - always wanted to be the best - eliminated those who were in the way of her designs princesses and monarchs; Very positive statements about releasing T soon; Iran a religious monarch being born; Imprints from family background imprints on DNA and effects the STM - but STM free to choose to go right way if he wants to; Have to balance actions of ancestors -

example of Tribe of Moses; KF has been working for a year to bring out T, all the investments but still the thing is not happening; The time is approaching and when it comes it will be like a hurricane, hold onto your seat - humanity; We are all waiting for it to happening - any day, but everything has to be in its right place and then it will happen; Child born in a family of thieves and is encouraged to steal plus the genetic influence - How can Soul be responsible; The Soul makes the decision; Talks about the lady at top of KF from pedophile family - she tried to change but could not - that behavior structure was "normality' in family and life - she went back to it. Now KF is cleansed of Belgians and pedophiles; Will announce Blueprint Day when ready

ENGLISH TRANSCRIPTION

(:17).
K- Yes, good morning, good day to you. As usual, whenever and wherever you listen to the sales of Knowledge Seekers Workshops of the Keshe Foundation Spaceship Institute. We welcome you back. And as Rick said, 450 teachings on this series alone. (:18). And as we were discussing before, we past nearly 500, when you put everything else together, maybe even plus. The most important thing is not the numbers, but how much knowledge we shared, and how much knowledge we gained, and what will be the future. When you listen to this Intro, you look at the flight system, it talks about how man has achieved to whatever. And when you now know the technology, which is developed, this technology, this even recording, has become in a way, obsolete instead of aircrafts, instead of copper balloons, instead of plasma reactors.

Now we use the reactor of the man the essence of this creation, which is the soul, to commute, to transport, to in a way change the structure of the body of the man. In part of the Intro we heard, that we did a test on a December 2014 with three different parts of the world, Canada, Italy and Germany. We used a Canada and Germany as satellites. Now just change the name, you are becoming satellites. You're registering yourself to become that step change, where the source is your soul, the energy which is within you, then being reactors rotating. A dynamic structure of the "reactor" soul, has taken place, instead of those two units.

Now we are getting inquiries from all over the world, that Knowledge Seekers (KS) want to be Satellites for the next phase of the development. (:20). You can go on the website of the Keshe Foundation (KF) and just become a Satellite, and register to it. Now, when the test comes, we all become part of this process. When the test comes, we all take shape, we take our position to bring the change.

It's interesting how as I said, if you read my books, if you read the patents, depends on your understanding, you take from it, what it comes according to your intelligence and knowledge, you have. It does not need a PhD, does not need a Master's, or being an engineer, or a doctor. We've seen one of the most beautiful people, in Keshe Foundation, have no education in science, and they are doing better than many of the others.

But the interesting point is, that the knowledge of the Creator has no patent. And this is what we teach, how you were created by the Creator, and how you can change, you can move, you can create condition of the knowledge, and the rest of it.

This week, we have entered the phase of flight test by Soul. Yesterday, we switched on the systems for the first time, and to our shock and amusement to our, and in a way, pleasure, we went back to noises, systems interacting, creating fields, energy supplies, interacting with certain reactors, and the flight room (FR) was buzzing with noise. We walked around seeing where the noise comes from. Why it's so clear. And it has a rhythm. Last night and this morning, early hours of this morning, (:22). I received a message that, it's like the systems are talking to each other. We recorded it. It's like they have the souls.

In a way they're getting ready to transport, transmute the soul and the body of the Man. It's very touching when you see how you read the patent, how you read the book. The intelligence has gone from the spaceship into the "space soul." It means the same thing if you understand it. It means the same and it works the same way. This level of knowledge cannot be patented. This is a gift from the Creator, and belongs to all of us. But how will it be used. How will be, how will be used to develop the next step for mankind? How will they act with? How do we extend it? What can we do with it, to extend, to bring a condition of peace on this planet and beyond. Not to abuse it.

We see in the past 7 to 10 days, two of the world's religious leaders have "bit the dust" (died). We see again a monarchy of religions is coming up, where we got the monarchy of the Crowns. These things will be abolished. These things will not have a room in the next few months, and weeks, once this technology expands beyond.

We see, we have to understand, what these new technologies brings us. What these new systems in Linz will bring forward to us. (:24). Talking to one of Knowledge Seekers in the past few days. Passing an egg of a dinosaur in a museum. I was asked a question, what happened to these? Can we bring these back? Up to now we couldn't. Now we can. But we have to understand what we are going to get. Because now we know with the new technology, you will appear according to the time, position, and the place, where conditions will dictate how you will become. How you will be seen.

Today, as I've explained many times before, in our Solar System, the Sun is in the center and Earth, it's somewhere around this point. When the dinosaur existed, we were somewhere around this point. We're moving in (towards the Sun.) The gravitational pull of the Solar System is pulling the mass.

But the beauty with it is that, at this point dinosaurs were this high. In today's position, in atmospheric condition, and the condition, even the soul of animals still the same, brings a new understanding. The dinosaurs of today cannot be more than this high. (:26). Because as we go closer (to Sun), the atmospheric pressure and everything else has changed. But in essence, the soul of the animal still the same.

We will see in the new reactors, in the new flight systems, which come into operation, we can put you in one system. And you will be two meters high. We transmute you in another system in the same room. We create a condition of Planet X, whatever could be. Your height will be one meter. You'll be puzzled on your own manifestation of how come I shrunk. How come I have four arms instead of 2.

This is the reality, in which within the next few days and weeks we will be testing. This is a reality, which we have developed technologies for it, to not stay as a theory and becomes a technology. The system set up, allows us to weary the condition in the destination. But if we bring you here at one meter, and then at the same time when you arrive, we change the condition of here, to Mars. You might appear here, different height and different shape even you're still in the same system. (:28). Now, this is a reality, this is not something theory. We have the machines, we are testing it, and we will go out to endeavor to test further.

You will remember when in some of the teachings I told you, you give me a fish tank and I give you with 1 drop, a fish. I drop you in, the soul of a fish. And the fish will manifest itself in that water, as it wants.

In the Linz center, we have a fish tank. We brought a fish, nearly a year and a half ago, from the Iranian celebration table, and now it's become a big fish. We'll put this tank, in one, and we'll manifest its soul, and its condition in the other, and we show transmutation of the fish, animals, humans and the rest.

But it goes back again and I referred to this in different ways, by the say of the prophet, even a stone has a soul. Now we have a stone of egg of a dinosaur. What happens when we enlightened the soul of this stone? Would we get the dinosaur? (:30). And show the beauty of it. This is exciting time in research and development, and new understanding will come forward.

If the robe of the Christ is true, and it carries the essence of his light, with 1 thread we can manifest the soul of, and the manifestation of his physicality (P). And if it's a false robe, then we know. If the Jews have the clothing of the Moses, we shall create that through technology (T) and understanding it. So be it with the other prophets. So be it with those who committed heinous crimes, we'll bring you to answer to humanity, why they did, and we learn from it, and our children will never commit.

The new technology brings a new dimension of understanding. The new technology, as you become Satellites, we can have conferences in any corner of this planet instantaneously, when you as a soul, become the guests of the souls of the planetary system.

I received a small message this morning. Do we have a permission from Universal Community to go out? I said, I wrote, the permission was given, and that's why we are here, to get it working, to get man out. It means man will have. Man has reached the level

of understanding of the position of a powerful source of energy, and life, in the universe called, (:32). the Soul of the Man (STM). It's your intelligence which extends it. And it's your intelligence which restricts it? And is your intelligence who accept the ?? dogmas to the point of its intelligence and understanding, and at that point we will ?? start.

We have started the flight system tests for transmutation from one system to another. But the interesting part for us is, how do we see the STM in the new system? How would we communicate with this soul, once arrives from its destination? For me, it's easy, I know what to do. For humans, as they are physical, they have to see something to believe it's there, they will have a problem. But the beauty of it is, we send the soul back, and the soul confirms, receiving the message, and being with us, and taking it.

Those of you who have become a registered Satellite will be contacted when the time comes, to be ready in a certain way, to make your soul accessible to receive. Be it the Souls of the Man, the Soul of the creator of other kinds of lives, and those of the Universal Community. Do not be surprised if you see new things around you, you feel new things around you. (:34). The essence of the presence is very strong.

Yesterday when we turned the system on, for the first time we felt it in the room. It was shocking. Even with the experience we have, we get surprises. To understand, that you are in the presence of the others, even though you cannot see them. You can feel them, because in our system we have created a condition of a position in the universe. And our system has become accessible to those.

It will be interesting to see in the coming time, what creatures of Creator will walk out of that room. And mankind will become familiar and be friends, new creatures of the creation. Whatever I have said, I have delivered. Be ready for this change.

The interesting thing will be, if the Austrian immigrations have visas ready for "Man from Planet Zeus." And how do we admit them into Austria? Do we create them a birth certificate? Or do we create a birth certificate for other citizens of the universe, as they walk out of the room? Do we treat them as celebrities, or as strangers? Or do we treat them as one of us, in the level of the soul?

The reality is that mankind has entered this what I call, "zone of interaction with Universal Community, and with the Soul of himself. In the next few weeks, (:36). by introducing the secondary set of what are called, spaceship units, it will create mayhem for many of you, and will change the course for many of us.

We reckon in the next three, four weeks, if our team is good enough, for the way they are putting everything together, the new systems will take the place in flight zone. We can keep you here on a condition of the Earth, move you here to be on Mars, move you here to be in the space of another position in the universe, and bring you back to another, and return. And you will remember all of it. And you'll remember, every language in the memory, you spoke in this journey.

The beauty with the new system is, that it brings the beauty of the Creator. Our systems are set. And our systems are ready to bring the new technology forward to all of us, irrespective of our position on this planet and beyond.

In the coming weeks, we try to bring the communication with those of, who we consider as the member of Universal Community. I'll make arrangements that we can listen to the communication and the words of the "Man of Universe," what is expected of us. What we have to do to reach that ultimate goal of the opening to Universal Community. As you call it, "a message in a bottle." (:38). The message in most cases will not be heard by the ear of the man, but will be heard by the Soul of the Man, and the mankind will respond to it.

When we do this, we'll see the end up religions, and the abuse of the frock, of the name of God. We'll see the end of all what we call, religions, because every soul will be enlightened. Then we'll see the next step. Then we'll see what mankind will decide for itself to go to the next step. The technological development on this planet will not stop, because it's part of the pattern of living here.

But new technologies emerge, which bring new understanding to the work all these processes. As I said, we'll introduce new Chips, which is no dimension of tangibility. And Chinese cannot boycott it, and ??Americans cannot restrict it, but every nation, every man, will make ?? what he needs, for what is his purpose or need be. As we see, usually, they say they break a bottle, when they inaugurate a ship. This has happened yesterday, and we are inaugurating the opening of the first space reactor, which allows the STM to travel from one point to another, with the point of observation of the man.

The technology cannot be written to be patented. The technology of the Creation, (:40). has to be felt by the STM to be understood, and has no patent. Enlightenment is the patent. Enlightenment is understanding the patent of the Creation and the Creators work. We'll bring you more and more of this knowledge, and we open the door, we open the door up the knowledge of step by step. And we'll bring this forward to the point that, most of humanity can understand, can see, and can take it up and replicate it.

It will not be belonging to a nation, to one person, or one culture, it belongs to all of us as humanity and belongs to the Universal Community. It's a gift for mankind, for him to become kind to himself, that can be a kind of a man, that can be kind to the rest of the Universal Community.

In so many ways, yesterday, pre-testing, being in the room, and then going back again, and again, and trying to understand if the systems are ready for the next step. If the systems are there, to bring the change. It brought forward, that the man has jumped, and frog leaped probably across the knowledge of the Creation, and the Creator. This leapfrog has been so huge, that the man cannot even believe itself, that it is possible.

The knowledge has to be spread in a such a rapid way, (:42). that no nation stays behind. No culture stays behind. So in the "Satellite Souls," which you are all registering to

become, it's essential for us to spread this knowledge across this planet. We don't use what we call, the Satellite people, volunteers, just transmute to. We use them to transfer energy to the other souls in their language and their environment. In the way, those of you who became the Satellite, registered become Satellite, you become the Universal Council "Soul Members Support" team.

In a way, you will see the next step, which is planned for this part of the what I call, expansion of the knowledge. It's not that we send you, or we bring you things. Is that we use your soul. In a way, you become messengers of the message of the knowledge of the universe, in the language, that people in the emotion, that the people around you understand and can accept. It's not teaching anymore, by making MaGravs and showing how to make Gans. But it is the way that your soul becomes the teacher to the others, to be elevated to understanding of the teaching of the Creator, the knowledge of. It can be done in different ways. But all the purpose is to change ingrained in the Soul of the Physicality (STP) of the Man, and the physicality of the man to kill and destroy.

This way, man walk away from it and accepts in Totality, (:44). not just individuals. Those of you who volunteered to become Satellite, you have not understood what you have walked into. That you become absolute Satellites. When you have a satellite over a country, its waves covers the whole of country and every creature. It depends what you have done, that you can receive what it sends, and if it is for you to receive it. Understanding the work, these Satellites of the Soul are connected. And so we do not need to put you in the space to be. You're already spaced in the position that you are.

We want to change the mankind from the essence, from the path of killing, and war, and conflict. Then you become the ambassadors of peace. You are the Satellites of the Peace, this is your job to spread this, in a way that it changes, ingrains in the animal, to humans and the rest. The responsibility of those of you who become Satellites is chosen by your soul. And those souls have the responsibility to change the course of Humanity. This is thanks to the new knowledge. This is thanks to, for whole nations to understand to accept.

Do not be surprised, that you'll see the clergy will come to you when they take their frocks off, and they'll walk away from what they preach. As now they are enlightened to the knowledge of the creation. We expect, many, many clergy's walk away, and leave their frocks behind. That some will even hide it, because of the abuse they've done while they were wearing it. (:46). The time for this, is a handful of time, not much.

We have to see the end of two, that begins with the new cycle. And the 2 have completed, and we are waiting for the cycle, by you, to start, in how you go ahead, and how you develop the understanding. The center in Linz is a beacon of knowledge from the Creator, and you are the Satellites to receive it, and to spread it, and nothing else. Don't be so arrogant, that you become. Be humble, that you are. And this will carry on with all of us. This will carry on with many of us. And many of you who came to Linz in the past few weeks, you'll find out, that you have become already part of the Satellite system.

When you listen to the two systems, yesterday, it's literally, it's like they are in pattern of adoring each other, the noise is so intriguing. But you feel the emotion, emotion of peace, emotion of harmony and tranquility, and in a very, very specific way. This is what I came here for. You feel part of it.

We set systems to change. We set the systems to be applicable for different what we call, understandings and different souls. And we see how everyone will react. (:48). And we sit and we monitor to see how you as souls, will come to understand the Totality. And you come to understand as a whole, what will happen to us as a human race. What will be the future of us, all of us, and how we have to have a clear soul, that will not allow our own tainted desires to interact with what is to come.

In so many ways. We're preparing you for the next few weeks for one of the final steps, to become passengers of the universe. In the coming time, those of you who will test, as the passengers to the Moon and Mars, gives us the opportunity for our Knowledge Seekers to understand the process, that from then on, you will become passengers of the universe. Depends where you're been the light of your soul, that will be your home, and if you accept it to be, in that home.

In the next few weeks, as we extend the work of the Keshe Foundation in Linz, we extend the knowledge of the humanity. In a way, we become the center of spreading the knowledge through the soul, and not through the books.

Many of you will come to be enlightened, and you do not understand how it's happened. In a way you receive the knowledge without a patent, as it was said in the Intro, that Mr. Stephen Hawking cannot steal it from you, (:50). and he cannot cheat.

It's the purity of the knowledge, that you receive through the patent of the Creator, and then will you call it enlightenment. How you will handle it, is your decision. How you bring it about to share it, is your decision. It will be very interesting to see that we are still developing different aspects of the technology in the physical dimension. But you are so advanced, that you think might not need it, but if you transmute into the matter state, you still need that knowledge to be able to do, and to be able to live.

In the coming weeks, we ask more and more of you to come to Linz. In a way, we request you to come to Linz, and go through the system, because there is a bigger plan in the background for this purpose. Bring with you, not your dogs, they are too big. Don't bring with you an elephant and others. Bring you creatures of Creator, that we, the same as we are transferring the soul of the Chinese, the English, and the rest, we transmute the soul of the what we call, animal kingdom, and the plant kingdom into this work ?? system. It's our responsibility to change everything, not just for man, It's our responsibility to elevate the Soul of the created, and not just the man, which has been created.

In the teaching of today, I have taught you a lot, if you have understood it. And there is a lot of hidden messages in this teaching of today. (:52). Those of you who understood will act upon it. Those of you who are still waiting, we'll sit till the cows come home. And by

coincidence, there are no cows in the universe and they will never come home. You will be waiting for a long time, which means you have not understood the essence of the knowledge. But time will change.

As I said, when the time comes, we shall enlightened. As one of the KS, just said to me very recently, how come there was no ?? interested me. I said, because you were so ?? angry in the essence of your soul. And so, we have to understand the Totality. You have to come to understand, that the knowledge is shared accordingly. And without prejudice to whatever you do.

Transmutation of the STM is very much different, than transmutation of the physicality of the man. Essence of every cell, an the essence of every being within. The transmutation of the soul is the easy job. Where the transmutation of the physicality is within it, and it does it itself. Because it wants to guarantee its existence. In a way, as you protect and hold your hand out, or in front of you, all your head, when there is a danger, to protect that soul. Now the soul protect that physicality, that when it manifests itself, the soul itself guarantees its own existence. In a way, it's a mutual interest for the STM to protect the physicality, (:54). that when he chooses to manifest in dimension (D) of physicality, he has something to manifest yourself into, that he protects it.

But remember one point, does not matter to what shape, what combination of shapes, you'll be manifested, anywhere in the universe or on this planet. And that point, you have a soul within you, and it's your job to protect it, and it's your job not to abuse it. Just so, when you get to the water, don't drown yourself. Think that it's over, and I can do what I like when I got here. You'll find out, because now your soul has been trained to work. You will find out your physicality will be very temporary. Because now the soul has learned how to free himself from the shackles of physicality.

And then the game starts. The game of Mitra, do good, think good, and act good. Does not matter in what the state of Soul of Physicality manifested. The preacher is you, the teacher is you. And the only person, the only entity, which can go wrong for both, will be you.

When the soul does a misconduct, that will be the end of the life of the man, as the soul will disintegrate itself, to become the food for the next cycle of Creation.

Many of you wondered, when does the soul ends. The work of the soul does not end. (:56). But if the soul picks up the habit of the physicality, you will find out there is ?? life to live for both dimensions. And then you'll find out the race is to be better in physicality, than the soul condition, and it will be better in the soul condition than physicality, and this will create a perfect creature. It's not fear of demise, it's the pleasure in a way, ascending to the levels of the closeness to the Creator.

Don't forget the same applies in the same position and condition as it does, with the Sun and the Earth, and the bigger, heavier things in the background. To be closer it goes with the Creator, the Soul of the Man, and the Unicose.

Then we understand how everything matches, how everything fits into, and you're responsible for it. We just guide you to it, you make the decision. As I said, very soon you shall see that no one will go to churches, and the mosques, and synagogues, and the temples. As the man has become wise to the freedom, the temple of the man is the STM, and actual Temple is the Unicose. Why do you choose a little what I call, bricks and mortar.

In the coming weeks, once we feel the humanity is ready for it. (:58). We'll take the cameras in for you to see the transmutation of the souls. We take cameras into the flight system for you to see the transmutation and conversion of the soul to physicality. It'll be interesting time, because it cannot be denied, what is in front of us. A new method of transmutation and transportation.

Dean keeps on telling me, "I'm ready to go in. Whenever you're ready, Mr. Keshe." Dean you have to wait till we are ready, that you can come in with your cameras, that we as a human race are ready, to see, and to accept and to bring the change. We don't want any man overboard. As everybody is onboard, and it has to be carried out the same.

I hope with the teachings of last week, this week and the coming weeks, we are preparing you for the encounter with Universal Community, and that's the whole purpose of the teachings for past couple of weeks, and the next few weeks. Understand the teaching and be prepared to encounter your fellow brothers and sisters from Universal Community, not by theory, but in reality. Because you're preparing for that point of what we call, rendezvous.

It's for you to accept, and how much shall you change? Do you want to go backwards to the UFOs to fly, or you want to go forward and travel in the dimension of the flights of the Creator. Either way there is no harm. Either way, there is no danger. Either way, (1:00). the elevation of the STM out of the reach of the physicality have to learn is the whole purpose of all these teachings, 450 of them.

We go for a break, we come back, and we have a small video to one of our beloved Knowledge Seekers who passed away this week. The head of Keshe Foundation TV section, and then we answer any question Would you like to take us to a break?

>>> BREAK <<< 450 KSW (1:06).

R: Okay, here we are back again at the 450th KSW here on Thursday September 15 2022. Mr. Keshe? Are you ready to begin the second part of the program

K- Yes, if you could please play the recording which Linz means has made and has got a copy of it

Memorial video to Neil Howe (1:08).

K- (1:09:48)
Thank you very much Rick. Neil helped us a lot to teach our TV people, normal people how to take videos, (1:10). how to make things, and how to actually run a television setup, or a TV setup. Pushing us to buy systems and computers, or cameras, from Knowledge Seekers around the world, this is what they need. And that's what they need to do. And we have a lot of good memories from him.

Somebody said, "why can't you save every life." We do not need to save the physicality. It's the soul which frees, and that's the celebration of life. This is how the cycle of life is, and how the cycle of life goes.

In the teaching of last week, if you remember, we introduced new things for our Knowledge Seekers. We brought in, what we call, new dimension (D) for us as Knowledge Seekers by sharing the, what we call, a new, what we call, dimension through the Keshe Foundation work, which if you remember, were these paintings, which were set and seen. We allowed this to be brought in, and to be shared by, what we call, our Knowledge Seekers. In so many ways, we brought two sets of paintings. Both were literally sold instantaneously, and bought by the Knowledge Seekers. A third set of these has been commissioned, which is a planetary system, it's already received the reservation, and it's more or less sold. What we've seen with the interest with the plasma paintings, all these four pieces has already been signed by me and they'll be shipped within the next day or two, whatever the shipping department does. (1:12).

We have now seen the interest allowed, and the commission we accepted, we agreed to make six new set of paintings. But instead of us choosing, you go on the Net, you put the picture, it has to be, what we call, not a face, or a building, has to be abstract. It's easier for. That a copy of it in the Gans's state can be made, and painted and sent to you. If you want to leave it to us to choose, as the next series comes up, it's available for.

Altogether, we are releasing six more set of pictures, six more paintings. Six this size, and six half this size, the six, this size, will stay the same as 3,000. The half size will be at 1,500 Euro. You can go into Keshe Foundation and book, or you decide what you want our painting to be. As long as we don't have to copy a whatever, famous artist's work. It will be done. So, this is an extension to the Keshe Foundation work. Whatever we do extra on commission, we put in extra paintings.

We encourage the painters around the world to share and send us their work, that we put out for sale. We allow the technology to expand in a new dimension. We'll see how we go from now on. So, today the third set of paintings, which is called, the "Solar System," is already been booked, and is one of our Knowledge Seekers who have booked in to be purchase. (1:14). So, we have six more to be delivered, by January of this year, we try to do it. That you can choose the paintings, does not need to be what is done. You can ask to do a scenery of the garden, or whatever, or this is what I want. It will be done by the artists. We know there are a number of artists.

We use their Gans's in their paintings, we choose the mixture of the Gans's here for the effects that we want. Paintings of the Gans's always has to be in pairs, that it creates of diversity in the field, and emotion of the field.

So, if you wanting to go to the next step, these paintings are the paintings, six of them and the commission by us. But you choose the scenery, and what you want it to be.

A lot of Knowledge Seekers asked for. They cannot register in Satellite. They can't find it. It has been repositioned as of this morning, you go into the website, in the Store, and it comes directly to it. Because it was within the Mobile system, now it's been separated into, on its own bracket.

In the next hours or next days, Keshe Foundation will have a Blueprint Day. We tried to do it today, but with the develop in the Enhancement Unit for the flight, which has the priority, it has been delayed a little bit. Maybe in next 48 hours or 24 hours, or by Monday or so, we will have a Blueprint Day, which we will show the combined Gas and Energy Generator unit.

Many Knowledge Seekers are questioning, I paid for the other generator, what happen if I want a combined one. You just pay the difference to the Foundation, (1:16). and you'll receive it. Those of you who bought generators of one way or another, we are looking in how to bring it back, that is correctly done, that we are happy and you're happy on what's happening.

The others systems which will be introduced in the coming weeks, new technologies, new products of the use of technology will be brought out. If you are looking for the medical application of the Keshe Foundation, Keshe Foundation now operates through doctors, and on the conditions you have, we are not involved. We pass you to the doctors relevant, and where they are, and what can be and what it is. These are the Knowledge Seekers, doctors, which work with the technology of Keshe Foundation. We collaborate with them to understand the extent, and the facilities and what we can support them with.

At the moment, the doctors, it depends on what condition. We are testing on the understanding of the knowledge by our doctors, and how they will handle it, and how, what it needs to be done. The doctors are looking at the Parkinson, at the moment, and Alzheimer's, and Fibromyalgia, and others, which, if you get in touch with the Keshe

Foundation, we'll put you through to the doctors. It's their job to do the job. But we don't, what we call, publicize their name, be for all sorts of reasons, that all of us know.

I hope very soon, we're waiting for the, what we call, a promise given to the Keshe Foundation. (1:18). One of the leading doctors who has used our technology for cancer, for himself. He says, when he's ready, he will do the, what we call, the paperwork. He will release the knowledge of how he himself has handled his cancer. We showed a couple of pictures of him in very recent pass. Now he informed us past few weeks that he will, when he is ready, will release the technology, the way he used the Gans technology to support himself with his cancer.

To show, as a leading scientist in one of the leading nations in the world, one of the major cities in the world, he will let us know, and how it will be done. We'll take it from there. I'm sure once he does that, his hospital will be jammed packed with Knowledge Seekers, seeking, what we call, a solution for their conditions. But this is done by the, what we call, the Knowledge Seekers, the doctors who have taken the banner of spreading the, and using the technology for its medical applications. They are practicing medicine, the doctors, and so, at the moment, if there is such conditions, we now have doctors, that we can put you in touch with, that they will decide if they take your case up, and what will be, and what they see to be done.

Are there any other questions? Or can we start with the questions?

R: So, can people write to the info@keshe.foundation as a way to find out about that? Or what would be the.

K- Yes. (1:20). We need. Let me check which one is the easiest, because this info will interfere with all our other businesses. Because a lot of things comes in there. Give me a few minutes, we'll ask the, what we call, for the IT people, which one is the best one that we can put somebody monitoring it, because it needs monitoring. Whenever it comes to health, we get hundreds of people sending. Then they say, they didn't answer us. You've got to realize, there's a limited facilities, for limited time for these doctors.

R: .. We have Julian. Julian, would you like to go ahead?
<< Speaks in German Language>>

K- (1:22). Andreas is here. Yeah. Hi, Andreas. Can you translate this for us to English?
Q: … He knows that in a alkaline environment no illness, or also cancer can exist.

K- Who says that? There is life even in, what you call, a cancer condition, in an alkaline state too, depending on the strength of this tissue. Generally they say, yes, if you have an alkaline. But, how come people with a high alkaline body, they still get cancer. It all depends on the strength of it, and how life is created with it.

Q: (1:24). He knows that, but hydrogen ?? (asks to repeats) It's more that hydrogen is created in alkaline areas. Oxygen is more produced in acidic areas, and hydrogen. (what was the last one ??)
K- You see, let me explain to you this. Theoretically you are correct. But, reality does not … (he interrupts and goes on in German …)
Q: He says that cancer has, likes it very much in acidic environment. And if you put hydrogen to it, which is already in chemotherapies, (1:26). then that supports the healing chance. (goes on ..)
K- Can I ask you a question? What is he trying to explain to us? He's trying to say, the more alkaline (you are) you don't get cancer? Am I correct?
Q: .. He says that alkaline with hydrogen, because hydrogen is the smallest particle. It goes through everything through.

K- Thank you very much. Thank you very much for sharing your knowledge.

Any other question?

Q: .. Please, can you explain more about your meaning of the physicality in reference to the body of the man? What is the difference and the relation between them? Thank you very much

K- It's the same. The physicality is what we can visualize, what we can hear, what we can physically touch. (1:28). And the body of the man is in the physical condition, you can touch it, you can see it. The interesting thing is, with what we have tested, and what we've seen in the flight systems, is that, we explained this before, but the interesting part is, we still see the physicality, bodies cocoon the energy pack. But, when we have the physicality, we can't see the Soul, the energy pack in the center. This is the interesting part.

In the new technology, in the new test we started, we're going to follow where we create that condition for the energy, is still connected to one end, but to manifests itself on the other. It's literally like. It'll be very interesting to see the reaction of the people, when they see the manifestation of their Soul in the other system.

What do you actually are, you're in the system, in a way sitting down, and we tap into expanding the energy field within the center of you, which becomes like this. Then with the technology we developed, we take you across. Then you'll see, or you'll feel existence of another energy, and it'll be interesting. .. Then we.

The most important thing for us with the first set of people, if we reach that point is to see what they feel, because they can feel the presence of their Soul here. We know most of them cannot see it, but it's the essence of feeling, that they're in two dimensions.

Then, if we, once we've done that, we go to the level of the Soul of physicality (STP), which actually is every cell in their body. Then we transmute this into the center of this. Then when we get agreement from this side, we have to agreement from the Soul, which

landed on this side, that the agreement from this side as well, that we can transmute the physicality in the same position.

Then when we've done that, now, what you're going to get is nothing here. Physically, what we're going see you is walking out here, and you will become a physical being in the dimension of the fields, which we create. But as you'll be walking into the same room, as you came in, your physicality should be the same. (1:32). Because you accept the condition of the time, and place and the position.

If I bring you out in China, bring you out in United States, bring you out in the Amazon, then we'll see if you actually look the way you came out of it, because different conditions, different culture, different understanding. It will be very, very interesting.

Then, even you will not be surprised by seeing yourself, but the voice, and the feeling is there, but the feature could be different. But there are patterns that you can hold on to the physicality, there are ways to do it, which we'll teach you in the future. So, you can still be a Chinese man in Amazon. That is another understanding of the knowledge. But this is what we call, the physicality, and the energy, or the Soul of the Physicality of the man. If you can see it, if you can touch it. Then you are part of it.

Any other questions?

Q: .. Every Monday the Brazilian community meets in a discussion group about the KF technology, after our Intention for the world peace. This week we read an excerpt from the 449KSW about Satellite Souls and soon after we transmitted the audio recording of the remote flight test and transmutation with the Soul, (1:34). done in Rick's program. Some experiences were reported. The next day a group of Knowledge Seekers concluded that during the test they had different experiences, but with similar conclusions. The experiences brought up very strong internal emotional issues, because they felt that the physicality interfered a lot in the process.

Besides this, they all felt physical symptoms such as heavy head, crying, sore thymus, and tiredness. So, the question is, why did these similar emotions and physical symptoms occur with these people from our group? What kind of connection did these souls established to feel the impact?

K- We see the same emotions with many of the Knowledge Seekers, which go in the (flight) system. It's interesting what you are reporting, that means we have actually transmuted even by recording the emotion of the, what we call, the effect of the system.

We see many people, man or a woman, irrelevant, the age is irrelevant, come out, and they tell us that they were crying. We've seen one or two crying, they tell you, they show you the tears coming down their face, they say. But we don't see any tears in some of them. A lot of them speak about the tiredness, pressure in the back of the head, and a lot of emotional interactions.

So, what you tell us, what you've done, it shows we don't need to be (in the FS). (1:36). By recordings, we can spread the knowledge. But if you get the same effect, as what you say, many of you feel the same. This is, that was tested to see if we can send the emotion forward. You're the first group as a recording telling us, actually, I think another group telling us something. But, that even the recordings gives you the same emotion.

We did not, as I explained, I set the system up to be transferring. .. That's how we went into the Rick's teaching that day. We set out. We set the system out to transfer that knowledge in that way, and to test it. In the coming time, we'll do other tests with the Knowledge Seekers in different, what we call, teachings. Because it's important for us to see. When we go to Rick's, because people from all over the world, in his program. When we go to the Brazilian, what would be the effect of our system in Brazilian community, and how would be the effect of the same system with the Italians, or the Germans, or the others. This is part of the tests I'm setting up. Because we have to bring balance between all the, what you call, understanding of the languages and cultures.

We set out in Rick's program deliberately to create and see the effects. A few people reported it, what happened to them or whatever. But it's nice to see that the recordings still create the same effect. (1:38). What you tell us is the same, because the tiredness, the exhaustion comes in physicality trying to handle the expansion of the Soul. That's all it is. You use energies to allow the expansion.

In a way, you subside a lot of energies. That's why when you go to sleep you're so tired, the whole body stops. Because it goes using the energy to repair, to be ready for the next cycle of abuse of the body in the dimension of physicality. So we understand why you feel tired, you feel exhausted. Because you use a lot of energies to tame this animal, which is the physicality of the man, to allow the Soul to expand, needs the sleep time, needs a lot of energy to be diverted, that it weakens the, what we call it, the shackles of his prison. So it's, most of the people that come out they say that they are tired.

We tested this even yesterday. We have a facilities in our systems. We had a very peaceful team, group of people the past two weeks, and it was interesting. We know it by running the system. Yesterday, it was very interesting because I had one couple, and there's a very big problem between this couple, huge problem. And we are aware of it. They are part of the, they have been with us three or four times. I wanted to know exactly what's going on between this couple. (1:40).

For the first time after two, or three weeks, we saw the system comes to a halt. Which means, they are taking so much, they are pressurizing so much the system, the system cannot run. It just comes to a halt. It's just " " ?? there. Then it starts again.

It depends, if you watch, which of the couple moves, physically moves. That changes the break, and the system carries on. Then it breaks (again), and carries on. These are the energies, which one uses into controlling the physicality. So, when you see these kinds of, what we call, tiredness and the rest, it's well understood. Because you're using energy.

That just doesn't happen, the feeling I had, or I felt something, or we all did whatever. To get to that point, the information was sent to create that connection and conditions.

This is what we going do with Satellite people. With Satellite people when we send the message of peace, received by the Soul. Now that Soul has to translate it to make the physicality peaceful.

I did this last week with the same couple. I asked them, and I told them, I want to understand your relationship when you come back next time. I asked them yesterday, (1:42). how is your relationship between each other since last time. Interesting enough. Interesting enough, the wife immediately said, it's wonderful, it's changed. It has changed greatly, she said, and it's beautiful. So, we allow the two to understand, to share, to interact.

Because what we did in the first set, I allowed them to sit in different systems, they had no interaction. In the yesterday's trial, we set them, once the man to be the captain, the woman sits in the back, and once the woman to be in the front, and the man to sit in the back. It came very clear in the system, that the problem sits with the woman. The problem in the relationship comes 100%, the way we set the system up, comes from the female part. Interesting enough, when the man was the captain the system ran smoothly. When she became the captain, the system stopped. She was putting so much pressure, I'm in charge now, I'm the captain, that our system was showing.

It's very much, I've done a lot of these tests over the years, if you go back if, you remember, when I put the Knowledge Seekers in the Inzano in front of the dynamic systems. I knew the guy who was sitting in there was planning my murder. I asked him, and I saw the operation, (1:44). the lie that he was telling me, it was there. So, and it's the guy who tried to put, actually poisoned me to kill. I knew he was there, and strangely enough he was a Belgian.

We see the behavior, and our systems are tuned into these things. This is why we put you in chair one, two and three, to elevate the physicality, to elevate the Soul of the Physicality, that they can work in harmony with the Soul. We've seen this system, and now with this one you tell us, it shows it can be transmuted, or transferred to other dimensions and other people.

It confirms a lot of other things which we wanted to design to plan, to do. It just brings us more information to vary it in a different way, to learn more. But I've seen, because I see people coming out, especially women, they say, "oh, I was, tears were coming from my eyes." But the beauty of it is, there was not tear, because they wear makeup, if it was tear we could see the line of tear. And I don't say anything. A lot of ladies wear different kinds of makeup's, and they say, oh, they were crying within the system. It shows that they're in dimension of the emotion, dimension of Soul, encapsulating the physicality. It's like when your cry in the dream, when you wake up there is no tears on your face.

A lot of knowledge is gained through this, how physicality behaves, when the Soul is. When they say this, we know, because we see the steps. The people who are in the dimension of physicality, they cannot go into the dimension of the Soul. (1:46). When they cry, I usually give them a tissue, I understand they haven't reach that point. But those who come, and they explain to us how they've been crying in the system. You see there is no tear. It's exactly like a dream. So, the Soul has been operating in what they've witnessed in dimension of emotion.

Any other question?

Q: .. My question is about a relationship that I thought between the transmutation that you explained that needs to be done in stages, between the physicality, the Soul of the Physicality, and the Soul of the Man, and our Creation in the womb of our mothers, but in reverse, being created first, the Soul of the Man, the Soul of the Physicality, and the physicality. But the question is, we wait nine months to be born. Why is the transmutation process, why it can be done in seconds?

K- The transmutation, the way you see in a physical dimension with the present life of man is through the dimension of physicality, not through dimension of the Soul. Children of Mitra would have that possibility. But still, they have to mature the Soul. And that maturity of Soul needs a time of dimension of accepting the physicality.

In the Space man will not wait nine months to give birth. Once you create the dimension of the Soul. (1:48). It could be a millisecond in another dimension, what is nine months to you here. We are preparing man for what is to come. Not what is here today. The child of Mitra is amongst us. This new cycle of life, we'll know how to handle the Universal Community, and how to mutate. Because the Soul has been created, not the physicality first.

So, what you consider as nine months here, it will be seconds in the other positions in the universe. Our physical Soul cannot handle it. But the two being born through the Soul of the, what do you call it, the two Souls can handle the mutation to come. Because it always takes priority to the Soul, not to the physicality.

It's what we have to learn, it's like when you go to another country, you learn the way of living. This is the way of Creation. We learn it very, very quickly and he has started the cycle ??. We are part of it. The new cycle in the life of the man lives the cycle of man, but generating in the dimension of the Soul. When it goes to another dimension, you know, it's like when you go to another country and you already learned, let's say you go from America to China, you already learned Chinese, and the culture, what to do. When you arrive in China, you know what has to be done. (1:50). But if you're not, we haven't been taught, then you have to learn, or just try to find a translator, and their behavior and the understanding of it. It's how we see, but we don't understand. But, as I said, just because you speak it does not mean you understand it.

There's a beautiful video on it, as I said before, it's a German Minister or high ranking officials come to China, and they are given the menu to choose the food they want. And traditionally, in China, you sit around the round table with a rotating table in the middle, and all the food is put on the middle table, and everybody eats what the other people have chosen. So, you have a variety of tastes. When the food comes, the Germans just take the plate they ordered, they put it in front of them, and they start eating, and the Chinese look at them and says, hey, what's going on? You don't know the culture, just because you can hold maybe chopsticks. It's the way it is, we have to, not just see the way ?? we go, but you have to understand the culture, what it is, what it means to share. Not like our educated ministers, grab the plate I ordered, as we do in Europe.

So, it's how .. the new generation of the, what I call, the Soul of the Man knows how to behave in the universe. It's a big difference between the physicality, and the Soul of the Physicality, and how they will interact.

Any other question? (1:52).

Q: .. Well, our knowledge seekers are asking, we have a team before to make the subtitles for the for the teaching. But we didn't get that things like since 240 KSW. So it's that team are still working on this?
K- You're the Chinese people. Are they still working? Where are those people? I think you've got to answer that question, not me.
Q: I know before there was a transcriber team, is that team still there? Because I have been in one of them. But later on, because too much of other work, and I didn't continue to do the transcriptions …
K- I don't know, you've got to find the answer.

Very soon Keshe Foundation will make a lot of changes in the operation of the Keshe Foundation translations and transcribing, we are working on it, but just give us time, that every. This is a huge amount of information, that needs to be transcribed, and translated, and correctly. In the near future we will make some announcement about this thing. It's all languages, it's not. It's like, in a few weeks time, you will see the Store to Keshe Foundation will change totally. The IT team are working in the background with it. Now they're going to shoot me, saying why are you going out with it. But it's the process that you get, I think 17 - 18 languages. Now there is, when you go on the Keshe Foundation website, the language whatever you want to order, everything will be in a, what do you call it, (1:54). the majority of spoken languages around the world. We should be able to do everything else with Zoom and transcribing.

But again, it has to be corrected, because the voices are misread and mis-done. I know the English transcription is going still on by a couple of people around the world. They're still transcribing it, and it is done automatically in Switzerland. I know, and it's all up to date, day by day. But about the other languages, Keshe Foundation has to look at whatever it is.

It’s just like the books. We have books translation in so many languages, it’s just that we need to set up a team, that actually set the book the way is the original books, and everything is done the same. This thing takes time, and then there's a lot of financial backing to be there.

Any other question?

Q: .. In the vertical beings, what is the relationship between xylem and phloem fluids with plasma and Gans? Do you want to know what they are?
K- Yeah.
R: Let's look at our friend Mr. Wikipedia. I kind of anticipated this. There's a nice picture that we can have a look at here.

It says, xylem is one of the two types of transport tissue in vascular plants, the other being the phloem. The basic function of the xylem is to transport water from the roots to the stems and leaves, (1:56). but it also transports nutrients. Then the phloem transports the soluble organic compounds made during photosynthesis, known as photosynthates, in particular the sugar sucrose to the rest of the plant. And says, this transport process is called, translocation, here's a nice word for you. And if we look at the picture, you can see the blue is the xylem tissues that allow the flow upward into the plant. And the phloem is the tissues that allow the sugars to flow back to the roots and up into the flowers and so on. From the leaves.

K- It looks like a blood circulation, doesn't it? And it looks like the lymph circulation. But, the point is, you’ve got to look at when you ask (what it has to do) with the Gans’s. The minute, I always say, you have a banana, up to your lips it's a banana, as a matter state. Once you enter your mouth, it’s in the Gans state, because the dynamic Gans of your body creates an environment of a Gans, magnetic field. It’s the same with the plants.

The minute the material, a gas enters, or energy enters, the dynamic of the structure, it's in a Gans state. There's no difference. Then they have to find like a gravity and M, what goes where, and how is needed, what is needed where. (1:58). So, it's a Gans state. It's like your blood and lymph, it's in a Gans state.

In what has, and what is needed according to the, what you call it, the structure of the plant, or the tree. There's no difference, they are in the Gans state, straight away. From the minute the energy enters and converts into a physical thing, it is in the Gans state. There's no difference between a leaf and a finger of the man. Plants have many fingers. That's all it is. Our body absorbs energy, so does the leaf, absorbs energy. Then the minute that energy is absorbed, (it) becomes part of the structure of the body and start circulating as a Gans.

Any other question?

Q: Afar … If you go out, imagine you go out and sit outside on a patch of glass, some fleas and maybe some people around. And when you look at the glass, you can see

imperfections, you can get little tweaks there, maybe a little bit of dry patches. So, it's not perfect. I mean, look at the trees, it's the same thing that you see. They're not all perfect. When their Soul comes out, then suddenly everything, (2:00). the glass, the trees, they change, that you don't see the dry patch, everything just beautifully, as if somebody painted them. Like, everything is perfect. Even when you look at people, you can just see any imperfection, just the beauty of it become, like, say a thousand more. Why is that? Why is it so different?

K- I don't know, you've been there, you've seen it, you've got to be able to explain it. You described it so beautifully. So, you've seen it, you tell us how and why.

Q: Because you can see, you can see inside the leaf, you can actually be on top of the leaf. And you can actually, when you get to that point, you can just, I can sit on top of the leaf for thousand years and just see the beauty of it, I don't want to come down. Like the cloud just come to you. You don't have to go to the cloud, the cloud comes to you. Just as if it's just talking to you, I just, you see so much beauty that I don't want to even be in physicality. Because even nothing really matters. It's just magnificent. I mean, you can see the little tiny things in the leaf that, as if you can see the rain in the trees, everything. Then when the breeze touches the tree, the Sun goes towards, it's just like, you just can, just, as I said, you can sit there for thousand years and you don't want to get up. But when you come back to physicality, all the imperfection comes back, all the judgment come back, (2:02) everything totally changes.

K- That's nice. If you can see, then you can explain it so nicely. I hope our other Knowledge Seekers reach that point to do, and to be able to see.

Q: Actually when you, even when you come back to your physicality, if just close your eyes, there is something within you that just moves. It's different, like, as if somebody else ?? is in you, it's not you, and ?? giving you so much peace and comfort, that you just can sit there, you don't even get up to do anything, you can just sit. That life is, just is, it just is. I don't know how to explain it. You just can sit and just be.
K- I can't say anything, because you do it, and you've been there. So, it's nice to explain to us. Thank you very much.

Any other question?

Q: Is there a connection between empathy and the development of a Soul?
K- What do you call empathy, in English language? .. (2:04).
R: The ability to understand and share the feelings of another.
K- Now, what was the question?
Q: Is there a connection between empathy and the development of a Soul?

K- Of course. How much you can accept, and how much you can develop what you accepted? We see things, we see, we use tools. But very few of us, picks that tool and adds something from our intellect to change the use of it, or make it easier to use. Millions of people use the same tool, but they never think about doing something with it.

Once a person understands it, and the pleasure of it, he or she adds something to it, or take something away, and changes the purpose, or creates an easier way of doing what you're doing. It's the same.

If you understand the emotion of it, and understand the knowledge of the emotion, you can do anything with it. All are connected, because one leads to development of something else, one leads to conclusion of something else. I am a, part being an engineer, a gadget man. I love gadgets. I look for gadgets which very little changes in them, makes their use easier, or brings a new dimension to it. It brings different values to it, what it can do. (2:06). Then it brings a different pleasure. The same tool it brings, gives so much, and you keep on using it, because, then you say, "oh, the man who thought of this, or just this little thing, has changed so much.

It's the same, a lot of us used it, never changes, when one person evaluates, understand it, bring, add his emotion and knowledge to it, and changes it, for others to enjoy it. And elevates his own understanding, maybe he comes up with another change again, with something else. It's directly connected.

Any other question?

Q: Can take crystals with you to Linz?
K- No, we don't allow you to bring crystals with you to Linz. Don't bring crystals.
R: No crystals. Okay. That's sort of like having cell phones and stuff like that, I suppose.
K- Yeah. No mud crystals, no, none of these games.
R: What about jewelry such as rings, diamond?
K- We allow it, we don't stop it. But when you talk about crystals they come in with a different idea of it. ??. But nowadays, we just as we extend the, what you call it, the development, we are less and less restricted by other things. It will come very soon, when we let you in come with a handbag and suitcase, because when you land in Europe, you'll need it. We'll have to see. (2:08).

Q: .. Chris in the chat here says, he wants to participate freely at the Satellite program. And you mentioned something last week about that, he says.
K- Yeah, listen to the last week's broadcast. We have a lot of people want to do freely, a lot of things, and cause a lot of problems for the Foundation. We've become wise to this, "freely jobs." We see it.

The whole process is to understand why we are doing it, and what we are committing ourselves to. There are a lot of, what I call, misguided people around, and our openness became the cause of our pain. So, we closed many, many, many, many, many, many doors. A few years ago, we used to have, what we had last week with Joel, with sharing the knowledge with the vineyard. People used to come with what they did, and we found out, that was a pathway to abuse other Knowledge Seekers, because they were in Keshe Foundation, they showed something, now they became ?? something and started abusing other Knowledge Seekers, and all sorts of problem. So, we stopped that.

They use us for abusing other Knowledge Seekers and all sort of things. So, we learn. It's you who teach us what to do. Even some of you are very sincere with what you want to do, but those who abused us, and abuse the system taught us how to block the system. We used to share a lot of knowledge in all aspects. Then we found out, some of them were fake, some of them were there for personal gain, and some of them gradually became a big headache. (2:10).

So, we are very far in between Knowledge Seekers we know works, we know it's been taken with our collaboration, and we know what's the intention we support them. Now I even see that in some of the chats, how some of the Knowledge Seekers abuses his freedom and splash what they want to do, or what they're promoting just because it's in the Keshe Foundation. We learn from your conduct. It's just not you, as a general, Knowledge Seekers in general.

Q: Mehranez … In your opinion, your idea, do other living humanoids or other living entities in the universe, of what you know, have the same panoply, the same variety of emotions, (2:12). or, what we call, noble emotions like empathy, as human beings, the poor human beings in Planet Earth?

K- Emotion is part of the characteristics of creation. When you have fields, at a given strength and mono, they somewhere eventually step down in the strength, or they get absorbed into a higher strength. In one point or another they slow down to manifest themselves in dimension of physicality. In that process, from the start to that point, somewhere down the line, it creates a strength that it shows, or manifests itself as an emotion. It depends how we call it. You call it empathy, you call it love, you call it fear, whatever.

Even in the dimension of the galaxies, we see emotion of the galaxy. If you look into it, how it behaves, how it's created, how he explodes, how we see. We see solar systems, we see galaxies hitting each other, we see galaxies exploding in the universe. It's like you get a brain hemorrhage, you get an explosion, and why, what cause, what pressure, what is stress, what emotion was on that. Emotion is not exclusivity of man.

In the coming time, when our scientists become wise enough, you will see emotion of, we can register emotion of the fields of the galaxies. (2:14). I see a lot of pictures by NASA, and other places and they say, two galaxies are heading to collide, or to whatever. Watch the space, would they? Would the emotion of the galaxies allow them? Or like when you run to somebody, you just skip around it, it would happen. Sometimes you'll hit other guy, but sometimes we get around it, because the emotion is not to hurt. Emotion is not exclusivity man. Even though we would like to think it is.

Q: Yes. I mean, like this kind of sacrificing the life for the good of others without anything in exchange. Can you talk about ??

K- Always, it always happens. Actually it's more prevalent in the Universal Community. On Earth, it's very, very rare. … It's very rare.

Q: Just for service?
K- It's part of allowing the others to exist, it's not service. Allowing to, for putting others existence ahead of yours. Because what you give, allows you to become part of, to become a bigger picture of a structure.

Q: I'm sorry, I just have to make an example of these days, I'm sorry. It's just like, these days they are having memories of the ?? Hassein. And millions of people, (2:16). maybe 5 million are going barefoot, without any food with them, to go to that place he was sacrificed. Because they know they are provided. And those people who serve them, clean their hair, feet or give freely, they are so much pleased, that they accept what they give, because they come from their home, their cities, and they go to another country without any future, knowing what is expected.

K- You have to explain, you have to explain for people to understand. This is in the Shia Islamic culture. It's part of the grandson of Muhammad, blessed his name, in the battles with, what we call, the uncles, and the cousins of the Muhammad, who were power struggles, between the two sides of the family. The Son in law, and the grandchildren of Muhammad, blessed his name, in the battles, they lost their life. The Shia's see it as a sacrifice. The Sunnis look at it as the end of an era of enforcement. Depends which side of the fence you sit. But the Shia's is, try to replicate the sacrifice the grandchildren of Muhammad, blessed his name, did, to keep the word of Muhammad flowing.

And most of this happened, as you say, around Cavalla ??, which is the Iraq of today. In that process is where the, what we call, (2:18). the kingdom of Iran got mixed up in the religious points of the Islamic division, which led to the Creation of Shia sect, which now we see coming down the line. And now we have another bunch of fakes, creation of it, which they call themselves all sorts of names, has been enforced in the Iranian culture by others, and now it's become part of the culture of Iran.

So a lot of Iranians do. Shia is not Iranians, Shia is a believer in the path of leadership by the daughter, actually by the son-in-law of Muhammad, do this walking, they see as a sacrifice, that they do it, that they feel how they felt. But it's the same thing with a lot of, what you call it, Christians do, in southern, northern Spain and, what you call, southern France, walking this path, it's cultural ?? religions, and belief's ?? is done. And the people see it as an achievement, or for satisfaction of the Soul.

Q: Well, at least it's for a good cause, because it creates a service people, serving others.
K- In a way, yes.
Q: In a way, it ends up with this feeling of love and brotherhood, and also the. So, why did God prefer man to the angels? Because he said, he knows the things you don't know. Why, according to the book? (2:20).

K- Maybe the answer is what you are spending time with. Why did the God created man to the angels? Now you see the beauty with the man, which has been given the knowledge of the Creation in the universe, the ??, God knew what He was doing.
Q: I know, I feel like ..

K- One day mankind will understand what gift has been given with the knowledge, which is dispersed amongst man nowadays.

Q: Thank you, I really come to, to really finding this greatness of man in the potentiality, and the capacity to have peace, provide peace, and be good. Good means the values are more higher than what we thought he's capable of. I really feel it, feel like that because…

K- We, it does not really do it ??. We have a lady who is doing beyond imagination things. She is not a Knowledge Seeker, she has been touched by the knowledge. And she is doing things beyond imagination, that the Knowledge Seekers will not even dream to do. And I wrote to her this morning, that one day mankind will come to understand the gravity of the work you've done for humanity. What she has done is beyond the imagination. She's not a Knowledge Seeker. But she understands what this technology with her help, (2:22). can do, and the change it can bring.

She's in a position of the power to bring that change, and she has put all her life to it, 24 hours a day to bring that change. The first time she walked through the Linz Exhibition Center, she said, this is what we've been waiting for. She's extremely, in a position who can bring that change, and she has put her life in past months, just to make sure that change comes.

These are, what we call, bless her soul. That's why or, what you call it, angels, but they are humans. And they are doing things that no Knowledge Seekers will do. None of our Knowledge Seekers will do what this lady with an extremely powerful position, internationally, is doing for the Keshe Foundation. She doesn't ask for anything. She doesn't want anything. She just says, I can see this will bring the peace, and I'm in a position, who can bring a condition for to do that.

We have very powerful allies around the Keshe Foundation, in government's in high places ??. They know what the change is and what the change will bring, and they know what will effect us as a human race, ?? do their actions.

Q: Just because, when we. In my personal prayer prayers, I pray, I finish with praying for the whole universe. Is it better to do that, or to pray for all the good in the ?? ? (2:24).

K- Your Soul decides, not man. If it is that maybe you have such a big soul, that the universe can benefit by it, with what you give. There is no, the time of somebody approving and disapproving is gone. It's you who have to understand it. There is no priesthood if it's correct what I'm doing. You have to judge

Q: .. While trying to share plasma knowledge, I do it by trying to be a good example of health, morality and conduct. Some people are curious and ask for knowledge. I tried to adapt answers as good as possible. I try not to intervene on people's life. What is the best approach when they blame me for various things that happens in their life?

K- Let it be. They'll blame you for it anyway, good or bad. So, you carry on the way you do. They blame you for anything. It depends what they say, they are members of the party of "wind," depends which way the wind blows.

R: Well, you gave me some really good advice with that. It's like dealing with trolls, basically. When people are, they troll you on. They say they want to know about the plasma knowledge, (2:26). and then they blame you for telling them, telling you about it. But you gave me two words, you told me two words, how to deal with trolls. And you could say the same thing for those people that blame you for things. The two words were, "ignore them." And it was really hard for me to do that initially. Because you know, trolls and people that blame you and all that, that blaming game can get very involved, you get involved in the blaming, or taking the blame, or trolling, and trying to control the trolls, and rationalize with the trolls. This kind of thing. When it just takes, it sucks your energy and your time, basically.

K- You do something else better.
R: Sometimes, just to ignore them is the best advice, even though, it's actually hard to do if you're used to getting involved in at all.

K- Let me explain to you something very interesting. You know, we carry close protection officers with us all the time, most of the time nowadays. A very strange thing happened very recently. That they are trained to react, even through they are in your near proximity. This gentleman sees another gentleman on the other side of the window. His immediate reaction was to react. He gets out and chases the guy, the guy runs for his life. Even they knew each other. (2:28). Then the guy manages to get where he wanted to get to, to save himself, in a way.

And I asked him a question, why do you do this? He said, my instinct is to protect, when I stand someone, and see another face behind a window, which is not supposed to be there, to me, ignites the condition of danger, and my job is to protect you. If this happens, I have to go. I don't think, it's just automatically kicks in. The only thing is, they knew each other. The only difference was the guy on the other side of the window shaved his beard after so long, he didn't recognize him. They always talk to each other, every day, just without the beard. For the first time he did not recognize him.

This brought to me the instinct of response. I said to him, this is not the way to be, you've got to analyze, see what is there. He said, there's no time to analyze, for me to analyze is your life, so I have to react. I said to him, you've got to be passive. See what's next. He said, there is no time for, I'm not trained that way.

So, we get used to reacting, we are conditioned to reacting. This is becoming part of us, and trying to change it is impossibility for some of us. This experience has brought me a lot of things how people react, how people see things. They have to react. It's very hard to walk away and not to react. (2:30).

It’s the same with what Rick says, just ignore it. To ignore it is harder than actually dealing with it. Because dealing, you put your emotions out. This is how we have become, we react. Very pro active, then to react. We are ready before even anything happens. Then this is very, very strange, the way we've been brought up to become passive than reactive, or pre-active. and it works.

I was clicked to be proactive, because that way they keep you on the edge and then they use it against you. In the past 2 -3 years I learned to just to let it be, what it is, it is. Then it will come to itself, it was their own way, to serve you the wrong way. They count on your reactive, and it just gives them that satisfaction, I can do this, I can do that. But trying to not react is very hard. It becomes your habit to react. We learned a lot. It’s just to know, just let it go. It is time for them to find another way to try to get reaction from you. So, while they're busy doing that, you carry on doing your work.

Q: Yes. And what I was going to ask, tell this person is this, my experience tells me. When originally, when I started to learn the knowledge, not only plasma knowledge and all the knowledge of Creation, even in the past, the way human operates. (2:32). Because we come from the point, at least I came from the point, "I know it all." So, when a person is talking about a problem, I deliver the knowledge in a way, that I'm kind of like acting like a boss, it doesn't come from humbleness.

So, when you start to understand the Soul, and when people start to talk, when you come imagine you’re God, when you look at God Himself, or the Creator, He's always shining like a Sun, He doesn't care if you're poor or rich. Or if you have a big ego, not ego, anything, He just shines constantly. So, when you think about yourself, like a God, like a Creator, you actually become like that, you will shine.

So, when you look at yourself, I am shining this person, and just listen to this person, when you start listening, not to want to constantly give them the solution. First of all, you understand two things. One is, is this person actually got this problem, because he constantly talks about his story and really doesn't want to have a solution? Or does he really want to have like to have a solution? When some people come and talk now, the way I look at it, I see it, I see this person doesn't want to have solution, but he wants to constantly say, look at me, I have this problem, because they get attention. So, for me to give them solution ??, they kind of are going to attack you. But then when you understand it, where this come from, then you approach it differently. Sometimes you just listen and say what they want to say, or sometimes you understand this person really looking for a solution.

So, in understanding, I mean looking at the Soul, when you look into the eyes, you can really see through them. (2:34). If this person really want to have solution, because also you come from below, you don't come from above. You become like so much like, as if you bow into them, in front of them, and the body bow to them just being present for them. And that way, the whole transition, the whole interaction between the Soul goes smoothly. Either you go to the position that you offer them help, and they accept it. Or you know, this person is not ready, and they're not going to get help, but at the same time

we never listen, because your Soul is shining like God. Although you didn't give any solution, you change them. When you see them next time you will see the change, because the minute we go from arrogant, and I want to give solution. Because most of us come from the point of arrogance, I mean, 99% of us it comes from that point. Although we are Knowledge Seekers, but that knowledge become a weapon to say, look, I know but you don't know. You have to listen to me, I know it all. So, when you do say tha,t and you just there as a being, your light is shining. So, either you want it or you don't want it, you already affect them.

K- Yeah, it's the way. .. When we go into teachings we are always Knowledge Seekers, all of us. Nobody goes in as a teacher, even in many of the teachings. I see our teachers are always Knowledge Seekers. It's understanding, that we don't know everything, and that's the pattern of life. As Rick's says, I always go, whenever the meetings are, I always, I am a Knowledge Seekers. (2:36). I'm there to understand. The minute you become a, what you call it.

So many people asked us, can I teach, and we used to allow them to teach in one hour, two hours in different parts of the Keshe Foundation teaching. Then they called themselves professor at Keshe Foundation Spaceship Institute and, what you call it, all titles gave to themselves. That's when they lose it. That's where everything falls apart. So, it's understanding, that at any point we are there to learn. And we always learn, one way or another, something new.

Any other questions?

Q: .. << Speaks in Portuguese Language>> (2:38).

.. Could you speak a little bit more, Mr. Keshe, about the negotiations with Europe countries regarding the delivery of the generators and gas units. Also he is adding that he is always very anxious for Thursday to come, to listen to your teachings, and thank you very much.

K- … As I was saying, .. there are a number of European nations who are looking at and working. There is one of the leading European nations, they are pushing us, they want to see a system, a working system, that it can be changed.

As I said, I was talking to one of our team this morning that, with them we are getting pressurized, that they want to see a working system. The reason I explained earlier on the about, that we're going to put a Blueprint of the Gas and Energy unit, is in response to, not a pressure, but the request by one of the world leading Western European nations in respect to this technology, (2:40). to see how we can comply with it, how we can bring it out. But, this showing of the gas production, energy production unit this coming days is in response to our work with one of the governments. They want to, it has to be shown, it has to be shown working, and then how it can be adopted rapidly.

People who don't live in Europe don't understand or cannot comprehend what is cooking up here. We have prime ministers, ministers, leading industrialists, talking about the massive problems, recessions, and lack of the gas, and energy, and the prices which has gone up, budgets which puts into act to protect it. In a way, they're trying to keep the government's and, what you call it, everything under control. 130 billion budget by the British government, and billions of budgets and schemes by other governments trying to reduce the pressures. Yesterday, we heard that EU is heading in, what you call it, capping on the profit the oil companies and gas companies can make, then 33% taxation on them that they can share their income with the others and the public. This has become a reality. So, governments try to find a way.

And the best way to do it, the way I explained to one of these politicians very recently is, the way you build a house nowadays, and it has to have a standard, this, and that. (2:42). These gas production energy, electricity production units, hopefully, when it comes, and understands by the community, has to be part of the construction of the buildings, that every building provides the electricity and the gas, and you have it. It's just like you have a central heating, these units have to be as part of the building. This way, the pressure, the responsibility is passed on to the house owners and the builders, than government being responsible for it.

These are the things which is inevitable. It's going to happen when technologies like this emerge. When you don't need to produce gas and pipe it down the line, and you can produce it at home, then they tax you on the house, what you do. They have to find a way to get their money to get the services. But if they don't provide it, and you do it, they're just like a television license, you pay a fee a year to the government.

It's not just Keshe Foundation technology. We see this coming up. Very, very soon governments will wash their hands of the responsibility of providing energy, because it's too cumbersome and it involves too much. Technologies like us and others will force this positions. It's just a matter of time.

Now with the situation we see, what you call it, the spread of energy, and how it will happen. Very strange things are happening in Russian oil and gas pipes, and leaders. We see many, many Russian, top Russian oil and gas people accidentally falling out of the window of the hospitals, getting thrown, or their children murdered. (2:44). There is a lot of realities which we don't know. Who sits with who, and how much of this pressure is real. But some people are making money out of it.

European countries at the moment are on the edge of it, because it's hyped up, people are paying the bills. It's not hyped up, we are paying the bills, we see the electricity, gas bills. People don't travel, because the fuel cost is so high. We see it generally, but situation is, what you call it, diabolical, and the way it comes, and how much it will be pushed, to what limits, to how much, we'll come to understand soon.

K- We hope so, thank you very much. It will be announced very soon. Short notice, the blueprint of the new hybrid system. You'll see, and it'll be in public. It's the first time such a system has been produced.

Q: Will this Blueprint day happen before next Thursday?
K- It all depends. We were hoping to do it today, as our team was so much pressurized with so many other things. (2:46). So, we hopefully to do it as fast as we can. It is not easy, it's, what you call it, it's time consuming, you have to get everything right, the way it is. We have an idea of how we're going to demonstrate it, how it's going to be presented. In a way, you will see it, more or less, how the end product will show itself.

We have a clear idea how we're going to show the system, two systems being fed by one system ?? . Hopefully in a short time, much faster, in the following weeks, we will show a plasma power generator, a true plasma power generator. We have a guy working on it to be done, which doesn't need a conversion.

Q: Can we have 24 hours notice?
R: I was going answer no, just simply no. ..

K- It's just that we share the knowledge the way it comes, and this is crucial to be done. The spread.

There are another pressure on us regarding the new Corona, spread of the new version of Corona. How, if we can release the package for it, we done when we see it's necessary. But, what we heard Chinese are closing different parts of the Chinese mainland, due to the new Corona. We just got to see if it actually takes hold as it was expected. Or we're going see another autumn of lockdowns and everything else. (2:48). But we keep silent at the moment with it. But, it's moving in China. We heard districts are getting closed seven days, 14 days, and the rest of it.

I received a comment, would you like to make any comments about what has happened in the past week in UK? We have no comments. And the same, I'm receiving requests, can you explain what's happening in Iran? We have no comments. We wait for the destiny to show its time.

Any other question?

Q: Dean .. I think you've just answered all the questions I had. So, thank you very much for that. So…
K- What was the question that you were thinking to ask?
Q: .. I was going to ask you about the general situation with the technology coming out in the world governments, and obviously this is linked into the gas, the energy supplies, and the whole release of the technology. There's one key issue, one vital little plasma that just needs to connect to open the whole of it up, to the whole of humanity. So, but I think these, these chess pieces are being played independently and in totality, and I'm sure you're aware of the whole totality of the situation.

K- We hear a lot. We don't get involved. But the best way is just to carry on what we are doing. (2:50). The development of gas units, the development of the new transportation and transmutation system. When we master it in a good way, our team understands how it's done, then most probably it will be released internationally. That's the only way it can be done. Once we receive our securities, the way we are working for next time to come.

Keshe Foundation will most probably release a lot of new technologies in one go, and we go for it in one go. Because we are, what you call it, we are, more or less, an NGO. Once we have the securities for the long term steps of the Foundation, like the way we opened the patents, this time we open the other things.

We will rule . As I said in the last week's teaching, we're just waiting for a piece, few pieces to come together and completes it. Then we are ready to make that move to bring the change.

Q: ... You said you didn't want to comment on something just now. So, let's take it to another position. Let's talk about it in various souls are repositioning and taking new dimensions, whether they are from, in society, in a position to believe to be a certain height, or and many people that are common, and very beautiful Knowledge Seekers.
K- Can I be very precise? What I say, stop being Englishman, speak straight.

Q: Okay, so are we talking about. The Queen of England died recently. You said you didn't want to comment about this. But she's a soul. So, she she's taking a new position. (2:52). You have Knowledge Seekers, there seem to be a group of souls, as there always is, a repositioning in these moments. Is there any significance why a soul in any position would take would move, regardless? Is it the fields strength is happening around the planet? Is the fields strength around the individual, the Soul?

K- It is individually based. It is Individually based. It's time. Now is, what you call, the Queen of England. A lot of things goes on till she's buried on Saturday, I think.

But essentially, my first reaction when I heard I said, "thanks God." One of the most evil souls has left us. A lot of people think her a different way. But we know what she's done and what she's been up to. I think we might see a better, better life for humanity with Charles. But if you were aware of the conduct of this woman, trying to be. She's done a lot of evil things, very, very evil. And it doesn't matter. We don't get in conflict with another royal family, or whatever. But, she has been cause huge, huge, huge problems, personally.

You have to understand, when you have to be the only one, and you have to be, what you call it, the longer one, you do everything for the others not to be there. This behavior goes from the, when the time, before the time she even came into throne. Selfishness, and "I have to be the only one." (2:54). We've seen the whole series of the events in her lifetime. So, people look at it this way, we look at it as a fact, and what do you call it, as a

whole. As I said, my reaction was, thanks God. Let's see if the other guy is different than this one.

We have now the same situation in Iran. We are aware, there are rumors and talks about Iranian leadership, and it's the same. We keep out of it, because we know what they really have done. It is not in public. Anybody who was better was eliminated, anyone who was more popular was eliminated. Anybody was loved by public was somehow put aside. This was a habit of this woman. For it to be in that, only the best and the blah, it leads to a lot of crimes.

Q: .. I felt, being born in England and being part of the field strength. I did feel in the last few moments, I felt some very uncomfortable fields. And I started dreaming again, I haven't dreamt for many years, and I started dreaming. They were the sort of disruptive dreams and strange dreams. And I felt like there was an influence, being part of the Universal Council, and that you tend to find field strengths to come to you sometimes. I seem to have experienced that, I'm not claiming anything. But that's just me personally, what I've felt. (2:56). Now that that Soul has taken a new position, will the filtering system, will the Soul of the nation, the Soul, the healing process… will change?

K- Will change, will change, of course will change. She was one of the most selfish people known. This goes back decades. She had a habit of doing things her way. Nobody. I mean, if you look at it, the Diana situation. If you look at it with the wife of the new prince, who had to literally abdicate and go to Canada, why? Because they were more popular. There couldn't be another woman above her, that was more popular. Loved by the nation more, interacted with the nation more.

It's been the same with the revolution in Iran. The revolution in Iran was set by her. Because the King, the, what you call it, Iran royal structure was over 2,500 (years), and it had to end, because she had to be the longest. When we had the celebration of the 2,500 years of monarchy in Iran in 1970s. As an insult to Iran, she sent princess Ann, instead of. World leaders came. She sent Princess Ann. "Princess Ann" in Farsi means "shit," more or less. It was a biggest insult to the nation. Just because she already planned to end up monarchy, that she's the only one left. Historically she's done this all her life. (2:58).

For this to be, she has caused millions of people to suffer. Most of the Iranian refugees system we see, Iranians across the world is because of it. You see all the Libyans and Syrians, which are scattered around the world. She wanted to rob the central bank, because, where is the 140 billion, which was stolen from Libya central bank? It's in the Crowns name, not in the nation's name, Crown Jewels. Libyans are paying with their life. Syrians are paying with their life, and had to become assets of Crown Jewel of England.

All these British died in different places. Where does all their assets go? It's the same as time of Queen Victoria. The high seas robberies (pirates) became Lords. She has a very, very, very dark background to her life. Doesn't matter how you're trying to "butter it up," or how you want to paint it. She lived a devious life, extremely devious life. Maybe with Charles we'll see a different thing, because he tasted the pressures and the pains of it.

We see now. There are reports of the Ayatollah Khamenei of Iran, being in a dangerous position with his life. We see a new cycle of monarchy, Iran is getting born for, what we call, religious monarchy. We got rid of a Shah to have no monarchies. So, religious leaders have to come by the position of their intellect, not by birthright. These things gradually goes out of the way, anyway. This comes from wanting to gain power. If the people are there through their, (3:00). what you call, their rights of intellect, should not be the right of birth, even kingship is not ??. It's literally like Pope appointing, if he could have children as the, what you call it, as the next Pope, holding to power. And these things will change.

Q: ... So, if a Soul, if a person has this interaction as a child, does a Soul bring this from, if the Soul is pure and comes before pure into the physicality? Is this so? Or is there implications before?

K- There are implications before. The way, you always say, the way your DNA is made, imprint of the past, the color of the eye, and everything else. The same as with RNA. Those carry imprints into your Soul, but in a different way that the Soul knows the right and the wrong. That's where we get these things, the problems between the STP and the STM, wanting, and holding on to and imprinting. Knowledge is kept, but knowledge is not done. We do things, and then our future generation, in a way, balance it out, for it ??.

Q: So, are you saying that the nation of the UK will have to balance many of the field strengths that have happened over ?? ? (3:02).

K- They've always done, always done. It doesn't matter England, doesn't matter who. Always is done, always settled, always brought in the balance with its own. You think you get away with it, but long time, long term you see, you pay for it.

The best example of it is, the tribe of Moses, the longest tribe, they say we have history of, in so many ways. Look at them, what happened to them. Came a nomad, "out of the basket," and died nomad, and these people are still nomads. It has to be ingrained in the understanding, not force because of it.

A very good example of it is, Sheik Muhammad of Dubai built beautiful small cities around his Emirates, that the nomads could be put in. Beautifully furnished, woods, cupboards, doors and everything. These people are nomad. They're made in the tents. Some of the people in Dubai you see the city, going inside and you see the backwardness. So, he brought these people to live in these apartments, which was made by the government. Then after a while they saw there are no doors in the house, there are no wood frames, there are no kitchen, beds. The nomads took them and burned them in the middle of the kitchen, because that's how they were used to in the desert. By giving, does not bring intelligence and usage. You understand? (3:04). So, it is, but in the long term you pay for it. It balances the books.

Q: So the soul of. Many people through this discussion, it will upset many people. There are royalists and follow them. There is a whole ?? logic around this. I take no stance either way, just as a pure Soul, I just speak fact, not fact, however, just in a true sense what feels correct to me.
K- Yeah.
Q: So, the Soul, each Soul is responsible for their own conduct, as we know it?
K- Yeah, yeah.
Q: And they carry that fields strength. And inside themselves each person really will know the truth of whether they are approaching something in a magnetic or gravitational field, a positive or a negative. They would sense that in a split moment. And this is the Soul interaction that makes us very aware, but many people deny this.

K- It all depends. We deny a lot of things.

It's like what we are involved in Keshe Foundation. We set up a plan for Keshe Foundation about a year ago to bring it to a new dimension. We worked on it, we've done a lot of things on it. A few months ago we got you Knowledge Seekers involved with it. Some of you helped us to do it.
But the thing is not happening.

I look at it as, there's a reason for it, it's not time, and place for it, maybe. Where, because if it happens it'll be fantastic for the whole change we're expecting. (3:06). I don't push it, because it means it's not the time and the day for it. When the time and day come for it, it will happen. We put a lot of effort into it. It's not that it's for me, it's because I know it will bring a massive change to the whole structure of humanity, what is about to happen. But do I go out to do different things with it? No.

And the people around are all waiting. We're all waiting for this thing to switch over, today, tomorrow, next week. It's been going for nearly a year. But why does it change? Why does it hold? Is it the time for it? I feel yes. The time is very short. When it comes, we all benefit by it, the whole humanity will benefit by it. It will bring changes beyond the imagination.

Did we have to wait for the Queen of England to die? Did we have to see a change in the Iranian leadership? Did we have to wait for Putin to go to Ukraine? Did we have to get the Germans in another position? You can add anything to it, but it means the time (isn't right. That the Soul is not ready for it, that change. When it happens, it means it is ready to go. Because I know what's going to do.

Knowledge Seekers are not aware of what is about to hit humanity. I tell you, hold on to your seats, and hold on very tight, because when we come out, it's a hurricane, it's not just a wind. It's how, what benefit do bring me? Nothing, it's just that I see, it brings comfort, it brings advancement in technology and science, and brings man out of the war zones, and killing. That's the only purpose for, we are doing it. (3:08).

It does no matter how much we suffer a few weeks, a few days, but the end products is, no one is in charge, nobody's in crown, man decides and man elevates his own Soul. Just watch what can happen in a very short time. If what we set is achieved. Be careful with a lot things.

The thing is you all participated in it. In one way or another, small donations, loans to the Foundation, you all put your foot in it. So, we are all in for a change. The Foundation has put all its backing and assets to it, because I know it's time for change, and we take the leadership in doing it. And we have to do it the way man is doing it. The old song says, "it's a man's world." Let's see where we come, and then how the Souls will change, how we change ?? another.

Q: .. To what extent, if you permit, to what extent can we minimize the work of people? Because one, the education, the way they were raised in their environment, 2 the genetics, if they have learned only that in their family? To what extent they pay for that?
K- Pay for what? (3:10).

Q: Like a child who is, for example, is raised in a family of thieves, and the parents are thieves, and whenever he can cheat he is being applauded by parents and by grandparents, they touch the only value they know. And also the genetics, that has been the same way. How can the Soul be responsible?

K- It's the Soul who makes to carry on with the same decision. It's the Soul. And Soul goes back to his roots, if he wants to. We had this in Keshe Foundation.

In the Keshe Foundation, at the top, top, top levels of Keshe Foundation, we had this. A person who was born in one of the most notorious pedophile families in the world, family, the whole family's involved. Prison sentences for raping children, abusing children. Then prostitution it's like, you're going to work as a doctor, and it's carried on by the rest of the family. But the person knows it's wrong. For time, decides to change. But the pull of the what is born in, does not allow it. She goes back to it.

We had it in the highest levels of Keshe Foundation. Doesn't matter how hard the person tries, they cannot stop it. It's them who have to elevate their Soul. Then they blame everybody else for it. They have that choice. We had this in Keshe Foundation. (3:12).

They have to decide, they work hard to try to overcome it, or at least cover it. But it's you who has got to be on top of it. It can be done. But if it's brought for you, as say a thief, and the whole family is there, they do it, and they brought in it, and then its normality. It's their normality.

But it's one person who decides to bring the change. But would they pull back on it? Would what we had, to them has to be kept. They do their best to walk away from it, they cover it, but underneath they are doing it.

This was one of the reasons Keshe Foundation battled with the pedophile groups. Because they knew, right on the top there is somebody who has a history of prison sentence, and everything else, hiding underneath. We didn't know. But they knew. We washed out the Keshe Foundation with it. But it brought a lot of pain.

But they go back to it. They go back to their family. That's what they've done. The family, and it goes to the next generation. One of the most notorious pedophile families in Europe was sitting by the top of the Keshe Foundation. The father, the mother, uncles, everybody been to prison for abusing children. We had it, and I watched it. (3:14). Didn't know that was the situation.

And they've come (gone) back to roots, exactly where they found (find) comfort. Being in a good position (at top of KF) wasn't good enough. They chose. And the children are carrying on the same as their fathers are doing, abusing the next generation.

We've went in it with Rick, 5 or 6 years ago, we went through it. We couldn't understand how we are targeted so frequently, and with all these pedophiles. Then it just came open, it was obvious. They knew, they have a big point they can push it, and there was somebody who was supplying them. But, will they change? Even they pretend, they sit as a lady. The whole family has sent prison sentence for abusing children, establishing businesses to hide using the Keshe Foundation ?? . You cannot change their grain. But they have a choice to change. It's them who do not do it. Or it's too hard to go, not to go back to the past. (3:16).

If you see the past two or three years, we don't see much of it, these people around us. We got rid of the root. They came as the head of the education system, they brought their allies in different ways into Keshe Foundation. We couldn't understand how. We bless their Soul, I hope they find peace. But it's back to the old habits. nation and mother calls to carry on, because it's the behavior of the nation.

Any other question?

R: Well, I think you can, you wanted to wrap things up here Mr. Keshe. There's always more questions.

K- Let's see what comes up. So, if our team manages to complete, we will announce it, like I said, 24 hour notice, maybe. It'll be a good time in how we do, and then we'll invite officials from the government to be with us online, or if they want to be present to see the process through, that we start the next phase of work.
Thank you very much indeed.

451st Knowledge Seekers Workshop; September 22, 2022

(Quick Index 22p; Introduction - topic index; Transcription, Proofed done, need to do ; Key Phrases, Words) (Auto transcription from Elias)

2 Breakthroughs - STP transmuted to other system and felt by another person; KS sees the clouds of 2 Souls interacting - lead to how children of Soul will be created between 2 systems;

Topic Index

Share knowledge with all other KS from around the Universe; NASA invited to transmute; Linz FS takes over control of STM from blood system; STP was transmuted to other system and was felt by another person - Breakthrough - transmutation succeeded; Could have sent the Physicality - wait for right time; The key is Love; Test proved T can eradicate psychosomatic illnesses; Heal relationship at Soul level with Souls that have passed on; Don't need to hunt down world leaders or criminals - reach them at Soul level - elevate and put back; Go through happiness phase of human race; Satellite Souls will elevate the planet - similar to UC; Need many more to join as Satellites; Satellites only need to be near leaders to elevate them; One Nation government - Soul of Totality decide future; Establish free research centers with open patents; Sept 20, 2022 will be remembered point of change for humanity; No courts judge yourself and correct conduct; Shame that Iranian leader tells forces to "cut down like grass and throw bodies away" of those who go against regime; Islamic rule in Iran will come to end; Next step to transmute "man of U" - have been feeling their presence; Satellites will start feeling the change; Your Soul is free to change position, color and features; There will be huge opposition to elevation of leaders - elevate the opposition; More important to elevate Soul than the P; Start teaching through the Soul instead of words; Satellite Souls will bring the change; KF supporting artists who use Gans in art work - promote on KF Store; KS who are selling products need to put back into KF where they got the knowledge to spread T across planet; We work for peace everyday not only for a few; Leaders cannot hide anymore - we reach them in their Souls; With new development we reach your Soul to tame it; Ionized molecules are plasma fields clouds of energy packs; Breakthrough - KS saw clouds around feet from the interaction of 2 Souls - like breaking sound barrier; When plasmas interact they release energy; Soon we'll see a light between the 2 FS in Linz; This is how Mitra created child on earth; Looking for a couple that cannot have children - put them in 2 FS and Souls interact to create Soul of child - then moves back to womb of mother; This is how man will learn to create children in future; KS talks about physics and Lorentz force - it's all M fields, electricity is M fields of different strengths interacting- you just put different names on it; Why do KS make it complicated - following hypocrisy of present scientists; Iranian man shows on video he can control dousing rod with his thoughts and emotions; Meet with England's and Romanian KS who are serious to bring out T - or have to hire outside KF; A plan to bring out T; When the Soul elevates it's instantaneous like space travel by Soul; Paralyzed people walking after years in bed - impossible will tear muscles; Elevate STP walk immediately; Elevation of the Soul is permanent - not temporary; Some might have to "open the books"; It's what

you expect and want; Mohammad elevated Soul of desert people, but brought trouble to Iran - stopped them in their development of knowledge; Rulers in Iran and Saudi Arabia not cultured, only trying to buy culture; Islamic rule in Iran will end; There are different types of Messengers - some only for tribe; Lenin's rule to govern - make low people high, and high people low - they struggle - you rule; Family in Brazil release video about new Corona - KF will release new methods through Dr. Bararpur of Iran; Elevation of Soul is not exclusivity of KF; You provide the Soul - we do the elevation; All kind of changes occur to people who enter FS in Linz; Walking out of FS like walking out of freezer - change in fields; KF in contact with IAEA in case of nuclear accident; Fundamental key to peace on earth is - Love; KF in full possession of T to change many mental disorders; Don't stop coming to Linz - keep coming;

ENGLISH TRANSCRIPTION

(:20).

K- Yes, thank you very much. Good morning, good day to you. As usual, wherever and whenever you listen to this series of Knowledge Seekers (KS) of the Keshe Foundation Spaceship Institute. As we always said, we share, we learn. And by sharing nowadays, we don't just share with human race, but we share with all other Knowledge Seekers of the universe (U). (:22).

This week, we have entered an amazing cycle of development, research. As I wrote to the head of NASA operation, in the past few hours, that with the trials of this week, man has entered a new cycle of transportation and transmutation. And I have invited NASA directors, for us to transmute them through the system as we have direct access to their.

The interesting thing in the teachings, and the developments of the past years, was to manifest, to be able to show, and confirm the first phase of the transmutation. The first phase of being able to free the man's soul, which we did for past few weeks, past two or three months. Many of you came from four corners of this planet, to go through this system to be, to leave, the what I call, fingerprints of your race, your culture into the system.

This week, we have entered a new dimension (D). Up to now you told us when you went in the system, how you felt, who you saw, what was it. Did you feel anything? We went from 3 Chairs to 1 Chair, we went to the rest of it. But the important part is to be able to transfer the Soul of the Man (STM), the Soul of the Physicality (STP) of the man, and then further on the whole of the structure of the man to another point. But it has to be done step by step. (:24).

It has to be done in a way, that we can put, we can bring the Soul of a man, to be felt by another man. This is how we know somebody's here, when we see them, we hear them,

and we touch them. So, the first phase of our work in transmutation was to be able to transfer one soul, allow the soul itself to decide to go from one we call, point to another, and to be confirmed by the other person, that he or she has received it.

The structure of the Flight Center in Linz, as all of you know by now is in this shape. Two Systems, 4 seats. This week we had the pleasure of a German couple, where we asked and the souls knew, on the entry to the room, if they want to sit on the right or the left. The wife chose the right, and the husband was committed to the left. The system is set up at the moment, that it goes this way (from left to right). We have no reverse process setup. It does not exist.

Our process and our way, was, and is, that we set out to transfer the Soul of the Man to the Moon. These tests, it's not like before, half an hour, whatever, we have to allow the two souls in the system to expand, that they can come in touch with the structure with a physical system we have built, that we can like a ?? store to tap into. The field of strength of them, in matching with the field strength of our system, come in contact. And then in a way we can allow it to transfer.

In a way in your body, your soul is in the center and your blood system around, controls it. Now with our system, we diminish this, what we call, part of the process. And we allow that now, instead of the blood system, our system, to become what we call, the process of controlling the soul.

In this process, what we see is that, now we can allow the soul, the new soul, freedom to take his position, and travel to that ?? system. Up to now in the test, we always left you to go to see grandma, go to Moon, you all did, you got excited, many of you came to see where you can go. It became a magic show. Who could see the magic, who could not see the magic, and how far you could enjoy the magic. (:28).

Now we are in a real condition of testing for flight, "flight of fancy." The fanciest flight man ever will take. For us, as I explained last week, was to go step by step, to carry the Soul, then carry the Soul of the Physicality, and then physicality (P). But you did the travel last time. As I said before we started these trials months ago, we respect whatever you say, because there is no way to confirm it. Because it's your soul, which goes where it wants. We are not there to watch it. We are not the police. We are not a watchdog.

But to go into the next system, to go into the next phase. We had to confirm the transmutation of the Soul by another soul. Transmutation of the STP by another physicality. In that process, we started our tests this week. The couple know each other for 45 years, married for 39 years. It's video recorded the what I call, what they went through, and we just put English transcription on it, and it will become as part of the one of the most important Testimonials of the Keshe Foundation's history.

We did not tell anything to the lady. She was on their own, in her own cocoon. Very quietly, they don't speak English, very little. We explained to the gentleman, (:30). that we would like you to reach his wife. Take her anywhere, do anything you like, take her to

the Moon, take her to see anywhere. And we let them, we left the process running. We switched on the systems for these two categories (STM and STP). We control everything through our system, which can switch only the Soul, we can switch the STP, or we can switch the P.

After nearly an hour and a half, we called an end to the session. We heard first from the wife, and then we heard from the husband. They were given a line of connection, that we could guarantee, that the Soul transmutation is not only from the system, or the supported through the system, to each other.

When the lady came out, she explained to us how she felt, the energy, and how she felt then, the physical energy, when we switched on the STP. And in the interview, you'll see, she says she tried to go back to her husband, but it was closed, she could not reach him. But the husband reached the wife. (:32). When we got the two to speak together, it was very emotional for the man. He said I didn't want to take her anywhere. And the only thing which I wanted to give to my wife, was love and light.

And she felt him. She felt the presence of the soul of the husband, and physically, the physically in the body, his presence. This is a breakthrough for the space technology, that we have managed to transmute, control the transmutation of the soul. And we have managed to transmute, what we call, transmutation of the physicality. Because it wasn't just a emotion, she has felt it in her heart. And she tells you clearly in the interview, she felt it on the left, and then on the right. The love, and then the physicality of the husband.

This brought a lot of knowledge to us in proving other aspects of the technology, development in cancer research, and all sorts of emotional psychosomatic. But the most important part for us is, that we have managed to transfer, to transmute a Soul out of its physicality, and to reached it to other part, to be felt both physically and emotionally, and an emotion of the Soul by another soul.

This is a major breakthrough in what is to come up. It's a major breakthrough in what we can do next. (:34). In after, the next two or three weeks when we do the completion of transportation. Where we've gone wrong, what we need to add, what we need to extend, that we can add the final phase to it.

We cannot transmute the physicality if we cannot fix the Soul and STP. In this was the biggest gift, that the first trial, the first two people who went and sat in the system for transportation. They both achieved exactly what the system was supposed to setup. There is an interesting point the couple booked in for a flight system, and I waited to find the right people, that we could do the transmutation. They were not aware, that they have got involved in first transmutation system. It was totally blind, that they could not have a preset idea. They just came in to see as a flight test, what it was. They were not booked in for any other purpose.

We tested this on the second. People knowing each other, but no connection with each other. What this test brought us, is that, thanks to our team producing the systems, for

relentless work, precise and precision. The first time trial we have achieved what we set out for 20 years to achieve. (:36).

Let me explain to you what this means. This breakthrough, the past two or three days, and now we hopefully can develop it further and process it further, will change the course of humanity in many, many ?? On the medical level, now most of psychosomatic diseases can be eradicated. Where the cause, the reason for that process in the level of the Soul, can reach, can fed, and with it can the change the STP, in dimension of physicality. It doesn't matter if the grandfather who did the wrong, and was the cause of the cancer of the grandchild, is dead 20 years, 30 years we can reach the soul. We can bring the souls together, to bring the closure to many, many diseases.

It has another point, now, we do not need to hunt the world leaders who cause war. We can reach their soul directly, and change. We don't need unjust leaders to lead, and create mayhem for their citizens, and order them to be "plowed like a grass and thrown away." Under development of this technology, (:38). there'll be no world leaders who can be unjust.

Understanding this, that we can reach the Soul of the Man, transmute the STM, elevate the STM, we can replace the wife, with a dimension perfect soul, and in reaching the STM to this soul, achieve perfect soul. So we see the world leaders, which walk away from war. We'll see men of criminality, don't even want to be part of it. We'll see the beginning of the change, and many, many other changes.

I don't need to bring the heads of states, whom caused so much mayhem, to adjust this in Den Haag. We bring what I call, the elevation of their soul through their own process of mentality and their own Soul. It is a huge step in bringing the biggest change for man. As I said, you are humans and you always look for physicality to be confirmed, to believe, to see.

We work in the level of the operation of the universe, which is the dimension of energy packs, what you call, the Soul, and achieve that position.

With now, what is called theory to you, we call it technology on the table. Many, many situations can be changed. In a way, we start ruling as One Nation, because all citizens become equal. (:40).

In the next few weeks, we carry on with this process. And then we go through the phase of happiness of the human race, we transport you from one to another. We transmute you from one to the other. We allow you to be happy that you've seen something, to be part of a magic show.

The most important part was, that the human race can produce a system, that can lead to the elevation of his soul. The most important thing is, that in this process, if we bring this system, and literally place it here, we can extend the Soul, feed the soul, be it its hunger,

be it its illness, be it in his desire to be with whatever, and achieve whatever, and leave it in the same system.

In fact, the test of this week not only confirmed the transmutation of the soul, and confirmation by another soul, that has been touched by it. But it brings a new dimension in development, and process of sharing of the knowledge.

In the coming hours, in the coming days, Keshe Foundation will start the process of what we call, "the next phase of transmutation." (:42). We go through what we did in the Rick's teaching few weeks ago, to the next phase, that those of you who paid, and registered for Satellite teaching or work, and many of you changed your position from Mobile to Satellite, and the rest of it, you will go through a separate process of communication and connection with the Keshe Foundation.

In a way, we will switch on your satellites, your souls to become the Satellites. Do not expect to transport. Do not expect to be transmuted. Do not expect to go anywhere. Expect for your souls to become the feeder of the others. We still need you to be in. We still need you to come in to Linz to complete this process. But those of you who registered as Satellite Souls, and you paid your fees and the rest of it, you will be contacted in a different way through the Keshe Foundation.

Then, we connect you in a very direct way, as an international line directly to Linz, and we start the process of the changing of the man to the peaceful man. Even though many of you are still waiting to go to the Moon, we have to do, we got to carry on. But the most important thing is, those of you who have registered and completed your process as a Satellite, you become a Satellite from Linz. (:44).

The extension of the work. The extension of the spreading the peace amongst the man is a job of you who volunteered to become Satellites. We still need many more. We will ask you to walk to the nearest, as closest as you can, to the palaces, to the presidential palaces, to the presidential, whatever, to Prime Ministers, to the Kings and the Queens, to the decision makers of your country and the world, and by proximity, we elevate their soul.

The way we interacted with Rick, with others in his program, we interact individually with you. You are Russian? We interact with you in Kremlin. You are American we interact with you within the Oval Office, and if you are in Iran we interact with you in the palaces of the parliament. You will do it through your soul. You elevate the soul of the world leaders and with it you walk the mankind away from war.

You become the Satellites for the next generation of the expansion of the peace and knowledge. In the coming weeks, Keshe Foundation will announce the establishment of the One Nation government. Where you govern as people, and where the Soul of Totality will decide on the future of mankind.

Keshe Foundation will open its doors of knowledge, freely. (:46). As I said before, and I explained to the heads of Keshe Foundation in past 24 hours. Coming to that phase, Keshe Foundation will establish research centers, which these centers, freely and continuously put the edge of technology and science in the hand of the man.

We abolish the peer review of control of technology, as every man has the freedom to develop the technology according to what they want for the betterment of the man. Keshe Foundation Spaceship Institutes, become an institute for humanity to share the knowledge without expectation for return.

In that process, we still set up factories, we still set up structures to make it for those who cannot. But we bring a new dimension. We are not afraid of competition in what we created, we welcome it to speed up the elevation of the STM and the comfort for man. We will set example for no limitation in knowledge. What we discover, the way we shared the USB Stick, and the patents with all of you. We share the knowledge. It's the responsibility of the KFSSI, to share knowledge. It's what I call, guilt by action, if they don't.

Once we set this in order, we set the order for the rest of the governing structure for the One World Nation. (:48). We are not interested to live and own palaces and become the most powerful nation. We are One Nation and we don't need power. Except the power of knowledge.

This test this week, was one of the most crucial part of the Keshe Foundation work. Man was proud of landing a man on the Moon. We are proud to land the STM within the Soul of another man. It's an achievement that the human race will come to understand in the future, how important the first transmutation of the Soul has been, and what it will create, what it will bring for you, and what it will change in Totality. This is the first step but so fundamental, that in the coming months and years, mankind will come to understand what happened in rooms of the transportation and transmutation in Linz on the 20th of September, 2022, was one of the most crucial points, in the change in the history of the knowledge of the man, and the cycle of man.

The flight, physical flight has no meaning. It has limitations. All sorts of problems. Limitation on man, with traveling with his soul, expansion, and expansion of the Soul, is his own understanding of his own existence. What do you need? Do you need all that. And what do you need? Do you want all that. (:50).

We will release the testimonial of this first flight test the next few days. We were hoping to do it today, but due to technical problems, they could not finish it up, and sort it out properly. It will be done hopefully in the course of next week, you will see it. Most probably, we'll try to bring it in next Thursday teaching, or it will be shown as what we call, "the platform of the work with the Universal Council."

When you hear the people who went through it, and you see the emotion. It's been recorded in two separate parts, because the first part has some technical problem. It has

been re-recorded, but we release both recordings at the same time. Because the first one is when they came out and you can see the emotion and everything else. The other one is done about 4 or 5 hours later. It's important for us to understand, for the first time, we don't allow you just to have the fun with your soul. We allow us to witness it. We allow us to feel it.

This will bring huge changes, in what I call, world order, of what will be the understanding of humanity of his own actions and the rest? When you do a criminal act, judge will not sentence you to life imprisonment. (:52). Judge will not sentence you to years imprisonment. Before you go to court, if there is any court, before that you judge yourself, and you correct what is wrong through the system, to reach the balance of understanding and correction of the conduct.

The judge from now on is your own soul, and the standard set for its conduct, by the souls who have achieved perfection. That is why we asked you to come in from all dimensions (D), and all races to the Center. In the past 48 hours, has been a restless time, if you could understand what has been achieved. As I said, we could have switched on the physical dimension and land the gentleman on the lap of the wife.

The technology is reaching a point that now through its development, we have to, we will, and we enforce interaction to world government. We left it to the Universal Council, (:54). we left it to Knowledge Seekers to elevate the Soul of the World Leaders. Now we go through Satellite system to reach them, and then very near, we'll reach the Soul of the World leaders.

We set example by the world leaders to change their nations to the right condition and direction. It's a shame to hear a world leader to tell his forces to plow the human people, and throw them away. That was not the condition to become a leader. When you disrespect the soul of what has been created, your soul will touch the demise much faster than you think. Those who set to create more mayhem, they'll find out there is no room for mayhem. As they don't even remember what the mayhem was.

In a way, we bring you to the position of elevation of the Soul of the Man through the conduct and operation of the human race, another man, what I call, the balance, understanding and collective work of the soul of the humanity.

What will be interesting is to see how in the coming weeks and months, a Russian man, simple Knowledge Seekers, by standing near Kremlin will change the decisions within Kremlin. (:56). We'll see how Knowledge Seekers in Tehran, by being in proximity of the religious leaders will see them to take their turbans and the clothes off, and walk the path of the man. We'll see people in Vatican, many of you Italians, will change the course of Christianity. When there is no residence within the Vatican, and has become and left empty, nothing but their frocks left. You will see in the Oval Office, no resident.

This is not any more theory, technology for it has been developed. We have managed to transmute souls. And this way we take the soul of those who misconduct, and elevate

them and return them back to the position and the standards of the rest. And that's not only to the standard to humanity, but the whole of the Universal Community.

The systems in Linz has brought the change, which I have worked for many years. This week we have proven it, because we have a witness to it. If you remember the past couple of weeks, I explained that the couple, which go to Moon, they are the same. They know each other well. And we'll see them, they tell us, how they see each other, how they feel each other. First we transmute them in a dimension of the Soul, and both can find each other on the surface of the Moon, and the soul, and if they're happy, (:58). they can take transmutation of the physicality, STP, step by step. And then we'll see the expansion of technology in the D of the Soul.

The most important point of the research up to now was to show that we can transmute the Soul. Not only up to past few weeks, that you could go, feel the energy around you. But now the energy has been transmuted. The beauty of it is, that the creator of energy is still in the seat.

The next step for us after this transmutation, on completion, we will transmute the Soul of the Man of Universe. Men, not as a man or woman, but as the creatures. In the system in past week, two weeks, we feel their presence. It's for us to set our system, to welcome them to join us in the dimension of the understanding of the Soul, of Physicality.

What will be interesting is how our people will react, is how human race will react. In how the Totality of the work will confirm and complete the transmutation and transportation. In the next few days, in the next week, (1:00). we have more trials, more tests, more understanding of the technology. And with it will come more knowledge for you have Knowledge Seekers to expand on, to develop, and to share.

Those of you who have joined the Satellite system, you will start feeling the change, as we have already set up the system days before we go into the process, that you are prepared for what is to come. Many of you have just signed in as a Satellite, and not completed the process. Please complete your process as required, we have a reason for it.

And at the same time, complete and be ready for the change in your lives. It's not going to be the same as before. It's going to be a very joyful life. It's going to be an extension in sharing your soul with Totality of humanity, and it's going to be a joy, to see how those who are devoted to change will bring that change.

It will be very interesting to see how the Satellite units, which you have in a way, committed your soul to be, will extend to reach the soul of the Universal Council, and the Universal Community. We have Universal Council support. (1:02). Now the Satellite Souls are the soul supporters in a direct way for the change of humanity in the dimension of physical dimension of the man. There is a huge burden on you who became Satellites. Try to understand that with what happened in Linz this week, and with the first test, we have set a precedence for the whole change of the structure.

Your child cries, he doesn't talk, you reach his soul, you understand where the pain is. You have mentally handicapped child, you want to know how you can bring the change, you reach the Soul. Does the Physicality matter? Those of you who are "beautiful people" will come to understand, to see all the members of the family within the one physical structure.

We shall see from what we saw this week, end of what I call, or the beginning to an end of the knowledge of what we built, and (nourish), as prisons. We see an end to addiction. (1:04). We see an end to criminality, and we see an end to kingship. We'll see the beginning of how we transmute people's soul, elevate them, (nourish) them, and like a dream you had, return back to them

What we saw this week in Linz, without a doubt will bring massive changes to many of us, and as a head of Keshe Foundation, and responsible for setting up the "One Race planet," as I have agreed before I arrived here, will endeavor to bring that as fast as possible to be applicable, that it brings a positive change. The world is going through a position of mayhem not knowing our certainty, and this uncertainty, is creating more problems in the coming months and years. We are here to use it, to change the course for peace. We are not standing for elections. We are not standing to interfere with powers, we elevate the STM in a very massive way.

Now there are physical systems, and it can be shown, and it'll be developed for all levels of understanding. This process of transmutation of the Soul, and transmutation of STP, which is confirmed this week, (1:06). will bring us many, many changes, will bring us an amazing amount of changes. I hope as human race, as Knowledge Seekers, you understand what you have entered into, and what you have brought to be, and what is about to come, and how much change it will come, and bring for all of us.

Next couple of weeks, as we go further with this development of the transmutation, inside the Linz flight room, we'll let you know how far things go, and how fast things go. And how the whole thing will take shape. Would you go in the left hand machine, with the blue eyes, and come out in the other one with the black eyes and black hair. As it has been your desire to be. But the condition of the Soul, as the soul of the parents created you, created you in blond and blue eyes. You were preconditioned, this change. Now it's your choice, when you ??

When you are born in Scandinavian countries, the womb of the mother environment has changed to create a blond and blue, to guarantee the survival of the physicality, when the physical life takes shape, and it starts living on this planet. (1:08).

When you are born in Africa, or in southern America, the womb of the mother has decided the shape and the color of you, to guarantee your survival, when you arrive and born in the dimension of physicality. Now this time it's your soul who decides. It's your soul which decides how to be, and what you want to be. Up to now you change your name, you change your surname, because you didn't like what the father or mother gave

you. Now it's in your hand to change the whole D of the P. You don't need to go to a hairdresser to blonde your hair, or black your hair, or to do whatever.

Now through the dimension of the soul, your soul has the freedom to take the position and place in life, and the way he likes to manifest. Changes are huge. What is to come with what we've done, is allowing you to elevate your Soul, and then you have to come out and tell your wife. Sorry I went in with brown eyes, now their blue eyes and blonde hair, I still same man, I still love you. But maybe I don't love you, but I love to be with somewhere else, with someone else. There'll be no point of lies. There'll be no point of deception, as the soul balance everything.

Let's see what we achieve and how things will come out. (1:10). And let's see how fast Mankind will accept this T. We will start seeing huge oppositions once we start elevating Soul of the World leaders, as their flock will not like to see change, because they lose what they stole and they gathered because of them. As I say, they are just like flies around the cake. But now, then we have to change the condition, and position of those flies too. It's not going to be an easy job. But we see the change. The change has started, the confirmation of the technology, not the theory, is in our hand.

I hope, I sincerely hope you as Knowledge Seekers take the banner of the "Satellite sponsors" and carry it out. Because it's more important to reach the Soul than trying to change dimension physicality.

We go through the break when we come back. In a way, I congratulate the whole of the Keshe Foundation team. Especially the team in Linz, especially Klaus and his team who have put such a perfect system to work the first time it's switched on. The way it was supposed to do. It's the skill, and it's the sincerity to serve.

In the coming weeks, we will bring the new a dimension of teaching. In the coming months we will not teach in the words of the man. Some of the teachings of the Thursday morning, (1:12). will be done soul by soul. You will understand when it happens.

Many of you have already tested it, tasted it, during the teaching with Rick a few weeks ago. Now you understand how things will change and how will be, and how the whole thing will change for all of us. And to see how a new dimension in the world of science has been created. Rick take us for a break and come back and we'll talk and see how we will reach you in the coming weeks, through silence part of the teaching, and not the world spoken. Thank you Rick and we'll see where we go. (1:13).

>>> BREAK <<< 451 KSW Sept 22, 2022 (1:19).

K- Ready and willing and raring to go. Thank you very much. A lot of things has been made possible by a lot of work of many Knowledge Seekers. (1:20). As I said, step by step on the shoulders of what we've done in the past, we have built the knowledge of today. And we're entering a very interesting phase of development of the knowledge.

The biggest problem now is getting humanity to accept the new knowledge and new technology. The biggest problem for most of our Knowledge Seekers will be in how they will take this, how far we go with this, and how we'll bring the change.

The importance of the Knowledge Seekers (KS), "Satellite" KS who signed in is, it will become apparent in the coming time. Very, very, very interesting how the Soul of the KS who become the Satellites Souls will bring that change. It's very much like when you chose to become the member of the Universal Council. The Satellites Souls will bring huge, huge achievements, rapid achievements for us. In changing the Soul of the Man, ingraining that change. That's the biggest part.

Before we go to the questions, a couple of things I've been asked to mention by the different part of the Keshe Foundation management. Many of you still go through the websites and looking for the Satellites, we have brought those up to the products (page) last week. Last week we introduced for the first time paintings through the, (1:22). what we call, Gans production. The paintings were sold immediately, and a second set of paintings were sold. We have Knowledge Seekers, painters, artists, artisans, who are getting in touch with the Keshe Foundation and they want to put their work in. We have accepted another painter from Italy this week to join us, and you will see her work. It's on the Sales of the Keshe Foundation site.

We have added new paintings to this collection, like you buy everything else. Now Keshe Foundation through the work of the, what we call, our Knowledge Seekers have opened, what we call, the "paint section," where the paintings of the Knowledge Seekers around the world will be put. They put, They send their work to the Keshe Foundation, and it will be set up, and it will be, what we call, goes for commissioning, and for, what we call, the sale with the Keshe Foundation team. You will be able to see many of these, which is now on sale.

And, or you can actually send your request for the picture you want it to be produced as, what we call, paintings. The way you want to feel at home with it, and you commission the work, and we put it out to the, what we call, painters. If you make glassware with Gans's, if you make pottery with Gans's, if you make anything else with Gans's, the Keshe Foundation, now has started going out and reaching, (1:24). what we call, the supporters.

In a way, allowing the application of the technology to come through the technology. You've got to realize one thing, and I brought that from the beginning of the work with the Keshe Foundation. We opened our patents for you to expand the knowledge. We did not put the patents to lock it up in courtrooms and all sorts who used it. Now, we allow you to show what you learned from this open patent, and how you mix it with your knowledge, how you brought it to work with what you do.

It'll be interesting, to see the Knowledge Seekers using the Gans's in glasses in the house, that it bring a total change in the house. As the light comes in and adds up with the energy of the Gans's. We will see how the other parts of the technology, and we are there to promote you. We are not there to stop it. But, remember one thing, we opened and stopped the patent business this way, and you will see more and more of it in the coming weeks and months. It's for you to support back the Keshe Foundation. Put back in, not take all. Because this allows us to serve the others. You don't make a donation, you put back in for what you took.

Many of you have open shops, many of you have opened Internet shops, many of you making Gans's and systems, and you sell. Ask yourself, why don't I become successful. Because you work on the old tradition of stealing. Put back where it is, where it came from. (1:26). And we can evolve it the Soul of humanity in ??. When you steal you don't get benefit by it, and we've seen many, many Knowledge Seekers they're happy to sell one system of something here, one there, just about to make. Bring it back into the community, let it evolve, like the paintings we see and the others.

Come back, and we promote you with the knowledge, this Keshe Foundation, ?? the Foundation, it belongs to you. You can't steal from the family, and come and take when it suits you. We have people in ?? day and night making things, what have you put back to the Foundation? Nothing. You'll be working for the rest of your lives, for nothing. We hear people, the same in China, in Iran, everywhere. They are busy making one MaGrav, and happy, that "I sold one." Bring the technology back, and put back (in), where you got it from, and you get a bigger part out of it.

The people who stole our technology, our factory in Italy, we still let you back in, but you have to find out how to sort it out. You thought you were clever stealing, after we set it up so much. Now I'll give you a very clear ?? line, bring it back in from where you took it, or we take it from you through your own Soul. You still have to understand, the conduct of your Soul will pay for what you've done. Everything has to be the correct way. As you see the pictures that are now for sale, each one is beautiful, these are paintings. An artist spent time making it, painting it, and they are only in twins and doubles. (1:28).

These are the new two paintings from our new artists in Italy, younger. Should provide us with a couple of more paintings in the coming weeks, that you will see. And our resident painter, as I call it, in supplying those beautiful paintings. If you're a painter, and you paint with plasma materials, we are here to promote and make life easier for you. you can sell what ?? your paint. It's a yellow, two or three paintings a year from the collection.

Any questions?

Q: .. In the view that this is International Peace week, he asks, can we hereby announce the intergalactic peace week?
R: Can you hear Mr. Keshe?
K- Hello … Yes, I can hear. Oh, we don't work a week, we work every day for that peace work. We'll see the changes. They're trying to call it a Peace week, but God help them. The way we set up is to create a permanent peace through technology and knowledge. When you create the condition.

I prefer not to say till it's completed and sorted. (1:30). But, you'll hear big changes in the Keshe Foundation work in the coming months. As we develop, as we reach that point, we put you all in the position to understand what is coming, and what is about to come in the whole structure.

The purpose of our work is change through science and technology, it's a new industrial revolution. And industrial revolutions bring economical and political changes. As I was explaining to a Knowledge Seekers last couple of days, the rulers and the kings in the past, especially if you travel around Europe, and everywhere, they built castles, and they put posts on every corner of the castle to watch who's coming, and who's going, to protect to what they're supposed to protect, but they were stealing from their subjects, for them to be the king. When the man created the cannon, and then we found out the castles are not that good anymore, because the canon can bridge it. Rulers of the world hidden in the palaces. Now we've seen with higher flying rockets, and aircrafts, those palaces are not safe anymore, and they can be bridged from other corners of this planet. So, they go deeper in the ground, or they hide somewhere. (1:32).

With this new technology no Soul can hide, not in the deepest, darkest corners of the Universe. And this itself will force, will bring justice and peace. You cannot do what you like, and hide behind the walls of Kremlin. You cannot order your citizens to be plowed out like a grass, and cover yourself in the name of religion, or palaces of power.

We reach you in your bed, we reach you your dream, we reach you in the position that now, as we have saw the castles, and the palaces, and the underground silos are not safe anymore. With this technology, nowhere is safe for those who abused the Soul of any creatures in the Universe. Now you understand why the test of this week was so important. It's that first cannon, we showed the castles can be bridged. Now we bridge the castle of the STM.

You have not even grasped what has happened this week. If you can take your Soul out, we can reach your Soul, we can tame it, we can, not control it, but elevate it, that it brings shame on the dimension of physicality. It's huge change. It is the first bullet into, what I call, abuse of man by himself, and abusing the others.

I don't want to say anything, but one day I explain about this gentleman and his wife afterwards. (1:34). You hear them very clearly in the interview what they say. You have to be wise to listen to the words, and then you understand how much change has come. So, if our rulers hid behind the castles, and the palaces and the crowns, now they have nowhere to hide within their own Soul. Very interesting position ?? of this week. Very, very interesting. So, we'll bring the peace through knowledge, and the knowledge of the Soul, and not the technology of the man.

Any other question?

Q: .. Jefferson Modesto from Brazil. … Does an ionized atom or molecule create plasma fields? If so, in an environment where there is oxygen, nitrogen or other ionized gases, is there a possibility that clouds of the energy packs exist?

K- Of course it does. Of course it does.

We had a very interesting test this week with this transmutation. Where, up to now, (1:36). in all our tests, we allowed, and with our systems were set, that you could see the expansion, or you could feel the expansion of your Soul. With the new setting of the Soul being controlled within the dimension, we allowed a Soul, a separate Soul, to enter the test flight room.

We usually do all sorts of tests, we have to understand, we have to comprehend the interaction of the fields. What was seen was, to the gentleman was very strange, but to us, I set it up deliberately that way. As you remember, this is the room and this is system. We're still keeping our three chairs in. We're still using these three chairs quite a lot for different purposes. We set the system with two passengers, for not knowing each other, totally different, for a standard flight system. But understanding the system was open for total combination, if we wanted to switch on, the other side. Because we can control it, what ?? is going on there.

We sat this gentleman through the old system one, two, three (Chairs), through the seat of Soul (Chair 3). We're having a Soul which is going through development in the system expansion. (1:38). What we were expecting exactly was to see how the dimension of the Soul of the fields of this (Left System), will interact with the dimension of the Soul of this (Chair 3 "Soul Chair"). Understanding that the system we created is stronger (than the Chair 3). The gentleman sitting in here (Chair 3), tells us he could feel when he got to this (Chair 3), because this is a Soul level, and this machine is set on the Soul level. So, interactions are at the Soul level, between the two systems, him and the system. (The System is) near to him, which is about half a meter, a meter.

And what he saw was a cloud formation around his foot and his body. And he could clearly say, tell us, I saw the change, I could see something was happening. But he was inside, because he was in a cocoon of his Soul. He said, on this chair, I could see clouds at my feet, and at the extremities of his leg, which was the interaction of the two Souls of the systems inside and outside (the System and Chair 3).

For the first time, we have managed to create physical interaction, and have the person witness to the physical interaction of two Souls. It's like when you break the "sound barrier" and you see that cloud. (1:40). It's like when you have two different temperatures and creates a steam, and that kind of thing. He could tell us clearly.

I did this test, I wanted to know how the Souls react at the Soul level. And again, the answer was the same. Don't forget, the last chair (Chair 3) is the Soul chair. He didn't have that in the first two (Chairs: P & STP).

These are what we expect to see when we add a second flight part to this (putting another chair in the left system). And we expect to see clouds between the two, back, and the seat in the front seat (between the 2 chairs inside the left System).

So every Soul, every system, doesn't matter ionized, not ionized, a free Soul, ?? Soul, or whatever. When they interact they release energy, otherwise, they can't be. If you call it ion, it means a collection of plasmas, so it has to interact. It has a magnetic field, it has a direction. Like here (on the drawing), if we see two plasmas interact, the observer sees the cloud of his own Soul in interaction with the person inside (?? the System).

There's a lot of tests to be done, I expect in the test to come up, in a very near future, to see the environment of the flight zone (space between the 2 flight systems) to be lit, by the interaction of the two Souls in the system.

We are setting it up, it's important for us to do this, because this will be done with a couple who want to have a child. (1:42). This test will be done for those couples who could never have a child. Because this light (in the center) will be the Soul of the light of the child, the way Mitra has created her first child on Earth.

We are setting the system for this creation of the Soul of a child. Now you go to clinics to have all sorts of things done for you to have a child. The Soul of the child, the Soul of the interaction of the love of the two, and once completed, will return to the womb of the mother, to ?? nourish and the Soul of the Physicality of the man.

As usual we don't tell you, but as we saw the clouds here with the gentleman, we will see the light here. We set the system for creation of the STM, and teach the man how to create the children of the future. This is already possible with the system we have, but we have to find the right couple, we are looking for to create a child. (If) they cannot have it in the dimension of the physicality. (1:44).

This is the changes, which this new technology will bring us. This child will never be sick. This child will never go through the suffering of the man, even though we (it) live the life of the man.

We are doing a lot of tests in this room, which is not open to public. And we see, we know where is the next step, what is to be done. If you noticed, I have not left the room,

I'm not here, I let somebody else to do it. It's just there for them to run for the fun. Every single case, I'm in there to see whether there is a need for a fine tuning, when, what needs to be learned to be there for the next step of the development. And this is how it will come to be.

Listen to the talk of testimonial of this couple, they even tell you, they feel a change just coming out of the system in their relationship after 39 years being married. Then you understand. We used to tell many couples using the Keshe Foundation technology, when they were grandparents, be careful not to become parents. As they looked at it as a way, the man makes a child. We look at it as the way in the elevation of the Soul has no age limit. (1:46). So, if you're thinking about the ion, it cannot be there if it is not an energy field itself.

Any other question?

Q: .. second question from Jefferson, .. In physics we have a phenomenon known as the Lorenz force, which is the result of the superposition of the electric force from an electric field with a magnetic force, due to a magnetic field, acting on electrically, charged particles that move in space. Is there a relationship between the flux of magnetic and gravitational fields of plasma, the electric field of ionized atoms or molecules, such as, for example, these ions and the Lorenz force? If so, we can say that a plasma field flux creates a force, that causes the circular motion of dousing instruments, such as pendulums, and that when this motion is clockwise, we are in a relatively more M field than our body. And when it's counterclockwise, are we in a relatively more G field than our body?

K- Now, put it this way, what happens if you mix a pink colored water with a yellow colored water, and then you throw some of the water in the air, or throw some of it on the earth? (1:48). You keep on playing with, what I call, words. Magnetic fields, electric fields, it's all the same, it's an energy pack.

As Knowledge Seekers, you should have become wise to it. Look at the field. There is a beautiful tape on the Iranian channel. And it's put in by a very old gentleman holding one of these like dousing bars in front of it, and he says, you look, the bar moves, as I listen. If I turn my eye a little, the bar moves a little to the right, and a little to the left. If I look far to the right, the bar moves all the way far too right, and I can control the speed of it. And he shows it, literally physically in front of you he shows it.

It's very interesting, and he says how our emotion controls the physicality. I'll try to find it, it's a beautiful Knowledge Seekers responding to Dr. Asadi question, or discussion in the Iranian channel.

In a way, if the thoughts can create, dictate the radius of the pen, what do you call it, dousing thing, by it, why can't other things do? Every time you talk about electric currents, or plasma current, and electric field force, and a plasma field force, just consider

all of them cannot be there. They are all fields of magnetic field of a different strength. You decide to put different names on them.

If they are two equal, you don't see anything. If any of them is stronger or weaker, you know what, you see an interaction, and interaction of the friction of the magnetic fields creates something. As simple as that. (1:50). A child of five years old understand this, can create what the professors with the PhDs, cannot understand. That's all.

I don't understand why Knowledge Seekers make so complicated things to show they understand. And some of the Knowledge Seekers are becoming worse than, the hypocrisy of the past professors and other people in the world of the present science.

Understand you're dealing with fields, and how they interact, which way they interact, how they rub dictates what you get, that's it. It doesn't matter what name you put on it. Liver, kidney, magnetic fields, plasma fields, what? It is just fields in different strengths. Find out, understand which one has strengthened, and that's it. Bob's your uncle, as we say in English.

I'll be in England in a very short time and we would like to meet with a lot of English Knowledge Seekers. We have a reason for it. I'll be arriving in London in a very short time. We will make an announcement, the reason for it, why, and we will invite you to a very private conference for the English Knowledge Seekers.

There is more by the Keshe Foundation which will be announced. I'll be then moving to Romania. Again, we would like to meet, not with, what I call, ?? Knowledge Seekers. Knowledge Seekers who are there to understand and bring the changes. Then, we travel to two other European and Asian countries to set up a structure for the Keshe Foundation in a very, very deep way. We invite you to join us. (1:52).

These are not conferences, we don't set up conferences, we want to meet on a very friendly basis with most of the Knowledge Seekers in UK. And see how we can structure the United Kingdom's Keshe Foundation structure, because we have a plan. Then the same will go to Romania, we have a plan for Romania, and we go the same way. We want to meet with the Knowledge Seekers in Romania, and set a structure, a process, which is important for us. We don't want "shinny binny" people, "oh, I've done this." No. We want to set a work for Foundation, we want to see what talents sits within the Foundation, which is acceptable to us, not just because you're a Knowledge Seeker. Otherwise, we recruit from outside, the people from outside to what we want to do. The same will go in two other states in next few months, and this is part of the work of the expansion of Keshe Foundation for what we're doing, and what needs to be done.

Any other question?
Rick wants to show video .
K- Okay, put it on. It's beautiful, if you understand it. It's very nice, it's very, very interesting.
<< Shows video of Iranian man controlling the dousing rods. >> (1:54).

K- … What he is saying, I said Dr. Bararpour, as he got the controls all the KF teaching. He says that he want to sow Dr. Bararpour, that it's the thoughts which controls the movement of this dousing rod. And he shows it with the movement of his head, and the way his eye moves. It's beautiful the way he explains it. That's a whole, and it needs more translation, but that's what he actually does, and what he is showing. Carry on, please.

<< Plays Video >>

K- It's beautiful the way he controls even the speed of the dousing rod. Interaction of the thoughts with the physical dimension of the matter state. I think that should answer the question, which you wanted to know if one plasma interacts with the other, and what it does. .. . (1:56).

Q: Mehrnaz.. I had a question about this Satellite (Soul) effect for raising, elevating humanity or others. That's wonderful. You always taught about that before, talked about that before, now it's probably available. The question is, will we elevate man, this quickly without they take the steps of, you know, trial and error, and trial and raising their Soul, (a favor to them)?

K- We've done this before. If you think of it. The example of this is preset. You were never still to see it. When we make somebody, who has not walked for years, (has been) in bed, within a few days, to the world of science it's impossibility. (1:58). But, because you create that motion through the level of the Soul, physicality just follows.

When I get a person who's been paralyzed in bed with half a brain taken out, after two weeks, three weeks (they're) walking. The muscle tissues don't even have the strength to walk. You go to any physiotherapy, tell them that somebody who's been in bed for five years, now walking after two weeks. They will say, it's impossible, the muscle tissue tears apart, doesn't have the strength to do it.

But they do, because it's the Soul which goes. We have done a lot of things which you only looked at the physical condition, never looked at the Soul condition. So, we already set, presented. There are already knowledge to elevate the Soul to take the physicality. It's there, but you only looked at the walking. You never understood the mechanism behind it.

When you saw the Chinese man trying to run and drive, after four or five days. There is hundreds of hours of recording of a patient in the hand of the doctors in Belgium with literally flathead, walking after about four weeks, three weeks. And she can't even remember, when she comes back, she says, "when can I walk?" And we show the video to her, this is you walking.

When you see people come out of the coma, and they move their body, which cannot be done. It's been there for a month, no motion, nothing, and now suddenly moves. It's the Soul of the Physicality which moves it, and we know how to access it. (2:00). So, the

Knowledge has been there. You looked at the physical side. We try to understand the strength of the Soul side, and energy side. Now, instead of being paralysis in the leg, we try to move, now we move paralysis in the brain, and the Soul. That's all it is. You looked at as a human being on the physical side, they can move. We looked at how the Soul and the Soul of the Physicality has moved the body without any exercises.

How long physiotherapy you need when you put your arm in a plaster for 2, 6 or 10 weeks, and then you have to get it opened? Can you open it straightaway and run? No, it needs time to open up. But we do it instantaneously. The same as you Knowledge Seekers going in the flying machines instantaneously, and end up on Mars, and Moon, and they know how to live in the ship, or in the water.

Q: So, is it kind of temporary or permanent, this elevation?
K- It's permanent. It's permanent. The elevation of the Soul is permanent.

Q: And still do they have to judge their Souls, you call, it opening the books?
K- Some will do. Some will do. They don't open the book, they see the result of their action.
Q: Some means the worst cases?

K- It doesn't matter. We don't go case by case. I don't know anything about the people who come in to the system. (2:02). We don't choose a race, color, criminality. We don't know if they are, who they are, what they are, what conditions they come in. We are not. You choose, you want to get to that point. The expectation, and expectation, what we expect.

The gentleman I was talking to about, the clouds he could see. And when he went into the system, and he wanted to go to the Moon. He came out and says, I was crying. I said, why were you crying for? Because I wanted to go, everybody does, but I couldn't do. I said, but you have achieved more than anybody else has achieved.

You're the first person who managed to see the cloud between the interaction of the fields of your Soul, and the soul in the machine.

He could not understand, what a confirmation of the technology he has achieved. But we could not do it, before the system was set for transmutation, that it passes the boundary of the system, controlled with us, that it could interact with him. We didn't put anybody else on the system to check, it was just him.

We tested with another one, in a different condition, in the same seat. It's amazing what you see in that room. If you know what you're looking for. If you know what is set to test, and you get a confirmation that it's correct.

Then the point is that, those of you who are not from this planet. You are the souls which are born on this planet, but in the dimension of physicality of the man. Very soon you will show yourself in these machines. Very, very soon, we will see amazing light work.

When we have, what I call, "passengers of the Universe" with us in this machine. (2:04). We've seen two cases. ?? Subtle touch, and I immediately stopped the process, and I asked them, can you leave the room? Or can you leave the system and go somewhere else? Because I know man is not ready to see that. We have seen passengers of Universe in this room ??. But is the human race ready for it? That's the biggest question.

Q: So that's the question, if human being now is ready for it?

K- If he wasn't ready we wouldn't be here. It's just getting him to.

Q: .. Could we say, just the last question, that, for example, during the, for example, the last the history of a prophet, was Prophet Muhammad, that he could change in space of 20 years, 30 years, the whole construction, mental construction of these Bedouin desert men, Arab men. Could we say, that he elevated the soul of these people around him? And they could go to culture, and science and … kind of ..

K- I'm very opinionated about this. you shouldn't asked me that question, as an Iranian. What is interesting is, why he changed the culture, or Bedouins, or knowledge of the Bedouins, (2:06). and brought such a nonsense people in the name of religion to Iran. What we see today.

When a Prophet comes, he brings elevation not just for his, unless you're a "tribe Prophet." We have messengers in different sizes, for different conditions, for what they understand to enlighten their flock, as we call it. Mohammed did good for the Arabs, because they are Bedouins, they had nothing. But, how it brought change to educated knowledgeable nations through murder to stop them in their tracks of the knowledge, that the Bedouins can reach. And Bedouins in 1400 years have not managed to reach it.

The beauty of the knowledge, the culture of Syrians. The beauty, and knowledge of the depth of culture in Egypt. Even Muslims, the Saudis have never managed to get to it. The same with Iran. They made by force of sword, Muslims, and then they interfered in forcing us religion to be a rule. But they haven't brought, they haven't learned anything from the culture. You can buy, but you cannot change.

Saudis with all their wealth today are buying the latest technology. But have you been there, have you seen them? They still eat like Bedouins and worse than backward black people in Africa. You're ashamed to be with the Saudis, some of the Saudis in the same restaurant, just because they have the money.

The same way, we see it with many. I used to got to Frankfurt a lot. I used to spend a lot of time in Frankfurt sometimes. (2:08). In Frankfurt there is a restaurant called, " Falafels ??" near the Exhibition Center. At the beginning of the first years of revolution, these Mullahs used to come to different things to Frankfurt, and they used to come to this restaurant. It's a beautiful restaurant, it's a small one, but some of the most beautiful, delicious foods, Iranian foods in Germany, you can in this restaurant. He used to have a display cabinet, like, you know, self-service for salads. And these people who stole the

money by killing many Iranians, robbing their homes, on whatever the name of, what you call, revolution, Ayatollahs, and the rest of them, used to come to this restaurant.

I've been there a few times. The guy said, he literally had to take it off for a while. They used to come and go with hands in the salad, to put it on their plate, in the salad section. Go in there and put it in their mouth. You could see part of the salad still dropping from their beard. The wealth did not bring culture.

The strangest thing is that the people have religious, go backwards in humanity. And the people of the religion, but in the civil side, grow in, what do you call it, knowledge. Because one is there to gain, to give, one is there to gain, to steal.

Soon you'll see the end of the Islamic rules in Iran, very soon, sooner than you can think. Not because of revolution, but by people turning back on, what was forced on them. Religion will have no value. We see the same thing in Italy. Italy it has happened, but it's so subtle, it's underneath. People don't go to churches anymore, because they're Italians and the Vatican. (2:10).

So, what Muhammad brought to enlighten the Arab world, or Saudis, has brought pain and suffering to the those who have ignorant, to the rules of Lenin. Lenin had a very good .. , if you read the instruction of Lenin. Lenin said, when you capture a government, when you capture a country, give the most important jobs to those of the lowest level, who have no understanding. And give the most menial jobs, the smallest, to the ones, once men of knowledge and power, and you can rule.

Because the one at the bottom who never could believe, he could get to this point, tries to hold on to it. And the one who had knowledge, but (is given) the most menial jobs, is all suffering, why should I be here? This is not my place. So, you keep the two busy and you run the country.

This is the way Iran is run today. We have given our nation to a bunch of ignorant, non-intellectual, but robbing the nation. Soon this will change. They are grabbing to the power by killing and everything else. And the one man of knowledge, is busy trying just to survive daily life. We see this, it's the same in many countries.

As I said to the Ayatollahs, touch me, I abolish you. Not with guns, but with their own lies, with your own Soul, you do it to yourself, not with me.

The power of knowledge bring the end of religions. But, did Muhammad bring to create war? (2:12). He was supposed to be Prophet to bring peace. Why do you say, "a salaam," peace on you. You peace on you, and then beheading. It doesn't match, it doesn't work. You say Shalom in the Jewish language, and then you create mayhem and lock millions of Palestinians up. Which part do you peace?

I said to a Jewish guy or a Jewish rabbi, a very interesting thing, if you're knowledgeable, or if you've seen when you enter a Jewish home, there's a little placard on the right-hand

side on the door. You see when the Jews go into the house, they touch it and they kiss it. Inside that little bracket on the wall, there's a part of Torah. In a way it says, take the love of me into the house. That's all it is. When you go into the house, with the love of me, as Moses. As I said to him, you know what you should do Jews. You should put one of these on every Air El flight, every flight go to Israel, that you kiss that when you enter your country you take the love of the world to it, not bring a hate to it.

What do you call a love, to bring love, is it just your own home or your nation? Your nation is Palestine. Do you put your child, one of them in one room, and lock it up, and feed the others? Is this how Moses was supposed to do, even though he was ruthless killing so many. It doesn't make sense. Religion has lost its sense. Now we understand the work of the Soul. There is no, what you call it, intermediaries. (2:14).

So, did Muhammad bring knowledge to the Arabs, or did the Arabs went to, in a way, because they couldn't understand it, they don't have a foundation of it, they went to the others. If you work, I worked for years with Saudi royal family and that lot. For years, from a very young age. Saudis always have an advisor who has culture, mainly Egyptians. You don't find a Saudi advisor to a king, you find an Egyptian, a Syrian advisor to their leaders, because they don't have the culture.

Five, six years ago, we stayed in a hotel in west of Italy, and we were in the same hotel as the Minister of Education of Saudi Arabia. He was there with his family, when we were there ?? . In a few encounters with his advisor, who was an Egyptian. He would not talk till his advisor, has advised him how to talk. I worked with one of the top Princes of the Saudi Arabia for years. He never spoke himself in a meeting, unless his advisor Dr. Eed was available and advising what to say.

Bringing whatever to Saudi, did not bring them integrity and knowledge of wisdom of the life. I've been among these people many years. It's crazy how money has not brought them any culture. Leave them alone, they still eat with their hands, it doesn't matter if there's a golden plate, and a golden spoon, and a golden table and chair. (2:16). Gold covers the Saudis of, what I call, lack of everything. Physicality has taken over the plate. When you go to the Saudi Embassy in Brussels, you'll be amazed the gold tables, and chairs, and boardroom and the meeting rooms. It’s a cover for stupidity, and no knowledge, and no integrity. You can dress a monkey with the most beautiful clothing in the world, but you don't change the monkey, it is still a monkey.

There is something I have to mention. It’s on the Net, I haven't seen it, but now it’s in public, nothing to do with the Keshe Foundation site. We had a family in Brazil, who had battles with the new Corona, and the child was affected mentally. We advised, through the knowledge of the Keshe Foundation, how to handle the new Corona. Now she sent me a note today, that she has gone public with it or whatever. How to overcome this situation with the new Corona, which is supposedly coming back, and it’s coming back, but in different strength.

Please, if you have tackles with it. (2:18). This family has used the consultation of the Keshe Foundation in how to tackle and handle the new Corona condition, which brings a lot of mental condition, for their six year old child, or boy or whatever. If you see or observe this broadcast, or this disclosure, make a note of it.

Dr. Bararpour will release once if we see it, if it becomes predominant, how to handle the new Corona through Gans's. Very effectively, it's not as before. The old Corona interacted with the physical condition, this new Corona interacts with the emotion, and it's very, very dangerous. Some of our Knowledge Seekers, very close to us, have battled with it for a few weeks. They know who they are, we stood by them, and it takes time to go, it takes weeks to walk out of this. Brings depression, bring suicidal conditions, they report to us, it brings a lot of emotional conditions.

This will come to you, because now it's gone into public with this interview, whatever it is. I've not seen it. But we hear that the European nations are bringing back the restrictions again in the wintertime again, with the Corona. But if you are touched by it, listen to this. The family were given advice, our team in Iran were giving advice on how to handle the new Corona. It takes weeks to walk out of it, and it's very emotional. You go through the symptoms of Corona, but what they report to us, they become suicidal, they become depressed. Depression is beyond the imagination in some cases, what we hear. So, please, we have released the news of the Gans's for the new version of the Corona to some Knowledge Seekers, (2:20). and, as I said, Dr. Bararpour in due course will release it internationally.

Carry on, please.

Q: I know of a man who was also involved in high consciousness and galactic contact. He woke up one day with blond hair and blue eyes. One day for the next. He quit his career and began to work in consciousness. Do you think he went through this same process?

K- Elevation of the Soul has no time, and place, and soul, or color, or race. So, it is, you can do, mankind has done. As I said, we have seen this before and it's not exclusivity of the Keshe Foundation.

Q: What is the tipping point needed with the Satellite wisdom seekers? Is the idea to just move out leaders who are out of resonance with the future?
K- Oh, no, no. It's nothing to do with moving world leaders, no, no. We'll just gave you an example.
Q; Will these leaders have spiritual awakenings?
K- That's our job, you are there to provide the Soul.
R: So, that would be what would be call, elevation of the Souls? What people call, spiritual awakenings?
K- In a way, yes. (2:22). Elevation of the Souls, it's not awakening.

Q: What awaits humanity on the other side of this transition? Will it be a Cosmic Renaissance? What will be different, our human capabilities, rapid manifestation from thought to materialization?
K- Can you repeat that?
Q: What awaits humanity on the other side of this transition? Will it be a Cosmic Renaissance? What will be different? Our human capabilities?

K- It depends on you, as. It depends on you on what you want to achieve, as we've seen in the Enhancement Center. People come and say, we haven't come here to fly, we just want to do this, or we want to do that. And people come here and say, we just want to fly, and they see it as ultimate point of flying, if they don't achieve it there is something wrong with them, but they achieve everything else. It's expectation. What do you expect? What do you want?

R: Well, you mentioned for example, that it'll become harder for leaders and for, perhaps everyone, to lie, because things become more transparent, then it'll be obvious. And it's already is. It's becoming like a clown show, in a way, (2:24). because it's becoming so obvious. But is that part of that transition, that essentially we start to become more telepathic as a race, as humanity? And that way, you basically can't get away with lying, because everyone knows exactly when someone's telling the truth or not?

K- In a way, yes. And the ones who lie, they keep on telling everybody else lies, because they lie all the time themselves. It's very interesting. Those who lie accuse the others that they are lying, because they lie on themselves all the time. This is how it is going to be, till they find out, they lie themselves to everything.

Any other question?

Q: .. What changes are through you occur in the lives of the people going through the units? What changes occur in the lives of the people going through the units? Will they feel divine or light weight? Will they experience synchronicities more often?

K- They report all sorts of things. They report all sorts, they report lightness, they report being like in a cloud, having no weight. We noticed that when we used to use the Chairs 1, 2, and 3. Always chair two was when they could feel that there was no weight, I am losing the weight. When they were coming back out of the system, they were getting the weight. Then the first system (Chair), their weight ?? suddenly coming back to them.

As I explained before, (2:26). it's like people who go in the water, and they just walk out. In the water you can lift your girlfriend and throw her to the other side. You just walk with your legs still in the water, you can't even lift the girlfriend. So, it's the condition change. You're coming from the sea, or ocean of the fields of the higher order, into the dimension of the fields of the matter state. It's different. It cannot be described better than this.

It's amazing how, every time I go, you know, you go into in a refrigerator, or you go into a freezer rooms. People usually put the jacket they go in, but if you go in and out, you feel the change in the temperature. Well, you know, when you come out of the freezer room you are still shaking, because you just came out of such a massive cold weather. Every time I go into the Linz flight system I get that condition. I'm very sensitive to the fields. I feel all of it, whatever it is there. Worse than me is Klaus. Klaus is amazing when he feels the fields, he just go "burr". For me, every time I go in and out, it's just (like) going into a freezer, out of the freezer. But this freezer is a field difference between outside, and what we have created inside the room.

The system doesn't shut down, it always stay active. You feel it. (2:28). When we change the parameters in the room, we feel it. We hear noises, we are aware of the interaction, where to go and what to look for. The machines don't make noise, but when you come in the center, the interaction of their fields creates noises, and different noises comes from different parts of it. That room is such a noisy place, it's amazing. It's energy field transfers.

Any other questions?

Q: Salomea .. My question is related to winter, nuclear winter. As Russia said, these days, it's a threat. I hope that it's only a threat and will not become reality. And my question is, can we help in the direction of the peace in this case, and how? Thank you very much.

K- Yes. As I have said before, in the teachings, KF has already opened the channels of communication and transfer of the technology to IAEA, (2:30). for eventualities of anything goes wrong in Ukrainian nuclear reactor inside or outside.

As has been our tradition, I explained before, when we had the problem in Italy, we opened the Italian factory, and Italian structure for the Italian government to help. We have allowed, we have opened the stock availability and the technology of the Keshe Foundation to IAEA. Mr. Grossi has already confirmed the receipt of communication and they are working on it. We don't work outside, we work directly with the Grossi's office personally. They know if the need be, the technology is there to support. There are all sorts of ways that this can be done, there are all sorts of technologies, which we have we can implement to support any eventuality.

Q: Salomea … Thank you very much. And I have another story to share, concerning a friend who was in coma, about two, three months in the hospital because of this virus. My mom came on my dream and said to me, don't be sad. And please tell to the family that he will be okay. And I call them on the Zoom, I informed all the community, international community about my dream, and he came back from in life from the coma, and just share with us what he was listening, (2:32). and he was near. So, I think that plasma technology, enable us to communicate more and more with our relatives, which knows the truth now. They see the future, the past and the present, at once, they are be beside time in space. And also, I think that we become messengers, and we can know the

truth, with their help, if we communicate at the plasma level, I mean, at the Soul level, with them and we travel at the Soul level during our sleeping or not sleeping in delta state of mind of waves, radiation waves of the brain, maybe of the brain, not of the mind. And this is one proof that we can know the future, and we can influence the future in a good way. The condition is to have this emotion to trust, and to send this wish in the universe, in the Unicos, and in the Soul of everybody. To elevate them to trust that nowadays we are the messengers, we are the promised ones. (2:34). Jesus Christ said, I can do miracles, you can do miracles, everybody can do, because all we are the sons of the Creator, sons of the creators. So, Plasma Technology just explain in a scientifical way this true. I'd like to thank you very much, because every day, every time you wish for humanity to understand and to practice this technology to elevate their Soul. I'd like to come in Linz. Unfortunately, my life does not allow me for the moment to travel, and to do what my Soul wants to do. But at the Soul level I went many times there, and I thank you very much that you create such amazing unit, which can help humanity to pass in another circle of elevation of the Soul, but by this, how do you call, "shanti" vortex, I mean, the vortex of peace, or this satellite. The satellite can't be a satellite without the strong vortex of the Souls and vortex of the peace. I am sure will bring humanity peace. Thank you. God bless you. I love you Mr. Keshe.

K- Any other questions? (2:36).

Q: Dean .. Mr. Keshe, I listened to some of the teachings this morning. Can I ask you…
K- Where were you for the rest of it?
Q: So, Mr. Keshe, what is the key, what is the fundamental key to peace on planet Earth? What is the technology? What is the ignition, what is the point where the tipping point, the elevation? What is the key to this peace on planet Earth?

K- Loving. When you love, that's all. Because when you love you give, you don't take.

You interviewed the couple on Tuesday when they came out of the machine. You interviewed the first, as they came out, and you saw their emotion. With the sound problems, you interviewed them the second time, a few hours later, where they had time to actually chew what happened to them. When you listen to the interview, you'll see they, talk different in the second interview. The words are different. There's more wisdom into it.

In part, if I'm correct, the guy says that, "in next couple of days, we'll see changes," or something like that. I think that what we see is, that they found love. They found something which was missing between the two of them. The man was very emotional, as we will see it in the recording, (2:38). because I think he realized how much love he was missing to give, and realizing with the condition, his ?? health condition, realizing how he was more concentrated on his own than actually the partner to give to. He talks about the changes to come, because he became wise to what he has not given in the relationship. So, there's a balance, when man becomes a lover. Then become like a Creator. ?? ??

Q: .. So, Mr. Keshe, you said that the key is love, loving. So, we have positions on the planet now where certain Souls have intentions, or, for them loving is a completely different field strength, a completely different interaction than how other people perceive loving. How do we, we how do we…
K- Try to be precise.
Q: So, some people love is dominating, is controlling. Other people's love is expressing and giving unconditionally, to them, to their understanding, and giving as much as they can. So, on a level with somebody who claims to be in judgment of others, and then another who is working in a different position on the planet, and gives a love that is genuine, to help. How do you see this role reversal, so that the planet has this loving aspect? (2:40).

K- It's not a role reversal. It's, those, the ones who talk like rulers and the leaders, they love themselves to stay in power. They're not there for love of the others. They are not to give, they want, they say, for the better of the nation, but, as long as I am there, and I head the nation and it's for me. So, it's not loving a nation, it's not loving the structure, but themselves.

It is what we see, and what we have and what we can give for. How can I put it? I'm trying to be very diplomatic, as I call, which is not me, I'm not trying to be diplomatic, but trying to put in a very right way.

I heard this week. Iran leadership, Ayatollah Khamenei of Iran has instructed the military forces to cut the people like a grass and throw their bodies away. Those who goes against the regime, with what is going on in Iran.

I wrote to one of the Knowledge Seekers, when it comes to this point, the leaders loose the love of the nation, and that's the end of the cycle. Because they love themselves, they love the power they have, and nothing else matters. When you are a leader of a nation, you love your nation, every love counts, every love is precious. (2:42).

Then you understand why I have so much respect and admiration for Gorbachev. What we see on the streets of Tehran, what we see now in Russia, started against Putin, this could have been channeled into love and care, what the nation wants, and not killing the nation. Then you understand truly what a great man Gorbachev was. Not one life worth more than his, and he wasn't prepared to put soldiers on the street. He said, you decide as nations, you want to stay Russia, you stay Russian. You want to become separate countries, please become separate countries.

When we look at totality of these nations, 15 countries and satellites of Russia, you see nothing but poverty in all of them. They are independent, but only for those who stayed in the leadership. The rest of the nations. I traveled through these countries. Poverty, the hardship is so much. It hasn't brought freedom, it hasn't brought the change. So, the love of a leader has to elevate the soul of the citizens, not just for himself to gather, what we call, financial gain. There is a certain amount of comfort which goes with leadership, but not by force.

The whole structure of understanding has to be the way Keshe Foundation is settled. We are all Knowledge Seekers. We all respect each other in respect to the knowledge and no more, in what we have. (2:44). I've devoted my life to bringing the change through knowledge, and science and technology. And, we've seen how much abuse we stood, but this is a transition, I accepted it, because it cannot be all, what you call it, honey and butter, as they call it.

But you enforce these conditions, the way we see, you will face with the, what you call it, the harsh mess of return of people. What I see, because I'm very close to this, I know what's going on. You look at the soldiers on the street of Tehran by killing. None of them are Iranian. None carries an Iranian passport. They're Syrians, they're from Iraq in the backstreets, whatever they've been promised huge wages. We saw that in the Iranian Revolution. There is now with running Iran, with the "Salam … "Where is the barricade, and where is the peace on this." Except as long as I'm in power.

I see the end of the cycle of Islam in Iran, in a very rapid way. Not by revolution, by the lost of the love of the leaders for their nation. The same we see in other countries, the same is going on in Saudi Arabia. Saudi Arabia position is worse than Iran. We see the same in Palestine. Palestinian, in the numbers are increasing more than the Jews. Jews, all the battle is going with other Islamic countries is to hold onto the power. (2:46). The easiest thing that Israelis can do is just open the Gaza Strip and the West Bank, all as one nation, and then you will see the whole world will open, but they don't have that mentality.

Q: .. So instead of these positions, these Souls, these physical beings that have a certain position. Is there a position where they can flip, they can change in an instant, with just a thought to give to become this loving? Instead of ending up in a rat hole with the people chasing them? To flip it, so the people flower them, come to them with gifts and love them? Because that's power. That's beauty.

K- Yeah, but they don't have that mentality. They don't have that mentality. And they don't come from that educated background. Education doesn't come in one generation. Culture doesn't come in one generation. Culture is bred over centuries. And those in power in Iran have no culture. Those in Saudi Arabia have no culture. They don't come from that breed, they've never been. They are thieves of Baghdad robbing overnight. It's like what you say in English, Robin hood. Listen to what you say, rob in the hood, means thieves of Baghdad, rob in the dark, when you cover with a hood, on your face. (2:48). It's not the name.

This is part of the culture we see. It's not just, you've got to understand, all this is happening, because there is an end to a cycle of what man has done for thousands of years. You see, the last ?? cleaning of themselves, of the system. It has to be done not by being a religious leader, not by, but changing and bring in the, what I call, a cycle that it does not necessitate a ?? system what we see today. No man should sleep hungry, and no man should be sleeping in the wealth.

You go to Vatican, you've been there. Knowledge Seekers have been with me, I said many time. You will walk behind that boundary of that circle where Vatican starts into Rome. You see all the beggars sleeping in cardboard boxes, and the wealth inside in the Vatican. Is this what it is, religions are there to gather wealth. This is what is to be. Now it's just there to mature, to bring the next step.

Why should be a palace that has 200 rooms and one person that buys it, and so many people are sleep hungry? Where is the justice? If you've gone to Kinshasa, Kinshasa is a very typical city. Part of Kinshasa, you pass the palace of the president, (2:50). and during the last president of the father, and I think it is still the same. These criminals go to sleep at lunchtime, and they actually close the road passing the palace, that it might make a noise, they could be heard a kilometer away inside the palace. They go, the arrogance and the abuse go so much that, they close part of the city because the president is going to sleep. Is he going to sleep, or, as we found out, he's with three or four Russian ladies. This is the hypocrisy they want to see, they have power. And all this will come to an end.

Q: Thank you Mr. Keshe. I think nothing, I sense that in this moment that I wish them all love. I wish them unconditional love that they receive from the elevation of the Soul, to receive a field strength that elevates them, and catches their very Soul, their very essence of Creation.

K- They are too busy to receive it.
R: You have to get in a 24 hour lineup for that one, I hear.
K- Yeah. There is abuse of power in the political scene, and others, which these people could never dream to be in it. But when they get in it, they don't want to let it go. (2:52).

Any other question, or shall we call it the day, it's nearly 12 o'clock?

Q: Malcolm on the YouTube here who's interested in the flight simulation experience and especially for his loved one, which is, who's been diagnosed with dementia. But a quantum scan showed an old injury to his brain. So, with the flight simulation experience would be beneficial? Have you had anyone with that in the system? And the other part of the question is, or would it be more beneficial if he went through the system himself, and then elevated his loved one's Soul?

K- These are flight systems. And if you have anything to do with that side, you have to speak to the doctors of the Keshe Foundation. We don't promote our systems as a medical system, these are flight test systems. But, if you need support or whatever, you have to speak to doctors of the Keshe Foundation, which now work with Keshe Foundation, and use the technology for these kind of things. We do not carry a medical ??, we don't produce medical system. These are spaceflight systems, and all developed for the space technology.

Any other question? (2:54).

Q: .. There's an urgent need for young people and adolescents with anxiety, and depression and suicidal ideas. And she's saying, please support us physicians with the support of these conditions.

K- We have a full technology to reverse this. Keshe Foundation is in possession of full knowledge and technology, very effective, extremely effective.

As we are not involved in medical application on this planet, join us on the Moon, we can do it, because the rules of the Earth does not apply it, as I call it. If you understand exactly what I mean. We have, Keshe Foundation is in possession with the knowledge for all this bulimia, everything else that you have, FMS, and the rest of it. But we are not in the medical practice. We use this technology for the space development.

But we have set precedents for showing that the technology is extremely effective in dealing with these things. And it's not our fault. It's the fault of what we had, what we went through, as you Knowledge Seeker around us. We just came out of five years of, what I call, lockdown with all the accusations, Knowledge Seekers who went and saw what happened to us in Belgium. The conduct of the world leaders has set up for the others to suffer like ??. (2:56). We have the knowledge, and an effective knowledge to handle these conditions.

We are talking to, I'm sure the Knowledge Seekers are listening. We are talking to medical people in a nation, that allows the technology of the Keshe Foundation free to be practiced. If we come to an agreement with the government of this nation, through these people who approached us with it. If we can do such a thing, then we will openly work in this country for development, and most of the Knowledge Seekers can travel to this clinic to be set up, or whatever next year, or whatever happen. For all sorts of interventions by medical people, through use of the technology application.

It’s not so easy at the moment, with especially every country. One of the biggest bribe houses in the 99% of the countries at the top, one is Ministry of Defense, when they buy arms, and one is the Ministry of Health. They all been paid by pharmaceuticals to create restrictions on the others, on new technologies and the rest. To deliberately stop these things. But there's one or two countries, which are still open, except North Korea, which we don't deal with. (2:58).

If you are from governments, and you want to test all the lethal weapons, you go to North Korea and they do it for you, because human life has no value. All the bio-chemicals, all the chemical warfare tests, for the Americans and other countries, are done in North Korea. They shout ?? that they want to do nothing with the nuclear ?? but they do all their tests in North Korea. But we haven't got to that level yet, ??. But we will let you know if these things happen gradually, we let the Knowledge Seekers know where to go to.

Q: .. Can British nationals attend the conference in England online if they live in another country?

K- This is not a conference, we don't want to get involved with people coming, whatever. We want to get a consensus on the total position in respect to England. We see other things, and positions needs to be completed in. We might have opportunity and position to do that in England, with our Knowledge Seekers support of our Knowledge Seekers in UK. So, we feel more comfortable to operate within English territory, and so many friends ??. I lived there for nearly 30 years, and I know the structure, I know how the things to be done and it got to be handled, especially on the research and development side. (3:00). Somebody said, are you moving in because the Queen has gone? She has nothing to do with it. We don't what we're going get with Charles, but hopefully it'll be better.

R: You don't want to be king of the Commonwealth, Mr. Keshe?

K- We already have. There is no ?? Commonwealth, nobody needs to be a king. You're still a subject of the Queen, Mr. Crammond.
R: We're now the subject of the King actually, he signed over. We thought our prime minister was the head of our country, but he just signed it all over to the king actually.
K- He had to swear to his, what do you call it, to his masters.

Any other question?

K- Thank you very much indeed. As I said, need many, many more Satellite Knowledge Seekers. Just don't stop coming to Linz. Register for it. Because if we don't test on the ground, we cannot test outside.

Please, still keep on coming to Linz on the trial tests, that we can fulfill our Satellite conditions, and then we can go for a space flight. Thank you very much Rick. Hopefully we'll meet next week.

K- Soon we will be about the 10th year coming up, in the next two, or three weeks.

Thank you very much Rick, for all your support and work. We try to get this testimonial. It's been transcribed to German, needs to be transcribed to English. Then we release it, maybe next week. Thank you very much Rick.

451 KSW September 22, 2022

Testimonials of transmutation; STP transmuted; Souls talk with each other -objects sent and felt; Request to make children of Soul on Moon; Bring Soul of World Leaders into Linz - elevate; First to change is Pope; Christ remain King of Man; New Race by John -

(H - H2 - H3 - U-235 - CH4); Mankind is just collection of intelligent gases; Bill Gates in Nuclear Industry - tried to take over KF; Waiting for tipping point of change; Pope calling in money form Catholics around world

ENGLISH TRANSCRIPTION

(:08).

K- Yes, good morning. Good day to you. Wherever you listen to this series of Knowledge Seekers, to Keshe Foundation, Spaceship Institute, knowledge sharing. We welcome you back. Coming back briefly in understanding of what is to come. (:10). We saw the first steps into it transmutation of the energies, or what you call Soul, or energies within the ?? man's physical body. How we have managed to expand it.

As I said last week, we saw a couple of going through it. And this week we had another couple, a father and daughter, and it brought a lot of confirmation to how close we have become to the final destiny, or destination of full transmutation.

As I said, we need you to come in that we perfect our systems, to bring what we call finality and eventuality to it. Every time some of you come in, we learn, we test different ways, we understand more. This week, we had a literally two days off, on testing on transmutation, different combination, couples, friends, strangers, in a group of small and big, with strangers present, which have nothing to do with the transmutation, to see if we can operate in those kinds of systems. We are testing everything, which is, could be a point of learning, or point of what we call, avoiding, not to do.

This week, we're going to look at first, to the recording of the first couple last week, where they explain what they went through. This recording was made two times. You're now listening to the second time of it, when it was done hours after. (:12). Where the first session has a lot of noise and voice problems. But we have both. We decided we will play the second session and just listen to it. This is the time, the emotion of coming out of the system has gone. It's more logical and I explained some of it to you last week.

Then we listen to the one of the recordings, one of the what we call, processes of this week. We learned a lot this week. And by the look of it, we are not very far from full transmutation. Yesterday's tests with our friends from Holland, the father and daughter, brought a massive step forward.

You got to, as I explained before, realize, we have many controls over different aspects of the transmutation. We allow transmutation of the soul, we can allow the transmutation of the Soul of the Physicality (STP). We can allow the transmutation of the physical dimension (D), but with the dimension of the Soul, and not the physical dimension.

We've done that this week. One more or less, switch away from full transmutation. But it's too soon. We have not done, as I said to our Knowledge Seekers (KS), we want to

have the whole body across, not pieces of it. And this will come and this bring a lot of knowledge to us.

Some of you might not understand the gravity of these two tapes. But if you're involved and you set systems up the way we do, you understand it's a massive change. (:14). To you it's just a voice. To us it's 40 years of research and development. When somebody speaks that, "I felt," or I hold, or "I held," you can't do it in the normal way. Scientists for centuries have tried this. Now theory has become a technology and it needs to be fine tuned.

We had yesterday 2 Australians, and for first time most probably, at the Uno center (Linz), we put them in the system. And strange enough, one could pass an orange to the other side. For the first time the other side could feel, he has received it, he could touch it. He could feel, he thought it was a lemon, or an orange, but he decided it's going to be a lemon. The other guy has actually sent him an orange. Nobody told him to do anything. It was the decision of one, on his own, in one machine, sending with thoughts through the Soul, an object. And the other side, in the other machine has actually had a feeling of. But as he said to us, they're going record it. They're going to come back next week, they'll record it, maybe we can share it with you next week. That he felt, he received an orange, and he was too busy, with too many things in his head, and he was trying to put, to do too many things in the machine.

So, we have gone one step of transmuting matter state in the dimension of the Soul, which is another breakthrough. Which means now we can send your suitcase with you too, when we send you up to Moon. (:16). You will not turn up naked, but I don't know if anything in that suitcase will be any use to you. Because you've transmuted, you need two extra arm holes, and four extra arm legs, and legs and arms together, and different height and shape.

So my advice to you travelers of the future, to spaces, just don't pack anything. Because there are no tables, just ?? meet. And most probably part of your suit, or your clothes you took, or the toy you took, in the environment of the new plasma will take a different shape, or would not materialize. Because in that environment, such material cannot be manifested.

So we are entering another breakthrough, we are entering in the process of explaining, delivering, and showing to you what is to come. What is going to be. The couple you see on the sofa, as, if you remember last week's. They have been together for 40 odd years. married for 39 years, the gentleman has had a heart condition before, recently. And don't forget, that we will follow them the next few weeks and months to see what happened to them, in actually, the ?? totality of their experience.

But listen to this very carefully. This is something like they went in early sessions. And this is actually happened, the sessions ?? finish by 6 o'clock in the afternoon. They had time to sit, to think. The emotions have changed. The original one we still have, we can show it today. We try to transcribe it, and then translate it. Mario does most of the

translation as it is. (:18). and some versions of transcribing, and translations for those of you who might have a problem with it, it's done in pieces by the German community with the help of our team in Romania.

You will see it, hear it. Look at the emotions. The transmutation has touched the Soul, has touched the physicality (P), which creates the emotion. Even hours after going through. When I spoke with them when they came out, the feeling and the emotion, and explanation of how the female partner explained, she could feel the vibration on the left side of the heart, or the right heart side, and it's very precise. It's a German precise language with it.

We'll listen to it, if we can play it, and then we come back, and then we go listen to the other one. Which we give an option to our KS if they want to go on camera, or they can go on voice, and I think this is one of the very first voice recordings we have on an MP3, for the father and daughter, beautiful couple from the what we call, "the land of birth of Keshe Foundation in Holland." Would you like to play it? Then we'll listen to other one.

Plays Video of testimonial of flight >>>
(transcription of recording)

Dean : I think humanity has just experienced something wonderful. Thank you both

Thank you. Thank you very much for your recording of this explanation of your experience in the flight Enhancement Unit. If you'd like to share with us in your language, how you've experienced today in your own words and understandings. Thank you. (:20).

Translation >>>
(:20).
(:22).
(:24).
Dean: Thank you. You can see there was a lot of emotion there. Mario would you explain to me just an overview so that I can ask a couple of questions.

Mario: Yeah. The special thing that happened here, is that Mr. Keshe made an experiment with them, without them knowing. (:26). And they're the first people doing this kind of transmutation experience. And what Mr. Keshe did is that, he wanted him to be able to send her emotions, and not just emotions, Mr. Keshe explained that the soul was opened, but then also the soul of the body, so that she can feel it physically. And that's exactly what she described, that she felt the warmth and the feeling in the heart of the left side of the heart.

This is the first time this kind of transmutation happened. The last part of physicality itself, the body itself, this was still stopped, the system wasn't programmed to do that. So it wasn't to teleport the body basically, but only to first the Soul. And then also the STP.

And yeah, that's, that's what Mr. Keshe did with them, and put the wire in the hand, and connected them. The interesting thing about this, is that this was a one way trip. So the system wasn't set up for her to send something. This is what she explained, she tried to reach him, but she couldn't. But he could reach her. The system is built for going from one to the other unit, and not the other way around. And that's why she couldn't reach him, but he could reach her. This is exactly what happened.

Dean: Thank you, Mario. Thank you for explaining that to me. So I can see there were lots of emotions. And this connection as you say was one way. So how did you send your information's through this energy flow

Answer: .. (:28). He said that in this situation where he was feeling really good. It was a hard task to decide what to send her. Then he thought that words are not enough. That's why he thought about sending her love and light.

Dean: Okay, so how long have you known each other before you went into the to space experience?

Answer: Approximately 45 years, and they are married for 39 years.
Dean: Very beautiful. And that deep connection, that soul connection that you had from when you first met to this moment now? Does it feel like this experience, in this moment, do you feel more connected? Is there any difference?

Answer: They will try to use the same technique without the system from home. Now that they know how it works, and then to do it without it. They still, they are connected to the system.

Dean: So yeah, you're always connected. Thank you for that. That's a wonderful explanation of what is actually taking place in there. Are you planning to come back, or is this a one time trip?

Answer: (:30). They are planning to come back. Because of the fast development of the systems here. That's something that they want to do again together. (he said he would not do it alone.)
<< Audio is broken >>

Dean … on another planet? What environment were you in? Were you aware
Answer: He cannot say where he was. He describes it as he was, in the somewhere. It wasn't so specific, like he didn't see any stars or something like that. But he was feeling really well.
Dean: So physically. (:32). You were you were on the physical side. And you were sending to the soul of your beautiful wife. So did you feel it physically and your wife felt it on a tangible soul level?

Answer: More on the Soul level than the thoughts level.
D: For both of you? It was on the Soul level?

A: Yes.
The wife said it was physical.
D: You felt physically in the body?
W: yes. (that's a good point ??)
Dean : Wonderful. I think that's all the questions for now, because we had a slight problem with microphones. So thank you very much both of you for being present and explaining that as beautiful testimony and thank you so much for being present in this moment. Beautiful. Thank you, Mario, thank you.

<End of video >

K- Thank you very much, Rick. This is what will come to us. That was that , as the lady said, "I felt it physically." We timed this …
Timeless is not random. We control when the Soul transmutation comes, we inform them. We try to keep very quiet, don't do anything in this session with them. (:34). And that everything is through the Soul level.

Opposite to this, which was done last week. This week in some trials, we allowed the soul transmutation. Then we allowed the people in 2 systems to talk to each other. "I'm sending you an orange." We want to know if the other side feels the orange, tastes the orange. I send you a cake. If you see the cake, if you eat the cake.

So the time, if you remember when we started, you couldn't take anything in. You had to go with everything off. And then we developed. Now the only thing you ?? (can't take with you) is what we call, electronics. I'm sure soon that will be overcome

Now we allow people to talk to each other. It's like on the phone, I'm sending you by post, cake, for a gift for your birthday. Now, do you see that. As I said, the gentleman sent him an orange. He feels the orange. We can keep the body in one system, but send the gift to be approached and collected on the other side. Instantaneous posting.

We tested this yesterday, deliberately in 2 - 3 systems, with 2 - 3 different groups this week, and it works. We'll hear one of the Knowledge Seekers talking about it next week. (:36). And you'll hear in a second MP3 recording of today of the father and daughter. They see the images of what the other side sent. Feel the emotion physically in popping ears.

Then it comes to the point, how do we translate these emotions? You've got to remember you stand to give a lecture with a thousand people in the room. And if you understand this way of working, the 1,000 people are looking at you, thanking you, shouting at you their head, "load of rubbish," "what a beautiful knowledge," and it's all coming to you. Up to now you have a silence, physical body, in front of you. The thoughts was in their head, "what a beautiful dress," "who - she should comb her hair," "oh, look, the lipstick has gone a little bit far," "oh, look at that one, the guy's tie is crooked." They think about it. But now with this opening of understanding of connecting with the soul. I wonder if

they realize, you listen to their soul. And out of nowhere, you put the tie right. Then you clean the lipstick. And "oh my hair. I was looking it, it looks wrong somewhere."

Or do we become selective and we target where we look at? "Oh I like to take her out for dinner." "Oh, I like to go out for a dinner." When you walk out, you both go for a dinner. This is the reality, which is now, is in our hands. It's not theory. It's a technology. And it's not for you to ?? free to dream. But you plan where you want to go, (:38). when the physical body rests. Where you send the soul to work, till the physical side gets up.

I have this communication with one of our Knowledge Seekers, one of our Knowledge Seekers has, and is deciding this, and she does that very well, apparently. We're getting to know more and more. She decides I'm going to bed, who I'm going to have a meeting with, I need to talk. And she gets it right every night, or most of the time.

Now, because they've been through the system, the soul has developed to understand, it's out, out of the shape of the physicality. Yesterday with one of our Knowledge Seekers again, old Knowledge Seekers, a couple came, and we could clearly discuss how he saw his soul. We spoke about the light, today, or last week. We spoke about people feeling in a bubble. This gentleman he is an old Knowledge Seekers, the couple, and they have according to them, enough MaGrav systems, and enough things, they know everything about, and how they work ?? It was so beautiful to listen to this couple. It was amazing how Knowledge Seekers develop their own ways.

And he could tell us. that he could see a "foggy thing" in front of him, when the Soul expanded. So interaction of the field of the Soul. He could explain to us exactly how the fogginess was. If you remember, you go back on other teachings. We had Knowledge Seekers who taught, we tell them. We told you, we talked to them, but they don't see us. And now we see, explained by an old hand in the teachings, that he can explain to us, how exactly it happened to him. He cannot see his fingers. And strange enough the wife cannot see herself in the mirror. (:40). When she puts a mirror in front of her, when the Soul expands. So we have Knowledge Seekers who are testing, and when they come into the system, and they can confirm. That's the expansion of the Soul, and how and what they see.

Interesting enough, we have received a request from one of the Knowledge Seekers who are, our volunteers, the first couple of going to Moon, that they would like, after 30 years, or whatever marriage, having a child. They would like to have a child of the Soul to be created. It's on the cards. We're looking at it, the possibility of creating the first child on the Moon, through the interaction of the soul. It's not out of hand, it's not out of reach. They are our first couple, we would have the first child of the Moon. We'll have a look at it. Possibilities, feasibility's, and the consequences of touching it down the line with a child we ?? Extension of the life to 200 years, that we just don't bring a life for a short time.

This is now a reality of science and technology. This is what we have on our hand. We have managed step by step as a space organization, and you as members of this space

organization, to develop together a new technology. Where the man does not need another man to take him somewhere. Man takes himself around in his full dimension through the soul, and when he gets there, he puts a soul in, and takes him around in a ?? variable condition, if he likes to.

The beauty of this is that in the coming time, (:42). when we reach this time of transmutation, we allow you to do it walking within the space room. What does this mean? In the trials, until we go for a full transmutation. We tried it yesterday with three people this week. We allow five or six of you in the room. And we allow you to talk to each other through your soul, to create that environment in the dome. We want to see, what did you hear from that soul. What was that soul. Some souls gets instruction to do something with the transmutation of the soul, and see how the others perceive it, what they receive, and how would they react to it. Or I just want to send to that person and the other 4 are not privy to it. This is what it's coming to.

We go for a full transmutation, we understand everything that, we adjust our systems. We set our systems. Our team are relentlessly. Every week when you come in from, we finish on Wednesday till next Tuesday, do all sorts of things, hammering things in and putting new bits in, new controls out, new switches. It gets literally, it's a technology in development, while you are the volunteers.

And it's beautiful, especially this weekend, last week, the ones who come, they say, we come here to add to the knowledge. But if you get something with it, it's nice. But we want to be part of it, that you learn, and you can develop, the others can benefit by it. This is the truly what we see most of the Knowledge Seekers. We are here to serve. (:44). And it's a lot of benefit, some of these people travel for hours, for days. The couple of yesterday, the father and daughter, they couldn't take a flight from Holland to Austria, but the problem in the airport can be, and they could not be certain that they will get the fight, they'll be here for the time. They drove for 10 hours one way. And the father says, I just came here to add to the flight, to participate, that we are there.

But this is the ways, and they have been, made the nation of Dutch. They always have been pioneers. And we see this, that it's coming down, and how it comes down. We transmuted the love of her husband, and the light of the husband in the physical dimension of the heart and emotion in the wife, physically. Where we allowed the transmutation of the soul, and we allowed the transmutation of the STP. When he arrives it imprints. It's like physically kissing on the lips, and the way lady goes party. The love is there, and the touch is there, and this is what we see in this emotion.

The interesting thing is, an amazing part if you understand what's coming up in the MP3 (audio), between the father and daughter, listen before the team starts. They did not know that the microphone was on, and you hear the father. People go through life changing emotions. In a way, the sincerity, and causes, and how they perceive, (:46). and how they arrive. And what is the next thing.

For the first time you hear the gentleman who speaks on a microphone behind, that he feels that his body is opening up, every cell is expanding physically, which means we just went to pre-transmutation, and that's where we wanted it to stop. We did not switch to full transmutation. So we have shown for the first time, when we speak to people who've gone through it, they feel that separation of the cell. They feel that separation, lightness and openness, ready for making the cells, as being a solid two energies, that they can be transmuted. This gentleman clearly states, and I know exactly when I switched the machine on, and I know how he feels it. The most interesting things is that, we dictate, control that time.

If you come into the flight room, you'll see I have a lot of switches and buttons available to me. I can decide if I send the plasma inside. If I send a matter. I can decide in every level how, and the way I want to send it.

Rick if you can play the MP3 (audio) into you, and them. You will, seen the other tapes and just play behind it Yes.

R: Yes Just so people. (:48). just play the voice. … Yeah .. the image won't be changing….
K- … we give people the option if they want to be on camera or voice recording. Some people don't want to do either and they just write .. their own experience.
R: And you might want to interrupt and comment at some point Mr. Keshe because it is like 17 minutes long all together.

K- Let's listen to it and we'll see. I come at the end. If people notice we have a lot of problems with the microphones. All of them work, but somehow we don't know how, or people don't know how to control in the back room, that all (the microphones) record. It's especially in this one, one is recording, and if you're a distance from it. But they think all the three records. So our team is going through learning how to use the microphone. So you saw it in the other one. We have all the facilities. The best in the world has been bought. It's just that we need to learn how to use them for our recording site. Go ahead please.

<< Plays Audio with frozen image on video about 17 minutes long audio is low >>

(The father says, "I am shaky." ..)

Dean: Okay, you've just had your flight experience together. It's like the immediate the flight experience. (:50). Which, if you can introduce yourselves, and then you can give us your explanation of what you've just experienced. and gone through collectively, individually within your environment.

(Skip editing …)
Martin : Okay, I'm Martin, from Holland. And I'm the father of Tisha, my daughter. Mr. Kesh said to us in which system you want to go into. And you looked at her and she said,

I want in the right one. So I went in the left one. So I was the captain. And she was the passenger. She sat in the front of the right home, I sat in the front of the laptop. And there we sat for a while. I was feeling a little anxious. Excited. Excited is a better word. When I came here, she was a little bit more anxious, anxious than then excited. Both maybe my feeling of excitement faded. Just by being here in the center. To become me, I became more relaxed. And then I went into the system. It faded completely. Within, I don't know, 10 minutes. I was not aware of time, so I don't know. What's your feeling?
Yeah, I'm Tessa. I'm the daughter of Marfan. I felt anxious at first, like high in my reading. And when I was in euros, like feeling the same thing, that maybe more relaxed over time, but not immediately, not within 10 minutes, but like, more at the ends. And yeah, so I was in the passenger's seat. And I was feeling or sensing some sort of things. Like my my dad told me to send me some things as a follow up, or he sent me my mother and family because we went to Bali together. And I was feeling those things as well. But I didn't know we send me those because you didn't scold me, but like, when we're talking afterwards, he told me send me those things. And I really felt them as well. I also felt felt his hands on my left knee. So like the warmth of his hand.
Yes. Mr. Kesh asked me the cue. proposer asked her to go somewhere. I said, Well, I had some thoughts about going to the Moon going to Mars or Venus. Then also I thought, maybe we can go to Bali? Or to to be a mother, or even on the water. Where do you want to go? I asked her in my mind. These things she sensed as well.
When he told me about the water, like I heard Misako say things to me, but I didn't know what he said. When he told my my dad and he was out of the room. I felt my ears popping. Like I was I didn't know he told me to but I failed it.
So there were some things connections. That's she was not ready to go. So we went nowhere. And we just were staying here and overall, I felt very comfortable and peaceful and even light did not extremely I've heard many Testimonials, which were far more extreme with a did not have that. It was almost like it felt naturally. It felt quite normal. When I come out I felt more tingly links, especially my knees and my legs.
And a little bit more emotional. Not at first, but we're talking to Mr. Kesh. You feel more emotion coming out, or trying to come out. And I'm just trying to control it. Even now, when I'm speaking.
I'm sort of trying to keep control over it. But I feel a little bit wobbly. If you say this, but you're shining this light, right? A little bit wobbly? Yeah.

Dean Butler
That's a good explanation. So were you aware of each other in? Was this in level on a dimension level? Soul level? Were you physically aware of each other? interaction? This was mere on a soul level. We were in Beaver testing. If you could send over things like a red red rose, or flour or, or an orange or an apple pie. And if we could taste it to each other, and it only worked from the, from the left. system to the right. But not the other way around? Because that's how they are connected. One way. So that was confirmed in a way. And I don't know what you would you experienced? Exactly. When we when the one that was sitting in the captain's chair, so the loved one. They talk to each other afterwards. And we explain to each other what we felt. So when one was in the left one. Woman rights goods sense like the orange. So the one on the right or consent the origin could really fuel or sense it, see it or see it. That's when it wasn't the other way

around. So devolves into the right one should send it to the last one, but it didn't work. So if you didn't receive
then she said in the left one, she sent me apple pie. And you both like apple pie because she makes it herself as well. That was very easy to sense because it's very easy to imagine. And afterwards, she sent me coffee. And I must say it was just a split of a second that I really tasted it but it was just a split of a second. It's not like now it's just like
Dean did you enjoy that?
Well, it's fairly short. It was really a millisecond maybe but it was like a taste of coffee. So just to clarify you both went either side systems experienced both sides. Yes.
But yes, yes.
Dean Was there one side you enjoyed more?
I enjoyed the captain side more. The chair was also a little bit comfortable.
Dean Butler 58:59
So the chair
is the chair in the in the right system is like because you bump your head against so you have to sit like this and the other one you can sit straight like a captain Okay, that's that's the physical explanation. That yes, it felt good in the captain's seat. Too to Yeah, it's like it felt like you're in control or something
that's it that's it felt better to be in control.
I don't know if that's the right word but feels like yeah, this is my seat or this. This is okay.
Dean Butler 1:00:00
We were speaking about one soul level and it was still the words in the physicality so it's better to be in control don't know. I'm not like a control freak. I don't want to be like that kind of a person. But it felt more maybe comfortableness about the word and control it felt okay yeah, I don't like the word control actually that much. Although you need to control some things in physical life of course. Like yourself or anything. That's
it this sort of this experience. Is this your first experience?
Yes, yes. It's my first time our first time here and let's
Okay, so your physical condition before you went in there was there any any conditions that you will find in difficult
only my emotion like I told you I was a little excited and unsure when I came out physically, I felt a little bit a little wobbly like I told you and a tingling sensation in my legs and especially my knees. That's that's and and after talking to Mr. Cash while talking to Mr. Cash, I felt more emotional. Which I wasn't really realizing up until that moment that now I'm ready. Now I'm realizing it very much. Even talking now I'm trying to stay under control of my emotions.
I want this thing to be about yourself. Not with not, that's an experience that I had yesterday, some paintings upstairs to the paintings were put either side I walked between them. And I felt this tingling sensation in my lower half of my body up to my needs. And then you go and say this now I'm starting to understand the soul interactions connection to every all the interactions more than more
that's nice. That's nice. You hear a lot and you experience a lot and I think just by being wonderful. Is there any other last comment you'd like to say to
counter let's take the experience of becoming satellite so that's all I want to say.

Thank you very much like to say just let it flow Thank you Thanks very much.
Thank you then thank you Mr. Keshe .
Yes, thank you Mr. Keshe? Came out

Mr. Keshe 1:04:20
You are the first person we have put to pre-transmutation physically. He is the first person who has gone through it. And when he speaks about tingling in the body and everything, it was one more switch and ?? (transmute physically) ??

We're expected to feel that interaction. It's a three phase ?? The last phase three ?? we put them in the last phase of the three parts. So, next flight we put ?? them in the second ?/ part ….. But it's the first time when we hear that, tingling, is what we actually set you up to feel Your parts are literally, coming apart your pieces. .. emotion of movement

Martin: Yes, it's like feeling space is that the right work.
K- You feel the expansion of

M: You feel space, spacey. like space
K- that's what it is ?? ??
M: yes and I'm feeling it more and more. Like well talking about it well. Yes just let all things settle down, you feel this more.
K- This looseness.
M: This looseness, yeah
K- We had to loosen you ?? to
.. You are the first one we put through the first phase.
Since we have done the Soul. (1:06). We've done the STP ?? which you felt with the physical ?? It's just that last phase which everyone is waiting for.

We have to test it. We can't send you half ?? a body back .

M: That's why I came.
K- We don't want to leave the leg behind …
M: People in Holland, were anxious if I could be still in one piece,

<< End of Video recording. >>

K- As we heard the, that we are on the final phases of bringing in a new way for man to transmute, for man to think, for man to communicate, for man to travel the depths of space. As I go to the ?? Dean this morning, these recordings are the pioneering folks. In the time to come they'll be the most valuable recordings, that the first time man ever could feel the opening of the cells before transmutation.

It will be analyzed in different ways, what could be done, or what has been done, or the way we saw with the couple. These recordings will become archive recordings of future

science of the Keshe Foundation, how and where and what happened with so many things were touched but they were not explained, and the rest of it.

But at the moment we are concerned with how we are going to expand the borders of the knowledge of the man about himself. (1:08). In the next couple of weeks, as you've seen us in the past, we follow the same procedures. Because proven procedures for us is the basis of our work. You saw us bringing the Chairs 1, 2, 3 and then going to one unit. And then we started with the left unit, and then we opened the second unit. Now we went from the left unit to go only to the right unit. Next time we'll go from the right unit to the left unit, and we open the both. By the time we gathered this knowledge, 2 new systems are getting built, in 2 - 3 weeks, that is the universal system.

The Universal system of that we can choose the G and M fields, the environment of the destination, and then we can move the being to fit into that, what we call, environment. The new systems coming into operational are extremely advanced, but as usual, they are not a final point, they're a stepping stone towards the next step to gathering the knowledge. But they are what we call, cornerstones of the future transmutation transportation. It's once they come into operation, once they get installed, we will see a different environment. Not only in the flight room, but at that point we will touch most of the Uno Exhibition Center (Linz).

The fields will go beyond the boundaries of the building. And we will see changes. We will see as you have seen with your Gans's, more birds flying, (1:10). more people coming to the center. We see people sitting on the fringes of the building, and finding what we call, peace.

In this process we'll be transmuted to the what we call, the Satellite Souls, which are registering ?? Then we start the process of world peace. Process of what we call, for mankind to be ready to take that final step to become the "man of peace." The beautiful part of this will be, that we're all involved in it, and we are all part of it.

Confirmation of the Transmutation of the STP

We're getting a lot of knowledge that is getting translated into technology, that, that technology will bring changes. That technology will bring the understanding of the Creation. In a very simple way in the recording, you must have heard, you must have felt, or you must have understood, a simple word, very touching, but is what we were waiting for. The daughter says, I could feel the touch of my father on my knee. Which means we received the confirmation of the transmutation of the STP.

In the other one we heard about the feeling in the heart and the left and the right side, and that part of the recording is there. (1:12). One day we'll play it when our technology changes and we can take a lot of noise out of it, and add to it. You will see that, we can even transfer the emotion of the physical soul. Touching of the father lovingly with the daughter. These are the breakthroughs that we are looking for. These are the confirmation

of the systems, that we are looking for, that we can expand on. We play with a lot of gadgets, but we understand more how the system works.

In the coming time, your next lot next week, we have a beautiful combination next week. I'm really looking forward to it. Our fly flight system next week, there are people we had before when the system was in its initial stages. They're coming back. It's a beautiful combination of two partners, a pair of partners. We see the combination, because from each partner, there is a brother and a sister. So we have a brother and sister in system, with their partners. How we will transmute these people, 4 people from one to another. How we'll transmute the emotional of one partner with the other one, while it's with the other machine. These will bring us. This is going to be a five or six hours of absolute what I call, bliss. That we can bring the whole dimension to the place.

This couple, the both of them are so alive, so bubbly very young. You can learn a lot from them. This as a couple if you remember we talked about it, that one felt like a mermaid, (1:14). and trying to get the others to swim, and the other one. So we're getting people who have experienced it. We are getting a lot of people will come in second or third time to see, to feel, and to develop further.

Then we'll see if we can try to bring an emotion amongst these siblings and their partners. The interesting part will be, what will come out of this room at the end of the transmutation, emotionally, physically, how as we saw in the first recording, the couple feel much different, and in the relationship, and in the whatever they have between each other. We want to see how this will interact between the partners and the present system.

If you're a family of four, father, mother and children come together, we want to see this, we have to learn it. We have to see, if we set without you knowing, one of you to do something, which the others don't want to do, then we want to see how the souls react. Will they pull together? Would they stay together? Or one of you disappears in the depths of space, you go to Mars, and the rest are already gone to the Moon. A lone child on the Mars.

How are we going to get you back? How are we going to bring the family back together? These are the things we have to learn before we go into the final phase. It is ?? bother, as I said to you a lot of talk, but to us evolution in the science and technology and what we see. (1:16). These are not actors and actresses. These are the people, this is you who come in to add to the knowledge.

We need many, many more, a lot people are switching just to be Satellite. I can't complete to become Satellite until I finish in Uno Center. We need a lot of you to come in. Come from all over the world and be there. Register and come in, that you go through the trials of what we call, transmutation.

Some of you come in with the idea of transmutation, "oh, I'll go from one ..(machine to the other). No, these are trials. These are there to. We get, we develop, and we complete, and we do it through the knowledge of the Keshe Foundation. Everything is as it is. As

real as it comes. And it's you who speaks. It's you who records, and that's what is the important part for all of us, that we can add to the knowledge. We can bring that change. We can come to the point that, how it is going to be.

How fast is human race, we are going to bring this change about. Don't forget once we actually finish the final product, it will go into mass production. What would be the condition.

In the next few weeks, (1:18). I'll invite Knowledge Seekers while we are testing, through their wish, through their what we call, Soul, to bring into the Center the soul of one of the world leaders. This we can do. This is not simple, but it is possible. And see how we elevate, and what information we can transfer to the world leader. And then allow the soul of the world leader to return back to his physicality.

Collectively as all of us, we monitor the world leader, how he or she, words, action, within seven days, 14 days, changes. I volunteer, or I suggest, or I don't ?? want, know I am going to bring in. We will see how consensus will bring one of the world leaders to Linz. Through the dimension of the Soul.

You wanted an orange to be transferred. The daughter wanted to give apple pie to the father. And the father wanted to give the love, and what care he has, and the daughter feels it as a touch of the knee.

What we be able to bring that touch and change the world leader. (1:20). This 100% possible. It's not probability. And let's see who and how we do it. And how the world leader will change. Options on the table are 4 or 5 people. One of the first people we want to bring change to the soul, that it speaks the truth, and closes many chapters, is the Pope.

This is where it's in the D of the Soul, and many of us can reach. Some Knowledge Seekers in the past have tried it. The other person in the world of power and diplomacy, which we would like to bring to Linz, to be, if he still be in power to come, is Putin. We have other candidate, in Charles the Third, of United Kingdom. To see if he will abdicate and brings an end to the Monarchy. As all men have to be equal. The only King which will stay forever of the race of the man, will be Christ. The 4th person, which I think will bring us a new dimension, (1:22). in bringing balance is the new Italian Prime Minister, Mrs. Meloni. Where far-right racism will come to be all races, which is in blood of the Man. We listen to all of your preferences. Maybe we can bring all 4 in, in the 4 seats of the flight unit, with you as the Knowledge Seekers in the center of the room.

We will announce what we call, "the elevation of the soul of the world leaders session," and we carry on this, for a week or two. You're welcome to come in. And you're welcome collectively to change the Soul of the World Leaders, one at a time. The reality will be, we'll see what we saw with the apple pie, and we saw with the love of the husband to be physically felt in the heart of the lover, the wife. We'll see how we go elevation of the Soul and knowledge.

One of the trials which we are setting up in the coming weeks is, we want people who don't speak one language, we have a lot of them coming in, especially German, "yes," "no" is the only thing they know, and bring an English speaking person, (1:24). I know Dean wants to volunteer, he is not going to get in. To elevate the Soul in a way of transmutation, and see if the German speaking become as fluent in English, as Dean.

You transferred orange. You transferred the emotion of the touch. You transferred the emotion of the apple pie. You transferred and transmuted the love into the physical dimension of the feeling emotion. That cannot be hard. Go to the transmutation and register and put out, "change of a world leader." Register. Then we bring 20 - 30 of you in, because we have to be a collective mass, to be able to import and deliver all our wishes. Otherwise, the world leader becomes only 1 or 2, which are in the room.

It'll be interesting to see how the soul of the Pope will interact with Charles, and how Mrs. Maroni interacts with Putin. And how in this World Leader's Conference in Linz, we'll get the outcome within a few days, weeks, within a policy, within their work. Would Charles abdicate? And would Vatican see the last Pope. Would we see the far-right becomes center line. And we'll see one of the most aggressive world leaders understand the love of the humanity. (1:26). Then you'll understand why we even allowed the situation in Ukraine to expand and extend, to show how we can change it from inside.

It is not a trial to ?? offering the power. It's a trial to bring equality to all powers. But as you know, I always have delivered what I promised. We will book at least 20 of you to be in the room, that we get an international consensus to our 4 leaders, essence of Totality.

We'll open some of the Satellite lines of those who registered, and we bring in some of the Universal Council members through the same lines. Then we create a new world order, a new world condition, that is peaceful and the population the size and mindset of the world leaders. Because now it's not only Italians, the Germans have a say, as much as the Iranians, and the Arabs, the Black, the White, and the rest, in the running of the One Nation, and in a way, you become the councilors of peace. There's one problem with you who come in, is, there'll be no chair. You'll have to decide, (1:28). how you accommodate each other, in standing in the room to serve humanity.

In a way, we start to function as one family, one nation and the voice of every citizens, through the Satellites and through the Universal Council, and those who are present in the room, will bring that change. Register yourself and just put, "change of the leader," and our team will invite you, that appointed day to be. You'll meet the soul of the Pope and ask him, why does he allow the abuse of children. You meet Charles and ask him why he thinks he's higher than the others. Ask Maloni if the color of the skin is only a ?? thought ?? Then ask Mr. Putin are you really aggressive, ?? when is this going to stop, the human race is waiting to move on. This should have stopped in the 20th century. Putin ?? bends are the only thing he can think of. See how collectively you decide to bring the next world leaders.

In a way, the seat ?? ?? will treasure it, by their own soul. But you are there not to judge, but to elevate. (1:30). It'll be interesting to see how you Knowledge Seekers come in to change the world leaders. The next set of people I'll bring in, for the elevation of their soul is, Knowledge Seekers choice. Don't forget we need to bring a religious leader we need to bring maybe industrialists, and maybe the others who can be that change in society. In a way we rule through the STM to make everyone to be servant to the others, and not to be a king, and not to be a lion in the name of the Creator.

You've seen it in the past, we do in the past 3 or 4 months how gently I have brought the knowledge to be, and to be changed and to be accepted. And now it's time gradually to bring that change we came here for. Changing the world leaders to the people of the peace, and making One Nation out of this planet by its citizens, and not by those who think they can rule.

Come into Linz in the next few weeks, register yourself, and bring that change, which we all been waiting for. We need to change those who think they are our leaders, to think, to understand they're equal to us, and they're here to serve, and ?? lead to them a lot of things. Vatican will bring an end to the what we call, domination of religions. King Charles the Third, will bring an end to kingships across this planet. (1:32). With Maroni, we'll end the racism, and with Putin, we'll end the wars.

Nobody can change it except you. You have to be in that room to bring that change. Be prepared that when you come in, you come with a full understanding, that the changes for the human race is on the shoulders of every one of us.

We try to do this by Christmas. I wonder if we do this, and we can change by elevation of the Soul of the Pope, would there be ?? a false Christmas. And we just celebrated to be in peace, to celebrate to be all as one race. We don't need no vacation, which is copied from one religion to another, to control the man, both through the soul and physicality.

I know what I'm doing, and I know where we're taking you, to bring that peace around, to bring that change around, to bring that position, that all men are equal irrespective of color, race, and position, and then the hardest thing for human race will be, that all creatures of Creator are equal irrespective of position in the U, and how they come as a soul or physicality. (1:34). Let's see where are we going to take you in the next few weeks and then let's see how many more of you are there to bring that change?

We go for a break and we come back and we answer any questions you have. Before we go break one of our Knowledge Seekers is not good health in hospital. We wish him all the best, and we wish him one of the fastest recoveries, that he will be out, and be amongst us again. He knows who he is, and I wish him all the best for his recovery. …

K- Yes, if you have any questions? (1:42).

Q: .. If a stone has a soul, can the STM and the stone together create a new soul? If that's the case, I wonder what people will think of marriage of the future, and cross species and so on.

K- Marriage in the future on the physical dimension between the races of the universe, not all of them impossible. Some of them will be impossible in the physical dimension. But in the dimension of the soul, it's possible.

Don't forget, if you go back, I'm sure you can find it on YouTube, their are people actually married to a stone or an object. They take them to bed, there are a quite large number of them. They live with them for years. Has the soul of the stone touched them? Or the balance between the two, has created that love and care. We do that in a controlled way, because we don't want to be called, a freak. We do it with our animals, dogs and cats. We do it, especially women, with items of jewelry, they put it on for life. They never take it off. It's not something there, every time they look at it, they admire what they have.

So, it's not an unknown fact, (1:44). it's not something, that what will happen. It's, would that condition create a new cycle of life? And would it be visible to us? Would it be tangible to us, that we can confirm it? Or it will come to the point that we get touched by the soul of the fields, and we are aware of the presence of soul, but we cannot give, what we call, physicality to it.

This is not something that it might happen, we see it. Go on the internet, it's very interesting how these people live with objects, like a partner. It is part of our life, it's not something unknown. It will be something which happened, what will create out of it, if it is decided, that's a different thing.

When I listen to the German, you hear him, most probably Monday (they are) to record, when he explains how he could feel, and especially if he can make a life, ?? if Dean ?? can do with the right recording of the voices and movies together, that how he felt the object. If he fine tunes it, most probably he can tell you exactly the taste of it, and how fresh it is.

Did he feel the touch, or did he feel the soul, of what was an object in the mind of the other gentleman on the other side? (1:46). You go to a fisherman, in a fisher shop, and you say, I want such a fish, can I taste it first? Would he be able to give you the soul of

the fish, taste if you like? Then you see, if you really like take of the fish, and takes the pleasures of its soul, in touch, gives more pleasure than eating it.

Would we do window shopping of the souls? Or would we do the window shopping of lives? If you've been to Port of, in Portugal, to all the restaurants you go to, they have fish tanks in the walls, and you can choose a fish, what you want to eat. It's very common in China, we go to the fish market. You choose your fish, then you choose your restaurant, and they cook it for you, your chef in that restaurant. If you go to Sandia ??, in South China Sea, Sandia city there is such a supermarket of fish. Every fish in the Pacific Ocean, which can be captured, can be eaten, are in the fish tanks in the market. You choose your fish, and then next door to it they built tens of restaurants, and you say where you want the fish to be sent to, and the chef in that restaurant will cook it for you, because you chose your fish. Go to Sandia and see the beauty of China, and you understand this much more to this country than anything else.

But look at, would you walk around and pick up all these fishes to see their physicality in your plate, (1:48). the way another man chooses to prepare it for you to enjoy the physicality? Or would you just walk and enjoy their souls? It will not be hard, when we see the souls, we need no fishing. Then we learn more about ourselves, then we learn more about how the next cycle of life on this planet will be.

Any other question?

Q: John Bliven, … If you could draw five circles in a row (on a white board.) … (1:50).

In the first circle, we're going to put Hydrogen Gans. So, if you could put an H in there. In the second circle, we're going to put Deuterium in a .. crystalline state. Next one we're going to put Tritium Gans. Next one, we're going to put the Gans of Uranium (235). And then in the last one, we're going to put the gas from the Methane gas from your (Plasma Gas Unit) system, it is not Gans, it will be the gas, the Methane gas from your unit. Okay, so in each of these, if…
K- What is the abbreviation for Methane. Anyway, I just put Methane there. CH4 it is.

Q: So, once we are able to let the Soul out of the cage, and the Soul can connect to each one of these balls individually, (1:52), or these materials individually. Just like when you create another soul with two entities. If you put the Soul with the intention into, let's say the H, for starters, and we merge with the soul of the material inside the ball. And we put the emotion of love, with the intent to create a higher form of this H, for example, in the first one (ball). Then it's my feeling that we could create, oh, and we have to create the heartbeat to make it dynamic. Then we could create a plasma field which would be a light field within each one of these.

The question then becomes, if we were able to achieve that state, then what would each of these balls be able to provide us? (Mr. Keshe draws a circle around all balls and writes "new race.") For example, the first ball might create the ability to have energy field of this, like a Sun, where we could generate heat and energy from it. The second one, my

feeling is that maybe you can create entire cities with it. (1:54). In the third one, you know, I'm thinking also you can create probably entire city, but with a dynamicism to it, in other words, rather than being static or become more. With the Uranium you know this one, I kind of…

K- wobble?

Q: Yeah, it's of a higher order. But, you know, I'm not sure what it is that you would create, if you had that fields of a dynamic plasma that's connected to your soul, that you're able to, I'll say, manipulate or interact with. Then the last one, I'm thinking that what comes out of that machine, is a different form of plasmatic energy fields, that maybe has a different characteristic to it, than the Gans's materials. So, could you talk to those, and tell me what you think?

K- I will talk to them. ..
Q: Am I on the right track?
K- You see, if you envisage the number of galaxies, and the stars, and the number of universes, (1:56). the possibility of a life in such a state is possible. But the point is, what condition, environmental, allows such a life. Then, what characteristics would this life will have?

It's in heavy pull. So this, what you described here, shows the life will be somewhere near the center of the galaxy. That heavy pull can hold on. This structure, what you've chosen, is a type of life. The 4 elements of amino acid. Central gravity (U-235) to hold on to, and enough to link (CH4) into the universal energy field through Carbon, or Carbon 14.

So, this life is extremely heavy, from gravitational pull. (1:58). Location immediately is somewhere in the centers of the galaxies. We see these kind of heavy element centers more towards the center of the universe, even heavier than this. You have to have that pull of fields, that it can be holding on to your position within the center.

These kinds of lives are extremely intelligent. These type of combination allows in a way, life nearest to the energy fields of the Soul of the Creator. Uranium means, it's like a Hydrogen in, what we call, periodic table. It's not a heavy element, but that's how we can put it.

Combination of the fields makes life a different way. Such a heaviness of fields, if you're in center and outer boundaries of the galaxy, creates you to be aggressive. Take, because you have a heavier gravity, it's like a cancer. You do for the metal, which can pull the amino acid. When you look at the cancers, you can, that's why in Keshe Foundation we don't look at the blood tests, we look at the elements. (2:00).

This life is extremely intelligent. Doesn't matter how, or where it takes shape. That comes from stability of, what we call, Deuterium. But agility of the Tritium. So, you have intelligent, active, and if you live in this kind of environment as a new race, as I have put down. On this Planet we would call them super, super, super intelligent people, active.

Because the information on the sub-elements brought in, through their interactions, is a vast pull of information.

Most probably human race will have no level of understanding of this life, because it's far beyond his imagination in the physical dimension, but his soul ??. Creatures created in this condition should be very flat ?? by this. They are set to absorb a huge amount of radiation from cosmos. That comes from the broad spectrum of the division and the number of the neutrons within the Uranium - 235. (2:02). To sustain it you need to absorb a lot, to keep the energy fields of the (U) - 235 in position, in, what we call, where it should be.

I can imagine how a creature will live, where it could live, and what we need to handle through his soul. Receives the more powerful energies from the center, and it pulls more powerful energies from outside. Put it this way, human race would be a speck of dust in this environment, even that is too much.

Q: So, is the CH4 Methane, is that at a plasmatic state when it comes out of that machine (Plasma Gas unit) ?
K- What do you mean?
Q: You know, the unit that you showed us that makes the Methane? Is that plasmatic Methane?
K- Yes, we always said it.

Q: So, if you were to utilize that, and maybe I'm mixed up a little bit. I'm thinking that we put, you know, our soul to elevate this material, or maybe we call forth the material from the universe of the soul of CH for Methane, emerged with the gas that you created to elevate it. So you're not creating a person, or a being, (2:04). but you're creating a conscious material that has additional capabilities. ?? I am not looking to create a person, or a being, but to create an elevated material.

K- This is, what you call, this what you put in there as a CH4. CH4 as a characteristics, as a matter state only has certain values in combination with the Earth Gravitational Magnetic fields. But in the space, as a plasma, behaves totally different.

If you have created the shell around this (the 5 balls or new race), to hold on that it creates its soul, I can envisage how the system will work in interactive ways. In an interactive base if you look at it, this is the cycle of life, you have a Hydrogen, you have a H2, you have, what they call, H3, and then you have a CH4. You can see the base, and you can see the top (of the Star Formation (SF)). This is an extremely active, what we call, amino acid.

In the body of man this will create mayhem, (2:06). 100% death within milliseconds, just by the fields of it interacting within the structure of the physicality. You'll have 16 times power of plasma, in that direction (towards the top of SF). Ratio here (CH4 to H2) is different, and the same ratio here (H3 to CH4) is different, but it's about the same.

The system will try to topple to create a base between these three (H - H2 - H3), a new CH4, as a feeder at the bottom top (as the new top). You usually make your Star Formation that way (pyramid pointing up), this will work that way (pyramid pointing down). So, it creates a different dynamism. It creates a different structure in the whole cappudle. You've got to understand Carbon now becomes ?? 2 to 3 ?? 8 in a way if you look at it.

When you look at the plasma, I was talking about this to one of our Knowledge Seekers recently. When you look at a plasma, in the size, follow the volume rule. This could be one centimeter (inner diameter), this (between inner and outer diameter) could be two centimeters. But you know what is the difference in the volume? It's huge. (2:08). It's not the ratio of 1 to 2.

When you see a plasma this size (inner core), the energy in this is vast compared to the energy in this (from the inner to outer core), because works on the gravity field forces. But in the matter state you work on a volume.

This is why, when you look at electron and proton, proton is so agile, sorry electron is so agile, and so small, but so dynamic, and so much more energy to give, than the proton itself. We say, it's so much ratio one to two thousand, but the other one has the other way.

But being in the plasma, the tighter the material is, the more energy it has, the smaller it gets. But it creates a bigger field (electron has large radius around proton) that it can capture the proton.

You have to understand the whole process, and not just by, looking at it in the dimension of the physicality. You have to understand the dimension of plasma. As we say, it's not the size which counts. How much energy is in it, which will effect it. I always said, I used to joke about this when I was a student, I still sometimes do, (2:10). is you have a little toddler who is like a bullet, he goes everywhere. And you have an old man sitting in the middle, trying just to watch and catch up. Even though he's much bigger and older than the little one. It's the way the electron works, it's the way the energy transformation is, and it's the way the cycle of life in our process of existence ??.

When you look at the plasmas, and look what soul they create. Extremely powerful. So, your creature, wherever it is, is extremely tiny, highly intelligent, and quite active. And the Soul it has, it will be amazing. You have, if you understood this part, if you understood this part (what was just said about the Star Formation), now, you have to understand, one of these characters here is 235 (U), not 16 (the CH4). Then you can see the whole dynamism of this system. (2:12). Trying to catch up with the speed of rotation, not be pulled by ?? any gravity. Then you can see the speed, passes the speed of light, 100%.

Any other question?

Q: Dean .. Mr. Keshe. Thank you for that, "the new race of mankind"…
K- It's not a race of mankind. This is a race of John. He created it.
Q: Yeah, so mankind was a collection of intelligent gases?
K- That is all we are.

Q: Yeah, yes, I know. I know. And as you get older you come to understand this more and more. So, Mr. Keshe, going back to something you spoke about earlier on, the world leaders. The world leaders being present within the exhibition center. We've spoken about this before, many times. The actual position of a world leader walking into the building, would it be that, Mr. Keshe, (2:14). that the Knowledge Seekers, the UC and all the beautiful souls that carry this knowledge, be in part, and inside the actual room itself, would have to feel strength to, that the world leaders would not need to actually come into the room?

K- We can Satellite them. That is not a problem. But we have to bring, to show the change. Because if we don't do it, the reason I put it that way is, if you don't do it, then coincidentally something happen. You know, the human race.

This is what I said to the Knowledge Seekers who come in, once you leave the center, your new life just starts. Then, that new life is going to be joyful for some, and harsh for the others. And some go back to ignore it, because this is how they were brought up.

You'll find out, your wish is my command. In a way, my command is your wish through the soul. I want to know what my sister is up to. Then the sister calls, because I instead of dialing on the phone, the soul has made the call. Call, your brother wants to know what you're up to. And she says, oh, I was just thinking about you, and you called.

So, we learn a new way, and a lot of Knowledge Seekers will have this problem. But the more you practice it, the more you interact with it, the more it becomes. You know, nowadays, we have a command drive, or on your mobile phone with different names. (2:16). Apple has Siri. You say, "Siri, what's the weather today?" Siri, can you call so and so? Now "Siri" is your soul. That's what you've got to learn. No, "Apples," it's all bananas. So, we can do that, but it has to be the "Siri" of all the human race, collectively wanting peace to change the world leaders.

I can do, as simple as drinking a glass of water. But what would the human race (say), "oh, this guy changed, wait till the next one comes." You have to change the soul of the humanity, not just a world leader, and that is part of it.

If you look today, in the past months, we've seen how many of closes people to Putin have been killed. We see how many people closer to him, but opposition has been killed. Accidentally falling off a ship. One falling out of the window of the hospital, I never understood how people can jump out yet, We have seen the Americans doing it today. The Chinese scientists, we've seen the others do it. How come these things suddenly started, but nothing happened six months, and none of them killed themselves.

Would we reach the soul of those who actually want, or plan these things, be the world leaders or the others. (2:18). This is the process of life, that we've got to learn.

There are two ways open to us, plus 3 actually. Now you have a mobile phone, you can call, ?? electronically. We can do it physically. Now we learned the communication of our inner energy, we call it, the soul. It's faster than mobile phone and does not carry the emotion. So, when you tell a president to change, you can call him on a mobile phone, or you call him through the soul and change his emotion. So, you have to decide, and we can do a lot of things, but humanity has to do it on its own.

Q: So, to get humanity, the whole of humanity to vibrate and to be a plasmatic condition where they all contribute the same. Is that something that can be done through a social structure, or is this an interaction of the soul of man?

K- It's combination of. It's not a single solution. It's a complex, human race is a complex race, it's a complex, what you call, chemical mixing pot.

First of all people have to see. I told you yesterday, the day before, I want microphones to record people inside the system. (2:20). Very soon we'll take cameras inside the system, to see how the soul manifests themselves, to see how communicate with each other. Man has to see it.

Then we see the discussion. When I listen to a lot of these recordings, prior to you getting your camera and microphone in their hand, I see so much, I get so much information that you don't even get it on your recordings. Some of it comes through the knowledge, some of it comes through the emotion, some of it comes through understanding of the soul. You sit there, you put your camera and you take a physical picture.

They sit in front of me, or I stand in front of them. They talk, but I see the soul, and I know how much of the information they give me has matched to the STP and physicality. What do I need to change in there, if I need to. Majority of the people coming out of this system they don't like. Because standing in front of me, I see both. Feel the emotion of it.

We have people who come deliberately to prove their move, that they cannot be touched, or the system does not work on them. I had one this week. Because with it, not confirming, not working. "I see I am more" ?? balancing. "Oh, my soul doesn't work, my doesn't this." I want to know what you cry at night with it. (2:22). So, it's us bringing amalgamation of all together to create a new race of leaders, that all of us are leaders, not just one or two, and a few with a big bank account.

Q: So, what you spoke about when people have this thought, and then someone phones them. We've all experienced this, the whole human race, I think, experiences this. So, we all know that this conscious thought has a field strength, that can manifest and touch other souls on a soul level. So, we all have this. So, it's just about bringing about a field strength on this beautiful planet that brings it to a position where… ?

K- No, it’s the wrong way, it’s the wrong way. The right way, I think, should be the recognition of it. When you recognize this power, when you recognize this potential within you, used the right way, then you can bring those changes you want. Realizing that, that is the key, and it's how we perceive it for to fit us.

One of the Knowledge Seekers sent me a picture recently past few days, where there's a conference of the nuclear, what you call it, annual conference, whatever in Vienna. I never understood, when I looked at this picture, what Bill Gates has got to do with nuclear industry. This man is so power hungry and now he sees, (2:24). I can be somewhere. And then, what would he influence?

He has a, what I call, complex structure with him. But why do we see a man who started in a garage, built up through his money, the power base, that now he influences all of our lives through our computers, or whatever, running to pharmaceutical to affect all of us through that. What has he got to do with nuclear industry? Which end of the atom this guy ever understood, that now he's there for what reason? I call it, a hunger for (having) the name to it, when I saw the picture. But, what is the game of this soul? And where are we going to see problems? Because wherever he's gone, he has created problems in the recent past. To own, it means to get involved. To be in it, to get involved with it, it means, with the money I have I dictate.

Didn’t he work hard enough some years ago trying to take over the Keshe Foundation. In their work, he sent his protégé, the other guy, trying to butter us up, to take over the Keshe Foundation.

Q: Mr. Keshe, why does he need so much energy?

K- He doesn't need energy. (2:26). This guy has a different agenda. Own, I have to own, because the first thing I took, I stole. So I can steal everything, you understand? So, he stole the technology of Microsoft from the Apple boys, he got away with it. So, he's become a thief by nature, because I can get rid of everything, I can buy everything, now I have money I can do. How he financed the biggest, one of the mass murder guys to become the head of (World) Health Organization. Anybody who calls about ethic, doesn't put such a man financing and backing, unless he has evil intentions. And we saw what he did with us in the past two years with the humanity. God help man with this picture, we see in public.

Q: Mr. Keshe, can we not change this condition with our thoughts collectively as one?

K- This is why we are setting up this world leaders (session). People have to learn it, they have to feel it, and they have to bring that change with it. It has to be done by being part of, being inside it, testing it, tasting it, and seeing the change of it.

If you remember some years ago, we asked you to deliver the peace message to the world leaders, a lot of you went to the presidential palaces, and blah, blah, you need a lot to do. Now they come to you, by your decision as a collective Knowledge Seekers, (2:28). that

you deliver the same thing, instead of a piece of paper, or email, directly to the soul. I promise it will work 100% better than your emails, all the letters you gave to the office of the presidents, the kings and the prime ministers of your country.

Q: That's so powerful, Mr. Keshe, what you've just said there…
K- It is the reality. You have to do it.

Q: I know it's the reality. When mankind really understands this, through the ethos of the Foundation, through the teachings, it's gradually getting out. However, when people tap into this, like to this very conversation right now, and they actually understand the true, the beauty that they have, they hold, they have, then maybe we will, not maybe, in this moment we have this condition. Where we have no need for this constant conflict that happens for a few to have more. It's just, it's ridiculous.

K- You see, when all man will be equal in the dimension of the Soul, then the STP decides how this equal position will be achieved, as the physicality is ?? comfort with it.

You know, the ex-Shah of Iran used to have a habit, he used to dress as a common man and go to shops, to go to, what you call it, bazaar, and everywhere, without anybody knowing him. He used to do that quite often. (2:30). To see how his people love him, how his people react, and how his people live. Very few world leaders have done this. The ex-Shah of Iran used to do this habitually, he used to do it to see how people are. Every now and then he was spotted, people realized who he is.

But what changes these things brought to his soul? Why do these people need to do this? To understand to be able to be part of? So, it is what we want to be. When we call the end of kingship, "oh, he is "anti-Belgian." No. Because we're all kings. When we are Souls, are equals, when we understand the same thing equally in the Soul level, it's the physicality, it could be handicapped or whatever. Who's the king? Do we, are we, can we live with somebody, which at soul level is the same as you?

How come when it comes out in the physical dimension he should be ex-Shah. A few European kings and queens go public, they live, they take a public transport, they live like others. (2:32). But still carry that stigma of being a king or a queen. But they try to be as normal, live as normal, and be part of the society to understand the society.

Q: Mr. Keshe, a true leader, a true king gives, becomes a giver, he is not there to take from others to receive, it is to give.

K- A true leader live amongst his people, not separate than the people. We have not had many of them in the life of the man. You don't lead from the front, you lead amongst, within. I always stay a Knowledge Seekers, because you learn from where you stand. That's how man will become to be. Understanding the knowledge of the Creation will overtake all man's greed for physicality, any greed will be ?? gone.

Any other question?

Q: Thank you very much for answering my questions Mr. Keshe, and thank you for bringing this forward, and…
K- I answer enough of your questions on the floor (of Linz Uno center) when it comes. (2:34). You've got to understand, it's usually two or three of us on the basement floor when we do the flight tests. If you have visitors they're all upstairs, and it's Dean, and me and maybe a couple of other people. We've got nothing else to do. We just walk in this seven, eight hundred square meter property waiting for the next change in the room, or next person, and the next case. Somehow we ask questions, or we do something, or we pass part of information. But, you've got to understand it's 7, 8, 9 hours sometimes in the same space walking and ??, to see what happens inside, and what comes out of it. It's just like an expecting mother. Sorry, an expecting father being outside the delivery room, see what comes out of the room. What kind of animal will come? What kind of creature will appear?
Q: Interesting times to follow Mr. Keshe.
K- I hope so, I hope so.

Any other questions?

Q: .. So, Carlos wrote here in our group, he's from Brazil. He would like to know about the formation that you have in front of the table of the people who are witnessing, who are giving their testimonies in the flight system. He noticed that have some Gans in front of these people, of the German couple, and they are in a Star Formation. So, he would like to know what kind of Gans you have there, and if they are really in a Star Formation?

K- I will tell you how they are placed. They are placed, more or less, by the lady who cleans the center. Every time she cleans, she picks them and put them somewhere. So, there is no (Star) formation, she just puts them there. Initially, when we did the first setting, it's just random. It changes every couple of days when she cleans the television section of the recording. (2:38). So, there is no formation to it. This has been brought up from upstairs, from the, what you call it, the showroom. It's just to have something. Usually you have beautiful sculptures or something, and these bottles are a "sculpture of science." There's no pattern. The lady who does all of our, what we call, cleaning our ship, and she's not a Knowledge Seeker.

Any other question?

R: Thank you for clarifying, because there's probably lots of speculation about that.
K- I think Dean moves more than anybody else, here and there. Because with Dean, everything has to have the right lights, and everything and right position.

Q: Yeah, Mr. Keshe, I'm always moving the lights, and those Gans's on the table. I've noticed myself, I don't know why. But, you know, you've seen me many times, I go and sit there, and sometimes when I'm waiting, as you say, we walked around in circles, and we're waiting for people to come out of the experience. And I go and sit and I see myself sort of gravitating around these different Gans's, and obviously receiving some energies

from them as I sit in different positions. I've observed myself doing this. Yeah, it's an interesting position to be. Yeah.
K- Oh, we just walk around, we move things. We've got nothing to do, we're a bunch of people just hanging around, we move things till the next soul comes out that room.

Q: It is quite amazing .. the physicality is there, (2:40). and then knowing that the soul is underneath it, and knowing that they carry this wonderful, beautiful, incredible energy. They're all being drawn like the magnet is drawing in, and this field strength is drawing in the souls into this position, and they're taking position. Then as you say, and then they're coming, becoming Satellite Souls that are then going out and spreading around the beautiful planet Earth this wonderful field strength that will bring about this wonderful condition that we all in this moment have, and we'll and we shall have.

K- One of the things which comes to me quite often, is that this is a knowledge. That is, I call it, a revolution in science, in a technology. The way we came, and we've got restricted by, what I call, certain governments, and for their own benefit, has allowed us to bring out, develop the technology amongst people and, what they call, underground scientific structure.

Which when we show the first transmutation and everything else, will blow out itself into total different directions and dimensions. So, you people travel from all over the world to go through, and see and feel an apple, an orange, or apple pie, or whatever. (2:42). But the implication of when the technology is, as it's coming out, will be so strong that no government can hold it back. It's, what we call, knowledge growing openly, but kept under the surveillance of not being in public, but it's still growing.

When you look at the number of people come all over the world to Linz, and how they come, and the cultures they bring with them. We have touched every nationality and race on this planet, and our Knowledge Seekers who are in there, and they are developing it, they are bringing it out, they're producing materials, they are doing all sorts of things with it.

I have to stop for one second and come back in. I received an urgent message, please. If you can play a commercial for five minutes, I have to respond.

<<< Waiting for Mr. Keshe to come back >>> (2:44).

K- I'm back in. Sorry about that. Saved by the bell. No, something was urgent, which had to be done, ?? urgent.

Any other question?

Q: Salomea .. I was waiting for you. I would like to ask you, if you will be in a political power, what do you will do to get peace right now, taking into account the international context? I had a dream with the Secretary General of NATO deputy, not as a prime. And he asked me in the dream, why I'm silent, and why I don't find solution, because he's

waiting for some solution from us. So, I now I make clear my voice. And I'm asking you, because I am so interested in your wise solutions in the physicality, (2:46). not only at the soul level, because at the soul level we know all this. If you have some ideas, we will thank you from the bottom of the heart, thank you.

K- Entering politics is not our job. I've been pushed in past a few months, especially from the sources who know, and what we do, to enter in politic in Iran. And especially in past few, two weeks, I get more pressure to. It's the time, it's a mayhem, you know, you can go back in and you will find people will respond, and they are looking for somebody to change. That's not our job. I am not a politician.

The changes, what we can. I come from the structure, I understand the Iranian politics, and the wealth and whatever it goes with it. But politics is not my place. I'm a Knowledge Seeker. I change, I bring the changes through the knowledge, and seeking for those who appreciate it, and they can use it to expand the peace and, what we call, unification of mankind.

This is not the first time I've been asked to enter Iranian politic, and they are backing me with billions of dollars. I always said, the man who enters the politic has ended his life. Because in the world of politics you are as good as long as they get their way, what they want, and then you're a dust. So, the world of politics has no meaning. (2:48). But, with technology and science we create the politics.

I always used to say, I have many, many friends in British Parliament, and the House of Lords and in the hierarchy of the British, I lived there for 30 years there, totally different ??. I always used to tell the politicians and they used to laugh. I remember going to the House of Common's meeting, once I was with a couple of Lords on the dinner table, in one of this Gentleman Clubs, as they call it. I always told them, you are politicians, because of us businessmen. We find you. We tell you what we want, we support you, and when you go in there, you're servants. So, knowledge people, businessman, scientists who can work and influence it, actually are the politicians in the politic. If you can't pay for the advertising, if you can't pay for promoting a politician, politicians go nowhere.

So as scientists, we decide, as men of influence, we decide the politics of the nations. But this time, we as scientists collectively, as Knowledge Seekers, we decide the politics of this planet scientifically, which is more powerful than actually going in there and sitting in the parliament and just shouting, and nobody hears you.

As many of you know, I've said it before, a ticket collector in the Underground's of London, because she inherited some money from her father's village in Ghana, became a member of the Parliament. One of the first things she did, (2:50). she called me when I was in Ghana, and said, Mr. Keshe, can you tell me what I have to do as a member of parliament? Where can I make the maximum money. I might be here just for one session. Can you show me where I can steal and get as much as possible? Have you seen.

Then you have a president of a country who has been a security man in ?? in London. Now he's a king, or president, or was. So, time is short. With the technology, we can change everything primarily. I'm not in the world of politics. I ?? don't want to get in the world of politics.

The Iranian people have offered me a very lucrative deal. Come in, there's a mayhem, bring people together. You can do it. It's not my job. I criticize the government, I criticize the leaders, but that criticism is a positive criticism for not to go where ??, and is listened to. As one of our Knowledge Seekers was telling me, Mr. Keshe, everything you have suggested to the officials here, we see it happening. They're changing things as you advised.

But we advise in the background to the other sides of the government too. I don't see what is happening in Iran the correct way. But you've got to understand, if they don't do what they are doing now to the population, they won't be in power. They are fighting for their life, Iranian leadership. It's not the riots on the street, that they're trying to stop. (2:52). If they take over, they don't have life, we saw the same with the Shah, they came in the same way.

You don't remember the riots, the students on the street? They know the way they came in, they are going to go out, if they don't kill as many as possible. It's the survival. They're not doing to suppress. Either way, many lives are involved, and I've got nothing to do with the life, that stands to be lost. Politics is not for me. I play enough politics with my teachings, and changing a lot of things. But now let the world leaders do what they like, because .. I always said, they are here for one term, two terms, and nobody will remember them, they become a number, president number 40, blah, blah, or 10, or whatever.

My technology will last for the life of humanity and beyond in the space, and that is the true politic, when you can bring the true peace. Let them battle for the spoons and forks. The plate, the food on it is with us, among us Knowledge Seekers.

Any other question?

Q: .. There's millions of Knowledge Seekers in the world who cannot afford to go to Linz and assist with the changes that Mr. Keshe suggests. So…

K- My Soul can accommodate millions. So, no problem. (2:54).

The whole structure is set in a specific way, one day I'll explain. Soon we will explain it. Even this, I had to go off the line and come back, was because of that change, that structural changes that Keshe Foundation will bring in. It needs to be done step by step.

There is a principle, I always lived by it, and it's part of my life. When you give something free to someone, they have no value for it. When you pay for it, you respect it, and you'll stick to it. When it becomes part of your life, you'll know how to handle it the

correct way. This is why we put it that way. You see, people come in and say, it's their right to be a Knowledge Seekers, that we're there because I am. We've seen so many of them, and the mayhem they have created, and we see people come in. They value their work for what they get, and what they bring.

It's not that they cannot afford it or is expensive. It is, and always been, what you pay for, you respect, and what is given, it's just another, what I call, piece of toilet roll. People don't have respect for what they don't pay for, it's the human nature. In the future will change. It will come by the service, not by paying. But that's a different thing. (2:56).

Any other question?

Q: .. I would like to understand more about the opening of the cells. How would this opening of the cells that you mentioned, be? Could you speak and define in more detail about this process. What happens when this opening of cells takes place? What is required for this to happen with the cells? Does it require a special emotion for this to happen?

K- Yes, it does. Human race could create this emotion of separation of the cells, as they do with the amalgamation of their cells. When you amalgamate them you create cancer. When you created, you can create separation or expansion, as our friend said in the recording. When we create that fields of the cells together, a father creates a cancer for himself, or a mother for herself, or we create it in different ways of it.

Man, within the structure of his DNA and RNA has a chemical creation, and control of the use of that chemical created, through emotion. Early men used to do it, as a mammal. If you had a tail, it got trapped under a stone, millions of years ago, you didn't die, you created that condition, you released the tail, and you made another one. The way some reptiles do. (2:58). It's not exclusivity of them.

So, to do that, you have to create, what I call, dilution of cells. Cells are magnetic fields. The way I told you many times, you can put your hand out and create a gold in your hand or light. You, through the same emotion, you create separation, expansion of the cells.

You have to learn this to be able to go through transmutation. Then bring the fields of it, that according to the environment of, creates the physicality of. I transfer your soul, your soul cannot be touched. I transfer your STP, which is an energy of you. But when I transfer you in a physical dimension, the STM, the STP of the man in the interaction with the environment, dictates how the matter state or, what you call, life, the state of the fields of the energy will reset themselves.

How suddenly with two hands and two arms, you have four arms and four hands on the Moon, or in another position. Still the same cell combination, still the same energy, but condition of the environment. So, it's a natural process, we have it in our RNA and DNA. We just control it through the technology. This is what I keep on saying, and I've said it many times.

Up to now it was theory, now it’s a technology, because it can be replicated, we can make machines to do it. So, we can always open it up and do it somewhere else. I can put you in that flight unit, (3:00). change the environment on the right side and get you as a fish out. But the problem is, I had to find a water tank to put you in it. But your problem is, was it your wish to become a fish?

We'll test this in the coming time. The new machines allows us to do this, with these machines we have now we have a lot of limitations. Once the two new units, and the other two vertical units come in, then we have a huge versatility, in moving and creating condition of the destination.

We can create the condition of China, and send about from London to China, and he'll come out as a Chinese. He’ll understand the culture, he'll speak the language ,and he’ll understand everything, and he doesn't, in a way, the soul of him inside of him says, what is going on, I learn Chinese, but I ?? can speak Chinese, and become looking Chinese.

Interesting, listen to what I said earlier on. The lady tells us, she holds a mirror and she cannot see herself in the mirror, through the expansion of the soul. The couple came in yesterday, they are so beautiful, I didn't have much time with them. I have invited them to come back in. But, they live a life of, and the things they do with the plasma and Gans’s is amazing. It was a pleasure to see them and see how they have evolved the technology to suit them. She tells you, I hold the mirror and I can't see, or I see in the mirror the light in the back of my head all the time. She said, I could see the light in the machine. Or gentleman sees a coverage of that vision is not the ?? true interaction of the soul. (3:02).

These are what is to come and how we see the new technologies will give us a chance to do it. If the world leaders know that they cannot hide anymore, because their souls lead them to justice, none of them will do wrong. None of them will take up the banner of leadership. Because they're scared of what the souls might bring to them, or maybe their soul brings them to. It is in the writings of Bahaullah, bless his name, he says, the time will come that no one will take up the crown of the kingship, as all man will be equal. Now through the technology and understanding the power of the source, we understand the beauty of the message. Because now we see as soul, we are all equal.

When a leader says to his soldiers, or his, those who execute his power, literally, "plow the man in the streets and throw them away like a dust." .. That's the time when there is no kingship. That's the time when you lost. And this is the message of Ayatollah Khamenei of Iran in past couple of weeks to the army. You treat your citizens, (3:04), that you can be proud to throw away. You have to understand, you must be very desperate to get in that position. You don't need to get into politics to change, they change it themselves with their own lack of understanding of what's going to happen to their soul. You don't need to drown the man, his ?? soul ?? will drown him.

Any other question?

Q: .. In the image that I see on the screen right now, I see this Materials Enhancement Unit behind you. Is this technology been brought forward to be used? Is it available?
K- Of course. I think you took this picture, or someone took the picture. The manifestations of it is the Plasma Gas Power Unit we showed. We convert energy to gas. The gas methane and others we showed, is a true use of this technology, but in a mini version.
Q: How's that coming along, Mr. Keshe? Is that taking position?
K- Oh… We have produced, it's just matter of, (3:06). we're hoping last couple of weeks to be done, and there were technical problems, and they had to get help from outside to make some of the new materials to make it secure. I think, I asked yesterday, they need time to do it, the power generator.

It's not producing the material, it's the technicality of the new structure. It's not a technology problem. It's just getting it right, that it stays there, because it's going to be very powerful. We, what you call it, it will be shown the minute they finish with it. We produce, we can produce any kind of gases. It's just that the team in the lab have to get at it. The minute the do one thing, something else goes wrong, trying to bring a new technology in with it. But in principle, as we've shown, we can produce anything we like.

That's a conversion of fields into matter state. Then, because you produce in the Gans state, then the matter state has to decide how, through the STM it's going to be used. It's very, very interesting. You haven't understood what this gas unit is yet.
Q: I sort of understand a little of it , Mr. Keshe…
K- It's a system with a soul. If you understand what it is.
Q: Yeah. And the applications for humanity, once it's released?

K- Many Knowledge Seekers have already placed order, purchasing this. The implication of it is, yes, implication will be very huge. (3:08). And things are not happening the way it should to happen. Then I look at it in the way, that it's not the time for it, it needs a few bits of extra time.

It's like what we all participated to support this funding, that the next change will come, and it's just nearly 11 months now we come to it. But you lot know about (only) for past 4 or 5 months. Many of you contributed more to it, to come and loaned the Foundation funds for it. And it is not happening.

Because I sat and I looked at it yesterday, and I said, why the heck not? Then I looked at what this is supposed to do. What we talk about this Gas Unit in the background (the Materials EU). Then you hear about the explosions in the pipeline number one with Russia and Germany.

The implication of that pipeline is, "the last chord you cut off the connection between the astronaut and the station." People have not realized what it means, this blow up of a pipeline in, what we call it, between Russian and Germany in past few days. Whoever has done it.

We should look at it in different way from Keshe Foundation point of view, with the technology we are putting back in. Makes, and going through German government and the others, would stop kingship through fuel and energy. It pushes for these new technologies like ours to come into public. Because, expecting, understand, the government's, 130 billion has been promised by British government to support with the fuel problems. Now we'll see more in other European countries. Germany is spending backwards. (3:10).

I'm waiting for one tipping point. When that tipping point comes, even when I went off the line (to answer phone call), that was part of that tipping point. When that tipping point comes, I will change the running of the nations in Europe with a flick of a finger. And you Knowledge Seekers in Germany, in France, in Italy, will be spearheading this. You'll be spearheading this beyond your imagination.

I explained this to a couple of Knowledge Seekers, what I'm going to do. But if it would had happened six months ago, it would have had no influence. If it happened two weeks ago, it still wouldn't been there. The time is coming for it, as part of the way we do the space technology. We get into that tipping point of the technology to bring the change. Whoever blew this pipe out, in a way is, whatever stupid thing they've done with it. But it's part of the overall soul of the change to come. It might sound stupid to you. But it has so much truth in it.

Five times, six times, some nations nine times the energy costs compared to last year. Food crisis because of the energy prices going up three, four, five times. People can't afford it, they can't afford to eat, the pipeline is cut, can't afford to feed, because the prices are going beyond. If you lived in England, like Dean, (3:!2). many English people tell you this is the "talk of the town," ?? everywhere. How many old pensioners, who live on the pension, die in England, because they can't afford heat. Or they have to live under blankets and boxes in the wintertime, because otherwise they can't afford food. Now the Western Europe will plunge into it.

Asking me who blew the pipe, are the Americans. Asking the Germans, it’s the Russians. Nobody will be benefited by this pipeline blew up, than the Americans. Now the West has to rely for all the fuels, gases, and whatever, and the food, which comes from US. They’ve done it in Second World War. Now the whole of Europe is incapitated. And understanding that British policy transfers into American policy, as their soldiers, then you understand BP will control everything.

So, two weeks, and I'll explain this, we are waiting for that tipping point. I'm sure you Knowledge Seekers in the rest of Western Europe will thank you for the knowledge you carry. Just waiting for that change. About 30 days, 60 days if it happen, if we want to, it will be done.

Q: Mr. Keshe, many souls, many people that are in the position where they, you know, they're experiencing discomfort because of the conditions being created. (3:14). Would

ask the question, if the technology is there now, why would it not be just brought? Why do you not bring that intention forward in this very moment? And…

K- You did not respect us when we gave you the MaGravs. You did not respect us when we gave the others. Bunch of abusers. So, we choose the time. If you're not hungry, I put the most beautiful dishes in front of you, you are not hungry yet. It will be nothing. But when you're hungry, I put a piece of old cooked meat in front of you, it will be the most delicious food. And the West has to go through this. Has to go through this. It's part of the change. None of the things you see happening is just coincidental.

Q: So, the West has to go through this to pay back the balance, is this what you're saying?

K- No, not the West, the whole world is paying for this. The only place you get a free gas is in Iran, as I call it. But the whole of the humanity .. is going through this change. The guy in Africa in the jungle has no care how much the tomato is going up, what heating is going to be, what gas is going to be 10 times. It matters to the Western world, and the western world is keyed up for that change, to bring, and to change.

One of our Knowledge Seekers from Australia call me a "globalist." No, we are a "play-ist," we know when we play, that it is fair for everyone. We have learned from you. I told many times, it's not time for it. The thing is going to happen.

I was telling you yesterday, it was supposed to happen yesterday at 3 o'clock, but it didn't happen. (3:16). Today, we're waiting for it to happen. It's not the right time for it. Because when it comes, it will be a "switch time." I know, we're preparing everything for it to be that "switch time." It will not happen one day earlier, or one day (later). When the rest of this structure is set up, for the souls to come here to do it. Then we'll bring. You will give the knowledge, we gave you for it to ?? happen. What all of you have done with the MaGravs? Nothing but to harm us. So, this time, we make sure you don't harm yourselves.

Q: .. What do you think would be the reason for the Pope suddenly to command all money from the Catholic communities, all over the world, to transfer all funds back to Rome?
K- What you mean?
R: I've heard rumors of that, or some sort of regrouping of the finances.

K- Has the Pope been to the casino last night, and lost everything in the casino? Which casino did he go to. What they call it, "the slip has been called in." I don't, I haven't heard about this.

You have to understand, (3:18). these people on the name of religion do a lot of other things. We have a good connection into Vatican. We hear a lot of things, which are not supposed to be heard, most of the places. You've got to understand why, if they do it, and how they're doing it, or they want to collect before it comes the end of them, at least they'll have all the money in there.

I don't know if you seen it, there's a picture of wealth in Vatican. You know, you have a pile of coal, you put in the fire, the coal in. There are pictures from parts of Vatican, which gold coins and jewelry items are stashed away like coal. He just sent the bulldozer to see how much it brings into the shovel to take it out, and they spend it. Literally there are places in Rome, within the Vatican, which gold, which you respect and you put it on your ears, on necklace, have so much value, they shovel it.

Now we have to ask, how much more they want to shovel. As I said many times before, every time you see Pope going somewhere, you see the plane of the Pope landing, walk around the airport and see how many cargo planes have landed to wait to be loaded with gold and go back to Vatican. When the Pope goes to Brazil, when the Pope goes to, what you call it, far East Asia to Thailand, and the rest, (3:20). and that part, there are six, or seven, ten, sometimes, cargo planes, jumbo jet cargo planes, sitting on the runways waiting for, as the gold is transferred. That is the way Vatican collects money. If they call everything to come in, maybe the Pope has lost a little bit too much last night in the casino.

There is another side to Vatican. It is, first of all, Vatican doesn't hold much gold reserve, because it has transferred it all to Germany, to Berlin. Secondly, they see problems in the Western Europe, in the Catholics, in the syndicate, what you call, EU. And they need that to backup the second round of poverty, and the problems that the, what you call it, the Christian community doesn't change.

There's a big problem, a huge problem. I was explaining this yesterday and the day before. In the West, people who live in Asia, and the rest they don't understand this. It's beyond your comprehension. In the West, Western Europe, or most of the western Europe, we call it, what used to be Western Bloc, not Eastern Bloc. There's a large community of immigrants through, whatever they come in. We've seen it clearly in the last two elections, especially in Italy, the far-right has taken place, taken power. (3:22). If the time goes rough, the first people they blame, as we've seen in the election of Italy, will be the foreigners, people who are not Italian, not Germans, not English, and the rest. We'll see they become the target of a lot of harsh time.

I see that coming up. Vatican encourages these harsh times. And to do it, they need to siphon money into the natives in a different way, that allows them to become racist towards the others. This is 100% on the card. We saw it in the elections in Italy, and in the past two or three elections around Europe. One of the fairest ?? conditions governments, countries we'll see will be United Kingdom, in respect, to even, there is a lot of racism in UK, compared to what's going to handle it, what it is going to accepted ?? to stand by.

Secondly, England is an oil ?? rich nation. It will not ?? suffer as the rest of Europe, as such. But, you will see this coming up in a very short time. Vatican, the way, if you remember the prices a few years ago, when the Ireland, the Portugal, the Spain, and Greek went into financial nosedive, suddenly out of nowhere, everything was good.

Because Vatican didn't want to bring change in the Catholic union of the European Community. Then they paid for it afterwards, we saw the gold went to Berlin, to Rothschild. So, they're collecting for that loan, (3:24). collecting a bigger portion to go to, what you call it, to Berlin. That could be one of them. ?? I haven't read about it, but it's part of the way they do it.

Thank you very much. There's something I forgot. A number of you artists are approaching Keshe Foundation to do artwork and send it to us to sell, or to promoting in the sale, in the shop, or in the Keshe Foundation Store. We are looking at all of this, we have accepted a number of paintings from these artists.

We are looking for the sculptors, who use the Gans technology in their sculpture. Artisans is anything, which you use (the Gans) and it can be done. We support you. Now we started selling. Even this week we've received a commission on paintings to be done by our Knowledge Seekers.

So, if you want to carry on with what we started, we can support you. I know Knowledge Seekers are sending their pictures, or paintings through the post now to come to Linz, that it is going to go for display. Now we have to open it, because these paintings are becoming more, and more. And others sculpture work, any unique work you do which work's with the Gans. It doesn't need to be wood or glass, it could be anything electronic, which actually works, and (is) artistic. Pottery and that kind of thing. We can support you. It's something we have expanded into to support Knowledge Seekers to have a living from knowledge they have.

New pictures, I think you will see coming up in the next few days into the shop, as the paintings arrives, and it gets categorized into the things, and if you want any painting to be done, or we have a sculptures, or you want to sculpture something with the Gans's, or whatever. (3:26). You make something handmade, still there for the Keshe Foundation to support.
Thank you very much for today. Thank you very much Rick for everything in the background, and we see you next week.

ENGLISH TRANSCRIPTION

(:12).

K- Yes, very much Good Morning Good day to you. As usual, wherever and whenever you listen to this series of Knowledge Seekers, Keshe Foundation , KFSSI Knowledge Seekers programs. We welcome you back, and in a way we welcome you with open arms, and hopefully sooner or later we'll learn more and more.

Maybe these teachings will go on the soul level, (:14). that we don't need to have a laptop, or a phone, or a mobile phone, or a computer to listen to. It's the time I wish to open my soul to teach, and you listen through your soul, it doesn't matter where you are. The limitation of time and space will be out of the window. In so many ways, mankind will become aware of a new way of communication in how he decides to communicate.

Would the silence be part of this communication. Then my shoulders ?? don't want to teach. Or would it be the time when you can come and take from the soul at anytime, it does not matter, that it doesn't have to be a Thursday 12 o'clock teaching ??. I remember when we opened the KFSSI first groups, we had a bunch of people with us, 6 - 7 of them, and one of the Knowledge Seekers (KS) came to me and said, "you have to give everything to us, whatever is in your head is ours, it belongs to us, we own it." And I said, what? And I was accused of not giving, what everything I know. If I would have given him the information there, and then he would have committed suicide, because the knowledge was so deep, that this little boy, could not even imagine the knowledge exists to this ?? time.

But now, you can tap into the knowledge, through understanding of it, but it has to be your will to be able to do it, to receive it, and use it correctly. (:16). And my wish that

whoever uses it, through their soul, will receive it. It's not by deception, come and take me, and then running and doing whatever we've seen done by KS.

Maybe, maybe we become to understand more about our own behavior than anything else. Maybe we become aware of our weaknesses, aware of our strengths, where we are stronger, where we reach, to touch the knowledge, which knowledge? I want to know about knowledge on this planet, in this part of the universe. And then I assess if I like to go there. And if the soul of the planet accepts my soul. The situation and the travel of the man will change. Then it has to be, to be changed.

In the flight zones, experiments in the past two days, even though I was so sick, I kept the whole thing to be done, because there is a time schedule on it. We realized beautiful things. We achieved, unbelievable to be achieved. But in a way, we didn't achieve, we just confirmed that our knowledge in setting up was correct.

We have entered the final phase of physical transmutation. We have seen what to be expected of. What happened when the STM leaves the physicality, and we are left with a body. (:18). We had to experience this yesterday, where the body is cold, and the physicality is just skin and bone, in the flight system (FS). Where we saw the transition through the phase of the physicality, trying to reach to the other side.

The whole transmutation has taken a new dimension (D). The whole transportation has taken a new D. We brought in 4 people on Tuesday, and we brought in a new way of transmutation. Not a new way. In a way that we have tested enough our systems. Now, it's your turn to test your strength, your willingness, your wish to move.

We put in two couples in the system, and we had at the same time as I said to you last week, a brother and sister as part of the couple. The experience was thrilling. The learning confirmation of how precise our systems have been set was a joy. But what will happen to our next generation. What will happen to the next generation of the systems, which are coming in a few weeks time.

What happens when we bring this into what I call, open spaces of use. (:20). In the first trial, we tried to understand more. We allowed the combination of the 4 to sit, put anywhere, go anywhere, do anything they like in the 4 seats of the space system.

We switched on the systems, except one part, for the full physical transmutation. The reason being is our second system is not set for return. If we had to bring them back, what we'll do they do, if they cannot come back because the system is locked. It doesn't have the facility for return from one system to another. But you can go from one system, from left to right, but you cannot come back to the right. And what happens if the things don't go according to the plan.

We realized one thing and that was that, whatever we set up in our systems in the 2 flight simulations is exactly how we should be, how we will perform, and when we detach the gravitational field of the Earth from it, we will see, that the system will complete itself.

We detached the system from its link to the Earth, and we saw how we stopped. We did a lot of other things with it. But what was interesting, goes back to the ethos of the teaching, where we always said, "my wish is my command." (:22). My decision to do is my command, which meant we withdrew part of the system.

We allowed the 4 Knowledge Seekers (KS) to make a decision to try. This is what you will do in space. We cannot put you in and "beam me up Scotty," you have to have a desire to go and beam yourself up through your soul.

The outcome was very interesting where the ones on the right, who would move the soul energy to the one on the left, if you look at it from inside, or what we call, "the left side to the right side." The partners on the other side could feel the energy, could feel the emotion, could grasp the incoming energy as the partner. What was interesting for us, was that the partners feel each other's touch. The partners feel each other's emotion, as one has arrived. (:24). The partners feel the .. other partner to be on their lap, and they could hug each other. But at the same time sitting these people, not as before, we make a decision. It was done by their own decision. Choose a chair where you're happy. Choose a position where you feel comfortable in the system and try to transmute.

The interesting part is, the other partner on the system 2, knowing the system is one directional, could feel the emotion of the arrival, but not the physicality. This is part of system we're not ready to, because at the moment this direction is a "no go." If you send them (somewhere and) something goes wrong, we can't bring them back, or we can partially connection to here, but we get everything back.

I'll let you listen to a couple of this, 4 person group and listen to them. It was recorded after the what we call, session. This was about 3 - 4 hours session. Flight systems are very time consuming, it's not something that you can go and do. (:26). And we see it before, German couple, and the brother and his wife had to go urgent somewhere else. They'll most probably participate in a next what we call, discussion. Listen to it and just understand the feeling of it. Then in this process, there is a surprise at the end, when they are asked a question about their family. Then you understand, how advanced the technology is, if you understand what it means, the implication and application of it. Rick go ahead and play this, and then we'll come back.

26:56
31:54
32:23
Dean : obviously I don't know I can tell by the emotions and the big smiles and everything, that something very magical and beautiful has happened. Thank you for sharing that experience.

Is there anything that you would like to speak about together, to open up a little bit further a field I feel better immersion while speaking minds on my lips would you like to speak as a couple together to have a little conversation so we open up the how you felt inside together as

Mr. Keshe 33:10 : Are you recording? .. There is something very strange in this couple. She would not speak English for the past ?? 10 session, she knew no English. Now she speaks better than the other one. She just become English fluent.

Dean: So this has happened that you know a fluid of really from this is taken position that you actually know can speak fairly good English
Answers: Yes, that's me.
Dean: You could not before>
Answers: .. translates .,
35:21 My brother and his wife were with us in the unit okay,
37:29
Thank you Sure. When the translations come, when when they show them I will get I sense the emotion and I thank you very much for for being present. Wonderful. I like to see the really that golden, wonderful, shiny to fall shining in your faces. And thank you so much for sharing all your experiences with humanity. That's beautiful. Thank you so much. Both of you. Thank you, Mr. Keshe is now going to ask a question.

K- As you were with your brother, (:38) and he was part of the first two couples, brothers and sisters with your partners. Can you explain how you felt when you wanted to go from the unit on the left to the right. Can you explain that emotionally? That you know you all said, you turned to the left as you're going to the other unit, physically.

You explained that your body was moving physically to the other side heading

Answers: It was the first question we explained it. But emotionally

K- But was there a degree of fear, that you might leave something behind? That was one of the. Was that one of the concerns?
Answer: I think I don't feel fear. But I felt it from her.

K- That she was worried, that if she goes something will be left behind.

Answer: a little part of because we're, a little part
K- The same as your brother, he had the same feeling. You decided part of the tests yourself, in what you choose? Items you choose to give, or emotions give. The desire to move across. How much of this desire would there be for you to go back to where you were? For example, if you move from a unit, the left side to the right side. How much is the desire to go back there, to see what was, what you left behind? Is it the same? Have you ever thought about that? (:40). Because the same chance. You have to go from the right to left, then you can choose next time, to go from the left to right, and see what memories you left behind in the other one (system).

Answers: This is new for us. We didn't think about it. ..
K- Next time. This is important. We want to see if you still remember the emotion on the right. And then going back to the left, where you started, is it the same emotion, (you) carry back with you. Because you're the only one who had explained to us, what was the transition back and forth.

Answer: So back, we don't think about it. But back. Because there was no option. But from left to right, I can say from my point of view, it was really a strong desire to get over there (to the system on the right side).

K- To get over there?
A: Yes. Really strong.
K- Physically going as well, in a way.
A: Yes.
K- Yes. Something I wanted to ask you. In the June that tests, we asked you to (give) something for your parents. Yes. What was the outcome of that? Because we know the answer, but what was the emotion you sent to your mom and dad with your brother, and everything?

K I have to explain. The four of them are in the machine and the parents are outside shopping, because they are here (?? in the building). The parents didn't know what they've been sent to, or what it was. So if you explain to us and then I'll go back.

A: (in German) .. (:42).

K- So in a way, you could communicate your emotions to your mother? There's both of you. You have that feeling that they didn't need to (say it)? They could feel it?
A: Yes, yeah.
K- What would be interesting? When you go home, try to see if you can decide tonight, to see your mother in your dream. Or send her a message in your dream, and tomorrow morning ask your mom, did you get such a message? Because now you have the capability, to open that door of extension.

That'd be nice to see when you come back next time, how many people you can do this with? That you learn, you speak in one way, (:44). but you can communicate through your soul, or extension of the feeling. You don't need to ask anymore, because the soul does the question, with asking. Thank you very much for coming. It was a interesting trial.

I have to say these are the first four couples, which we allowed to go through the full transition, without the support of the last stage of physical, to see how they do it. And we've seen them physically trying to move from one unit to the other. They explained the emotion. But with the next unit you can't fully jump from one to another, on each other's lap, without any words.

<< **END of VIDEO** >>> (started at 26 minutes)

K- As we heard in the last part, they could transfer now, emotion to the mother. But they could not transfer the physical flag to the Father. Interesting part was, we heard about the brother. We gave him instruction, share something with all the other three. You got to realize, these 4 are very close to each other, they know each other inside out, more or less. They've been with each other for 15 - 20 years, and as partners.

His wish or his thought was, he was hungry, he wants food. We didn't ask him, what his wish was. We asked the other three, what did they receive from him? All three women said hunger, hunger, he's hungry, he wants food. He wants food. And we asked him, what was your wish. That's what he said, he was hungry, he wanted food. Apparently he eats 24 hours a ?? day, and he's as small as a pencil.

The other part was, that you hear both of them, that they lean to the left. To the left side, which is the other system, (where) they want to go. (:46). In part of the discussion, we tried to get them to explain how it felt. The same as the couple we had last week. They feel that the cells of the body are opening up, in moving, in trying to move.

It brought more or less to the final conclusion for us, that mankind is ready to go. Mankind is ready to be free from the shackles of physicality. Mankind needs to train himself. They could send the wish to the mother. What about, if they wished, they could be with their mother. Do we need another system in the bed with the mother, for them to arrive?

When they came out of the system, we asked them to stand back to back, and transfer wishes to their partner. That was more interesting than the whole lot. How they felt love and care for each other, and whatever.

One interesting point from one couple to the other, being as a passenger without a Head Unit, sending message to the one, which is on the receiving unit, but in the Captain's seat, that she could touch him, and she was getting excited enough, and he could feel the touch on his face, as being caressed, the lover feeling the emotional physical soul of the touch.

For us, this process is very interesting. For us this process is part of what we call, (:48). understanding of the Totality. Now we see we have managed to move the Soul. We have managed to move the Soul of the Physicality (STP), we have understood, that we can provide all the facilities. If we do not provide the wishes of the owner of the Soul, whose desire, what's going to happen? Then we have systems, which can be the hold back, which is our system.

We came to a second session of tests, with one person only. We need to establish the criteria of what I call, work of what we can move. It's not just all the time, what we call, lovers, partners and the rest. This time, the test was set in a totally different way. This time the set was for, to understand the matter of state composition transfer. We placed a

cup of water in different positions, in a set. A KS from Holland, she sat in different positions, with the water being moved to different positions on the system.

Different ways of connection. The first time was to see if she can tell us what she received. (:50). She said, I could taste something, I could, I was swallowing water. She was told that the object was a water. Then, as we moved her, in the last session, we moved the lady on the back seat, where the water was positioned in the front seat. It came to the position, that she could not swallow, so much water was coming in, inside the same unit. She was receiving this, taste, and what we call, "emotion of receiving," actually swallowing it.

She was swallowing and swallowing water. But nothing was touched from the volume of the cup. This time the transition was internal. This gave us a huge insight in what we set out to do, that we can feed our passengers. We can transfer materials they need for improving their physical condition, tiredness, they need all sorts of energies to overcome different conditions.

Then we connected, a direct line connection, which meant we connected a connection between the 2 physically. This was worse. The amount of water received was so much, but it was just only held by hand, the connection, and the other end was dipped in the water. (:52). Then she was told that, that was on the transmission was a water. We wanted to see.

We invited her back the next day to come back in. This time the object was not a water. We brought in a banana, orange, and a garlic. We chose the first seat, as it was the day before when she left, and put her through the transition. ?? Ella was the first one. She said she could feel something. I have to tell you, before we started, we switched everything off. There was no system running in the room. So we had to have a zero reference. She said, she doesn't feel anything, there's nothing happening. Even the banana was on the flight system.

Then we switch (it on). The minute we switched (it on), she said, I can feel something. Then she was so, that the system was switched on now. Before up to now, it was nothing. She couldn't explain, but she said, I've got something in my mouth. I can feel it.

Then we changed to an orange. She explained she has this feeling, tingly feeling, the way when you drink an orange juice. Without her knowing, we put the orange, and banana in the flight position, and we added a garlic. She said, this is a taste which is not mine. I'm a coffee drinker. But this taste I don't know what it is, I cannot explain it. It's there I know what it is, but I cannot explain it. Don't forget now, you have a banana, you had an orange, and a garlic together. You try to eat that, and see what taste sensation you get.

Then we wanted a confirmation of the work of the day before, (:54). on the water. We took everything off, and replaced it with water without her knowing. And she said, now I'm getting water. I am getting the same emotion, but not as much as yesterday. We gave her a line of connection, she could feel more of it.

This was important for us, where we transferred Souls, and STP from one unit to another. But this time we transmuted the emotion, and soul of an object. It's the same as the other partner could feel, the partner in her lap. What Alex brought to us years ago with the orange and the cup. Now we have created without drinking the water, receiving the emotion of the elements.

These are major, major breakthroughs in the world of science in the future will be used for feeding people in deep space, for feeding disaster zones with food, by changing these Enhancement Unit into satellites. You position the satellite. We have a hurricane, a huge disaster in Caribbean's, and in what we call, East Coast of US this week. Thousands and ten's of thousands of people have no food, no medicine. You don't need to put a drone to bomb them, to kill them. You position a drone and you feed them, using, understanding the technology. And they take what they want from the process. But the body in essence of the soul will receive. We'll change the whole mentality of the weapon technology to "life" technology. (:56).

Then we had the pleasure of having a couple, married over 40 years. German speaking those who by descendents, went to Russia, and came back, both from the same tribe, but in German speaking. It was one of the most exciting times in the unit. If you could understand the transition. The couple don't speak in English, I think it's "yes," and the "T-Shirt," that's only thing one woman could understand, the lady.

So we had to bring in a KS to translate inside the room. What we witnessed for the first time was from an outsider of the control system. One of our Knowledge Seekers who works with us in the Center. I think it was more shocked to him, in that he was so great to stand in and watch it, then what was going on, in the whole structure. Being witness to one of the most beautiful first stages of transition of humanity into dimension of the transmutation.

We put the gentleman in the control, and we put the wife on the backseat of the system. The lady went through, she's very sensitive to fields, she has dimensions and it's the way she is. She has been with us before. They came in. As I said, many Knowledge Seekers are coming back again and again. Not for themselves, but for us as humanity to add to our knowledge, to complete the system. As we saw with the 4 couples, and the same with the Dutch lady who was with us the day before, on that day. (:58).

Many Knowledge Seekers are returning back to add to the knowledge, because they want a change in humanity, in the human race. The lady in the back works with children, and she could feel emotions in respect to the children, young children.

We moved the couple in a different way, that the lady moved to the receiver side. Then in the process of testing, we changed position. We put the husband on the backseat in this position, and she was in the front position. This was one of our final stages of the day, as they had to leave before 3 o'clock. When the gentleman was in the front seat, he said, he feels nothing. There's just nothing, he is there, nothing. When he moveed to the other

side, there's still nothing. He said, I have no feeling. I'm here nothing happens. When we moved the lady in the front seat, and the German in the backseat. Don't forget the backseat is just a normal space. The front seats are fitted with a what we call, a space unit.

We, as now we know, we switch everything off, except the last stage, because of full transmutation. But we said, so let's see what happens with this. The lady who left for a few minutes, and came back. (1:00). We saw the unit shaking. Clearly, the head units were with full vibration, both KS, and I, we noticed. And we noticed. I noticed, because I know the system. The Soul, and STP have totally left the physical body. But you have to understand, even left, it still has a connection to the dimension of physicality. That's how we go back to our body when we wake up from a dream. And the soul comes back.

When the STP goes with the body, you see yourself doing things with your mother, grandmother, or whatever, on the, what you call it, on the beach, or whatever. But when the Soul goes, you just get an emotion. When the STP travels with the Soul, that's why you see yourself with other people, you do things. That's where you are involved. In some dreams, you're an observer, that's when your Soul is present, not your STP.

Now, with this lady, we saw the shaking of the system. The shaking of the system is something I explained to our team before. Because after when I called, and they said, Mr. Keshe you already told us, you said this will happen, the STP. When you literally, the cells of the body, the blood of the man moves to the other side, to start creating the cage for the Soul to come in, to in a way, to cocoon it. You are coming to a new dimension. Which means that physicality is here, but the STP, and STM, and .. the fields, which will contain the STM when the physicality arrives, have all left.

How do we know this? (1:02). I had to stop and I had to ask the lady to stop the process. We have to stop. We managed to retrieve the body back in a way. The body was just like a statue. Solid, cold ice, as the what we call, the blood has left. There was no heat in it. When she came back we had to wait for her. It's like when somebody wakes you up in your dream in bed, to get everything back, the Soul back, the STP back. And then we had to literally pull her out of the unit.

She was very emotional. She wanted to be on the other side. And in the first instance, when he was in the front, she could tell us, she was behind him. She was hugging him from the back. This explained a lot of things in their private relationship to us, because we know other things. In the same system, was the same. She was there to sit on his lap, to hug him.

But what happened during the shaking and the transition of the bodies, it's like when you go through a sound barrier, you see the vibration, and then you seen with astronauts, in their body happens in the physical condition. When you go through the transmutation of the physicality into the Soul, you get the same kind of vibration. This is fields interaction, and that's why we could see the vibrations.

But the most interesting part was, the husband does not see, it's a darkroom. He went through physical vibration to receive the body. He explained to us, that in his lap, his legs will started shaking, the same shaking as was in the other machine, in receiving the physicality. When we stopped when he came out? (1:04). He explained to us that, I had shake in the chair, front chair when I was there. But I thought it was nothing.

But the interesting part for us was that, if we would have not stopped the process, the lady would have transmuted fully. She had no inhibition to move, no restriction. We heard with the couple before. They had that little fear, of not returning back, or something goes wrong. This lady had no fear, she'd left the body behind. This is what happens on the point of death, when we leave the body behind, everything else goes (across). We have the confirmation of it.

As I asked the team, we asked the Austrian government to appoint the board inspector into the Keshe Foundation Center. As we have already been ?? we know ?? the flight will start from. Which means when we start bringing people from overseas, we become a border control checkpoint. Those of you who bought the Mobile transmutation we will go through this very soon.

But we changed the seat. We asked the husband to go in the front seat, and the lady in the backseat. And then we asked the lady, try to get back, and husband tried to get to her. The transition was beautiful, because she explained to us. This is explained to us live, while they are going through the process. We sit outside, it's like a control system from outside, they tell us what's happening inside the room, inside their Soul, inside their physicality.

She said, she sees herself underneath him below the chair. (1:06). And he's on top, on the chair. But the beauty of this shows, that mankind has entered a new dimension. We have asked her through our team to make a recording of the session and send it to us. It's in German. Hopefully we'll receive it in English in the next few days. And then you can listen to it.

If you look at it, we have managed to bring the Soul, STP, and the condition of the soul of the movement of the STP, which is the blood system of the man, to control, to leave just the body behind. Because this lady was not so interested to take the body. The body is old and fragile. But she wanted to be with a man, who she loved from childhood. They met, they played, they grew up age from age of two and five together. And in their 50s and 60s, married for 40 odd years, they're still together. The love has not died, physicality was not the matter.

But what is interesting is, we have seen all stages of life of the man in this machine in past few weeks. Even when the man discards the physicality behind, just to be with the lover.

But the beauty is because we have system, we cannot create death. Because we can always call back the Soul. This is how when you go into space, you come back to Earth, because you're connected to the soul of this planet. (1:08). You will become a refugee of

Earth when the Earth blows up in pieces. Somewhere in the future you'll become homeless. But as long as the home is Earth, you always can come back to it.

For us, understanding this process was very important. Going through the process was very important, to understand where and how the next generation of our systems will be done. Where we now implement a dual transition, where we now in the new system created a dual condition of environment. Where you can go back to the Mars in the STM, the STP of the Man, and how you manifest yourself in the other system, when you arrive to Mars.

You can see your future, you can see how the condition will be. Do you like to have 20 legs and 4 arms? No, I'm not going to Mars. Can you change the system to star number so and so, in such a galaxy? Or draw and throw the dice, and see what Galaxy I'm going to end up with, which planet, which position in the universe. I want to try something new. I'm going on a blind date with the space. Maybe if the Soul is a strong enough, your blind date ends you up within the Soul of the Creator. If your soul is at that level of strength of devotion.

We did something very special. This week, now we have the control of the system. With the lady who came from Holland. I explained to her in a very simple way. We wanted to test the transmutation, (1:10). Mobile transmutation but within the system. What we did was very interesting and I'll wait for some sort of confirmation of it, or change of it. We observe it in the next years and months? We'll see what happened.

I asked our Iranian team to send me the picture of the two people who are creating, ordering, and setting up the function of all killing within the past few days in Iran. I received a picture of the man who gives the orders. I explained to our Dutch Knowledge Seeker. I placed the picture within the frame of the mobile phone. I placed the mobile phone on the transfer unit in the front seat, where our KS was sitting in the back. I didn't say anything. I said, how do you feel? She said, pain inside. I said, you're receiving the soul of the most, a man who kills thousands of people a day in Iran. She felt the pressure and pain.

I said, our problem is not to punish, it's to elevate. And she reversed the condition in giving to this soul, to elevating it. She said, I feel better. Now I can give, I can bring that position. We'll sit and watch how this single Knowledge Seeker has changed the life of the most heinous man in Iran today. See how he will change. (1:12).

Then we transmuted the same, ?? then into the waters of the space of the Earth. There is a reason for this. Which means we wrapped away, we connect our passengers to the system from the back to the front, and the rest. We connected the Soul of the Man to the water. Purity of time and space on this planet. And we will watch how this man will change.

We wanted to touch the life of Ayatollah Khamenei of Iran. But unfortunately, he's dead. He is not there for us to reach. We asked for the pictures of him when he was alive. He had carried, being the ruler, and we could reach him.

So we had a lot of confirmation that through the system, we have the knowledge, we have the accessibility to know who's alive and who is dead. If you're looking for a lost one in a desert, is he alive or is he dead. Now we can bring it. We can see the transition. Are you talking to the soul, or are you having access to the physicality (P), STP. A lot of things in the life of mankind will change in the coming time.

When we set up the Mobile communication, when we ask you as Satellites to join us. When we open the Zooms on Satellite members of the Keshe Foundation. You'll all be there to elevate the soul of that murderer. And we'll see how fast he will change. How fast we change the world leaders, (1:14). as a what I call, whatever they do, which is wrong, to how they see themselves to change right.

In a way we bring the true life of the Nobel Prize. If you all know the life of the Nobel. Why the Nobel Prize came in, and the history behind it. A man who was creating dynamite to kill, finding out what they think about him afterwards. He the changed and he did something for people to remember him, and he created the Nobel Prize.

But the ?? nobility about this is very simple, now we can reach any soul. Now in the coming days we'll bring the world leaders to answer in these 4 seats. They'll answer to their souls, not us. To be elevated by us.

This is why I keep on pushing, please sign in as a Satellite Soul, let's get it completed. Sign in as Mobile come into the Center. You cannot imagine what is to come. It not ?? we all become Satellites. Make your way into the system.

We saw how the lady who did not speak, speaks suddenly fluently English. It was very strange, because all the time they were here before, in the beginning of the trial, this week, it had to be translated to her. And then when she comes, she just speaks English better than her other partner. I said, hold on, weren't you. Couldn't you speak English till now? She was more comfortable to speak in English as you see, than German. So, you live the soul of your language in the system. (1:16).

In the coming days, as systems come into operation, we see the changes. Now, we have Keshe Foundation as a space company in 4 nations. We are in China. Keshe Space company is fully registered as Iranian first independent space company. We have a Keshe Space in Austria, and we are in Arizona as a Keshe Space Institute. We transfer knowledge amongst the 4 nations, as part of the assets of the Keshe Foundation Knowledge Seekers, which means no government can stop us sharing knowledge and technology. It's internal transfer. We don't need limitations and rules and regulations of man on the intellectual rights, as the right belongs to all of us. We developed it together as One Nation.

What will be interesting, in the upcoming days, we ask you, all of you, we'll bring in the Pope, and we'll listen to his confession in the dome of the Universal Council meeting, and within the Universal Enhancement Unit (EU). We'll bring in the soul of the Pope and the

soul of the Ayatollah Khomeini of Iran, and other religious leaders into the room, and they have to, (1:18). and it's the responsibility of Universal Council, to question, to elevate, and not to punish. The religious leaders become answerable to the STM, in the dimension of Universal Council.

You will understand soon, how we govern as One Nation, as One Planet, as One Race. It will be interesting to understand how you as Knowledge Seekers will decide the future of humanity. This is not a dream anymore. The reality is what is sat, in the system. We have done many other tests, which gradually will be … Knowledge Seekers don't even know why they do certain things, but it's a part of the plan of the biggest structure, or confirmation of part of the work of the system.

Those of the Universal Council, be prepared to meet the World Leaders on the level of the Soul, as you meet, and as we invite you in. As we have set the systems ready to accept the world leaders to elevate their souls.

It's your responsibility. And then it's your responsibility to convey this message through the Satellite members of the Keshe Foundation across this planet. This is the right ?? of you as Soul. If you ?? go a Knowledge Seeker in the room this week, she could feel the pain of one of the biggest murderers of the time, of the present time. And she could elevate him. She could raise his soul of soul. We'll watch to see what happened. (1:20). Only two people in KF know who he is, and we monitor him. Would he take his life? Would he leave the dimension of P now that it is elevated? Would we see change in the dimensions of the running of the Revolutionary Guard in Iran? Would we see the changes in SEPAH? Would we see the change in the dimension of peace?

When we bring Putin, and when we bring Pope, and when we bring the Italian Prime Minister into the room? What would be the expectation of the Universal Council? Would you as member of the U Council elevate all to the same level. Or would you because she's Italian, the Italian Universal Council member will have more interest to do something with her. Where it shouldn't be, all should be equal.

We have started to run what we call, the beginning structure of the one world community, and these teachings are part of it. That's why we are carrying you through. It's not a dictatorship. It's collective confirmation, of what we call, equality of the physicality of the man, as man is equal in the soul.

There are other tests which are going on in the Center. Some, even today, the Knowledge Seekers who come and go, are not aware of what's going on. If you listen to the first tape, when the two lady's speak, you hear a lot of noise in the background. Every week, every large number of people come to the Center, and the noise you hear in the background is presentation of the technology on the top floor, (1:22). with the other Knowledge Seekers who come from around the world to be, to see the change in Exhibition Center.

It is our responsibility to push this what we call, change though with technology, with understanding it. But the most important thing is, that us as Knowledge Seekers have to

understand what we are doing to ourselves, before we try to put it out. That's why this teaching goes on, the way it is.

We told you how to make MaGrav, as I said, how to make this and that, how to make Gans's. You cannot make these systems, what we developed. But we can teach you how instead of using MaGrav, the energy of it, to use the energy of your soul, understanding how it is, and become that MaGrav, to give free energy to every man, woman, in the level of the energy of the STM, elevation of soul, which is tapped into Universal Energy. Which means every man has the capability to feed the whole of planet in one go, if he is open in that sense of doing.

Never have the fear of what will might happen, have a joy that you're what we call, positive work, brings that positive change. We are short by more than 300 - 400 Mobile people to join us. We are short by a large number of the Satellites. These positions have to be filled by Knowledge Seekers, that we can carry on the work we are doing.

This week, we asked the what we call, Universal Council from Russia to step down, due to the fact that he did not declare to the Keshe Foundation, that he is a member of what we call, the Knights. (1:24). We don't work with no society, and structure, and I thank you for immediately stepping down.

We need to understand, we need to understand, that we do not see, need to use the structures of the KF for ones what we call, personal belief. But it has to be Totality to be believed.

It's important for all of us to understand that change, that ultimate goal of change is upon us. None of you know what's going to come to you, what's going to hit you, or what's going to be, when you go through transmutation, when you go through Mobile transition, and when you're in the Center. We need large number of you to complete the process in Linz. Those of you who've been here before, are better candidates to come in for the second cycles, because your soul is already stepped up into it. It's already activated. And it allows us as we saw with the couples, for being here this week, in the transmutation, because it's not there to set up. It's there ready what we call, time to go through the next step.

So, in a way, the KS standing next to me, most probably felt ?? so many dimensions of maybe, what I've been told, what I've seen, ?? now he is in front of me for the first time. We allowed somebody from outside to look inside. Even outside, he is one of us, he works with us on a very strong basis. And this brings us the change. This brings us the position, (1:26). to know that we have entered the cycle of what we call, transmutation.

And if you want to leave the body behind, please don't leave it in my system. I need it for the next person. Take it, and leave it somewhere else. Because you have that capability to do. If you see the beauty of what we call, the world of the Creation in the D of the STM and STP, and you see your physicality is a burden, you're allowed to leave it behind. But

don't leave it, as I said, go back to the past teachings don't leave your bodies behind, we are not body collectors. And we saw this, this week.

Everything I've taught you in the past, everything which is taught will come to be seen, when it comes to completion of ?? reactor. We are ready to receive the next cycle of the Knowledge Seekers. We are ready to go through the next transmutation. We are ready to bring man to become part of the Universal Community. But this time not as subordinate, but equal, plus the knowledge of the Creation, which has never been shared in any ?? part of the universe. It's a gift in a way, man becomes a messenger of peace across this planet, and across the universe through the STM. We've shown it. You will see it, as the two ladies they said, they could feel each other.

Now we can imagine, we can feel the Creator, if you are of the higher order strength, to be in that position. Then you know what it means when I hug, and hold Mitra. It's the dimension of the devotion, (1:28). in the dimension of serving, and servitude. It's detachment as we heard from the couple, be it just a little bit, are afraid of detaching and ?? Where the lady yesterday had no fear of detachment, she could leave the physicality as the love of the partner in the other system was so high, and he could feel her arrival, in the dimension of physicality in his body.

We go to a break and we'll come back, and we'll see how humanity would like to do with himself, as now we enter the final phases of what we call, transmutation, and open the Universal Community to mankind. Rick take us to a break and we come back.

<< BREAK >>> 453 KSW October 6, 2022 (1:35).

K- Let's see what questions. There's a couple of things, we put in, we usually, because we're coming back from the commercials. (1:36). Just one second, please. As you know, we started putting in the artists work for sale on the Keshe Foundation website. Most of the artwork is sold in the new what you call, artworks which are opened up as of today, or yesterday. New paintings come in, and artists around the world are asking us, they want to put in.

It's not just asking to put CO2, or Gans of Zn, or whatever in it. You have to understand, the ones we commission has to be much more than just that. As the ones which are commissioned by Keshe Foundation, we supply the Gans's. When you go in it you feel it, you feel the strength of the fields. It's not just because, oh, I can get a Gans of Zinc, and

Copper, and whatever, I can do. You've got to understand more, it's much more and it has to be done that way.

So, we see how things turn up and how things go. You can go and see the new paintings, which has gone up for, what you call, promotion and sale by the artists which they painted. We hear the artisans, potters and others, are trying to do things to send to the Foundation. Please, first talk to us before you send it. We want to know what you use, and how you use, what material was used.

Yes, this is a new one coming, it's a pair of them. It's actually beautiful paintings just been done for the Foundation, by the Italian painter. It's a twin, one is the man above the Earth, and one below. There's another one which is a infinity loops. Then there is a volcano as a set, which is, these are what is coming to us from the artists who paint these things. (1:38). We received the first commissions, people who commissioned paintings for them to be done. So, we're going from one step to another gradually to the point where we can see how things are taking shape.

In so many ways, we will try to bring a lot of things forward, and trying to let the Knowledge Seekers to bring, what we call, their understanding. We've seen some Knowledge Seekers, they deliberately become members of different part of the groups trying to sell their products in the background, or promote themselves in the background with the Knowledge Seekers, we blocked it. We blocked, with one of the Universal Council support team was blocked because of this, what we call, clandestine behavior. We monitor these things.

Try to be straight forward with the Foundation, we'll try to help you to expand your work. But don't try to do things, which doesn't fit into our framework. In the coming weeks, we'll bring in more knowledge, more what works, to know what's happening and about what's going on, between all of us and amongst us. We'll see how things will take shape.

In the next few weeks, we will introduce new technologies, new systems. Many of you are asking me, what happened to the Power Unit, Combines Power Unit. (1:40). We had to redesign it. Then it was, more or less, completed the first phase of testing, we're going through this week. Hopefully, we should be able to show it very soon. Because this is a very active, and on the back of it there are other technologies, which will come out, which allows the, what we call, the Enhancement Unit Flight systems to take shape and place.

Some of you keep on asking me, what happened with what we asked for a small amount of donations which you made, or loan, or whatever, a few months ago. We became aware of this, this morning earlier, early hours of this morning. They have blocked some of the funds to be delivered back to us, due to the situation we have with the government of Belgium, as you know, over years. Our people in the background are working literally, frantically, as we know where we got all of our things stuck, through other channels to

allow us to bring what we set up to do, the funds back into Foundation, and we can go back to all of our, what we call, normal operations.

As we've seen, when you deal with a devious nation, it can block you years, and create problem years down the line. Now we came aware of this blockage for the what we call, the work of the Belgians. The Foundation will find another way very soon through the operations, to be able to transfer the funds back into the Foundation, that we can at least work with what we have, which belongs to us.

What I would like to do is to answer the questions in a very direct way. If we see what comes and what goes. As I said last time, we were asked to interfere, or take part in the politics side of what is going on in Iran. As I was born in Iran, and still carry an Iranian passport, in the politics of what is going on in Iran. (1:42). And I think you've got your answer today, in how we operate. We do not need to be there, to touch, we are aware we are there, and we bring the change.

In a way, in a very short time, in the coming years you take your grievances to the Universal Council, with the world leaders, with governments. The Universal Council, access to the knowledge of humanity, and the technology will raise the soul of the world leaders. There shall be no prison, except man imprisoning himself with his own physicality to what I call, the shame of his conduct.

In so many ways, you learn to work a different way. Those who act criminal, we do not need to worry we're to build the prison and make it safer. We elevate them and they become prisoner of themselves in how they conduct, and how they do themselves. We'll take everything to another step, and another step and see how gradually we change things.

We are testing a lot of things, we are developing a lot of things. We have teams of different groups who bring different things for the Keshe Foundation, in the background testing, and developing, and progressing. As I said, to those of you who were in different conditions, the Keshe Foundation operation stays Keshe Foundation operation in every aspects. But those who, like the painters and the others who work with us will benefit by our structure.

As I said, Keshe Foundation, through collaboration with doctors in Germany now has opened the facilities for Parkinson, with, what we call, the work goes with the doctors and their supervision. (1:44). Their work with, what we call, Alzheimer, and the work with what we call, we see with a lot of young children, again through doctors in Germany, the operation of the what we call, organizing these things is done by the doctors and using of the technology, using the facilities of the technology Keshe Foundation is supporting them.

If you have such a condition, get in touch with the Keshe Foundation through the standard channels of communication, and we put you to the doctors, and they can look after you, and they can bring the change. To see if the can change can be brought in. We

know that the doctors have started working with the Autism. Once they complete these processes, they will report back to you as doctors. But the same as said, we support artists and others who work. Doctors, art is in processing the man's conditions. As we sell the paintings, or of the artists. We introduce you to the doctors, and if they want to take your case up, they will do, and the Keshe Foundation is intermediary between knowledge and the world of medicine, in respect of those who use our technology 100%.

They've had some successes, we've seen, and the improvement in conditions. So, if you are in that way, if you have other skills we are not aware of, let us know that you can use the Keshe Foundation facilities and the process that you can benefit by it or the others can be benefit by it.

The process which is now set up as a clinic in Germany by the doctors, (1:46). will support in the package, small and cases, till we gradually expand this across the world. If you are, or you know anybody suffering from these 3 conditions, get in touch, and we put you in touch with the doctors and the teams, we use our technology to the benefit of humanity.

Any other question, if you have any questions to answer?

Q: There was a question that I kind of put off because it I thought it might be a medical question. But since you brought up about the medical facility, from Tarik, in the YouTube it says, cholera is spreading widely in my country, is the Cup of Life appropriate? .. So, I said that because of restrictions in our…

K- Cholera is not interfering with the health. Cholera is like Covid, it's the International condition ?? symptom. You need to use about 80% of Copper, and 20% CO2. Use very, very small amount of Magnesium, maybe 1%. Use about 5% by weight of salt, of the Copper and slight, or whatever amino acid you capture over your, what we call, the Copper.

Use the water of the Gans with a very, very small amount of the Gans itself into a large containers, or as a spray, always let it to settle, (1:48). and take the, whatever it is, the food or whatever you put. Wash your, what we call, foods, whatever it is, in the water continuously.

Cholera does not need anything else. It's like Malaria, we overcome Malaria. Many of our Knowledge Seekers in Africa use it. Can you go on the Wikipedia and show us what Cholera is? Because a lot of people hear it by name, but they don't know actually what it is, what it does.

You mix by weight 80% of the Copper Gans. Never use Zinc when it comes to fighting things like this. Because Zinc gives the comfort to, what you call, the material, whatever it is made of. It is, what you call it, you have to understand the difference between parasite, germs and viruses. If you work with parasites, if you work with that kind of level of microbes you need to avoid in, under any circumstances Zinc. So, Cup 1 does not

work, it is not a solution. You have to be able to understand the whole process of what is and how things work. (1:50).

K- You have to, what you call, bring the understanding of it. Can you read what the Cholera is, from the beginning for us, for all of us?

R: Okay, it says Cholera is an infection of the small intestine by some strains of the bacterium Vibrio cholerae. Symptoms may range from none, to mild, to severe. The classic symptom is large amounts of watery diarrhea that lasts a few days. Vomiting and muscle cramps may also occur. Diarrhea can be so severe that it leads within hours to severe dehydration and electrolyte imbalance. This may result in sunken eyes, cold skin, decreased skin elasticity, and wrinkling of the hands and feet. Dehydration can cause the skin to turn bluish. Symptoms start two hours to five days after exposure. Cholera is caused by a number of types of Vibrio cholerae, with some types producing more severe disease than others. It is spread mostly by unsafe water and unsafe food that has been contaminated with human feces containing the bacteria. Uncooked shellfish is a common source. Humans are the only known host for the bacteria. Risk factors for the disease include poor sanitation, not enough clean drinking water, and poverty. Cholera can be diagnosed by a stool test. A rapid dipstick test is available but is not as accurate. (1:52). Goes on to say about prevention methods. Do you want me to continue?

K- No, it's good enough. As I said to you, the reason is, it’s a bacteria, you can't give it Zn because otherwise it feels good and it expands. You use the CO2 to create the connection, you use the Copper, because a heavy element in absorbing the energy of the, what we call, the living elements of it, and it literally has a disinfectant property. As you read there, it's creates vomiting and everything else.

Whenever you vomit you lose large amounts of Magnesium. That leads to the next vomiting, and then weakens, then the next vomiting, and more, and more water you loose. So in this condition, you need to use Magnesium to replace it. Replace the Magnesium lost by vomiting, and then within a few hours you'll see the sign of recovery.

But in general, you wash, you add this mixture to the waters, and you wash your vegetables, and your hands, or whatever, till the situation is over. Because it doesn't have a long life, it has a very short life.

So, Cup 1 is the worst thing you can use. Cup 2 still has some mixture of the, what I call, the Zinc in it, you might not see a good success rate. It's a straight Copper Oxide, CO2, amino acid (AA) of the Copper Oxide and, what you call, slight amount of Magnesium Gans. You should see quite a rapid development in this. It's very much like what we see with Covid, what we allowed to.

Now you need to make a CO2 Gans unit, a Copper Gans unit, and the Magnesium Gans unit. (1:54). If you can't get hold of Magnesium as to make Gans’s, crush Magnesium tablets, if you can get hold up, leave them in CO2, or to your mixture for about three, four hours, maybe a day. Then that becomes itself, you can use it as a Gans.

But make sure you don't, what you call it, consume any of the Gans's themselves. It's always Gans water (you use). But if you use it to disinfect waters you have to use some of the Gans itself. The researches has shown this, this to be very effective in ?? that way.

Any other question?

Q: .. We have new Knowledge Seekers participating in the Keshe family in Brazil and in the world. Could you advise us more about the comparison between the leaves of a Vertical being and the Nano coated plates? We appreciate your attention.

K- I presume you're talking about the absorption of fields. We talked about this many times before. The reason that we absorb, or leaves, or plants absorb energy from the environment, or they create absorption of the material from the ground is. We look at the leaves in a totally different way, (1:56). in reality what they do, not in what we've been told by, what we call, the world of science today.

If you have worked with the Replication Field Cups, in the Replication Field Cups we put the Gans's, we fill up with water, we transfer the energy in. The difference is, with the Replication Cup of the leaf is this. This is a leaf. ... If this is a leaf, a leaf itself is a container, if you look at it 3 dimensionally. With a difference that you have, a Nano layer on this side, and you have a different Nano layer, with a slightly difference, on the underneath side, which is on this side, the two sides of the leaf.

What is in between, even so tiny, is literally what you see as water in this Cup. The difference in the field strength of the face 1 and face 2, allows specific fields to be absorbed, which become the nourishment of the tree, or the plant.

It's the same with the root of a tree. Root of the tree again is that leaf, the thickness in-between the liquid in the leaf, creates a magnetic field difference, that allows the food, between the root and the tree to be pulled up the tree. (1:58). There is a direct correlation between the leaf of a tree and its root.

Here, .. when you have a tree, and its branches and its roots. Here we saw the leaf, having face 1 and 2, in a miniature scale (Nano coating on front and back of leaf create a M field in-between). Now, this in a miniature scale becomes 1 (the leaf) and 2 (the roots), which creates the flow of the sap, and the return of the nourishment, and what the earth needs to give, or the plant takes from the earth. In a way, the border between the earth, the soil, and the air.

If you will notice in your Gans's system, when you put the plates, you see circulation of Gans's. They are in motion. Many of you have seen this. Now, this (the fields between leaves and roots) creates the same motion, allowing the fields to pull, to create the water, the nourishment from, what we call, the earth and the soil.

A Vertical being works on the three levels of the life of this planet. The gases, the water, and the soil. The way we do. We drink, we eat and we take energy in our lung. In our heartbeat system we absorb, with all the circulation of the air which goes in it, we go the absorption of the, what we call, field of energy in our blood and the sustainability of the soul. (2:00) The same thing happens in the movement of the sap in the body of the Vertical plant.

If you listen, if the knowledge of the man goes that far, even the plant has a heartbeat. Without that heartbeat you can't push the sap up. You can't create the difference between the two levels of the leaves and the roots. Again, this (in the leaf) is different Nano particle space, this (in the roots) is a different Nano particle space, the difference between the two creates (the circulation).

This space gap dictates if you get a herb, if you get a tree, if you get a bush. Look at the leafs, the shape of the leaves, it should give you a very clear indication of the position of the life of the plant, and where it is, what life cycle can survive, and whatever. It's one of the reasons plants cannot exist in other conditions in this planet, or in the universe. The correlation between the leaf gravitational magnetic field and the root, creates that pumping. So, when you look at a leaf, look at it as the Cups we see. I hope I answered you, this was explained a long time ago in the teaching of the Keshe Foundation.

Any other questions? (2:02) …

Q: Wang Lyn: I have a question from the Chinese group. He said, hello Mr. Keshe. I remember, you said before, that we don't need a flight system to fly. And I believe we can do it, because it has been done in the East, like in Buddhism, and also are recorded in Bible, such as Elijah ascended to heaven became a fire. But most of this knowledge has been lost or distorted. Do you know anything about this, can you share something with us how to achieve the body transformation through personal cultivation?

K- This is what now we're teaching in the Enhancement Center, for people to do, gradually to understand. People who came in the first sessions of the Keshe Foundation first cycle, as they were testing the systems, now they've learned it, they don't need to be, they can tap in, they can connect.

Now, it's the knowledge which has to be shared. As we heard the fear of what can you do with it, it’s half of that. And the fear of, "can I do it," is the other half. Otherwise, we all have access to it. It's not a knowledge hidden somewhere in books, or whatever. The only thing holding back to do, as we heard, we heard with the couple, is ourselves, the fear we have. (2:04).

Transmutation and transportation has been part of the life of the man, and in a very, very, very beautiful way. But it's been now changed to, what you call, mysticism, is the life of Christ, bless his name. At that time, the knowledge was to be transferred as transmutation of the soul and the physicality, and now it's become when the body of the Christ after some days disappeared, and then they can't find it, and the rest of it. We see the extent of

this mysticism goes into the world of Islam with Methi, which disappeared in the water well, and they're waiting for him to come out.

It's understanding transmutation and transportation, and it doesn't have a space and time. The soul of Methi is the same soul as Christ, Moses and the rest, in different time, position, and the rest. It's the same soul, it's no different. But with more knowledge of the time and the place, and according to time and the place.

So, disappearing, and appearing, this resurrection and the rest of it you talk about, is in a way, what now you learned about your own Soul. The moving in one Unit and resurrecting in the other, that's all it is. You call it "resurrection," we call it transmutation, because scientifically we can explain it, and we've seen it today with the people who've gone through it.

Does, was, the lady going through had the physical body left behind, and resurrected on the husband in the other unit? Feeling her on his lap, and the shaking, she was trying to transmute from the soul to physical dimension. (2:06). What about the other couple, and the others in the past week?

In a way, we are showing you the resurrection, nothing more. But it's on the title of what you can accept scientifically as transmutation. How long would it take you to go from the left unit to the right unit? Milliseconds or weeks? On the way, going from Unit one to Unit two, you have other desires, to go and see the Niagara Falls, to go and see the grandma from last century, you just have a remembrance of her. Then by the time you had your fun, "oh, I have arrived 3 weeks. My grandmother is going to pull her hair out." Or we should disappear, we lost the body and the rest of it? Or, we wait patiently till you do your travels, and you come back and join in. Are you resurrected? Or have you gone missing?

The knowledge, which you've just been taught, or it has been explained, and other people have explained to you in the teaching, is resurrection. In a very plain way. Did we chose the people? No, they chose themselves to be volunteer. Are we going to do something with it? Yes, we are going to expand it that, then it cannot become a mysticism.

Do you resurrect when you disappear, move into an airplane in London, the doors lock, and you appear in New York. Have you resurrected in New York, (2:08). or have you arrived in New York? Just because you brought the physicality, and already imprisoned the soul in it. Now it's the reverse.

At that time you could not talk about the technology, and the knowledge, which is shared today and so openly, millions of you listen to it, and know. You're talking about pure resurrection, nothing more. I cannot tell you, I will resurrect you. But scientifically you can understand, you can transfer, or transmute. Man likes to make different words for the same thing.

So, every man now has the capability of resurrection. But would the soul allow that resurrection? Would the criminal soul be allowed to go to ?? till he ?? cleared his position? Now you understand, and I told you, world leaders we know who can transmute and who cannot. They make criminal out of those who can, because they cannot do it, because of their criminality. This is as simple as I can put it.

What you heard today is a resurrection. We call it transmutation, because we can explain it scientifically. Resurrection in the dimension of the soul, and the other person can confirm the arrival, the emotion of it, the coddling of each other, of the partners. (2:10). And it's in the daytime, it's in front of you. It's not done in the back door close. As I said, one of the Knowledge Seekers was ?? there translating. How can you speak to a body, which is gone, ?? just speak, listens and understand to what you wanted to do?

It is for us to understand what it is, what it is, what it has become. Could Buddha do it? If he reached the level of the lady who was in the machine yesterday, yes.

Yesterday, we just had, what I call, bones and the skin, and when she came out, when we brought her out in the second system, she was warm, because she knew she cannot transmute.

Come to Linz with your partner, and really ?? to know your partner. How much you're devoted, and how much is the reality of the essence of the emotion? Come together and bring new dimensions to the light and life. We need to understand, we need to know, that we cannot be abused in the space by another bunch, who might call themselves the prophets, the magicians, or whatever you want to call it. (2:12).

Learn something from the history of the Islam. In Christianity you hide things in the "holy water." They asked Mohammed, bless his name, what is the "black seed"? Give us a medicine, a way that we, in the deserts we don't have many options. Give us something that has the power to cure most of our diseases. Muhammad said, let me think about it. They come back, and he tells them to use the black seed. If you work and live around the dimensions of Arab nations you know what it is.

Different ways of using it gives different result, different outcome. It's actually a medicine, in that way. Israelis have done so much research on this black seed. They've seen so many different applications for it, it's actually a pharmacy on itself. If you use it, the root of it, the percentage of it, and whatever, for different reasons. He didn't bring a magic, he understood the knowledge.

In the time of Christ people were in what you call it, magic games. So, the holy water came into play and the rest of it, according to the understanding of the people. Now you understand what it is, what it does, and how it is and you're responsible for it. It cannot be hidden between the books anymore. It's millions of you listening. So, call it Buddha, call it Christ, these people understood the work of the transfer and transmutation, and they hid it on the name of religion, and that could give them power. Or, people who understood after they left, they use it as a mysticism to give themselves notoriety. (2:14).

Now we understand, did we resurrect the lady yesterday? Or did she manage to reach that point by herself? In the next step where when we can confirm the condition of the physicality, came that way ?? of it.

This is what I explained in a very, very simple way today. But now you ask a question, I opened it for you to understand, what was the purpose of it this morning. I said that, if when the lady went from that system to the other, left the physicality behind, and the other partner felt (her) arrival. Now she turns up to be different color and shape. Would he still honor her, and love her, the way he liked the other physicality?

Many of you when you transmute from one system to another, don't expect to see yourself the way you are in the other (first) machine. You are you, as the environment of this machine allows you to be. You will see this, whatever we told, we'll show.

Now, the reality, the physicality of the Soul of Christ, in the dimension of manifestation, the way he was, before he goes on the cross, and when he came (down), would people recognize him? So, he could live amongst people. Those who understood, the souls who understood who he is, like his partner, and the daughter, they moved across into northern Spain. Now you understand how it is done. Now it's not a mystery anymore.

When you are resurrected, when you appear, (2:16). you appear on the same condition of the place, the position, and the wish of the soul. The same girl you saw speaking, is the same girl who was half mermaid, half (?? human), and she went swimming. If you listen to what she said in the beginning of her talk. She wanted to take her partner for a swim. Or, that's what she did last time. When she went to Mars she became Martian, and the green people, she calls it, or whatever.

So, when you manifest, when you resurrect, would we look at your soul, or would we look at the physicality? Then this is what I said, when you see the creatures of the universe, look at their souls, not their physicality. This is the process of the Creation, and we cannot do anything with it.

This is the process of Creation in the universe, not here, that you're from a blue eyed, blond mom and dad, you become blue eyed, mom and dad. The condition of the environment you're in, allows you, plus the environment of the womb of the mother.

When you have an interaction between a white and a black, or Chinese and a black, and black and whatever, the environment of the womb of the mother, and what was brought as energy by the father, (2:18). dictates what condition we'll have, or what kind of life we'll support. The black child, the half ?? cat, which is half of energy of the both.

We look at the DNA, we don't look at the RNA. And RNA is the transmutation system. It has to come balance, how you appear in the other position.

The systems are getting developed by Keshe Foundation. In the coming months, we can move you from, as I said before, from condition of the Earth, and set the other system to be the condition of Mars, and you'll see how you will look when we arrive in Mars. Do we accept you still as a human, do we still accept you as you? Or is there, something else has resurrected as a cow, or six legs and 20 heads? Now you understand.

As people could not understand, you created the Buddha and Christ resurrection and everything else of it. Now people understand, we can always ??. We've seen it in the lab yesterday, this week. When you hear in the background, when I speak, I kept myself going two days with a lot of, what I call, Gans's and everything else. But we could not ?? miss that yesterday, and the day before.

We set these things up. The couple, especially, was set up to come in for this specific test. We didn't have time, any other time. And my sickness, and my illness was irrelevant to what had to be taken place. Because it's the time to share the knowledge openly and understand it.

We don't need to go to riots get killed on the streets in the universities of Iran. When we set up a communication link with the Iranians across Iran Knowledge Seekers through the same system, (2:20). in the coming weeks and months, we don't need to do anything. We elevate, we don't punish, we don't kill, we start ruling the nation, through the soul of the nation. But the nation has to be ready for it.

We govern from the soul and not in the dimension of the physicality. And you're all the same. We don't need to go through pains of physical life, when we can just move in the dimension of the soul and enjoy the universe. No Russian gas boycotts, and no food crisis will bring you any problem.

You come to taste new things as the lady did in the machine yesterday. Mix garlic with orange juice and a banana, and see how it comes, that's what the taste is, that's a strange. Now you understand the science, and nobody can deceive you. There will be no resurrection, unless you decide. There is no, "this is my body, and this is my blood." The game-man-ship is over.

It's for you to understand. It's you who decides by the strength of your soul. Like the girls decided to free their mom, or became independent, and the mother felt. Because it was done with a pure intention, and the girls knew the mother suffers. It was received with open arms, and one ?? for the first time walking on her own. . Because they had to wait upstairs while these 4 were going through the test. (2:22).

Any other question?

Before we go to .., please go and sign as Knowledge Seekers for Satellite, and for, what we call, Mobile system, and especially to come in for transmutation in the Linz Center in next two or three months. We've got to get as many as you possible in, that we can bring

a balance, what we call, culture around the world. This time it'll be all of us, and not a few.

Carry on.

Q: << Question in Portuguese Language >>>
… His question is very simple, he is asking, (2:24). in case we do a Gans of a medication, or a food for example, how do we know the percentage of that medication that we need to put inside the Gans?

K- That you have to ask the doctors, we prefer to keep away from this. Doctors who work with the Foundation should be able to tell you. In respect to the food, you provide it, but body takes what it needs from it.

Q: .. He's asking, how can I get in touch with the doctors, please?
K- In Brazil, you have a number of doctors who work. You've got to find them through the Brazilian community. We have quite a few lady doctors in, what you call, Brazilian community.

Q: … (2:26). … (2:28). ..
He was explaining about the experience that he had in the in the eighties, a spiritual experience, where he was in touch with this person, and he was transferring energy to that person, and that person received like a spirit, or something. Where he was able, that person, to speak, that person was able to speak in Japanese and other languages also. He would like to know what this experience is about, and if you can explain about it?
K- I don't understand.
Q: I think he's trying to, that's what he understood. I think he's trying to connect with what you were explaining about the lady understanding, for example, other language after using the units, if that process of that person starting to talk in other language, maybe was the same process as happened with the German lady talking in English? I believe that's what…

K- Yes, could be. Everything is possible. Now we understand it. Everything now, we understand, is limitation of our own, and nothing else. We've seen it, people who try to go through that transition, or try to speak. When they lose that fear, they receive it.

Any other question? (2:30).

Q: Azar .. Maybe I'm wrong, but I said maybe I should ask. When we talk in the past, with all the transmutation, and the prophet in the past they did. The human, the ways born the body, the way the body works. There's so many factors in the body, that we don't understand. But then, from your teaching, in the past, you said we have the Iron, which is in the earth, and Iron in our blood, and the hemoglobin. Then we have the oxygen in the atmosphere, which we are breathing. So, oxygen also another element in our body, part of the amino acid, we have oxygen, carbon, nitrogen, and hydrogen. Then we have the deuterium, in the deep space. And also we have the carbon 14, which is also in deep

space, but deuterium is the fuel of this. But then, the way our body works, and the way we can actually. Actually, I was thinking about you, talk about, when you walk on the planet Earth, you are kind of, like you're in the space already. Because if you look at the planet, it's going around, and you're sticking out of the planet, you are already in the space. So, we already have all these paths to travel anywhere we want. But the only thing is, we're not familiar with it. So in fact, if we constantly, if we can somehow manage the body, the way you're testing in the Center, with transmutation, we ourselves do it. Because everything is there, just like a path is there, but we never used it . (2:32). Now it's for us to start using the path we, already was offered to us, but we never used it.

Am I correct to say this, like we can change the ratio of the oxygen to deuterium, or carbon, and start to travel, and then communicate, and all these possibilities with just managing the elements in the body? I don't know if I've conveyed the message correctly.

K- It is not the elements, it's the field. Elements is in the matter state. To transmute you have to learn the art of working with fields.

Q: So, the field of, the field in the body, the field of universe. So, because when you talk about the carbon, oxygen, hydrogen, these are matter state.

K- You see, it goes back in a deeper way than what you're talking about. In one of the Intros (video), we talked about it in a very clear way, but a lot of Knowledge Seekers just listen to it.

We are made out of the rays of the Sun, and the Sun itself was made of rays of other structures, and other structures which lead to it. So, in essence we have the whole of the Creation to the man.

Because when a star is born, all the physical entities in the universe, which are connected to each other by fields, have a say in what this planet is going to be, and what is created on this planet. So, we are connected to it.

It doesn't need to be called carbon 14, it doesn't need to be called oxygen, or we call it the fields of the universe. Which fields has connected to which, to where, to come. (2:34). It's very much, as I explained before, it's like a power generation. Being a Nuclear Physicist and in the power game, I can explain to you this way, which you understand ?? very ?? I think.

We take the energy, it doesn't matter from nuclear, it doesn't matter from water falls, it doesn't matter from boiling, or whatever. We create that electric current in power stations. We cannot connect you directly to the power station, it can be connected, but it has to be stepped down in the power station.

But, we take this energy from the power station, so many megawatts, or whatever, we put it through the cable lines, we bring it to a substation to reduce it to steps, that it can be transmitted, spread it out, and everything, to another substation, and then to another

substation, and to a little substation somewhere near you, or up the road, that you can link into it.

So, you still can go directly to the power station, the mother, or you can go out to the substations. And that's what the human race is. You're connected at the end of one of the substation, substation, substation divisions of the field of the Creator, which is that major (main) power station.

So, you have the ability to be connected to the power station, but are you there to be able to use the energy, which produces it? When it produces, that energy it has to be consumed. Or if you're weak enough, you get blown up, because energy is so much, because you cannot handle it. The man is in the same process.

You have to learn how to handle the fields of the universe. And that's the key. That's the secret. (2:36). Not if you're a carbon 14, you are oxygen, .. and the rest of it. When you're in the matter state, yes, you explain things this way. That's how it is. As I said, I speak the language of a toddler, and I speak the language of the professor, and both understand. Because the knowledge is same, but it's diluted in different ways.

Do you need the carbon 14? What is carbon 14? It's taking shape in the matter state, but the actions are ?? ?? . What's the difference, carbon 14 as a carbon? Or as a carbon 14 as a Gans? It’s the same, it’s the energy in different ways. One gives a construction physically, one gives the energy interlinking.

It all goes the same. If you hear a voice, is it a joy, or is it a pain? Or is it, what I call, misunderstanding? We hear the same voice, one of us cries with it, one of us is angry with it, and one of us doesn't know what to do with it.

It's very interesting. Recently, Iranian, just listen to what comes out of Iran. The guy speaks about, we have to stop these people, and the rest of it. And a bunch of people say, hooray, yes, blah, blah. The others say, it doesn't matter who it is, it is the same. And others gets angry, even this guy is doing this, and suppressing us, and the rest. It’s the same voice. It creates different emotion according to the level of belief, or understanding, and intellect, in three different people. (2:38). It’s no different in the world of the universe. No difference. Now you tell me ..

Q: Mr. Keshe, I think the reason with the iron, and oxygen and deuterium, these are from old teachings, when you were talking about it. I think…

K- This is what people could understand. Now you understand more.

Q: Yeah, because there's a confusion, people try to use this matter state, to try to figure this thing out. Which in fact, they have to understand the field, and start to feeling the field and get more acquainted with that part. Then trying to look at the physicality ..

K- When we speak about conditions of, for example, carbon 14 in universe and deuterium, we're not talking about electrons, we're talking about the energy fields and how they're connected. It's not that two electrons jump all the way across the universe of the carbon 14. It's the energy, which represents that carbon 14, in that specific point in the universe. Further down it could be the energy of the carbon 12. There's a lot of understanding, you have to look at the Totality, and we have to go step by step.

Any other question?

R: Okay, we have a question in the Q&A. It's still a bit mysterious to me, but perhaps you'll get the gist a bit, if I go through the question.It's from Paulo from the Brazilian community… (2:40).

K- We always get all the strange questions from the Brazilians? They've become a mysterious group.

R: Yes, sometimes something is lost in the translation perhaps. Perhaps we can find something in this translation.

K- It's very interesting, we had a communication with the Chinese group, and they say, they are learning now more about the technology from the Brazilian teachings than anywhere else. So, Brazilians you're teaching the Chinese and the rest. Keep up with the work.

R: They are quite active, that's for sure though. They're probably the most active of the groups of Keshe communities.
K- Yeah.

Q: .. If we are the image of the Creator, and now we have been allowed this access to the science of Creation by you. Then the affections born of reason need to be stronger than singular things, in other words, there can be no more singularity. I ask, what singularity that still exists, would that you like to bring down in the scientific world, so that there can be no more doubts that, finally, humanity has reached the science of creation?

K- There is no singularity. You're still singular because you created the condition of, for confirmation of existence. But you do not exist if the baker, and the butcher, and the candlestick maker are not there. You decide how much you are going to get from the butcher, how much you are going to get from the baker, and how much light from the candlestick maker. That makes your home, and makes your food, and your energy and what you want to do with it. (2:42). So, individuality is decided by physicality and dimension of the strength of the Soul. But collectively you are part of the same thing. You're a brick in the wall.

Any other question?

Q: .. My question has nothing to do with the workshop, but it is important for me to ask. Is it possible that by transmutation, an intergalactic dog from another planet comes down to Earth and has psychic abilities such as telepathy? And what would they be, the characteristics that distinguish a terrestrial dog from a dog that comes from another planet?

K- Does the dog exist on the other planet? Or is “Back to the Future” M field? Possibly there's a dog that exists in the universe, or a cat instead of a dog, or a human, or in essence, the soul and physicality and condition of the environment dictates if it's going to be a dog, or a cat, or whatever.

But in essence, what effect we have on each other is the same as what that dog will have from anywhere in the universe, (2:44). and all of us. It depends how we worship it, or how we accept it as a dog. Because it can bark differently, and can have what do you call it, a smaller, a smarter tail to move.

Any other question?

Q: Dean .. I haven't really got a question as such. I've been listening as I usually do. Thank you for your wonderful teachings and experiences you're sharing with humanity. How do you sense Mr. Keshe, the field expansion beyond the Linz Exhibition Center? Is this expansion still happening?

K- We hear even in one of the last recordings, that people who come nowadays, they feel the fields upstairs, they feel they enter a zone or dimension. As we add more, and more systems, yes. We see the expansion of the fields in Linz, and wherever it might be going. But definitely, the Uno Center is, within that environment we feel the fields, we feel the energies, and people tell you when they come in, they feel it.

Q: Mr. Keshe, so, people traveling from other nations, can they give an energy transfer, a thought of a manifestation, or something they would like to receive, or would like to see? And then when they come to the Exhibition, will this manifestation, (2:46). this matter, can it be reproduced for them?

K- We heard the German couple, one of them was Russian, if you remember a few weeks ago. They are the first couple who are going to the Moon as part of the, what you call it, transportation and transmutation to space, next year. The two decided, before they come in, to find the, what you call it, the Russian Christ, they have a name for it. Or ?? Christ in Russian.

When they came in, when they went through the system, both of them, saw, or felt, what they came here to do. If they would have had that power to do outside (of the system), they would have done it, they would have achieved. But when they came into the system, they understood they can do it, and they achieved it. The beauty of it is that, now they can possess it, they can carry on with it.

Then the connection comes, do you still need the Church and the rest, when you are directly in touch, or see, and feel, and can ask question from the soul of the Christ himself. So, they wished, they came in, they got it.

We had many people who come in and say, we don't want to fly. Yesterday I was talking to one of the Knowledge Seekers who went through the system. I said, would you like to go to the Moon trials? He said, I have no intention of going to space, I'm here just to help the Foundation to extend the knowledge and confirmation of the system.

But if your desire is, and if you come, and you can reach it, yes. (2:48). As a few people we had like this.

Q: If we had any people Mr. Keshe. Do you think, they've come in, that have had completely different thoughts and intentions. That we as KS don't, wouldn't have of experienced before, even the thought the intention? So, would we receive a new communication from something that we wouldn't even know about?

K- Most probably. Most probably, if you open the right door, you come to the right place. Or if you open the door of the fields transfer, or whatever. What is the interaction of the fields, and what you gather from it. What is behind that door, as you call it.

Q: We all get so used to what we see, and touch, and feel, and what our thoughts, in this condition on the planet, and many people love it. However, there are, as you just said, there are many other doors in other places, even within the structure of the planet, so it'd be interesting.

K- I am going to ask you, I'm going to openly ask you something very, very different. Yesterday, when we went through the test with this couple who transmuted, and the other four couples, you were sitting in the control room, playing with your screen, and whatever you were doing. Did you feel anything how, (2:50).what they went through in there?

Q: I get. Now and again, I get. I hear things, and I sense certain things. I sense emotions. So, something. I can't explain it, more than that, really. I do sense some things sometimes, yes.
K- What did you hear yesterday?
Q: To me yesterday, as I said to one of the Knowledge Seekers, or someone present, it sounded like children. And it wasn't, I realized afterwards. But, I get voices of all sorts of different things.
K- What you mean, sounded like children?
Q: It sounds like a child was speaking, but it wasn't. Then other times I've had adults, and I've had other sorts of noises. Obviously being very close to the proximity of the flight room. Then also, I hear, I've heard now and again, I hear other things going on. That's, I don't, maybe an animal, it may be something I don't recognize.
K- So you're in the wind of it. It depends what comes through the open window, in a way.

Q: Yeah, sort of. Yeah. That's why I asked the question, I suppose I'm being led by this one. You know, I'm just, I didn't have a question. But now as soon, as you, it's the usual thing, when you listen to your soul, you just let it come out as you do. You just don't try to control, things happen and it just flows.
So, the question that opened up was, what experiences, what other intentions are we receiving, that we would not normally know about? That maybe present for us to find out, to elevate, to become more?

K- We go through these things a step at a time. We realize things a step at a time. (2:52). We have no choice. Because the soul, which does it. Sometimes we ignore it, sometimes we take it as, nothing happened. It's nothing to it. It's just like the couple, the guy (husband) sitting in the front seat of the transfer system. Every time I asked him, he says, nothing happened, I'm not feeling anything, nothing happened. When we put him back on the chair, he feels the partner and his vibrations, "oh, I have this vibration in this seat." But the interesting is that, even the lady who went through the process yesterday, she tells us she's getting pulled to the left to go to the other unit. All of them. It means the pull, the gravitational field up the other side is so, that, they all want to go there.

Q: So, is it relevant to where you are born in physicality on the planet? Why do you get born to a certain position physically, in a certain nation? Is there any explanation for that?

K- Ask your mom and dad, why were they were in that place and time. Nothing else. Because, don't forget, it's the womb of the mother which creates that condition for that.

It's interesting, because I had this discussion with Dr. Eliya Kostova a few times, years ago. Then I was explaining this in different ways. (2:54). If we create the fields of the same parents, the same couple, and if we have moved the ?? mother from China into England. Would the same, if we could choose the same egg and sperm, would have the same characteristics, as if they were born in China or in England? The womb of the mother is the same ?? egg and sperm the same. But, the environmental fields are different, the food culture is different.

So, our environment has a say in our way, and how, and can never be the same. The mother creates different environment, it's different, she's Chinese, she comes to England, gets pregnant and gets the child. But the pressures, the worries, whatever, missing home, will affect the child. Then, she should have had a child in China. Those don't exists, or we don't think about it. But then other conditions exists. There she has to deal with the mother in law, this and this, then the child behavior ??.

We know this, that children who have an abusive father prior to birth, while they're in the womb of the mother. It could be physical abuse, it could be psychological abuse, many of them will end up with the skin defects. (2:56). Because the skin is part of the brain, it carries the emotion. And the emotion of the mother, which is transferred to the womb, is absorbed by the emotion of the child, which manifests itself in the skin of the child.

Many doctors, nowadays you go and they give you a cortisone, this is a birth problem and cannot be solved. Go back and ask the mother, what was the problem? What was? Why did you suffer? What was the condition of the suffering when I was in your womb? The worries, the physical condition, which was created in the environment. Then you can trace it back where it exactly it comes from.

Nowadays, we see a lot of defects in children, a lot of problems when the children are born. We try to explain everything to do with it. But no one has stood still, go back to the mother and father. What psychological abuses were going on in that house, that now we see the manifestation in the childbirth. This is part of the structure. We ignore it. We always deal with the accident, repairing the car, but we don't try to find out that the problem is the break which needs changing.

So, when we look at how our children are, how we will react, how the society will change. It's what have we created for that society. (2:58). We always deal with the end accident, but we don't touch the source.

Most of the skin problems, most of the. Some of the diabetic 1 is connected with the cycle of the birth, the field that mother has created in that womb. You ?? should look at that, and see what's the condition of diabetic 1. You look at the way the child was born, in those few hours of the birth, when she goes through the birth tunnel, what pressures and conditions were on the child, on the fetus? Then you see the diabetic 1. We try to find medicine for it, but we don't find the cause of it. Then if we can change that condition, we change, we get a person with no diabetic.

This is the same. Conditions, environments we create, gives us the end product. The end product is an amalgamation of whatever conditions you created.

Q: Mr. Keshe, you said that you can go back, you can ask, ask your parents. So what if a parent is no longer in physicality, you can still send the intention, the energy and receive the energy back in that flow?

K- We had a Polish girl if you remember, two weeks ago? They came from London. She came from London. The mother died years ago, the grandmother died years ago. I think she's listening, most probably. She knows exactly who she is. (3:00). She went back to the mother and grandmother in the system, finding out the problem, and sorting out the problem between the mother and the grandmother, while she was there as well.

The breast cancer is on the left, which is a sign of connection to the ??. I said to her, now you understand, let us know if anything changes in the condition of the tumor. You hoped, you could see mom yesterday, or tonight in dreams, or whatever. Now understanding it, you can instruct the soul. You know, I'm going to see my mom today, you tell your husband, take me to my mother. Your husband now is your soul. Take me to my mother, and I want to speak with my mom, and I know exactly what I want to ask.

We have the knowledge of two or three Knowledge Seekers here in the panel who do that, and they've tried, and they know they can do that. They've been through the system, understand how it works. So, you learn the process, and you don't need to wait, one day I dream, I can go to the grandmother to ask her a question. You use the line of communication of the soul and you go to grandmother. If she's busy today, ask then tomorrow if ?? you can do. It's become very scientifically. Everything is possible now.

Q: So, people don't need. (3:02). The flight experience, you can ask your soul, you can ask for the energy, and you can go back and touch, to have this connection, this flow. For many people listening, many, many that are, who are not going to experience the flight as such in Linz, they can still connect and still have these experiences. So, that's the interaction that the, what I spoke about earlier, where the amplification, the, you know, the field strength that is emanating, and going across, and touching much further than Linz, and out further across the nation, and the nations, and across the planet. This direct connection that is…

K- Many, many people who come to us, be there how many hundreds now, they all say it's possible, that they can still connect to the system when they want to. So, they can do. There is no limitation, it's just how to find it, how to connect to it.

Q: So, when they need that connection to an energy source to feed, or to correct an emotion, or to enjoy an emotion, they can connect in any moment.
K- What do you mean by that?
Q: So, the possibility is to. You spoke about this many times and across the teachings, where mankind will come to a position, where it will realize it's always had these capabilities to receive anything in abundance. (3:04). And maybe we are the filtering process, and the adjustments to the field, the energy interactions are becoming apparent that the energy is there, you just need to tap into it and formulate it.

K- It doesn't need formulating, it needs to be understood. That's all.
Q: When you say understood Mr. Keshe…
K- It's a knowledge.
Q: It's a knowledge, yeah. So, when one receives the knowledge do all receive the knowledge?

K- Depends, depends. Depends what you tap in. It is like, one receives the knowledge to be doctor, do we all become a doctor? But this time the doctor is the soul, and everybody has a right to part of it, as they want. It's a complication we created through lack of our own understanding. Otherwise, it was not that complicated.
Q: I see somebody just put in the chat that, "give more to receive more." You know, it's the ethos of the Foundation. So it's becoming that giving situations always…

K- You know, you know, you know the thing is, give more, but don't expect more. (3:06). Do you understand?
Q: ?? … humanity to be more giving, and giving…
K- Listen, you and I know exactly what we're talking about, exactly today.

Q: I know, I know.
K- We, from the Foundation side, we have giving everything within the structure of the Foundation for bringing a huge change. We hope we receive enough to be able to expand, to bring the changes for all humanity.

But it's not that we give more to receive more, even if we receive more, we don't need it, we give it to the others who need it. That's the way it works.

Even today, we are in that position. We have given so much, expecting that it will become, that allows the changes. We are not expecting to get more. Some of us ?? misunderstand, some of us ?? , it's almost become painful, the process. But that's what it is.

It's sometimes a test of time, how, and who we are, and what we are, what we can accept, how much we can accept. What the Keshe Foundation has gone through in the past 11 to 12 months to bring that change, I have aged 10 years in the past 12 months, trying to get this through, because I know it'll bring the change which is needed. But, maybe it's not time for it yet. Maybe tomorrow is, maybe this afternoon, maybe next week. It's just, how much you get tested and how much you can take. I tolerate a lot, and I go through a lot to see it going through.

But, you Knowledge Seekers cannot even imagine what the Foundation, and us have gone through and are going through to see this change coming through. (3:08). We have sacrificed everything. Not sacrifice, we invested everything to see that change. Not just financially, from our own strength, our own patience, our own limitation. But we know it's for the change which is to come, and the time for it. ?? The time, the second is chosen, it's not by us, when everything else is there.

As I said, early ?? hours of this morning, why there has been a delay ?? and it's stopping, but we are trying to find another way around it to do it, to get it sorted. But why did, what happened in the past, and what is there to ?? accommodate the change of it. When we, and I explained, we start reaching the world leaders through the Center. You'll be amazed how we can change things.

We saw the process, we start leading from the front through technology and knowledge. We don't wait for you to tell us who needs, what needs. In the coming days and weeks, we know what Knowledge Seekers ?? will run the Center as a headquarters for one world government. You will understand very soon. To them it' impossible. To us is, as we know, the system ?? work for ??. Then when we tell you, we bring the world leaders, it's when we have done all the work. It's for the Knowledge Seekers and the Universal Council to see what problems ?? we ?? . It's a long…

Q: .. Thank the Creator for your beautiful soul. Like, it's funny how you, as you're speaking now, I feel this warmth. This is like a big fatherly hug and the Sun is just glistening through the ... It's, yeah. (3:10). It's beautiful.

K- We're all in it, we are all part of it. You are suffering, I am suffering, and other people around us, we've seen everything else. But all is not wasted, it is just we are breaking the wall, and that wall needs to become steady so it doesn't fall. As I said, it's time for the mortar to solidify, to dry, that it can be a solid wall. You can't build a building on a concrete which is not dried, then it's not time for it to ?? take root.

We are in that transition. In the past 10 to 12 months, everything has been put in to bring that change, ?? but there are a lot of problems, for many Knowledge Seekers ?? who support us, who work around the Keshe Foundation in past 12 months. But there is no choice, we have to go through it. And I see the future, I see what it'll bring, I see what it'll do. But either way, we are all getting tested for it, within and around the Foundation with our workers, with our centers, everything, with our factories. We are tested to the limit. But it's there, this it's for all the humanity. In a few months time, I'm not there as to do the same as I've done a few months ago. Because of the conditions we set up to bring that physical change.

Now we set up to bring the change to the world leadership from Linz. You will understand very soon, what that Center will do. The systems is set up in it. We don't need to go to the world leaders, we bring the world leaders to accept the elevation of their soul. (3:12). And that will bring the elevation of their nations. Let's see where.

Any other question?

Q: … Is there an agriculture technology device that is going to be released soon? Not the CO2 Gas unit, which can be ordered, or is this one is the same?

K- No, there's a new units we just have. The whole concentration of the Keshe Foundation at the moment, and development, has gone on three specific projects, and mutually we ?? we geared up ?? around the world with it. One is the, what you call it, the new Enhancement Unit, one is the Vertical unit, and one is the Gas unit. The new Gas Unit is a generator. We'll explain that in a future. If, what we're working on now, as just explained a few minutes ago with Dean, takes shape. In the next day, or two, a week, because now we found where that block has been after two weeks of struggle with it. If we can get this sorted with our people. Keshe Foundation will run a program of, as I said last week, sharing the technology on a, what I call, a Blueprint program, and confirmation of a lot of things for world governments and Knowledge Seekers.

This will bring the change. (3:14). This will bring rapidly the change we're looking for. Keshe Foundation will not sell this technology. We keep the rights of it, but we share the technology that we get the, what we call, the benefit of it, that we can support other programs of the Keshe Foundation.

If we reach the point we want to, in the next few days, we will teach you how to make the gas units, and how to make the generation ?? unit, how to feed yourself from it, that you will never, ever in your life need to rely on no one to feed you, or cut your gas supply, or increase the production of whatever, whatever.

This is a promise that we'll keep, and this is part of the work of One Nation, one program. You don't have a Social Security to feed you or to look after you. We make the knowledge available, that secures the social life of the community and the nation, as One Nation. This is the responsibility of leading such operation and organizations like Keshe Foundation. Which means, the way you get programs, and televisions, or whatever innovations, how to make, or how to bake a cake, that if you have it, you can have it, or how to look for yourself in flood condition, or disaster, we teach you how to make these units.

Those of you who mass produce it, your return comes back to the Foundation. Those of you who use it for yourself, still look after the Foundation. And this become the basis for the next generation of works of the Keshe Foundation. We have to secure what we started, and that was the whole purpose of it. (3:16).

In that process, we need to understand the Totality of what we are about to do. We have to secure the future of the Keshe Foundation for centuries to come, not for a decade, not for a ??. And what we've done in the past 12 months is that security we're looking for. Once we establish that security, we will open the books of the Keshe Foundation in every direction of the knowledge, that every nation has an access to it. It's governing through the technology and the knowledge of the man. Not governing by the banking system, and the rest.

You know we've done this before, through the Enhancement Unit, we've done this before through the MaGrav system, we've done this in Blueprints. This time, there is no government to stop the Keshe Foundation. But this time, we have established a Center where the world leaders will come to answer for their conducts, and how they can participate. How they can bring their nations to be as part of One Nation, and what we can serve the humanity with. It's a different ballgame.

In a very simple way we start governing, and to govern as One Nation you have to get everything right, that every nation gets exactly the same, that there are no differences. We'll see how we extend this. (3:18). We'll see how we can allow this to take shape. We will see how we can bring this position as part, as part of the Keshe Foundation work.

You look at the flight system, as somebody moves from one seat to another. We look at the flight system as part of the structure, for you to understand, for perfecting the system, that our people understand, to bring the seat of the governing to the Keshe Foundation.

In the next few months and years, you will understand exactly how we operated. The cuts, the boycotts, the ban on the Internet, what you call it, on the News, has been a beautiful gift to us. That we are doing what we want to do, very silently underneath with the technology and development. But we bring in those who blocked the knowledge for us in there, to become subordinate to the knowledge itself.

You look at the Linz, you're coming there for, whatever, transmutation. We look at the Linz, especially with the tests we've done in past two weeks, that Linz become the center of the governing of this planet through technology and knowledge. We are not power hungry, we are peace hungry. (3:20). You will understand very soon.

As I said, yesterday, we did the first trial, the Knowledge Seeker is here, to tell you that we are there. We brought in, for the first man, the most criminal mind on this planet at this moment, to be elevated yesterday by a Knowledge Seeker. This is governing. This is a seat of judgment of the STM to receive, and not the seat of judgment to punish.

Very, very soon, you Knowledge Seekers will realize what I've done, and how it's done. Very soon the world will understand. The best thing for them was to cut us from the mayhem of being on the News every day, that it could allow us to do our work in quiet, as Knowledge Seekers bring that change, in a very, very quiet way.

This is what I call, a simmering fire, which is about to become an infernal. But with it, it brings peace, it brings prosperity, it brings the equality of the man, not only here, but across the universe. You will understand what I have done, even they create so much suffering. As I said, through one of the Knowledge Seekers very soon, you put Christ on the cross. They put me on the banner of trying to see, if I can actually burn that cross, and bring the knowledge to the man in a correct way. (3:22). But it's the same man. Last time it was a wooden frame. This time it's the humanity as a whole. It will work out, and we'll see the change, (in a)very, very short (time).

You will question the integrity of the soul of the Pope. Then it's the soul, which have to dictate what the physicality has to do. Most probably the time we'll have the soul of the Pope, and the Universal Council within the seats of the Linz, he will resign, and bring an end to Catholicism. We don't need to do it, otherwise the enemies will be blamed. But when burn from inside you will have no one to blame. We do the same with the kings.

Now you understand what I said last week, brings to the fore this week, because now we tested it. We asked you to become Mobile, what we call, transmutation. But now we have used for the first time with the mobile transmutation, one of the most notorious people on this planet.

Now we are establishing the world leaders to answer without them knowing it, they've been called to judgment of their own conduct. As a member of the Universal Council I am there to do the judgment and elevate. The only judgment to them is, how much can we give them, how much more we have to give them to elevate him to be equal to the others.

Now, maybe you understand what is about to hit you, as what I call, One Planet, One Nation, One Race. You looked to move from one box to another. (3:24). We look to see the tests. If we can do, and if we can bring the world leaders into it. Most probably, many of you who've been through Linz have sat in the seat that many of the world leaders will occupy through their soul in the coming days and weeks.

We will not operate on, We will operate on Monday, Tuesday and Wednesday is for you to come in. But the rest of the week is open to us to bring the world leaders to answer to their judgment. Now you understand. Now you understand what is needed, and why the Universal Council has been set up that way. Don't be surprised if you're a member of the Universal Council and we call you to a meeting, just to be present, because physically you might not understand it, but your soul is there to bring that condition.

In a way, we bring the changes to the top of it, and we bring changes to the other side, what is it they need, energy, food, and the rest. Just, what I call, pray for the Soul, support us through your soul, that this blockage we have for past few months gets resolved today, and tomorrow, and changes the course of humanity, because we all have to participate in it.

Q: Mehranez .. Please be more happy. (3:26). Because sometimes we feel your unhappiness.

K- I have a very, very, very bad cold. We tested, it's not Corona. But I suffered heavily in the past few days, and it's not easy. But it still has to be done, things have to be done. I was sad for what humanity is doing to yourself, to itself. In a way, we see the joys of the changes to come.

The situation in Iran has brought a lot of, what you call, unwanted feelings. Because I went through this when I was 19. I went through a revolution, I went through mass murders, and now I feel the same. People don't believe, don't believe in what's going on, because they don't show you. What as head of the Keshe Foundation I receive videos, which I do not want to share. I receive pictures of murders, plan brutal murders, by the Iran national security, some people. We receive all sorts of news is coming out, which touches you. That's why the decision was made to bring that change.

We have interacted with the Soul of Ayatollah Khamenei, he is not alive, that's for sure. We had the confirmation of it through the structure. But that is for the Iranians to sort out. As I said to some of the people who is giving the orders for these murders, the young, educated and the rest. (3:28). We don't take side in the politics, we are not for one side, or the other. We are scientist, and we are looking at what we receive.

As the head of the Keshe Foundation, everything is filtering up to me. I see, the same as at the time of Corona, we could see national security videos coming in from China, with the Chinese wanting us to see how we can support them. Six, seven, ten children put in one body bag, in one hospital. Row after row of body bags with children in it, which was coming out of Beijing and other cities. We close our mouths, we watched it, we watched how people were locked up. They sent me videos how they're dying, with the family dying in their rooms, because of the sealed doors by the government. Now we see the other way in Iran.

I get these, and individually I have to handle it. In the way I was trained for it, during the young time, when I was a negotiator between Iran and the British government, and the Iranian community who escaped from Iran, to support.

But, people say this is all made up. What I see, nothing is made up. When I see youngsters being carried on the shoulder and put on a motorcycle, whatever happens to them afterwards, what you see in the news, or ??. We see these videos before it becomes public, before it comes a knowledge. We see videos which comes right across, from different Knowledge Seekers across Iran, and outside of Iran.

They say it's people paid by foreigners, or whatever. The position is, love your nation, nation will change. Don't kill your nation because the nation rises against you. It is the same, now we have the same problem now in North Korea. (3:30). We see the ?? sense of this in Russia, we see worse conditions coming up in the United States.

But, the only way we can change it is not fighting in street, by battles between Knowledge Seekers, and the rest. But to change the world leaders, the essence of their souls, the essence of what they want, and what we want to achieve. This brings me a lot of sadness. With the high temperatures, and a fever, and everything else, till four o'clock in the morning, two o'clock in the morning, I keep on receiving from different directions, what is happening around the world, and you need a heart of steel to stand this. Because every man falling has a child, is a father, and is a son to someone, and a mother with a husband to somebody else, or a wife to somebody else.

These things has to stop. If we bring the end of the Islam, we are Americans, we are Zionists, we are foreigners. But if we support them, … if we support their souls to elevate they can bring the end themselves to it without anybody suffers, and that's the whole purpose. That's why I brought everything forward so fast.

In the coming weeks I'll be spending a lot of time in the Exhibition Center with the systems, to change only the world leaders and nothing else, to elevate them. And we call upon you as Universal Council members, and the supporters of Universal Council of a given nation, to come in to answer, to question, and elevate your leaders. (3:32).

As Italians, wait, very soon we'll call upon you. You have two responsibilities, one is for the Vatican, and one for your new leader, your new prime minister. We don't want sentimentality, we want that what is pure and can elevate the soul of the world leader. You should have seen what I saw, being in the system yesterday, and the day before, with the Dutch lady. How pain could becoming a joy to give to elevate another man who is a murderer. Then you know why you get sometimes sad. It is just finding the solution for it. Keshe Foundation is not just a factory ?? system, it's the whole of humanity and what has brought us. That's all our private life and everything which goes with the people who are around us.

Any other question?

Q: I haven't asked my question.
K- Yeah.
Q: Thank you for sharing with us here your mind. Thank you very much. That's the history. Maybe four or five weeks ago, I propose to UC Support meeting and some UC's that we absolutely have to have a soul connection for raising humanity and political leaders. (3:34). And at the time, I thought that we can use Foundations product. And I really thought, it's just we put everything on our shoulder, and that's the least we can do with our souls.

Like the Brazilians, beautiful work of the Brazilians. I just wanted to, that we copy that. And then I proposed it also, I let people know that every night, every night, at nine o'clock, European time, we collect our souls, and I'm always here, and we just get a moment, and collect our souls to raise humanity and the political leaders, that they come to the way of peace. At first it was just humanity.

The night after, I dreamed vividly that I'm there, people are coming, kind of I'm attending them, I take care of them. Like the in the pilgrimage of Karbala people, were coming, newcomers and the others were taking care of them, washing their feet, or giving them drink and things like that. So, I was there and these people are coming, and seemed like to me since maybe like me, like Knowledge Seekers, which are with me in connecting soul. And there was one of them who had kidney problem, you know what I mean? And I asked him to wash himself, to take a shower, and he was refusing. And then I wake up, I was tired of all these activities. (3:36). Then I asked the Knowledge Seekers who are close, I said, anybody has a kidney problem? Those I thought, they are with me at nine o'clock. And today, I found that it was probably my own father, but he didn't look like my father. But that's the only body I can see in this image. Just before his, he died, he had also problem of kidney, of course, heart attack.

Can it be possible that in my, just letting myself sincerely in the whole space, I got to the other souls, and dead people and that my father could change his face? Because that was for another goal, I was not connecting my father, when I connect him in my prayers, or in dream I see him like he was. But today, I found that it might be my father, it was shining, and away. Is it possible that he changed his look, because he thought he doesn't, he is not supposed to be here. It's a bit complicated, I just like to find the mysteries of how we can go.

Then I changed the way I was doing. And I put it just to raise the soul of all souls, to be more confirmed with other UC's, and also political leaders to the way of peace. (3:38). So it is lighter now. So, do you think it's a. Why do the person maybe change his appearance, his look? And why I was feeling like I received people, and it was work, it was hard work?

K- This is all what we can translate to our own condition, not necessarily what the reality is. We always look at everything from our perspective, point of view. Maybe in it sometime we find an answer, sometimes we find a solution. And sometimes we interpret how to suit us, in what we know.

This the secret about what we envisage in our own lives. Very few people, very, very few people believe the other way, to put the Totality ahead, or to put something ahead of themselves to be, to bring, to change, or to carry the information to bring the change. This is part of, part of physical life. We don't have this problem in the dimension of the soul.

You see, in the physical life, you get into the car, you go from A to B. Then whoever is at the point B has to accept you, because you arrived. (3:40). You go to the supermarket, you've got to accept, because you ran to the supermarket, you got the other people, and you find your way to them.

In the dimension of the soul, you use different strength to move around. When you do that everybody has to accommodate you. Because there is no point, no spot in the whole of the Creation, which is without fields. So somebody has to give, for somebody to take, somebody has to move to do preposition. It's very much, I always go back to the beautiful job of Rick, with all the magnets on the table. If you have 20 magnets, and one is on the north, the ones on the south don't move, but you can move the north and you see the ones on the east moving. But if we come to the ones in the south, it will move. And the one in the north doesn't need to move.

But we don't see the movement of the both ends, because it's so minute, because everybody has to agree with it. This is the beauty of understanding the work of the creation. This is to understand the cycle of creation. You go to the dimension of physicality, because it's comfortable for you. But if you go into the dimension of the soul, it brings those changes for you. This is what you need to learn.

This is, if you look at the teaching of. The recording of this morning, I asked the, what you call, the couple to reach their parents. One wanted a flag, sorry, a flag is not on the ?? moon. But the other, both of them wanted to connection with the mother, because they had that emotion of connection with the mother, they know the mother is suffering. And the mother has received the message. Because they went through the Soul. Sorry, the flag company was close today. (3:42).

This is how it will be. You want to reach the soul of a world leader, but can you be as cruel as him, to order murder of your people? Or can you give enough to him, that he find the shame to be in the body of the man? This is what the future holds. This is what we have to decide, decipher which one is for us, and which one is not for us, and which one, with it we can do better for the others, not for us.

Any other question?

You've got to look at it in the other way. You know how many families in Russia are suffering now? How many on the name of a soldier are dying in Ukraine. How many have escaped not to be killed, then they left the family, the children, and mothers or fathers to be across somewhere, that they don't want to get involved in killing another.

We look at it, but we don't want to understand it. Haven't we seen this before, called the Vietnam War. Where Americans refused to take up arms and escaped to Canada, and Mexico, and some went to prison for it. They didn't want to kill another man. The name has changed from US to Russia. Those who refuse to take up arms.

How what we change in the world leaders to change that position. In the next few years it will be another country in the same position. (3:44). Why do we see armed Palestinians on the streets of Iran killing people? Because they get paid good salaries. None of the people killed in Iran are killed by the Iranians. Why do we have this in other parts of the world? Or do we have the animosity and problem we have in Palestine, why do we have Palestinians in Iran killing people. If we would have given them a nation and say, would they do such a thing?

What is the next, which country is going to be in the hands of evolution, revolution in the next few months, when there's a hunger and shortage of energy, or something else in Europe, if we get to that point? Some people walk with a gun, some with a voting. We saw in Italy, why people have voted the far right, to get rid of the foreigners, or blame everything ?? on the foreigners. Now the situation is tight.

It's the same policy, just different shape of using the power. A world leaders has to create the right condition for all the people in their nation, and this is what we don't have in our world leaders. Maybe it's the time to end up the leadership, and collectively we lead ourselves to a new direction.

Any other question?

R: I know you want to wrap things up, let's do a couple more things. (3:46). John Wells has a question here, what information do you have Mr. Keshe, about the material I sent you two weeks ago through Telegram, if you want to reveal anything. It sounds very mysterious.
K- I don't even remember. I get hundreds of, thousands of messages around the world, every day.
R: Perhaps he can resend it, or remind you if it's…
K- if it is. I don't understand. Oh, It's just fake news. Yeah, I'll put that as a fake news. I just looked at it. I put it down as a fake news.

Next question.

R: The other thing is, I wanted to tell people about the event coming up that you're supposed to be talking at.
K- When?
R: You don't know yet.
K- I've seen something. Is that on Saturday, the 8th or something.?
R: Yes, Saturday the eighth. That's right, exactly.
K- Do you know, this guy organized and put me in there without asking me?
R: No. It's on number one position, the top left, the professor, the Mehran Keshe.

K- Yeah, he has done that a few times. He just calls and he cannot organize himself. He is worst organized than the Keshe Foundation when it comes to these things .
R: Maybe he just liked your nice suit and tie, it look really good in the left, top left corner there. (3:48). I think they want you, they definitely want you there. So, to let people know that on, like you said, Saturday, October 8, and I believe is from 7 to 8pm, Central European Time. Does that sound correct to you?
K- I don't know, I received this from Knowledge Seekers. He's never told me, I can't remember. But it is one of those guys, who does these…
R: I am told it's from 10am to 11am, Pacific time. So since you're nine hours ahead. Due to my calculations, say it'll be 7pm to 8pm CEST time. I believe that's correct. There's a link to join the webinar, I can put that in the chat here so that people have that. And we'll make an announcement. Spread that around as well.

K- This guy doesn't know. Don't forget, we used to participate in a lot of things like this, and a lot of interviews. And since, the Alan Sterling (pedophile KF helped to put in prison) situation, we are very, very careful who we give a talk, or where we give a talk. We curtailed it very, very strongly to more or less zero, for public, accepting public presentations and that kind of thing. This was important, because we noticed that these people have other, what you call it, intentions. But this one, the guy is just a, what I call, space freak I know. He wants to go to planet Zeus.

R: Seems that way. (3:50). Okay, so people can go to biomedexpo.com, all one word biomedexpo.com. And if they want more information, and you can also register if you want to take in all four days with all these people and their costs, I think $99 US for the four days, that the one event will be free for people to go into the Zoom webinar, as far as I know.

K- Yep. No, we know who this is. This is part of what, we are very careful with. Extremely careful who even we bring into Foundation now. It's because we found out a lot of people coming in, using it, especially the groups to get access and trying to, what I call, butter their way into other things, to get access to a vast network of the Keshe Foundation. Now we are becoming aware. We've seen people even commercializing shareholdings, and that kind of thing, they are using the chats. So we're putting them down now very rapidly. And other aspects of child abuse, and everything else, as we saw. Very soon, because now it's some legality to it. Very soon, we'll open why Keshe Foundation has become so closed in the past two or three years.

We unfortunately we found out that one of the biggest pedophile organizations in the world was using the Keshe Foundation, emerging others together, using the inner connections of the Keshe Foundation. (3:52). This matter now is in the hands of the courts. How the Keshe Foundation was used to, through people who infiltrated the education section of the Keshe Foundation. They were backing ?? themselves up, after we put Alan Sterling in prison. They found another way to get in, which we stopped two years ago.

That's the reason we don't give that much interviews, we get a lot of requests for presenting the technology. This way is better for us, knowledge comes from the people who search for the knowledge, than we going out and trying to bring, inform people of the knowledge. They'll find it out themselves.

One of the biggest pedophile organization in the world, on the back of Alan Sterling, infiltrated the Keshe Foundation, and the matter now is with the courts. Then we open up, once the courts case is completed. How they abused us giving interviews, us giving, bringing people as, even teachers, pretending to be teachers to get access to the database of the Keshe Foundation. It's amazing how things are done, but we learned ourselves. This is, I think, it's the only interview or presentation I give once a year to this guy, or twice, because it's an international structure in US. Anyway, we'll keep you in the picture very soon, what is going on.

Q: Mr. Keshe, just one last thing, about Satellite people, who come for Satellite, or other enhancement. I imagine, do you have a place for people who want to do it privately, (3:54). without others knowing that they are there?
K- What do you mean?
Q: Like, maybe people want to come to be Satellite, or they want to…

K- Satellites you don't come to Linz. Satellite people, you stay in your own country. You don't need to travel. Those who come from transmutation, they come to Keshe Foundation Linz. Satellites you stay put in your homes, we use your structure in a different way. The Mobile people who signed for mobile, we try to move you from your place into Linz, it's a different application, participation.
Q: The person has to fill the application?
K- Yes, yes, yes, yes, yes, it's exactly the same, you want to be Satellite, you still have to register, you still have to pay the fees. If you're what you call, Mobile is the same. If you come to Linz, now, the team in Linz have gone two ways. We have the people who come for transmutation, we had some people in the past who applied just to be part of the trial test of the simulation.

We have separated couple of days to complete those, but each one is different. But we need a lot of Satellite people, it's just strengthening the change. We are setting up. In a way, we are looking for ambassadors, ambassadors of peace. (3:56). In a way we are looking for structuring the opening of a new dimension.

It's not that you become just to be there, we are looking for people who volunteer their soul to spread, when the time comes in the near future, then what comes from us to them, to their own language translation and people. You will understand very soon. We can do that with all the souls of humanity in one go. But as it goes by culture, language and whatever, we have to change the ingrain of the man, and it's only way it's going to be done.

You had enough messengers, none of them managed to do it. This time we do it through the message of the soul, directly from the man. We need hundreds, and hundreds of

Satellite people. It’s the same with the people. For those who volunteered for Mobile, it’s for us developing the technology. There's no other participation in it. But, Satellite people become like the members of Universal Council. They become the arm length of them, in a way, once it's completed. It’s something you need to accept to be part of, and commit yourself to it.

Q: Yes, for example, in Enhancement Unit some people may need some more time, they’re in the middle of something, do they have to cut after 30 minutes or something?

K- We don’t do that. It’s just that with the Enhancement Unit, especially now with the transmutation, (3:58). we spend 1, 2, 3 hours doing things. When you come in for transmutation it's for us to perfect our system, understanding our own system, understanding the limitation of it.

When you, as I said to a couple of Knowledge Seekers who came in for transmutation, next time when they come, please get a train and come to Linz, do not come in the car. Get the bus, or get a plane. Don't drive to Linz, because if you came by .. transmutation, we send you back. Or people who come to us, for testing transmutation, as part of it, we’ll send you back, your car stays behind, what you want us to do with it.

Man creates a lot of debris. In next few weeks we'll get to that point. You’ve got to understand, it's hidden in our work a lot, like today you listened to the wishes of the two beautiful women there, that they send a wish to their mom, and the mom received it. The next time, their wish is I want to be home with mom, but I’m in Linz. There are reasons we do these tests. It's not just we done a test, and mom wished, they wished and the mom. Now they know the location, they know the number. Next time we create a facility, they can go to mom, mom cooks dinner, they can bring it back to Linz, and they can share it with the brother and sister.

This is what we gave to the Americans, (4:00) in the condition of the peace. When we suggested to the Americans, the 5+1 Talks, originally with Obama was, give us an object, we deliver it to you. Get somebody in Iran who knows your work, and then you give us a sign paper, we deliver for you to the White House. The Americans knew, there was no joke.

So, we need people for the things we put up. Satellite people have got nothing to do with the Mobile. If you signed for a Mobile is a mobile, you signed for a Satellite, it's a job for life. You volunteered to support the humanity throughout the change. You’re satellite, you spread. Those who understand your strength, of your knowledge, your strength of the soul in the language. It is a very clear cut.

I know a lot of Knowledge Seekers, I don't want the Mobile, I want to be a Satellite. But can I be? Understand what each one stands for. You can sign up for a Satellite and the Mobile. It's not one or the other. You can come in, taste, then go back. We have people who are volunteering their family, that they want to be on the Satellite, or the Mobile. (4:02).

It’s the same with now, with process which we have started in Germany with the Parkinson, the results are amazing. It’s done by the doctors, Knowledge Seekers who are experts in it. They accept the responsibility of changing, to bring that change. They take that condition up as doctors, and they bring the change, and add the knowledge to it. But they are the satellites of the, what I call, their own, what I call, the knowledge of the medicine. We try to expand these positions.

Very soon Keshe Foundation will be in Uruguay, as one of the major medical centers in South America. Everything is done for it. We'll deliver, and then we process the same.

Q: Steph is wondering. When she comes to do the transformation, and before to visit the other unit to fly to the Moon or some other place, is it the same unit, or are they different units, and can she choose to do both? (4:04).
K- What do you mean?
Q: … She says the German lady. Is it possible when I come for the transformation to visit the other unit to fly to the Moon? Are they the same unit? Are they different units? And can I choose to do both on one day?

K- It can be done, but you have to register for it, and we have to set the systems out for it. If you're going to Moon, you have to already set it up with us by now, as we know. People just come in and say, can you take me. It’s not a .. taxi service.

What is the other question?

Q: .. What can we do to join the Keshe Foundation manufacturing Arizona?

K- At the moment, there is no plan for it for the time being, for next few weeks. We’re working on part of the program, which is a larger scale of it, and then John will announce it through. All our operations, manufacturing in Arizona will be done through Markray. If Keshe Foundation decides, and when it goes into operation of manufacturing, (4:06). goes through our licensing, which is done with Markray.

Markray Corporation, which is a stock market holding, which we already announced the licensing of it. Any production will go through Markray, and will become one of the largest corporate management groups in the US, once we started working on it. Because even Markray is a stock market company. If you go on the panel of it, it says that one of the influential people in the company, it says my name, as a holder of the intellect. We do all operations through, as we have given licenses, and it is in public, all our operation in manufacturing will go through Markray Corporation, as they have been licensed to. They have ?? there are documents, and it has been accepted by the stock market.

Once we decide to go with Markray, we’ll make Markray one of the biggest corporations in the history of the United States. You have to understand, it’s not a claim, it’s the reality. Because if you look at it, like Microsoft just covers the computer. If you look at other companies that covers agriculture, or medicine, or whatever. Keshe Foundation is a

multifaceted organization, and when we give this kind of licenses to Markray, it covers all aspects of the application of the technology, be it space, be it water technology, be it agriculture, be it medicine, be it material. All will go under the license cooperation of Markray. We own 1.6 billion shares in the corporation as it is in public knowledge. (4:08). Accordingly, US Corporation once our beautiful partner John decided, he is the CEO of the company, we'll go that way. And it's set up to go that way, if ??. He is one of the most, what I call, appropriate people, correct people to run such an operation for what, the changes to come. We'll finance through Keshe Foundation operation of the all agreements through Markray, and it's a public knowledge. We have given a license to Markray in US, and all operation will run through this organization once we decide to move on. We hold like I said, sharing controls (controlling shares), and be full applied ??. Markray will become part of the industrial, what we call, revolution for us, in the US.

Q: Is there a center with a shop in London for the Keshe products?

K- No, but it's on the plan. It's on the plan to come up, we're looking at it, we have a partner in this program and he's an expert in this job. Very soon, as I said, part of what I said to people weeks ago, that I'll be in UK, is this structure which is getting set up by him.

Any other question? (4:10).

R: I think we should let you go at this point Mr. Keshe, so you can get some rest.

K- Thank you very much. Sorry a bit of rocky notes. I've got a very bad, deep cold for a few days. But it's on the back end part of it, I'm coming out of it. Thank you very much for today.

As I said, please go on the Keshe Foundation today, don't wait tomorrow, and register to become a Satellite. We've done enough, we will have enough people to go to the next step as we completing, we have, we need a few more people for transmutation in Linz. But the Satellite people are those which really bring the light to humanity. We need as many as, ?? all cultures, and, what we call, ?? life around the world. Don't wait one day, ?? today, and it's got to be done as fast as possible.

Thank you very much for today. Hopefully we'll see each other on the next week. Thank you Rick.

453 KSW October 6, 2022

(Auto transcription from Elias)

Testimonials of Live Flight Tests - Tues and Rick's; Message sent to whole world before teaching; KS Souls landed in Linz; IRSKAR - introduced; Process and sequence of steps of how Man was created on Earth; fingerprint of Earth in the STM; Psychosomatic; P a mirage in U - not vision of man; Man gifted eternal life like Soul of Mitra; Health teachings cornerstone Creation; System ready to make Soul child; "Soul of Christ" added to soul of Mary's son later; Vatican to wipe KF off Internet by Christmas; Children of Moses save the Change; STM & STP seen explained; Switch between souls; Artificial human being; America Rothschild's benefit by Ukraine - WWII condition;

Topic Index

Live Flight Tests this week - we were allowed in Flight Room; 2 people in one seat test for beautiful people - schizophrenic; 1 Soul manifesting multiple Souls & bodies - same womb; First time KS sees STM and STP leave body - aware of P; Our bodies are hybrid - S and P; Mankind working for billions of years - Change come at right time; STM and STP left body cold - call back; If arrive in China - look Chinese; Get used to changes; Systems will show if someone is from UC; K sent message to whole world before teaching - lifted off ground - receive love of Creator - enlightenment; Mankind making FS himself - not from aliens; Becoming captain of own Soul; Man won't be able to lie in front of system; Rick's program - sent objects - Rick and Jalal Souls went to Linz; Changes in Iran since Dutch lady elevated soul of mass murderer; Understand the power of your Soul; Man's mistakes of billion year have to be corrected - put right for billion years; New systems far more advanced than present one; CERN trapping plasma - wrong way - release it ask soul of plasma to show itself; Like mother bird nudging chick to take flight; Love withdrawn from Iranian clergy - result in a week; The power of STM has been released; New organization to support artists and intellectual research - have to give back to KF - protected by soul; Knowledge has to be accessible to whole planet even animals and rest - no more elite groups; True life of Soul starts when you leave system in Linz; Satellite Souls to spread knowledge across planet; Share fields equally even with creatures of U; Testing this week to wake up the STM - he has awaken; Bring creatures from outside into system; Have to familiarize mankind with other creatures to prepare for January flights to Mars; You could manifest with 4 heads and 20 legs - shocking; Man to spread knowledge of Mitra across U; Lease for Vatican is not renewed;

No way to stop process of the change; No more patents - free sharing of knowledge; KS who sold products are asked to give back to KF - Soul punishes by psychosomatic; New Institute IRKSAR - KF to promote artists and intellectual research; Detailed long teaching on how man was created on Earth from its fields - not brought from outside Anunnaki; Process of the sequence of field interactions one step at a time lead to creation of man; Others who match field strength through the soul can manifest as a man here;

30% of earth's population not from earth; Man carries fingerprint of Earth when he travels U - they can see by fields where you come from in U; New System can tell where soul comes from - create conditions of other places in U - watch body revert back to human; Travelers of U in black skin - came here at time of original man - races of man mutated later; Change of planet instantaneous; Short lifespan only a habit of thinking; You can mutate within yourself - call psychosomatic; Psychosomatic discussed ; U both exists and does not exist - We live within it, and it lives within us; No theology it's a fact; Physical condition is mirage but only in fields of universe - not in vision of man; We are beginning and end no time in-between; Within solar system 365 days is 1 year, but in same solar system 1 year on Saturn is 29 earth years; Physicality is zero time; Soul does not age, but the physicality does; Soul created from physicality is prisoner of physicality; Soul created from Soul is free and chooses to manifest physicality - It's not the same thing; Children of Mitra are of Soul - everlasting; We will give man the option to have everlasting life in the Universal Community; Souls helping we brought with us to see the change; The moment of the change started when Mitra fell in love with Earth - been working on it; Many more changes to come to planet; System is ready for couple to have children of the Soul; The 3 Souls together decide where to go - child is free; Health teachings with Dr. Kostova cornerstone of Creation; Organs have emotions related to Soul - micro in macro - galaxies spinning opposite like kidneys emptied into Unicose; Man has chosen to be blind; Situation has been solved today; Tribe of Moses protecting KF from Vatican and Belgium's who plans to wipe KF off Internet by Christmas; Soul of Moses putting right mistakes of past- will bring Islam and Christians with - to the change; Definition of plasma; STM has also a soul - comes in a set; Explains how man will be ready for change - like students in a classroom ; Mother Mary and Fatima of Islam - do they have same Soul?; "Soul of Christ" added to soul of Mary's son later; Same Soul in Moses, Christ - Methi; Elevation of Soul is just to mature class 1 to class 2; They will handle the media - need little time; Huge operation of Vatican Belgium's to wipe KF off Internet by Christmas - legally and permanently; Children of Moses protected; Brazil Testimonials - Knowledge is spreading; Unraveled pedophile's secret banking system; If Internet down teach through STM; Canadian lady switch quickly between STM and STP - weight change on scales - because of Detachment; Artificial Intelligence - brain - and human; Man decides how to use; make flexible muscles like humans; Truth about Mary and Fatima not revealed; Vatican responding to elevation of Soul by KS; America the sole winner in Ukraine - put Europe under World War II conditions - all fuel, food banking - benefits Rothschild's;

ENGLISH TRANSCRIPTION

(:12).
K- Yes. Good morning, good day to you. As usual, whenever and wherever you listen to this is of Knowledge Seekers of the Keshe Foundation Spaceship Institute knowledge sharing. We thank many of you who've been with us on Tuesday and Wednesday. Some of you missed the Wednesday, because we joined, we linked up as part of the live testing with Rick's workshop. It was literally a workshop for many of the Knowledge Seekers (KS) who are around with Rick, and many others to test the new knowledge. In a way, if

you were with us go back to the part of the Wednesday with Rick. It became a public testing zone.

As you can listen to the recording, we brought your inside the what we call, flight test. Your wishes, their wishes, their decision, and the people who came in, the three Canadians, you will know one of them was a comedian. It was a beautiful job that we did. And we learned a lot.

We tested something which cannot be explained outside, (:14). but maybe you can understand. We have the capability to accommodate two people in one seat. We asked the Canadians, the couple who came, they're both very thin and slender to join each other on one seat, where the one partner sits on the lap of the other. But both within the confines of what we call, the same what we call, Head Unit. This was an important test. One of the final tests we had to do to confirm transmutation of the "beautiful people." Where we make one body join together as we see it, but 2 souls. To see how they react. To see if the 2 souls work independent.

As we had the beautiful people in our systems, we see one body with a number of souls operating entirely, where the human race is now ready. But then we hear new systems in the coming time. Each soul speaking for itself. We see a collection of lights within the system.

And the beauty of it is, in the coming time, we'll see, as we done in many other things, what happens when these beautiful people decide to open up. One decides to go to Germany, one decides to go to Brazil, one decides to go to Australia. What would happen to the division of the physicality, where the common soul exists within the matter of the Soul of the Physicality (STP).

These are proof of what is to come. When we open it up again, (:16). in a couple of months time with the new systems, which are under development and production. We will see ?? not one souls light. We will see a number of soul lights. Then, what would be our reaction? We see people we've never seen before. But they're all from same origin, from the same mother. It's like the mother giving birth, at the same time to one Chinese, one black, one white, one Australian, and one South American from the same womb.

We are not used to it, but we are, we have to get prepared for it. Because with the tests of yesterday, confirmed to us, we can allow, we can give room to beautiful people, to show themselves in the essence of themselves. They are not criminals, got to be confined into sanitarians, and mental Institute's. Where we should have been in there, and let them free to live their lives. We are the criminal, not them.

We saw for the first time .. this week (Tuesday Live Flight Tests), when one of the Knowledge Seekers watched her own Soul, and the STP leaving her body. You were doing the tests with us (you were watching it live), when we explained it. And then she asked herself a question in the matter of the physicality (P), "what am I doing here when

they come?" For the first time, we've seen the departure of the 2 (souls STM and STP), could clearly explained by the KS.

These technologies are in a way, hybrids. (:18). Hybrids of physicality and energy of the man you call, the Soul. You buy a hybrid car, petroleum and electric. Now, man for the first time can see, can operate, can feel the hybrid system he is made up.

The beauty in the testing of the past few days has been an amazing cycle of changing. As I said, with what we learned in the past week, two weeks with the flight systems (FS), we had to change all our systems in production. And as our guy said, we are delayed by another two weeks, maybe three weeks, now we have to implement a new understanding.

We have all the time in the world. Mankind has been ready for this, has been working to this topic, for billions of years. What does a few more days, a couple of weeks, will change? Not much. In the coming time, when is the right time, will come exactly where it should be. Even these delays are preset for us, to get that time. It's just waiting for the game to start. A little bit of delay, but when the game is starts, man will be the front runner in the game of the space travel through the dimension (D) of the Soul.

What we learned this week from our systems is, one after another. Last week we saw. We saw the fly of the Soul and STP, and even the combination of the energy of the physicality, like that, leaving the body. We had just a body on the table. But knowing what we do, the way we build the systems, we can always recuperate from it. We got the KS back in its position.

The beauty of it is, (:20). that now we gained enough knowledge. We have enough technologies in our hand, that by introduction of the new systems, which are coming into Linz in the next few weeks, we go directly for transmutation and transportation (T&T), make a few tests in the center, and then test across Mobile systems, and Satellites and what we call, trans-planetary system, where you can go from Africa, to China and our people in China can confirm online, that you are aware of. You might look Chinese when you arrive in China, but you carry a paper to show how you looks, when you're back in Africa.

It's a beautiful thing, if many of you have not seen or heard of. When you travel from Ghana to China, you see Chinese who speak Chinese, but then you see blacks who speak Chinese better than the Chinese. The Chinese community in some cities have a number of black Africans who live in China, have children, married into natives. And they learn the language. When you go to the Chinese Embassy you see a black man talking Chinese behind you is another Chinese, with another black man. You just go, wow, what have I missed?

It's very much like when you have a psychological, or some sort of brain lock, that you expect certain people to speak certain ways, but not this way. When you live in England, every time I saw a Pakistani in England they spoke English. But you go to Italy, you see ?? they speak Italian ?? ?? speak in English. (:22). How can we be a British colony. I

left a long time ago, I don't know England. And then you have to reset your brain. Pakistanis can speak Italian too, and accept it.

It's a change of understanding, and this will come to all of us in the coming days and weeks and months and years. Not only we have to accept, we can be in speaking, as we saw last week, the girl could speak fluent English. Before we had a heck of a time getting her even to understand English.

So, we are in for a bigger surprise. We are looking for the Chinese who speaks in the native African language, but that's nothing. Now we have to understand the language of the Universal Community. We have some Knowledge Seekers who claim they come from Universal Community, and we, all sorts of things using the Keshe Foundation. But soon you will see if they are lying , or they're using the Keshe Foundation, and ?? excuses ?? to make no ?? We see that in the Iranian community. This is ridiculous to see how things were set up.

We will see the true essence of the knowledge. We will see the true understanding of the knowledge, and then you'll understand what is to come. We heard yesterday people not want to eat. We transmuted water. We sent packages. We received packages, did it arrive? Some in different shape or form. Some people guessed. Some people from the control room flight center, sent material to other Knowledge Seekers, in live with Rick. Some received something, (:24). Some were too shy to say what they received. It's the emotion, it's the field.

I want to ask you all today, now it's about 9:27 Central European Time. Exactly about two hours ago, I send a message to the Soul of all the humanity. I wondered if you felt it. The energy and the message were so strong. That I literally lifted off the ?? floor of the Enhancement Center. It means if you are ready, you have received the message. You have received the love. You have received the knowledge.

Go back and see, did you feel anything in the past 2 hours. As one of the Knowledge Seekers says, I just had for few milliseconds, just the taste of the chocolate. Did you ?? receive the taste of the love of the Creator. Then you are ?? enlightened. Then you understand the change is about to come. Then you understand the humanity is ready for transmutation, transportation, and many other things, that the man needs to do.

In this process of change. In this time mankind has become ready to accept the change. We are just the tools. As I said, if the aliens as you call them, have brought you the knowledge, and this was a knowledge of aliens and just imported. (:26). Now the machines, systems are made by man and the man has excepted, has to accept has no alternative, has no option, but to understand its mature by himself. Man has matured that he can make this system, and through it he can make and understand his own creation.

If we would have given you a UFO, it would have been, "they came and gave the knowledge." This time we transfer the knowledge through Linz, we build it here by man, that the man becomes aware of his own advancement, understanding of the knowledge

and the technology. We have not brought anybody from the aliens, from outside the space, to build these systems. It's made by man, for the man to understand the evolution, and revolution in science and technology, and evolving to understand the science of Creation.

If we would have brought it, and gave you the system, and I could get you to see what other things. You all would have been what the Christ did, resurrection of the dead. By this time you're getting, you're seeing, it's made by man for man. And that's the change, as we said all the time, the change has to come within. Because, otherwise man goes back to the donkeys and to everything else he did centuries ago.

When you build the most beautiful motorway on a beautiful land, if you leave it, it goes back to the land. But if you build it, that it is used and nourished it will be a road, a destination for rest of the life of the man. And this is what we do. We allow the systems to be made by man, we teach man, enlighten man, (:28). and then as it is made by man, all of you come in, and you sit down. Just think what you've done in past few weeks, and past couple of days, you've come to see the marvels of achievement of the man.

Before you went to watch the skies if the Wright Brothers send their information, that you could see something in the sky. Now you have to see and feel this flight of the Soul of the Man (STM) through the systems, which is made by the man. You cannot see anything flying, but you can see the flight of fancy, soul of yourself. The change is fundamental.

This time we bought the change, that every man has the opportunity to achieve that goal, to become the captain of their own soul. As I said, nobody can decide. When you sit in this flights room, and you watch, and you see, and you ask for people to do things, you'll see in sincerity who is the true lover. I watched many couples and I can tell you, who was really in love with who. And who is in there because he has to be. There's nothing hidden when you sit, when you stand on my side of the system.

Remember, when we ran the tests in the Inzano, I told you many times, I watched my own murderer lying to me. The man who planned to carry out the murder. I just needed to ask the question ?? in the system and their soul showed. We see the same thing in these systems. Nothing has changed between systems in the Inzano, and in Linz. (:30). But this time it's more sophisticated. It's made much more elaborate, but in a way, much simpler.

We see the lies between the couples, we see what people lie to us when they're in the system. We see who really loves who. And in what essence ?? We watched the most beautiful love relationship between the two girls you watched, coming and explaining. That love is so pure, that man wishes for it. Even though they are 2 girls, two beautiful women. And then we watched the couples who've been together for 40 years, and ?? the distances to Moon to Earth ?? But they've been together for 40 years.

We need to understand man cannot lie, through the source of ?? ?? And we see the changes. Hopefully, in the coming week or so, we will come to the Keshe Foundation in

a very different way. We prepared the whole of the humanity for the change, what is to come, and how we can accept the change.

We've seen in the teachings of the Tuesday, the Knowledge Seekers collectively add to promote the Soul of the World Leader (WL). One in defending the faith, and one in trying to be aggressive with their faith. We saw Putin defending the Russian church, and we saw Pope, trying to be as it is, stealing and thieving and lying is the job of the Vatican. We need to sit and watch and see how these two world leaders in the coming days and weeks will change. (:32). If you as Knowledge Seekers (KS) truly worked with it, have managed to them.

As I said, last week, we had one Dutch lady who did not tell us in the teaching, in the testing, that the picture given to her on the mobile phone, she thought it will be Bill Gates, or somebody else on the Thursday, on the when Wednesday test, or the Tuesday test. But in the German teaching last Friday, she said she saw the figure of a Middle eastern Arab. In fact, the picture, which was on the seat, she elevated, is one of the most notorious murderers in the state of, nation of Iran. She felt the pain, and then she could elevate. In the beauty of it, we brought ?? parallel flag of Iran in the Linz Center down, until we know the state of truth-ness in back in the state of Iran.

And with it, we have seen within days, the change, and the talk within the administration, compromises are on the table. But she wished for peace. She wished for elevation. Elevation is for them to realize the murders they carried out.

In so many ways, what we saw with the elevation of the soul of one man, which ?? and according to the government, he is the main key in the murdering of the majority of the Iranians on the street, did not come by sentencing him to Den Haag, or the rest. He was served ?? ??? sentenced ?? given by a very old lady from Dutchman. The home of ?? (:34).

You have to understand the power you have, the ability you have gained through the elevation of the soul of ?? man. Sooner or later, you have no choice. And then you are. you cannot abuse, because in abusing, you abuse yourself. In trying to be aggressive, trying to gain something through what is not the correct way of the foundation of the life of the man. You'll be the one who will be losing, not gaining.

As I always say with the Rick's magnets, the one in the center is the Creator, and the wars you can create, the more you be pushed to the outer edges of the ?? ?? There is a ?? is very simple. When you plan the wrong way, you release the wrong direction, and you move ?? out ?? The whole purpose of the Creation is servitude and nothing else. It doesn't matter how you look at it. Welcome to my beauty ?? I hope you enjoy it.

In the test of this week, and in what is to come, you will see a new evolution in science. You will see a knowledge, which the man accepts, in the gradual introduction of past few years, that is our knowledge, it belongs to us. It is part of what we need to do, and what we have to do.

Just because we learn the knowledge, and we can make the system, does not mean that we stop working. Actually now, we have to work much harder to change the mistakes of the past. And man has made mistakes for billions of years and million years on this planet. (:36). And now it's time for him to correct all those mistakes of the past. And then man will be busy for a few more billion years to correct the past time.

It is not our work to punish. It's our work to elevate, as you've seen it yesterday and day before. We went to the meeting of Rick's teaching yesterday without any notice, that they were not people there preset to come, to be. They were there the Knowledge Seekers, 70 - 80 of them plus. On one channel, which we always use for our posts, Knowledge Seekers, and we saw the change, we saw the difference, we saw what it came. How some souls are loved by some, and how some souls are elevated by some. And how man puts himself forward to be ?? me. When man should be the last one in the queue. Let it be.

We observe the emotion of the knowledge, the transfer of the technology of the soul, not mechanical systems, which are made. In a way you went to the churches to find your soul, and pray to the temples and whatever name you believe in, to find elevation of your soul. Now, you have systems which can do that. You cannot come in to steal, you cannot do this to promote yourself, and you're not the gauge, "oh, I was this size, and now I am this size, because the next second, you can be "no size."

Mankind will learn how to use these systems. (:38). Our team is edging to the final stages. We still have a long way to go to complete. But the interim system, which is coming up and you will see the new 4 systems, which is come into the exhibition center in the coming weeks is another revolution to the whole technology.

To you it might not look like anything, but it's literally a donkey work, on the one we have here, to a Rolls Royce and a rocket technology to what is to come. Even our own people who have produced it, have not realized what they are in for.

We are transmitting between the physicality to the dimension of the fluid plasma, and in a very easy way. You will see for the first time the plasma power generators will come into operation. Not to produce electricity, but to produce the currents of the plasma, the plasma level, which man has not even understood. You're still busy with trapping your CERN, and Tokomak. You have not even understood, you're going the wrong way up the road.

There's so many directions, and so many understandings, man has made a fundamental mistake in understanding the process of the creation of magnetic fields. Instead of releasing to show its power, they trap it, and they squeeze it, to get power out of it. This is where the whole knowledge has gone wrong. The whole process of understanding has gone wrong.

As I always said, I remember in Barletta, the Knowledge Seekers from Spain was sitting in the front row with his wife, squeezing his eyes and body trying to move the item, the

object in front of him. I said boy you have not learned. Sit back, you relax, (:40). and you just s, "it would be nice to see you move, if it is your pleasure, to please him ?? You will see the object to move.

You to show, to see the beauty of the flight of a butterfly, you have to let it fly. It will not show its beauty, it's locked up together and sits. This is where the man has not understood the knowledge of the beauty of the Creation. When you let the soul go, it shows its beauty. Not when is trapped ??.

This is why in the EU you come in, we keep on encouraging you, go, go. It's like the mother bird having a little chick on top of the high tree, and encouraging the little chick to, take the flight, take the flight, nudging him to corner. Jump off, you'll be safe. This is what we are doing in the EU. We're just nudging you. The soul bird of the man, just try to go to that other unit, just jump. Just try to see if you can jump, and see if we can land safely on the other side.

The nest is ??, it's time to take the last flight, the last time you come back to the nest. Take the flight of the fancy to the Universal Community. My job is done, that little nudge, "just try to go to that unit." I leave it to you, whenever you're ready. Just to see, you've been the little bird, you all twist to the left. But, oh no, oh no, what happen if I fall. You need a few more days. Take the courage to jump. (:42). ??. in a few ??

One will take that flight, as we saw with the couple of this week. And there is much to see what would it be if I land there. Some of us like the Canadians come in with their passport in our pocket. And if we go, at least they know who we are, where we land. We are Canadians. It was beautiful to see our Canadian friends with their passport in their pocket. But they were not ready.

It is interesting, if you look at it. It's the same system, we set everything the same. The beautiful German couple, in each other's lap, hugged, to cuddle. And the others just wish, " I couldn't feel anything." Because you have not established, you have not learned, you have not understood, that it needs to be a true love for both sides to agree.

We've got to understand, that we are in that process. If you go back to one of the old Intros we had, when it says, the man took the wings and jumped off the bridges, and buildings, and mountains to see if he could fly. Some lost their lives because, they got it the wrong way. But this time there is no loss of life, because it's your soul, and you can be brought back in. But you learned, the mankind will learn to be kind, (:44). mankind will understand to be safe. Mankind will become the beauty of the light of the community in the universes, and not just on earth. But it's mankind who has to learn. The race of the man has gone through the harsh destruction, destroying and being proud to do so. Then blaming the others for it, that what I'm doing is for your sake.

As I said to the Iranian leadership in the past few days, let people decide. We took weeks ago the love of us, from the clergy of Iran, and within weeks we saw what happened. Go back to my teaching, I said, "I have disconnected from all Iranian administration, because

of the injustices." Within a few weeks we have seen, and they will not be there very soon the way it is. They might stay, keep a turban, in the mosques. But the power of the Soul of the Man has been released. We don't take part in politics, but we dictate the Soul of the Man. They cannot find enemies within, because the only enemy is within themselves.

In the coming days, in the coming weeks, in the coming months, we'll see the same kind of revolution across Iran.

In the coming weeks and months, we will see the establishment of what we call, peace, and how things will go, (:46). and how things will take shape, and how we will see the transformation and transportation of the Soul of the Man.

You'll see how Knowledge Seekers gradually start testing. What we did yesterday, with Rick and many of you online, many of you go and listen to it, it'll be listened in the future. We started to show you to be there, to be part of, to be your soul, in how you need to come in. In a way, we show you the theory and everything else in this teaching. And part of what we do the workshops with Rick, brings you to sit and test the reality, and practicality.

In a way, with two arms of the teaching and testing with Ricks teachings, and what we do on Thursdays gradually we'll come together. We see we don't need Blueprint Days. Wednesday's is where we test for how far humanity has gone across this planet. There were people from 20 - 30 different nations and nationalities, races and creeds, in past two days on the Internet, on Wednesday and much more on Thursday, on Tuesday. In a way, the teaching has been for One Citizen, One Planet, One Nation.

This will go through in a different way. We have brought in, we will announce in the coming hours, the establishment of the new organization, (:48). which allows the understanding of the correct conduct of the man through the souls for his knowledge, technology and science. In a way, you cannot cheat anymore.

In a way, you don't need the patents anymore. In a way, you're responsible for what you do in the correct conduct of your life. Then we'll see what will be the next move. We'll see how the humanity will change. In the coming weeks, as we go for transmutation flight systems and transmutation systems in the, what we call, Linz Center, many of you, many of you will come to be, to see, to be at.

As I said to the Knowledge Seekers yesterday in the flight zone, Keshe Foundation will ask the government of Austria to point, what we call, an immigration officer in the Keshe Foundation Linz Center in the coming days. The same will be the first immigration officers in United States, as the first man to fly in will be an American. They have to stamp his passport that he left the nation. When he comes here and flies back with us or with public transport, he can be endorsed, that he has entered his own territory. All these things ??.

We are ready to go to that step. I have already discussed with our team in Keshe Foundation to start the work with the Austrian government, to make the center an international, what we call, arriving center. We cannot start the transmutation, we cannot start the mobile system unless we have the full support of Austrian immigration officers within the center. (:50). When you land, and they confirm they've seen you landing, they can endorse your passport, that you still are not here as an illegal immigrant.

This is the next step of the work you will see in the coming hours, in the coming weeks, and days as we go along. In a different way without you knowing, we tested this yesterday with the Knowledge Seekers within the system, and with the Knowledge Seekers in Rick's workshop without you knowing what ?? ?? we monitored the background, which souls has arrived in the center, and who has already, with the pure wishes arrived.

We received two soul within the center. One was Jalal. I hugged him ?? and thanked him. And one more Knowledge Seeker arrived, which is Rick. He arrived with us, in a very short time. It was easy, as we noticed.

Now, you have to learn how to manifest yourself when you arrive, how you leave the life of physicality behind. If I would have accepted you in the system, I have to explain to the immigration officers, I have a body ?? but I still cannot send back ?? (:52).

The process is literally as it is. You don't need huge instruments and machinery to transmute the STM. You can do it within the structure of your physicality. The most important part of our work is not to create magic, it's to create a science, and from it a technology that cannot be questioned. It has to be in parallel with the full understanding of the Totality of the humanity, not just for a few individuals, that we create again the priesthood, the lies and the cheats of the past, "we are the few who has access to it."

It has to be accessible by the dog, the man, the cat, the fish, monkey and the rest. Elevation of the soul has to be in Totality, not a ??, not an elite that the man become the king of the animals. As we destroy the kingship within the man, we destroy the kingship within the structure of this planet.

We do it by ourselves and through that we understand the mistakes of the past. We come to understand the future of the mankind. We come to be part of understanding of Totality of what we can do. (:54). One cannot overrun the others, one cannot override the others. It's a condition and it's accommodating.

In the yesterday's test we clearly indicated it, and it was tested for that reason. In a way it became much, much easier to be. We asked the Knowledge Seekers in the flight room to choose someone to come to Linz. They've chose one person. Rick's team in the workshop, we had a woman volunteer. Because I knew who they chose, I said to them, no, you cannot it's got to be a man. But the soul of the woman has already moved on, because on the receiving unit, when we had two people, they both felt a woman with

black hair. The lady is a Spanish, she's black hair ??. But that's the emotion, on the receiving unit, the two received.

I think they talked about it, maybe in the interview afterwards. Which means we cannot override, we can receive it, and man cannot interfere with the truth, the one who wants to give. The giver is always a giver. Then if we want to receive. Because I'm the receiver, on the sending side of the unit, nothing else ?? more. These little things continuously confirms how the systems are set.

As I explained to the Knowledge Seekers when they come out, to most of them, (:56). how the system works, what it is, the structure inside the room is explained slowly, slowly. At the beginning we were very conservative. Now we explain a lot of things to the Knowledge Seekers, they understand, because from now on they are part of the system, they are part of the structure to change for themselves.

As I said, your life starts, the true life of the soul, starts the minute you leave. Not when you leave, you end. Many of you will practice, many of you will try to see if you can do. But don't forget, this is an experiment. You have to learn more, and more, and be persistent to understand your soul, not somebody else's.

In a way, we give you the soul of the system, we give you the soul of the knowledge of the man and you just try to go. We've seen many strange things, but in a way, in line. We've seen Knowledge Seekers who come in that, I have to be in control, I have to understand, and they go empty handed in the knowledge of the physicality, but the soul has already reached the elevation.

We've seen people who come with aggression, and they are there to be, I came here to fly, you fly me. But sorry sir, this is the flight of the souls, the physicality has no room. You abuse enough outside, you think it is your right to abuse when inside, ?? we are in your soul. Your soul will not allow it.

In a way, as I explained once, it cannot be any more hit and run accidents. Because when you hit, you will have to stay there and sort it out. (:58). Then you find out, I don't want to be in any hit job. And this is how the man will change. You cannot run away from what you set up. But you are there to see why, you have set up. Why am I here.

I always said, I'm the judge, the executor, and watch what happens. But the judge and the executer as a watcher, not as a doer, as a judge and the executer (executioner). I watched how the people who misconducted, and how the people did wrong, then claiming to be perfect, then claiming somebody else is mistaken, then claiming I didn't do anything, all played back for themselves to balance their books with their souls. The process is very simple.

The time of hiding behind the curtain is gone. Because there is no curtain to hide except of your own ignorance. Ignorance of not knowing everything is on display, and can be played and it is there to be. We work to develop a technology, that can prove the science,

that there is no mysticism. There is no more those who were in the temple, those who were privileged to be made the temple, and then they became the abusers.

The technology will be displayed in front of thousands, tens of thousands of people, hundreds of thousands of people in the past week. It will become a cornerstone for billions of people to watch to learn. (1:00).

Yesterday, the day before session, was not there just to prove the technology. But was there for those of you who became Satellites, to accept the first position of ?? you, before you knowing it. The spread of the knowledge.

If we come to you with a preset mind, then you set your mind to do so. When become the way we come yesterday and the day before, those of you who accept the position of Satellite have already started spreading the knowledge through your soul. Your first test was done without you knowing it.

In a way, we triggered the engine, we just wanted to see how it will go. This is why we ask as many of you to become Satellites Many of you to become, that are there to support, to spread. You think when you become a Satellite Knowledge Seekers, is what you give to other Knowledge Seekers, or citizens of your nation or your area. The soul of those who became Satellites, because it's chosen by their soul and transmuted through physicality. It's what I call, the psychosomatic condition of life. Those souls who accept that position, will do the same across.

When you have a satellite, the satellite does not distinguish between an Apple mobile phone, Samsung, or another operator, or another company, it's just, it's job is to receive and equally distribute and reach, (1:02). that if an Apple calls it can transfer it to a Samsung, and it's not for Apple exclusively.

Those of you who became the Satellite, and your soul chose you and you're still adding to your numbers, of that beauty, your soul is not beauty in the elevation of the STM only. The ?? area is ?? what you've been trained, so is the cat and the fish, so the tree, and so the stone. Now you understand why we asked for Satellites.

It's very much as I said if you listened, as we asked for Universal Council members, it's your Soul that brings you to that position. Don't wish that, "I want to become a Satellite, " if the soul is not ready for it. Those who became Satellite understood, because there's another dimension to it. They become the satellite even for those who are from not this planet, but they are here as a man. But they understand through the soul level understanding. None of them ever listens to Knowledge Seekers teachings.

You become like that, in the ?? head of Islamic ?? the speaker on top, shouts for Islam, and the rest of the village and district know, your soul is in that. Shouts, and everybody hears. And he shouts Islam on top of the, (1:04). what we call, Mandan ??, the Jew, the Christian, the Muslim, Zoroastrians, the dog, the cat, all hear the same voice, and it depends which one names that voice, or what it means to them. For the Muslim it's time

of devotion to go to the mosque, it's a time to pray to creator. For the Jew, oh God, not them again, at least we have the last one a few hours. And for the Christians is another meaning, and the other one, and the dog says, "this noise again."

It is understanding the reason why you became Satellites. And many will become Satellites. The voice, the Soul of the Man, and as I said to the Knowledge Seekers, if we send it through here, you're in another position. And like a wind, this will go across, one to another.

The process of the testing this week was done specifically to, in a way, to awaken the STM across this planet. And it's woken up, that we could feed it today, as I said, two hours before the teaching. Did you feel anything? Or it was just another day? The soul has received it, but the physicality is still in a dream world. (1:06).

In the next few weeks, the Keshe Foundation will go in depth, of the development of the technologies that we become immediately, what we call, ready for transmutation and transportation. One of the targets of the Keshe Foundation in a very first trials will be, manifestation of the creatures from outside the planet, that we start familiarizing you with what it is, how it is, and how it looks, and how it will be.

It will not be any more just trying to get you from here to there, it's to familiarize the mankind that when you start the, what we call, planetary system flights in January, February, you're already familiar with people you might see in the space, the creatures of the Creator. You don't get on the line to the soul of the mother, mom, they have 20 legs, 15 eyes. Have you looked in the mirror? You look the same, because you're in the same environment. Mom, I have 15 eyes and 20 legs. Mom says, don't come back home, you think I am crazy. I send you a picture, this is me, but on planet Zeus.

We have teach you, to train you to become, to understand what is to come. Then man is ready to spread the knowledge of Mitra in a correct way across the universe, to the children. As I always said, I was born a Zoroastrian, I will die a Zoroastrian, because the beginning and the end is the same. (1:08). Man has brought different names on it, but Mitra always said, Do Good, … This is the principal we created the cycle of, what we call, life on this planet. Man chose the physicality. Now we have brought, what we call, correction to, not prison, but the freedom.

Thank you very much for today, and I hope you learned that today's teaching was this weeks teachings, this week workshop with Rick, this week's live presentation that you are part of it. In monitor how the bells in Vatican will ring, and how what we hear from Moscow. You still need to elevate the other two, and some worked on Charles yesterday.

But when you handle with, or you work with residents of a house, you have to speak with the owner of the house, what will happen to his residency. This is why we brought in the Italian Prime Minister, the owner of the house and is, what I call, "rented tenants lease has come up in Vatican. It's time to give back to the nation the property, and start a new life, for those who understand what this means. The lease of the Vatican was not renewed

this time. Now, it will go back to the owners. (1:10). We take the stones of Vatican back to the Coliseum. And you do it as Italians, not as ?? ??. But this time it will not be animals and men killing each other, but it'll be what I call, the arena for elevation of the STM to see the Universe and the Universal Community. Not as animals, but as equal souls. Rick take us to a break and we'll come back and carry on with the second part of the teachings.

<<< BREAK >>> 454 KSW October 13, 2022 (1:19).

K- Thank you very much. I hope we learned a lot from the first session, or actually continuation of all teaching of this week, as a team, as a Knowledge Seekers, and we learn more and more to come, as we have to. We got to accept that the man has moved forward. And there is no way to stop this process. As we say, the cat is out of the bag, and we're moving forward.

In the process of last week's workshops and teachings, and everything else, which went with it, (1:20). we have learnt a lot, and we're going to add to it, we are going to increase this knowledge. But as I said, there are a lot number of things which we have to, now knowing what is to come, to structure. You saw part of this structure, as we knew it's going to come, in the past years by simple things, like the launch of the, what we call, Keshe Coins. Soon you will realize what was the purpose of it.

On other hand, now one of the biggest problems with man has been the pride, and being proud in the knowledge, in the skill, and everything else which is left, that he has to be his. For this we have created doers, cheaters, and thieves and the rest of it, and we brought it under the condition of what we call, the patent. A man, only pays if you put something in a patent. A man only accepts if it is in patents. As the Saudis said a long time ago to the Americans, knowledge is gift of God, and there is no patent to it. So, Saudi Arabia is one of the few countries who does not respect patents, at all, and it's a house of God.

In so many ways, man has to respect another man's knowledge, man has to respect another man's skill and work, and with it, man will come to understand what it means. You don't need to hide, and copy, and steal, and go. As we've seen with many Knowledge Seekers. We put this out deliberately as an open patent, (1:22). we put it openly to the Knowledge Seekers and see how they respond. Now, today we will show you where you are not succeeding, and where you trapped yourself into.

If you remember we told you, whatever you have, whatever you do, don't forget those who put in the Foundation, and if you learn from others, that they developed, for them to put. Keshe Foundation today introduces a new criteria, which is to do with the soul.

If you sold so many goods, and you made so many things from the Keshe Foundation, and you sold it, and thank you very much I've got a new car, I pay the bills, and you didn't put anything back into the Foundation, you're a thief. Now it's the payment for it. Now you understand why some of you suffer with a lot of divorces around the Keshe Foundation. Because you stole from the soul of the Foundation. And we work in that level.

From now on patents has no meaning. But the respect and work within the, what I call, understanding of the soul of those who participate, is important. That's why we opened our patent.

But, hiddenly, we gave you the freedom to do and saw how much you lot abused it. From Germany, to, we've seen in other parts of the world. You keep on suffering with it, because you do it in physical life, and you think your cheated, "it's ours," you didn't put anything back. Then you find out you're still suffering, because the soul brings you psychosomatic punishment, as I call it, but in different way.

Today Keshe Foundation launches in a new Institute, (1:24). which is more or less universal. From now on, man will respect the intellectual rights. Man will respect the researchers for what they research and they develop, and man uses it. Man will respect the know-how, that another man has created and shared. Man will respect the skill, which means you have no knowledge, you have no patents, but with your skill you developed a new thing, that others can benefit by it. You can't patent it, but it is a source of your life. From now on man's respect artisans, those who through their art bring. It doesn't matter poet, painter, glassmaking, or whatever. For that reason, the Keshe Foundation today will set up the basis for, what we call, intellectual research, know-how skills, artisans rights. This is the new pattern of work. But this time it's done through the STM.

For that reason, we set up an organization, and Keshe Foundation will push with this through in a coming time, what we call, IRKSAR, which is in the initials for the Intellectual Research Know-how a Skill and Artist. No one is left out. Even a poet, even a writer is an artist. We'll push with this institute forward, what we call, IRKSAR. We'll move it forward with no condition. (1:26). We'll set up a platform on the Internet that you enter your skill, you enter your artwork, you enter your intellectual, you enter the research you're doing, without the fear that somebody else might take it, and you get no benefit.

But this become the right for those who use it to in a way, if they benefit by it, use it, they put back into the researchers, the people with the intellectuals, the people who brought the know-how. We don't put any limit. But there is a minimum limitation of, let's say about 1 to 3%, if you make something, that you can put back to the artisans and you use

his work, to add your work to it. In a way you cannot steal anymore, because your soul is aware of your stealing.

Some of you will put back in, as a lot of Knowledge Seekers did 9% and 19%, and when we came to be ?? question, we give to the Foundation. How many of you lasted? How many of you are still struggling day by day? Because you stole. Now we make it free, that there is no stealing, it's your, and you understand it, and you follow it. It took a bit from the Keshe Foundation, you saw that another Knowledge Seekers and added his knowledge, and became something else, and you used it to make something, that you make your living out of it, both the Foundation and the man who added to it, has to be looked after, through any means possible. Then there is no one to watch, there is no court to do.

Soon, this will become the patterns of the international corporations, you will see what we put in plan. We do not go out that way. But you will see gradually we'll take over the patents, because patents are not respected. Because it's a matter state condition of ?? force. (1:28). But with this new structure, every soul will be aware of his own conduct and to look after. It's your job, it's the job of your soul to understand. You haven't crossed somebody else's path by thinking, "oh, I'm doing it behind the doors, now I sell a few pieces here and there, nothing to do with me." Now you understand why you're still struggling. Have you seen the thief enjoying the theft fully? There's always a ??.

So today we launched this institute and structure. Soon Keshe Foundation will support computer centers, for everyone to enter their rights of the intellect, the research, know-how. And without expectation for return, but those who use it will return to it. Because, put it this way, now you know the punishment is bigger than the prison and maybe a court case. The punishment of your own, not to elevate. And this takes away a lot of the stoppage and blockage in the world of development of the man. Not hiding behind papers. But being open, the way we did, we set the scene from the beginning. We opened our patents, we opened the knowledge, we shared the knowledge, even today's part of that knowledge sharing. With the hope, that we will see what will bring to the others, with their knowledge they can add to it, and it goes back.

We saw a few weeks ago, one of our beautiful Knowledge Seekers in France brought what he did over two or three years, with the wines and vineyards. This week he wrote to me, the first harvest is ready, can I send you a bottle? (1:30). I said to him, asked him, if the Keshe Foundation can support, and promote his work across Keshe Foundation network. That we are not the wine merchants, but we want to show the technology can be used for the different applications.

Rick, if you can go on to the Keshe Foundation store. For the first time, we have put out an artisan sculpture. It has gone on the store of Keshe Foundation. You can see it. As I said, we start supporting those who use the technology. It's the first time we have promoted, what we call, an artisan work, a sculpture. We'll see many of these, the same as what we did with the paintings. We brought in the paintings, it has been a huge success. That's the one, exactly on the right. This is called, as you see it, it's done by the

beautiful Italian artist. If you are an artisan, it's your right, we are here to promote. The same, there are the new pictures, which is coming, and there are new pictures which are coming from different artisans, different painters, different things that will go across. This is what we are here to do.

We are here to promote different application of the technology, in different ways, how the fields of this, what we call, artwork will spread around you in your home. You have this in the center table, and you have two pictures on the side, or whatever. You can see the whole room is balanced and distributed. (1:32). But it's not the object, it's showing application of the object, the technology, what it can do, what will bring. The same with the new paintings, the new paints are getting more beautiful and more sophisticated as the artisans are sharing more and more with us. We'll see how things will take shape. You make glassware, what happens to it. You make pottery as you're seeing, we are there to promote.

Everything goes back to its origin. You bring a new technology, you will see the use of the technology. It's time to show different aspects and developments of application of the technology. Many of these artworks you see is already sold. With literally, by the time we get the artwork, receive it from the artists to us, by it's own, it's already mainly sold out. If you're an artist, if you are an artisan, if you are even a writer, we look at your work. If it has to do with our technology we promote it. Because everything else which is outside, sooner or later somehow will find its way to the application of the plasma, and that will bring the change. So we stay, what we call, not ahead of time, but in time and in line with Knowledge Seekers to spread the knowledge. (1:34). Enjoy it.

If you have a skill, share it with us. And when we set up the new website for you to put in, the skill you have developed and what you can do, be it anything, in how it can help, and other ones come and read it. Then they can participate and sharing with you, and spreading the knowledge. Thank you very much Rick. There are some gorgeous paintings which is coming in past two days. And they're amazing. Go to the store and look at it, because they're trying to keep it updated. As I said, we even have one of our Knowledge Seekers who commissions paintings, for him to be done with Gans's, and now it's sent away, the first set. You can commission your own work, what you want, and the artist around the world will paint it for you.

Any questions, we can answer?

R: Okay, how would artists get in touch with the Keshe Foundation in order to do works like this, or they have their specialty? What would be the best forms to use? Just email?
K- Just go, what we call, the Keshe Foundation different ways and contact us. The usual ways.
R: The info@keshe.foundation, or any of the usual places I guess.
K- Yes, because now we have the manpower in the background to look after the most of the emails, and how we respond, how we expand it.

Very soon, hopefully, very, very soon if things go the way we like, (1:36). I mean soon with us it's like six months a year, not tomorrow, Keshe Foundation will open its own, what we call it, IT center. We are in the process of, what we call it, working on it,. In wonderful working on it, it's been done for some time, where we have our own servers, centers zones, what you call it, very much like Microsoft center of the Keshe Foundation, everything is under one room. The designers, the what we call, the programmers, everybody under one roof. This has been quite ?? for a few months, and hopefully once we can complete it, the Internet Center will be high speeds, everything is in it, all the servers, everything is part of it, it comes with all the facilities in the building. If we manage to conclude that, a lot of things will be done by the Keshe Foundation directly. Where at the moment we rely on a lot of people in different parts of the world to do it. We centralize it with the computer center. Then we go to the next steps of how to take the other steps.

Q: .. There's speculation about who seeded humanity on Earth, the Anunnaki and evidence of giants depicted on Sumerian tablets. Mr. Keshe, who seeded humanity?

K- The Earth itself, the condition of it. That few degree angle (tilt) in, what we call, axis of the Earth, creating the four seasons, (1:38). created a combination of fields, interaction, production, and these fields somehow, through the balance common denominator, interact with each other.

Once the condition was created, the water, the oxygen, the hydrogen and the rest of it, then what came in it, is a different story. Life of a planet, life of a structure has sequences. And scientists have not understood the sequence.

You cannot produce Gans's if you don't get the plates, if you don't get the box, if you don't get the water, if you don't get the salt. You can't have Gans's if you buy the plates, buy the salt, and get the water, but you have no container. You can't have Gans's if you have the container, you have the water, but you have no salt. So, life is the same. It has to be, and it comes in sequences. When one is done, then the condition of the position creates the next one. It doesn't matter where you are in the universe.

The rays of the Sun lead to the Creation of amalgamation of some of, its own back to itself, absorption of whatever to itself, led to Creation of the Earth, as a matter pieces of plasmas. Interaction of the fields created the gravity, interaction of the gravity and M fields, receiving and giving, created the dimension of the planet. In dimension (D) of the planet, now you have fields which is a loose bullet in the fields of the, (1:40). what we call, Solar System. You've got, as I call, a knife on the edge of a fast rotating, spin stone, it creates sparks. Those sparks are different around, not all the same, big one, long one, short one, oxygen, hydrogen, whatever. Now you have a container, now you brought the water in, you brought the next condition.

In that process of the knife, running against the rotating wheel, you created other things, you call it, the Zinc, and Copper and the rest, and the salt and whatever. Then in interaction with each other within the oceans, the right temperature and condition, you

cannot produce Gans's sometimes in minus 50 degrees, even though they're produced. You have to have the right condition, then you create the right Gans. If you can amalgamate those Gans's, as you've seen, you create rotation. Then you create some of your life. This is exactly what happened on Earth.

But when you have the Earth, you created the salt, you create the water, you created even the sand and the soil. If there is a matching structure across the Universe, which can fit to this, can survive in this, it can replicate the ?? self within it. Go back to the teaching of years ago, when I spoke about the shoe crab (horseshoe crab).

Origin of the life of the physicality of the Man is the condition of the man. The origin of this Earth. What happened with the STM in interaction with another physical dimension, which was matching the condition of the Earth, if the knowledge is transformed and transmuted to the Soul of the Man or the physicality of the man? That's another condition. (1:42).

The race of the man we see today is not the only one. Initially, when the Earth was created and the condition came right, there were thousands of "men similar thing" (species of Man). The one which was a stronger, started dominating, and that is what we see as, "man of today." Even if domination was spreading, he spread himself into different colors and races.

So, what's the origin of the man? The origin of the man is on Earth, it's from interactions of its own fields. But once you create a condition, the other's which come in, and they can live within it. That's why 30% of the population of this planet is from outside, not from here, because they can live in this condition. But they're not from Earth. As I always said, we have a beautiful Farsi words, it says, "whoever has a mustache is not your uncle." Because all the Iranians have mustache, and you have a lot of uncles, god help your grandpa and your father.

So, we have to understand, that life is not exclusivity, but life is created out of the condition of exclusivity of the interaction of fields of this planet. So, where did the man come from? From Earth. Where did the man, will go? Again, from Earth, because he's got the fingerprint of the soul of the Earth. Up to now you looked at, if you go to China you look Chinese, if you went to South America you look South American, if you went to the North Pole you became something else. (1:44). But you've got to understand the soul common denominator, the soul of all ?? are the same.

But the Creation is subject to the soul of the planet. So, we all have a fingerprint of the soul of this planet within our soul. We have a fingerprint of the Solar System within our soul. We have a fingerprint of our galaxy within our soul. We even have the fingerprint of this universe in our soul. When we go to the other universes, when they look at you, they say, "oh, this is from that universe in that galaxy, they're in there." That the fields you produce, you see the separation.

Just listen to what we said earlier on today. The lady saw the first light and then the second light leaving the body. She can distinguish between the STM, and STP, and her own physicality. It's the first time we get aware of it, where we can understand it. So, if you see that soul and the second soul. That Soul is the STM, and that soul is the STP of the condition of where the man comes from. Then you see the soul of the planet.

If you leave Earth in the point of death, you carry that fingerprint with you. If you position as a new soul, as a new star, it's in another galaxy, or another universe, you carry all the fingerprints of where you came, through the field interactions.

Now you were doing the tracing of the man came. If you go to United Nation's website or another site, that they trace your ancestors, where you came, then if you've done it, he came from Europe, he came to Asia, you were black man somewhere else.

It's the same way, now you know in the dimension of the Soul, through the strength, and color, (1:46). and the interaction of the fields you're attracted back to Earth, from which galaxy, from which universe, from the rest of it.

It's just because we didn't have the knowledge we were not aware of it. Now we are aware of it, we understand. So, life of the man, man from Earth started from Earth. Man from other parts of the universe, being a man, we accept him as a man. But in their souls in the dimension of physicality, we can soon know where they are from.

There is a beautiful thing with the new system getting built. Maybe for the first time we can disclose it. You know we've said before, with the new system we can create the condition of Earth in one, and the condition of, let's say Moon in the other system. But at the same time, if we bring the man, … creatures of the Creator in one of the systems, they bring with them the environment they live (?? environment they are from). It's not what we control anymore. So, we see their environment, we see what they're made of and how they are put (together). Then we'll see their conversion back into human body.

A lot of, a lot of travelers of the universe are in the black skin. It must be a surprise and shocked, but in time you will see it. Because when they came, they came to the origin, original source of Creation of life on this planet, and not on its mutation (other races are the mutation of blacks). (1:48). Go back to some of the teachings of the past three, four or five years ago. I explained this when I was sitting in a cafe in Ghana, when I saw them and they tried to hide behind the lift. We see the original races, not the mutation of races. Then you understand, life originated on this planet according to environment of this planet.

Any other question?

Q: Dean .. We have in micro and macro. When the process starts for this change, this condition. So, we're asking for the elevation of the souls and we're asking for peace on the planet. So, when the Satellite Souls take position around the planet, does this process

start in the moment? Is it a generational thing? (1:50). Is it a gradual process, or is in an instant, in a moment?

K- Everything with our work is instant. Because you don't take your flight to get somewhere, you already entered it. You're always there, you see people coming out of the flight zone. They don't say they saw going, they just arrive at a position. It's instantaneous. Because you live in the dimension, you travel in the dimension of the fields of the universe. Life of the man is too short. What is to you a hundred years is a microsecond to another creature. So, it's instantaneous.

Q: To that creature though, Mr. Keshe, you have that many, in many life forms on the planet where they, you know, they have a life cycle that is very short. However, that's what they know. So they're content with that, they're happy with that situation, because they know no other.

K- Yep.

Q: That is a situation they come to understand, and then to move them from that position. So when we have a belief, we have an environment, that we've become conditioned to, how does that condition become, like you've been doing for a long time through the teachings, how does that condition expand out?

K- It doesn't expand out. This is what I call, the "schizophrenic condition of the man." We think one is hidden, the other ones cannot see. (1:52). When we leave the physicality, because we ignored all the time the energy side, which we call the Soul, it doesn't mean that Soul has finished. This is the beauty about understanding the full truth about life of the man.

You go from one condition into another, but in both conditions, you have the capability of the mutation within yourself. We call it psychosomatic. What we do psychologically somatically, physically appears. But we never understood there is a somatic cycle. What we do psychologically effect us. We understand it, we talk about it, but we always consider to stop at the brain level emotion. But we haven't understood, this field goes further to the soul. That's where it effects your life.

When you have a psychosomatic condition, you have to see it as the body of the man. So, a somatic condition has created that psychological condition, that leads to another somatic condition. This is the part we never wanted to understand, even though we are fully aware of it. (1:54). Now we are responsible for that somatic, because it's actually somatic, psycho, Soul, and then back to somatic, psycho, or psychosomatic.

Q: .. So, does the universe exist? Or is it just within us? Is there actually outside of us?

K- We live within it, and it lives within us.

Q: So, trying to move to this universal position, you always talk about going, leaving the planet. If it's within us, we don't go anywhere?

K- In a way, yes, in a way, no. Because there's no time, place and position. That's what we call it, "zero time." How can it exist, when it doesn't exist?

Q: How does theology explain this? How do you get around that …

K- There is no theology, this is the facts of life in the dimension of motion of fields.

You've noticed in the flight zone. We get people going in and coming back with nothing (happened). We put them back into the system again, but this time we tell them what to do, and they come back and they enjoy it more than any other time. They create that time to enjoy. Then they deny themselves that time to exist. (1:56).

Life even in the physical condition is a mirage. But mirage of the fields of the universe, not mirage of the vision of the man. The sooner man finds out, the sooner he find out it's, we are the beginning and we are the end, and there is no time between the one and the other.

It's very similar to what we call, one year on planet Earth. One year for us is 365 days of rotating. In the same Solar System we have huge planets, which will take them, their one year, as one year of us, much longer. Now you try to fit in one year of the man into one year of the other planet. What is the cycle of one year for Saturn, Rick can you find out? Now look at this, this will explain. Now scale it up, one year in our Solar System in the galaxy, and scale it up one year, our galaxy in the universe. (1:58). And in the scale of one year of our universe in the Unicose.

R: Saturn is 29 years of Earth years.

K- Earth years. So, if you lived nine years on this planet, you live nothing on Saturn. You didn't even move from your infancy. But in fact you existed 29 years in this dimension. When you're 60, you're only two years old in Saturn. But you're still in the same frame of time of the Solar System. Sun hasn't changed his position. So, when you go up, to scale it up, time for man at this time is zero. We are living in zero time in the dimension of the universe or in the Unicose, but we're so proud to live 60 years or 80 years. Time then doesn't exist.

Q: So, getting this message across Mr. Keshe, that in the physicality everybody enjoys that 60 - 80 years, whatever they have, that in the physicality. However, the eternal soul, that soul can be present in any moment, in any position, time in place?

K- Yeah, but you have to understand that cycle of one year on Earth in the physical dimension, and one year in the Universal dimension, which makes physicality zero. Is the same in the dimension of the Soul. (2:00). Soul does not age, but the physicality does.

Q: From the point of its creation?

K- From the point of its creation. That's why it says, "I made man in the image of myself." Because it's Me there as you see, as I am here.

You listen to people, you record them when they come out. They don't fly to go somewhere, they just go, and instantaneously are there. Yesterday we tested with the people with the chocolate and other things. Yesterday we asked people's soul to be, who wants to be, to go and to come.

It took instantaneously for. Actually Jalal arrived before Rick does. Jalal is in Northern Europe, Rick is in Canada. But they more or less arrived at the same time. This is the change we have to. Physicality takes time in the space of a physical time. The Soul takes place in the dimension of the magnetic field time of the universe.

This is why, if you understood in the past few years, we speak about the children of the STM, the children of Mitra. (2:02). Because now when you create the physicality out of the Soul, it is everlasting. It comes from the time of beginning to the end. This you haven't realize what it means. Knowledge Seekers just listen, but they don't fully comprehend what is involved, what is about to come.

When you create children in the dimension of physicality by interaction of the male and the female, a sperm and an egg, you create the dimension of the life on this planet. He has a lifespan, and he has a limitation to that lifespan. When you create the children of Mitra in the dimension of the Soul first, you are part of the life of the Creator. It never ends. It's the way He was created.

Q: Is it not the same though Mr. Keshe, that when you have a child in physicality you create the soul, so that soul is the same, is it not?

K- No. It's different. When you create a child with the physicality, he is a prisoner of physicality, the Soul. When you create the child in the dimension of the Soul, it's a freedom of the Soul, physicality to be accompanied with. Then you can take shape anywhere in the universe.

You take the man into the water, which he's not used to, he dies. You take his Soul into the water, it's still the same Soul as is in the air, in the water, anywhere in the Universe. This is what you Knowledge Seekers have not understood, what it means the children of Mitra. Everlasting life in the dimension of the Creator. (2:04).

And she is amongst us now. She has been born in that dimension. She was created in that dimension. Even though (she) has a physical manifestation.

This is what is to come. We give man the option of everlasting life in the Universal Community. Not when your time comes up in another universe, "opps, sorry, it was a flash of light." Because physical life was set on Earth and to 29 years was (finished). You

don't even take time to get the first breath and your life is over, if you travel in the dimension of physicality. Or we are on the way for billions of years as our scientists tell us. One hundred million light years, what a rubbish. One hundred million years of ignorance, not understanding the process of Creation.

Q: Is this why the Universal Community do not show themselves?
K- Partially. Do you go somewhere where there's a riot, mayhem and killing? Or you avoid it?
Q: Me personally, I avoid it.
K- Me personally, got involved in it to stop the fighting.
Q: Yeah, thank you Mr. Keshe.
K- It's not easy.

K- This is part of life, it is part of the understanding to bring the change, (2:06). to change man from dimension of physicality to dimension of the fields of the universe. The tests we've done this week in the center and last week has shown how beautifully correct the system has been made by our team in Linz.

When you hear, when we speak about the two people in the same chair, when we speak about the lovers in the back and the front and everything, but one lover hugging the other lover from the back and holding, because the soul of the woman, even so much smaller, is the supporter of the Soul of the Man in the front, which is huge. The size does not matter, the soul is much clearer. Then you understand these are not accidents, it shows the perfection we have made the system to create these conditions, because it was set to do it.

Q: Those systems Mr. Keshe, they're being produced by those beautiful souls, their soul is entwined, is given into the systems. So, are they enhancing in themselves and deeply connected to this? How does it effect the soul…

K- You and I see them, they are frequently in the center, putting.

When you go to a party, you take those which you enjoy to be in the party with. You don't go there, hopefully there's somebody. You go there, because some of the people you know they will be there, that it makes it enjoyable to be in that party. (2:08). The soul of those who you see with us, are the souls we know from the past, we just put them in different clothing. We've had many parties together before. So, when you see people around the Foundation, around the world do things, these are chosen souls, friends we know, when we came here with. That's why we can show it so smoothly, because we all know what we have to do.

Q: In this very moment Mr. Keshe is showing 11:11 on this watch, on this clock. Which we know time doesn't exist outside of this planet. However, as we engage in these fields that we interact with. In that moment, it was a 11:11. So yeah, thank you for that Mr. Keshe.
K- At least it wasn't 9:11.

Q: Sorry, say again, I didn't hear.
K- I said, at least it wasn't 9:11, it was 11:11. ..

Q: Yes, thank you. Mr. Keshe. Thank you for asking those questions. Can I ask one, quickly one more. So, within the center, within this core, within this interaction, and these Satellite Souls take, they are in position. Their Soul has brought them there. And the soul of the Universal Community, the soul of the Universal Council, the Earth Council, the Core Team, the soul of humanity, the soul of the religious leaders, the world leaders, the man on the street, the woman who nourishes, nourishes the whole of humanity. Is this the moment?
K- Of what?
Q: The change? (2:10).

K- The moment of the change started from the time when the first man was created. The purpose of the creation of the Earth even though you look at it, it's just accidental. When it was built, when it took structure, when Mitra fell in love with it, started that change.

You know when you have a beautiful partner, or you have a beautiful child, or you have a beautiful painting, you want to take it around to show it to everyone, and show its beauty, how beautiful she is, how beautiful she talks, everything to you is beautiful because you fell in love with it. This is what happened to Mitra. When the love of the Creator got in touch, became in interaction with the fields of the Earth. She took, she set out to show the beauty of this to every lover across the universe, even to her own lover, which is the Creator.

So, the change started from the time of the beginning, and not that it's now. This is part of the evolution of that change. There are many, many more changes to come to this planet, which this new change will bring.

I said to the couple yesterday, if you wish I can make you pregnant in this room, this instant. Putting you both in the systems, you can have a child, (2:12). if the wish is there. It's not the system is going to be developed, the system is already there, the knowledge is already there.

Q: So, two physical beings, or the soul of these beings go into the flight room. They interact and create another soul, this soul can then choose to be in physicality or to travel the universe or?

K- It's a decision of the three. Because the physicality of the mother and father on Earth will be here, but you take your child to different parks and different parts of the city, to different game places. So, then will do the soul of the mother, the child, and the father. Physicality could be here, but the soul of the child with the parents travel the span of the universe to see the beauty of the Creation.

Q: And that child when it matures, how does that position, when that soul meets another soul?

K- It has the freedom, it’s the same, has the freedom. You see, you put a magnet on a table and then you put a copper, a zinc. You put water, you put potatoes and tomatoes, magnets doesn't get attracted to it. If you find a field, same field strength of another iron, which is magnetized, then it gets attracted to it. It’s the same, it's no difference. But as we have shown, you can even magnetize a plastic and an orange, if you know how to handle it. (2:14).

Q: Sorry to interrupt. So you're saying that the souls will match up as well as the physicality's, and you can make a magnet for, as we know within the teachings, for anything. So, it’s the same with the soul interaction…

K- Yeah, it is what happened. Mitra fell in love with the Earth, and Mitra, through the love and understanding of the love of the Creator, brought the Creator to see the beauty of what He has created. As I said before, not many places in universe has been visited by the Creator itself. Mankind one day will understand the privileges he has carried, and how he abused this privilege in the name of religions.

Q: And that balance has to come, for the souls that take this energy?

K- In a way, the soul balance is there, it's just the physicality to appreciate it, confirm it and live within it. Nothing else ..

Q: And this balance for everybody is in the physicality, and then further out when you expand out, when you become more than just the physicality?

K- More or less.
You don't see a black soul, you don't see a blue soul, you don't see an orange soul, the soul goes and shine, and the light it produces in the dimension of the observer becomes black, blue and white. (2:16). When you got a black light, or when you have a red light, all the traffic sees the red light they stop. In the dimension of the soul, the light could be black to me, yellow to you, red to the other, according to what I create. This is the difference between the dimension of physicality and dimension of fields, what we call the soul.

Go back, especially those of you who are in the medical side, and listen to the knowledge, to the sharing of the knowledge, which was done with the Dr. Elyia Kostova. Those works, if you understand it, are the cornerstone of the Creation. We had the privilege of Dr. Kostova with us in those days. With her support from the securities, and the others in the background trying to fill her up, with the knowledge she had, and everything else. To share some of the basic, fundamental knowledge of the Creation. We keep it to the doctors, or we kept it that way.

But those knowledge's for every part, every organ of the body of the man which was taught with Dr. Elyia Kostova, is the cornerstone of the Creation across the universe. But you have to understand it. What does the kidney means in the dimension of the emotion

and the STM? What does the heart means? (2:18). It was a beautiful, great pleasure to be able to teach in those times. If you understand it, it explains a lot of things, how even the universe is created, how is the shell of a galaxy is created, you call it, the skin of the man. Change the name. You call it, the kidney.

Look into the universal dimension. Why do we have certain galaxies working the other way? Certain part of the collection of galaxies work in different way, than the others. Extracting what the others don't need, you call it kidney. But when our scientists look at it, oh, this part of the universe, the galaxies and collection of galaxies are moving in different way. Tadam! What did you miss? Macro and Micro is the same. But where does that, what I call, extraction of the fields you receive come out of, which part of the universe? Or does it get poured out into Unicose?

It's all the same. We just are blind to see it. Correction, we have chosen to be blind to see it.

Q: Why do we do that, Mr. Keshe? Why do …

K- Is it an ??, isn't it?
You and I are battling this situation for about few 2, 3, 4 months. I tell you just wait, when it's the right time. You jump, you get agitated. I said, it's just the time. (2:20). Because I always said, we are all there to be tested. There's a reason for that in the elevation of the soul.

The good news is, that is solved this morning. Then we'll see the new dimensions in the coming days. It is part of our life, but we chose to compartment it, and put in one compartment, this is this, this is this, but it's all the same.

Q: There are so many beautiful Knowledge Seekers. When people tap into, when they allow themselves to actually be touched by your, by your essence, by your teachings. It does touch the soul. And those teachings that you spoke about earlier on, though, when I was going through this awakening, or whatever it was that happened to me, those medical teachings, I delved into those and it did give me a lot of field strength, it gave me a lot of knowledge that I brought forward and then used within the, you know, becoming part of. They are beautiful teachings and the essence of them are so fundamental to humanity and our understanding of our own structure. Yeah, they are...

K- Depends how you look at it, how you understand it.

I was explaining this very recently in a different dimension. The "Tribe of Moses" created mayhem for mankind. Through the dimension of, its what I call, (2:22). greed. But the same tribe of Moses, being matured, has become the protectors of the Foundation. One day I will explain.
Q: That's intriguing what you just said there.

K- Very intriguing, very intriguing. One day I'll explain. The mayhem which came with us at the time of Moses, and in past centuries, now has become the guardians and protectors of the new change.

In a way, as I say, the soul of Moses is putting back right, what he did wrong. One day the Knowledge Seekers will understand. No one has protected, and brought, and supported, and what I call, even brought the Islamic world around the Keshe Foundation, than the children of Moses in the recent past. In a way, putting the wrongs of the past right, even through the world of Islam.

There are things we can't disclose, but long term, as you know, we open the books always. What you will see, I keep on telling you, it's about to come, and the changes will be so big. It's thanks to the blood of Moses and his children. And change they bring in the Islamic and the Christian world with them. (2:24). What they did wrong they're putting right, this putting right will change a lot of things for a lot of you. Soon you will understand. That's why both bloods were chosen to have the outcome. Very, very sooner than you think, you will become aware of it.

Q: I'm looking forward to in this moment, Mr. Keshe. The moment when all the souls really realize, regardless of the STP of the person. When the children of humanity really understand that what has been brought forward. Thank you, Mr. Keshe.

K- We shall see it in the coming time. … We don't see Dean much, just about 8 to 0 hours, twice a week.

Any other question?

Q: Wang Lynn… A question from a Chinese Knowledge Seeker. Why those souls come to the Earth? Why have to experience sickness, ?? collections, or sufferings?

K- Oh, this is the arrogance of man. Souls are everywhere in the universe. It's not exclusivity of this planet. Why some souls appear on this planet, it's the same as how the Earth was created out of this Solar System. (2:26). Collection of incidents, accidents and some deliberation, that's all. Souls are not. The same as life is not exclusivity of this planet, as we know. Souls are not exclusivity of this planet.

If we've been told that a stone has a soul, have you seen how many stars and planets are in the universe? Where is their soul? Where their soul is? Just because we want to think Earth is the only one, ?? others don't have a soul. We can live in that ignorance, but the truth is different. How are you keeping Lin? Are you okay?

Q: Good. I feel much, much better. I'm on the way of awakening, I believe. I'm experiencing what…
K- Be careful you don't fall off the bed when you awaken.
Q: Oh, I'm floating on the bed. Sure, I will be in Linz, I believe. My soul wants to go there.

K- As all of you know, Lynn is one of the two heads of Keshe Foundation worldwide. She has done a lot, and she's suffered a lot in the past recently because of it. But we'll see the beauty of what is to come.

Any other question? (2:28).

Q: .. What is the definition of plasma? Is it an entity with a soul consciousness and intelligence, that can express and define itself? Is plasma technology a living being with a soul? Or creators like Suns?

K- Exactly as you said. If a man has a soul, so has the soul, has a soul, has an operator. It's not a football team with no captain, as I said yesterday. There is a structure to it. I always go back, I made man in the image of myself.

If the man has a soul, the STM has a soul of itself, it's got a set. It's got a central operator. Which that soul is connected to the soul of the Creator, or in its essence part of it. A star, is not a sun, is not created on his own, out of nowhere. He has received fields, that has led to his creation. Those fields have a pattern of work, and if all the stars rotate and do the same thing, so it must be a pattern set in the center with all of them. That's what we call, central forces of the Creation.

Any other question? (2:30).

Q: Ed … We see many people coming to the units in Linz. And each one of them has a different experience, and some experience much, and some very little. You have said, it depends on the readiness of the person. How .. is this technology going to be used by all of humanity, if it takes them being ready for it?

K- Do you know, it's like a classroom. … Even you're all in the same class, doesn't mean you all understand the same thing. Some of you are good in math, some of you are good in something else, some of you are good in art. Somewhere down the line, you'll end up to use the mathematics, because something you were taught, has come to a need, to calculate what you want from, what you've done, according to what ?? your wages you received, and what you want to spend (it on).

So, the knowledge is the same. It depends who and how you want to use it. (2:32). So, it's not a position, it's the readiness to accept, to understand. I said, even if you listen to one of the Intros, the end is not anymore, there will be, what we call, "day of judgment." The day of judgment is the day when you understand, and you realize the reason and the purpose of Creation. That's all. Why do we all say usually, the last word said, we call it the mother, or we call it God, save me? You know, we have always been aware of it, we ignored it. When it comes to the point, we confirm it. So this, our readiness to accept, to confirm what we actually are and what we do.

Any other question?

Q: Yesterday in Brazil, October 12, was National Day in commemoration of Mother Mary, Mother of Jesus Christ, holy be her name. How to separate the dominion of religion over the truth from this wonderful conception of Jesus? Thanks for the guidance.

K- It's all in the path of belief, what you accept who she is, or she was. (2:34). To some people she is no one, and to some people she is everything. It depends which side of the fence you sit.

It's very strange. In Spanish, French side, we see a lot in some sectors, belief in Fatima. In different shapes or forms. In the Islamic world, Fatima is the daughter of Mohammad, where the bloodline comes. And because of the way Spanish, French domination by the Islamic world for a few centuries, brought that mentality, still carries on into Christianity. Where in Christianity we believe in Mary and everything else. In Islam, the wife of, or the mother of Mohammad is not so much brought into ?? understand, than the daughter of Mohammad. That's where the separation between the sects of Islam, Shia and Sunni come in.

It's in essence, the soul of giving, the soul of Creation. How we want to respect that. The one who created, the one we believe it, or the one who created, the ones we follow to believe in, is a part of the essence of one or the other. Which means Mohammad and his children, or Mary and her child. It's the habit of the man, we have to have something to connect ourselves to, to be part of us.

This is where it comes, in essence. (2:36). You go back and look how she was created, how she was, not created, made (up) to be, and how she really was. When you look at this, don't look at it as a present time and position. Look at the time when it happened, what the position was, with the life of normal people. How did they live? How did they got married? Was there something called as marriage for those who were not believer in anything? Who was the father, and how was the father? It all comes into a play, the way they've written it, to create a mysticism. Or was it a fact of how it happened?

The reality is, a child was born to a woman, irrespective of physical condition, how he was born. The Soul of Christ was given to that soul, to that physicality. The soul created by the egg and the sperm of Mary, or the father of the child was not the Soul of Christ, as we call it, as the belief is. It's the time and the place chosen for that soul, for the manifestation of the soul of the Moses.

It's the same soul, it just plays the game. (2:38). Just because it wears different suits and different clothing, and one day is here and one day there, it's a different one. Are you a different person if you're in London today, in New York the next day, or in Beijing the day after? One in the suit, one in the summer clothing, and one in the winter clothing. This is what man hasn't understood.

The rest of it is play with the words in the books to make the importance of the priests. The soul of Moses in these three manifestations, in the Soul of Christ, was after the child was born, not the child was born as Christ. It's a big difference. It's been the same with

Mohammad, it’s been the same in my time. We are not born to the soul. The soul is given to, to manifest itself.

Where the birth of child of Mitra is different. The soul was manifested for the physicality to be manifested into it. Once the man understands, you'll wipe out all these Mary, and (name) ??, and the others, and the others. Because the essence is, always has been, always will be when the time, the position of the physicality was set, it’s ready to bring the beauty in it. One day man will understand this. (2:40).

If you go back into the teachings, how I've explained that a few times, you become aware of the body does not own the physicality, doesn't feel what it is. It’s added to, to have both dimensions of physicality and the soul.

Any other question?

Q: <<< Speaks in Portuguese language>>>
What happen in the elevation of the soul? Why the person changes in this process? What really happens in this process when the soul is elevated?

K- It becomes more aware of. It’s awareness. That's all it is. (2:42). When you are a higher you become aware of, you understand what happen below, what led to be in that position. You become aware of more.

Q: <<< Speaks in Portuguese language>>>
What means this consciousness you have when you have the elevation of the soul? And what happens really with the physicality in this process also?
K- What do you mean by that?
Q: So, by what I understand he wants to know more about what really is this consciousness of being elevated? What will be the reflection of this in the physicality and how the physicality will understand and be aware of that elevation? That's what I understood by his question.

K- Not much, it’s just that the life, the soul goes through his process. It goes through it’s understanding, it goes through its work. It's what happen to you when you go from class one to class two. You just mature to it, you understand more. (2:44). The alphabet doesn't change, the setting of the sentence, and the numerical numbers don't change. It's just you learn more how to create more words and calculate more complicated, because you become more knowledgeable of other things you can do with it. Does the alphabet change when you're in the first class, or when you graduate from the university? Has the numbers changed from 0 to 10 when you go to university? It's just we learn more how to play with, how to more, to understand more. If you put it together in one form it becomes chemistry, if you're interested to put in another form becomes physics, and if you put the same alphabet in another shape or form, it becomes another thing. But it's the same, and it's the same with the life of man and the physicality of the man and his soul.

K- Thank you very much Rafael, for ??.

Any other question?

K- How many workshops have you done this week. 20 hours?
R: Something like that, yeah, in the last two or three days. Yeah, it's been very, pretty intense. I'm always posting a new workshop every half a day or whatever. Okay, it's all in part of what we do.
K- Thank you very much.

Q: What is the role of mass media? Do we need to elevate the newsmakers, so that the new knowledge will become more reality?

K- That's our job and we are doing a good job of it. We got to stay under the radar for a few more weeks, then you'll understand. The mayhem will start.

Q: He went to say, it's here for many years, but too few know about it and apply it. Happily in China, Brazil and Iran, the knowledge is now widely spread, what could then be the next step?

K- The next step, we already are part of it, the next step is getting set. A lot of Knowledge Seekers in the background have helped to get it set. It's just matter of very short time. We are getting there. You know the Keshe Foundation doesn't do anything with the little bit of silence, but we just need that time.

You've got to realize, there's a huge, huge operation going in the background, as I said in the other teaching, to silent the Keshe Foundation for good. (2:48). We have seen it in black and white, we have seen it how they have started operating, that by Christmas Keshe Foundation will not be on the Internet. I'll come to it when the time comes.

But on the other hand, Keshe Foundation, has its own agenda, its own work. But there's extensive work by Vatican and through the Belgium government, and, what I call, their servants, to bring the Keshe Foundation off the Internet totally by Christmas. We'll come to it.

We have our own work, we know how to handle it, and we'll see. Vatican has ?? done in the past six months, the same with the Belgians. They tried to make it all look legal, and that they can do it for good, but they didn't realize the "children of Moses" have made much bigger movement than they made. We have a huge support within the Iranian community. The religions will keep the Keshe Foundation back on its track, not the governments, and that's when the governments come to an end, you will see. We never asked them, they volunteered, they put everything on the line to make sure it happens. Same with the Islamic world, the same is with them, it's just somehow they come together to make sure this time the change is there for the correct way. (2:50).

R: I know in the last Testimonials, public meeting for Testimonials that we had a few days ago, that we started getting into some of the Testimonials from Brazil, and there are

multitudes of Testimonials, literally hundreds of them to go through. And apparently there are between 12 and 1400, altogether, Testimonials from, almost all of them from different people. So the technology is being spread, if we consider that's just the people who volunteered to give that information, which is 1 out of 100, or 1000 or more, would probably volunteer to do that. It's not easy to get Testimonials all rounded up. They did a beautiful job of it. I was shocked and pleasantly surprised that that the knowledge was spreading so well there. A lot of it due to Rafael and his translation, and putting together documents, and so on as well.

K- The knowledge is spread in so many different ways, in different manners. But it's how the people see it. We have a culture of, what we call, television and news people. As I remember, somebody said years and years ago, wrote, I believe in it when it's on CNN. And strangely enough, I talked about it, that they say, especially when the Americans will believe it when they see it on CNN, (2:52). ?? Alan pur, did a communication said, "you're banned from CNN, Mr. Keshe, you'll never be seen on CNN." It was very interesting how people perceive it, to come, and how people who are in it know they put so much ban on it.

In CNN, in Fox it's a total ban on Keshe Foundation. And the people, some are Iranian and some are Knowledge Seekers in the influential positions, they all have informed us. They said, we want to talk about it, we want to bring it out, but now it's made impossible. It's one of the only scientific organizations who is banned to be reported. For what reason? Just because we didn't give the technology to the most pedophile nation of this planet?

Very soon we'll announce how these people into their banking system, we unravel the banking system of the pedophiles, we have broken into it, we'll come to it. Just one second. (2:54).
Sorry about that. As I said, we've broken into, not broken, but we've been informed, and we have knowledge, that how they work in the banking systems. We'll open that very soon. It goes back to the same as what we saw with the time of Alan Sterling, how they came up with the phrase of "free energy." Free energy was actually the name of the children. The life they took, it was free.

Now, the same process. We have become aware, we've been informed, we've been received. We'll talk about it. We'll bring it out to open very soon. Then we'll see how, we'll see their reaction. How many of you would like to work with the banks who actually are ?? in child trafficking? There are two banks, which operate fully on it. We'll unravel even the name, how it's been set up. It's very interesting.

But, it's the way. We don't look at it, we don't consider it, we just set up our own way, we do things our own way. We carry on. We have done 500 or 450 odd teachings, 10 years, and millions of people doing it. We just have to be humble we don't. We are here to change the base. (2:56). We are not here just to be a 15 minute show of fame and gone.

Any other question?

Q: Dean .. If the situation did arise where the, you know, the Internet is changed or whatever that fields strength changes, the Internet of the STM, you know, this structure that we have, that's unstoppable, that's unlimited, so it's already there.

K- That's what I told you, what did you feel at 7:30 am Central European Time. This is the short sightedness of these people. They thought they can do, and they thought they come up with a legal structure to do it, but actually they brought the process we wanted to do in 5 or 10 years, to immediate action. You will see it, but to give us time.

Q: I've always noticed Mr. Keshe, with the technology and have experienced it myself. We all do, there's a balance, there's a, you know, however you want to describe it, a field strength, M and gG, yin and yang, however you would like to describe it. There is, one interaction causes another interaction. If the interaction is with the right intention it always produces a beauty, and what you're doing is a beauty, so there's outside of that. As you said, there's no time. So, in this very moment the technology is there for everybody, it's within.

K- You've got to realize, (2:58) if we could not handle the move by the Vatican and the Belgian monarchy in the past few weeks, we would have come to you, and we would have cried out, copy things, take everything, make sure you keep things. We are so confident, that it will be handled in a way, that it will bring the breakthrough most of you've been waiting for.

This was the most stupid move they could make. I was shocked when I saw it. I was surprised when I saw it. And I thought, that's it, the end has come. They chose, not us. They chose the battle. Again by deception, again by typical way the oldest ... But this time, as I said, they haven't shot themselves in the foot, they've shot themselves in ?? (heart).

Q: As Knowledge Seekers, Mr. Keshe, we all look forward to this moment that yeah, interesting times, interesting times.

K- You will see it, It will become public. Keshe Foundation never ?? reveals with anything, but you'll see it.

Q: Technology is for everybody, the understanding is for each and every being, each and every soul present, and it's from Creation, and it's this beautiful gem of a planet, you know, this wonderful Creation, it's part of it. And we're part of that, so it can only ever be in full bloom in this moment. It can only be this.

The image, Mr. Keshe, you see, and it's still on the screen. I see Rick's left it there. Can I ask some questions about this structure? Is this…

K- I have no news about this one, (3:00). This is done by an artist.
Q: Yeah. Is it actually a, is it a crystal or is it a cake?

K- No, no. We've been waiting for Knowledge Seekers, artists to come up with a proper use. This is resin. Resin with Gans's. A new one has just been sent in. I don't know if I can share it, we just received it. We're going to, it has just been done, it's a very small unit, again, another concept by the artists, and artisans. It's very beautiful. As soon, I think in the next day or two, will be on the Keshe Foundation website. They explained their understanding what it is, and everything is made, and in the context of what it can be done, and what effect will have. We don't have a say, we don't make these things. It's made and sent to us.

Q: Do we know what the tool, the intention is for the tool, Mr. Keshe? Do you know?
K- For what?
Q: Do you know what the intention is set for this particular tool, this sculpture?
K- It's spreading the fields, it's the artist has done.
Q: An interesting shape that's for sure. It is liken this spiraling up that, the Flower of Life, and many, many different things that seem to be interacting with the technologies and things that have been present for quite some time, (3:02). and the knowledge that is within it. And the Gans structure, the soul of the Gans is in it. As you said.

Would it take many of these placed around, would these be another satellite, would be another condition?
K- What do you mean by that?
Q: So, if everything has a soul, then the soul of this, has the potential to do the same as any soul. It's unlimited. So it's a Creation. Was it born out of an intention? From where did it come? What's the origin?

K- I don't know, it's an artist, and we don't ask them. We sell them. We have offered a number of artists who work with this. We will run an exhibition in Keshe Foundation Linz Center for the artists, the artisans and their work in plasma. Maybe 50 or 100 works, maybe it will be the first plasma artwork gallery, and it will be shown in the Linz Center. We have the facilities and space to do it. We can even extend to other parts of the center, if we can ask for it.

Q: Mr. Keshe, that's a physical interaction we're seeing, this sculpture. So in the arts, there are many ways to express yourself in sight, sound, touch, feel, everything. So is that something that expands out, is that something to be part of in… ? (3:04).

K- Yes, but it's people how they bring. You know, we had two visitors yesterday, they lost their bag. They were so busy, what I call, monkeying around in the bus, or the tram, that they left their suitcase behind, or their bag behind, which they had things to show us. People come with different ideas and things, and our job is to promote the work, if it is from the work we do. We're not there to stop, we're there to allow it. We tried a couple of years ago to do, now is taking shape, more and more.

We are making the ground for a lot of people to be able to encourage different application of the work, and how it will effects us, how it will be. The food products, the clothing, we'll see very soon. I was told, new artworks coming in different, different things we've

never seen, and how it can be promoted through the work of the Keshe Foundation. It's not just a gel pack, it’s not anymore just an Enhancement Unit. It covers everything right across.

R: .. Would this include things that aren't associated with Gans and Nano materials, or that kind of stuff like…?
K- No, no, no.
R: Like a volume of poetry, for example, doesn't qualify?
K- If it’s a poetry, how can we sell a poetry? But if it is poetry about the Gans, we can put it up for others to enjoy it. You know, some things you cannot sell, but it’s there. If you go to Linz Center, (3:06). You will see, some people noticed, some people don't noticed it, but I'll try to show you something and then I explain. I have to share. Some things we cannot, what you call, put out, but is there. It has no value to put out. But if you go to. Do you have any pictures of the Center, we were shown live this week? I'm just looking for it. But what is interesting, what the people have done in the center, you see a corner, a section where there is a store section and we have units, which they have their back open to walking path, or to the lift. But when you get into the lift, if you look behind you.

You know, you put a lot of things, phrases I use in talks, usually notice, the phrase is taken out, the organizers of the center, they have put these phrases on the back of the all the units. They are literally made banners with the phrases of what I've talked, and just been printed on, I think, on a plastic sign. It's the backing of the things. When you get into the lift going down, if you read, you see a lot of phrases I've used somewhere. It has no value, it's just there to remind you.

It's the same with the poetry. If it's about the plasma, about that work, yes. But don't expect to get paid for it. (3:08). If there's books which refers to the work, yes. If you have those scientific papers, we're there to put it out, to become, to be published, yes.

K- … They are there to, what you call it, to be sold. This is the very first sculpture we’ve done. We received another one in the past few minutes, it'll be there. Most of the paintings, whatever we have is already sold. There are numbers of Knowledge Seekers who buy the artwork's, straightway. This one is about 1.500 Euros.

Q: .. So, these artworks. In many of the museums and things you see these wonderful masterpieces of artwork, that are done by these artists that are portrayed in a certain manner for humanity and people come to view them, and they obviously they look upon it with the physical eyes. And because of the admiration and the field strength, they give it a lot of energy. Would this be the same for these in the follow? Will these be creations that will become more, as more souls interact with them? (3:10).

K- I think they will be the only true pictures. Actually, the old pictures if you look at it, they used to use natural things, paints, or plants. They are the same. But the very recent ones, they are all chemically made paint.

But, you will really interact with these paintings, with these artworks. Do not be surprised if you see, for example, this sculpture in your room, changes color. You say, "oh, I bought it and it was cream and whitish, now it's blue and yellow, or whatever. These are that really reflects your emotion and what's going on in the house. Then put it this way, you come home and see it is orange, you say, "oh, there's a problem." The wife is not happy today it has turned blue. You come home with a reddish color, oh this is a good day, she's going to love me. These are sculptures will become like this, they are live interactions.

Just look at the paintings, those of you who bought it. Then ?? to see the mood and the feeling, if you don't like the mother in law, puts her in the room she doesn't know what the painting is, but you come and you know, oh, red, there is a problem cooking here. You start learning how your pictures talks to you.

They are interactive artwork, but through the emotion, very rare. But now it's a cycle, a lot of people will do, will try to do it.

Q: Do you think Mr. Keshe, some people will pick up on the aura, or the field strength of it, and a sense and feel the fields of it, in another way?

K- What, a lot of people who will try this, will do. (3:12).

R: Remember the "mood ring" back a few decades ago, change color on your finger according to, supposedly according to your mood. And that was a big fad for a while and a lot of, probably anybody who was older would recognize that phrase, the mood ring. Perhaps this will become like that, this kind of sculpture and artwork.

K- Nowadays, you've seen ladies wear this nail polishes, on their nails. It sensor different heat, shows if they're cold, or hot, or whatever. Now, you know what's coming. Nowadays, there's a lot of different …

R: That's a great product for the beauty salons. Or you already have that one in the background, Mr. Keshe?

K- You can buy it on the Internet.

R: No, I mean one with Gans's on them, painted with Gans, that it changes color to from.

K- No. Oh, it changes the mood, that's definitely mood changer. Then you can imagine what it does, what fields you absorb.

Q: We already have this Mr. Keshe, within human beings, you see them blush with colors and change colors. And they are all full of Gans.

R: You could put one finger with the Gans fingernail and the next one with the mood fingernail, and the next with Gans and see if they influence each other. The Gans would

change the color of the mood ring or the mood fingernails. That would be interesting experiment actually.

K- What I like about this sculpture of the finger moods, as you call it, with the fingers, (2:14). is which one is giving, or which one is taking compared to the environment. One finger will be boiling, and one finger is frozen. Because depends how they give compared to where they are, and what they receive.

Anyway, we're going through a change, a scientific changes, and there are lot of other changes to come.

Q: So, this has been going on within the flight, Mr. Keshe, and within the rooms and outside of the room. I've been present with that. So, I've had a cold recently and I felt some coldness, so, I was dressed for that. Then there was, I noticed yesterday, there was someone present, one of the Canadian people, a lady, and she had, she was openly just skin showing and a very thin top, so she wasn't feeling the cold. And she just been in the flight system. So, everybody's emotionally receiving or responding differently.

K- Let me explain it. Did you see the guy, her partner? He was cold, he had his hoodie on.
Q: Yeah, precisely. Yeah.
R: First day he was shaking actually, he was so, trembling like.

K- It is, well, it's not the first time. We've seen many people who go. They interact with their soul. It’s actually, I can explain exactly what happens. But they interact with their Soul and their physicality. We've seen people who come and ask for a jumper, we've given jumpers and, god knows what, to people to cover themselves in occasions. We had two sisters says, can you ask my sister to give me a jumper, and it was summertime.

It's consciousness, awareness through the soul. (3:16). These systems, we watch a lot of psychological pattern in it, which we cannot explain at the time. But part of the work is watching psychologically what happens.

We've seen couples who come in, and one couple goes through crazy phases, and the other couple stands there and nothing, nothing happens. And we always find this with the men. Because nothing, what you call it. Then we see the change of. "oh, you went through the trip, I didn't go." What have I done wrong. Then we got like the resentment and the rest of it. We’ve seen this.

But we look at the character before it goes he goes in. And how ... If you observe what I observe in this flight room, conditions we create, you just go crazy. How well we know the human, how well the systems are set.

Because even the people who made the system, they don't know what I do with it. This week we brought 7 people in the room, some connected to each other, some had no connection with each other. We did test with three strangers, with they had no

connection, to see how they interact, if there is any soul interaction, if there's any field interaction. We put the people in, in the middle of the flying and then we take them out, in the middle of flying. To see how they react, what did they see. They all have an effect on each other. They all have a very direct effect on each other and how they do it.

Q: That's within the system, Mr. Keshe. (3:18). In the proximity of where the systems are based. How are they expanding out? Are they effecting other souls and other positions much further right, that they're unaware of?

K- Yes. There is a part in the system, that we can centralize the fields.

Something very interesting happened. I explained that to the Knowledge Seekers, the Canadians yesterday. We have different things outside, we have field detectors and everything else. Inside, we monitor a lot of things.

The Canadian lady is one of the few we seen, which could tip the scale. I put her in the front seat, I put her in the back seat, I put her in different two systems. I put her on the lap of her partner. She tunes so fast into the fields of the system, that we usually see slight changes when the soul leaves. We see literally weight reduction on our scales. This lady was so fast, she can change kilos. I told her when she was in the system. I've never seen so fast. She just switches and we see the weight change. She goes into the relief of the STP. There is a weight bracket which when the Soul leaves. (3:20).

There is a weight bracket when the STP leaves. When I see, quick looks, when the STP is huge, it’s the time when the body's going through the transformation, to go to transmutation. We intervened twice with this, because I always keep an eye on this changes of the fields, on how things go.

The lady yesterday, doesn't matter where I put her. She could so quickly change into the system, that she goes to, what we call, weightlessness in the physical body. She could feel things, but the partner didn't have that ability. I said to her, I've never seen someone having so fast, letting the STP go.

Then she told me something just before they leave, and it was a checkmark, exactly. Detachment. She said what she's done in her real life, then it became very obvious why she does this, how easily she can let go. Twice, I was waiting for her just to move across, and I had to block off all the systems, that she had no chances to move anywhere. When I told them in the room, I said, I never seen anyone so fast.

I can send her to the Moon within seconds. And she is so fresh, she is so bubbly, she has such beautiful face. You felt it when you interviewed her, when you see her. (3:22). But the system was going crazy the way. She could stop and start straightaway. I could see her, she jumps. She comes to the dimension of physicality, and she leaves the STP and she brings it back in again, and she goes to the Soul, and she comes back. It's so natural with her fluctuation in the control.

I've tried to see, put her in the middle to monitor, I asked them to stand there for 15 minutes, don't do anything. I wanted to know if she can do that from outside, inside. To touch, to change the environment. People don't know what we do, but there is a reason for when we move people in different positions, in different things, for us to learn.

When I asked Knowledge Seekers with Rick yesterday, to send things and they didn't receive it, they said, no we didn't get anything. Because I switched the systems on, there was no way any of the two units could receive. Then we tried to see if one of the systems can receive. It's just testing, that's why you are there as Knowledge Seekers for us to test, pilot test.

This woman, was amazing how she could control, to let the Soul go. We could see the Soul weight, we could see the STP weight, and she could get it back. She could go from physicality to the Soul, and back to the STP. And she doesn't move in the system. She stands still. (3:24).

Any other question?

Q: Mehranez .. I am full of gratitude for you and all you do. First of all, I have a question about, I heard about IT intelligence, artificial brains they're creating. Are we going to see the human beings which are created?

K- Once you create a system, which is interactive fields flow, you call it, a current, electricity, or whatever, there is a central dimension of fields. And in near future, in the coming time, scientists will decide to abuse, or to use this. What will lead to, is how the man decides the future will be.

Would we create a soul, which has an artificial soul, I mean, not artificial, but soul created out of the interactions of the fields which man has decided? What would the interaction lead to Creation of?

You cannot make super intelligent systems, artificial if you don't consider the soul. Once they learn, man learns this, we will see different kinds of artificial intelligence. (3:26). That has been on the card from the day we built the first system. I always looked at if the Chip manufacturers could understand the flow of what it creates, a different dimension flow, the superconductors and the memory Chips, they are so small. But they haven't come to realize that yet.

There was a small hope that this might be realized when the cubicle memory banks were getting pushed through with the "Blu-rays, and somewhere they got lost.

Q; Would they some way ask, who is my Creator? Where's my Creator?

K- Mr. Chip. Maybe. But would they be able to create a condition of flexibility muscles, as we do as humans. If we use natural materials, if you use. There are certain ways you can do it, which we don't want to open up. But there are certain ways you can actually

create that condition. We have enough trouble as it is with the physical system we made. How to teach that is another thing.

Q: Thank you. I dream last night I was in Linz. And it was surprising, because I was going to go to Iran. (3:28). But maybe not now, because of things. And my husband was with me because, he makes his pathway. So, I hope one day I be there with him also to show.

The other question or comment, maybe. I always thought that this destiny and way of life of Virgin Mary, bless her name, and Fatima, the daughter of Prophet, bless her name, were similar, very similar the way they raised up in a special way. The way they suffered at the end, the same way. Because they knew they had martyrs, both of them. And before when I was believing that in reincarnation, as Buddhists do, I thought it's kind of reincarnation. But now that you say reincarnation in that sense, exactly, it's not valid. It can be said, they had the same soul going to their body. There is so similarity.

K- I know the truth and I prefer not to discuss the truth. Because it will offend a lot of religious people. We're having enough problem with these turbans, and their beards and the funny hats in Vatican and everywhere else. We muddled them enough.

What is interesting, we hear, (3:30). since we played with the elevation of the Soul of the Pope, that a lot of things is about change in Vatican. You will see very soon how Vatican will respond with the changes. Just watch the space, as we say.

Q: Yeah, we hear things during these last years on Internet, about all that. The things he did and stuff like that. So I hope everything finishes with peace for everybody.

K- Oh, the end is always peace, because there's no place for war. Even wars of today are very, what you call it, nicely fought.

I will not be surprised, if you will hear what was happening even in Ukraine, how it was arranged, how it was set up. How they took the opportunity to. If you look at. The only winner in the war in Ukraine, is United States. They brought European nations under full control of America, from the fuel, from the food, and now from everything else, which Europe (?? needs).

We are back into the Second World War. You know, they used to ship everything to Europe. Now the gas is from all America, the grains, because there's a shortage is all coming from America. All the financing and the banking is from America, because Europeans don't have the finances to do it. So, we're back into, what I call, cold zone situation. But, all to the benefit of United States, all to benefit of Rothschild's. (3:32). Even the old weapons which got stuck, it couldn't be used in Afghanistan, and Pakistan, and Iraq, now it's all getting as fast as possible shipped to Ukraine, and then they pay the invoice later on.

Ukraine was one of the biggest threats to the American grain supply. Now they have taken it out. Russian pipeline was one of the biggest threat to the American domination of the gas supply. They blow it out. It’s a one way traffic benefit. And all the old stock of weapons are already sold out, shipped into Ukraine. I'm sure a lot of you have heard about the drones which the Americans sold and they're actually firing back at the Ukrainians, actually to. Because the Americans sold the types that didn’t work, to the Ukrainians. It doesn't matter Ukraine. Russians the same, as long as we get paid for it. Anyway, let's see what the world brings.

Thank you very much for this week, this was a week job. Thank you very much Rick, for all your work in the background. Hopefully we meet each other next Thursday, and see what the future brings for us.

Next Thursday teaching could be just for a short time, for an hour or two. We'll let you know if that happens. It'll be short, short for a couple of hours maximum, if we expect to see what's happened to be happening. Thank you very much Rick, the next week.

454 KSW October 13, 2022

455th Knowledge Seekers Workshop; October 20, 2022

(Transcription Proofed)
(Auto transcription from Elias)

EU used to elevate soul of planet when no flights; Fields go around world; Make "child of soul" in systems; It's a technology - replication; Taking plants without soul; Iranian MaGravs tested and work; EU soon to be released to US - opening for KF T; 10 Nano coated mirrors - multilayered - absorb and radiate; Interaction with World Leaders explained - not by force - not a private line to their soul; Gans particle detectors; Ratio of Gans is magnitude; 5Plus1 Talks ongoing; 7 years - psychosomatic illness to materialize; Measure speed of M field; DNA changes - no Junk DNA; Every cell can change function; Nervous system like Nano materials; If Leaders enlighten - be kicked out; A lot of good Soul teachings in this one; Souls talk by changing color; Mr. Keshe 3 times in what should have been fatal accident; release of T delayed - not ready - accusations

Topic Index

EU used to elevate soul of planet when not being used for flights; All can tap into the energy; Connected to man, plants, animals, stones; Seen massive changes in 24 hours; Monitor how souls tap into energy by color of Gans; Systems now can receive person and send back; Start to hear trees & animals talking to you; Observe how things start changing for you; Change - not by force- but understanding; Not waiting for Messiah - it's our own Soul - waiting for us to change; We are all connected - made from same

material; Not "show me" - now if I can feel the fields of Linz - have reached maturity; It's understanding all the different work and interaction of the fields; Fields from Linz goes out side and around the world and back to system - elevating planet; It's 3-D - effects felt in all directions; Just needs a "flash" to fall in love; "the fields are so deep"; Found perfect couple to make "child of soul" in systems; Test next generation man will make in Space; It's a technology because it can be replicated; Body of spaceship already built in China - will be sent around world - these systems will fill it; New understanding of psychosomatic - balances itself; Didn't work for those who blocked it; Nevertheless weeks later they changed; Pull under table like Iranian girls - Soul; Once go in system - receive fields of U; Taking plants from Africa like slaves to Europe - don't take the soul; Same with birds; Will we bring people of U back to Earth put in fields like Zoo; Iranian MaGravs tested for 10 months work - huge savings; Why when KF makes it - the T works - it's understanding the process of the fields; Try to connect to Linz Center - spread fields across planet; People who don't feel anything in Linz - want to be in control; Will come to an agreement with American government soon- release T; EU to Uruguay, China, Germany; Question about if Iran is using plasma T in Ukraine: Open T as fast as possible; America - opening for KF what is to come; We all have to be ready to accept the T and consequences of it; Love of the Creator is freely spreading across the planet - It's there if you are ready to receive it; 10 Nano coated mirrors released - good for Mobile and Satellite transmutation; Nano Mirrors are multilayered special field interactions - like black hole - but absorb and radiate; Stand in-between act like Gans Box;

Interaction with World Leaders explained - not by force - not a private line to their soul - concentrate fields through AA connection - effect how they perceive what they are doing; Through your emotion and intention - opens a channel to someone not magic - nor a special access to someone; If war has field strength so does peace - create conditions for peace;

Best ratio of Gans is what it takes to move an object you want to move; With Gans's it's an order of magnitude not a direct ratio; Don't know how many Gans particle in a drop - can be thousands of times different; Need to develop Gans particle detector - next step; Current meters only in matter sate; Use Gans water - amalgamation of fields; 5plus1 talks updated - do not know if Iran using plasma T in Ukraine - talks constantly changing; Danger of nuclear accident; U Community is already here interacting and sharing knowledge with humanity; Extending lifespan to thousands of years; Space gap size brain allows Soul to grow into to reach maturity - can measure time of separation of STM from physicality; 7 years for psychosomatic illness to materialize; Have to be useful when extend life - not retire 65 without anything to do; If short lifespan can move Soul to another place live millions of years like Sun; Future will measure size of STM - then amount filled tells how much life left; No one in U managed to understand all of it; As a Creator - we have whole of knowledge - can access other parts of U like an App - understand that part; "I am the Messiah" - means Messiah of his own Soul and nobody else's; Create new tools to measure speed of M field; Would strength of different Souls fit together?; Color of Soul; Travelers of U bring us more knowledge - go to other parts of U to learn; DNA changes - most probably - it's a M field; No "Junk DNA" - everything has a purpose - created by fields of U; Cells are multi-functional - can change

position and strength - same cell can create different positioning, reactions, and emotions in the body of the man; Nervous system works like Nano materials - super resistor outside - inside no friction high speed communication; Belgium's labeled terrorist because made it without radiation; Even if world leaders enlighten - trapped by own organization that feeds them - will be kicked out; WL crawl on floor to feet of Pope - what things they did to get power; King Charles generation gap; Messengers are no different than humans - only more knowledge; Humbleness; Knowledge Mr. Keshe carries - and detached; Not hide in structure like Vatican; Walked away from king's life to spread T like what we have today; Sees physicality and feels the Soul; Philosophy and theology arose when we had no knowledge of the existence - now no need for them; Some people in Center - say to themselves "I exist - I am"; Can change your own Soul in a second; Have special system can tell who comes to give and who to take; Can extract certain fields from system; All types of people come to systems; How do plants change in Linz Center; Physical transmutation part of system shut off during time of elevating the planet - no souls can show up in system; Souls communicate by changing to different colors; Visiting Souls can leave earth anytime; Mr. Keshe went through 3 devastating accidents that should have ended his life - but each time walked away unscratched - in details; He stood outside watched accident; Destiny to fulfill; Security camera footage on Internet of unbelievable occurrences; Long discussion about why technology is delayed in coming out - humanity not ready - KF is growing more, better position; Accused of stealing and wrong doing - but everything is in writing; Change is coming; Souls protecting KF; We are all in it together; Satellites are with us - they are receiving fields from Linz; Start Satellite after new systems come in; We have a lot of silent KS who do a lot of work in the background; Pain during mediation - depends how you interpret it - could be from other dimensions - again how you interpret it and knowledge you have; Different plasmas together already pressurize each other - depends what you want to do; Does speaking about negativity make it happen - or help to resolve it - depends how you think about it;

ENGLISH TRANSCRIPTION

Videos (delay and longer intro)

(:28).

K- Good morning, good day to you as usual. Whenever, wherever you're listening to these knowledge sharing of the Keshe Foundation Spaceship Institute. What we call knowledge Sharing. As Rick said, for reasons we have, which work in the background, we had to delay the start, but the start was chosen specifically by Rick in a way what the teachings are going to be today. We usually find a connection somehow with the Intros. You listened to about that three Intros.

The reason for choosing these Intros is a new phase, which the Keshe Foundation has entered in space lab, what we call, in the flight ?? (:30).

This week we had no flight tests. We had people who are they're testing for other things, but no flight tests, no simulation was planned. We have another group maybe next Tuesday, next Wednesday is a national holiday last year, so we'll take a rest. But what we've done, and we use the opportunity, is to change the course, to bring a new dimension. To bring a new way, that we do, or we try to do, what the planet has missed to do. Which means we try to bring that connection between all sections of the life on this planet. The animal kingdom, the solid state, the Man, the soul of the planet, and everything else, which goes with it.

For this reason, as the flight center is not used, is literally like when you're in hospitals. In hospitals, daytime MRIs are for the patients, and nighttime hospitals lend their MRI units for scientific and instrumental registration, if you want to register, or ?? dye, or whatever to do with the systems. For this time of what we call, not using the system till next Tuesday. Yesterday, We and the Keshe Foundation set up something totally different, which means we have a new ?? (the system) has been working from yesterday, till next week, when we get back in, and we start working. We start seeing and what we can do in the time, that we are not there. (:32).

So, from now on, we'll try during the time when the system is not used, to bring the Center like what we call, elevation of the soul of the planet. In a way, for every aspects. As I said, we are responsible for every living things on this planet, and through the M field, every one of them has positioning themselves in a given position.

A tree has a position, a stone has a position, a man has a position, and an animal has a position, and we move between them. Some of us has decided as a soul construction to stay put. Some of us has decided to move on, as a moving things, or as shaking in the air, as the leaves of the tree. But in essence, as we all know, we are souls.

What we set up in the Flight Center is a system, where we interact with every soul on this planet and beyond. We have set up a transmutation, that going from one system to another, the fields are available to every soul to elevate itself. For every living soul to be able if need be to tap on it, to tap into it.

We have chosen the blood of Man. We have chosen another condition of the protein of the ?? animals. We have chosen the what we call, the essence of the Soul of the Man (STM), material which created us. We have chosen the soul of the elements of this planet. And we have chosen the elements of the life of the Vertical People. And in that process, with the system we have, we are rapidly expanding. (:34).

We've seen the changes in the past 24 hours, we've seen massive changes, how the school of thoughts, the changes will come. I told you last week, if you felt anything at 7:30 in the morning, a field, which was released by me, in whatever shape. Now it's not me anymore. It's a system, which is like a beacon and shares its fields with all of you. Any of you who tap into the Center, can come to that point. Maybe you can interact with it. Maybe you've been there. Maybe through you, others can interact with, and receive the

fields, if you're Soul is ready. It's different than you rushing, "yes," I want to be. Then the Soul says, "oh boy, you're not ready yet. Wait, hang on. I have the telephone number but I'm not dialing. You have not reached that point."

So, in so many ways, from now on, whenever we leave the system on the running position. We allow the level on the Soul, and the Soul of the Physicality (STP) to operate. We have switched off the physical interactions side. And in that process, we have brought a new dimension. As we go in next Tuesday, we will see what it is, and how it will be. And for now, we see how much we have to top up the system, because so much of it is used. The system itself receives as much as it gives.

We would like to see what changes in the colors of the Gans's we put in. We would like to see how they move, how they sit. Then we'll see how you as Knowledge Seekers (KS), (:36). have tapped into it, or other souls without knowing, being at the strength of the elevation has received from it too.

In a way, you don't need to pray to elevate anymore, where in fact, you are elevating continuously. This is very vital for us. This is important for us, to in a way ascertain, to see and to be part of, and see how us as Knowledge Seekers bring the change in.

Those of you who are the Satellites should feel the change. Those of you who are Satellites and registered yourself to be, you could feel the differences in the upcoming. As I told you, we don't tell you anything in advance, that would preset you. There is a condition to it.

We have today, as I informed our first what I call, transmutation person. We start setting the system up to receive the first transmuted person into Linz. There are some criteria, we needed some materials, we have received it. It's getting set up. And we have informed the person, that we start the process. Which means as before, you did not know when we started the first process, with what we call, Enhancement Units. Now we start the process with transmutation.

We are in the position in our system to receive and to send back. We shut one system, that receives and cannot send back, down. That it does not allow confusion, or we receive two parts, or two halves. Our first plan is to see the emotion, (:38). what arrives with the Soul. To see how we feel with the arrival of the Soul. We have to decide, to who will be in the system to receive the soul. It's not just "beam me up Scotty." We have to go, as you've seen with the other tests we did. If the person in the system feels the arrival, feels the arrival of the emotion of the arrival. Then we have to test. We see how and where. This is part of the development of the technology.

This is part that many of you have been waiting for. As we saw with the couple recorded, and you have seen, one felt the other one on her lap. Now we want to feel, if we receive the person in the secondary chair in the back, or on the lap of our person waiting for it to arrive.

The exciting time of the transmutation has it started. The exciting part of bringing that into order has started. It'll be interesting to see how you feel. How you see things. How you as Knowledge Seekers, now that we have the system running, see other souls. Do not consider yourself as crazy, I see things. Consider yourself as, I'm ready to be educated in the world of the Creation.

Don't tell me the tree talks to me, or the stone dances, or the dog tells me he is hungry, because I feel his soul, interact with it, and see how it interacts with you. (:40). Because you see a beautiful child being carried in a cart on the street, people turn around their head, they talk to, and they praise the beauty. Now you are that child. And everybody looks at you, as much as you look outside.

Try to understand the interaction of the field. Do not look for verbal communication unless you're dealing with a man. Understand the emotion of the language, understand the emotion of the interaction of the fields. This is very important for us, as we are preparing the second system to come into operation. To set up the Satellite system. To set up the next phase of transmutation. Take things and see how things have improved. How you suddenly change direction. You don't do the things you wanted to do. The materials you did not want to understand and see. The position you were not considering, which now has become consideration.

We are there to not bring the change by force, we are there to bring the change by understanding. And with it to change. Once we understand we can change ?? ?? do till he's dead .

So as I said, today, in this teaching, while you're all at it listening or thinking, you're all are receiving the fields from the Enhancement Center flight room in Linz.
(... phone ..) (:42).

So what we want you to do is to understand this. To understand how, what the planet was short in giving us, we are getting it in a different way. And see, if you're eating habit changes. See, if you're breathing habit changes. See if your school of thoughts of doing things changes, and suddenly I don't know why.

We will continue with this for months to come. So, as the system is free, we carry on what we call, using it to continuously elevate the what we call, interaction of the fields on this planet, on this, in this area, for those of you who have made a connection by being here, by meeting somebody who's been here, or being in a way, in touch with, and across with the system.

We have set it up to bring the emotion of peace. We have set it up in a way, to bring the soul of peace, and with it, we can and we will show, and we'll make it important for all of us to understand this change. It is part of Foundation's work. And is not just all the time, as I said, Gans making. You made the Gans's, you made the Nano coating. (:44). And you made your systems to see how the fields interact. So you've been through alphabet of what I call, the technology.

Now it's time to make sentences. Now it's time to make letters of peace, using this technology, adding the knowledge of bits and parts together, to be able to make that word, to be able to make that sentence, and to be able to make the letter of peace with the knowledge we have.

As I said to the officials in the past few hours, past few minutes while I was, while you were listening to the Intros, we need the technology to be a tool of peace. And we have to see it, to be with it, to understand it, to make that difference to become, with the correct knowledge.

We are not waiting for changes, we are waiting for us to change. We are not there to wait for Messiah to comes, we know that Messiah is us for our Soul. And it's us who has to decide that time and position. We don't need to die to become a Messiah. We can become Messiah as part of our life, as part of the living, and part of the work we do.

A lot of you are looking for physical interaction for the confirmation, and whatever else comes to you is just a dream. But you have to understand from now on, the dream you call the dream, has been part of you, which you ignored, because you never understood.

There are no more coincidences. There are no more just happened to be. We are there to make it happen. Because the technology, the systems are set. (:46). When we spread these systems across this planet, the way you have done with Gans's, now we connect with you. Now we set the signs, we set the scene, every jar of Gans you have in the house, if it is made by the materials from this planet, and we are made from materials of this planet, they are already made connections. It's you in how you receive it, in which direction you will receive and what you give to it.

Try to understand the Keshe Foundation is the way you are, nothing else. It's not something. It is not a religious organization. It's not a cult, it's not something else. It's the Totality of the work, in how we understand the world of Creation, in a matter state, and in the field of energy. How energy becomes matter, how matters become energy. Then we take it to the next step. Then we take it to the what we call, understanding of the next step. Then we come to understand, what we need to do ourselves. It does not to be all physical, it does not to be what we call, "show me something." Now is feel me something, that I can ignore, deny, or hide all the feelings, because if I accept it then I know I have reached the point of the maturity.

As I said, we brought you the technology, that it does not stay a mystery and doesn't become a magic show. We build the systems we've brought in, to be part of the process of understanding, and not part of the magic work. (:48). Now, the way we have set the system up, and the way now it's running, as we are speaking now, it brings that change, it brings that position of change, it brings a condition of change for all of us.

And it's important for many of us to understand this, and how we come to understand more and more about the work of the plasma. Interaction of the fields, collaboration of

the fields, amalgamation of the fields, division of the fields, cooperation of the fields, clusters of them, or combinations of them. And to understand in Totality, what is there to come, what is the change which is to come, and what each one of them as an interaction an amalgamation, or being adjacent to each other, effects, creates, and brings about.

We've seen any of these, but we never understood. We stood between the two pictures and felt the fields, or what it creates in us emotionally, and what it creates in us physically. Sometimes we feel is our muscle tissue, and sometimes we feel happy to be in it. Sometimes we don't want to be in that field. And now if a painting, a static color can bring that to us emotionally. You can imagine what the dynamic systems which are running in the universe, and the way the fields are running within the Linz Center, (:50). will effect you. You put two pictures and find the interaction between.

We have put two systems and we are not looking the interaction between the four meter separation. We are looking at the interaction of the fields from the other side all the way around this planet, back to the other one.

This is where the systems come into effect. It's a three dimensional system. So, it effects the system sitting in Linz, is not what you see in the room between the two systems. It's what is from the other side of the system, all the way around this planet, to the other, in all directions. What have we, and how we interact. The system does not choose the path. The fields of the universe decide the freedom of the path, which is given to it to cover. Does one of these freedom of the path, comes to your soul, that in a flash of light, you get elevated. In a flash of light you understand something.

As you see with the Knowledge Seekers (KS) who have been through the system. As one said, for an instant I smelled the coffee. That's all it needs, is that instant flash, which makes it to fall in love. It's not something which grows for years. So, what you will see. Watch what you do. Observe how you change in the coming weeks. Observe how you start looking at things in a different way, than you were looking before yesterday.

We put the system into operation about 12 o'clock yesterday, around about 11 to 12 o'clock. See if you felt anything? (:52). Did you wake up with a different emotional feeling? I did. The fields are so deep. I wrote to one of the KS and he wrote back to me how he felt. It's so deep, it's so profound, that it's like opening the eye, opening a new dimension (D), opening to look at the things in a different way, to be.

And it is important for us to understand. It's important for us to be able to develop this knowledge, not for us, but for the others. One of our Knowledge Seekers who is on the line, knows exactly what I'm talking about. We have chosen, if comes, to create the first child through the embodiment of the two systems. I think we have found the perfect partners, and the no possibilities of accident, or something happened. We are so confident in this, that we can take the step forward. Creation of the perfect souls. In a way, now you go to what we call, test tubes to choose the color, to choose the skin color, and eye color, and whatever. Now, we allow the soul to develop that perfect soul for a child to be born in the dimension of the Soul, and then embedded within the womb of the mother.

The technology is so advanced, that this is not a dream anymore. It's the reality, which we can deliver. It was a pleasure to come to this conclusion, that we can, (:54). and we have chosen I think, the right couple for this work. If they decide in the coming weeks and months to do. This brings a new dimension to the work. It brings in dimension, to the life of the man in the space. We are not here to create a child for you to see. We would like to see how the children of the man in the space, when they fall in love and create the next generation, that man knows how to handle. Man knows when he brings the soul to Earth to show them the mother land, what it was, and how it comes.

Bringing a body through the atmospheric condition is with a lot of hazards. Bringing a soul in the dimension of the fields and then transforming it to the physical dimension of the man on Earth is totally different. You'll understand why we are doing this. We are testing, setting up the dimensions and the directions for the future tests, and development generation, and what's to come for us in the space. This is not a fun to do. This is something that we have to do, to be able to perceive and to see what is to come.

Many of you will come to understand the changes has to come by the understanding of the operation of the system, and not by what we call, changes in the system, because we decided to bring the change. We have developed technologies, that is not mysticism anymore. We have developed technologies that, (:56). it is a confirmation of understanding the technology of the Creation. It's not any more going to a mosque, or a church, or praying to something. It's what we are, and the way we do. And the way we take shape in doing it. The way we allow it to happen. And the way we can see it, to be able to what we call, bring the change, not for anybody else, but ourselves. Not to try to impress. We are here to understand. The technology is a technology, when it's understood and can be replicated.

We haven't made one reactor. If you look, we have two system flights, each one carries around about 14 reactors around that. And you have 6 Head Units, each one carrying 10 reactors. And then you have if you put it together, something like about 140 - 150 systems, each one working in synchronized manner to create the condition, which we want. We saw each Chair gives exactly the same effect with most of the people.

So the technology is not one made accidentally. It's repeated a 140 times. So it's not a technology, it's an industry, it's a commercial system. We can put these reactors in batches of 40 or 100, and send them to anywhere around the world. (:58). And then you fit it into the frame you receive. And voila, you have the system.

We have units, which is sitting in China, we can distribute these systems by the end of this year, the body will come from China, and the systems will come from the Keshe Foundation Austria. We have a team which can replicate. The first six systems is already, will be in full capacity use, in German operation next month. You can literally from anywhere around the world go to the doctors who originally started with a field ?? of the KF in their surgery, and literally go through a specific condition preset in the center in Germany.

This is for refreshing, and energizing your body and the cells. And then you'll see what they get out of it. It's the job of the doctors to see, and to observe, and to evaluate, and then with us to improve the system. As many of you know, Keshe Foundation is not in a medical game, we are in a space game.

As you go into space nowadays, we've seen in the past 30 to 40 years, the fields of the universe have made some of our astronauts and cosmonauts, and whatever "nauts", crazy, or blind, or mentally unstable, due to the interaction of the fields of the universe with them. We have covered all those, that will not happen to you in this system, which you will go in, you're protected. You're in a cocoon of your own energy. No one can interfere with, unless you allow it to interfere with itself.

Which means we come to a point that, (1:00). what is known as psychosomatic. Now, the same "psycho" works out the "somatic" of the body of the man to put it right. This is the beauty of what I call, correction by itself, balancing by itself, understanding by itself, developing by itself. And then in that process, bringing the changes by itself to the body of the man.

How much, how far you as Knowledge Seekers will develop this, is entirely up to you, and the scientific organizations which go beyond it, and before it, and in understanding it, we who are ready to prepare for the delivery of the Totality. We are ready to deliver the understanding of the system, we are ready to work, not in understanding the system, but to see how you interact with the system.

In many ways, the business of setting up the technology has taken a long time. But now it’s not just the physical technology, it’s a scientific space energy connection. It needs to be understood, it needs to be set up that it brings that change to many of us. You’ve got to realize, as I said, they said, "oh, he made one unit and worked." We have made plus 140 units, plus many other units, which are sitting in the background that is developed, and it'll be coming in to repeat.

You’ve got to understand, when you sat in the Seat one, almost all of the people felt the same. When you sat in system two, (1:02). most of the people felt the same. When they sat on this chair number three, most of the people felt the same. So, the system is repeatable. All it needs is to tune to, who does, who doesn't. We understood it beautifully.

Those who come in deliberately to say it doesn't work, because they want to block it. It’s like when you block receiving the love. Somebody can love you as much as you like, but I don't want this love, I want something else. It's like being married and you find a mistress, the love you receive all the time from the wife it’s not good enough, because I'm not prepared to receive it, even though it's always the same and even better than before. Because I want to receive another love. This is what we clearly saw in the systems. People who come in and deliberately block themselves to receive, or they come to stop receiving, but saying they want to receive, because they're not ready to handle the change.

But, we see the change comes afterwards when we talk to them weeks and days later on, that you know something happened because you blocked the system, but the system has got you, as we say, by the neck of the fields of your soul, interaction of the fields of your life. Physically, you say no, but emotionally and soul wise, you have been trapped into it.

I said to an Iranian friend of ours in the Keshe Foundation, this machine is for the people who go in it, it's like the Iranian girls, many girls push you on the table, no, I don't want you. They pull you by the leg under the table, I love you. (1:04). Creates a confusion. But it depends which ones you want to accept, the hand in the front, or the push of the leg under the table, which under the table is the soul of you, and the push away by the hand it's you to say, no, I want to say, no, it didn't work because it suits me that way.

But we reach you. Once you go into the system, you are receiving the fields of the universe, does not matter how you fight it, because you fight in the physical dimension, but the soul works underneath. It elevates you, it brings you to understand, and it brings you to be aware of.

In many ways, we are ready to deliver a technology which man and the mankind understand, and makes it responsible. Also responsible for its Totality of its environment. Where you live, the plants which live around you, the trees you brought as a hostage from Africa to Europe to work. You've got them by the body, but they haven't transferred their souls. The birds which you brought from one country to another, you trapped their physicality, but the soul still belongs to another position. All these will come an end. If I want to be here for you to enjoy me, I have to be in a position to be happy with my condition and soul.

When you go to green house, and you see a plant, looks like a plant from another continent in your area, but does not have that freshness, does not have that joy. It's very much, the man has not understood, he capture a lion in the zoos of Europe, (1:06). it's exactly like a captured plants in the greenhouses of Europe. We see the, what I call, the sadness in the eye of a lion, we see the same in the emotion of the plant. These are the things which mankind has forgotten, hasn't forgotten, never understood.

When you look at a plant, which is from Africa, or Brazil, or whatever, and then you look at the plant in Brazil the same, you see a big difference. You feel the emotion of the plants. We ignored it, because it was good for us to ignore. Because we captured the slaves, we took them from Africa, made them slaves and took them to America and whatever. But they are not slaves, they don't fit into the environment. They're still, that freedom of the soul of Africa is within them. It's so the same with the lions. So, the same with the plants, which we take as granted that we took a plant from such a such a place, and look how good it looks.

Did you ask it, how does it feel, to be in captivity? And not the air, the strength you need it's just a food you're given because in the air, then you force it. Have you ever thought what means to be a captured captivated plant in a environment, which is not for it to be?

But what we learn from, what we do with the people of the universe? Would we bring them back to Earth and lock them up in the field zones, that it shows who they are for the others to see? Or do we invite them, would you like to be here and show your beauty? (1:08). It's different when you take him to the grandma by drag of the hand of the mom, because we are going to Grandma, you come. Or you run ahead, we're going to Grandma because I love to be at Grandma's house.

This is what we have to learn. This is the purpose of all these experiments. This is the purpose of our setting up these things. As I said, we ran your MaGrav systems. We ran your test. And speaking about the MaGrav system, all of you said it doesn't work, there is something wrong with it. We have a beautiful news for you. The MaGrav systems set, I think our Iranian team are here to confirm to you, with the electricity bill they live, they received this week. I think, if you could have the internet, which is now banned by the Iranian officials to talk.

Usually, they chose the two houses, exactly the same two apartments in the same building. They received the bill after 11 months, more or less, 10, 11 months, Keshe Foundation apartment use, for 10 months shows electricity bill of 8 dollars, which was about 80 cents a month. As we've been told, the next door, or same apartment, in the same building, has received a bill around about 20 - 30 dollars a month.

So, we built the MaGrav system, we build a system for the two sets of the houses in Tehran, and the data confirms both the same, and we have seen a difference. How come when we build the MaGrav, set it up the way we taught you, (1:10). we get 80 cents a month electricity bill, for all the air conditioning of the Sun, the heating of the winter and everything else. And next door neighbors pay massively more, massively much more for the same.

In a way, what I was told, the same unit next door, this is my neighbor, this is the writing of our team in Tehran, per month, that is 25 days, it's $45. That's each month. And the Keshe Foundation setup pays 80 cents. So, we teach you, but you don't want to understand, what we teach, what we put is for you, as Knowledge Seekers, to understand, and to be able to follow the process, and to see it and to be able to expand the knowledge on it.

To understand the process of understanding, and how we do it, how we expand it, and how we will expand on it. We will bring the process and we will change the process, we'll add to it and, what I said before, I post you a copy of the writing of the report, which we have received, that we can see. (1:12). This is what has come in. Same unit next door, my neighbor, per month, 25 days, 45 dollars. Now, you see how the systems work. Now, you see how the structure works. Now you see how we work in putting everything back together, to be able to let you do the things first, when you can't do it, when we do it, we show the difference.

The understanding of the work is understanding the process of interaction of the fields, how the fields interact, and how the interaction of the fields creates a condition for

achieving the new, what we call, dimensions. The new Totality, and at the same time to understand how things can work. What we teach, if you can follow what we teach, if you understand it, how to follow, it brings that change. It brings that step, it brings that understanding of the process of interaction of the fields. Does not matter in a MaGrav, in a flight system and in the process of understanding the Totality.

What we do, what we set up is now to understand the interaction of the fields. If we could enhance the energy by so much in the MaGrav system, the same structure of understanding of the MaGrav system is used in EU, in the flight units, in, what we call, the Vision unit. (1:14). This process brings us the understanding of the Totality. This brings us to understand how fields interact, and what their interaction brings to which part. In a physical dimension, or in the emotional dimension, or in the sense of the Totality of the emotion and physicality together.

Try to connect the Linz Center. Try to understand its position in the field, and try to see what it brings you. Because it's not us anymore. The gift is free to all to access it. We can pick up one by one, and in, what we call, transmutation, to bring you here. The whole process is to create that Satellite conditions. We set up this structure this week, it's literally to connect with, as much as we can across this planet. That when it comes to transmutation and transportation, and mobile system, we already have established a line of connection. This is the reason for it.

As we said, when you come into the system, you make a connection. Now the system is out there to establish that connection with everything. That when it comes to you, it is totally connected, it's already has worked. As we said, if you remember, in the previous teachings, when somebody comes in, says, "I had no feeling, it didn't make any effect for me," we tell them to come back in a second time. Out of all the hundred plus people who went through the system, (1:16). only one or two people, the second time and the third time, they say, it does nothing to me. Then we had to find out what it doesn't do.

It's in a way, we've seen the people who come, to confirm in the physical condition, that they are in control, and they decide what they receive. In a way, if you don't want to go to the grandma, we don't drag you, we leave you till you are ready, everybody else has gone, I should have gone with them too.

In that process, we bring everything to be as it planned to be, a structure to be, and hopefully many of you, start feeling, start connecting. As I said, we are ready to go, we're just about setting everything up to go. The first Enhancement Units will be start getting out this next few weeks. Then with it, we deliver the systems to Austria, to all of you to be able to use it, to be able to fly with it, to be able to work the way we set up, like the MaGravs.

We gave you the MaGrav seven years, and now we show it, the way we do it, it does the same. Now the Enhancement Units. We will deliver the initial Enhancement Units, for those who ordered it, if your structure is set up, and we start sending the units across. We

have come, and we'll come to an agreement, complete with the American government in the next few hours, next couple of days.

The units to United States will flow in. (1:18). This is in response to what we've seen, and the decision made, we do. Once we come to agreement with the Americans, in the coming couple of days, the Enhancement Units to United States will be released.

The unit in Uruguay will go through, the Chinese who ordered their units and ?? wanted the refund, you have to show us you have a place to receive it. Within 48 hours we deliver the first unit to you in Chinese, and the rest will come through. It's your responsibility, according to the contract you signed, to have the facility, and the doctors, and the scientists to monitor the changes.

So those of you who ordered your Enhancement Units, we start going through to the delivery of the first units, the next two or three weeks, because the first units are built and we start using it accordingly. The units into Germany will be moved, and we'll start the operation.

As I said, putting the unit working yesterday has brought a lot of facts, how we had to change things. And in fact, I was not happy with what I saw in past four weeks happening in Tehran, and around Iran. What brought us to conclusion, was what we saw in Ukraine. Our commitment to the Iranian nation stays the same. Our commitment to the Iranian government was that, our technology and what it brings, should not cross the borders of Iran. We never have been aggressive for three hundred years and it should have stayed. Now they start things in a different way, we respond the same way.

We're opening the technology rapidly as of today. And hopefully within the next few days, (1:20). we'll come to an agreement with the American government, and the Europeans, for release of the technology rapidly of the Enhancement Units.

So, our Chinese friend who are looking for the system, your system is down the road, you have to pay the balance of what you committed yourself, show us the premises you have. Show us the doctors who accept the responsibility. We have a doctor in China who would accept the responsibility for it, and we deliver the Enhancement to you within the next 48 hours. We are ready to go.

And we know this time, you cannot copy our systems, even for the Chinese. We invite the Americans to copy it, because we don't see America as the land of freedom. We see in America an opening for the Foundation for what is to come. ..

On the other hand, all of you who are ready to accept the technology, you have to be ready to accept the consequences, and the beauty which the technology brings. It has to be set, and it will be setup, that we start delivering the whole of the technology in one go, as of this week. We are not worried about what you can do, we are looking forward to what it brings, and what will change, and what it will show. The systems we deliver should bring that changes, which we are looking for. It'll be interesting to see how the

rest of you enjoy the new technology. It's not coming to Linz anymore, (1:22). it's where you can go near, to enjoy it near you, and how you can become part of it.

Thank you very much for today. I hope you've got enough, you know what it's coming, and try to link and join with the Linz Center. It is like a love of the Creator, it's freely spreading. It's there if you're ready to receive it. And we'll see how things turn up. If there are any questions, please let us know after the break. We'll make a few more new things which is sitting in KF. For a lot of you that might use, for the development of the technology.

Rick, would you like us, to take us for a break. . If you can, it's a ?? regular things, show the pictures, and the paintings, and the health Units, and the new discs that people can see what is on the site, of our regular systems which you show, if it is possible.

Proofed to HERE >>

<<< BREAK >> 455 KSW October 20, 2022

(working break today .. Mr. Keshe talks about products with Rick no videos)

K- In the store, yes. And if we can explain it, you can read it. The people can see what ?? is technology, because we get the same things every week.

The new the new discs have come in. It took us nearly two years to produce 10 new discs. With this disc you will learn, we'll do a lot in the future. It's taken months to produce these (10) units. And it's a pair of them, which they come back in. If you got it there. There is a new sculpture, which has come in, and new paintings, which has been added to the system. There are new products, new Pain Pens, new Pain pads, which is coming out of the factory in Iran. (1:24). We start delivering those in the next month or two. So the Pain Pads which we stopped about a few months ago. They're back into stock from next week or so. But this time, it's a new production. And it's about 3,000 Pens, which is more or less completed in Iran. The MaGrav units coming out of the Iranian factory.

You got the new what we call, Gans production, which is an Iranian team has evolved in ?? evaluation and into production. And they have increased according to their statistic, more than six or seven times, than the normal production. We have added, we have adjusted it, and it works beautifully in production of Gans's.

Would you like to go ahead, I'll leave it to you to explain.

R: Okay, or what came up One link that I have is for the plasma field mirrors, which we see on the screen here. Now, let me put the link, direct link for that into our chat for everyone. And into the other chats as well.

Okay, so this is the plasma fields mirrors. And you can see from the images of the size, and kind of what they look like. They stay inside the packages. And it says, plasma field mirrors, handy and portable educational tools. (1:26). They help you to interact with plasmatic fields and to release emotional blockage, they bring balance to your entire fields. They are made in more than 30 to 40 Nano coating sessions. During this time, we cover up the wide spectrum of field interactions between the soul and body inside the nanostructure using the special combination of Gans's in conjunction with Nano layers. To create the strongly compressed field, the process takes in average between 2 and 3 months for one mirror. The mirrors are designed to be used as a pair, one mirror for each hand. They are also highly recommended to be used in conjunction with every type of plasma unit. Additionally they can be used to build and test plasmatic systems. And it mentions that the mirrors are sealed in order to protect from damage of the Nano coating material. So do not open, it says.

K- You see, the thing is with this mirrors, it's like now we see it with the paintings. When people go in between them, in a bigger scale, but in a looser way. This was put out three, four years ago. Every year, we can produce a very limited number, as we said, take two, three months to produce one pair. Ten of them has been released this week by the Keshe Foundation manufacturing. It takes us a year or two to do any more of them. It's very time consuming.

As I said, (1:28). the bigger version of this is the paintings. People go in between the paintings and feel the changes, or the fields. Now, you will see it what we release. But this is much stronger, it's a much stronger fields.

It's very useful, especially for those of you who join the transmutation on the Mobile system. We'll tell you as you, as we said, you need a stereo system. These systems will change. We'll tell you how to connect, to be able to bring that, much more balanced fields for the transmutation. It's very limited number, it's working, we release it, those of you who bought the previous one and these, we'll come to you for testing on the transportation and transmutation in the very near future.
Carry on.

R: Okay, let's see what else we have here. Well, in new released products, well, we have the satellites and flight simulation experiences. But also, as Mr. Keshe mentioned, there's the Gans paintings. I think we showed. Well, I know we've shown these before, and a number of them are sold out. You can see most of the previous ones that were shown are now sold out.

K- We have commissioned, we have requested for two artists, to gather their the works of the Gans, and we support them with the Gans's which is necessary for them to set up the first painting exhibition of the Keshe Foundation. (1:30). We have talked to the people who do art exhibitions, we gave them the premises of the Keshe Foundation on the two floors amongst all the systems we have set up.

So soon you can enter, or attend, or come to the first Gans art exhibition. Talking to one of our Knowledge Seekers who work closely with us, he has offered us the Exhibition Center in Venice, in Italy, for the show of the work of the artist. He's a very good Knowledge Seekers working with , and around the Foundation. Setting up art galleries is his work. He has, he's agreed to, or he likes to run the Exhibition. So the artists who work, start working with the Gans's, we give you an international platform, that not only shows the beauty of the Gans's, but it shows how it's used in another way.

Aligned with the same thing, if you remember, our Knowledge Seeker from France, a few weeks ago, showed the use of the Gans production in the vineyards of France. In the next couple of weeks, hopefully, the Keshe Foundation for the first time, we'll put this bottles of wine, which has been sent to Keshe Foundation, that, if any of you would like to order, we put you, most probably, through directly, to the what we call, the vineyard, the arrangement has to be made, or Keshe Foundation puts you through to the facilities that you can order wines, which are made through Gans's, Gans system production, which Joel showed us. Then we'll go for that process, depending what he agrees, arrangements are made in the vineyard and the delivery. (1:32). So, we start actually showing the art and agricultural products of the Gans production.
Carry on Rick.

R: We've seen some of the previous images. I think these ones might be sold now. Loop is still available. I don't know if that's updated or not. But loop, would be the infinity loop here. And they come in as a pair. That's one new product. And there's also, you have this sculpture work. Plasma spiral and plasma pyramid.

K- One of the sculptures has already sold. This is sculpture is already sold. There's a second one, which is coming in ?? go ??. This one is sold, it was sold in the first days. We start showing the application of the Gans's, if you're an artist, and as we said, you can bring your work and allows you to show what capabilities the technology has.

R: And what else do we have here? (1:34).
K- The new MaGrav systems from Iran is more or less the same.
R: This one here, the home enhancement plasma power unit.

K- Yes, there is a number of these which is sold. We're waiting for export licenses to be issued in Iran to be shipped out, and should be done within the next month or so. These Enhancement Unit, our team in Iran tell us, it's much more effective than the MaGrav units, which you saw creating a dollar bill. They think it reaches at much faster. Because they're testing it, they've seen it. As I was told, you hardly see any amperage usage, which means no power is used. It'll be interesting to see for those who bought, especially

in the US, now we are coming to an agreement with Americans to ship the goods out directly to US, how it will manifest itself. I will show it soon.

R: Mr. Keshe, this mentions this is a trial system and so on.
K- Yes.
R: Offer ended the 20th of July.

K- It stays the same, but now, the deliver for those who ordered is getting done. The materials has been put together, the structure. Now, we have to get export certificates, to get licenses and some permissions for it.

The only energy system which Keshe Foundation now, offers is the present MaGrav systems and, what you call, the Combination Electric Gas unit, which is to be delivered from January onwards. (1:36).

Okay, we've done the commercialization part. Would you like to see if you can go on the questions.

(End of Break)

If you're an artist, if you do anything, not necessarily the art if you develop something. We had Canadians with us last week, or the week before, and they brought with them something, but they left it on their bus or train. I said to them, bring it in, if you find it, get it back to us. We promote you, we promote the material you make.

It's there, we opened our patents for you to be able to enjoy it and develop with your knowledge. Now we give you the ground for it to do, to be able to show what can commercialize. Soon we get more and more, the new website hopefully gets completed. You can literally run your shop on the back of the Keshe Foundation Shop. In the next few weeks, hopefully, when our team complete this, you can like, what we call, Amazon, or whatever, open your own shop on the website of the KF, the Store of the KF, as a commerce, what you call it, website. From B to B, or A to B, or whichever you want to do it. This allows.

That's what we said, about setting up the intellectual, know-how, and research website. You come up with something, you put it there, and it's the responsibility of the people to respect it, and to help you, or to cover you for what they use from your technology. (1:38).

Okay, let's go to anything else.

Q: .. Can the mirrors be shared with others, with loved ones, and so on? Are they personal?

K- I don't think they are personal. This is a field interaction. You can use it. They just came out at the right time, especially for the Mobile units. They came just about the right

time. I don't know if will take us another month, two months, maybe next year sometime, we'll release some more. But, those who buy this we keep a track of when they come back to you.

We tell you how to set them up to use them as a stereo head unit, but this one we can use for transmutation very rapidly. It's only, what I call, 10 sets of them, and this gives us a very good, what you call it, test ground, pure fields for transmutation.

Q: Can you expand on what the mirrors actually do, please?

K- The mirrors are multi-layer fields. And each layer creates a combination of different fields which covers a large spectrum of fields. Being black, they only absorb. But that's what is our ?? way of thinking. But in fact, they radiate more than they absorb. It's like a black hole, but this time we decide the black hole.

As very much like, what we call, (1:40). in plates, if you remember we take the plates, we Nano coat them, and a non-Nano coated, or we put two Nano coated plates in a Gans Box. Now the media is what is in between it.

So, even being black, they still radiate fields towards each other, to each other, and how they interact with each other. This is interesting for, what I call, the understanding of the interaction of the fields. It's not just that one goes to one direction, or absorbs everything. We preset these layers, and when you have 30, 40 layers of Gans's, what you call it, Nano material, to create that one layer you need at least another 10,000, 20.000, 30.000 layers to make that layer. So, it's a combination. It's a combination of combination, increasing the multitude of layers.

This is what we are looking at. Increasing the, what we call, the possibility of Creation of more different field strength. It's unique to make these. It has a lot of applications. Then a lot of, what we call, you enjoy if you feel if you can feel it, if you can feel the fields interaction, you will understand very quickly the things you can do with it. .. (1:42).

Q: .. I observed that many Knowledge Seekers struggle to understand about the power of the emotion of presence in the formation of the peace summit, the improvement unit, and the uplifting of the soul of world leaders. Could you guide us better about this knowledge? Thank you for the guidance. (1:44).
K- Can you repeat the question?
Q: I observed that many Knowledge Seekers struggle to understand about the power of the emotion of presence in the formation of the peace summit, the improvement unit and the uplifting of the soul of world leaders. Could you guide us better about this knowledge?

K- It is something you interact with the world leaders, with anyone. Because we are made of all the same. We are made from the same amino acid (AA). You might have a dream about a world leader one day. But now with concentrating and directing all the fields to

one direction, we make it possible to extend, to increase the possibility of interaction, and how they perceive and how they see, and how you make a connection.

In one of the trials we had a couple of weeks ago with the Canadians, if I remember correctly, one of them said he met with Putin, I think, if I am correct, or he interacted with him. He spoke about something else, but not about war or whatever. So, it gives that opportunity. We've seen people who in the system, they speak to Pope, or they have a connection, it's what they wanted to do.

We do not create, what we call, a private phone number connection. We create a condition for, what I call, (1:46). the souls to meet, or to connect to, to interact to be part of. That's all it is. It's not that we give you a private line to, it's you who opens that channel themselves. It's not a magic show, it is not that, is going to be something different. It's not that, is going to be, we have a special connection and access, you can use us to reach ?? creation. We concentrate, we put all. This is what, it can be explained in an easy way.

If war has a field strength, if anger has a field strength, so has a peace a field strength. So, when we concentrate on the strength of the fields of peace, this is what happens. This is what we see, this is what we perceive, we set it up to, what you call it, to reach that point.

We want to feel a joy, we go to a place to find something which makes us happy, we create a condition that, we want peace. For that we create a field strength of, the way we create a field strength of the joy, or happiness, or laughter. That's all it is. It's no magic, it is not something we do special.

We just learned that we have access to such a tool. And how we want to use that tool. That's straightforward about what is happening, and what you do when you use it for any effect. (1:48). You were not aware of it, now you have it, you can use it, you can evolve it, and you can enter it.

Any other question?

Q: .. What is the best ratio between two of the same Gans, to get the best field flow strength between them?

K- It's how many man you want to put against another man, to push a stone and one pushing against, or moving in a specific direction. But this time we are talking about a field strength.
(… My headphone got trapped in a hook).
So, it is how much you want to do by the ratio of magnitude of order.

It's not if you do 1 to 2, you will get double the effect. It's an order of magnitude. How much, how many Gans's.

We don't have a Gans's counter at the moment to, what you call it, to measure the exact amount. We don't have, what you call it. (1:50). We haven't developed technologies to measure the exact fields. Today this morning, I was explaining to our team, how to make the very preliminary field strength, current strength measurement tools for our systems.

Because with a voltmeter, with an amp-meter, we can connect to measure matter state. We don't have. We have field detectors, which we built years ago in Switzerland. But we don't have a Plasmatic field detectors yet. This is what is to come by research and development. Then we'll see what the next step will be.

But one to two ratio, was it the same amount of Gans's which you chose, because a drop of Gans has thousands .. of times, thousands different, than another drop of Gans, amount in it. So, this comes as an evolution, as a process.

We'll learn how to detect, and is it of the same isotope of the Gans? Or is it different isotopes? And how many of each, the way in matter state now we can pinpoint. It takes time with the research and development to pinpoint and develop that side. But in essence, when you do one to two ratio, did you exactly measure the same amount of drops? And was it the same density of the Gans's in the liquid when you chose, or water?

One of the best ways I have learned is, don't use Gans's, but use Gans water, (1:52). which is an amalgamation of fields, and that's why we always say, use the Gans water and not the Gans.

Any other question?

Q: Salomea .. I'm so glad that your unit of fly, is an instrument for creating peace. Because I am peace, I am "Salomea," which means peace. So my aim on this Earth is to bring peace at the soul level. And I am so happy that I found you. And together with the Foundation, we can create peace on this Earth.

My question now is related with this conflict at international level with Ukraine, and Russia, and Keshe Technology and Iran. Do you think that Iran utilize your technology on this war and on this conflict? And what we can do to stop them? You start to say something, but I didn't understand very well. Could you clarify? Thank you. (1:54).
K- What you mean by, "I started something?"
Q: I mean, at diplomatic level, because at the soul level we do. But I know that you are involved in diplomacy. I don't know if still conference on Vienna, diplomatic conference, they still on (5plus1)…

K- The diplomatic talks, on the 5Plus1 is ongoing. It's reached a point of conclusion. It's just that, every time one moves, the other one changes the post slightly, then they react to it, and they change something else, and they start negotiating on a new point. The principle… and it is ongoing, and we see …

<< audio of K breaks here >>

K- So, we have to see what the other bits will come to. It's not the diplomacy. Now we see, there is another, what you call it, a spanner in the work, with the situation which has happened in Iran with whatever is going internally, and there is another new developments.

Again, we've seen, as you said, use of the technologies of, very primitive use of the technology, which is pinpointing towards Iran, in Ukraine. These are not acceptable in any shape or form, with the way we work. We'll see how things will come. We'll see how things will take shape. It's not the way we envisage the work.

Iranian nation is a peaceful nation. You've got to understand, the government of a nation, is not necessarily the people of the nation. Hitler was Austrian, and he took Germany into war as a leader. (1:58). Because he had a different criteria, and he built his way that way. We see this now, in certain sections of sectors of different governments. As I always said, just because you got a mustache it's not your uncle. This is what we have. This is what we need to add to. This is what we want to add to.

We communicate with both sides, we stay loyal to the nation of Iran, the same as we supported the other actions, and what we do, and what we move. It is for the, what you call, how the government's take this position, and what will turn up.

As I just explained, about the time of Hitler, if you remember, when they had these rockets, the very first rocket we got to know, they just pointed them at a certain direction, and they landed wherever they landed in London. The new drones we see used in Ukraine, pointed to, having the source of production in Iran, they are of the same. There is no… It's one of the most basic systems you could ever built.

They say, it's so primitive. But I don't look at it that way. As I explained to the American officials, the way we look at it, they made it so primitive, that no electronic jamming can come into it. It's looking at the whole principle in a different way.

Does it use our technology at this primitive stage? No. Because we have made systems so complicated, (2:00). to interact, to jam. These systems fly literally on the seat of their pants, as we get reports, and we see it's coming out of, in what we see in Kiev.

So, it is to understand, are they using Keshe Foundation technology? I don't know yet. We believe not, because it's a very sophisticated if it comes in, and those who see us, tell us, what we get report of, these are very primitive systems. But it's been built in a different direction. But is there a need for such a thing? It's something we have to see how we can handle it, how it can be processed, how our, what we call it, the next step will be.

There is a huge worry, I was talking to a couple of people in past few days, if what we saw in Tehran in past few weeks, and what we see now reports in other direction, would

these people stop with this process? Or seeing it as a success, and they can do what they like, would them bring to become more arrogant, we see more hotspots created?

And this is why, what we call, the elevation of the soul of these leaders, needed to be done. We'll see what we come up with, and how we come up with, and what we see. But we will take actions to, what you call it, to interact, and to be part of. (2:02). We sit there to, what you call it, advise or bring a new position, and to be part of to create peace through technology.

We are not in time of DaVinci, going from one house to another offering better tools, and creating another dimension, that creates the next one to be more powerful. We have to share the technology, that everybody stays equal, and cannot be abused, and create that condition of peace. This is what we're sitting in with, and this is what we are looking for.

According to what we had in the first week of January this year, peace talks was 100% completed, till both sides moved the goalpost, as they thought they had the upper hand in January. Then we saw it in March, what happened. And interaction of other nations came into it. Talks are complete, peace talks five plus one is 97 or 99% complete. But we see new sanctions put, added, that aggravated the situation. But Iranian moved again to, and in the past few days what we see coming out of Ukraine, definitely creates a bigger, tighter restrictions sanctions on bigger layer of Iranian organizations. Because they got involved in something which they should have not been involved, in a way, as they see it, as the other side sees it. (2:04).

The biggest worry for us as Keshe Foundation is if this escalates, and one of these missiles, by accident or deliberately, hits one of the nuclear power stations. We've seen energy points have been targeted heavily by these attacks from both side. But would it come push to shove, of shove to push, where one decides, "now I'm going do something." The largest nuclear power station in Europe sits in Ukraine.

We already know a lot of problems in the IAEA, trying to get some hold on it. But, what is the outcome? We do not know. As I informed IAEA, we have brought materials on hold, and we are producing materials if need be, as many of you saw with Fukushima, when Yukoko went to Fukushima and tested, and showed the absorption of the fields, and then they took over the other parts of it, which we gave the analysis and the work with.

This is part of the work we do. But essentially, we stay the same. I know as Romanians, many of you are worried about your borders with Ukraine, and a number of Ukrainians are coming to your borders and what is it, get transported across borders. But, in essence this is a state war between churches, not between nations. (2:06). Russia .. Orthodox Church, is part of the government, and part of the structure of the two working ?? team. The same is Vatican and other parts.

Any other questions?

Q: .. If a Universal Community (member) chooses to come to Earth, and wishes to manifest itself as a man, will he or she land as an adult, in physical form, or as a child, a newborn, or an elder?

K- They are already here in all shapes. It's not that there's going to be a time when you call, you see a UFO, and you see people, or you see the lights. You're already interacting with them. It's how we interact and what we get from it, counts. It's not something, it's going to happen, it's going to be a doomsday, it will be a day of interaction.

It will be more open, it'll be more transparent, it'll be much more learning. As I said, there's not learning one way, it's a learning for both sides. Amongst us, or us amongst them, is not something new. (2:08).

So, when you're hoping that Universal Community. I heard somebody written recently that, Mr. Keshe and the lady in London, meet in the Universal Community. I never been there to meet. But they use my name to get themselves credibility. I meet with Mr. Keshe in the Universal Community, what a non-sense.

But yes, we meet on Earth, in teachings and the rest of it, but they started these things, especially from the Romanians. That they have a special, or they're part of UC. We are all part of the Universal Community, because we are part of the universe. It doesn't give anybody a privilege.

I see this situation in Romanian community and a couple of other communities. That, especially has been said, we meet with Mr. Keshe in Universal Community. Yes, we meet on Earth, it's part of the Universal Community, like the rest of it. They try to use it to make themselves credible. If you do, please give me the address where the meeting was. At least we know we attended some without knowing it, even at the soul level.

Any other question?

We are part of the existing structure. We are not oddity. We are not something kept in the black box away from anybody else. If you go to the caves of central France, you see the drawings from thousands of years ago on the walls of the caves. So, it's not something we just seen. (2:10). If they've been there that long, how many of them have stayed behind? It's a beautiful place to live

Q: How much can Spinoza thought help us in understanding plasma science?
K- Can somebody explain to me what is Spinoza?
R: Spinoza, I'm trying to look up here in our friend Google. It's a person involved in a philosophy or a way of life, apparently, and it's often identified as Pantheism, the doctrine that God and the world are the same thing, which conflicts with both Jewish and Christian teachings, it mentions.
K- What? Repeat again.
R: Spinoza, this Baruch Spinoza, who is this. Let's look them up in Wikipedia, maybe that will help us. It's a Dutch philosopher in the 1670s. An important philosopher. Well,

we have to get into it here I guess. ?? how he is rejected by these various communities and so on. (2:12).

K- What do you see?
R: Okay, for Spinoza the whole of the natural universe is made of one substance, God, or was the same nature and its modifications or modes.
K- So, what was the question again?

R: I don't know how to get into this simply, it's all about philosophy, and about how is defined God. It's a substance consisting of infinite attributes, each of which expresses eternal and infinite essence. And since no cause or reason can prevent such a being from existing, it therefore must exist. And so on and so forth. Bunch of arguments for and against, and so on. So, Paulo's asking how much can the thought of Spinoza, or people who follow him apparently, his philosophy, help us in understanding plasma science? I would say that so far, we haven't needed it to understand any of the plasma science, but maybe it'll help somebody get to the point where they start to appreciate plasma science somehow through this person. But it was like a lot to get into here, without giving it proper time. (2:14). You'd probably need an hour to argue the ins and outs if you don't know it already. Okay, move along.

K- Ok, I think you answered a good question.

Q: … On the first day you said in your first health teaching. You said, once human beings has found the meaning of life, have no greedy, but just live happily, then human being will live on Earth for six or seven hundred years, or even one or two thousand years. Just like the other creatures in the universe. So, you mentioned that the trees have lived in jungle for several thousand of years, is that different from human? Can human not living that long. So, human live only because of their own choice, and a fingerprint embedded in bone structures. So he wants to ask, what do you mean by understand the meaning of life? What does this mean? If we understand this, can we extend our life?

K- We see long living trees in a stable conditions, stable areas, you'll see olive trees. (2:16). We've seen olive trees in southern Italy years ago, they live hundreds, thousands years old, they say some of them it's 2,000 years old, and they don't destroy them, the tree. They pick them up and replant them somewhere else to survive.

What brings the stability of a long life? Why man's life is short by animals? Why some of what was said last time, some lives have just a few seconds, few minutes? A few days, or man lives longer? Is it because we consume too much? Or is it we spend too fast the energy? What happens to the people who live longer? Do they have a stable psychological, and physiological and food pattern? Or have they come from the genes, who did this and survive longer, and it's in their genes?

Now we live longer because we interfere with medical interference. Something goes wrong with the heart, or something goes wrong with the leg, we just operate to change

something. Living a life 80 years, a hundred years, thousand years, it depends how much we take, how much we give and what is the level of maturity of the soul.

I think we met a guy in China, he was saying, he was 250 something years old, 3 years ago. We met Secretary of Mao Tse Tung, at 100 years, is tall and walking like a 40 or 50 year old man. (2:18). What's the secret of taking, what's the secret of living, that they have found, or it has been in their ancestral gene. It has been developed further, and further, and further?

What essentially if life, physical life on this planet has two levels. One (is) how we live in the physical dimension. And what is the size of the soul which needs to be fulfilled within the central body of the man, that reaches his point of maturity? Is our soul reached a point of maturity after five years, to fill up it's cup, as we call it?

Or does it need, or do we expand it to be 50 years, or 100 years? We live a two cycle life. We live a physical life, we live an energy cycle life, and when the energy and physical match up, then we see the difference. Then we see the separation. Each one's cup is not the same.

In the future, this is something which we plan to expand into understanding, for the knowledge, for the science, to understand. Is that, what is the size, what's the capacity? What is the density of the fields of the Soul of the Man in the center of the brain of the man? Is it a small Sun, is a giant Sun? (2:20).

The Soul can only expand to the size of that gap. As I said many times, a Solar System cannot expand, a universe cannot expand, unless there's a room that it allows it to expand into. You can have a very big balloon, in a small room, you can blow as much as you like. You cannot get bigger than the room is given to. Or you can have a balloon, you blow it to the shape and the size of this room, you have given it to.

One thing which we have not understood, and at the moment is not, man has not even come to understand it, is, we can, we should be able to. Like the way we see the stars, we said the Sun is a small star, we have another star which is 50,000 time, 1 million time bigger than our Sun. What allows it to expand to that, to be, or does it give it a bigger strength because it's so (much) bigger? Would a very small neutron Sun, do the same job as a Sun, which is million times bigger than it.

These are the investigations for the scientists in the future in regard to the brain of the Man. So, when it comes to our birth, when it comes at the point of birth, now we go and we get tested, and they tell you what gender you going to be, what diseases you are going to have, and the rest of it. Some countries, they even tell you the month you're born, with the size and your weight, what level you'll in the population, how tall are the highest level, or medium level, height or whatever. When you follow the chart, you see it fits into it, because it's so much data.

In a coming time, (2:22). when we become more mature in this subject, with the soul of the child in the womb of the mother, and the size of it, the light of it, whatever, we should be able to say the maturity point of the life of the child's separation from physicality. That's for sure. We didn't have ultra sounds, we didn't have MRIs, we didn't have things, we built the technology, we built the machines, and with this we can say how old the child is, what is going to be the date of birth and everything else of it.

In a coming time, we can literally, if you understand, know the size, and the source, and the strength of the fields of the Soul, the position of it, now we know where it is. It should give us a very good indication that, how long will it take to fill this cup up. Considering the expansion, the growth and the space will be given by the size of the brain and the rest of it.

It will not be a surprise to the parents if the doctor tells you, this child will live two hours after birth, or 20 years, or 40 years. The way we now say, with this disease you're going die at this time. Because now we understand the space, the energy, we can see the strength of it. And we say, okay, if you live in this position in this part of the universe, you will live 1 million years, if you live in this position, these are the fields of it, you live 10 years.

This is the part of the knowledge. We see this a lot in the Enhancement Units. In the Enhancement Units, we will see a lot of things, it gives us a lot of indications of these kinds of behaviors. (2:24). In few cases, we see it very clearly, the Soul still has expansion to do, the soul has. But we do not know the size of the room in the brain, we don't have an MRI of it, we don't have the physically find the position of it.

In some part of the brain, the material has grown into the space of the Soul. So, Soul has already interacting in its physical dimension, as a field. It's like you have different magnetic field on the Earth, which everything is reversed, but you don't see it, but it's part of the environment. We see these things, then we have to learn.

Then we can assess the length of life in the physical dimension. Or if we say, okay, the child will going live 5 years. We decide because we have a control, we understand the soul to let the child grow in the Soul level, which is unlimited. As we're all, we are ?? hearse with the understanding of the work of the Soul, then we live to the dimension existence of that soul, and you're here for thousands of years.

This is what I said, with this technology, is what is to come. It’s what is set to come. It's what is planned by our physical dimension, and everything else. We see now, people live longer life. But we see, in the past, we went from 10, 20 years life to 30, 40, 50 years life, we doubled it. Now with 50 to 100, we are doubling this. But what is the quality of that life? (2:26). We lived 20 years, fully effective. We created, we made children, they grew up. How did humanity grew so fast, from a few creatures to start with? We live shorter life, effective life, we created a few. Then they did the same.

Does this long life of 100 years, 120 years, where we are productive from age of, let's say, 12, 15 to 35, 40? Then you have the rest of the life which is non productive, in the regeneration of the next cycle of life? Has it got a purpose? Or is it just to be in, just to be alive?

We have to decide, if you still stay 100 years, we are effective 100 years with no pain, we are active, there is no need for 65 years pension line, that you can't do anything, you've got to go home. These are, and then we see the cycle of what creates life. Why do .. people die more after the pension, first five years than they do in the next 15 years. Once you pass the five years, seven years, after you've been pensioned, you tend to live a good life another 20 years, 15 years in majority of cases. Because you took the pressures, you took the changes.

It takes 7 years for psychosomatic to take place. You're active, you stopped, you don't do anything, and then you run into problem. This is how that happens now in the Western world. That's how the insurance companies make money out of it.

But can we look at the Soul of the Man, the capacity, the space of the soul in the center of the brain says, okay, this brain, (2:28). this soul doesn't need to stay in the physical dimension on Earth with all the problems. Let it travel somewhere else, let it go somewhere else, and lives in that dimension, the way the stars do, for millions of years. We have that choice now, we understand it.

We've seen people, if you remember the lady in the last week of the test, she came out of the system, she said she could see her first light and then second light.

Now we become wise to that. And we had another gentleman with her, in another system, "I felt nothing." Because he came in to feel nothing, because he had to prove something to himself, not to us. We knew it before he goes in. Then it's something wrong with our system, because he came to prove to himself it's wrong, because that way he proved that he is in charge. We've seen it, very recent two or three cases like this.

So, how much do we control? What is the size of the Soul of the Man in the physical dimension? When you look at the MRI, is it one millimeter, is it three millimeter? Is it already out of 3 millimeter, grown by two and a half millimeter, and it's a fully mature soul? Or is it half a millimeter, and it's got to grow into three millimeter, to gather more energies from the environment to be the soul of this planet. So, you live 200 years to get that filled up, or it was three millimeter gap you filled, you were born with two and a half, and you've got three years to live. Then we say the child accidentally died, or the person suddenly died somewhere just in sleep.

Did that maturity reached with that that breath, that it brought the right energy for separation? Putting aside accidental death, (2:30). we have to understand the new process. Putting aside the understanding of Totality, we need to understand the next step. These are part of the knowledge missing, we don't have it. This is part of the, it's like speed of Sun always been there, speed of light always (been there.) We never knew they

had a speed. Till we had the tools, to be understood it. We've made tools for it, to observe it, and now we understand it.

Now, the new technology needs new tools, to understand it, to extend it. That's what I said, whatever man has learned about science today, is a speck of dust in the knowledge of the universe to come.

Here you have control over everything, you control the temperature, you control the pressure. You can't do that in the universe. What happens in the expansion of different fields strength of the universe? We have a lot to learn yet. As I said, we haven't even stepped up, to stand up, let alone to take the steps of a ladder, which is a thousand steps high.

No one in the universe has managed to understand all the process of the Creation, even those who claim. But as a Creator, as a Totality of the Creation, we have the whole knowledge. In the future, we'll see, I didn't know, now I know. (2:32). We see, we know knowledge's from other parts of the universe, which is not ours, but we have access to it. It's like an app, you can lock into and understand what's happening in that part of the universe.

There's a lot to come, we just opened a tiny little bit in the door of the knowledge, and you think it's hard to understand, it's unbelievable. When the door of the knowledge of the universe, or the Creation opens to us, you need to be part of the whole of the Creator to understand the Totality of it. We just look at the narrow pinholes of a pinhole, of a pinhole, of a pinhole, and sometime we think we are Totality.

This is what I always called, "I am the Messiah." Our Knowledge Seekers were taken by the security, "why does Mr. Keshe says he's a Messiah." And he explains, "he's a Messiah of his own Soul, nobody else's." Then, this is what you've got to understand. The national security's in one of the country's took people of the Keshe Foundation for interrogation. Why does Mr. Keshe claims to be a Messiah? (they said,) yes, he is. He claims to be, but he is a Messiah of his own soul, not the rest. He shares the knowledge he has.

I always say, I'm a Messiah, but Messiah means for myself, not for you. I can show you the path, the way I went, but it doesn't mean you're going to end up in the position as I have. Does it mean the position I'm in, is better than yours, or yours will be better than mine, or with another person? Or does it mean, we reached to the same point? Now you understand why we share the technology, open patent. (2:34). Because now you can estimate, you can assess where you're going to go.

This is what we have to understand. We need a new technology, we need a new understanding, we need to create new tools to measure the speed of M field. We need to produce tools to measure the strength of a soul. We need to create tools to see the interaction of the souls. We put two chemicals together and we see how they interact. What happens if you put the soul of this and that together? How would they interact?

Nowadays, I think, in America and some other countries, you have to do. It's the same in Iran, you have to do a blood test before they give you a certificated for marriage, to see if you match.

Would you put the two souls, a strength, do they fit. In which part do they fit? What are we going to get out of it? These are the technologies, it's not anymore a dream, that we have to ?? believe.

Man will be so busy with development of new science, new technologies, that he will not even have time to think of war. The challenge of who knows more in scientific, will be more engaging for human race, than actually how to make weapons. Because knowledge becomes an asset of peace, and knowledge doesn't become an asset to be better than the other. This is what is to come, we have to understand. We have to develop technologies to understand.

First of all, now we know the position of the Sun of our life, which is our Soul, which has been in the center of our physicality. What does this Sun mean? What does the color mean? How they interact? How do they actually move? (2:36). All counts.

Then what the rest of us learn from it, what do we change to those who come to us from other parts of the universe? What do they bring us to add to test? "Oh, they've seen such and such a thing happening in this part of the universe." Can we do to understand it, do a research on how this happens? Now we take our knowledge to another country to research and develop, and find out what it is. In the coming time we get the passengers of universe bring us what they've seen, or we take them to another place, can you tell us how this works. Measurement of the Soul, the strength of the Soul, the interaction of the Soul, it will be one of the prime engagements of the human life in the coming time. It's not anymore what was said, something which was written 300 years after Christ, because somebody felt that's a good thing to put in. We're are there to test it.

Any other question?

Q: .. Will the elevation of the soul also result in a change in our DNA?

K- Most probably it will do, effect the RNA, everything is magnetic field, most probably.

R: So in that case, wouldn't that be an indicator, or a test in a way, for elevation of the Soul, (2:38). since mankind has now became possible to measure DNA only in the last decade or so, basically?

K- Yeah, but what is interesting, when you speak about DNA. Can we keep on testing the same DNA of the person, every 5 years and see if it stays the same? Or does it change? Our DNA changes, if by according to the food we eat, the environment .. we live in, it must have a ??. It's part of the evolution.

R: This become an argument with the medical profession, because they've been trained for so long to believe in DNA is not changeable, and your DNA is like a permanent structure that gets passed on. But it's not that way. Because changes that occur even in the womb, when the babies are growing and being born and grow up. There's lots of changes that occur. These are the same scientists that say that, was it 80% of the DNA is junk DNA. And only now they're starting to find out, oh, it's not really junk. It got a purpose, and so on.

K- Nothing is junk. It's a ladder for ??. It's like they say, you use only 10% of your brain, or 20% of your brain, or whatever. It's nonsense. Every single cell in the brain has a use, otherwise it won't be there. There is no non-usable position, even if it could be a ladder, or a structure to hold other positions. (2:40). Everything is not, it's not a microchip that every single bits is put in to do.

Part of the microchip you have, is a structure to hold it. So, when you have a DNA you have a part which is functional, part is a structural, part is for interaction of the functioning of the Totality.

Scientists tried to say, it's junk, what can it be. Without it cannot, you can't have a computer running if you don't have enough it in a frame, or stuck to something? They can't say, it's a computer without. If you don't have a wire, how do the chips communicate with each other? You understand?

So, which part of the DNA is a structure? We haven't understood this. Which part of the DNA is a field controller? Because we never understood, even the DNA is made of magnetic fields. Which part of it is the shielding for certain magnetic fields?

We just have come to something and because nobody knows, they can stick whatever they like into it, and they get the Nobel Prize for it. Like we've seen this week, all coming out for anything else. Or they get rejected, because those who could not think of what you thought new, it's something wrong with you. We've seen it with the Keshe Foundation.

So, when somebody tells you 80% of the brain is not used, excuse me, do you see empty head? If it's there, has a function. If it's been put there, according to the structure of the field of the universe, every cell has a multiplicity of the application and usage. (2:42). This is what we don't understand. We never had this.

The cell in the brain of the man is like a switch ball. It depends how is orientated, how are the fields around it effected, then it has a different application. It performs different. We say now, that cell is there, or that area is there especially for that function. Yes, for that period of time. What happen when we change the environment? We see the same.

We saw this when what they said, the helmet came, was made by the Israelis in Belgium, where we did tests on the coma patient. You look at the dots on the lines. We looked at how these lines changed according to something else we added to it. Did it show no

reaction, which means is dead, or it showed no reaction because it does not matter, it's not involved in that part of the work. We showed this graph sometimes ago.

So, these are the things we haven't understood, and we need to understand. Multi-functionality of the position and the strength of the same cell, creates different position, different reactions, different emotions in the body of the man. We never understood this.

It's now we understand how your nervous system works. If you go down the line, there's so much information going down. But if you touch the .. ?? measure, there is nothing on the skin in there, in a way. Compared to the amount of energy, which is going down into the legs, to the arms, to the fingers, to every cell of the body of the man.

But now we understand it, because we created Nano materials. When we measured it from outside, it's super resistor 20 Mega Ohm. (2:44). When we actually get into the layer, it's the best free run, free space, for high speed communication, because there is no friction.

This was not available to us up to now. Now we see in Nano layers, we can transmit it back into, understanding of it. Till the Keshe Foundation did not produce the Nano layers, with the way you do on your Cu wire, this was not understood. We were called a criminal, terrorist organization, because we discovered Nano layers without using radiation. So, you are all terrorists because, what I call, a guy in the company in Belgium decided this only can be done with gamma rays, and you all produce it now. I became a terrorist and a criminal, because I understood this first and I explained it, and you all use it.

Now we understand more, we have to develop. As, what we call, the new technologies are developed, the new materials will come up. You will be amazed what, in Keshe Foundation, in research, we are developing and changing every day. It's, knowledge of Creator has no limit, except when it comes to us limiting, according to our own intelligence. The beauty and the strength of it, the beauty and the mixture of it. The minute somebody tells you, "this is all and there is nothing else," it shows, ta-da! You're dealing with an ignorant guy.

Any other question? (2:46).

Q: Dean .. So, the technology Mr. Keshe, that's coming out, will it enhance the souls that I see on the screen (leaders)? Will it change their position? Will it bring about this peace that we also require?
K- Expand.
Q: So, those beautiful souls we see on the image in front of us, will they go cold or hot? Will they grow thinner or fatter? Will they experience the fields? Will they become enhanced? Will they elevate? Will they change their position? Will they understand the true divinity?

K- In different ways, we all do. But it depends. Enlightenment comes out of the time, position and the strength. We can look for enlightenment all our life and never get it. (2:48). We can walk at age of 2 in a room, and be enlightened. It's no limitation.

The people, the pictures we see, and I can add a few more to them, are they enlightened? Some of them know the truth but they cannot speak it, because they're already in a track (belong to an organization), they cannot go back. They're part of the system, which now (if) they're enlightened, will kick them out. Because they came through it, they were sponsored by it.

If you look, any of the people you talk about on the screen, which is President Putin, the Pope, the prime minister of Italy, and, what you call it, the King of England, have they reached the point (of enlightenment) sometime themselves, and they understood, but they cannot do anything, because then they get kicked out of?

Very few have the audacity of the, what you call, some of the leaders in this countries to walk away. With Putin, we saw Gorbachev. Gorbachev could have done worse, he walked away. With Pope we've seen, others who have been enlightened, but he don't do.

I was talking to one of our people yesterday in the center. You know who I'm talking about. I've said this before. We have a very beautiful Knowledge Seeker, (2:50). he's a Knowledge Seekers, a diplomat and politician, and a banker and everything else. He was originally the head of central bank of a country. Then, on the political structure, he was appointed to be ambassador of his nation. Because of his background as a economist and everything else, and the head of central bank, he became an advisor to the Vatican, having an office in the structure near to the office of the Pope. He was trusted because the countries, or the country and part he represented is where Vatican gets most of its, what we call, a lot of money from, and a lot of other things.

His position in Vatican became, because of his country and his whatever, whoever becomes ambassador of this country has that room, so it wasn't something especially given to him. We were sitting at dinner table in ?? a house, a few times this discussion came up, he said to me, you know Mehran, the problem, I've seen the world leaders coming and crawling like a dog to the feet of the Pope. He said, you cannot believe it. We see it, and we see it accidentally, that ?? we were allowed to see it. But we see the world leaders literally crawling, and they come into the room to the feet of the Pope and he has to raise the money, ?? he have to feel he is more powerful than them. What else these people tell this, what does emotion creates in the man who is called the Pope, that the powerful world leaders craw to them, bend to them. (2:52). What things they do to hold on to this power. What deals they do to get to this power.

We saw it with, as I said it, Hitler, when he used to give speeches, he used to ? . We've seen it with, now the new cabinet of Italy. Berlusconi is back in again, why does it give a strength to a man at this age, to want to be a minister again, when he used to be a prime minister and has all the powers to do what he like.

Then we've seen the position of Charles, what .. can he do at the age of 72. He is a generation gap between what is happening, even though he wanted to be in, he is part of the gap. If you want to run a nation to be, you need to bring the young generation in the twenties, thirties, forties, not the seventies and eighties.

This is why in Keshe Foundation, we walk away at the age of 60 from Universal Council, because the new life has to come in. As I said, very soon I leave the Keshe Foundation to be run, because I'm there as a name, but it has to be done by the new generations, new things which has got to be done. But we've been witness to a lot of it.

Q: .. So, what question would you like humanity to ask you?

K- They ask me everything, every week as they like. There's nothing humanity… I'm one of you, but with more knowledge. (2:54).

Yesterday when we were doing a test, one of the Knowledge Seekers, because this is what is going on now in the center. I said, I'm not one of yours. It needs you to be in it with the soul you have. We are no different, but we are, we've seen more of the writing on the wall. Your knowledge, what you learned, what is written on the screen, is what you can read on the screen. We see a bigger screen of the Creation. So, that's why it sounds strange, because you're not, what you call it, grown in the strength to see what we see, to understand what it is.

Q: So, what does it feel like to know thoughts?

K- Humbleness.
If anybody had the knowledge I carry, if anybody had the power I carry, and detached from wealth, but uses the wealth to expand the knowledge for the others, you would have claimed everything on this planet with layers and layers not to be seen, hidden in the structures hundred times bigger than the Vatican and God knows what.

Being part of takes a lot, and changing through that position takes much more power. In June - July of 2004, when I walked away from Lockheed Martin with a massive offer on the table, I could have lived a king's life. (2:56). But none of it would have been shared. But today's it shared. How many of you saved your life with the Corona? How many of you have used the Gans's for different things, or pleasures, or pains, or whatever? How much more of it is coming. Some of you saved money on the MaGravs? That's what should be. There is no question to ask, it's just we see a bigger canvas with more painting, and man has chosen to be color blind to the sizes, and some of the colors on the canvas. That's all.

Q: So do you see souls present, seeds present within humanity, that have the beauty to expand humanity, enhance humanity and take it forward?

K- Yes, yes. I was asked by a Knowledge Seeker yesterday, or the day before. "what do you see, when you look at something?" I said, you see one thing, I see two things. You

look at the physicality. I see the physicality, and my soul feel the soul, and I react as a combination of the two. We don't ignore the dysfunction, we don't ignore it, but we look at it.

We see a lot of things. But what's the use of doing it? You've seen the people who come to the center. They come one way, and some of them would go back totally different and changed part of their life, ?? not all of it, because they get elevated. What happens the next day, next month, next year with interaction they ?? had. (2:58).

As I said before, if you build a system which can repeat the same thing in the number of people, now it's a technology, it can be repeated. That's all we do. You ask me, what's the next step? What is, what they can ask. You can ask any question. It has to be logical, scientific, and correct to answer. There is no room for theology anymore. Philosophy and theology was when we had no knowledge of the existence. Now we know part of it, we have to expand it, and then we find answer to all the questions.

Q: Mr. Keshe, many souls they experience though, they have this feeling, this understanding with inside themselves, everything that you speak about, and they understand it through their environment and what they've grown to become. So, trying to bridge the gap between the theology, what they've come to understand, and the science and the knowledge, is that plasmatic field, that .. enlightenment, whatever, yeah.

K- Yeah. Like you, were are there every day, where we do these trials, and this week there are no trials, but people come for different thing. Yesterday, I wish you were there, and you could video something, with something we tested. It was amazing what we saw in the man, in the change in the man. I said, I wished Dean was here, he could record this. (3:00).

We see physical changes, we see emotional changes, we see confirmation that I exist, becomes so powerful, that I actually exist, I matter. It is mind boggling in what is we see, what we come across.

Q: If each soul is unlimited Mr. Keshe, do they bring that unlimited beauty to the forward when they come to certain positions, and so it can change anything and everything in a moment?

K- For themselves, yes. Most probably, most probably, yes.
Q: Then that interaction with inside themselves then expands out across and effects many others?
K- Most probably, and how they interact, and what they take from it. This is an ongoing development in progress. It’s not something that stops. We look at one angle of when they come in, we don’t look at all the angles when they come in.

Any other question?

Q: Thank you, Mr. Keshe.

K- I wish you were there yesterday Dean. (3:02). It was an amazing situation.
Q: Yeah, I apologize ..
K- No, no, no it's not that, we have noticed that some things happened. It would have been amazing. We didn't do any, what you call it, flight test this week. So, as I told you maybe next Tuesday we'll have a few people coming in for it. But, what we see, observation is amazing. How people change with it.

Q: Can you expand on that Mr. Keshe? Can you give us more information?

K- No, because the work of the Keshe Foundation, where we set up these systems as like now, the test is ongoing with all of us, with the material in the flight zone. We test different capability of the system.

The flight test is part of transmutation, it's part of. We test other things, how materials do, like we did with Rick. We call in and get other people to do. Originally when we did the first enhancement structure system, the first, what you call it, units were very primitive in testing certain fields. When you bought those field testers, gave us a lot of information, and then the others. But this knowledge we already had. Now you get confirmation of more Knowledge Seekers understanding it, this is the important thing. Otherwise we can keep on building systems. (3:04). It says, okay, this is the system, we go to the next one and that's it, you just follow.

There are many, many things. When we opened the room on a Tuesday morning, when we closed the room on a Wednesday afternoon till next week. It's not just walking in into a room, it's feeling the effects of the fields. What has changed in the room? How do you feel when you go in the room? Because it's all fields.

When we get people coming with a disturbed thoughts, or trying to do something, we have a system which we can extract the energy from the room, and that system even tells us how much balance is the field in the room. Even our Knowledge Seekers who built the system are not aware of capabilities of it, they just built it. But when I'm in the room, when I test, it gives me a lot of information.

Who was in there to take, who was in there to give, how much is the balance. We have a couple two three or times, we asked them and I tested them. They can stop part of our system, because both of them are literally flooding. We can bring another couple, put in, they can stop our system, but they literally take everything. Both ways the system stops. But with the materials with the control panels we have, connects us, which way is which.

We had Knowledge Seekers who go in the system, (and they say), "I came here to give to humanity." But my system says, (3:06). you're taking more than you're giving. Many times, sometimes you must hear it from outside when I do this test. The system, we can say if, the person says, "I've come here to give to world peace, I have come here to give to humanity." But my system, when you were in tells me, my god, you're taking a lot to give, most probably. You understand?

I mean, if the soul still needs maturity, it’s still receiving more than giving, or it's taking in one level and giving in another, which doesn't register in our system.

They literally bring the system to a halt, absolutely halt, nothing happens. When we put them out, the whole system runs again. Bring them back in, I want to do it ?? again, I don't tell them what. I said, "do you mind if we go back in and we try a different test configuration." Put them on a system and we get the same result.

Then you’ve got to understand, one system is a giver and the receiver, and one system is a receiver only. So when he goes into the system, it can only receive, he cannot give. So, he cannot interact with, take, giving out. But he takes everything, that even the system cannot give enough.

Or we see the systems go from giving to taking, and taking to giving, you can see this in the operation of the systems. These units. It's not somebody came in and says, (3:08). these are half built system, because the guy came here to prove that it doesn't work, because he had a different agenda, we knew, before he comes in.

Q: So, would you have any advice for people going into the systems. I know you don't usually do this, but is there a balanced position? Is there a position that would help?

K- No. You know what I tell to Mario and the people upstairs? Don't tell anybody, don't give anybody pre-conceived ideas. Because if you give it to them, they come with that perception, and they want to enforce it.

Q: So, is there only a certain sort of soul that turns up to actually experience this?

K- Not really, all souls turn up. it takes different things, if they feel it. It'll be very interesting to monitor the environment of the, what you call it, Exhibition Center at night, or during the weekend, or during the time we are not there, and see how do the plants change? How do they react? How other things in the environment changes. It's very strange, when you look at the plants downstairs, you’ve seen walking around them sometimes, the plant division between the television side and the test side. If you look at some of the plants, have different combination, coordination of leaves and spacing. I come out and have a look when there are people inside, if they change their structure.

Q: I did notice Mr. Keshe, (3:10). one of the plants upstairs is suddenly sprouted quite a long stem towards the light above it, which is unusual, they don't usually see that within the structure.

K- Yeah, but they interact with the emotion and with the environment. ??. These are the things we observe. It's amazing when we see, you know, when somebody tells me, you know, I left my soul or whatever, I felt being somewhere else, you know, in your control room, those panels sitting there. They’re just things flashing, but it means a lot. I see when the soul is not there, we see when the STP is not there. Because everything has a

physical measurement, and we can measure, we can see the fields, we see the direction of the flow of the fields.

One of the systems is directional flow, we see if it is coming in or going out. When somebody says, "I give." If I pass the machine, just pick up a thing, which way the arrow tells me the fields are going. When it comes to the transmutation from one system to another, I see it in the monitors. The field flow is very strong, something is measuring it, high flow in one direction.

Q: The systems are built for the whole of humanity Mr. Keshe. It's to enhance and give the humanity the position and the availability to travel from point A to point B, transmute and do many other things. So, the systems will need to be adjusted for many different positions of field interactions from the physical, physical souls, and the souls, and the physicality present in the moments to follow or in this moment? (3:12).

K- We change it. It's like I said earlier, the physical transmutation is taken out of the system, which is running now. There is no way any of you can end up in the room physically, because we have a control over it. It's all switched off. There's no way anyone can turn up in Linz from Vienna there. Or if you get there, when we open the door we see tens of people running out.

Q: So, the immigration officer is going to be a limited resource to begin with then, Mr. Keshe.

K- Most probably, most probably. We will see. We are learning, it's a part of the process of learning for all of us.

Q: .. What can I donate when I enter the system as a human being? And who do I donate to? Does anyone need my knowledge, my experience? And how do I know that I am ready to enter the system?

K- The way we set up, the life is the system, if you understand it. (3:14). The way we set up, it's… We create a condition that we can control the environment ourselves. It doesn't matter here or when we become Man of the Universe, or we travel somewhere. We want to stop somewhere and see how it is. We create the condition in that environment that allows us to stop and look, or feel. Does not need to be on a surface of a planet or in the liquid.

You travel between two cities, and somewhere in the middle you're stop in a bush on the road just to see how it is, how does it feel here, but it's not your destination. But, oh, I stay here for one more day, I put a tent up. In the space, how do you make that tent, that you can view, you can feel, you can enjoy that environment? Or do you go to a service station where the environment is created and you can enjoy that place, and what you're used to, and you can get something. It's now us how we set up our tent, where we set it, how we set it, and what environment we chose to set it.

This is the beauty of what becomes available to us, (3:16). we become the decision maker of the time, the position and the space. When you mature in the dimension of interaction of the fields and souls. I was explaining this recently to someone, when we see the souls. You interact with many souls.

You interact with, let's say, soul of one person or another, you're in a party, you see them physically, but you see the souls. It's like a flash of light. You know you get lights flashing everywhere, because it's instantaneous, one flash, one, and then it goes to the next one, and again back to the same one, one was the interaction? There is no language, it's a color, it's the strength of the fields, as I call it, of that color. If I hit on this, and this specific soul is blue now, 2 minutes later is green, because that soul interacted with other souls, the energy it got changed, so it changes. At the moment, it was looking at me as a normal person, now it's like, it looks at me, or feels with me as a friend, and now it changes, I don't want to be green. I want distance, you see the change in the color. It's a crazy world to live in this dimension. Absolutely crazy world when you see both, and nothing is hidden. But you choose to close the eyes.

Q: So Mr. Keshe, the souls that have chosen to set up camp here and they're maybe ??. Will they eventually come to a realization, will experience the, you know, (3:18). the condition here and then decide to pack up camp and move on?

K- They do often. It's not the first time. They do often, you don't know them. The guy disappears, somebody was here and he's gone there. I said many times, look at some of the Internet, Internet cameras are amazing things coming up. With people having the ability to record this. In what time and expansion, and how it happens.

If you're not there to do, you're not there to do. I was 19, 20, I was involved in a very, very bad car accident. I saw going in, the accident, and I saw myself outside looking at the accident. The police officers and ambulance people they said, it's absolute impossibility, that you're alive with no scratch. They were convinced, they could not even, when they tracked, the road traffic on the road, because it was a snowy day, night, the ferocity of the accident.

I remember going in it, and I remember standing outside it. It's recorded with the police in Manchester. What happened in that span of time? Those days we had no airbag systems. head on collusion, and the car half the size of what is normally manufactured, (3:20). meters above the ground, and walking out of it. There was not even a way, if the door of the driver side was even opened, because when the police came he says, have you seen the driver? I said, I'm the driver. How did you get out? Not a scratch. The engine was in the driver's seat, more or less. Those, if there is documents, you can go and check in Manchester.

Did it happen? Was it caused? Was the Soul aware of the advancement of the physicality? And to what extent? Are we in the, what we call, position? And to what extent?

I've been through three accidents like this my lifetime. Was it a destiny, not to complete? (3:22). And, is it part of the life, which is not supposed to end, because you've got to do something else? Or are we from another dimension, that we foresee and we come out? But what do you see in cameras, people just walking out of something which can't be. I've been there, three times.

Then the rescue services, when the ambulance, and the police turned up, the track of the road was clear, I was the only driver, the only car, and one which has gone the other way. No other tracks. Around about 60, 70, 100 kilometers an hour. Hitting a wall, and just going up and landing on top of it. I was on the ground. Is it our soul that takes us out? Or are we perceived to that position? Or do we choose to be part of that position?

I was tested for drugs, I don't touch, I never touched in my life. I was tested for alcohol, I was tested for everything else. I was taken by an ambulance to the hospital to check if there is any damages, anything, whiplash nothing. (3:24). Is the Soul aware of physicality, takes it out? We have to understand. We choose to be here, there's a reason for it, or physicality has got nothing to do with it?

It's the same situation as I discuss with you, and it's on the table. Why the Foundation is going through the steps which is going today, for the past few months? Because we chose to expand the Foundation, in a very rapid way. But a lot of things are not ready around it, and it's not kicking into its final phase. Everything has been done. We came to you as Knowledge Seekers to help us collectively to do it.

We get accused of stealing, lying and everything else. But it's not happening, because it's done. It's done in a totally legal way. But it keeps on holding back, and I said to myself, there was a reason for it. But when I look at the expansion of technology in past few months, would we be where we are today, if this would have happened six months ago, eight months ago, when it was supposed to happen? Most probably, it would have taken us to another direction, expanding things what we Keshe Foundation was supposed . Because the knowledge has to be shared with ?? a lot. But the knowledge didn't need to be expanded into commercializing ??, it had to come to where it is now, that now we can expand.

People who are supporting us, cannot ?? tomorrow, next week, it'll be done, it'll be done today. (3:26). And we keep on. All of you. How many of you helped us in the Foundation? Then they threaten us, that we go out, we embarrass you, you're a crook. It's in black and white. Is it shows where it's been paid, it's done it, it has done. And it's there for .

Because when it comes it'll change the life of all of us. Was my Soul aware of this change? Or we brought through other souls to be where we are to unify humanity to come? I don't think we would have been in a different ?? way. We had no choice, it's what is coming to. I wanted the Foundation to expand internationally, that it becomes bigger with everything else. But the souls are not ready for it. We came through the direction of developing the other part of it, which is getting developed in the background.

And how many Knowledge Seekers accuse me of stealing, and you're a liar, and you're thieving, and you promised. Nothing has changed. Because we entered a legal binding contract. And I'm watching them, I'm that guy out of the accident, watching what is going to go. And how many threats we received. You are a liar, we're going to expose you, you stole from us. It's there.

When it comes, I was part of the Keshe Foundation, I was the guy who helped. We haven't stolen from anybody. We didn't go and crash the car deliberately. How many of you supported this change? How you want to make accusation when everybody is in it, and it's all done. There is a reason for it, today to tomorrow, the next week, because I see every delay we have next week, has brought better position what the Foundation is .

The souls who are protecting it wanting it to be there. (3:28). You're going to accuse the Foundation of everything you like, but Foundation is not ready. Humanity is not ready for that, what we set up to achieve. Maybe it'll be tomorrow, maybe today, maybe next year. But I'm the guy out of the accident watching, and I just tell you what's going to happen. It's not promises, it's is not something trying to fool someone or cover something.

We are witness to a massive change. You will see ??. Then, how many of you will be part of it. This is what I did, this is what I do, I was there because of me? It’s because of none of you, because we all got involved in it. It's not the Keshe Foundation, it’s the supporters of Keshe Foundation, which you brought with your donations, with your loans, bringing that condition of change. It’s not going to be, "oh, he took our money and he ran, the Foundation has to give." If Foundation had, he's put all it’s assets to it, it’s for you lot.

It's not for me. I live, I can live a king's life. All I need to do is just change the color of my passport. Threatening us, and we are going public. Go and do, because it's been in public. You were there only when it was good for you, when it was . Now some of you feel what I've done for 15 years, 20 years. Everything has gone into to change the humanity.

Are we aware of it? Is my soul aware of it? Most probably, yes. Go public with everything. It shows how solid we are, how we stand by ourselves. No government pays us, no organization can interfere with the teaching. (3:30). Nobody can stop the way we develop things.

I foresaw a change, which is time for it to come, 12 months ago. I got involved in it, put everything of the Foundation in it, and I went to individuals and groups, and I came to you lot. This needs to be done, because we have to bring, it’s us . How come you're here for the MaGrav system. How come you're here to get a better health system. How come you're not there when it comes to get involved in it. So, which way it goes?

If I put everything in, and you're in it, why you make threats? We have one Knowledge Seeker who comes in, I'm going to expose. Expose what? Your crookedness? You came

here just to take. How come everything has to be from Mr. Keshe, and Keshe Foundation, and all of you just benefit by it.

I'm an outsider, I watched the accident and I see how people have behaved, not a manmade accident, but clarity of the time and Soul. I don't lose credibility, it's not my credibility. It's your understanding of your own credibility. I put everything in for 20 years in public, and 20 years before in private research. If I wanted to cash it in, I would have cashed it in hundreds of days ago, and months and years ago. But the Soul has chosen to bring humanity to that point, and I have to go with it, with the physicality.

Any other question? (3:32).

Q: .. I was unable to attend the teaching last week, .. when you started training people to be Satellites?
K- Pardon? When we started training people to be Satellites?
Q: Have you already started training people to be Satellites in the teachings?

K- We have already. Those who are Satellites already are involved in the whole structure in the dimension we know. It's not that we call you, you're going be a Satellite. We don't send a message, ?? Satellite be ready, you're going to start working today not tomorrow. Part of the system which is run today, if you are a Satellite, or if you volunteered to be, or you are already receiving it. But you have to understand, it's not somebody who knocks on your door, it's not a delivery post. It's the elevation of the soul, elevation of the understanding.

Q: I wish to be a Satellite.

K- Go and register. Yes, go on the Keshe Foundation website and do. Because we will contact those. It's a Satellite, it's there, especially it's there. Go to the section, what you call it, Rick's show, it's there. Every day, every week we get people signing in, to become Satellite.

Q: I've already signed in, in the very first day. (3:34).

K- So, you're sitting there, you're sitting there. You've got to realize this volunteer work.

Q: I can't receive any emails. Last week I had to leave my house, I had to sell my car, so I can buy food, and it's very low income. My phone was stolen that day, I can't access my emails because of double verification, etc. Very ??

K- I'll get Keshe Foundation people to check out in the background where it is, and how they can help you. Rick, if he can put his thing to our private chat, and I get our Internet guy, IT people to look at it. But we don't usually, at the moment, answer to these things, because there's so much of it. Then, what I know we are doing, they're separating the Mobile people from the satellites. We have a very few. We thought we finished with the people who go for flight test and transmutation. But I just found out yesterday there is

another seven, eight people left, which are coming next week, which was supposed to finish.

Then we go into the Satellite system. You've got to understand, the full Satellite part of the work comes when the two new systems come into the Center. This is where it's facilitated, for the position, location, fields, strength, and whatever. At the moment we have two separate (systems). Even it looks the same in the frame, I sometimes pointed out to the people who come in. (3:36). You see this, this system is set this way, and they see it physical, it's physical changes, you see.

Now it's a new system, when we can bring both location, and the fields, and the environment, and the soul together. The Satellite people in a true interaction, you've got a couple of months. The same as with the, what we call, mutation or transmutation and the Mobile system. We will not go into that phase till the two units are actually in the center, we check with couple of people.

You've got to realize, like as I said, the way we do now, you've seen in the Enhancement Unit, the prelude to these EU was tested with a few Knowledge Seekers. Two or Three Knowledge Seekers, without anybody knows. One or two of them even traveled into Linz to be part of the first trials. We tested in different ways for different things, how it works, we build systems for them to see if it interacts. But we look at the physical interaction and the other dimensions, and how it comes. This is the process.

You just got to wait. You get a confirmation one way or another. But the Satellite people, when a time comes, we get in touch with you directly, you'll receive an email when we are ready. You'll be switched on.

Q: .. I wish for you to use me as a Satellite. I don't have access to my emails, my phone was stolen. I have no money. ..
K- It doesn't matter. (3:38).
Q: Just please, just use me.
K- We get a lot of people doing that. It goes to the Foundation. It goes to the IT people who sit. We have to get in touch with the people, with the Satellite. There's a lot of things behind it.

There is huge amount of work behind it. We have to go through these steps, step by step. It's a development step, it's testing ?? steps, there is the other parts to it. Some of you who been through the flight system might receive an invitation to come back. Because we want to test the new flight system, you've been there. We're not going to come back, we want to test the flight system, can you register again?

It's like today. The Knowledge Seeker knows who he is, or who she is, knows that we have started the first phase of Mobile transmutation. But to get to today, it's taken us two months. And we are testing in a specific way for ?? oneness. The same person has been part of the original tests. We call upon the people who we know, we trust, we worked with before, we get the exact information we want. We don't go pick people up the street,

can you, do want to become a pilot test. We don't advertise on televisions, or radios or Internet.

There are a lot of Knowledge Seekers who do a lot of work for the Foundation, or with the Foundation. (3:40). They bring a lot. They do a lot. They open a lot of things for us.

We have a lot of silent Knowledge Seekers who do a lot of work in the background, because it's for them, it's for the evolution of humanity.

Any other questions?

Q: Wang Lynn .. When we are in the physical soul level of sense, then we can really feel the pain in the past that we have made, have marked our body.
K- What you mean?

Q: … Like, I was in meditation, and suddenly I feel so much pain from my legs. Right now, I know that means a lot of information inside, that when the fields was trying to open in my body, (3:42). if I'm in a correct, like a frequency, or how to say, ?? I can read those information, what that pain means for me, what happened there.

Because actually, when I was awakening, I don't have that pain there, but when I was in that kind of fields, I feel that pain, so that must be something that happened before, and then I can try to find the information from there. So, what I mean is that, I was in that field, the field level is reached to my like, subconscious level or like basic soul level, so that I can now, my body can sense that feeling.

K- I don't know. It could be your present condition created that. It depends what you want to connect it with.

Q: Yeah, but we have tried some exercise and even like we feel the pain, and then we get the information from that. Even I can connect to a lot of people and feel his pain, and tell what that pain comes from, and why ?? some information we get from that?

K- I presume it's another level of understanding. It's how you interpret and how you understand that pain. Which is maybe another dimension, which you are familiar with, you have the understanding, or training for, that this pain is connected. If was a doctor he says, "oh, sorry, you got thrombosis." (3:44). But you don't look at the thrombosis. SO you say, "oh, this has to do with a past, you are running away, something 100 years ago and now you feel it, and it's your past coming in. Depends if you are interpreting it, or does a doctor interpret it. You understand? It doesn't mean that you're wrong.

In this world of knowledge of universe nobody's wrong. Because we take it according to our understanding.

Any other question?

Q: .. In the public teaching of last week Mr. Keshe said that the Keshe Foundation will be globally banned after the coming Christmas. My question is that…
K- I said, they were trying, they were trying to globally banned, Not that it's going be . They're trying.
Q: My question is that, should I worry about this? Because after years of studying I still not have finished all the teachings, I don't have all the backups of these teaching videos.

K- We have a full backing of everything in three, four layers. We backed up everything, We've got the backing of every sessions everywhere. Don't worry. If anything happens, we have consolidated every single, all the teachings, all the chats, everything has been kept. The IT team in the background is storing everything. (3:46).

R: It would be good idea for people to do their personal backup as well. You know, a couple of terabyte hard drive you could probably backup virtually all the 2,000 videos of the YouTube videos, for example.

K- Yeah. There is a lot of things that is backed up, a lot of zoom chats, which has been kept. There's a structure in the background the IT people keep. We are paying for nearly 13 servers operation.

Any other question?

Q: .. We are just those children at the stage of curiosity who ask about everything, and the father is always there to answer and educate. Thank you for being so loving in educating the children of the earth. About pressure of fields, the soul of the physicality in the strength of the blood fields press the fields of the STM and this creates the universal dynamic system. In the multi-core reactors this process was taught by you in the 134, 138 and 144 KSW where the force of the intermediate layers, (3:48). containing the Hydrogen - the feeder, rapidly feeds the common component in the center, creating the compression of the fields and the dynamic system of universal motion.

Our question is, in the capacitors a pressure of fields is also established. Would this system of the Hydrogen - the feeder also be present in the layers between the aluminum barrier, the transition of the Gans, and the center rod, as the amplifying core of the fields that pressurizes the fields generating dynamic system that feeds the plasma flow?

K- I'm lost.
R: It's a long one. Let me try to summarize here.

K- He is talking about different plasmas, different layers pressurizing each other, more or less. But they always do, they always do. If it's there to do, why do you need to pressurize? Sometimes you need to pressurize. But why do you need? You get more out of the plasmas if you leave it free, than actually pressurizing it.

But we do it in the dynamic system because there was something to learn from it. As I said, the new plasma systems, we have the new reactor systems, which is used for us, we

don't have any dynamic system in the structure of the control. We use dynamic system for a specific, one, for a specific reason in the systems.

Any other question? It's nearly one o'clock. (3:50).

Q: Dean … So I don't know if this would be an easy one to answer. There is a thought and there is some people that have said, that if you speak about certain conditions, as in the wrong things, and all the conditions on the planet that happen, that you're amplifying and making the field strength greater, you're adding to it.
K- Can you repeat that?
Q: So there's a thought that if you speak about certain conditions, certain things that happen on the planet, environment, in families, whatever. You amplify it, if it's a wrong intention, and if you speak about it and you give it thoughts and intentions, does this amplify it? Or can you speak about it as long as your intention is to try to help?

K- I don't know, it has different school of thoughts with this one, huh. Some people see it if it's a. I do that, don't talk about that, because you know you bring it in, because it's like you put the soul of the emotion to be where you want it. You're not the only one, I always. Because I see. I'm aware of other dimensions of the interaction.

But, does it amplify it? Or actually brings it out to be sorted out? Or to be elevated for it? Or with coming in, you don't give it the importance and it goes lower? Depends from the point of the observer this.

Because I have had talked some discussions about this for a long, long time. Does it . I always say, we have a very good English word for this, (3:52). leave the dead to be as they are. Because ?? we have a say…
R: More or less, sleeping dogs lie.
K- That's another one, yeah. You don't want to get them barking, or you never know, it could be a beautiful dog coming to you and cuddle. It is what it is. It is what it is. We cannot change it. It is what it is.

R: A time and place for everything. There's a space…

K- Do you wake a dog up in the middle of a sleep? Or do you wake a dog up, and it's hungry and you feed it? It's what I said, it's the same. It's what we get out of it.

Q: Afar … If you don't mind, I was going tell Lin about her pain like when she meditates. Can I tell her something?
K- Yep.
R: This is not medical advice?
K- It's not a medical. Oh, she's a doctor, she can do.

Q: When you meditate, especially when you sit cross legged with the touching the ?? ear to the ?? lower position. Because you feel the pain, it's not because the pain wants to tell you something. The pain, the only thing it is telling you is, you're still in physicality,

because after 5, 10 minutes, you want to ?? lose ?? . (3:54). In time, when you pass the physicality, because your senses, your five senses is very active. After a while, you're not going to feel your body, you can sit for hours, like six, seven hours without even feeling anything, but you passed the physical level, you go to the soul level.

So, it's the same thing if I cut your arm, I can place a suture. If you're in physicality, you feel the pain, you feel the suturing, but if you pass the physicality I can do the operation and without you feeling anything, because you pass that level, you go to the level of the Soul. So it's not teaching anything, just you have to pass that after a certain time.

K- As I said, depends how you interpret it. The ways it gets interpreted. It's by interpretation.

Q: Lynn. .. Yeah, but what I mean is like the emotional level, because sometimes ?? is like the lady, ?? she was in very pain. But when we found why she had the pain, and the information gave to her, she feel the pain is gone. So, I was the, my question is like, some pain, it's like, not usually you have the pain, maybe is some part of your body suddenly.

But it's like a memory. Like, it's not, how to say, ?? but I think it's more like the feeling in the emotional level, emotional feeling pain, but not the body has the uncomfortable, or has some pressure. It's not like that.

Q: Azar, It's very probably. It's possible, it's possible. It confirm the memory of something in the past that you're feeling, (3:56). that is correct. Your senses are correct.

K- Okay, thanks very much. Thank you for everything. And hopefully we'll see you next week. Maybe we share more knowledge next week. Thank you, indeed.

455 KSW October 20, 2022

END

456th Knowledge Seekers Workshop; October 20, 2022

(Topic Index, Transcription Proofed)
(Auto transcription from Elias)

Breakthrough - KF creates Cosmic Ray Fields - which are needed to transmute on planet and U; Weightlessness is balance of Soul with GM of solar system; STM & STP first move to new location before P in transmutation process; DNA not needed - STM provides everything; Cosmic Rays on heartbeat of U; STM works on GM fields of U - not on fields of this planet; Change Knowledge of Man in next weeks; Become detached

from P; Quickly regenerate leg; Spiritual manipulations in your emotion; STM and STP keep connection like in dream; Pole shifts; New plasma cities.

Topic Index

Tested 2 strangers in flight system - felt wind trying push off chair; Confirmed that STM and STP move first to new position before transmuting physicality; First transmutation will be an American; 2 new flight systems by December; Without Cosmic Ray Fields - cannot do transmutation even on this planet; Breakthrough in new science - creation of Cosmic Ray Fields by KF; Weightlessness when physicality finds balance with GM fields of solar system (SS)- not really weightless; Our system embedded with fields of SS, galaxy, and Universe (U); Travel with Cosmic Ray Fields; STM has spectrum of all the fields - where you tap into it; Have made man traveler of U - access to Totality; Man can reach strength field of Soul of Creator in an instant; Through Cosmic Rays man becomes creator of his dimension (D) and strength anywhere in U; Do not need DNA anymore - STM provides everything man needs in D of P - such as absorbing energy, reproducing, existing, and if needed to manifest itself in that dimension; By having 2 systems feed into each other - dictate span of the fields of the cosmos - travel anywhere in cosmos; Those building system have to understand before go to next step; Next step for man to become One Nation; New systems will interact with creatures of U - feel presence; How will Customs Officers deal with visitors - they will look like man - and speak perfect German - but not from here; Cosmic Rays at level of heartbeat of U; Need One Planet OR to start transmuting people around planet; STM does not work on GM fields of this planet - it works on fields of U and Cosmos; Man's energy comes from 20% food - 80% is from environment - now understand part of Cosmic Rays; You need Cosmic Rays to fully transmute and than to manifest physicality - not enough energy without Cosmic Rays; NASA pictures of exploding gases in U - Gans conversion into gases - Plasma Gas Units; See Soul shine when walk into new systems - feel separation of P from STM - feel love of Creator; I'll change the history and knowledge of the man, in the next few weeks; See knowledge of Creation and Creator - have no attachments to this D of physicality; Because we have access to Cosmic Rays - knowledge gathered up to now becomes irrelevant; P becomes as nothing; Access to knowledge through system; You'll know you've been touched by Love of the Creator; If your Soul reaches maturity during transmutation - don't need to get in car ever again; 2023 will be the beginning of the world peace - and understand knowledge of Creation; Hardest thing to teach Man was Cosmic Rays - we have reached it - you all will be a part of it; Deepest wish - When Mobile Transmutations land in Linz - bring friend from U with - shock to you; Open 12 KF Institutes around world in next few months - spread knowledge in one go - teach simultaneously; Flight systems with Cosmic Rays have own GM fields - matter state will dilute; You don't fly anywhere - you arrive; Mobile passengers will gradually become involved; I felt how deep the field forces of the system are - in essence of Soul mankind is ready to take next step; Hopefully start Mobile in next 4 weeks - we'll explain clearly what you have to do; Biggest block will be governments trying to hold on and control; We give one guarantee, that anyone who gets in and comes out of these systems, will be peaceful, will not be an addict or an alcoholic, and will never commit a crime; Don't

want to rely on world leaders - planet needs to gain confidence with each other; Whole world will decide how to handle unjust leaders - not the Americans; They cannot hide anywhere on this planet through the Soul; We help them understand their Soul and return them back to their position; This month we start shipment of EU - 6 to Arizona; 3 to Germany; Process whole technology in one go - hope humanity is ready for change; (We can control the Cosmic Fields - you can experience what it feels like to be a dog, a tree, or what it feels like in another part of U - by changing the G field strength and the heartbeat); When you went to Moon we couldn't confirm the P - now with Cosmic Rays we can - we can support life anywhere; Told NASA to choose where they want to go; We already have the fields of U - but we didn't know about it - just like we didn't know about the STM in center of brain; When man understands power of new T - will live for millions of years in Earth D; You have to accept conditions at point of arrival - Soul will clothe you and give language; If you travel through mountain but leave leg on top - will quickly generate the leg again; I hope we'll see the end of all the miseries and mayhems for the human race;

More about the Gans painting and Gans process for farming; KS asked help because he says he's being spiritually manipulated by someone enlightened; Referred to U Council - with your Soul; People thing this is happening - but no reality to it - it's in our emotions; KF doesn't involve in these kinds of things - scientific organization; KS wanted Mr. Keshe to confirm he was in her dream - replied No (even if I do I won't tell you); Discussion about plasma Butterflies for sale in Store - they react to the environment - in a sealed vacuum pack - do not open; They are living things; KF has nothing to do with "Med-Beds"; You don't dissolve you transmute - like when you dream you return to your bed; STM and STP keep connection; Everything has a history and leaves traces of fields - this is how M fields work you can follow back the traces; Nothing will happen in a Pole shift - everything shifts together - it's a saturation of the fields; Nothing to do with "3 days of darkness" when Sun switches polarity; No special training for plasma Nano coated mirrors - good for Mobile transmutation; A lot of new technologies will be coming with the breakthrough to Cosmic Rays; Man will learn quicker than you think how to live with new transmutation; KF is involved in the background with construction of new cities based on new T and plasma T; Delayed because of focus on flight systems; New cities very different no need for hospitals, courts, prisons, palaces or centers of power - because STM will be mature to understand truth; Micro and macro is the STM and P - then it changes to P and the STM - going from inside to outside - it’s the same. Life will carry on in both dimensions;

ENGLISH TRANSCRIPTION

(:21).

K- Yes, as we say, good evening, good afternoon, good morning to all of you, wherever and whenever you listen to these series of Knowledge Seekers (KS) teachings, (:22). by the Keshe Foundation Spaceship Institute, as part of the knowledge sharing and understanding the new technology. Today, due to some matters, which were rather

important for us, we had to step back and change the time from morning to afternoon. But this isn't the first time we've done. We have done this a few times in the past. What is important is what we gain in knowledge, what we share in knowledge, and how the next steps will come in. As all of you know, we had a number of you in the Center in the past few weeks, and months, and we have learned a lot from you. We learned a lot, and we added a lot.

We extend our knowledge, as much as our team can understand, that they can build and provide the facilities for it. We have gone very deep in the knowledge. We had some interesting group of people this week, very small number. What I call, these are the tail end of the flights people who came to test and experience, and see what they can help us to add to the knowledge. And we heard in a way, what it is. We tested everything, we needed to have the confirmation, that systems are exactly what it is, before we go on to the next phase.

We had a very interesting experience, the last two people this week, which I think would have was in the middle, some will come in the future. It was very interesting. One German, one French don't know each other. And we wanted to understand as a last part, moving from one unit to another. Because before we had a husband and wives, we had couples, we had brothers and sisters, we had mother and son. We used to tell them if you can go to the other side. (:24). They went with the love of Soul, they became part of ?? emotion.

But these two guys were strangers. They just met each other, and they went in the system. The interesting part is as one last part of the teaching, or testing, we asked them to move one to the left, and one to the right. And in that process, we asked as usual, before from the German gentleman, if he can go to the right, and how it was felt. Then we did the same thing with the French gentleman. What was interesting, because these two had no relationship, no connection. In putting them into the machines into the system's. The Frenchman sitting at the front, and the German on this side. We asked the German try to get to the seat on the other side. They're not lovers. They don't understand each other, they have no connection. So the man doesn't see the other man's lap. He tries to find a space to it.

When we finished, the interesting result came as we thought. The confirmation of. The German felt falling off the chair on the left. As always is. As they try to go to the other one. But the interesting part was the German, a big man, on this seat, felt the push on the side like a wind, trying to push him off the seat to the side. Which is confirmation of Soul of the Physicality (STP) trying to find its position before it manifests itself in the physical dimension (D).

STM & STP first go to the new position before P arrives

This was important to us as a confirmation, that the Soul, and the STP, move to find a position, before the physicality (P) arrives. And even they can interact with the STP of

the other person, or entity, (:26). and confirm their existence, confirm their presence, confirm "I am here."

This has brought us into a new dimension of work, understanding, that is correct, what we set up. As we had the others, we had the mother with two children this time, and we did a lot of tests, what will happen, what will the children give, what the mother gives. Other children ?? speak to the mother, and we gained a lot of understanding in that process. But in a way, we have finished with this system.

The next two systems, which hopefully be completed in next two or three weeks, maybe by November, or what you call, December, are the two new systems, what we call, which will take their position in this area. Where we should physically transmute, a person from one to another. What we try.

We have already started setting up to transmute the first person out of the room into the system. We are testing. We've done a lot of tests with it. And we start the first transmutation, is in American, who will be brought into the environment of the what we call, flight unit. At that point, we'll see how much, how far we can push the envelope, in completely holding on, manifesting in this area, and allowing him to become part of the environment of the first flight. In the next few days we enter negotiations with who, and how we'll bring in, and how we bring it in. We're setting up the criteria to understand.

But the technology has moved on. (:28). The technology is very advanced. We have managed as a breakthrough, to be able to go directly into the next phase of the what we call, space technology, we have managed, we have developed, and we are testing, what is known as cosmic rays. Because when we finish this unit, which is coming in, we are not going to build another system for a space job. Up to now in the systems we have here, we are dealing with man, the STM, in the Physicality of the Man within the space of a room.

We are. We have informed you, many of you are aware that, in the new year 2023, we are going for a spaceflight. We have to have a system for it. We just can't do, to become part of the space technology into deep space, we need to create, to understand cosmic rays.

We need to understand the interaction of the fields of the universe. We need to be able to isolate. We need to be able to create the condition, that our system is not Earth bound, but has a condition of the cosmos.

KF has achieved creation of plasmatic Cosmic Rays

So, Keshe Foundation has achieved, creation of the plasmatic cosmic rays, fields, we feel it, we know it we understand it. And now, we are developing a structure to bring these cosmic rays into a Totality, that when it's in the room, the 2 systems are as part of one part of the universe?

In a way, you move from one room to another. You move in the direction that the Totality sits inside. (:30). It's not any more, what is, what has been put in. The dimension. The work of the new system is that, it becomes a universal system. By the time the 2 units here are ready to go, 2 Vertical units are getting developed. Our work will be to transfer people from the room into the Vertical units (which are outside the flight room), or from the Vertical units to another Vertical unit, or from the Vertical unit back into the room.

So, this gives us a new dimension new opportunities, a new structure to create the condition of transmutation, transportation, and every other things that we need. The biggest, the next step, for us to land you on the Moon, we need it. We have to, to create the condition of the cosmos. Without cosmic rays, without understanding the interaction of the cosmic rays, man cannot become a traveler of the space.

On Earth, we depend on the fields of the gravitational (G) magnetic (M) field of the earth. In the Solar System, we are dependent on the field of GM of the solar system. The Solar System has its own gravity, has its own M field. Mankind has not even measured that. We consider our gravity on the Moon, which is so much lighter than the Earth. Now, we have to understand gravitational field strength of what we call, the Solar System.

This is why we see weightlessness, (:32). because we never understood that, that is the field, GM field of the Solar System. It's not weightlessness. It's you. It's the physicality of the Man, which has found it's balance with it. So if we can survive on Earth, if we can survive on the Moon, man should now understand in this, be able to live in the Solar System, without the place, dimension, and position.

For this reason, we need to develop systems, with that, embedded in it, encapsulating it, and the fields of not only the Solar System, but the fields of the galaxy, and the fields of the universe.

We have achieved that, at this moment of time, we have systems that creates that cosmic field rays. We have reached the knowledge, the verge of technology, that when we go to these new 2 systems, we become part of the universal field forces, where inside it, we create the field forces of the Earth, and inside it, we create the field forces of the STM.

Then, we travel the man at the strength of his cosmic ray fields to another position, not as an Earth field, or as a STM field. Don't forget, the STM has a span of fields (he draws a spiral). Here, we were at the STM, here we are at the soul strength of the what we call, the Earth, and the Solar System, and somewhere here is the galaxy.

Now in this room, now, with this system, we have access to the Totality. (:34). Now you can see how easily I have made the man, the traveler of the universe without the fuel, without burning and destroying anything, without traveling hundreds of thousands of light years.

Man needs to be enlightened to understand he can reach the strength of the field of the Soul of the Creator in an instant. This is what we have to understand. This is what the next generation of the what we call, flight system, you come into, will take you to.

In one step by adding cosmic rays, by adding the field of strength of the universe in the dimension of the totality of the ?? systems, we have brought man in the dimension to become the creator of his own dimension and strength, anywhere in the Universe (U).

But what happens to you? What will happen in dimension physicality? Does the DNA of the man has any meaning in another part of the universe, or we work on the strength of the STM, and the DNA, or the construction of the physicality, will take place at the point of the interaction, where the Totality of the STM meets all the needs of the dimension of physicality, to absorb energy, to exist, to reproduce, and to manifest itself, if need be.

This development of what we call universal cosmic rays, within the laboratories of the Keshe Foundation is a major breakthrough in the next steps of the flight, and the flight systems, which comes into operation, instantaneous. In a way, with having 2 systems feeding each other, we can dictate the span of the fields of the cosmos. (:36). You would like this strength be to the Moon for this passenger, and the next one, to be the next galaxy. Because now we covered the whole spectrum of it.

Our technicians, our experts who are building it, have to understand this before I can move them to the next one. Otherwise, it's a magic show. We are on the verge of a major breakthrough for man to understand the next step, for man to be part of the next step, for man to be One Nation. We can extend this fields of the 2 to be the field strength of the what we call, the Solar System, or to be of the Earth. When you're in this dimension of the fields, New York, Tehran, Mexico City is all the same.

Understanding this process, which brings you the Totality of understanding, the process of the Creation. Now, with developing these new, what we call, space units. Now, having achieved that dimension of what we call, cosmic rays, in these systems, and the simplicity, that we have achieved it, we have developed it, and our people understanding it, will bring in so sweet knowledge to all of you.

That in the next few weeks, once these systems are completed, and start running, and they start operating, will interact with even the creatures of the universe. We will see them manifest within the systems. (:38). We'll feel the presence, and if we give them the security of the love of the man, love of the Creator, they manifests themselves within the systems.

The only problem is, as I said to a friend of mine, how does the Austrian customs officers will give visa to somebody from planet Zeus, when he comes with no passport. And he comes in the clothes of the skin of the man, understand the Totality of the man, speaks a fluent German, but is not from here. The confusion for the governments will be bigger, then you as KS.

Development and reaching the production of cosmic rays, at the level of the heartbeat of the universe, has been one of the major breakthroughs in the development of the science for space travel. Now we understand, that in the next few weeks, those of you who want to be the traveler of the universe, the systems have already started to take shape, and will be ready in the next three to four weeks. If we don't go to another level of knowledge, which at the moment man cannot understand.

So in the coming weeks, as many of you in the past came, and you went to the ocean, you saw the grandmother, you went to the house, and whatever you did. Now you will travel the span of the universe. The universal travelers. (:40). The first two will go to the Moon, the next two will go somewhere else. And then we start building what we call One Planet, One Nation, One Race, that we can send people, we can accept people, we can bring people from one point to another.

he biggest problem for mankind to be able to do the full transmutation was, that the STM does not work with the MG field of the Earth. It interacts with the fields of the cosmos, fields of the universe, and we could not, we could not take men in what we call, a transmutation from one place to another, in the full dimension of the Soul ?? in the conversion to physicality, if we did not, if we could not have access to direct resources of the cosmic rays.

Go back to the teachings of a few months, few years, and I repeated it very softly, you pinpointed, we know where they are in teaching. I always said, our body not only absorbs the fields, 80% of the energy of itself, we eat 20% of it. The other 80% comes, part of it is cosmic rays, part of it is the energy from the cosmos. Now you understand, now you see how they get connected. Now, you can find references to the teaching of the past. That, to be able to take man, even from one position on this planet to another, we need to be able to give the fields of the universe, availability to it. Because the field of the Earth themselves cannot support such a transmutation. (:42).

The body of the man takes that 20% energy from the matter states, from the condition of this planet. The other 80%, that the man never understood how his brain absorbs so much energy, comes from the cosmos, comes from the environment of the cosmos, comes from the environment of this planetary system and the cosmos. We could not make you a full transmutation, and a full conversion, if we would not have, if we could not deliver the cosmic rays.

Now this technology is in the hand of the man. Where we do not work with the matter state anymore. You see pictures from NASA with beautiful gases exploding, and different colors. Now, through what we showed you as a production of the gases, and production of the Gans’s conversion to gases (refers to Gas Units), was parallel to what is now today. Where we do not rely on the fields matter state, we rely on the fields, of the fields of the universe.

Many of you, when you walk into these systems, you see your Soul will shine. You'll feel the separation of the physicality from the STM. You will see, you will feel the love of the Creator, which is abundant in the Universe.

In the next few weeks, I'll change the history of man. I will change the knowledge of the man. Where the man sees the knowledge of the Creation and the Creator, and no attachment to this dimension of physicality as we see today. (:44). We will understand more, that this becomes literally, nothing.

The knowledge we gathered up to now becomes irrelevant, now we have access. The way the lady came in, couldn't speak English, and then she could speak English and understand the emotion of it. The way people come in and do all sorts of things, we've seen. You have access to all of it.

When you walk into the new systems, when you walk into these new flight systems, which carries the cosmological field strength of the Universe, you know you've been touched by the love of the Creator.

Those of you who booked in for transmutation, those of you who booked in for, to go to the Moon and the rest, you will feel it. Then the beauty of it is, once we teach you, once you see it, once we open the cage of the STM in the dimension, you become passengers of the Universe.

As I said, buy your ticket to come to us. It's a one way ticket. Because once you leave the system, if you decide, if your Soul has reached the point of maturity of understanding in the system, you never, ever will get into a car (again). You will not dream how it feels on the backside of the Moon, how does it feel on Jupiter, or how those it feel in another Galaxy, because your wish will bring you to that point. You taste it, you smell it, you feel it, the way, the Knowledge Seekers, I've explained to you, who went through the system. They didn't traveled, they arrived. Then we understand how much the knowledge of the man will change. (:46).

2023 will be the beginning of the world peace, 2023 will be the beginning of understanding the new knowledge of the Creation, 2023 will be where the man becomes educated with the knowledge of the Universe and Creation, the true way, not what is imagined to you. We'll see the travelers of the universe with us, and we become travelers of the Universe.

Building a system that could deliver cosmic rays, could deliver sustainable cosmic rays, could create GM field of the cosmos, was one of the biggest and hardest things for me to teach. Because man had to understand. And now we have reached that point. The systems are made, the systems are there, the systems are getting tested, and soon you will be part of it.

Those of you who have signed in to become transmuted the Mobile, they'll be one of the first ones that we will see. You will feel, we bring you in, and I hope, my deepest wish is,

when you land on the front seat, you come in with a friend from another part of the Universe. You'll have to handle it. To me they are friends, to you it's a shock to your system.

We try to bring this new dimension that humanity understands the change, we try to bring this dimension in, that we can share the knowledge, we will open institutes in specific human positions in the coming months. (:48). Tel Aviv, Tehran, London, Arizona, Beijing, Delhi, in Brasilia, and other places. We'll work, that the knowledge is shared irrespective of color, race and religion. We teach you at the same time, the way we teach today, you're online, we teach in all the Institutes simultaneously.

This is what you will see coming up in the next few weeks, establishment of the Spaceship Institute in 12 nations, which they are the center of the power and conflict, to become one. It's the priority to bring One Race, One Nation, One Planet into operation, and we are ready for it to go. One of the reasons we delayed the teaching of today was this purpose. We were waiting for the meeting to confirm, to bring everything about that allows us to do.

Creating condition, the flight system with the cosmic rays is, in a way, brings you a lot of understanding, new understanding. In the new understanding, once we create the cosmic ray field forces with their own GM field, the matter state materials of our systems becomes irrelevant. They will dilute in the system. (:50). The fields itself will dominate the room. Still with the technology which is in our hand, and we understand, we can expand this beyond the dimension of what we call, physical observation. Which means the man will not see, but they will feel it.

In the room it's not your physicality, in the space of the space, is your Soul. Does your DNA matter? Irrelevant. Does the color of your eyes, the color of your skin matters anymore? Irrelevant. The cosmic flight systems is one of the steps that will bring maturity to man. We especially set up to do this in past four or five weeks. Now it's been set up primarily, that it's ready to be adopted, to become, to be part of the operation of what we call, cosmic flights.

As we have finished with your flight testing people, your Mobile people are the only ones, which goes through this process. Those of you who signed up to become Mobile. Now, we ask you, those of you who want to be into, what we call, the Moon, (:52). and the space development, you will become gradually involved. We'll bring you in, the way we brought, the way you came, the way we interacted with you. The Mobile, what we call, passengers will be brought in, moved from one place to another, and gradually we establish a new flight system, new arrival system, because you don't fly anymore, you arrive at the destination.

This is part of what we call, progressive development of the knowledge for us to be. When I walked into the system this week, it was amazing what I could see. When I walked in, and I felt the field forces of it. It was amazing how much, how deep I could

feel. To, not the essence of the physicality, but to the essence of the Soul. Mankind is ready to take that step up.

As I said, the new systems getting finished, hopefully in next two or three weeks, four weeks, depending what our people do, we'll start the Mobile system transmutation. As I said, our first passenger has been chosen. We have moved certain things to position in Austria, that we can deliver, we can go through the process. Then we inform you as a Mobile, what we call, test people, what you need to do. We ask you clearly what you need to do, where you want to go, and what you have to do before we move. (:54).

You live in Los Angeles and you want to be in Tehran, you have to follow a process and systematically we get your de-registered in the United States, with the American customs. And we enter you into territory of Iran in hand of the Iranian authorities. You want to go to Japan, it's the same. You want to come from Beijing to Austria, it's the same. Till we establish a system, that the governments feel free with the movement.

The biggest enemy, the biggest block for us coming to this point, will be the government trying to control, trying to keep hold, trying to be, trying to confine. There's one guarantee we will give. Anyone who gets into these systems, and anybody who comes out of these systems, will be peaceful, will not be an addict, will not be an alcoholic, and will never commit a crime.

This is the cornerstones of the new development of the new technologies. Step by step, we have to, in a way, gain the confidence of, what we call, different parts of this planet, in each other, and in that process, that we don't rely on world leaders. As I said to the American officials a few days ago, which of the world leaders you want to bring in to stop the mayhem? We don't need to take them to Den Haag, and go through different ways of months and years of courts. (:56). We want the world leaders, move the world leaders to where, not in the Americans, but where the society as a whole sees them to be fit in, to be fit to be there. Do we need to move the head of the states, which are, what we call, unjust, to a position of, for them to be understanding, through their Soul, their position, and return them back to their position. No man, no depths of this planet and Universe is far away from our control and ?? movement. The reality of the knowledge and the way we will touch, will be shown in the coming weeks and months.

As some of you know, we have started the shipment of the Universal Enhancement Units as of this month. This is prelude to what has been achieved and what is going to be done. Six units are getting set up to go to Arizona, three units will end up in the Keshe Foundation, what the call, center in Germany. Then the production, which already have been paid for the materials, assembly will start in December, in January. And we start delivering, what we call, the Enhancement Units, as we have started this week.

We'll see, we understand, and we process the whole technology in "one go." I hope humanity is ready for the change to come. (:58). I hope man can understand the change that we bring. And I hope, sooner than later, the world governments come to agree that,

we need to govern as One Nation to be able to be governable. Otherwise, there is no way on this planet, that you can hide and duck.

Development and delivery of the what we call, cosmic systems, which can contain the conditions of man's life in the Universe is in the process of completion. We can change, and keep the dimension of the cosmos fields, as it is for all the Universe, and change the parameters inside to the Earth level, to the level of the fields of a dog, a man, a tree. You want to feel how a tree feels, now with the completion of dimension of the cosmic rays, in a way, to hold on to get everything done, it's possible.

You wanted to know how it feels to be from another point and place in the Universe, we change the environment inside in G field strength, and the heartbeat, and the condition of the field forces of the GM field of the position, and the time and the space, you will arrive there, instantaneously.

As I said, many of you came at the beginning, and I repeated that many times, when you said you went to the depth of the ocean, when the first Knowledge Seekers came and said, they could feel the Moon and they could pick up the stones. (1:00). We didn't laugh, we just learned from you. How far our technology is correct, you can feel it. Now we have to bring the physicality. Physicality was, could not be confirmed on the Moon and Mars, because we don't have the cosmic ray levels that you could support the life on the Moon. Now we can, now we have.

And very soon, as I said to our colleagues in NASA, you chose, we'll take you there. This is the understanding of the Totality of knowledge of the Creation. In the bandwidth of the strength of the life of the man in the dimension of the Soul, we have the dimension fields of the Universe, and Unicose, we didn't know. As we didn't know our Soul was in the center of our body. Now we can move to that position instantaneously.

It's for man to understand the dimension of the field forces of his Creation. And for Man to understand the power that this new technology will give to man. Man will live for thousands of years, millions of years on the planetary Earth, dimension and size.

We'll try to explain this in more detail, that gradually in next four or five weeks, those of you who have registered for, what we call, Mobile system, to be prepared to move. We don't want to bring you here to Austria. After the first two or three trials, we want you to appoint a place and a time on this planet. Then we move you, (1:02). then we put you there, and then we allow you to be in that position.

And you have to be prepared, that whatever you receive at the point of arrival, you have to accept, because that was your wish. You live in the cold places in Canada, and you wish at that time to be in California, or Florida with your son, or your brother, you will end up sometimes with perfect American accent, with a clothes to be on the beach, which your Soul chooses to be, to cover itself.

It will be very interesting. How many of you will make an appointment with your brother or your lover in a deep oceans, in a submarine. And how many of you will go in the depths of the caves to see if I can be seen, I can be taken through the Earth materials. Test us. The only thing is, you can fail. Part of your leg will be on the top of the mountain and the rest of you down in the cave. It will be fantastic to see how fast you generate the leg you missed on top of the mountain.

But this is now a reality, as the Frenchman felt the push of the STP of the German. As I always say, we welcome you to the new world of science, technology and understanding of the Creation of life on this planet. And I hope, and I hope we'll see the end of all the miseries and mayhems for the human race. (1:04).

We'll have a break. We come back and we answer you a few questions. As we're late, we end up within an hour or two, with this week's teaching. Rick, would you like to take us to a break and this time show us, what we call, the pictures, and paintings and the other things done, the machineries which are now in the Center, but, what do you call it, we've seen enough of them.

>> BREAK <<< 456 KSW 10/27/2022

Gans Paintings shown by Rick (no videos again this week during break, Mr. Keshe speaks some things.)

K- This is done by an Italian artist, hopefully. So we have offered an exhibition in men's. So for her to run an exhibition center and seen a little bit work on this artist, if you're an artist, send us your work and see what we can do.
yes, so you can commission what you want to be drawn
(1:06).
(1:08). K- I like this painting ..

Display wines next week ..

K- These are beautiful paintings and we try to bring in more other artists, Keshe Foundation artists. And the beauty with it is, you feel the energies, you understand.

Next week, we will display, if you remember Joel, from France. We will display the wines which are made by Gans's. (1:10). We cannot sell, what you call, wines or alcohol. They'll be there to show another dimension in Plasma Technology. We have received the bottles of this product, and to get involved in it, is not our job, and even for

the vineyard, it's a lot of certification, licensing, and if they can export it, it's a different, what you call it, ball game, which is not our job. We put in the bottle of the wine, with the name of the vineyard on it, to show the first, what we call, wine Gans's. To you, make if you want, to get in touch with the vineyard, to order or see if you can get some.

But in principal, we put it as a sample to show the application of the technology, the way we did with the, what we call, Pain Pens, Pain Pads, the paintings, the sculpture. Now, it's another dimension into, what we call, application which is used and done. You can go directly to the vineyard and order whatever you like. But for us is to show how it's done, because the, what we call, how it's produced, how and what it was done, is in ?? of KF, ?? so Joel in the videos, and everything else which ?? he provided us. Thanks to him, he is at the moment, very openly helping, anybody who wants to be taught and how help with the vineyards, and some Knowledge Seekers already been in touch with him to get help or to understand what was done.

Anything else? (1:12).

(End of Break)

Questions: (1:14).

Q: .. Can you ask Mr. Keshe, my favorite teacher? I need his help on the Soul level. For six years I've had someone manipulating me is. He's been enlightened, but has taken to try to ruin me. Maybe he can do a prayer for me, I think he's referring to Mr. Keshe can do a prayer for me, when he is in the fields of the machine? Thank you.

K- We leave that to Universal Council and those who are there.
R: So, should Nick try to contact Universal Council, or is that all…
K- You don't need to do it. It's done at the Soul level. You see, sometimes we are, we think, but there's no reality to it. So, it's all, what you call, it's all emotion, which (we) feel somebody has done this to us, or whatever. But we don't get involved in that kind of thing.
We do a scientific work. … Thank you. (1:16).

Any other question?

Q: Salomea .. Did you see or feel me? Because I had a dream, that you helped me to transmute from one unit to another unit and…

K- No.

Q: Not now. I mean, maybe one month before.

K- No. And even if I do I won't tell you anyway.

Q: Before this I went to the Moon and I have seen there, everything was green, not vegetation or anything, only dust and grey dust. It was my vision there, my vision when I went there.

K- You should have brought part of the Apollo one back to us, from the Moon landing site. Then we would have believed you. No. Thank you very much.
Q: Anyway, I didn't want to share this with you, maybe it was my wish. And my soul during my sleeping time get freedom and came to you in Linz, and you help me to transmute from one unit to another unit. It was like this. I remember it very well.
K – Thank you very much. (1:18). thank you …

Any other question?

Q: .. The butterflies from the Keshe Foundation have started changing over time since we began using them seems. It seems a white materials is being produced. What is happening in these exactly? Can you elaborate?

K- What you mean? The Butterflies.. they interact. These butterflies are living things. That's why I say, if somebody tells you this is .. whatever. The butterflies you receive are a living field, it's not something just a black piece. They interact with the environment, they absorb energies from the environment, they give to the environment.

So, you might see change of color, you might see absorption of some material, it might fit into, in the environment where you live, could be saturated with certain kind of fields, and matter state that they manifests themselves within it. (1:20).

The construction of them have made them to be that way. The construction is in a specific way, but they do interact with the whole of the environment.

K- They're in a vacuum pack. So, unless you made a hole in it, or whatever. In a vacuum pack, they don't interact with the environment.

R: Just to be clear, they're made to stay in the vacuum pack, correct?
K- Yeah. They have to stay in the vacuum pack, yeah.
R: So, if changes happen to the structure of it, or the coating or something, it's not something to be concerned about, it's just a…

K- No. It's what it interacted with the environment. That's what they are.

Q: Any more news on the "Med-beds," production?

K- We have nothing to do with Med-beds.

Anything else?

Q: How to dissolve ourselves after manifesting physically, if we want to return?

K- You don't dissolve, you transmute. There is a way in our body, in our system, (1:22). which we can do and we always do. It's like when you dream you go somewhere else, when you wake up you're not somewhere else, you're still in the same bed. So, there is a way in the structure of the, what we call, dimension of the STM and STP, which keeps the connection to the position and the space of the movement. You can go to 20 different places, and then want to come back to the first place, you can still do that.

Q: .. How can we separate the different emotional histories of the plasma fields?
K- What was that?
R: I don't know, I'll try the question again. How can we separate the different emotional histories of the plasma fields? Is there an emotional history with a plasma field?

K- Everything has a history.
R: So, if plasma field has an emotional history, how can that be separated since the fields are interacting so much?

K- It's traces. I talked about this long time ago. It's traces, you always leave traces, it's part of the structure of the field of the Universe. This is how magnetic fields work. Can always go back down to the trace. (1:24).

Q: .. Does this mean radiation is being absorbed by them, by the butterflies? The vacuum pack is intact. There is a whitish material, almost like dried Gans, that has been emitted from the black.

K- They're in a vacuum pack. So, there should be no material. We've done, we've built not to have anything with them.

R: He says it's turning totally white.

K- So they're absorbing something, or process is happening within the layers. It's absorbing a field and producing. It has matched to your environment, to the strength of some materials, that it converts their fields into matter state inside.

These are vacuum packed, special packing material and they usually shouldn't have anything inside them, unless you do a transformation of the fields, or you have a hole you cannot see, that you allowed something to enter.

Any other question?

K- I said to one of the KS. I said, if you want a cheap ticket to go from, what you call it, from one place to another on this planet, now it's time for it to do. (1:26).

Q: .. (Internet breaking up) I want to ask him, what happens when there is a pole shift. I have heard this will be in the next, maybe six months, it's very early.

R: ask question again
Q: What happens when there is a pole shift. I have heard this will be in the next, maybe six months .. Does it have something to do with us, with this transformation, or our flights? Or …

K- .. Primarily nothing should happen. It's just a shift, everything shifts from, what so you call it, from North Pole to South Pole, as I call it. It's a saturation, nothing should happen. I explained this to a child what happened. (1:28). Doesn't make any difference if you're standing up or I hold your legs upside down, you're still there, you still live. It's just a field, and everything will switch with it. That it holds in the same position. If such a thing happens, as we see it, it would be registered in the geological layers, as the previous times has done. We'll see it.

Q: And it has nothing to do with the three day of darkness?

K- I don't think so.
K- If it has, what do you call it, the Sun changes polarity so often we don't see it, and everything else.

Q: One more question please. The Plasmatic mirrors, you told it's very good for the transformation, the Mobile transformation. I have heard you told it. Is there a special training I can do for it?

K- No, no. You can use it when we go. The people we chose, the Mobile. It's the best thing for you to do, because ..

Now that we have gone into the cosmology, or work of cosmic rays, a lot of new technologies will come up. You will understand a lot of things, a lot of new understandings in the coming weeks and months, will come out of the Keshe Foundation. Because up to now we didn't have access to create cosmic rays, now we can, cosmic fields, then it brings new dimensions into, I think, a lot of works.
Thank you very much. (1:30).

Q: .. In Italy, people that make glass, or glasses, are closing down. So, can plasma technology help them, as they use a lot of electricity and gas.
K- How can we help them?
R: I'm not sure what she means…

K- It's the energy costs. They cannot sustain the energy costs. The costs has been so high. Economically is not worth to run them anymore. The price of the gas and electricity, especially in Italy and Europe, has gone so high. That a lot of factories, a lot of businesses, which were using a lot of electricity or gas, are running into trouble.

You see that in the very straightforward way with, as I said before in a few teachings before is, you go to the supermarket and you see the prices of tomatoes going sky high. They used to be one Euro per kilo and now they're about three, four or five Euro per kilo.

All because of the cost of energy. They use a lot of gas to grow tomatoes in some of the greenhouses, because they use the CO2 for the growth of them. So you're paying for they're putting expensive gas.

Any other question?

Q: .. How does it effect the way of thinking and life for when a Soul this technology is no longer in the first place, and has found other priorities? (1:32).

K- It will be really interesting, that's for sure. You have to adapt to it. We learn, we learned when we immigrate from one country to another. We have to live with new language, or whatever. Man very quickly we'll learn how to live in this transmutation through the Soul. Very, very quickly. Quicker than you think. You'll be so busy with it, you don't even remember you've done it.

Any other question?

Q: In the Mobile transformations, can I take my dog with?

K- Yes. You can bring your suitcase. We will become like Ryan Air. For an extra suitcase you pay a 1,000 extra, and for the backpack will be half price, for the dog will be 3 times the price.
Q: It's a small dog.

K- The size doesn't make any difference. The size doesn't matter. It's just the Soul we have to carry.

Q: My dog comes, I'll stay here.

K- Okay, what were you reading, please.

Q: .. Thank you again for all the love, which you give us through knowledge. (1:34). How is the construction of the city based on plasma technology going, and can be replicated in other countries? Thanks for your answer.

K- It's something we work on in the background. We're involved in two, three different locations. Because of what we went out to do in past 12 months, we left a lot of these just being there till we are ready for it. I hope we're very soon ready for.

With what we achieved now, where we are now, we should be able to create new dimensions even in what we wanted to do before. I'll explain this in a very, very slow way, that how we can actually create the fields of, without the matter states, and how we. We have to deliver it in a step by step position next few months, and then you'll understand.

Do we need to build the cities the way we do? Do we need a lot of things, which we have in the cities today? I don't see any room for hospitals the way we have it today. I don't see any room for courts and judges. I don't see any room for prisons. I don't see any places for churches and mosques. Because the STM is mature to understand the truth. I don't see any reason for places we call, palaces, what we call, center of power. (1:36). Gradually we'll come to understand these, very, very slowly, and we'll change for it, and ?? live by it. Do we need? There is no need for power stations, there is no need for power water supply centers, that we build our cities around water supply position. A lot of things will change, a lot of things will change.

Q: .. When the Lord said, that a material state within the system is irrelevant, we can compare with the human system, that when we ingest food from the moment it enters the mouth, it no longer behaves like a material state, but as fields.

K- Yes.

Q: That is why we say that, it is so in the macro as well as the micro. The Universe that is inside of us?

K- Yes, more or less, or 100%. Micro and macro is the STM and the Physicality of the man. Then it changes to Physicality of the man and the STM. Going from inside out. It's the same. Life will carry on in both dimensions.

R: There is a saying, make the inner as the outer, (1:38). and the outer as the inner, and then make the two one.

K- Yep. We're running into about 8:40. Shall we call it the day for today? It's been a long day. Thank you very much.

I hope we gave you enough information and knowledge today to understand the changes that will come. The changes which are on the way, and how humanity will handle this new change, is another point ?? dimension.
Thank you very much Rick. And hopefully we see you next week.

456 KSW October 27, 2022

457th Knowledge Seekers Workshop; November 3, 2022

(Topic Index, Transcription Proofed)
(Auto transcription from Elias)

Rapid release of T Canceled; Center of STM and cells imprinted with genome of this U - other fields layer on top including STP; Cosmic Rays will be added to all systems - become enlightened; Receive fields through color of plants or beings; Souls communicate through colors like Gans; Gas in Nano State - Gas Units - color of Galaxy - Cosmic Rays; Galaxies like body of Man; Feelings interaction between STM & STP; Islam forced on Iran - women and scarf's; Putin and Ukraine; Powerful Men in Linz - now we understand what needs to be done; Relation with NASA; Matter state plasma scientists mind is fixed - KS open to free plasma; ALS will to live switched off - physical switch can't be turned on again - Cosmic Rays can switch on; Recovery time from 10 weeks to 10 hours

ENGLISH TRANSCRIPTION

(Part 1 of the English Transcription got lost by mistake. Part 1 of the Quick Index was made from the proofed transcription before it got lost … you'll have to go back to original recording, sorry, I don't have the strength to do it again.)

(:17).

K- Yes, Good morning, Good Day to you, wherever you are

Mr. Keshe 17:46
Yes, good morning, to your to your wherever you are. Whenever America here listen to this Knowledge Seekers or to Keshe Foundation Spaceship Institute. We welcome you back to another adventure of science and technology. And we'll see what we can do on moving my land step by step a little bit more about what is to come. Before I start, we can you please check on your list of audiences in zoom or live stream there is somebody new right on the top? Could you find out what it's

Rick Crammond 18:21
it's at the top because there's an extra explanation sign in front of their name. And that automatically puts them in front of the ease. So I think it might be a manual split Tyria to spit theory of some sort. It might be a manual. Not sure how to check on that. I can't. We can only ask them. So you can put in the chat who they are. For usually donation Andrew read does, Terry. Yes, it's a manual.

Mr. Keshe 19:03
It's a manual. Okay, that's good. Thank you very much. Thank you did we go back to the teaching modalities as we said we have a small but very important announcement to make. And that is if you notice past two weeks, we are transferred to teaching to seven

o'clock in the evening, the reason for it as we always been open with everything is that if you remember about four or five months ago, John, April May and that time we came to you for supporting the Keshe Foundation for a big adventure which was set up to do with the process past few months. This is going on since last October of last year. We tried to take a new direction for the Keshe Foundation to extend and expand the Foundation work Internationally. We invested a lot of money and time in it, and many of your helpless supporters donated to us So and foundation us millions of his own assets to try to make this for the company of change. We could not come to any understanding of what we call operation with these people. And in past week, on a daily basis, we've been negotiating, but we have come to a conclusion on negotiation. Hopefully by tomorrow night, he'll be settled. And we receive what we invested back. And hopefully, if everything goes okay, the next week or so, all of you who so graciously helped to bring this change in will be refunding you back the finances you tried, we tried our best to bring that change. But that could not happen, we could not see it. And hopefully, hopefully, by tomorrow, we concluded and most of you who helped us there to support us, if you give it as a donation will stay with us, if you will lend them fund to us. Some of you okay very large, some some of you give what you could we try to start refunding as we receive the refunds back to the foundation account. And we thank you for such a thing. It was a what we call an opportunity we have to take and to see if we can bring a rapid change and restore steps. And after more or less a year of work and negotiation, we do not see we could not see an last weekend this weekend today be spent time with those people who were supposed to do it and completed and we have come to a conclusion and a closure. And so hopefully, next few days, some of you who want record and money to transition to achieve this goal, will start receiving the refunds we advise you in advance because we've been told we agreed this refund was supposed to be done some weeks ago, but it was a lot of document diving, they're trying to see if they can get it done, it couldn't be done. So we will not position within the next few days to refund most of you back we thank you for this help. So you can see when it comes back. If we need such a hiccup, such a position that we see there is a need for it will come back to you. But all of you who lent money to us within the next week or two or whatever will start receiving your funds back. Now we thank you very much, especially those who gave a lot in support of the they would like us and just to see the change. But now it's gone for nearly a year in bits and bits it couldn't be done. And what we call it was an ambitious job. But it was a very solid base, that people we have what we call given the funds to are trustworthy and internationally known and could not get it done. So thank you, all of you and other people after the company that they tried to support us to bring the change. But as we understand international pressures are so much that it could not support it. Maybe mankind is not ready for it. Going back to the teachings and what is to come, you will have heard be called the discussion and teaching your classmates in the process of the teaching in the process of understanding in the process of way coming in touch to understand the teachings from the very beginning. The very beginning teachings, we always explain man takes 20% of the energy from the food it takes.

Mr. Keshe 23:56
Dollar 80% comes from outside from exterior or from environment. The environment does not count the room and the place you're in there are going to counts as the Galaxy

theory, the Solar System, you're in the universe theory. We are affected by all these fields. We are made of Totality of these fields. It's like you are a big cruiser. You will have you stop at many places, step by step from one place to another. But you're always connected to your base to where you are registered to where you're connected. We call it the flag of the what we call the ship where is registered. Mankind is registered with the universe is willingness was within the central policy. It's witnessed, every cell of our body is a building block of what we call the genome of the universe, we are part of it. As we move away, that tiny, tiny, powerful center stays, then the other layer comes, the strength of the galaxy, the other layer comes the spring feed of the Solar System, other layer cannot tolerate the strength of the Soul of the Physicality, and then the rest of it. And then then there are, we can go both ways we can go down into the bandless, we can go down into the roots, we can go back to the origin. Or we can go further from mention of what happened while solving the future. We have the capability to understand what strings our soul has gathered. And another string where we learned what is going to finish what is going to be, where is going, and how is going to live. And what is going to establish. By the fields we gather by the fields of the soul began in this process, in the new, what we call flight systems, that we add what we call the cosmic rays, we get connection with everything and everyone we become aware of their souls as much as they become aware of also, in that position, we become balanced with our environment. In that position, what I do need as energy which I received, or I use, part of what I received, I share is open to you, it will not need to kill me as an animal to share what I have, I take the grass I eat grass do I need to kill an animal to eat the grass, but by looking at it by walking on it, I can take the energy which it doesn't need any reflexes, the rays of green to me. And then I convert that field into food. When we study science of colors, what colors do they tell us why an object is green, why a hand is blue in one of the leaves of its flowers and the rest of it, this is what it cannot absorb any flags. And that is what is available to us to us is not just the beauty of the smell and the color is the availability of the energy is availability of the fields that is there, I cannot accept, we learn part of the science, but we never understood the science. Why when we look at a beautiful flower, we get enchanted why do we understand with another smell, we feel so good do we have we not understood the process of the Creation. In that process, mankind will come to understand more and more about the process of Creation, about what we call progressive development of understanding us on Creation. With this process, now, we see when we walk we like a tomato, the color of the red, what does it mean to us how much of it can be absorbed we become that cup of water where tomato becomes an orange.

Mr. Keshe 28:37
Then gradually we start understanding how to communicate how color means is to go back to some of the teaching always said when you come when you interact with another plasma and other fields, courses of universe, the colors of them what comes out of interaction there. So with you also tells you, if they love you, what does it mean? If they want to be with you or they see you as feel the strength not necessarily matching to them it could be in danger to part of their life that you might take some of the string fields that they need to survive. You cannot have this field from me because this is the cornerstone of my life. You move somewhere else, you don't take it because you understand your soul understand that energy has been taken and this brings us brings to allow us the total new

understanding what does this mean? What does the humanity will go forward? We need to understand you know coming time in a process of understanding, we will come to understand we are part of the Totality If you look in the back of the book number three, you see the way the spider off the fields come over. You are one of those spirals in that spot. Others depend on your position, your time, your place, you move the wrong way, they have to wait to accommodate you for that reason. Now, we understand how a man will conduct himself how man will come to understand to be what it is, in a new system in a new flight enhancement system, which are in development, and hopefully soon will be in a flight All in all, no, we will see many of you go into different corners of this universe will become the travelers of deep space, we become the travelers of this planet on this planet, we will achieve what we thought is unachievable, but the most important thing is, how would we come out of the systems? And how would be filled with we rejoice into what we have become men of peace, men of wisdom, men of culture of universe, or we try to abuse them because we see no we think nobody else has, or nobody asked but we will come out with different characters and characteristics of these systems, according to what we want. We see when we go to a movie, and the movie touches us, we come across another person who we talk to, and their emotion and the knowledge touches and we change word in the dimension of the Soul and the behavior and content of the man's life. The new enhancement fi system will bring you that opportunity. What would I be? What would I want to be what would I like to do? Now that I am become aware of more capabilities and knowledge within me?

Start here >>>> (this part was not proofed)

What is for us to understand is, what would be the future of our Soul. What this Soul will create in any dimensions? Does not to be, need to be physical. Does not need to be total energy. Does not need to be a combination of both. It’s understanding the essence of Creation. What would this new energy will make of me to be on this planet, another position in the Universe, or as energy fields traveling the span of the Unicose? Can I become so transparent, so diverse in energy, that the Universe is not big enough? I want to be part of the Unicose, I want to see what's beyond this Universe. Some of your in the coming months, as you go through the Enhancement Unit Flight System, as a Mobile transmuting from one position to another, (:34). will come across this. You will have to handle it. You have to understand it and become humble enough to be able to explain the joys of it. Not to become arrogant because of it. The enlightenment within these systems comes as you connect with everything, because now you connect to the cosmic rays, not to the fields of this planet, not to the fields of the cells of yourself. Now you feel the tree. You understand what it's trying to tell you. You will feel the man next to you, the dog walking across the street, another being on the top of another mountain, which is in trouble in the dimension of physicality. Another strength of the field of the Soul reaches you, and you understand he needs help. We become aware of many things, not necessarily only limited to the life on this planet. The way we feel the plant we’ll feel another strange in another Universe, another dimension, in another Galaxy. We connect through the fields of the Universe. Now, you understand, when many of you went through the Enhancement Unit flight simulation, you went to places, but you said, I

couldn't explain. Many of you came out of the system and you said, I couldn't explain, I cannot explain, It just happened something, there're ?? strange ?? characters, I was part of them ?? just, I was home. What did you bring from that home? Did part of the fields of the Unicose in a cosmic rays came from them that it become part of you, that you get that connection to be there and you see yourself to be part of them? (:36). We receive like the speck of dust, we receive on our skin, we receive specks of fields of the Cosmos, through cosmic rays within our brain, within our cell of the, what we call, the Soul of us. Now we understand, mankind needs to look beyond his dimension of the skin, mankind needs to look beyond the dimension of this planet, mankind needs to look to be part of the Totality. As we said, do we need to bring the world leaders to be punished for what they've done wrong? Or do we elevate that they walk away from what they've done wrong? Do we go to another dimension to reach them? We try to do this through the Universal Council, that they can reach the Soul of the language to understand the culture of it. Now gradually, as you become Universal members, you become members of this Universal Community, it's not any more to care about your next door neighbor, or to care about somebody you know, you care about everything which exists in this Universe. But in time, in time, man needs time to understand the new opportunity, the new dimension man has been given. In the coming days and weeks, as we develop these technologies, we will see our own team will go through these changes, because they're in it. It's not that it's built, and it's just brought in, and when it comes in that room start working. We see the change of knowledge, we see the change of understanding in the Keshe Foundation manufacturing team. (:38). Because now they're in it, they walk in it, they walk out with it, it's within their structure, and they gradually become members of the Universal Community. Because now, they are the front runners of receiving the cosmic rays, are joining the cosmic rays, are being part of and becoming aware of what's happening. Because when it's finished, it comes to Uno Center. But to build, it needs for them, like you spend maybe half an hour, they spend whole day in these systems, operating, working. Then you will see that. They'll become knowledgeable in the size of the Universe much faster than you, who spent a half an hour As I said, become a privilege to work in the factories of the Keshe Foundation. Because you work in dimension of the Universal cosmic rays, because you're putting the system together. It's like ?? conveyor ?? belt in producing a car. But this time this car is not just the door, the window and the chair, it's the total environment which creates inside and outside. Then you understand how mankind will see working as a pleasure and not as obligation. What would you like to be, and in what level would you see to be? How much would you rely on what you receive? Would we look for these places where you will see the manufacturing part of this system as shining ?? gills in the distance? You know, this is where the cosmic rays, the system to ?? develop ?? has developed. And they are putting it together for the others. (:40). As we announced, the new production of the new systems, even every enhancement system, the new enhancement system will carry this benefit, this carry this technology. When I was discussing with Jon regarding the 12 unit enhancement units in Arizona, I explained this in a very soft way to him that, more people benefit by sitting outside the system than inside the system, that as different fields of them interact, will benefit more by it. In a way, you'll buy this system, and put in them and running them, that we benefit by what's outside, not what is inside. Then you understand in the future we'll mix the enhancement unit for, what we call, the body and the material, that in that

enhanced unit of body and material, we create the fields of the cosmos that the man needs for life in space. In a way, the knowledge is complete. In a way, if you understand, now it's how we manipulated. In a way, where do we go to see this, and how we enjoy the beauty of the Creation? Very soon, very, very soon, many of you will walk into these places. Going through the new flight system cosmic ray, it's not a privilege, it's a right. This, as a system developed, will be reaching that point. There shall be no government or no structure which can block it, because it's built by the people, for the people, for the citizens of this Universe and not for the elite. (:42). As I said, the crown prince, he said, I want the unit for myself. I said, Your Excellency, Your Majesty, it's impossible. I built the system for humanity, you cannot have that on your own. It cannot be done. Because then we become privileged. ?? Where we have all to be equal. We have to understand, the new enhancement systems, which is coming into operation and you will see the first, what we call, cycle of the appearing in the Uno Center in the coming weeks. We become what they call, the basis, the foundation for what is to come. Do we need to burn fuel where we can use the fields of the Universe without ?? ? I was with some very powerful people this afternoon as part of our negotiation. As we were going through the Uno Center, through the systems, I explained to them, do you know what is the biggest worry if we go through these systems? The problem at the moment is global warming. My fear, in the few years time is, we need to produce more CO2 just to get to the balance of what we actually need on this planet. What we destroyed, what we produced over centuries, past century, especially with ?? our burning fuel, the way we propose to convert, soon, in less than a decade, we'll be short of CO2. What are we going to do? (:44). Then, what are the climate ?? changes which we have to face? Or do we learn from now on to work with the cosmic rays and cosmic fields, understanding the operation of the gases and the Gans's, and understanding within the Gans's combination, we can create the gases. Maybe, maybe none of you ever understood, but just took it as it was. Gas in Nano State, cosmic ray, cosmic gas, understanding of the Totality of the fields of the Creation. As I said to our friends in past few days, when you look into the beautiful pictures produced by NASA, where you see these colorful explosions and colorful Galaxies being there. Where do these colourfulness come from? From gases in the state of the Gans created by the interaction of the fields of the elements of that Galaxy. When you look with your telescopes, with your most sophisticated systems, into the depth of the Universe, and you see different colors, these are gases in Nano state, within the magnetic field of the Universe. Now, man for the first time can understand what he's dealing with, that has the capability to produce them. We brought it to you on the banner of the gas that you can burn, (:46). but it was hidden within the knowledge. This is the beginning of the work of the cosmic rays. I have to play the game, as the children only understand how to play in the nursery, and are not educated to understand the knowledge of the university. University of knowledge of the Universe is what is on the table. What will man and mankind will graduate out of this University, where he has just entered as the toddler in the nursery of the knowledge of the Universe. We hide and we have hidden so much knowledge in the teaching, that as you grow to understand, you'll find out what it was there, what was put there. Gas in Nano State, game of the Universe, play of the cosmic rays, Creation of life in the dimension of the surplus fields of the Universe. Has no life ?? to lose, by the essence of the source of the energies of the Universe. Now, maybe some of you who understood, understand, or will understand in the coming time, what was taught

in the past years and in the past teachings, had a meaning. But you were not aware of it. You understood it according to the intelligence and what you looked at. But now you have to understand, it was ?? written in ?? way, those who could understand could look beyond to understand more about the world of the Creation and the Creator. (:48). In the near future, many of you, as you start traveling using the enhancement units, your transportation systems, you look and laugh, ponder, why did we make the machines? As I always said, man in the Universe is known as a wheeler, because they invented the wheel and everything goes around it, around the wheel. Now, we are become, what we call, the spherical man. We live within the dimension of the spherical of, what we call, the Soul of the Man, the plasma of the Creation. We have become knowledgeable to understand, to move from the wheel to the sphere, but the sphere is within it. Nothing, has no tangibility, but he has the confirmation of the interaction of the fields of the Universe. In the teachings of today, there are many hidden knowledges, it's for you Knowledge Seekers in time to unwrap and understand it, and within it to become a member and, what we call, a constructive member of the Universal Community. Where you add to the next step of the knowledge of the Universe. You've got to understand, you have no choice. As I always say, you're in it, you have to understand it. Then you have to teach it, and while you teach it, you will become enlightened. Many of you are still in the, what we call, doldrums of the Magrav making, and Gans making, and do not listen to what we talk about the fields, and interaction of the fields, and combination of the fields. (:50). If you build the systems you build, understanding the interaction of the field, you will see the benefit of it, as long as you sit, and watch and try to push, what we call, matter state ?? with still in the problem of the understanding of the Totality. We brought you the Nano layers, we brought you to the gas reactors, we brought you then into Gans's, and then we brought you into the dynamic Gans's, then we brought in understanding of the Soul. Go back ?? it's all the same. It's just which part of it you could add to another to create the new condition, a new dimension, a new understanding. But man is physical, and he gets stuck in the coils, in the windings and the rotation. Rotation of the ball was not for you to see the Gans's, rotation of the ball was for you to understand the motion of the fields. In so many parts of the teachings I always wondered, and I always pondered, would our Knowledge Seekers become wise. In a way, wisdom comes out of, through understanding of the knowledge, be in love with physics, be it cosmology. Understanding of the cosmic rays, understanding of the work of what is fed, (:52). but at the same time. I explained this to a child some times ago, maybe some of you will understand it. When you make your food, you put combination of ingredients in it, starch, protein, vegetables, vitamins, that you feed the child with, that he receive the Totality of combination of what is needed for its growth. Cosmic rays are the same. They have combination of the fields that each part feeds and reaches part of the Soul of the Man. Here we look at the matter ?? eaters, and matter states of the potato, carrot, vegetable, or a meat. In the dimension of the plasma, understanding the cosmic rays, we look at the different strength of it. Then we understand the Totality. Then we understand the position of the gravity of the knowledge which has been shared by man, with man, for the development of the future of mankind. Go back to the teaching and start understanding the effect of the fields, and walk away from the matter state. Then you're fine graduate in the secret in the, what we call, secrets of the Creation. As long as you're tied up to matter state, you're still in doldrums of the physicality of the man. (:54). Try to understand the fields of the ??. Today, tomorrow,

next time, open your computers, look at the pictures and the colors which space agencies around the world, scientific organization around the world, put on the internet. You see a Galaxy with combination of colors. Now, look at them as, what we call, a structure of a body, which in the embodiments of Galaxies as a heart, the Galaxies as a liver, and the function of Totality, and that gas, what we see, is actual physical embodiment, or dimension of the life of that structure. In the physical dimension you have a skin, in the dimension of the Universe and Unicose we have the field strength and the boundaries of the fields, of the magnetic field. Not tangible, but effectively in control of it. You don't see a star outside it, unless doesn't belong to it. You don't have a finger hanging next your neck without being connected to your body. It has to be part of. Mankind has to understand the interaction of the fields of the cosmos, and the cosmic rays, and then man has entered in a new dimension. I explained to you in past few months, I started teachings you about the work of the Universe, and Unicose, and Universal Community. This is the knowledge which does not exist in ?? of the man. (:56). Then, neutrinos will become a laugh in the ?? of what they are, because we now understand, and then those fields, and fields and radiations, everything will have a meaning, and man will look at the Creation in totally different way. This is part of, as we went back two or three years ago, teaching about the Soul, the new teachings about the Universal Community, Universal structure, living with the Universe, will start. In past few weeks, very gently I've been pushing you that way. Now it's time to start to understand. And some of you are still busy with MaGrav's, and God knows what, because that's part of what it is to keep you busy. And some of you will jump into the dimension of fields of the Gans's and their fields of the cosmos, and cosmic rays and then you start a new life. Try to understand the gravity and the potential of what is taught and what is now on the table. Step by step we built it, and now is there to enjoy it, and expand and extend on it. I hope, and my wish is that we gradually start opening the door of the knowledge of the Universe, by understanding the existence and the use of cosmic rays, fields of the Universe, and their interaction on us, on our Soul and our physicality, and how they're ??. We did not know that, what we call, something under the ground called uranium can brings us so much benefit and misery, (:58). till we expanded on the knowledge. It was there for millions of years. Arabs for hundreds of years saw black material underground, but now is the most ?? dearest commodity in the world as oil. As man became knowledgeable of how to use it, man became, what we call, progressive developed to make systems, to benefit from their existence. Now it's time for man to go through the same process. But find a way, and technologies and the knowledge, that can tap into the Universal cosmic rays and Universal fields, that new technologies, new understanding, new benefit for humanity start. Then we ?? laugh, and we leave those black bubbling materials coming out of the Earth on their own, as we have no more use to it, as we have moved to ?? of understanding. It's very much like leaving a donkey and getting on the jumbo jet. It took the man hundreds of thousands of years to move from Central Africa to northern China and Canada, as he walked, and he used the camel, and the donkeys, and the horses and the rest. Now the same distance is carried out within hours by jets, and within seconds by understanding of transmutation. And all the knowledge has always been there, it's just man needed to mature to understand how to use it. Many of you will understand and see the work of, what we call, (1:00). interaction of the cosmic rays, with the STM and new dimensions of travel, new D of feeding the man, new D of satisfying the needs and urges

of man to part of one community or the other. Where he learned how to take fields in one position of the U to be part of one community, and he moves into another part and he refuses the same fields as it can be detrimental to him in that position. Gradually we'll become knowledgeable to life in the U. As is said, we welcome to humanity to UC but we start teaching you, as I am sure, man is a clever creatures, soon will pass most of the creatures of the U in understanding the Totality.

Thank you .. Hopefully, my wish is that you have learned something new, and to start thinking in a new D. We go for a break …

(The proofed part 1 section got lost. The next part, part 2 has been proofed 1 time.)

<< BREAK >>> 457 KSW Nov 3, 2022 (1:02) - (1:06).

K- willing ready, able and helpful. There is something, I just got a reminder. If you remember a couple of weeks ago we announced the disks (Plasma Mirrors) which we put in 10 sets. They all have been sold in the first week. If you want to purchase you have to put the orders in that the people in factories will start producing them. They take about 2 to 3 months to make. If we see there are more people who put the request in to purchase, we'll start producing them ?? take 2 to 3 months to produce a new disk. (1:08). The 10 new sets we put out last week is already been sold out. This will come, as I explained, in the future what will do with these, we'll use in the systems which we have developed, for those of you who are for transmutation and transportation.

Anything else? What are the questions?

Q: .. I would like to get in touch with the German doctors who starting from last Monday begin working with the enhancement units, as Mr. Keshe said two weeks ago…

K- You will have to go through the Keshe Foundation Info. The information, the request goes through there to Germany, and the doctors will get in touch with. Some people have already made their contacts and they gone through. It will be that process. Yeah, you go through the Keshe Foundation, and we pass it on, this just to protect the, what we call, people who work with us. As we know, there are a lot of hooligans around there, going around. So, you have to get in touch with us, we do the vetting in the background, or whatever needed, and then you go to, what we call, to the doctors.

We are, as I said, negotiating with another group in Italy. Some of them are online, they know who they are. We will add the Italian, (1:10). what we call, research medical team into this very soon. There in Italy is a much larger structure and in many cities in Italy,

which you can benefit by the, what we call, the wellness of the technology. We are in the phase of negotiation, they should be completed. We started it months ago, but very soon it will not be only Germany, you can go to centers in Italy, It's a large number of centers will be, more than handful of them that you can reach them. It will be part of the research and development structure.

Q: .. The phrase, "we are here to serve and not to be served," came from where, as a motto? I ask this because if I, as a Knowledge Seeker of KF technology cannot be served, it sounds to me like a complex understanding. So, the Gans and all technology cannot be used by me? I learn and develop for the other, to deliver to the other?

K- This is a very selfish way to look at things, the way I look at it. In the process of serving you're serving yourself, everything yourself. And if you have to be given, because you do something, it means you're still in the state of being a human. This is part of the understanding of the Totality. (1:12).

Serving is not being in a restaurant, and a waiter, serving in the knowledge of plasma is making available to others, to elevate themselves. By not destroying, or by the abuse of, where the fields comes from. It seems that you have not understood the language of the plasma and technology of the Keshe Foundation. Always "me, me," when I give, what am I getting?

Any other question?

Q: .. By black oil, don't you mean "black goo"? You know about it? Should be the consciousness from Earth, you know about it?
K- Black what?
R: Some people talk about black goo is some sort of strange substance they have, maybe in some kind of the underground technologies, or something. I think you're talking about black oil, you don't mean black goo? You mean black oil.
K- Oil. Out of the ground, yeah. (1:14).

Q: .. Mr. Keshe, why do our feelings affect our Soul more than the thoughts?

K- Thoughts are manmade, feelings is an interaction of the fields between the STM and the Soul of the Physicality (STP). That's why you have psychosomatic, emotions, which are touched at the strength of the STM and the STP. It's as simple as that.

R: Okay, let them reflect on that, that was very succinct and direct.

K- We hope… ?? I'm not ?? these anymore.
You see, emotion comes with a different ways. At the moment a lot of us, we see it, we hear it in the news, in the press, and it's a frontline. The two frontline news of the moment, one is Ukraine, and one about the woman and the freedom, being free in Iran. Literally covers most of the news.

If you look at the situation, especially with Iran, it's become part of the emotion, not the understanding … part of what people don't understand. As I said very recently, to some people who are deeply involved in this situation. (1:16). We are all equal, but it depends who tries to draw a line for what equality, that is to benefit to them. We see the changes, and the suffering and whatever, which is happening in both dimensions, in both in Iran and in Ukraine. What is inflicted by another one who used to be part of. One is inflicted by those who are not part of, but they want to enforce their way. As we look at it, and one covers it under the cover of the religion in politics, and one covers it on the politics on the cover of religion. But both are emotionally based.

I said, and very soon we'll address this, the Iranian government and the Iranian nation, Keshe Foundation will take a pivotal point in the present situation in Iran. We are very clear about what we're going to do. And we enter on the dimension of understanding of the Creation, scientific knowledge, on the basis of governing with the knowledgeable. We don't take side, or part against one regime, or one group, or the other, we go back to the origin.

The origin is very simple, Iran is a Zoroastrian nation, then, by what I call, force of the sword, forced to accept Islam. Now we are facing the same by guns and bullets, Iranians are forced to become Muslim, and to cover themselves. (1:18). The tradition in the past has been when we get to the point of trying to understand the other side.

If you remember, if you go back to many, many revolutions, people used to put roses in the gun barrel of the soldiers and soldiers stopped firing. They gave love, they gave understanding, and no bullet came out of those barrels.

The Iranian nation is Zoroastrians. When the Arabs on the name of Islam came to Iran, they forced by the sword, now changed to gun, for men to cover their woman. That they're covered up, because Arabs could not trust themselves. Iranians were full of trust of themselves in freedom of the woman. What the Iranians told the Arabs, as I mentioned before, was, we cover our eyes, that our women stay free.

Now, our advice to the Iranian women is, give your scarf's as a point of peace, not burn them, to the soldiers to cover their eyes, that they could be free. Do not stand the bullet. Do not give scarf's that blind them. Give the scarf's, that they understand, it's them who have to be human to cover themselves. This will change a lot. The point of understanding is emotion forcing another to be with it. You don't fought (fight) Islam with the sword. This time it's the same, Islam forcing a Zoroastrian nation, what we call, the "gun policy." (1:20). When the Iranian woman go on the street, don't burn your scarf's, give them as a gift to the Revolutionary Guard, to the SEPAH and the soldiers and the police officers.

You want to be free, you'll be Iranian, the way Zoroastrian has been, "think good, do good, and talk good." You don't need to cover the woman. Give your scarf's as a gift to the Revolutionary Guard and kiss them for it. Do not fight, do not burn the scarf's, because once burned has no use. In a way, we give, we've done, we make what we call, we've seen it in the Islamic world, they use the cover, to cover them on the burqa. Make

these scarf's like glasses, and give it to the soldiers, give it to the Revolution Guard. You cover your eyes, we stay Zoroastrians. We stay clean, we think good, we do good. So, you do the same. You do not need to cover your weaknesses of temptation with life of us. The same for the man.

Time of gun policy, and fighting and creating upward revolution is gone. Time is to be logical, to understand and do this. We ask the Iranian woman, don't burn your scarf's. Give them as a gift to the soldiers and Revolutionary Guard, to cover their eyes, that you are free.

Then it comes to emotion and understanding who truly is Iranian. And who is truly, what we call, " ??" a foreigner, (1:22). enforcing their thoughts on the nation, free nation of man. We gave roses, now we give what they force us as scarves, for women to cover themselves, that the man does not get tempted. Go back, as you were Zoroastrians, man always said, centuries ago, we cover our eyes, let the women stay free. That's how everything will change.

Then it'll go the same to Ukraine, change of gun policy. Greet the Russians, don't fight. They dissolve themselves. Not to look for guns, and battles, and bombs, and rockets. Look for a way that it brings peace with both dimensions without the gun. Greeting them they can't shoot you. Greeting them it makes them to understand it.

This is where we will take position in respect to the present situation, as this will go across in different explanations and time, as man become mature to the science and the technology. We ask the Iranian women, don't burn your scarf's, give them as a gift to the Guard. Let them cover their eyes, that you stay free. It's hard to do, but you'll find out that they will not shoot. Tie your scarf's on their guns, and let it be the banner for them to use it. (1:24). Don't burn, because whatever you burn and destroy is part of the national assets of your nation.

Any other questions?

Proofed to HERE >>

Q: .. My question is about the moment we are going through many conflicts as Brazil and in the world. Could it be because of the changing fields of the Universe? And moving on, the work that Mr. Keshe has been doing for the good of humanity there are many oppositions. Do these oppositions go beyond the physicality?

K- Not really. Beyond physicality is accommodation, fields, and entities accommodate each other, that there is no point of conflict.

We know now there is a problem, as we understand, in Brazil, due to the elections, and we see the points, which are running around the world with different conditions. (1:26). We will stand to see the outcome of all these in a very short time.

You got to realize, once these new technologies are offered, and becomes common use in next five years, ten years, or maybe sooner, people don't stand to be in the zone of conflict. They don't need to buy a ticket. It's not that I can't afford to leave the country. It's not, what am I going do when I go to America, I don't speak English, I don't understand the culture. You go to America through these systems, you live like an American, and you speak fluent in English, and it's not your worry.

The biggest problem for the governments in the coming time is, how to attract the others to become part of their population. Not depopulating. When you are not just ruler, people will move to another part of it, they don't need to spend a cent, they don't need to get a passport to get the visa to go out, that you can stop them. There are no borders on this planet, except the manmade one, and with this technology we bring that back.

Then you understand, world leaders will change to be the justice, the correct, that they can have more people to be part of their population and their structure of life. The changes are drastic and it's not a promise anymore. The knowledge is there, it's been taught, and it depends how many of you, what I call, decode it, and how fast you can decode it. (1:28). How would we go through these things, how do we teach these things?

You came through the understanding of the, what I call, technology. Now the true application comes in. It's very much, when you go to school, you want to become an engineer. The first day you cannot put an aircraft together to become, what we call, "builder of aircraft." First you learn about the nuts, and the bolts, and the structure of the materials, then the wind flow, and the dynamic flow and the rest of it. At the end of the third year you might be able to put a small craft together. Where you have enough knowledge, and you know which bolt, you want to do.

Now the knowledge is under the same point. You've been given and you've been taught "bits and bobs" about the new flight system, which is your Soul. Now it's for you to, how to put the bolt, where and what strength of it, in the dimension of M fields, to where to end up.

Don't look at the complex, don't look at how the situations are. Look, in a way, that in a very short time, you don't like to be in Brazil, you don't need immigration officers, you don't need passports. You just move. (1:30). Those who want to be, let them be a thief, they can rule. If they can keep that position. We shall see.

Up to now men fought for freedom of choice, from now on man will fight for freedom of Soul, and it's a big difference. And nobody can give you that freedom, except yourself. There are no governments, there are no Soul agencies, there are no immigration Soul control. It's you, from now on, if you understand the knowledge, that dictates where you want to be, and what you want to be.

Are there any governments in the oceans for the fish, the dolphins and, what we call, whatever? Or do the birds have a king and the ruling party, and the border and the passport control. So, the STM is free, both in the ocean and in the air. Birds immigrate

without passport. Now man has the same chance with the STM. He just got to learn how to fly and how to swim.

That's all we are teaching. (1:32). The freedom of the Soul, the freedom of a man to choose his time, place and position. Have any of you seen birds flying in a flock of hundreds, of thousands, and one having a crown on his head as the king? Have you seen only one bird flies all the way from North Pole down to the equator and he is the leader? One is the head, and then he swings back to the back, the other one to take the lead. And they all know where they are going. When the head one gets shot, or drops, the rest doesn't spread everywhere and lost, they know where they're going. They already have set the destination through their Soul. So man has to learn. Flying through the Soul is the freedom of the man. We are not a religious organization, as I said many times. We have the system now, we have proven and more advanced technologies comes up, that you are free across the Universe, not bounded to one nation, one place on this planet that you can be abused.

Any other question? (1:34).

Q: Mehranez … Indeed we need good news. I'm also very effected by children, and blood in Iran. And, of course I don't think it's just for a piece of tissue (scarf), there is all that. Because as a woman, I don't care at all to go to a place where they put something on their head. I put it, it doesn't bother me at all. Because I'm kind of person, I would rather observe people, than they observe me. It's more useful for me. I was feeling very, in a safe place when I was in Iran. I was traveling, I was feeling safety. I was free. It was security. The last time I was in Iran, there was exceptional security in these streets. And I think the police are very respectful, also to women. Of course, that's what I see. And a piece of tissue, which the more we go up there, the town, it becomes lighter and lighter. Now it has become a very light, and 15 centimeter tissue on the hair all over. That seems such a stupid thing that a woman wants to fight for this, because in Iran we have never been …

K- We have to put it in the right way. (1:36). It's not a tissue at all, it's enforcing a will.
Q: That is right. I was going to come to that.
K- That is not it (the scarf). The same thing is in other parts of the world. To govern, they find different excuses. It's not just a tissue, it is much, much deeper. It's control. It depends on the, what we call, "greed of control." How much you respect life. In the Western world, in America, we respect life on the front, but underneath there is no respect. We seen what happened to the blacks and the rest. The same goes in other parts of the world. It just depends on which side of the fence of the politic you whistle.

Q: Yes, exactly.

K- The situation, what we see, is not encouraging one group, or the other, anywhere in the world. It's just bringing sense into it, understanding it .. why? In a way it's, I don't think ever has been just the tissue. It's been the way they dress, the way they can be.

Enforcing a will. The weakness of a man on a woman. (1:38). If men can control his weakness, women are free.

You've got to understand the history of how most of the Islamic world got into this. Before Muhammad, one woman had nine or ten men, because they've killed the women before they were born. When Muhammad allowed them to have four women, they lost control. Because they could never imagine. If we go back in the history of the Middle East, in Iraq, in Saudi Arabia, there was shortage of women, because they never had respect. Anywhere there was a woman, had 10, 5, 9, 10 husbands. When Muhammad said, one man can have four women, now they thought they got the control. And all this mayhem started. Enforcing what we call, somebody who's been hungry, and now that he's given something, his greedy, he wants the whole lot, and more.

It's the same we see in North Korea. We see the same in part of the East Asia governments. The only country which, with population, we don't see this kind of control is India, because of its multiplicity of their culture. They cannot control, the Indians are totally uncontrollable, because they're so mixed and diverse, that nobody knows who sits where.

Q: What is import for me is the social justice, (1:40). that people don't feel bad because they are poor. And I observed that in the streets of Iran. I noticed years ago, that being poor visibly, is not something to be to be shy about. And that was such a victory for me for this (uniformity) of the clothes. At the time, this cover of the head, which is now very, very light. For me, this (uniformity) of the women, the poor women who didn't have to buy their clothes, and makeup, they could put this and go to university without being shy, and the rich ones, was also of the same. So that's, I think, it's why we have so many PhDs, doctorates of Nano coat, in universities, women, even one ?? each other, which I don't care about that. But we have so much women from the poor level.

K- There is a culture we have to understand. In Iran, most of the boys when they finish their high school have to go to two years of military. Those two years puts a gap in the education. Girls don't have to go to military, so they continue. The unbalance in education, in seeing more women educated, is that, compulsory of 2 year military (service for men). If that was taken away, we'll see the same. Maybe the opposite way.

It's just to understand why. We see the same thing in many, many countries. (1:42). Nowadays, men have to go on the national service, not women. In Israel it's different, they all go on the ?? battle. But Iran, the unbalance with more women getting educated to highest rank, because they are not boys, as we say, ?? goes between the education. Two years in military, some of them push directly from universities, go from high school to university. This is where we see most of the unbalance.

But this uniform, uniform clothing, we are not communists. And nowhere in the world a torn Jeans, not having clothes, not putting a makeup, or putting a makeup, has made any difference in education, very rare cases. They make it for us to accept, that's the reason. But it doesn't work.

I was brought up to eat, to sit and to live amongst people. And I didn't see it, I didn't feel it, I did it. I understood it. The first school I ever went to, was a school where majority of the students were orphans from a nearby orphanage, but all these children ?? go from other school. I couldn't, I'd never knew, to me they're all the same, we all were the same, till I went to their, what they call, living accommodation.

Then my father explained to me, these people don't have a father or mother, they're orphans. But I said, they're all the same to me in the classroom. He said, because we want you to be brought up that way, that you're no different than the others. (1:44). Maybe I had wise parents to allow me to see this. I went through the first year of education with majority of the children in the classroom orphans. The celebration of the school wasn't done in the school, it was done in their orphanage.

So, cloth doesn't become the difference. It's the man who has to understand himself. They want to make us think that way. But in fact, it's us who accepts it. We don't need to. If a makeup, and a jacket makes you more intelligent, than the one who doesn't have it, most of the people come from the ?? ones who don't have.

Q: Another observation I had, which was very hopeful, that the children at the time they were eight and twelve, they were so polite, so intelligent, and so much respected by the parents. The father calls his son, "you," you know, a plural. (In different language they have different formal ways of saying "You," that we don't have in English). I was amazed. I asked the father, how come things have changed?

K- This always has been in Iranian culture. We ignored it. ..they try to ignore it. (1:46). We use different ways, but respect always has been in the culture. My children … (called me by my first name). Hardly they called me by, as "daddy." They called me by my first name, because they are equal. I don't call them son, I call them by their name. They respect the same. They call me back by my name. It's how we're brought up.

A lot of parents still call them, daddy, or papa, or baba, or whatever. Then a lot of people opposed, "why do your children call you by your name, they're children." They are human in a small pot, I always said. Then they become polite, because they're equal. You make a decision from childhood, they have a say in it. Not because I'm a father you follow. It's depends how you're brought up.

My parents brought me up the same way. We were not just a child, we had a say in where we live, how we live, what education we want. It's just the culture, how you are brought up, and how you do, and how they force us to adapt. My children are in their thirties, they started calling me a papa when they're in their thirties. Before that, it always has been my parents, always they all called me with the first name. Depends how you put it there. They never called their mom, mom, they always called their mom with her name.

Q: Well, I think, I thought the reason why children are so advance, which was not before, and they had goals, things, (1:48). it's because of this generation of mothers, women

who went to university, and they are so eager to learn anything they can find Internet, whatever, and the radios, are so intelligent. So, the women listen to the best educational programs for children, educational programs for health. It's so rich. And I think this is beautiful. This is a hope for future. I'm afraid that the day the women, majority are poor, they take out, they pull out this uniform, and they have no money to look like the people from the North. .. this is a problem.

K- No. You see, people have to understand the culture of Iran. What you're talking is a specific culture, what you are bringing up. The money you spend on a coat, you can spend on something else. The understanding of it is very simple. The freedom is there. If you want to wear the coat, you wear the coat, if you want to be fashionable, be fashionable. It's the same in India, it's the same in any part of the world.

One of the beauties about the human race is class, what we call, gap. The class gap has been, it doesn't matter if is cultural, if it's educational, if it's art, or whatever, has been the cause of the progress in human race. In trying to have, to achieve, you add to. (1:50).

A poor person is as important as a rich person. Because the rich will become poor, and then in that cycle of next generations they become rich, because they don't want the poverty. Then in that progress they add to the society. It's been in the pattern of life of the man. If you look at the people who become very rich, look at their third generation, fourth generation. Those children are poor, because they never understood where the wealth came from.

Q: Yeah, I'm not talking about my case. But I'm talking about the justice, social justice in Iran.

K- Justice doesn't come by clothes to cover. Social …

Q: Integrity, I like everybody feels integrity… even they are

K- It's the culture of the nation. What we've seen in Iran is not done by the Iranians. The head of Iran parliament, the two brothers are from Iraq. They are from the other side, they have no respect. They ripped the nation apart. Most of the people in Iran who are on the top, they are not the Iranian blood. When you have a freedom of, do what you like, you do what you like.

Q: Also there is a matter of, Iran actually has a lot of young men, twenties, thirties, which have no possibility to get married. (1:52). No possibility to get a house or something, to get, to be married to go there. So, if the girls are so beautiful, so what are they going to do, these boys?

K- But it's the same around the world, in China it's the same. In China due to "one child policy," they have some 20 million I think, or quite a few millions of boys, but there is no woman for them. What do they do? The same we have in other parts of the world. This is a social structure for humanity, it's not exclusivity of one nation or the other.

Q: I think the Iranian people, which are very calm, the women, I think because of this scarf, has become very calm. And when they see these…

K- What do you mean, it has always been. … Everywhere around the world women are calm, it's man who makes them violent. And some women make man violent.

Q: And these women who come and say, "burn the scarf," are so masculine, are so violent, are so much, not normal. It makes people afraid to look like them.

K- Actually, what we see, a lot of people like to look like them. Give the Man the freedom and let him choose. Doesn't matter what color, what race, what nation you are. That's the whole point.

You've lived in the West too long, and you go and see snapshots (of life in Iran). I was in Tehran. I was explaining this to my cousin in US a few days ago. (1:54). I went to Iran in 2008, as you know, by invitation of Ahmadinejad and their leadership to develop the Iranian Space. While I was in Tehran, I came to know their family. I think I explained this before, but it becomes relevant to what is today. Extremely rich family from north of Tehran. You know the, what we call, right up north of Tehran. That's where I was brought up. I came to meet a guy, and his son was doing system control in Dubai. And the father said, as you are specialist, Mr. Keshe, can you help my son? And I said, yes. On Fridays, I used to teach him one hour, a couple of hours, I used to go to their house, it was the area I was brought up in, in ?? Jordan area and that part, years ago.

One day I went to, I think it's called, ?? "Sabadar" or whatever, shopping, it's just a hall, like a shopping center with a big hall, multi outlets of food. I went, and I took a food and I sat down to eat. I noticed suddenly, there was a space gap around me. There was nobody around me, I thought, maybe I sat in the wrong place suddenly. I ate my food, I left, as I came out of this compound on to the, what used to be the ?? "Palavie", the main street between north and south of Tehran. I notice the same thing as what we see in the news. (1:56). A girl was getting dragged into a van, and there was a lot of shouting and howling, and suddenly it stopped. Suddenly, as I came out, it stopped. In those days in 2008, I used to walk with ties in Iran, which was very unheard of. A lot of people used to make comments, how come this guy can wear a tie, and nobody tells him anything.

Suddenly, everything stopped, and the girl was left on the floor, and the van disappeared. I thought, very strange. I didn't take notice of it. I went the next Friday to teach the boy who was in his early twenties. He said, "oh, you were having food in that place." I said, why you did not joined me, it would have been nice to have a meal together. He said, I tried, the security people didn't let me, they said, "sorry." I said, I am his student. They said, no, he is eating. They cleared the place in the restaurant, that nobody's in touch with me. When I went out seeing such a thing, they must have told people to drop (it). He is here, he cannot see these things. That's 14 years ago. When I hear about what happened in Iran, in the case of this woman, I've seen it with my own eyes.

We cannot force on people our decisions, we have to have the freedom of. Years later hit on me, what I saw, and what was the reason that girl was let go. We are not, we do not see when we are in it. (1:58). We go on the two extremes. Society has to be free. You see a lot of women in the West put a scarves and hats on, nobody forces them, it has to be the same.

In Iran when we were children, "chador" was free whoever wanted wore it. Whoever didn't want it, they didn't wear it. It's not just a piece of tissue (clothe), it's the understanding of the culture of the freedom of the man.

Now, if we teach these things (new technology), many times I thought, now that they're coming to this level of understanding. The girls in Iran, they don't need to get shot at, or the boys. You travel with the Soul, you go to the United States, you go to Africa, you go to another planet. Nobody can rule over religion or the politics, for man. The technology brings that freedom.

When 200 years ago, our grandparents traveled from Palestine to ?? "Ishpardan," then Kazakhstan once or twice a year. Where were the borders? Did anybody check them? Did they carry a passport? They had the freedom to go where they wanted. We allowed this control, and now with the knowledge and technology we're gaining our freedom back.

We wrote a letter to the Austrian government recently. Our people spoke to the officers, the letter is going out with them. And we informed the Americans, (2:00). can you.. In a way, we want immigration officers in Linz. When I spoke to American embassy and officials last week, that we want the Americans to allow us, that the Americans can come to Austria, and how the person to come, (that) they can issue the exit (stamp), that he left the country. They cannot understand it. Mr. Keshe, we send it to the White House, they are making a decision on it, we'll come back to you, your agents will call you.

Where is the freedom? It's the knowledge and technology, it's not any more, what I call, a piece of clothe. Now, if the Iranians learn, that they can travel through the Soul to United States, or to Brazil or somewhere else, would they stay? That's all it is. The technology brings that change, and it's, not on the verge of, nearly 200 of you have been through it.

Q: I hope your technology gets fast enough to everywhere.

K- We're trying to do it. That's why today's teaching moved from 9 today, because we were trying, we tried for a year to do it.

Any other question? (2:02).

Q: Salomea .. You said that climate change is a priority, or challenge for humanity, for planet. In this context, we do something, I mean, Foundation, and also human being and maybe "creative society" could be a solution. On 12th, November will be a big conference or a summit, something like this, about this subject. Thank you very much.

K- Can you repeat I didn't understand.
R: What was your question? I didn't understand.
Q: My question is, if creative society could alleviate, could be a solution for climate change, and for a better life on this Earth, for progress and development, spiritual and physical development in this context of climate change. Because on 12th, November will be a big summit about this subject, how we can create a creative society, which is not democratic, ?? model of society, it is not democratic, and it's not a dictatorship, it's something else, a creative society, a third way. (2:04).

K- I don't know, I don't understand.

R: I don't have a clue what you're talking about. So, we will have to have a reference to it and try to define the term "creative society." What does that mean? Is that anything that's other than the societies we have now? You better redefine your question and come back later.
Q: Yes, when I went in, I traveled in Belgium, I traveled with somebody from Ninove which was the same birthday like my mine. I contacted there people working for creative society. And at that time, I wasn't able to understand what it means? Because I was very young.
R: We don't understand what you're talking about either. So, you would have to explain it all to us. And we don't have time for that today, unfortunately.
Q: Yeah. Like, a creative society. I mean, to create another way of living together.
R: Isn't that what we're doing through the Keshe Foundation and what Knowledge Seekers are doing?
Q: Yes, and my proposal was, maybe we can collaborate with them and give us a model and an example, for example, and to work less, for example, four hours, and to have general revenue, fixed revenue.

R: Isn't that all part of what we have in the Keshe Foundation and what Knowledge Seekers are doing? I don't understand what you're getting at. Do you want Mr. Keshe to go to this webinar thing?
Q: (2:06). Yes, yes, yes, yes, yes, you are right. To be there an expert, and maybe we can imagine something and help Mr. Keshe, and Mr. Keshe can help us to understand…

R: He might be interested, but you'd have to send all that information through the proper channels so that he can have a look at it, he can't make a decision here, right now…

K- We get invited to many of these things. Keshe Foundation has to stay independent. And we keep it that way. The whole structure is, as I always say, when it is the time right for something, it will happen. It's no use pushing it, try. We are there. There are people from different societies who understand what we do. And we keep it that way. We have to go the way, and as much as people can understand, can support themselves to be part of.

Any other question?

Q: Dean .. Mr. Keshe, you spoke about, that you switched a system on in the flight room, in the exhibition hall in Linz. A little while ago, you said that, you made an intention that took you off your feet. How's that going? How's the elevation of the Soul expanding across?

K- That unit is not in Uno Center yet. That unit is in getting developed to go to the Uno Center. (2:08). The unit, you haven't seen it yet. Just give it a few more weeks, it'll be there. I think when we install these four new units, which is getting constructed and put together, will change a lot around the Uno Center. Because they are not confined within the power, they carry. The strength of the fields they carry, it will be felt in the long distances from the center. And I'm sure your cameras two meter away will detect it.

Q: So Mr. Keshe, if you were to elevate the Soul of a Hydrogen or any element, would that affect the Totality?

K- Of course.

Q: So, the cell in a body, an atom it was to elevate that particular Soul. It would effect the body?

K- Of course.

Q: So, if we go from an atom to a Universe, if we elevate from a viewpoint …

K- The Soul of the Universe, you would elevate the Soul of the whole Unicose.

Q: Doe's a Soul present in the moment. One of the beautiful people that are listening, are wonderful Souls that are feeling the presence of the fields in this very moment. And the moment that they are present themselves. Would they have that capability?

K- Of course. We all have, we all have.

In the past few days, and especially the past few days, we'll start the process of elevating the Soul of the humanity in a very specific way. (2:10).

In a way, gradually extending the boundaries of the, what we call, understanding. When we talk elevation, it’s not you becoming bigger. It’s you come to understand more. You come to be more humble with it.

I was sent a video by Dr. Bararpour, I think few days ago, where in that video the Turkish president, or the Prime Minister ?? (name) is with Putin. He said, Putin has realized that he has lost the war, and he's trying to find a way out of it, and he'll try to negotiate a way for him to get out of what's happened in Ukraine, and the rest of it.

I thought how much of it depends on the Knowledge Seekers who elevated his Soul, or is it just a coincidence.

Q: Mr. Keshe, have we had any world leaders Souls present that received, that have received?

K- Yes.

Q: And they will respond in their physicality?

K- Of course they do. It's like you watering a plant. When you water a plant, it shows in his physicality. (2:12). In the condition of the man you elevate the Soul, you give energy to the STM. Of course it does.

Q: Do we see this elevation .. expanding out from them, once they receive it?

K- Oh, yes. You see, we are looking, just because I did, it has to happen. First of all, what you think you've done. First of all, is it at the level, that he can receive it, and is at the point that he can receive? You can take a horse, as we say in English, to the water, but you can not make it to drink. But, when he drinks, he thanks you for taking him to the water.

We have to realize, just because I did, and it didn't happen, (then) it doesn't work. This is how we perceive, has to be. We make it available. Would it elevate?

We see videos coming out of China in past few days and weeks, which is literally destroying me inside. Why? What is coming out in Hunan with the Covid, what we've seen in other parts of China, what we see in Iran with the youngsters, what we see in Ukraine, what we see now in Brazil with the elections. I sit on the position that forever these information's are filtered to the top, filtered to the top, (1:14). and the only thing we do. We don't interfere. We elevate the whole of the nation.

Go back a few weeks ago, before we saw these problems in Iran, two or three weeks before that. I said, we cut our hands from Iran. Any collaboration and cooperation. Because our Soul knew what is to come. It wasn't coincidental. Just go on the recording of past few, two months. Find what I said it, and see what happened. We usually give it 14 days.

We see things. You see, the position we pick countries, because we are in touch with, we see it, we have one of our, some of you know, somebody was very close to Keshe Foundation from Australia. The person doesn't want to leave till the government is changed, and the World Government is changed. Because it doesn't fit the image they have. The Australia has been backwards to do everything possible to control everything.

We see Canadians talk about their Prime Minister, worst thing happened. Americans are with the other one. We always complain about the world leaders we choose, we elect to be. But, do we elevate their Souls, that they become just and correct leaders? Or they are sold even before they come to power, because they signed so many agreements. (2:16).

Don't expect, just because I elevated, I get it. Expect, what will come out of it, if it's good for that elevation. Not just because I thought, is there. Just past few minutes, we listened to Mehranez, how she speaks, how beautiful and peaceful it is in Iran. She just come back past few days or weeks from Tehran. But, because we want to see that.

But we see the others with the other side, which is coming through the social media, which is coming through Keshe Foundation members around the Iran. We see the massacres in Ukraine, which are continuously get reported. It's not just one, it's all over the world. Mankind has to be elevated as a whole, that nowhere we have this ?? condition. If you see the videos, the correspondence, the things which are received from China in past few weeks, I sometimes don't want to exist. If you think the situation in Iran is harsh, look at the other places around the world.

Just because Fox has decided not to report it, like Keshe Foundation, it doesn't mean it doesn't exist. But our job is to change what this planet missed, putting the energy back, that it finds peace with itself, the STM and the physicality of the man. (2:18). Soon you will a lot understand what and how it works.

It's not just elevating the STM, it's bringing balance with the STM and the STP of the man. Then you find peace.

Q: So from a perspective Mr. Keshe, of being outside, if this planet is part of a much bigger totality, then if we look at the cell of a human being and the cell of this planet, then to elevate the planet, do we need to give you more energy to be able to bring this forward in an instant, in a moment?

K- Not me, I'm not, nobody. I'm one of you, I'm a Knowledge Seekers. It's us to become in control of our freedom, of our fields and energies. We are not making another prophet, we are not making another temple, we are all equal. It's just some of us understand more, some of us access, has access to more. And some of us can create, for a lot of us to benefit from that access.

Q: So, the picture on the screen Mr. Keshe, the image of this painting with the Gans, is humanity receiving the plasma waters, is it ready to drink from them?

K- He has been drinking from it, but he's not aware of it. It's always there, it's always been there.

I was in the center today, I had a very amazing experience today. As I said, we are part of, all what we are trying to do. As you know, with the supporters of the Foundation, we had to get them today into the Center, (2:20). we were all in there. All the ones (from the organization to spread the T internationally) who are trying to do it, and the ones we're trying to see how we can save it, to do it, and we came to the conclusion, or whatever. We went to the flight room, and one of them said, "now we understand what

this technology is, what needs to be done." We never understood till now, and even here, we think we understand.

With ordinary people, you come into, with the Enhancement Unit, with the people who are world decision makers, two of them were in the Keshe Foundation Center today. In past two days we shut everything down, nobody could come. It's because some of the most powerful men in the world, in a given position, were in the Center. One of them is a friend, and the other one we know for a long time. They wanted to be in the… They change governments, these people. They are that powerful. Their decision can change governments, anywhere around. They wanted to be in the Center today.

They spent a couple of hours, and they came as a man, they left as a confused man, they didn't know exactly what to do anymore. That's why we went for this a year ago. We canceled all the meetings, even today's teaching was moved because of these people. They came in, and they could not believe what was on the first floor and the ground floor, (2:22). and in the flight room. And to me, that was a massive elevation of knowledge and the Soul. That's why we after a year, we could bring. Because these top guys don't get passed up, the total knowledge. This time they came to see the total knowledge.

Q: Did they feel it Mr. Keshe? Did they feel the fields, did they experience it?

K- They felt more than the fields, they felt the knowledge and what carries.

They are most powerful hidden people, they wanted to be. If you were in the Center in past two days, there was no entry for no one, we left 2 days, to ??, that nobody touches anything. They're respected by world leaders for what they do, and ?? here they are. These are the people we went for support, for the expansion of the Foundation, and we spent a lot of time and finances. You and a lot of other people supported it. But the conclusion is, is humanity ready for such a thing?

I entertain some of the top military people some times, twelve, one o'clock at night without anybody knowing it to the center. They want to see, they want to feel. They want to know what is there to change.

Q: So, when they experienced this Mr. Keshe, on the Soul level, (2:24). they come to understand that we're all equal, we're all the same, and that…

K- Some of them look at it, what can I do with this, that become more powerful for me? I've seen that.
Q; We know that won't happen, with the plasma.
K- That's their thought, that's the human. That's the human.

Q: So, when we get a position where certain people on the planet like NASA, let's say, that have been put in a position to experience other planets. When they experience it on a flight room experience themselves, do you think that they touch, their Soul is touched so

much that they when they go back to give this information to their peers, their colleagues, do they totally understand what is being given?

K- Not really. I keep on telling them. You've got to realize, a large number of NASA staff listen, even today, now, into these teachings. We encourage them continuously to go back to the teaching last week, two weeks ago, listen to that part. Some of the NASA scientists are online now, they know who they are. Top, top on the echelon top of the NASA are online, or listen today or later on. The same with the Chinese space agency, the same with the Iranian space agency.

In my, many of the communications with these people, I refer them to go to the teaching (2:26). .. because we monitor it. They go and they come back with a question, or they ponder something somewhere. Those who are… You've got to realize, one of the top directors of NASA has been an Iranian, Mr. ??. He is very close to the Foundation. He has followed the Foundation from when I started the Keshe Foundation, when I released the first technologies and when he was still, as part of the staff in 1985. He's on board of NASA. He is a Board of Management of NASA. He's a very high ranking NASA people. We always had direct contact with (Mr. ??) in early 2000 and 1990s.

But they cannot understand the possibility of the motion in the movement of the fields, because they have to show something to be Americans, they have to have a rocket.

Q: Can you give them a plasma rocket Mr. Keshe, in some way, so they experience it?

K- They're invited to come to, what you call it, to Linz. We know them personally, we have everything with them, it's a respected, what you call it, talk with a number of. We don't talk to one person in NASA. We talk with a number of people in the top with NASA. We continuously deliver messages to them. (2:28). And they read it, because they gave us their WhatsApp, we didn't get it, they give us their Telegram. Otherwise we don't have. We continuously feed them what has been achieved, what it is, and how they can use it in their system. It's just not NASA, Russians have bigger structure working around the technology of KF, because we are very close to Russian work. Russians understand this technology much better than the Americans.

Q: Why is that Mr. Keshe?

K- They work on plasma much deeper, Tokomak is a Russian system. Tokomak, which most of like CERN, and the rest, because Russian scientists are very deep.

I've had a connection with the Russian space scientists since nineteen eighties, nineties. I used to travel, I used to meet these scientists on one to one basis. We used to have an office, people who worked for me can tell you. We used to have an office in Amati, which I used to spend a lot of time there. The head of the Keshe Foundation, not the Keshe Foundation, the head of my operation in Russia was headed and run by a gentleman called Mr. ?? Botika. And his father was like the head of KGB. We had access

to anybody we wanted to talk. If I wanted any information, I said, Mr. Botika, he said, let me just ask papa.

We wanted to share the knowledge, we wanted to see. I've traveled the depths of Kazakhstan and Russia, with scientists talking. Especially nowadays, Keshe Foundation. There are a group of space scientists in Russia who works on the plasma technology, (2:30). they tried to mix the Tokamak with the Keshe Foundation Plasma. And the Chinese we know, they don't have the fuel combination, but they're working on it very hard.

Q: You said that was very easy to produce Mr. Keshe. You still not give them the recipe.
K- You remember that Coca Cola bottle? Everyone was thinking, what is that secret liquid? Caustic. You remember?
Q: I do, yes.

K- So now it's the same thing. We make it easy, that they don't see it.

Q: That just amazes me, they have all these abilities, all this technology and all the money in it, and everything behind them. And yet this single bit of knowledge that some Knowledge Seekers have. I do not want to say that the Knowledge Seekers know everything, but they have the information, as simple as, not simple, a Knowledge Seeker, and yet you have these institutions, and these corporations, and governments that are sat there waiting, and it's all dependent upon a very simple little plasma that needs releasing.

K- You see, it's how you look at it and how you brought up to look at it. Most of the Knowledge Seekers came to the knowledge through trying to understand something new. These scientists in these organizations, they are not after something new, they are trying to prove their points, and they push these organizations their way. It's a big difference. Knowledge Seekers come here to learn something new, something different. These people in the, (1:32). what we call, structure of these organizations, they become Knowledge Seekers, but they still have to come, conformity to be within, what the government put in.

Q: So, they come, as Jalal would say, they come with a full cup, and they need to empty their cup before they come.

K- No, they come with a tainted cup, they have to clean the cup. And that taint comes from the wrong knowledge in the matter state, nothing else. If they change the knowledge to plasma state.

The Russian plasma scientist understand the Keshe Foundation technology, many of them, it's hundreds of them. They work in a specific operation in Russia, we have contact with them, we know them. They are amazing in their work. But still, whatever they do, they don't go the way we want to go. They want to go to be used, that Russia will be big, and they'll be powerful military organization.

If they go to share. If the Russian Plasma technologist, Knowledge Seekers, come open and the direction with the Keshe Foundation, you will be amazed how much we can learn from them.

Q: So they have the knowledge, and they could, they just need to come forward to share it, together collectively?

K- Yes, they have the part of knowledge which suits them, they don't go beyond it. They have to look at the plasma side, not matter Plasma side.

With you, Knowledge Seekers, you look at the Plasma side. (2:34). Most of our Knowledge Seekers have no knowledge of the plasma the way scientists look at it. They look at the plasma the way we taught it. You are all, what I call, "virgin brain" in Plasma. That's why you understand it so easily.

The Plasma matter state scientists are framed, are in the thinking in the matter state. That's why they can't see this side, very hard for them. Plasma physicists, especially with the PhD and degrees next to their name, they're "hardest nut to crack" in the block of steel. I used to, in Ghent University there is a section which plasma physicists work, worked when I used to go to university. A large number of, quite a large number of these Plasma scientists in Ghent University are Iranian. When I discovered them I was shocked. With all the boycotts, with everything else. Iranian Plasma physicists are more or less only scientists, which are allowed to come out of Iran and work with international, but nobody knows about it. If you go to CERN, very large number of the CERN scientists, are Iranians. Iranians are masters in Plasma physics.

But when you speak to them, they're all matter state Plasma, they don't understand the free Plasma. And I had an encounter with them, I sat with them a few times in Ghent University, when we were doing the tests in there, because the university structure was very favor of the Keshe Foundation, we did a lot of work there.

They don't understand the physics Plasma we talk about, (2:36). as Knowledge Seekers. You are like an empty canvas, which you learned the knowledge, through the knowledge of Creation with the Gans's. These people have been taught Plasma has an electron, you have to open it and then this happens. None of you Knowledge Seekers talks about the electron and proton. Now you understand the difference. To get the Plasma physicists to separate the neutron and a single electron, and then put it to a fast whatever, whatever, and accelerator and the rest of it. None of you speak about the Plasma, use it for whatever you use it for, for painting, for toothache, or whatever, speak about electron and neutron. You are very educated. You don't see it because you're rich in it, you don't understand matter Plasma physicist, there's a huge gap, it's as big as the distance between the Earth and the Moon.

Q: We allow Mr. Keshe, as Knowledge Seekers, you know, we gather the information, the experiences from your teachings, and we set an intention and we use the Plasma, we

manipulate the Plasma with our thoughts and intentions, and allow it to flow and allow it to…

K- You try to explain that to a Plasma physicist at CERN, and they call you lunatic. If you tell somebody you use a Gans Plasma for disinfecting, or for a toothache, or for space technology, they tell you, you're crazy, I'm a Plasma physicist, you don't understand, you're being fooled. But I use the water, I stopped the Corona, I use the water I can walk. So, who's the fool? (2:38).

It's separation between the two schools of knowledge. What I teach you is a knowledge of the Universe, the way that the fields, we call it, Plasma works. There, they're still after the electrons, how fast they go, what it is, how they can accelerate it.

Q: That's a great explanation Mr. Keshe, the thing that… So, on an emotional level, what's the emotion that sets this position for them, where they will not allow, and they will not get past the educational constraints that they've gone through?

K- It's called .. "alphabet." The only thing which stops the scientists from universities to understand any new science and technology is alphabet. Do you know what it means? It's called BSc, it's called MSc, it's called PhD. That three letters create craziness. "I have a BSc in physics, I know you don't know." You read three physics book in 30 hours of physics lecture in three years, doesn't make you God. And you read the wrong books to start with anyway. The biggest problem man has.

The Chinese government realized this, how their, what you call it, advisors, block new technologies. Because they carry, "I'm a professor," I'm a, or whatever you call it, elite scientist. (2:40). They block it, because the initials, they know nothing.

Q: How is the teachings going there Mr. Keshe, with the education that is, the Plasma that is expanding and coming out, coming forward?

K- Where?

Q: Everywhere. So through the teachings, in this very moment. You say people are listening in. Are they receiving this information enough to actually, to educate themselves and elevate themselves.

K- If they are, they can do. It depends if you are there, educate, test and you see. You gather water, and you have a pain, and you put it on the pain, and that water takes your pain away. You try to explain this to a Plasma physicist, you try to explain this to a doctor, they say, no, you're crazy, it just happen, you think it's not there.

You understand that that water carries the energy of a plasma, which you added to, as a Gans, it's hidden energy. He cannot understand it, because it doesn't fit into the books he has read.

I had a beautiful writing from one of our knowledgeable Knowledge Seekers, and it brought me a lot of joy. If I read it, he knows who he is. He wrote this to me a few days ago, I just read it for you. And it brought me so much joy, that how our highly educated Knowledge Seekers in the specific, they are experts in their fields. Now see, now they understand the difference in the language, in the knowledge, that they didn't teach us these in the university, (2:42). in our education. Just because he hasn't been taught, it doesn't mean it doesn't exist. It's another way to look at it.

Q: It's a viewpoint, yeah.

K- If you're open to it. This is what I always said, the biggest problem with the Keshe Foundation and ever, doesn't matter who is in power in Iran, it's not the technology. They embrace the technology with open arms. We are the first space independent private company registered in Iran, as far as we know. Keshe Space company registered in Iran. They don't allow nobody else to open a space agency, because they know what it is, what it comes, what it can do.

But there is a big problem in Iran, as I said many times, they want to annihilate the State of Israel. They want to destroy that. As Ahmad ??, that stupid guy said, they want to wipe me off the face of the Earth. They can't say the guy who's brought so much technology is half Jewish blood. They cannot sell it to Iran. This is the problem we have in Iran. How can you have a Jewish blood so devoted to a nation? It doesn't fit. So, they have to keep it out.

Q: Mr. Keshe, you said to step away from the Gans's, and the MaGravs, and everything, and do it on another level. So, the expansion fields the, you know, the field interaction of the reaction, the reactor inside ourselves, the Sun inside ourselves, (2:44). will this not initiate and touch them on a Soul level, through the Universal Council, and through the Earth Council, and the Core team and all the beautiful Knowledge Seekers that are present in this moment. Being present in the moment…

K- You are a drop in the ocean, we have to gather many drops to create a new ocean. That's the only way I can put it.

Q: Does it have to be planetary based?

K- Man has to change it from inside, otherwise, "the others have done it (in me, I) didn't want to do it." If you do it yourself, then you can't blame anyone. But if somebody else gets you to do it, because they see the benefit of it, you go back to it, or you blame them for it. I know this firsthand. Man has to do it from inside. It's no use coming from outside trying to change the man inside. Because then he goes back to it, and he blames, "the others did it, we didn't want, we still wanted to kill and eat."

I had this battle for nearly 15 years, till very recently the person understood, that it was a battle with himself, not understanding what was done was for his own benefit. Then he changed. He changed 180 degrees.

Q: I've noticed that with the plasma Mr. Keshe, it does have a distinct ability to flip and completely change its direction, it's that MG field interaction. (2:46).

K- It's understanding, it doesn't mean becoming bigger. It's understanding, it's totally understanding. That's all it is. What do we understand.

Q: What do we allow?

K- Yeah. It depends what. Not, what do we allow, it's what we would like to accept. It's a big difference, it's a very, very big difference. What we would like to accept. Anyway, we'll see what happens and how things take shape, how much we can educate.

I think the point of change is, it has to come progressively, it cannot be as a shock, in one way or the other.

Q: Yeah, it's definitely a filtering process, Mr. Keshe, you taught us a long time ago. I remember, one of the teachings you've said about this gathering of the heavier and then it gradually gets finer, and finer, until you get to the end, and then. But each one has its position and has its unique ability to be used in a certain way. So, the filtering process, whether .. it goes from the matter state through, gradually filtering through to the Soul and becomes that essence of the Sun of, you know, the essence of the Universe and the Creator. It's all part of us. And, you know, we are a Plasma, the Earth, part of the system, that everything that we're involved, everything that is us is a Plasma, (2:48). you're teaching about Plasma, and is that condition of…

K- You know, change it to another word, call it, "Plasma life," because that's what it is. We always consider life as a physicality of breathing and moving. If you, now we understand, that in the center of us is a fields, and call life a Plasma, or a Plasma life. You interact different way, you don't need an arm, your arm extends the Universe. You don't need a leg to walk, you can get anywhere instantly the way we do in the systems.

I know one of your wishes is to get into that room and get into the system. And I say, it's not the time. When it comes, you will jump across. But these systems are made for us to learn and to teach. We had to bring Knowledge Seekers that you are part of it. Keshe Foundation is not an isolated thing, they do things, and they tell us. No organization has ever done what we did with you lot. How many of you, we came every week, every week, sat there, waited the whole day to go into that system. I sometimes started think, my god, these people are so hungry to be part of the change. They come nine o'clock and they don't get into the system till five o'clock, and they're happy that they got in, and they can add something to the knowledge. You've seen them.

Q: I have Mr. Keshe, yeah.

K- So, it's the first time that knowledge is created, tested, proven by a number of people. (2:50). It's not NASA, we chose you, you do an exam, and you come. A doctor, a layman, a housewife, a painter, a carpenter, anybody has walked through this system. We

didn’t look at their physicality, we look at their knowledge, we looked at what their Soul brings, that the system accepts and we can learn from. It's a big difference.

Q: I just suddenly thought Mr. Keshe, something just occurred, a thought. So, have you placed, I don't know, obviously you would tell me whether or not you can discuss this, but have you placed other beings, other entities, other Souls within the system, like a flower or something else other than, you know, what we would describe as a being with arms, legs and everything? What about something else?

K- Yes, ??.

Q: And the interactions, can you describe what, how? Do you know the soul felt, what they expressed?

K- Yep. You do not know what I carry in that room? You've seen me, sometimes I walk in with things in my hand in there, I think.
Q: I have, yes.
K- So, they just don't go in there for the sake of being in there. They go in for a purpose.

Q: And they're adding to the Soul of the Totality of the unit?

K- In a way. I think nobody is close outside the structure of people who make these things, than you have seen what's going on in there. I think you and my bodyguard are the only one who actually monitors anything goes into that room. (2:52).

Q: Yes. There's Souls that are present, that have been through there. I've encountered many beautiful Souls, Knowledge Seekers. And the reason I asked that question is that, when you come to understand the knowledge. You understand the beauty and Divinity of everything. And many people know this and in all sorts of expressions of life, and walks of life, and teachings and things. However, when you actually experience it, on a Plasma level, on a Soul level, you do as a Knowledge Seeker, touch another position, another field strength, that does expand the consciousness of and the thoughts that you have, towards another Soul, towards another position. It makes you, it does touch you.

K- It depends what you do with it.

You've been there, you've seen, as I said, my protection officer is the only one who's literally always within meters of me, and he sees how people go in, and how they come out. Sometimes I look at him and I think, God, this guy is not a Knowledge Seeker, but the things people come out and say, and he has to listen to, what goes in his head? You've been there. You know when people go in and they come out, and they explain the emotions or things they did. He’s there, he listens because he got to be a few meters from me. You've seen him. I wonder sometimes what does it go in his head?

Q: He's a very beautiful Soul. (2:54). I'm sure that he's receiving many, many fields strengths from all the Souls that are present, that go through the system.

K- He is an amazing guy. But, I sometimes wonder, somebody who just is there in the line of protection officer, what does it go in his head, seeing these things, coming out of no background of the knowledge? A total outsider.

Q: I sense he knows a lot, Mr. Keshe.
K- You've been there, because you talk to him.
Q: I think he knows a lot, yeah.

K- Any other question? Or shall we call it the day? We had a long, long day today.

K- It's four o'clock in the morning, what are you doing this time of day?
Q: I'm celebrating.
K- Ah, that's good. What's happening? What are you celebrating?
Q: Celebrating new life. A new world.

K- Tell us what's happening. What's your question?

Q: .. Recently I was studying your paper on ALS, and concluded that the will to die is the ultimate cause of ALS. (2:56). So, I think that the so called, natural death is not actually natural, but due to the same reason as ALS patients, a will to die. Only the difference is that ALS patients have a very strong will to die, while others have a weaker will. Then if we can rewrite, .. we can freely decide how long to use this body, that is our own lifespan. Then we can quickly relieve it when the body is in pain or stressed. So, I would like you to comment on my views, which are correct, and maybe not correct. So help me to correct me if I'm wrong. Thank you very much.

K- As many of you know, we used to, I did a lot of work on MS and ILS. To see the effect and the progress in new technology, and the will of the man. If you remember, we had a guy in Italy, who we followed, he built up and then his sequence of work was to die with ILS. We've done a lot of work. I see in the background, even in some of the .

There is a Knowledge Seeker here in the background. She would have died from MS years ago. She's here, she knows who I'm talking about. We applied the process of the technology with her. Now it's more than 15 years, she's still living, more or less, (2:58). in the dimension of the normal life in MS.

She understood the reason why she enforced this on herself. And ILS is the same. ILS doesn't happen, that every time they wish to die and they control. It happens in a split of a second, and for once. And it's so powerful, that switches the emotion of life, or the intention of life. Up to now we had no knowledge. Now with the knowledge, especially the new Enhancement Units, we can turn that switch.

Doctors came out with a lot of medicine, a lot of chemicals, a lot of things, psychosomatic, psychological medicine or whatever. Nobody has ever looked at the Soul, the emotion, the fields. The new technology, Plasma technology, as emotions are creation

of the fields, it’s more or less, will be the only technology, that we'll be able to make that switch back.

This will be proven by the world of science. I proved it in a way, of physical Plasma, not the new understanding of the Plasma. Now, especially adding the cosmic rays to it. We can switch. Once that switch is switched, the guy doesn't even remember.

It’s like wanting to commit suicide, you go you take a tablet and you kill yourself. With these people it’s emotional switch, it just happens. And that's it, (3:00). they can't reverse it, because it's happened, it’s there. The switch is locked.

In the past, we could bypass this switch. But with, in the past, I mean the past 10 years, we could bypass the switch and change the condition. With the new technology we don’t bypass, we actually have the knowledge to create the switch, to flip that switch.

I'm sure next few weeks and few months, a number of ILS patients will use these new technologies in, most probably in Arizona, in Germany, in the other places using our system, and you will find out ALS will not be there.

It's a switch of wish which gets stuck. It doesn't allow the life survival information to pass the switch. It is a physical entity inside the brain of the man, we know where it is. But it needs a field the strength from the Soul to switch it. And the new technology we have, has that capability to switch it. In a way, it melts the lock. If you look at it, you got the switch locked in the ice, you can’t move it, you're trying to change the gear but it's iced up. This technology has that power to de-ice it, in a way, if you call it.

This technology is made for psychosomatic conditions like ALS, MS, Fibromyalgia, and Alzheimer's, Parkinson's. (3:02). We used to use, as I explained to Dean, technology of the Plasma matter state. Now we are in a total Plasma, plasma state in the body of the man, Plasma, it just goes. It gets better, we’re learning more, we are adding more.

Now, if it takes 10 weeks, 15 weeks to, for our doctors in their centers to change the, let's say, Parkinson's, Alzheimer's, with the new generation, which is coming in with the cosmic rays, you should be doing in a day. You will see it. But then the body has to start learning to go back to normality. Then the brain has to rebuild to go to normality.

You can switch the thing on, but you have to understand, the rest of the system has shrunk, the rest of the brain has shriveled and turned, now it has to build and go back. It doesn't happen over time of one second. Months and months it takes to go back.

Q: Actually one of our famous enterprise Jingdong, one of his high level management people has get ALS. And he was fighting for several years and set up a committee in China for helping people, which had ALS. I had approached his, like a, leader of his committee, and the company had passed the paper to them. But unfortunately they cannot accept it right now.

K- They can never accept it, because it doesn't make sense to them, it’s not in the books. (3:04). I keep quiet for a while and then we'll tell you what is about to come. In China you suffered because of the decisions we made. What was going to happen, and now today we have concluded this matter, hopefully by tomorrow it will be done. But what we set up to do was actually, bring a massive change in. We still hope that it will be taking shape in one way or another. Once we publish something, there'll be a lot of work on it to research and develop it. We have to wait and see.

I remember when we did, the Italian ALS guy was in a wheelchair, I don't know if you remember the videos, and we followed him to go to the company, to the factory where he used to offices, he used to work, to go back to work. And at the end, he, we bypassed the switch, we brought the will to live, but we couldn’t dissolve the switch.

Now we can, with the new technology, we can open that switch. And the only thing is, the proof of the pudding is in eating it. It takes time. I think we’ll hear a lot from Jon, when people start using the facilities there, we hear from Germany, we hear from other places, when they started using these, and the people will come through it. (3:06).

Q: Yeah, I had the feeling that the time is coming.

K- You know, we were talking with the factory people to start releasing the Enhancement Units last week. So, the knowledge is there, then we start it. But it still doesn't stop. My biggest concern is that, even though we have become so advanced, every six months twelve months, we have to revamp these systems internally and all the enhancement technologies is developing so fast, that it becomes obsolete. Instead of spending 10 weeks, you spend, what do you call it, 10 hours.

You remember the gentleman with the Parkinson who came in, and he was running after a few days. So, we learn so much in those systems. You saw the lady is in a wheelchair and the brain, and a few days later was dancing in the hospital. You remember? We have the videos of it. It is, technology is there. It's just a matter of. Now we could not do certain things, with the new developments we can do.

Q: That's all we are looking forward, for the more powerful.
K- It’s not powerful, it’s understanding.
Q: But you said that the cosmic ray, that's mostly important technology base.

K- Yeah, but it’s not a power, it’s a knowledge, understanding it. It could be the weakest strength in cosmic ray which does the trick, not the most powerful.

Q: Yeah, yeah, yeah, that's the beautiful of the Plasma. I always call me a little Plasma, right?

K- Let me ask you something. Where are our six systems which we flew to China from Austria? (3:08). Do you know where they are?

Q: Two are in our office, but there are several is student doctors, in their hand. They haven't returned to us yet.

K- Can you collect them, please? And I tell you what we going to do with them. For those of you, if you don't know, we built a preliminary of these Enhancement Unit, six of them in Austria, about three years ago, maybe more. We shipped into China to be tested and the academician who started test with us, he is a military academician, of the Chinese military hospital, who worked with us with these systems. The whole the structure was to see, and we learned a lot from it.

Then it became the backbone of what you have of the Enhancement Unit.

Thank you very much Lin, go back to sleep. Thank you very much everyone. Hopefully we'll meet each other next week at the same time, as normal nine o'clock in the morning. Thank you Rick
Q: Thank you, I'm so exciting. So, I cannot fall sleep again.

K- Thank you very much indeed.

ENGLISH TRANSCRIPTION

(:14).
K- Yes, good morning, good day to you as usual. Whenever I'm whenever you listen to the series of Knowledge Seekers of Keshe Foundation Spaceship Institute. We welcome you back and we try to add to the knowledge. In the, what we just heard as an Intro, it brings in and explains a lot of new things.

If you listen to it in a much deeper way. We look at how life is created on this planet. We understand it, but it has to go through a process of maturity, creation of brain, creation of organs, creation of emotion, creation of interactions, languages and a lot of other things. But now that we are opening the doors of the space travel when you land on the Moon, or another place, arrive, and life has already taken shape, has dictated its parameters, you will manifest in a dimension (D) of that position and time, in complete. In a way, in a completion of totality of what you need to survive, if you decide to go in the dimension of tangibility, living in D of physicality (P).

What would happen to you? The energies you need for emotion of love, in that planet doesn't exist? (:16). The energies you need for creation of kidney doesn't exist. You're strength field of your liver is a hard solid metal in that position. And your intestine strength of holding it together is gaseous state. What happens to you? How do you mutate? And how does everything fixes, changes according to the position and time. In a way, you are not born from evolution of millions of years, you arrived, you're there, the planet the position in the Universe has already evolved, created life. So you have to fit in according to the Inertia.

There is another dimension which man doesn't know. "Magnetic (M) plasmatic Inertia" is different than matter Inertia we have here. On Earth we call it, Inertia. In space it's a M field Inertia, which behaves totally different. It's dynamic. It's all the time adjusting itself into the space of time.

You will not necessarily appear on a planet, you'll appear in a plasma field, which is sustaining life, but has no tangibility of it. We know this life. We know we have recorded it, as I said many times by NASA, in the upper levels of this atmosphere of this planet. (:18). When we look at the videos and recordings of the space shuttle, and the Space Station, when we see astronauts sending up reports and videos of non-dimensional energy fields moving up and down within the atmosphere of the Earth, upper atmosphere. The same thing exists on the other side of the atmosphere of the Earth, in the Solar System.

We always in the space looked at meteorites, asteroids. We never looked at energy packs. Because we don't have the tools of it. We measure, or we see energy packages coming from the Sun and they create havoc with the satellites. But there are other constant evolving living energy packs beyond the atmosphere of the Earth, within the Solar System. And each environment of the Solar System has different life, the same as we have on this planet. We have a warm weather, we have a cold weather, we have the snow, we have trees, we have forests, we have desert. The same structure of life without matter

state dimension exists in the universe, in our Solar System. Then they say beyond our Solar System, in the galaxy, and beyond the galaxy, within the galaxy and in a universe.

We will come, we will understand this gradually. But we have to be prepared for it and not be ignorant of it, and don't take position, that this cannot be. When you become Man of space, the way you as Knowledge Seekers (KS) are gradually building up to it, you have to accept everything as you see. You have to stay open minded, (:20). Because you work through the energy fields, you work through the Soul, you have nothing to be afraid of, because you're open to it.

If you go back before we started the flight simulation, I said we listen to anything anybody says, because it's their experience, nothing to be laughed and nothing to be joke, because we didn't go through that transmutation, we didn't go through the cycle they went through. And you have become open minded.

Many of you have listened to a number of the recordings of these people coming out of the flight zone, and you listened to them, half mermaid, two lovers being on each other's lap, because now, you as Knowledge Seekers are, have become, and are, and those who have become Knowledge Seekers, and the teaching, and the technology (T) opens up, we become open minded. Because there is not. There is no limitation in the dimension of Creation. And part of the teaching of today is this.

What happened now, many of you went through the enhancement of flight system and you came out, you are testing, feeling different emotions, different contexts, different approach. And none of you, or some of you put it down, that what I went through in the experience in the Enhancement Center (EC). But as more and more of you become passengers of space, you come to understand, and see what we call, cosmic rays. The strength of the cosmic rays, how you use the cosmic rays, to elevate your soul, elevate your position. How you manipulate understanding of the emotions of the man with the cosmic rays, (:22). then you find new dimensions of love, new dimensions of interaction, new dimensions of what we call, giving.

So, I was yesterday in the lab, where the phone (new) systems is getting put together, and walking into that lab, I walk in as a man. But as the systems are getting built, somehow build. Some things are getting tested, some things are getting added, I feel the emotion of cosmic rays, and how it's going through that lab.

The two systems are less than half a meter apart from each other, that's getting built up. One is stripped, and one is half stripped, one has received the unit of the what we call, transmutation, of the head units simulation. One has received the cosmic ray production systems, and you feel, that the man is getting ready for the maturity of becoming part of Universal Community. Becoming part of U Community is not just being in a UFO and shaking hands, and seeing aliens. Part of, the main part of the Universal Community is the energies, that 80%, that you have denied all your life. Now, you'll see them, you'll interact with them. The way you take vitamin A for this, and you take magnesium for that, for your physical condition. You become wise to which fields to take to enhance, to

elevate part of sections of the Soul of you, that will give more. Will be there to interact more.

Those of Knowledge Seekers, (:24). who are working in the production, now are getting touched by it, because they cannot escape from it. It's a space, that they move in and out of it. Some of them are concentrated. Some of them is getting put together. Some of the fields half in the system, half outside, interact when you pass through them. It's like the two pictures you have. You buy the 2 pictures and you stand in the middle of the Gans's. These are the fields. These are new dimensions, new emotions, new understanding of the technology.

It's no use putting the units in Linz in three, four weeks time and say that's it, wahla, you are going in the center. You have to understand what you're going in for. You have to see what you can do. What the system's capabilities are. You'll come to understand the Totality. "Whoa, I was worried about the zinc, and I've taken up iron." Now, I have to look how, which fields, in which position I stand, elevates my Soul, in the dimension of joy, in a dimension of giving, in a dimension and strength of love, in the dimension of transmutation, because these cosmic rays, which we create, brings the matching in, which field is connected to planet Zeus. Which field is connected to Moon, which field is connected to another universe.

Gradually, over next decades and hundreds of years, man will come to understand the Totality. But now, (:26). the Totality is not just having a satellite going to see how Africa is, or going to see how another part of the world is. It's going to see how it feels to be in another position in the universe. And what you can add to that position. What you can take from, that you can give more back to it.

Then, you understand now, that, Man needs to learn about a new fueling system what we call, cosmic rays. We have seen this. We have played with it, we never understood it. In many ways, many of you call it, aura, the fields around me. These fields around you cannot exist, if the fields from outside do not interact with the fields of your physical body.

The light, the interaction of the fields, on the level of the head of the man, where the Soul is, is different than the body of the Man. It absorbs different rays, gives different rays, interacts with different cosmic rays.

In a way your skin layer is protecting you from the cosmic rays and other fields, which your body doesn't need. And if you are intruded in the wrong way, what is going to happen to you. You received fields you're not supposed to receive, and wahla, we see different interactions. The doctors today will tell us, "oh what are the point of the cut of the body, we see cancer? (:28). Yes, there is a mutation, but how did the mutation come in? How, what fields was absorbed by the body at that point, and what was available to be absorbed.

The scientists today go in the depths of the Earth put a pot to see if they can see neutrinos. The pot is you, and neutrinos, fields of the cosmos go through you like nothing. And how these fields interact, effect us. We see how rates of suicide in the Scandinavian countries, because of the long term winter, dark times, they don't receive the right fields of the cosmic rays for the Soul to be elevated.

We see people in Africa in the heat of the place, in other places, in Brazil, in the jungles, happy people, they dance, they are different. They receive different cosmic rays, which effects their Soul, which effects their emotion. You wake up in a sunny day, you're happy. And in a winter day, you're miserable, because certain rays of the fields, which you need, are not there. You can create it yourself. You can bring it to absorb it.

Does it matter if you fall in love, it's in the summer, or a winter. Does the falling in love in the winter, is different than the way you fall in love in the summer? These are the points that we have as Knowledge Seekers to understand about the new knowledge, knowledge of Creation, knowledge of understanding. The more I go into this environment, (:30). the more I see how gradually mankind is getting ready for that step next.

When you entered a new Enhancement Unit, they are what I call, a universe on their own. We have pre-dictated the condition of cosmic rays in them. We can change the condition, or absorption of cosmic rays, and we can change your mood, we can change your understanding, we can change your interaction with the Universal Community.

The technology which is now in development, and most of you, in next few weeks will come to test it. Those of you who became Mobile, what we call, people with registering yourself to become a Mobile transmutation. Those of you who became Satellites. Those of you who becoming transportation to space, will feel this, will go through this. We'll see how humanity will go to the next step of understanding the new knowledge.

We did not know about the (electric) current, we did not know about the computers. But we came to understand the currents. And then we came to build the computers. And then we realized, "Oh God, they have been here all that time." Thunders and lightning has been the currents and powers, which are running, and the computers has been in your brain, the operation of the cells, interaction of the information. We haven't done anything new. We just understood a small process of the Creation, (:32). and we have replicated in different ways. Now we understand we actual replicated it what we already lived with.

The same will be in the space technology of the future. When we traveled the span of this universe, through the fields, and not by flight. As I said before, mankind up to now looked at the UFOs, they are so advanced, they can go so fast. But it's literally as I said, it's like the man who lives in a village with a donkey, and marvel's the guy who's got a bicycle, and the guy who drives a car. You there are that man on the donkey. And we thought the guy on a bike or a car is very advanced, but there are other man who are on jumbo jets, rocket Space Technology, and the rest.

Now, we are getting to that point, that even the D of physicality has no need to confirm the existence. It's a different knowledge. But in a way, the same understanding. Would man come to be part of this, what I call, structure. Would one day man become to understand a fraction of the Totality of the knowledge of the Creation? This is what's on the table today. When I sat yesterday, watching, looking at the new systems, knowing half an hour an hour before, I was in the Linz in the other two systems, working with their effect, and moved to the laboratory, to the factory, (:34). to see the new systems, which are getting built. It's literally like a donkey and that car. Even though they both been built in the same environment.

The space gap of knowledge gained, has created the gap. This space gap of emotion, which is learned has created the gap. When you walk into the laboratory today, and you see system if you understand it, but also it's the same frame, if you've been there, nothing has changed, a little bit bigger. But the technology, which is the understanding the essence of the Creation, is a donkey to rocket propulsion difference. Man with the knowledge of today, compared to what is in the laboratory, is literally like man hasn't even walked, let alone to get on a donkey. And the knowledge, understanding of the man in the rocket.

We have not waited to complete step by step, you'll find something else. We are completing the technology in a way that man literally walks into the dimension of space. You will understand. Those of you who go through it, you will understand.

We are even now preparing for the first American to enter Austria, through the same system. How would he arrive? In what level he'll bring his knowledge, and in what I call, human characteristics with him. Would he appear in Austria, with the black hair, blue eyes, and whatever else. Would he speak fluent German? (:36). Would we still recognize him as the man we lifted out of US.

Then would the emotions with him, will be the same? Would our two first Mozhan's, which will be sent to Moon in hopefully January, February, March. As soon as we can complete the other tests? How would they arrive on the Moon? They are a couple one Russia and one European? And how would we see them? How would they see each other? Would they find each other on the Moon? Even if we hold them hand in hand when we leave them, when we put them in the condition of transmutation. Would their physicality on Moon hold hands with each other, or one will appear on the north of the planet and one on the south of the planet, crying looking for each other. Or they come as two souls, and then we see them. Then we bring them back to the same position. So we expect to see the same people back. But the interesting is, would their emotion will be the same? Would they be elevated in D of Soul?

We need many of you to register for what we call, space travel. We don't have enough of you. Then it comes to, what will be the next? How would governments handle this? How would us as a humanity handle this new change. It's a new knowledge. It's a new school. It's a new language. It's a new technology. (:38).

Although we try to put human parameters around it to control it, that we are in charge of it, and we are in control of. Governing does not count when your Soul has no dimension. Governing does not count when we do not understand ourselves, what would be the position and the condition of arrival? Does our immigration officer in Linz look for a picture of the man in the passport, he has been given on arriving. Or if a cat passes him by, and the guy on the way wanted to see how cats live in Austria. Where is your passport, sir? You're a cat, you come in. Oh, I am just a cat. Because we don't have no passports for the cat.

He walks out and in the D of openness in Linz he decides to see how it feels as a human, and he converts. Because he has reached the knowledge, he has reached the understanding. All these controls man has created for himself, passports, borders, money, everything goes through the window. If I can travel in the D of the Soul, and change the physicality, I arrive here, I have no money. I know how to disappear and appear on how to change the strength of the fields. I pop into an ATM machine, couple of thousand Euros, nobody, even the machine doesn't feel a couple of thousands has gone out of his box. Now, you should start from understanding the implication of the new technology. (:40). Now, we have to understand the correctness of what we do, and where this technology is going to go.

Somebody wrote to me this morning somebody, KS says, Mr. Keshe says, talk good, do good, whatever. Yes, we do, but we do according to what you tell us is the truth. And we share that truth with others. This is how it will be. You understand the truth by yourself.

When you come in, you know the parameters, you know the conduct. When you go on Moon, you go to another dimension, they have no banks, there are no restaurants. How do you survive in that environment? They never heard of banking, because they take whatever they need from .. . Whatever, oh, we need certain things you don't need, your body cannot take it. On Earth you do not eat. But it's the point of survival, or you tap into the universal energy and feed yourself through the soul. But you pretend to be one of them.

Yesterday, when I went around the new 2 systems, I see the soul of the new structure, new life. Life that us as human race are not aware of. I saw one of our Knowledge Seekers who is building these, having lunch. And it was amazing how I saw him, and it was amazing how he saw himself. He was like, literally a magnet with the light, you know as you call these plasma balls, you see the lights going. What was going from the system to and back from him. (:42).

You got to understand, the new technology, the new source of essence of the new Space Systems, is very much as I explained to our knowledge seeker, is like this plasma balls. Remember when you turned it on in your physic classes, and you see fields coming out in different colored rays, and just move everywhere. Now that ball is your Soul. It's you who decides where, to which system, which reactor, which space, time, and position you interact with.

Go back to the understanding of the physics of today. We always thought that lightning comes from the sky. But actually the lightning starts from the Earth, because it's the soul which ?? Now that Earth lightening rod, is you, it's your soul within the physicality of you. Where do you want it to connect? Now you have a choice. The first few times you might burn yourself, you might end up somewhere you don't want. But you know the reference point back, is Earth. I go back and try again. I come here this time with different field strength and I will survive it. I will I taste it. I will enjoy it.

In the structure of new space technology, we ?? confine everything with the cosmic rays. We see the dimension of the field transformation. In the cosmic rays we are not working with hundreds of billions of Tesla. You work with macro and micro, and Pico magnetic fields. (:44). We do not see pressure the way we see on Earth, atmospheric pressure changes. We feel magnetical (M) plasmatic pressure, the way it changes in the field of your stomach.

I always say, the best thing you understand, that you understand how cosmic dimension of fields is in your body, is the odor you produce. Your body produces a gas, and your body changes it from a "Gans gas" to gas, and then to the odor. You are a living example of the interaction of the field in the cosmic ray, in the matter state and in a plasmatic state. But you never understood.

You never could analyze that the odor coming from my body was a Gans. And in the process of the layers of the skin, due to their construction, it became a gas, and again through the last layer interaction with the environment, became the odor. We are a living cosmic ray fields transformation, but we never understood it. We just went about, .. that I silence it (?? fart), I don't let it go through the last transformation.

But, then you call it, the aura. Again the interaction of the collective body fields. Now, we have to understand, we have no choice, as I said many times, (:46). I've taking it too far to let you go, I have taken you, I have taught you too much, for you to become and stay ignorant.

When we had the last, what we call, the space test last week, with one man walking in, driving in, god knows how many kilometers, .. from Northern Germany, to be there. I asked him, get something to eat, whatever you like. He says, I tasted the mango, I could feel it in my mouth, I could feel it going through my stomach. Was that emotion of feeding, was actually already absorbing, that confirms to him the physicality has received? Or he could have received it without actually explaining any physical dimension, because he was supposed to explain the transformation he went through, when he received that emotion of the field from the mango, maybe down the road, maybe in Africa or somewhere else?

Isn't that the dream? You interact and saw it as a dream? Now in, what we call, day light, in aware of awake-ness, you put the reality to that, what you call, dream, and now becomes a reality of actually eating? Does your body. How many of you had dreams, that you went to a restaurant you ate the most beautiful food? Did you wake up and felt it in

your body and your stomach working? It was just a dream. Because that was changed in the ?? sense of emotion. This time is changing the essence of Soul of the Physicality (STP), because you're in control of it, you want to feel it. (:48).

Now you understand how we have set up the systems. When I ask it to be done, and it's done, it's not psychologically setting it up, it's for you to understand in what channels you want to open. Why did he feel mango, but not an apple. Because at that point, the fields which the body needed was the strength of what mango gives you.

Then we enter a new dimension of life, we enter a new dimension of knowledge. We cannot just leave it, it happened accidentally. We see how we can strengthen the Soul that even changes the psychosomatic conditions in the physicality of the man. How this knowledge, how this energy growth to be so powerful, which we taught, which was that 80% of the energy, which we always ignored, we receive it, and we ?? stop that 20% banana, the vitamins and the cheese. As I said, life has become a bit too cheesy not to understand it, because now we cannot ignore it.

Understanding of the new process of cosmic rays, interaction of cosmic fields on the structure of the field of the Soul of the Man (STM), physicality of the man on this planet and beyond, will become the knowledge of your, what I call, entertainment, enjoyment, survival, whatever you call it. (:50).

What would you do, if you appear in another planet, as we see the flying ?? UFOs, and they have the technology to capture this soul. They capture you as a soul. They don't know there is a soul in it. They might know there's a soul in it. But now you have become that monkey in the zoo, that fish in the tank. How do you change it to be out of it? Or would you stay that monkey in the zoo for the time of your life, of whatever it might be?

How much connection you have between the STP and STM, dimension of physicality of the man, or entity, that you can transmute, between the soul and the physicality, depending on the interaction of the fields?

I come here with a soul strength of the position, which dictates, this will be a dog. I don't want to be a dog, I want to be a man. How do I change it, to I appear as a man? Then, the next step is how far does man, how far the humanity will understand the new science, the new knowledge?

As I said many times, we are not prophets, we are universal teachers. That Methi you're waiting for, that God knows, Messiah you're waiting for, it's in your dreams, it's in your understanding. To us, we are Messengers of the knowledge of the universe, and we share. How much you take. evolves, how much you will come to understand to enjoy more. (:52). It's no use going into a man in the back villages of Africa, and trying to explain to him the beauty, how Niagara Falls fall, unless you've been to Niagara Falls. And you have the emotion of the water. How is a skyscraper? How does it feel to be in a jumbo jet? It has no meaning to him. Because he hasn't been educated, he hasn't had the

television, he hasn't had the mobile phone to see such a thing exists, that wishes to see how it feel to be part of it.

How can I explain, how to be in love, when you don't even have the understanding of what love is? You're ignorant of it. Because you never been taught of it, you've never come across it, you've never had the intention of it. When he falls in love, he says, this is what the guy was talking about.

All I say to you is, fall in love with your Soul with the dimension of the STP, that you can live together in any dimension in the Universe.

When in the coming weeks, we move you from one unit to another. We move you from United States to here, we move you from here to Canada, or to Australia. We move you from here to Moon, and Mars and beyond. You're the "last man standing" in that position. How would you survive? Or how would you take the knowledge you have to survive? Or would you manifest yourself half handicap, because you don't understand the rest of the knowledge at the time, place and position. (:54). Because you still want to be half man, but a misplaced man cannot exist there. The atmosphere does not allow amino acid (AA) to survive at the strength of the life of the man.

What is the next step for us? What is the extent of it? This is why we put these teachings, now we move into Soul, you understood. Now you have to understand, Soul needs a feeder, which is the cosmic rays, which is the interaction of cosmic fields, plasma of the cosmic, of the cosmos, of interaction, which some of these fields emanate from the essence of the Creation of the Universe, what you call, the Creator.

Then, in that point of maturity you understand, I am connected. As much it's connected to me. I'm part of it, because I create that strength between it and me, that it gives me the dimension of and confirmation of existence. I am the beginning. I'm the end. It's the beginning, where it comes from, or is my soul the beginning that it goes back to it?

There is no planet, if the fields which came from the Sun, does not slow down in the outer atmosphere of the Solar System, that it comes back, and creates that Inertia, that mass that confirms the existence of the Sun. Otherwise, there's nothing there, it's just a field moving. When you put the Earth in front of the Sun, and it creates that life, it creates that light to confirm the existence of not only the Earth, but existence of the Sun. One cannot be without each other. I am the beginning, and I'm the end. On the confirmation of one, and it's confirmation of me. (:56).

This is what I tell you, and I've always said, there is no line between theology and, what we call, life, and science and technology. Once you understand the science of Creation, you become theologist, and once you become a theologist, you've confirmed the existence of it through the manifestation of physicality. Then, do we need these, what we call, people who try to tell us, just because they think they can, or is it our ability to be able to do what we do?

Being the source, and being in contact with the source, because we always ignored it, now we cannot ignore. Many of you will walk into these new systems and you become a light. You shall not see, but those would stand outside will see. But to what strength you becomes that light? To what confirmation you become to exist to be that light? I made man in the image of Myself. But how man will come to accept his own new image.

As I said, we brought you from. If you remember, the first time I tried to explain this in a Coca Cola bottle. The very first time many of you came in touch with the knowledge of the Keshe Foundation. Nothing has changed, if you look at the shape of that Coca Cola bottle and the Enhancement Units. Those probes in it, it's the helmet you wear when you go inside. (:58). The Head Unit. The atmosphere inside, the cosmic rays inside, the fields which creates inside, is that magic liquid, which all been asking for decades. What's the magic liquid in the Coca Cola bottle? Cosmic rays.

Now you are more knowledgeable, you can understand it easier. Now, you come to see the knowledge has been consistent in all levels. You couldn't understand the Coca Cola bottle, and a few electrodes, and something in it, back in the same position. The same Coca Cola bottle, we call it, universal, Enhancement Unit. The electrodes is your, what we call, the Head units. And the liquid is, the fields we create and we are part of it. It creates transformation, it creates transmutation, it creates Nano materials, you've measured electric current through it. Where did it come from? How many of you, when you first became part of the Knowledge Seekers years ago, built the first Coca Cola and measured the voltage and amperage? Where did it come from? You put it down as, "oh, it's an electric current." No, these are cosmic rays that in the layer of Nano material convert to electric current.

Now you understand. The technology and the teaching has been ever on the same line, it's just how much more knowledgeable you become. We had to teach you about the Soul, because now you put your head in that Head Unit, it's there, it's the energy, it's the essence. What's going to happen to it? (1:00).

We had to teach you about Nano technology, we had to teach you about the Gans's, because now those are the absorbers, and the creators and the creation of all dimensions that you call, cosmic rays. Then you understand the new technology, the new developments in the science, understanding cosmic rays produced by us. It's not anymore in the space, it's not anymore, they are cosmic rays. The new ?? agent of the knowledge of the man, is a cosmic ray on this planet. Because now we produce it. Now we control it. Now we understand its interaction. Now we have found the magic 80%, which has been feeding us, and we've been ignoring it, because we were ignorant in the knowledge of the Creation.

The next step for us, there'll be more, as I explained to one of the KS, we have just entered you in the, what we call, "twilight zone" of the knowledge of the Creation. The Sun is still to come. The beauty of the knowledge is still to be added, as you more and more mature.

But as I said, to a beautiful young Knowledge Seekers recently, we have to understand, we have to decide, and not be decided for us. What strength, what dimension, we would like to be in? (1:02). If you see a horse in pain, can you change the strength of your soul that you can communicate with the soul, and find out what is, the pain is, and convert back yourself to the human dimension, or interaction of the fields of confirmation of information between the two, and give him the right remedy?

Would that horse would be another creatures from another dimension of the universe? You have to understand its pain or its joy, and how you can help him, how you can give to it to alleviate his pain. Or free the sources. What would you do if you come across a being in the universe that is in need of magnetic fields to survive, and part of that magnetic field is the structure of your soul strength, that it matches it. Would you give it? Or would you hesitate giving it to him, it would be the end of me?

As a traveler of the universe, I give it, because you have missed part of the knowledge. My strength is that what I give, at that strength I can receive. So I can become a feeder to him, I become the essence of his survival. My giving for him to survive, is the dimension that, I'm like, what we call, intermediary. He cannot tap into it, but he can use me to tap. Would I stay in this position for him to be satisfied, maybe one millisecond, maybe a million years, (1:04). that his survival is guaranteed?

We're not talking about romantic, we're not talking about something imaginary. You will come across it. Now you become the, what I call, travelers of the universe. The first thing some of you, especially understanding this technology and going through it, is how do we deal immediately without what I call, delay with those who live above us in the upper atmosphere, in no dimension of physicality, but energy packs.

The world of science has to deal with it, they are part of the structure of the Creation of this planet. We are aware of their existence, we are the bottom eaters, as I said many times, of the Earth's atmospheric condition. What falls from their surplus energies, we collect. We are, what we call, the Cup. We take everything. ?? itself, energy fields which falls from the sky from their interactions, from their leftovers, in a way, most probably part of their excrements is what, is we need to survive.

We couldn't accept this, we couldn't understand it. But we have a confirmation of it. We have a pictures and videos of them, they exist, they move. Where do they go? How long do they live? What is the fall out? And then the other creatures? How do we interact with their souls, because we don't know understand their language. We get the fish we know what it does. (1:06). Now we are that bottom eater carp in the tank of the atmosphere of this planet.

Then the same is beyond this atmosphere, within Solar System. We say we know about 1,500 mammals, or whatever, creatures on this planet. There is hundreds and thousands more above us, which we have ignored, but doesn't mean they don't exist. How do we interact with these? How do we guarantee their survival? How much our soul is in interaction with them, and the others?

In this process of the new understanding, we went from the soul, now to cosmic rays, we have to understand the interaction of the cosmic rays, the fields of the universe, with our soul, with our star. Then, what will be the outcome?

Does those children who last a few minutes, or a few hours after they're born, they're born in the field strength of purity, that immediately they come, they interact with the cosmic rays, which matures the Soul of the Physicality has no need for. The STP has matured itself. We call it, the death of an infant, but it's the maturity of the soul, which received the fields, which we wait for decades to reach that point. Because the soul is there, it's interacting.

Instead of receiving 80% in bits for it to survive, 100 years to mature, that it can leave, instantaneously, at the point of birth. Because of its strength field collection, has touched it and matured it. (1:08). There's no need to wait. We know this.

I said many times, go back to the teachings. How do the babies and infants communicate with each other, and they know their position and hierarchy between each other? Interaction of the Soul. Be it the infant a Chinese, a black, a white, a blue, whatever. Put them in one room, they know each others position, they know, they're aware of its existence.

So now, the teaching is going in the direction of the food of the soul, the life of the soul, the existence of the soul, and what we call, cosmic rays. Or we can call it, because there is no other word for it in the vocabulary of the man today, we call it, the "cosmic," or the rays of the Creation, and part of it is the rays from the Creator.

In a way, the rays from the Creator to you, its like that satellite beam feeding back the weather forecast, "it's going to be rainy, it's good here, it's going to be sunny today." Your soul sends messages back to the Creator. Here is a problem. There is something needed, there is something. The weather is good, everything is happy, we receive enough food. We're that satellite, as the Creator is satellite to us.

Because there's no physicality tying him down to anywhere, as our soul has been tied down within the dimension of the physicality of the man. (1:10). Understanding separation of the different dimensions and the strength of the, what we call, universal fields, or cosmic rays, it will be one of the main occupation of the scientists of the future. You found a new vitamin, you find a new plant, you find a new animal, today with the science. Now, with the understanding of this Creation, and the process of the Creation, now we'll look for what field the strength will give us the position to such a Galaxy. What such a field strength will give us the strength of the emotion of happiness.

As I said, in Koran, Muhammad, blessed His name says, I've written 99 names of the beauties of the attributes of the Creator. One, the last one has been ??, read the whole Koran you come to it. That whole is the Creation, it's the universe. Those attributes are different interaction of the fields of the Creator within the man, within the emotion of the

Creator itself. So, how many more essence of information, dimension of fields of the universe, man still needs to learn. 99 is a scratch on the surface of the knowledge of the Creator. 99 power, which means 10 to the power of 99, might just bring you to be a small part of it. How many, much more emotions and attributes of the Creation is there, that we live with it, but we are not aware of it?

Then you understand, (1:12). we need, in the coming time, to understand how we create, what cosmic rays we create? What, what I call, interaction of the fields of the plasmas we create, that leads to create of the condition? This is the essence of the new Enhancement Units. This is the essence of the world of Creation.

Then it comes to the point, as Knowledge Seekers, as Mr. Keshe move the, what we call, the goalpost further, we came to learn about the Gans, Nano technology, you moved to Gans, you moved to the other one, we moved to the soul, now the cosmic rays. But you're educated from the A to Z, your foundation is solid. What would be after universal energy, what you call, cosmic rays?

Would it be that I understand the essence of my own Creator, as I am part of it and it's part of me? Then I wonder, how many of you, you call yourself to be God? Or you become humble enough to be part of the process of these teachers, to teach the others to understand the totality.

We'll go for a small break and come back. Now, I hope, gradually past two or three weeks, I'm putting you in the direction to understand how to feed your soul, and how to start living in the dimension of the Universal Community, in the dimension of the plasmatic fields and not dimension of physicality of the man.

Rick if you'd like to take us to a break and then we'll come back. (1:14).

<< BREAK >>> 458 KSW (1:20).

K- Not really. I think we have to gradually what we call educate our people to understand the process of Creation, that there is no mysticism, and nobody is above another. And we all become KS and share the knowledge of creation. And that's the whole essence of the teachings we do. Because up to now, all these has became exclusivity, and somebody who understood more became whatever. This, this understanding of the total structure of the Creation will put an end to this. Because we're all the same knowledge. Knowledge should be there to share. Knowledge should not be a point of advantage, and how

whatever we do with it, and how we do with it, how we deal with it. And what the way we come to understand it.

I heard something very interesting yesterday, from one of the KS, a link, that what gives the religious leaders to call themselves, "the appointee of the Creator." And we've seen it, appointed, reflection of the prophet, and reflection of the Creator, because I managed with the "gun policy" to push people, and get where I am. (1:22). It's a very interesting video, if you look for it on the Internet.

Because now we understand, we are all connected, there is no exclusivity. It doesn't matter, whatever name you have put on yourself, from Ayatollah to Pope, to anything else. This is what we have to understand. Once we understand, we don't accept superiority. I've said this many, many times, and I've said it many, many times, and I repeat it, I'm still a KS, does not matter how much knowledge I carry. Because I seek the knowledge of the Creator. What interaction of the fields of His life has created, that we didn't understand, or we need to understand, and somehow we need to share it.

When somebody calls himself reflection, or replacement, or being whatever of whatever, it shows the man has gone to an end of his understanding of his own creation. It's time for him to move it. If you listen to the first Intro, we're talking about the Enhancement Units (EU) we just had, a few minutes ago. Listen to it. Listen to what we thought in past two or three weeks, and referred today. Isn't it what was promised to do, the Enhancement Unit? Now you understand the science behind it. Now you understand how it does, how it feels, how it will be instant transmutation, how, what it is, because many of you have tested it. We're back to "square one," we're back to square one of the knowledge of the Creator and the ?? not ours. (1:24).

Any other question? Let's start ??.

Q: .. Are bad experiences that we perceive as trauma, a physical or psychological condition. Where are these stored? Thanks.

K- You have a computer called the brain, and it's stored installed in it. Depends what it does with you, how you refer to it, or you just forget it, and put it on a back burner, and just remember not to do, or remember what it can do with you. It's part of the structure of your STP, and in the dimension of the .. , what you call, dimension of physicality of the man.

Your Soul has no problem touching a hot pan or the fire, it doesn't get burned. But when you're a child, you touch a fire you get burned, for the rest of your life. That's not for my physicality to touch. I learned my lesson. Your Soul has no limitation, it goes in there, it's made of the fire field of the strength of the dimension of the free, of what we call, fields.

So, where does it get stored? In the part which touches your physicality.

The same happens in the dimension of the STM. What touches the Soul, in that part, because part of the information of its plasma. (1:26). It might create an evolution or revolution in it for a while, but then it settles down. It's like getting hit by a meteorite. If your Soul survive it, if the Earth survives a meteorite, what that meteorite brings the change of atmosphere for short term or long term, it becomes part of the structure, and remembers that, with a dent on its surface, that such a meteorite has hit, such energy has come in, such a material is added to me as assets, as a facet of my existence.

But all what you asked, it's literally part of your dimension of physicality (P). As I always said, get a child, touch a fire, never go near a fire, because he feels it in the dimension of physicality. Put the Soul to it, it doesn't do anything with the Soul. Because Soul is part of its energy, free, transmutation. A Soul does not burn with a fire, but the physicality does. The soul does not feel the pain of the fire, maybe even rejoices, because he adds to it, because it's on the dimension of free energy, it's giving it out freely. But your physicality could be literally destroyed, because of it.

But you remember not to touch the fire. It's your Soul who will jump in the fire, because it gains what it says, it's free to take. It's not taking it from me. The fire .. it's what I don't need, I radiate. (So the Souls), I take.

Any other question?

R: So in that manner, we can, a Soul travel, a Soul flight, we could place ourselves on the surface of the Sun for example and we don't feel any pain, there's no…

K- No. Because your Soul is another dimension. (1:28). You will see the interaction of the fields. You cannot burn a Soul, you cannot burn a plasma. You can open it up, or do the build up, of the compressions of the fields, shrink it, but you cannot burn it. If you change the dimension of the plasma in a condition to manifest its physicality, then something will happen to it. But in the dimension of the Soul, do the Sun's burn each other?

R: What about in the dimension of cosmic rays, that say come from another galaxy, the highest energy ones, apparently comes from other galaxies, other than our…

K- They come from other universes. Forget about the galaxies. They come from different dimensions.

R: Do they effect the soul?

K- Yes. We will not feel it, we will not detect it, if we didn't have something to receive it. It's part of the need we have in our soul to receive these. We cannot. It's what I always said, you cannot receive it, if you're not there at the strength to receive it. If we detect the cosmic ray to our body, it means our body has the field strength within the structure of soul, our physicality, to receive it. It's not just for somebody else's.

If it interacts with, if it is there in the atmosphere of this planet, it means the soul of this planet has that field as part of it, that he attracts it. (1:30). Even if it goes through it, it has created a condition for it to be done. Otherwise, it doesn't come your way, because you don't have the strength of it. Even if you're .. a passenger of it, it's going through A to B to get to the source where it is, or connected to. Your body, if it wasn't in a strength field dependent on it, will move away.

Look at the magnets you put on the table. The fields move across, they ?? move, field, the side, what is not there. When it's interacting with them and it's at a strength they need to interact with.

The STM is a Sun. And in essence, unless it gives all its energy, or receives more energy, it's always a field, it has got no tangibility, unless it decides, unless the condition confirms on it, in a universe, that changes in manifestation dimension of physicality.

There are many, many other conditions of life, the man has not even understood. We call it a solid, we call a liquid, we call it a gas, we call it a plasma. There are many, many other conditions beyond this, .. man has still to understand. There's a 10th state (of matter. There is hundreds of states of matter. But we haven't understood.

How can we explain it? It's liquidish, but it's gas liquidish. It's solid, but it's liquidish, solid with a gas. Remember, I always go back to something very simple. You all play lottery. (1:32). You take 49 numbers, and you choose seven of it. And to get the same combination twice, you need something like 14, 15 million combinations. Now, the field strength of the universe is ten to power of 49, to the power of 49, if you put it that way. See what combination a few of these can create, and have different strength of.

Then you understand how much man has not understood in the process of the Creation. We are happy with a wood and a glass. We are happy with the gas, and the water, but much, much, much, much more. You just become aware of the Gans's fields of the plasma within your body, and you still don't know how to handle it. How does that Gans becomes a bone, and how that Gans becomes my hair, and how, in which position we call it the roots. Conditions created to convert a gas and the Gans into hair.

Why suddenly my hair changes from white to black? And the black to white? How come I was born brownish and now I'm blackish. This is what you see everyday and you have not understood it. What position, what field changes goes within even, what we call, the seed of the hair of the man? Forget about the rest of the knowledge of the body of the man. We handle it with chemicals to change the color, "oh, I'm white, I have to get black, I use, I'm getting old." Go and ask, why does it get old? (1:34). What has changed in the root? What fields you have changed? And what can you put. "Oh I use Gans number one and Gans number 2, and I did some of the Cup of Life. My hair grows a little bit.

Hello. What field strength, what fields, the combination of these things created, that has been a shortage in the wish of your soul in the dimension of the STP, that you changed the color of your hair? You take one part. If you understand the Totality becomes very

easy. You can stay a hippie as long as you live in every dimension of the universe. If you know how, what field energy the hair needs to grow and stay hippie and black.

Why some people don't change any color of the hair and they have very bushy hair, all their life? They are born with a "carpet" and they die with a carpet of hair. God knows ??. You haven't even understood this. How come your nails are produced the way they are? How come your skin is the way it is? We always looked at physicality. Look for the interaction of the fields, interaction of what creates that condition of the fields. Then you can be anything you like.

One of the experiments we'll do in transmutation, very soon, is changing the skin color. When we transmute you from one unit to another, we ask you, would you like to be blue, blond, when you arrive in the other unit? Or, what your wish has been? I wish I was born black. (1:36). Would, when you arrive in the other system, will be black? And your mother denies it. You say, mom, you tell her all the stories she's done with you. (She says, "I had a white child who went in this machine, you come out black, it cannot be." So, we will see, we will feel, we will understand. We have no choice, because now you're in it. Stupid Mr. Keshe, has built the system, I go in white, I come out black, I wanted to be like ??, I'm going go back to the first machine again. Sorry, you come out zebra. Half of you wanted to be black, you wanted the other white. So we've made the zebra out of you. You come out as a human zebra, is ??. We see it.

We are doing a lot of experiments in the background, which is not in public, and we see. We have finished with 80%, 90% of the present world of medicine. And the other 20 we haven't understood. We have understood, but we haven't managed to complete the system for it. We've done with a huge amount of the productions and energies. If I tell you, you laugh, because you don't understand.

You know, if you remember, the lady who could taste the water and drink as much water. If you understood the implication of that. (1:38). If I create the same fields and sustain that fields over the desert, over the plantation, would the plants and trees wait for the rain, or they take what they need, as much as they need to ?? live. Have you ever understood, we know the fields of transmutation of the field of the water, from the cup to man. She felt, she was flooded, she was taking so much water, and she could feel it. I can do the same with the plant, there's no need for irrigation. To you it's a magic knowledge, to me, I know exactly what to do with it.

Do you need to give Gans's and get a beautiful plants when I use Gans's? Or did you understand the energy, which you create that condition? As long as you're working with the Gans's you're still in primitive condition. When you understand the interaction of the fields of it, and what it does with the other, you have no problem. ?? It's (not) only the Gans of CO_2, you can even do it with the Gans's of water, you can even do with the Gans of gold. The fields which that plant needs to grow, will reach to it, and it doesn't need any water.

Understand, as I've said many times before, interaction of the fields, and then you're free from the shackles of physicality. But now when you understand those, now you have to understand the fields of the universe, what you call, cosmic ray, universal fields, not cosmos. Cosmos is limited to man and his universe. Universal fields goes from the Creator to the man, and beyond. (1:40). Then we are complete.

Any other question?

Q: .. You said, that you have tried several times to bring peace to this planet. But we still see nowadays the persistence of man wanting power, money, and on the other hand, I listen to your teachings about love and peace, which I have always longed for in my life. My question is, can you tell us if you are seeing the differences in human behavior today, in relation to thousands of years ago, when we were trying to bring peace to this planet? Or is it only through technology that this behavioral change can occur?

K- At the moment whatever we see war, conflict, it's to do with the religion. Man peace policy of gaining land and the rest, is done with. Man has realized, that's all it is, what he has.

The situation we see in Iran, internal war, is completely to do with the ignorance of the, what we call, religion. What we see in Ukraine is, again, background is religious, between the Catholic Church and the Church of Russia. When man sorts out the problems of his soul, we won't see this anymore.

We don't see the invasions, what we saw in the Second War, (1:42). these things are finished. At the moment it's the last remnants of the stupidity and arrogance of the "turban and the hat." When man put a turban down, when man puts that hat down, that what is under this hat and turban is equal, same with the others, then we are back in it. We see the flaring of these, especially in the situation in Iran, especially the situation in the, what we call, Ukraine. We don't have conflicts anywhere, except that religious people fighting for what they don't, they're not entitled to, and what they want to hold on into.

It's very interesting, one of our Knowledge Seekers sent me a beautiful bit. Church of Russia has bought the biggest property opposite to the, I think, the Norwegian naval base. Why does the church need to buy property opposite the ?? largest naval base? Has the religion go into marine warfare, or keeping an eye on, in the name of the religion? The wars of today, the way we see it, it's irrelevant.

Man soon will solve this, because once you learn you're all equal, religion doesn't go anywhere. What we see with the conflict with Israel and Iran, it's again religious based. This religion business, the soul, as man is getting educated, it just belong to a few, and they'll die off. In next few weeks, we'll see the end of the revolution, in this process of the religions. Then we will see how we move into the next step.

This will come with the technology. (1:44). Once we start moving people around this planet with the EU, transmutation of the soul, all this will go through the wall. We are a few days, a few weeks away from it. I've seen the evolution in the Knowledge Seekers who are building the systems. I see changes which is coming up with this bit of the technology in different ways. A lot of you have volunteered to be Satellites, and some of you there to do the Mobile transmutation. New ?? people when they become Mobile Transmutation, will change the world, will change the perception of the superiority of the soul. You change the superiority of the travel and control.

When we do the first transmutation complete, we'll take the cameras inside. You will see it, cannot be denied. Then, would you like to spend 18 hours come from Sydney to London, or would you spend 18 microseconds and do the same thing? Then with the government's allow you, you need the passport to come in, or I go where I like? You make sure, I'm comfortable when I arrive, I know how to get into your ATM machines and have as much money as I need, every time I run out, I just pop in and pop up.

It's a very interesting, very, very interesting position, and I go through it, I've been through it a few times. If you're not in it, you cannot understand what I'm talking about. But if you feel what I'm talking about, it gives you an amazing experience. When I speak about ATM machines.

If you listened, if you haven't been to the center. (1:46). If you listen to some of the recordings, when Dean interviews some people on the sofa, you hear like a noise in the background, like a forklift moving, and noises in the background. Because the back of the two Enhancement machine, you see a white curtain. Behind this white curtain, there is hundreds and thousands of ATM machines, brought in to be installed across Europe, or wherever. Be it from parking systems, automatic, being a cash machines. For us to go from one part of the Keshe Foundation, which most of the staff do, to the, what we call, our storage depot, our dispatch depot, they have to go through these machines to get there. So every time I go from the, what we call, the exhibition center to the dispatch, I have to go through it. It’s like maybe 100 meter, 150 meter, and it's hundreds, and hundreds, and hundreds of these machines sitting there waiting to go to be installed in car parks, in banks, and whatever.

I call them, dead men waiting to be given a soul. If you can be part of, now you know, hundreds of thousands of these machines are everywhere, and you, you're at the source. I think this is the biggest depot, one of the biggest depots in Europe, all the hundreds of thousands of these machines still in ?? packaging. Then if you can get your soul into the soul of the machine, you just wait to be loaded. In one years time, in 10 years time, in six weeks time. And you have access to all the cash in the world you need. (1:48). ?? will be given life??

Then is there a need for financial world? If I know how to get into these machines through the ?? elevation of the soul, I become that invisible man, invisible soul. Then does money have any value?

Then, I was talking to one of our very young Knowledge Seekers yesterday, the day before, yesterday in the center. He said, when there is a perfect world there is nothing we can do, everything is done, we can have all the food. So we're going to get bored. You've got to do something. You can't sit there just because I get everything. Find yourself a hobby, find yourself a job, education and find yourself a sport that you can keep the physicality, the Soul, and everything else in motion. You can't sit there, "I have, I just wait till I die." You have to evolve, you have to elevate the, what I call, the Soul.

You can't just sit there, we don't see people in the universe sitting there, just because my soul ?? elevated, I wait here till the soul is finished. We don't have zombie souls in the universe.

We have to understand, we are gifted now with the knowledge, to understand the knowledge of the Creation and the Creator. Would we use it to bring to ourselves superiority? Or do we use it to bring balance with others that we are all equal?

In this interview, as I said to you, was sent to me, it's one of the Iranian Mullahs. (1:50). In his talk he says, who these people think they are, that they are from God, and they have the rights to kill with the name of God. And he's a clergyman.

Remember, go back on the teachings, a few weeks ago. Remember what Muhammad said, he said, I took the love of God from the tribal Moses, and they started becoming nomads. And I gave that love to the people of Christianity.

A few weeks ago, we took the love of the Creator from the clergy of Iran. Within a few hours, few days you saw. Clergy has to be a point of peace, not a point of death by gun policy. We took the love of God from those who use the sword of the Creator to harm the others, be it from Ayatollah to the soldier, who uses the name.

If we managed to bring a tribe to be a nomad for centuries, these people are nothing to what we do. It doesn't matter in which side of the Islam you sit Shia, Sunni, be Christian, whatever you are. When a man who's supposed to be representative, and the soul of the Creator and Christ is on a wheelchair, that shows already physicality does not accept the lie of the STM. (1:52).

If you remember a few years ago, I explained to you we built the unit to go to the Pope, because he had a knee problem, he couldn't walk, and we helped him, and he walked. He went against us, he's back on the wheelchair. He went against all of us, that we wanted peace and his game is war. He's in (name city ??), on a wheelchair. Man of God, the Creator, should be walking head high to deliver his message of peace.

Look at all the religious leaders today, be the Ayatollah Khamenei from Iran, be it of the ?? all are bed bound, because the physicality does not accept the lie, which it's trying to ?? enforce on the others. Just go back, just a few weeks ago, before all these problems. We took the love of Creator from the turban, and the same with the hat. Because it's time for peace, it's time. The peace comes when we all accept we are equal, the peace doesn't

come by firing a gun. Peace come through the soul. And we still have those who thinks they're arrogant they can muscle it, nut unfortunately this time, they "bustled" it. And we'll see the change.

As I said, no man will take the crown of kingship. No one will take the hat of lie of religion anymore. (1:54). We've done with and we're finished with it. As you will get educated, as man gets more and more educated, realizes we are all equal. You don't need to bend to kiss, and to lie, on a wheelchair, or in a bed. They are still trying to say, "I am the appointee of the Creator." We've seen the Creator, he hasn't appointed anyone, not even us, let alone you lot.

Any other question?

Q: .. You taught us that inhaling CO2 gas can quickly elevate our STM and make us peaceful men. With the planetary transition where planet Earth will change his position in relation to the Solar System, the amount of cosmic rays and greater amount of hydrogen will change on the planet. Can you tell us if there will be changes in the concentrations of atmospheric gases, for example, the plasma fields of CO2 gases and thereby influence our human behavior?

K- You've got to understand why we said CO2. CO2 kills you. But why we said CO2, and I explained this before. You have a Carbon 14, and you have a Carbon 12. Carbon 12 is ?? the essence of Creation of carbon of man, it's part of your amino acid (AA). Carbon 14 is a connection to universal cosmic rays, or what we call, Carbon 14. (1:56). Carbon 14, we don't look at as a speck of carbon, we look at it as a field strength, which is interactive, connected with all other fields, it's like a bridge.

So, when you talk about CO2, we are not talking to, you to inhale the CO2, we are talking about a connection of the plasmas with the field strength of the life on this planet and field strength of the universe. So you have to understand the knowledge. Otherwise, excuse me, stick your mouth on the backup of the exhaust pipe of a car, and see if you get elevated. Yes, you've gone (dead). Physicality have ?? no time to live.

Understand the knowledge. Then, does it matter where in that process, the carbon of the physicality amino acid uses the carbon of the, what we call, fields of the Carbon 14, or connection, universal connection between the fields, to exist. Even when we talk about Carbon 14, we don't talk about as an energy plasma, we are talking as a connection of the fields, it has more parameters to connect in the spectrum of the fields with more fields, nothing else.

It's like a, one has a plug of one outlet, the other one has a plug with 20 outlets, but connected to the other one, which is the same. So understand the knowledge, then stop talking about the atmospheric, and changes and the rest of it.

Man is connected to gravitational field of the liquid and the gas. One in the dimension of oxygen and one in the dimension of, (1:58). what we call, Carbon. You have to

understand, the essence of the source of the Inertia of the field of the soul, the dimension of STP. Then you understand why you have nitrogen in your amino acid. Just look at the energy field strength of it. Then you understand how everything is connected.

What happen when you go to another planet which there is no energy level at the oxygen? You die? I don't think so. You mutate to the fields ,which guarantees the evolution of survival of the matter state of the fields, when the soul converts, or interacts with dimension of physicality.

I explained this once, if it can be understood. Give yourself a very powerful gun, and create yourself different atmospheric conditions in front of this gun, and shoot the bullet, let's say of a water. Which goes as fast as possible through these different conditions. One is frozen, becomes, shows itself as ice. The next section is high ?? operation. The next section is condition that the same water shows itself as a steam, and there on, and there on. (2:00). This is how the fields of the universe are in the condition of the life.

Depends what you're observing, what condition was created, and how the bullet for which the field has released, in what strength, and what condition it goes through. But in essence it's the same water, which the bullet went through the system. It's the strength of what we do, and understanding the strength of the creation and the process, which the environment has created for manifestation of that creation. It's how we do, how it's done, and what emotions you take with it, and what impressions it gives you.

Any other question?

Q: .. Is the seven candlesticks or the seven headed snake over Jesus and the Buddha. The seven chakras giving its energies to the soul to expand. And are the cosmic rays the depiction of the light in cylindrical form?
K- What? I think we pass on this one. (2:02).

Q: Has there been any interest in doctors in Australia in setting up a Wellness Center?

K- We don't disclose what we do, we work around different ?? clients, yes. It's just that, Keshe Foundation, as many of you know, we entered a position nearly exactly a year ago, with the introduction of one of Knowledge Seekers, that we can create facilities and conditions that the Foundation can grow rapidly. But it hasn't worked. We asked for some of you to help us to finance it, and some of you got stuck with us, created you some problems with it. Part of this expansion was creation of the health centers around the world. We have come to a conclusion this week that, this is ?? dead, we put an end to it in writing today this morning, before I come to teaching. As we think, we've been deceived.

But in any shape or form we'll carry on, and we'll see what comes up. But part of the process, yes. Our target, our long term target is creation of the centers where the people around the world can go. They don't need to go to Austria, or to go to Germany, or to go somewhere. In every country, every city, part of the hospitals or whatever. Now, like we

didn’t have X ray machine, we didn't have MRI machines in the hospitals 30, 40 years ago, ??. … ??

The technology of the plasma technology we teach will become part of another room section in the hospital. Hopefully, long run, there will be no hospitals, because gradually we learn how to do. That will be the part of it. There are a number of doctors who work in the fields of the health of the Keshe Foundation in different countries, and they do different things. (2:04). We observe, we watch, and now our ?? priorities at the moment is, the Health Center in, what we call, every corner of this planet using the present, as what you saw, and established as hospitals. Because once you have it .. You’ve got to see what we see.

We have a man who is suffering with Parkinson's, and after 10 years, and after a few days, weeks, there is no sign of it. How much do you think we can keep away from others to suffer from the same, when the knowledge for it is there? Or, as I said very frankly, we open a clinic on the Moon, there is no FDA. Anybody who has a Parkinson, please go to KF centers, we transmute you to the space, the health center, the wellness centers on the Moon, we’ll process the situation and send you back without it. That's the bottom of it.

Literally, you’ve got to understand, once we complete this process of transmutation, we will become a condition of doing, what we want to do for betterment of man without a government. The beauty of it is, we've been kept out of the, what we call, public eye, allows us to grow the way we want.

I received something from a gentleman this week. I'll read it to you if I find it. He's the man who sits behind a lot of things. He wrote to me. He is one of those who makes a lot of things happening around the world, as he says. (2:06). He says, "you are one of the most influential scientists in the world today." With the science and the technology we bring, we have to influence the pattern of life, the way we as Knowledge Seekers bring that positive change to society, and for nothing else, nothing else out of it.

Our target is to bring this technology to a solution, or bring this technology to do. If you have diseases that are incurable today, would they suddenly become curable tomorrow when we open, what we call, Wellness Center on the Moon? How many of you would travel to Switzerland to do, what I call, "self suicide," because they allow it, and the facilities are there to do it? How many governments would allow the Keshe Foundation systems to go in their country, that for somebody comes for 10 minutes, half an hour, and goes back without the any condition?

Do we create a condition, that we put a few thousand systems, or we create the environment, that anybody with a cancer would go through, and it will be done, and then would the governments have any say in it? This is, what we call. (2:08), There's going to be a lot of controversial, a lot of movement, a lot of things to be done, but at the end of the day, who is benefiting by it?

We invited the German chancellor to come to Keshe Foundation Linz. Would we see end of the Parkinson's she's been going through. We saw it in public before she left the office. Would that give credibility to us? We don't need the credibility, because, if you have managed to save or change the life of one man, you've done enough, the others have to follow. Because we don't use medication. We don't enter into giving medicine. It's not the job of us.

We understand the physicality is connected to the soul and the systems we developed elevates the soul, the physicality follows, and then it has to sort itself out. As I call, it's the medicine of the fields of the Creator.

What we saw in China, the man walking and then running, now we can repeat it 100 times. 100 times, millions of times. No man today, with the knowledge, which sits with the Keshe Foundation, should suffer from Parkinson, should suffer from Alzheimer's, should suffer from MS, should suffer from Fibromyalgia, should suffer from many, many, many diseases.

But at the moment, (2:10). our governments and our doctors are the same as those with the turban and hat. They lie to themselves, they lie to the others ?? with it. We don't claim, we discovered the cure. We explain the process of Creation. Knowledge, science has to be explainable and repeatable, that it can be done. You have a Parkinson, Keshe Foundation has the technology for it. We have proven it, even in the recent past. You have Alzheimer's, KF has got a technology for it. You have MS, wow, we can put you through it. A lot of people claim too, and we've got this, sure, whatever you like.

Technology has to be understood and then be able to replicate it, within the framework of the Totality that it benefits all. If your emotional field strength causes Parkinson's, which again emotion is part of magnetic field strength, what happened when in the space, you come across this field out of nowhere, in one second you'll be shaking like a leaf with a full body Parkinson. It just passes through you. I've got to sort it out, I've got to put you back in the system. I know exactly what it is. I take it out, or add to it, or take it away, then you come normal. You're going like a vibrator, you come out as a man. (2:12).

None of you have seen body Parkinson .. people are, God help them. They shake from head to toe. Then should be able. We tried different technologies, we've tried different aspects of the technology, and now it's universal system for it. You suffer from Parkinson, the Keshe Foundation doctors should be able to process this like drinking water. They have the knowledge, and they have the systems, and we can support it with the support of those who are really knowledgeable and not those of hypocrite. You've got to come to a point to understand, as a technology, and not as a privilege, and not as something ?? undecipherable.

Any other question?

Q: .. The megawatt power systems, have any governments shown interest in setting up a unit in their countries?

K- You've got to… How I'm going put it… (1:14). Go into the patents. When you open the patents, you see, we introduced light balls, and things, which have no wire connection. Use micro plasma, what you call, power units. This is the thinking of the man, you have to have mega power stations.

You need energy at the point of need. I'm a nuclear engineer, I've been trained to make power stations, to build with the transmission lines, to substations and to the homes. With this new technology there is no need for a power station. There is no need for transmission. There is no need for substation. Now we can produce enough energy at the point of need. This man huge nuclear power stations, these man huge, god knows what, has come to an end. And funny enough, I was sitting in front of one yesterday, we were discussing with our people yesterday in the lab.

Keshe Foundation has developed a system that can be replicated, energy available at the point of need as you need. Micro. We've got a patent on it, we have submitted a patent on it, micro plasma reactors. Now, are a reality. Today is a reality. Patent was filed nearly 20 years ago. (2:16).

The units are built today. I sat in front of one standing it yesterday, with our Knowledge Seekers. It don't need mega power, blah, blah. We have developed the technology, it needs to be, now that it's fully developed, commercialized. Micro Nano plasma energy unit, which produces current and voltage to the point of the need, now it's a reality in the hands of the Keshe Foundation.

What they tell you, they're trying to build these huge fusion reactors to create the energy of the Sun, to have mega power, it's dead, it's over, it's done with. Because what is needed, is what you need at the time of need. What we submitted as a micro plasma reactors power generators, which is patented, or put in patent application, is the reality today. I can tell you, because we have it. It's developed, it's understood by our team. And it's part of the new Enhancement Units.

Why we had to complete it? Because if you come to the new, the present Enhancement Unit in Linz, you see, we still power some of the controls with the wire, with electricity. (2:18). Our reactors don't really need it, because they're self-sufficient, ?? with the power they produce themselves in it. Now with this new technology, production of the micro plasma reactors, we don't need megawatts. Why do you need to burn? Why do you need to destroy so much things, so much, whatever, to gain, destroy so much, dig up mines to make the transmission lines, the coppers, or whatever, the frames, or whatever, destroy the environment, and then there to bring it in, to produce little tiny electricity that one LED lights, can light up, which uses fraction of a micro of a watt?

Where now, you can create this plasma cosmic ray, miniature reactor, which we patent 20 years ago, and it costs a few cents. Would you not have a distributor box on the table with you plug your, what you call, television, the rest, into this little box, and use ?? all these energies.

MaGrav systems, with the knowledge we have today, we created, are obsolete, and it's sustainable. So as the technology has developed so rapidly, the knowledge has developed so rapidly in past 12 months, there's, our people understand it and develop it to the next stage, that most of the things which is on the table a year ago, are obsolete. You saw it from the size of the reactors inside the Enhancement Unit. To those of you who've been in the system, (2:20). where you've seen what miniature things are hanging around.

Why do we need mega power? Maybe last week, and maybe last month, yes, we could do, we were talking about it. But sitting here, wasting so much energy, going to where we're going, do we need it? Because we put it in the patent in 2005, 2006. Today, that patent is reality.

We have managed to break to get power out of the plasma, without going to hundreds of thousands of degrees, the center of the Sun. Fusion technology as of today is obsolete. I always said, fusion is a dream, which will never come true. But now, interaction of the plasmatic magnetic field leading to creation of the current as the need of the man, it's a reality and it's in the hand of the KF. We will overview, overlook, we don't need even the way, we sat yesterday in the lab looking at it. We don't even need the gas generators which we told you. Technology has jumped in the past few weeks.

Would we go to the next steps? It's what our people have to understand, to develop the next stage of. This is completion of part of the process of the Keshe Foundation technology. Nano micro reactors are a reality, if you understand how to work with Gans's and the production of it. And we have achieved it.

We haven't achieved it in millivolts, (2:22). in little watts, we've achieved it in what we can multiply to what we like. This is understanding of the technology, this is the development of the next step. Since yesterday, when we.

Don't forget, we set these things up to happen, it hasn't happened accidentally. Our team has been working to set this up for weeks, and now we have technology, we have oscilloscope, we have everything, we have systems, we measure and confirms it. I sat yesterday watching, as it was getting explained what's been achieved. I said yes, the patent micro plasma reactors, what we call, battery is complete.

Do we need to create energy for to lose it down the line? We're now with the cosmic rays to understand it, we can change it. The new energy units are cosmic ray units, what we call, Nano plasma systems. It's been patented, put in patents 18 years ago. Today for what our team has achieved, in what we set out to achieve, we don't see any need for such a position. What you see on the screen, submitted as a patent application in micro plasma reactors, today is a reality. (2:24). And it cost very little to make it. The way I see in the next few years, we can be embedded in any electronics. You can be embed in, what we call, automotive.

Don't forget, European community has passed a legislation by 2035, twelve years from now, thirteen years from now, they cannot sell any car which uses fossil fuel. It means, fuel stations will become a joke, the time of the past. In 2035, 2040, 50, maybe, because they have to allow the cars which are now in this condition, maybe the bring conversions for them. They cannot go to any fuel station anywhere in the EU to tank your fuel, because it's not there. These fuel stations the way we see it, are gone.

But now the plan was to put the power stations outside the city, burn it, or use the Solar System, or whatever, and bring the electricity through cables, to new type of energy fuel stations. With what we have achieved now, today, this is obsolete too. It brings the electron, what we call, energy conversion system of the cars, years ahead. Because we have confirmation, we have systems and we don't have any running, anything.

We produce the condition of cosmic rays, and it gives us that energy of the universe. We just need to convert to what we need. (2:26). I said yesterday, we're done with the (fuel) pumps, because even if you have pumps, it doesn't make any difference. And if we have the pumps we can generate the power internally.

With the science in past few weeks, we developed the new enhancements unit to go to Linz, has leaped by hundreds of years, and it's thanks for the very competent, capable team we have, and they're just working, developing it. I say, I have to keep away from it, because every time I go there I change things, but they have to understand where the change comes from. Even the process of understanding the conversion, they've taken a long time for our people to understand. We are in that process, we have done. The micro plasma reactors are a reality and in the hand of the Keshe Foundation today. Because we literally see it, we have it, we operate within it. Don't look for mega power stations, now I think we're going go into very micro and macro different directions.

Any other question?

Q: .. Will the Ukrainian Russian war be the last war that we humanity have to experience?

K- The war is a habit of man trying to show he's better and stronger. (2:28). This will come with, what we call, understanding of position of our religious leaders. In this Ukraine.

We see a hotspot, there is a possibility of very hotspot, very strong hotspot boiling somewhere, again to do with religious people and religion. That might take its own condition, its own shape. Again, we see collaboration of the religions, under the name of religions, in trying to bring a politic into it, that it can justify it, to sell a weapon.

But, more or less, end of these two religious situations we have in Middle East and in Ukraine, we see the end of a lot of things. You saw the end of the wars, what we saw in Vietnam and we saw in a lot of countries. Peace state now in Somalia, what you call, Saudi Arabia, it's again between the religions, Shias and Sunnis. As usual, others take

advantage of ?? it and get in it, because they can make money out of it. But Ukraine, more or less, it will come to the point that, we have seen the end of this ??, these last religious positions, governments will not go into the war, because there's no, even with the war in Ukraine is, we call it a war, but it's a religious conflict. This should soon come to an end one way or another. We will see an end in this situation in Iran, again through religion ?? and the freedom of ?? . (2:30).

Q: Dean .. Thank you for that wonderful explanation of what you've spoken about today. So, this micro plasma reactor, would it carry an emotion?
K- Yes, 100%.

Q: So, Mr. Keshe, I remember you saying once that you could have a reactor in the palm of your hand that could move a planet, reposition a planet.

K- Still applicable, if you understand it, yes.

Q: So, the emotion in mankind and when it manifests in certain ways, it causes conditions that manifests in the physicality as all sorts of problems, and diseases and things. When you turn this system on, will this emotion effect humanity in certain ways?

K- Of course it does. It depends on what the strength ?? of it does, and how you receive it, and what your soul decides to have from it, and what target it has to reach, or achieve, or receive, what is short of. Emotions, as I said before, is not exclusivity of physical dimension. "I made man in the image of myself." (2:32). If physicality has emotion, so the image of it, or reality of it, the STM has emotion too.

Q: I noticed today Mr. Keshe that, as usual, when you were speaking, and you've spoken about before, lots of birds started turning up outside my vicinity where I am right now. And I always know that, you know, that you have a presence, a physical strength, sorry, a field strength, that is present and around us in each and every moment. So, the birds themselves Mr. Keshe, you spoke about, earlier on, you spoke about going to the Sun, and people are needing the energy of the Sun, and taking certain positions around the planet. So would this explain why birds have a migration, and they move from one place to another, are they following this field strength?

K- Partially, yes, partially the way they go for the survival, ?? extension of the soul. Something very interesting is, when the birds fly, we have birds which stay locally, other birds which fly from one continent, one place to another, immigration. They are in the higher altitude. Do they absorb a different field strength? Do they work on the geo cosmic rays?

I'll give you a very, very interesting point, I know the answer, but I'll leave it to you to decide. We have birds on this planet which go from one place to another. (2:34). Do we have the same kind of, like a birds, which travel between galaxies and universes? Bird being free, unconditioned, connection. So, yes they do it.

When you go to places you see and you have done it. A lot of people who use a lot of Gans's see a lot of birds. We had this problem in Inner Mongolia, Wang Lin is here, she can tell you, that when we used the Gans's in the experimental trial, the farmers in the farm were complaining, they never seen so much birds, birds are coming and eating the seeds. Because our harvest was completed days before, the rest of the harvest, which wasn't using the Gans's, so the birds know, they were coming. And after even eating so much, as I said before, we still had an increase in production. They feel the fields. They absorb, they understand. If you put a specific Gans's in your garden, you will see a huge change in bird flow. How they flow, and how they flow in and out they go. You see the change. Because you create a connection. We've seen this many, many times.

Q: So Mr. Keshe, when the seeds, if they go through a plasmatic condition of being in contact with the Gans's, they get a different field strength, they get elevated, (2:36). and then the birds take this elevation, and then they migrate and take it to another position. How does that work?
So, you spoke about birds from the galaxies and universes. Obviously, there will be. How does that happen in a micro to macro?

K- The same.

Q: So, if a soul comes from a galaxy, then comes to a planet, does it become the Totality of the planet? Because it has to become very much smaller, because if a soul can be a galaxy, or a universe, how does it condense itself to then be a planet, or a man, or a cell? How does this operate?

K- It's a dimension of the field compactors, how you compact it, to what size. We, goes back to, I always said, I think it's something, it's one of Rick's favorite things. One atom of hydrogen can cover the whole of the Solar System. It depends what room give it, then what you allow the fields of it to be.

Simple, simple example, and many of us see, you take your plant in one place on this planet, small leaves, and you take it to another position and the leaves grows totally different. Different, giants. This is the same. It's dimension and acceptance of the dimension. That's the main thing. If you accept and live in that dimension.

Would there be creatures in the universe which are highly intelligent, they become travelers of the universe. (2:38). They are, if they come to Earth, the size of the dinosaurs of the past, or they'll be small ?? amoebas, but intellectually very high and more advanced than the human race of today. Depends how you want to condition yourself, or how they want to accept to confirm their existence.

You'll all be facing this very soon, very, very soon. Amazingly very soon. With what is coming up in technology.

Q: That was going to be my next sort of observation Mr. Keshe, was, this always comes around to a position where everybody's going to have to experience this, everybody is

going to go through this, if this technology evolves and becomes everything that you've spoken about. So this position will be as one cell in our body, or one cell in the planet, the whole humanity will have to accept and go through this transmutation.

K- It's not acceptance. We make it so available, that it goes through it.

We have brought something very intriguing with all of you, and I've said that before. Any of you who have produced Gans's, any of you, even you produce Gans and you left, the Keshe Foundation, you left it on the shelf, in a very short time it will become part of our process. Any of you who took a sip of Gans's for different reasons, or washed yourself, or it accidentally fell on you, or you dropped it and it touched you, soon you'll understand how you become, you have become part of this process.

You know, I explained that before that, (2:40), a Prince who thought he was a cow and he wanted to be killed, to be slaughtered, and the physician came and put a rope around his neck and pinned him to the floor, and said, you are too skinny, I have to feed you, till you mature, then I slaughter you, and the guy started eating. Then he says, why do I have this noose around my neck. We are in that stage with the human race. We have put a noose, we have tied you down, we are feeding it, till it becomes wise. We are in that position. Very soon we take the noose off.

Q: Interesting moments to follow, Mr. Keshe.

K- For what I've seen in past few days, in the past few weeks, what is coming out of our development side, I said to our Knowledge Seekers on our team, once I complete the cycle and we go exactly where we want to, because our people have to understand it, and then it's done. We release it freely to humanity. I have enough to live, and I have enough to survive.

But we bring it to be, that's our target, that every man is benefited by it, it doesn't become just the Knowledge Seekers have this knowledge. It has to be the position of every man on this planet. Part of this, where a lot of you helped us, was to set that up. But apparently mankind is not ready for it. It's not time.

The way we did, with teaching you how to make Gans's, teaching you how to make MaGravs and other things, (2:42). We'll make it free for every man to have access to micro plasma systems, to have access to systems which they can elevate their souls. Don't forget, when we talk about a micro plasma, we still look at the electricity, if you can have your power running. When we talk this plasma, micro plasma system, is these cosmic rays that you can use to elevate your soul. You look at the matter side, we look at the essence of the Creation to be elevated. That it can feed the soul, and the soul can feed the physicality, that does not need to kill. ?? and that's why we go in the back of the ATM machines to ?? get the cash ??, that he has everything he needs.

Q: So, will this elevate the planet as well Mr. Keshe?

K- We elevate the universe, forget about the planet.

In a way, it's a recycling garbage machine. Whatever is surplus in the universe, which nobody else needs, we collect them, and make food out of it, for the other souls to elevate. It's part of the work, which is not exclusivity of this time, it's part of Totality.

Don't forget, I keep on going back to it, one day again, one day you will understand. Mitra collected the best, of the best, ?? to make his child. Then this child will send the best of the best, to elevate the Totality of what was collected, from Creator to the Creation and back to the Creator. One day, one day mankind understands what I'm talking about. (2:44).

Q: I'm just looking at the core now Mr. Keshe, on this micro plasma reactor. It's black and white on the screen. A digital representation of all of it, but we can connect with it with a thought and intention and set the emotion within it. So the physicality, part of it, can then can re-create exactly the technology that you are putting forward to humanity?

K- It's the way, I remember when we drew this up. Dirk worked on this for a long time. That was his dream. He drew, and I said, no it's doesn't go that way, it doesn't represent, because it has to stand all levels.

If you look at that little drawing on the bottom left of this battery, it represents, more or less, if you look at it, what is in the back of the number three, if you understand it, but in a different way. It took about, I think a month or two months, to do this drawing, because it came in stages and stages. But in essence, if you can enlarge it Rick, enlarge the bottom left hand drawing. The right hand drawing, the battery, has a physical dimension to it, because that's what people understand. The bottom left manifest the plasma. If it can be expanded, then you can see it. (2:46).

The Totality of the essence in the layering as a plasma layering, not layering as a matter state, as you have a balls. If you look at it right in the center, it says, plasma. It doesn't say gas. That plasma is, what we call, the essence of the fields of the universe. Now, maybe after 20 years, you see those words and it makes sense, it makes, what we call, understanding of it. This is part of the technology which will be opened up gradually.

Q: Will these reactors, Mr. Keshe, you say you're going to open up to humanity and it's for everybody. So, how are you planning to distribute this?

K- Why should I distribute? We still set up to build the factories for those who cannot do. But structurally a lot of you will do it, copy it.

As I said, (2:48). all the efforts of the Keshe Foundation will go into commercialize, to back Markray Corporation. We have signed an agreement with Markray, and we go through international distribution through Markray International. We are the majority shareholder and we control every aspects of the Markray. Soon we'll go in that direction.

It’s very much like Tesla, has a factory in every country in the world, but based in US. We go through the same channel. We’ll back Markray to the hilt, but we will not issue anything beyond that, and we allow Markray to become one of the largest corporations on the energy side, food, water and everything else. The majority of the shares of the Markray is owned by Keshe Foundation, which is owned by you lot. I came with nothing, I go with nothing.

Q: So, that's helping humanity physically Mr. Keshe. So, the position of the, you’ve spoken about it many times, about the elevation of the soul, would this not be an instant reaction from the core?

K- It depends what you need from it. What's your expectation? And that expectation creates a need and absorption.
Q: What is the expectation?
K- Depends on the individual.

Q: From your viewpoint, from your viewpoint?

K- I have no expectation, because somehow things are set to be done. We are just actors in a big theater. When you look at the structure, (2:50). if you understand it the way we understand, hopefully, the scene is set by the Creator and Mitra. Then the rest are actors, they are the, what I call, spectators. How it will change.

This new technology, this understanding will have a profound impact on the whole structure of the operation of lives in the universe. Soon you’ll understand.

You waited, and I said, for UFO’s to understand how they go. Now people with the UFO’s are waiting to see how humanity understood this, and everything they missed it. They tried to get to it. Then you go back to other part of the teaching, as we said, the Cup and the orange, now, the knowledge of energy ?? becomes that orange, and the cup is the Unicose.

Mankind has not understood what gift we have given to him.

Q: … Why is humanity being handed this gift that the others didn't receive for trillions of years?

K- Ask Mitra, not me. And ask the child of Mitra when the time comes.

Q: Do we ask Mitra through our thoughts?

K- Depends where you look for it. I had one and I kissed one from the day I opened my eyes, (2:52). and understood what it means, loving one. She happened to be my sister. Now we have to deal with it in a different way. It's just a ?? little bit of ?? our knowledge and ?? integrity. ??.

Any other question?

Q: Sun's starting to shine very brightly. Mr. Keshe. Thank you for taking my questions.
K- Thank you very much.

Q: How does mushrooms such as Amanita Muscalia helps or alters human, or other creatures, soul and brain?
K- I do not know. I don't take mushrooms.
Q: … (2:54). ..

Q: .. Mr. Keshe, on the Satellite. Do I need GPS and elevation as a criteria for the satellite, or the mobile, I'm getting confused now. I'm looking at both systems, the Mobile system, yeah.

K- We will be running a test on the Mobiles. We have set the things up. To set the Mobile up we have a procedure, we have to follow. The first person we are putting through this, we have started the procedure for that, in a very physical way. Then we go back to other Mobile, see how it works, and how we transmute you across.
Q: .. And the Satellite? … Just wondering how that is is, like, (2:56). you know, a group of people connecting together.

K- It's like, what I call, you're in a Zoom call, like now, it's hundreds of you in it. It'll be like. We tested this with Rick a few weeks ago, if you remember. That is a prelude to, and then if you remember, with the session we came live, even many of you were there, we did the transmutation back and forth with. .. We've done a lot of tests, a lot of things is happening.

There is a. We need another 200 satellite people minimum, which we are short of. If we get 200 more people, it makes it easier to operate. We need at least another 50 Mobile people to complete. We need Mobile people who can come to Linz, that we can send out. You Mobile people all think you have to be where you are . We need, as much as we send out, we need too people to bring in.

So, on target, we are short by about 250 volunteers. Then we are short by at least 12 to 14 people, who we can send into space (Moon and Mars). Because these are conditions we have to test on the system, it's not just having it. A lot of you came in, you know we do special tests for certain things. So, in around, about 300 people out of you Knowledge Seekers, we still need. We need at least 50 people in Linz to go out. At least to go out, that we understand the ?? whole. (2:58). We need about 150 people to bring in. We need Satellite people.

Knowledge Seekers suddenly all stopped. They thought, oh, no, you stopped the. When we test, we develop. You a lot stopped. Some Knowledge Seekers came back a second time, third time. We need, especially in next week, two weeks, we need at least these, to be signed in and people to come in. Because when we put the units in Linz, we need them to be tested. It's just not there to for the beauty. You understand?

And then we have the Mobile people. We need you, Mobile people, from Linz out, not just to bring in. Can we send somebody to you, to Australia from Linz, and then bring both of you back here? Because we have to do this. The original Mobile system will be done that way, that we have a connection to bring you in. You understand?

So it's a lot of things, Knowledge Seekers said, oh, the tests were done, the first few people came in. Then we had this idiot, 11.11 guy, who came in and went and wrecked up the Italian community, because he didn't get what he wanted .. a thief. He wanted to rob us, to get himself fame, he didn't get it, he went and came up with all the rubbish in Italy, and destroyed the whole Italian community.

We need, we're very straightforward, we don't get it, you don't get it. We don't complete the systems, nobody goes nowhere with it. This aircraft sitting in an aircraft hangar. But, what we have now, we can't start working on. We need mobile system people who come to Linz in next few weeks, that we can send out. (3:00). We need…

It's a development technology without control from the government. It's us who's developing it.

Q: So, you want say, say myself coming to Linz in your system? Or do I have to fly there 18, 20 hours ...

K- We need a bunch of Europeans who are closer to come to Linz. You understand? Then, when you people who are very far distance in Brazil, in Australia, whatever, we have to bring you in. But we have to start testing how we transmute. You understand?

It's not for me, I can do, but our systems are, our developers have to understand everything which is done, and how it's done, and what it needs to be adjusted. As I said, if you remember, when we started the EU, we started with three helmets, three Head units on either side. Then we went into the Enhancement Unit, and then we went from the left to the right, because as we develop, we kept on changing. To you, you come this time, next time it's the same. But you don't know how much changes were added. From the day one, we started, what we took out, what we put in, some of the reactors changed, some of the Head units changed, some of the connections changed. This all came by you lot coming in to test.

We are more or less, we are short by 200, 250 people to complete, the Satellite people. We need Mobile people come to Linz, that we can send you out, and see how you land, how you feel, can it be done, and then put part of the satellite unit, they'd like to be with you, Antonio, and they come to Linz, (3:02). I want to go to Australia and come back with you. We send, we bring back. Then we bring back on his own. You understand?

And suddenly, everybody started, "oh, they had enough." We have come to the point of literally a halt.

We have a number of people who booked in for Mobile, from all over the world, and they are sitting in their house to come in. We need Mobile people from here,we can send out. We need people with the satellite, that we can connect. We need mobile people in Australia and in Canada, that we can switch you over, we can take you across.

We need people who can go into a space. I was talking to the heads of the Keshe Foundation, a few days ago. They said, can we do a Christmas pack? We always do Christmas pack. I said, yes, do me a Christmas pack for people to do the mobile, and satellite, and the space (Moon). How can we put it together? I said, okay, sell a package for a mobile, a satellite, and a space, for so much. And see how many people will take it up. Because we need it. This year the Christmas pack will come from the Keshe Foundation is not any more to, what you call it, MaGrav systems, this and that. This year package, if they can get it done, it'll be a space unit, because we have to do the EU, it has to be done this week, next week. It's not there for, next year somebody will come.

We don't have it, we don't test it, we don't risk it. We don't go that we don't go to unknown.

We need mobile people inside Linz, to go from one unit to another. Then we can go outside. We don't have mobile people, (3:04). all the mobile people who sign, I don't know how many of you there are, all sitting in your countries. Thank you very much. But we need you, it doesn't matter where you are, to come in to Linz, and we can ship you from one machine to another, to see what it is, what it needs to be adjusted.

They're short. We are short. Suddenly, somehow, Knowledge Seekers all thought, it's done. No, we just started it. We are short by 12 people for the space fight (Moon). There's no use having the machine sitting there doing nothing. We need today at least 250 people for satellite systems, mobile systems, 50 at least, you have to come to Linz for us to test. Otherwise the machines are sitting there idle.
Q: I would love to come, Mr. Keshe.
K- I would love to have people that in next four, or five weeks .. We most probably in December, we start the test. Would we run a Christmas run, that Knowledge Seekers would travel around the world on a Christmas Day, using the Keshe Foundation T? We've done things like this.

Today, we need people to sign in. We are short by 200 people, because we know how many people we need to do the transmutation & transportation from one system to another, check everything, once we take the whole body, not the leg left behind ,and everything else inside the room, because it's one cosmic shell. If it can be done, then we can go outside, then we can go to space.

I said to our team, make a flight package for Christmas, you're selling, what you call it, the, (3:06). whatever we sell in the Shops. Come in, do it. We do a satellite, we do a thing in a package, it has to be done. Don't wait for the Christmas pack. Come in, sign, that we know we can plan. Otherwise it comes to a halt. And then you tell us, oh, we became… Yes.

But we have lost the number of people who come in now for the next cycle of the new systems. We finished with them. All the tests with the present system is finished. We had the last guy, last week. That was, actually I enjoyed the last guy more than any, because it was maturity of everything we wanted to do.

Now we need people to start signing in for December, to start testing the flight systems, the new transmutation system, that we can send you out, to bring you back in. Can we send you out for Christmas to North Pole to see the Santa Klaus, or, what they call it, the Father Christmas? I don't know. We need to.

If we don't get it, we cannot do it. We are short, we are definitely short. Now that we have come to this point, we need Knowledge Seekers to come back in, sign on this week. Because we cannot plan if we don't get it. I was doing a full calculation, because we have to check on the emotion, what the things move. We need 200 more people into Linz, 50 of them, at least. Europeans to come into Europe, into Linz, and sign in. Maybe we do a, God knows, a Christmas trial. We've done that before, and see on a Christmas day, if I remember Dr. Kostova, and the Germans, and the Canadians we needed to stop our system, (3:08). maybe now we can transmute people for Christmas. In a beautiful day.

It has to be done, otherwise the technology comes to a halt. Literally, comes to a halt. Because if we don't test, we don't know. If you're Germans, if you're French, if you're Italian, if you're Swedish, whatever. This week, today, sign in, because we need it. Now, what I've seen in the lab, we need to do it.

I mean, put it this way, we can put out people with cancer, and with Alzheimer's to go to the German, and test it there, it'll be hundreds. But we need this to be done, this needs to be done. So, we say, if you have a Parkinson you get the flights package, what you call it, free. If you go to the clinic in Germany and you pay tens of thousands of euros for it, and if they can accept you. Don't work that way. You understand? We need to do it, we've got to be directly in what it is. We are short. We are short about 200, 250 volunteers, on 50, definitely, from Linz has to go out. Fly in, come in, sign into, don't sign in tomorrow, I'll think about it.

We have come this far, we have to complete it. Then we need the other 200 satellites we are short of. If we cannot cover, we cannot reach you. Because, I will map up the Earth with wherever the Satellites are. Then we might come to you and says, we need people in Iceland, we need people in South America in this position, (3:10). because the network has to be fixed.

Thank you very much for bringing this up. Because I didn't know how to put it out. As I said, the souls know what to bring out, to come out. We need, if you're a knowledge seeker, and we have discussed it with the, what you call it, with the team here. This year, Christmas package has to be the Satellites and Mobile systems. We are short of 12 people for space, and I know why we're short by 12, and where we're going and what we're

going to do. I know there's the charge of this heavily, heavy 25,000 per head. But we still can do. We already have volunteers, but we have to complete it.

Q: So, for that you still, you'd have to come into Linz, would you?

K- We try not to, because by that time we have completed the satellites and the mobiles. By that time we should have no problem.

One of the beautiful things with this will be, is that, we can send an Israeli from Tel Aviv, we can send an Iranian from Tehran, we can send a Chinese from Beijing, we can send an American from wherever, a Mexican, a Brazilian and an African as a team of six or 10 to Moon. You understand? And see how they land, how they interact in the soul level. (3:12). How would the Universal Community accept man in such immigration?

People don't understand what is involved in this new space development. It's not anymore, if you can take off from America, land with the "seat of your pants" in Europe. It's, scientific it has to be done in the correct way, it has to be laid out.

We, our team of developing is there, but we know what need to do to complete the transmutation & transportation. Would it succeed? How would it succeed? How the last people we had, the Germans and the French guy, how did the French guy could feel the German pushing him off the chair. Now, in the next system, can we make you physically this, they could share a chair together?

We had a test case, they know, the Knowledge Seekers, we had to sit the 2 on the lap of each other in one system, as I explained, to see how it will be, what we call, like beautiful people, with two souls as one body in the system. Would the system recognize the difference? We need this to be done, and it cannot be done by imagination.

If you cannot come, you're in Brazil, you're in whatever, you can tell us. I'll pay for somebody. Keshe Foundation will find a lot of volunteers, there are a lot of people who want to do this, but financially cannot afford it. We have enough people in Europe to fill up for 10 years, but financially they can't afford. If you can afford it, (say), I'll give for 2 people, 3 people to come and one of them comes and picks me up, back from Australia. It'll be done.

But we need it to be done this week, next week, because this is something now we're getting to that point of getting it done. (3:14). I was discussing with the Keshe Foundation, the promotion this year, if you do a Christmas promotion, do the packages of space flight, mobile people and the rest of it.

… Let me explain something, some people have sponsored the Universal Council members to come in on the sixth of December, if I'm correct. Sixth of December is Saint Nicholas day. It's the birth of the child of Mitra. And it's there to be, to sit, to watch, and see what we can do. Can we transmute the soul of the, what I call, Universal Council

members as, what we call, the soul of Mitra across this planet by that time? Will we be ready for it?

We need this, and thank you very much for bring it up, we need this support, we need this physical support of you in the Linz center, that we can start. We have to test from one machine to another, from the other machine. At the moment the machines are one way traffic, in one of them. The new system is a four way traffic, so two chairs in each unit, and each one can be crossed from one unit to another, receiver and sender. We can see if we can position directly to one chair, or directly to another chair. You understand? Then we can position you on Moon together from one system. Now we can land you in different places.

We need. Actually it's a very desperate condition, (3:16). if we cannot test with people in Linz, in this December, we come to a part of a halt, and random bringing mobile people across. We thought the Knowledge Seekers would carry on doing it, and somehow it came to stop. That was good, because the new system is finished, the old system is finished. The new system we need physically people. All the Italians, Germans who've been once, will be the best volunteers to come back.

Q: I'm Italian, but I hope not to give you any trouble.
K- No problem.
Q: When I say Italian, I'm an Australian, so.
K- You're an Australian Italian.

But we need this to be done. Especially, I ask the German, the Swiss, the French, the Spanish, the British to get signed in and done this week, today, tomorrow. Because we have to plan it and it has to be done. Otherwise we come to, we come literally to a halt, if you cannot test it ??.

Q: Well, I'm booked in. So, the only thing is the spaceflight, that's probably out of my reach at the moment.

K- Spaceflight we need people with a specific characteristics. I mean, the first couple are best for it. They're well experienced, they know each other very well. We can do a lot of pre-testing and then testing of this, and it will be done from Linz anyway.

Any other question? (3:18).

Q: .. Is it possible that the Foundation's teachings are being transmitted in another dimension than the one we are simultaneously living in?

K- We always said from the beginning, when we teach, we don't teach only to the man. Teaching is done at the level of the soul, from the beginning. You'll hear it in the voice of the man, but the others understand, the way as you dream, and go somewhere, they listen through ?? the ear to the elevation of the soul of knowledge.

It’s not exclusivity of man, this time we are not making anymore, what you call it, teaching only one Ayatollahs, and one religion, and then they become dominant. It's for everyone.

Q: .. If a plasma needs to have at least two M fields to create, to be created, (3:20). does that mean that there are two creators? And if so, does the Creator have a partner too?
K- Called, Mitra.

K- If you don't have any questions, we'll call it a day. Let's see what we can gather and what we can bring in. Let’s see what we’ll lead up to next week, and how we progress in the knowledge and technology.

Something to do. If you, because this goes back to our doctors in Germany. If you like to be processed through, especially Parkinson, Alzheimer's. Parkinson is a very specific things which the Foundation is supporting the doctors. It’s because it's both in the level of the Soul, and manifests itself in the physicality, in a direct way we can see it. Please contact Keshe Foundation. They have charges that has to be met. But we need another, maybe 20, 25 people with the Parkinson's, for them to complete their process. There's a reason for it, because there are different aspects of the Parkinson. They have tested and they have a success with it. We need to go through this and then hopefully, we're still sorting out, what we call, our position with the Italian clinics in next few days.

Any other question? Or shall we call the day? (3:22).

Q: Dean, … So, after what you've just said, what you've just spoken about. If this position takes place, and you get enough souls or you get people to come in to the center. Will this have a direct emotional effect upon humanity? Will it? How will it develop?
K- What? which position
Q: If this position takes place, which you get enough people to come forward over Christmas, how will this affect the emotion of humanity? How will this ?? reposition?

K- The reposition is, it brings different confidences to the society. People see a different angle to life. Will change overnight the whole, what we call, persona of life on this planet. You’ve got to remember, you personally will be there seeing one going from one to another unit, and recording it and broadcasting it.

When people see with their own eyes, they don't need any more flights. They don't have to be shackled by governments, and be shot on the street, because they want to be out on the street. We saw it in Germany, with the East and West with the walls and mines between the two parts of a city, where they can just move along and nobody can know, whatever.

Once people see it physically the first time, it will change everything. It will touch every being on this planet. Freedom of soul, freedom of physicality. Yes, it will do. As the man who broadcast everything live from the center, you will be instrumental in it. (3:24).

Q: … So, this will end the war? Not in the physicality, end the war…

K- This will end a lot of things. This will end… Once we can show man can travel and be transmuted, the way what we planned. We're hoping to be successful, we are hoping it will be done. Once we show it, do you think the pressure on the governments to finish the airports, we got the pressure in EU, will drop the pressure in EU.

A lot of things will change beyond imagination. Will there be a war? Would you sit in somewhere, and to be waiting for a bullet to come? Or will you change the soul of the bullet? Go back to some of the teachings years ago I gave, about how we'll let the nuclear warheads in the silos, to be in there own silos. They'll never leave. Now, maybe you understand how. We are not going to change the soul of the missile, we will change the soul of the man who pushes that button, so he will not push, he will not do it.

Once you can visually show what… You've interviewed a lot of people coming out of that room in the past two, three months. And you see the emotions they come in. I've seen the emotion you show to them, how they trigger you, in what they tell, and what they went through. Now humanity will see no shackles of borders. When we can bring live, people from different corner of this planet to here. And we can send from here to different corner of the planet, and within seconds. (3:26).

I said to the American people when we met in Brussels. I said, gives us one thing in Tehran, and we'll deliver it to Washington in the White House within seconds. They laughed. That's 14 years ago, no, 10 years, 12 years, in 2011 when we met. Exactly 17th of November, exactly eleven years ago. This is not something new, which we just come up with, that will do that. I said to the American delegation in the café, when we met in the restaurant, talking about handing over the Key. I said, give us something in Tehran, and within seconds we'll give it to you in Washington, you can check it's what we sent.

Now it's a reality. How would our government see what you as Mr. Dean Butler, broadcast live one person moving from one unit to another? Then what would be the reaction in December and January, when we start shipping people from different parts of the world and sending from here out.

It's evolution in the science, it's not a magic. So, you'll have a ??. Man will feel free from the shackles of restriction of everything. Would you like to live in camps, which you have to look for food and everything else as a refugee? Or you'll be free in the city to walk, and you can move from one place to another? (3:28).

There's a very big strange, I go through, I see it more or less every week. It is amazing if you understand the consequences of this, what I'm going to explain to you. What we see as refugees over the past years coming from Iran, Syria, Libya, and Iraq and the rest of it. People with no clothing walking the human path, poor. They come here going into the refugee camps for years to be given a piece of paper, that they can come out of their camp. Having good, cannot do anything, because they are not given this, and then there's always fear of, I can't work, I can't do anything.

We see a new type of refugees called, Ukrainian. The Ukrainians in Europe, now they come with a top model cars, they stay in the most expensive hotels, they eat in the most expensive restaurants, and they are still refugees. We see Syrian, and Iraqi, and Kurd refugees walking on a pavement, because they cannot do anything. They have enough just given to them to survive, and in the restaurants across, in the most expensive French restaurants in Vienna, Ukrainian refugees.

Is this correct? I've never seen so many top brand cars being driven by refugees. BMW, Mercedes, and god knows what, in Europe. (3:30). Do we need to have the status? Do we need to keep them in camps, and the other refugees are paid to live in the most luxurious hotels in Europe? Because they know and they have influence to get it, as refugees.

We see today what they call it, become refugees, exports of every aircraft possible into Iran, that the families of the rich Ayatollahs are taken out of Tehran in case the regime changes. Billionaire refugees, under the name of religion, and there are Iranians who have no food to eat, and they have to wait for handouts in the refugee camps. Who would you give this technology to? To return those who escaped by killing, back to Iran, to be put on the judgment of the system? Or would you free those who are in the shackles of the refugee camps, give them the freedom of the whole planet. I go with the second one. The first one, the others will sort out.

At the moment, you cannot get any aircraft into Iran. But somehow these people are getting aircrafts into Iran in the most private airports, and putting their families with all the jewels into it. In case regime changes, we are out. ?? Excess of billions of dollars on the back of the same as the Ukrainian refugees. A lot of you in Europe, you will start seeing a lot of Ayatollahs on the street. They might change their clothes.

So what do we do? How do we do it? We have to bring the change. (3:32). When I can take hundreds and thousands of people in political prisons, into the other countries, which they are welcome to be free, which one would you help? Should the woman who wears, to be free, imprisoned and raped, and then a bullet into the head in the name of? I will go for freeing those from, with these systems.

That's why we want to test so fast. You do not understand what we see. I saw a video sent to me, I get huge amount of videos sent out of Iran, and some of them is devastating. The man getting beaten up by 50, 100 police officers on the floor, and still getting beaten up, and one says, move aside, I'm going shoot him. The guy on the floor, and he gets shot. I thought it was a plastic bullet, I had to freeze the picture, and you see the fire coming out of the bullet, out of the barrel.

Q: .. Mr. Keshe, what you just spoken about. That's bringing forward many things. The image on the screen reflects a different reality. Do we do we need to go into that reality? I know, I'm sure it exists, do we need…

K- Which reality? The reality is there, of course. If we don't express it, how people will know? How would you, how… Why do you shoot a man, tell the other man, move aside, I want to shoot him. And the man who's been beaten by 50 hooligans, in the name of the police, and then we shot. You don't do that to animals let alone people.

We take the love of God from the Islam and the turbans, (3:34). which they wear. In the name of Muhammad, bless his name, abusing humanity.

Q: So Mr. Keshe, this transmutation will end this? Will, ?? change…

K- It has to. It has to be, that's why we are pushing. We need to do the transmutation. It's not just Iran, it's many places around the world. Suppression of man has to stop, and this technology, for the first time, allows it.

What happen when you use the place, the position of your brother, your sister, your friend, your family and somebody you don't know, who is put into shackles in prison somewhere, because he wants the freedom? They can go to the prison, and he's not there. We have removed him.

This is not the theory anymore, it's the reality of the technology. It is .. what we have in hand, and the Keshe Foundation is the only scientific organization. We are not doing it by moving souls and whatever. Technology is there to do. If we can send the man to the Moon on a given position, and we can bring you out from Australia to here, we have the same knowledge to free many political prisoners, which are there, wanting freedom for themselves, and their family, and their nation.

I will not fight with the bullet, I .. deliver the technology, what, they don't have anything to fight with. It doesn't matter where you go. A man has to be free, and we have the knowledge to do it. We don't need to march on the street to be shoot at. (3:36). We need to march the Space of the Universe to enjoy.

If Christ could get himself off the cross, the knowledge is here to get every man, which has been put on the shackles, and get beaten up, young girls at the age of 14, 15, get raped, and then because they cannot shoot a virgin girl, they cannot kill but, godforsaken, in the name of which religion, and then they rape them, and then they can shoot them, because … they went on the street, they want freedom.

Our job with this technology is to take them out. Then the same to bring their leaders in to justice. And we need to complete the Enhancement Units. It's not just for flights, there's more behind it. Political prisoners, abused prisoners, those in psychiatric hospitals shackled, as "beautiful people."

Q: So, for the love Mr. Keshe, so from the love of the Knowledge Seekers and the people that come into the Center, this can then be for the love of all, to free all?

K- Yes. It has to be done. We are at the verge of a breakthrough in science. And we have proven, it is not theory. You've been there, you've seen it.

Q: Yeah, I felt the fields there Mr. Keshe, many times.

K- For love of God, why a man with no sense, and turban, call himself an Ayatollah, allows others to be killed, for him to be powered over others. (3:38). Muhammad said, don't touch Iran, they're already religious, they already have the religion of themselves. Why makes a man of turban to kill more Iranian, then the name of the same religion?

We take the love of God from your names of Ayatollahs, let alone your children.

We need to complete, we need to complete this Enhancement Unit as fast as possible, to be able to do. It's not just for you to go from one unit to another. It'll bring a new dimension of freedom. No man can abuse another man. No man can put a 14 year old on the bed to be raped by 10 Sepah and Revolutionary Guards, because she's virgin, she cannot be killed, then they put a bullet in her head.

It's not just women, and be free, it's humanity has to be free from the shackles of these ?? others. And now we have a technology to do it.

Q: … You brought some, one topic here, and unfortunately you said it only one time. So, can you please open a little bit more, and that is, the aura of the man?

K- The aura of the man is the interaction of the fields of the gases, (3:40). of the body of the man, with his environment. Up to now we didn't know what aura is. Now we know that the body of man is made up Gans's, it's a dynamic plasma. So, in the interaction with each other, and the atmosphere like the Earth and the Sun, create a field interaction, ?? with body, we call it aura.

So, now we know this. Now we can interact with this aura, and allow what goes in and what comes out. We can feed the cells of the body of the Man through the aura. But this is too complicated. You can work through the Soul, or feed the soul, and the soul, which lead to the creation of these Gans's and their position, what we call, kidney or whatever, let that do it. Instead of dealing with millions of cells, and with rays, you feed one station, which has control over the rest. And that's why we feed through the soul. And that Soul feeding creates a different aura. Man will see a different aura once he start feeding through the soul, than trying to interact with, at the moment, as you see, the interaction of the fields.

Let me explain to you something very, maybe some of you will understand. When you deal with the soul of the Prophet, when you deal with the. What you see people, the holy people, in a white or golden color. It's not their body anymore, you're actually interacting with the field of their soul, because that's what we do in the system. We embedment (embed) it in, because it's the soul which interacts.

This is why I always said, in Universal Council members will be known by their soul, because they shine. That, in that position, as the Prophet of the past. (3:42). And we'll see it. You will feel it, you'll understand it.

So when we talk about the aura, we talk the aura of the soul, or we talk about aura of physicality? If you see a light around the man, as embedded in it, you see the light of his soul.

This is what we said in the systems, people say they feel they're in a cocoon, because the soul has expanded, but it hasn't become to be interacted with his environment. But still it exists. It is because, within the man looking inside from himself, it's not from outside to look in. And when you see the man walking, we all have an aura.

Take the clothes, touch to a skin and you see the other one feels, because that's the interaction of the aura, the fields of it. Because you never knew our body is made of Gans's, plasma dynamic. That's all.

Q: And this is the line of communication?

K- Yes, it can be. How do you touch your child, and she feels love? How do we as parents, we caress our children on the head, and they feel the emotion of the love we give them. How many times, which of them have come and asked you, papa can I have a cuddle. You don't feed them, you transfer energy through his fields.

Q: And this is what we need to do, even with the Gans's, without even touching the Gans's?

K- (3:44). Thank you very much. Rick, let's call it a day.

Q: .. if the mobile test needs a visa?

K- It has to be. It has to be the authorization of your government. Yes. Has to be. We are not breaking laws. We have actually drafted the letters to go to the Austrian Foreign Office and foreign secretary, for this purpose to switch. Because when we are ready, we can't say, we wait. When we are ready, now we are ready to go, documentations all started.

Thank you very much, Rick.

458 KSW November 10, 2022.

END

459th Knowledge Seekers Workshop; November 17, 2022

(Transcription Proofed)
(Auto transcription from Elias)

Today starts new era of Cosmic Ray technology - perpetual self-sustaining energy supply on demand; They stole millions from KF - but now we have Assets of Knowledge of CR - it's complete; Next 2 weeks attack KF as terrorist organization take off Internet; Spread CR T across planet teach everyone; Cosmic Farms across planet; CR feed STM which feeds physicality - no more diseases; UC Hebrew member dies; Definition of CR; How accidental death effect STM; Translucent Light - "daylight" of U; Fibromyalgia horrendous psychosomatic disease - accept abuse; Corona ignored by Europe

ENGLISH TRANSCRIPTION

(:08).
K- Yes, good morning, good day to you. As usual, wherever and whenever you listen to this series of Knowledge Seekers of the Keshe Foundation, Spaceship Institute. We welcome you back. And we endeavor, as I always say, to learn more with all Knowledge Seekers, we are here to understand and to see what we can add to our knowledge, that we might help us somewhere down the line when need be.

First of all, we congratulate the Americans who managed to get themselves off the ground successfully yesterday. And hopefully, in next three or four days, as they say, they will reach the orbit of the Moon. They'll spend two or three weeks there, and as usual, like a baby, they'll come in and jump in the pool and make a bigger splash when they land. And it will be interesting to see how the development of what we call, half a century of waiting, will bring us. We hope that they will make their way to space by 2025, as they are hoping, and return back to the Moon. As we said, I was talking to someone yesterday. We'll have the table of the wine from Italy and some other things waiting for them to greet them back. (:10).

The true knowledge of the space comes out of understanding the work of the space, not the work of the man to overcome the work of the space, as NASA is doing, and the others do.

In the past four or five months, you have been with us, you supported us in every shape or form. Some over 200 of you came to Linz, some of you joined us from distance. And more or less, a lot of you became part of the what we call, "Mojhans", the members of the human race who endeavor to take the first steps. When you see the Apollo people will go to the Moon, or back to Moon in two years, is exactly what you've done in past 4 months. You're one of them. It's getting out to see what is there, what it will be, what they might be, what experiences are, that the next generation can open the door, that we get more people and somehow, over the next half a century, man with a dream of NASA might make a base with a few people, as we've done with the what we call, the space station.

But the interesting point is, as we test it, we have now, delivering the new systems. The life will change. The life will change for many of you, and has changed for many of you from today. I'll explain to you in a step by step, as you all been with us, and you came across the line with us. And you worked with us. In a way, us, as the Keshe Foundation, some in the front, some in the back. Some people we know, some people we don't. (:12). But we take the knowledge and we make the best of it, what we can do.

One of the biggest problem with going to space, as I explained in the last session, is understanding that, the energy we are used to, is the energy of the Earth. That 20% food which we consume. To become man of space, we have to understand the energy of the Cosmos. Because otherwise, we'll die.

In space, we don't need that 20% energy anymore. Because we do not know which part of this universe we are citizens of. And what is the need in that point. So the feeding of 80%, understanding how that 80% receives his food, become paramount for the man, if he is going to jump out of that flight suits that the Americans have created for the astronauts, and the Russians, and the Chinese are hoping to do.

This week, we have reached out to the what we call, Israeli scientists to join us in this endeavor. We'll wait, and we'll see the response. We need a lot of them, the Russians, the Chinese, the Iranians, the Israelis, the Americans, the Brazilians, and the rest of us in Europe, that we collectively cross this line. The feeding of that 80%, understanding that if you can make the 80%, and you know how to manipulate it, you can get the other 20% from cosmos too. If you stay within the body of the man.

In a teaching of last couple of weeks, (:14). I refer to this because as I said, we become universal passengers. We need to understand the cosmos. We need to understand how the rays of the Creator transfers across the universe, what we call, cosmic rays. These are God's rays. These are the rays from the source, from the Creator. That through division and interactions are what I call, travel the span of the U. Somewhere down the line, this will create another Sun, these cosmic rays, and then with it we'll see life, and we'll see the love of Creator within that star and the Solar System which they create.

So when we speak about cosmic rays, we speak about the rays of the Creator. What their motion has lead to creation of our Solar System and others, and will lead to creation of others, and other lives in the future. Then we have to respect and understand the Totality of the knowledge, when we call it a cosmic ray. When we create the rays, which can match the rays of the Creator. This is what cosmic rays are. This is what life to me as a scientist is.

We saw the birds fly, we made aircrafts. We saw the brain of the man and we made computers to match it. Now we understand the process of creation. And we attempt to create the lights, the rays, the fields, the emotions of the Creator, through the understanding of the man, through the new systems.

Initially, we brought this out to you as enhancement units (EU), where your soul became that star, your soul became that point and the units, and the reactors around it, became the satellites. (:16). In the process of all this understanding, we tried, and we endeavored to push the limitation of the understanding to a further point.

In this process, we have gone a step further. As now we understand, and our team are working, and now have already developed the condition of the creation of the cosmic rays, through the fields of the magnetic field, which is the basis for the fundamental understanding of what we call, Creation.

A new cycle, a new what we call, technology has emerged in the past few weeks. Where, as we said, last week, we have managed, and now we can produce fields, electric current, and power out of the motion of cosmic rays. Which means we have achieved the ultimate goal to be able to produce fields, which is at our, at the strength of the human body. Which means we can feed the man, which means an end to hunger, and end to pharmaceutical. This process will go to a step further.

Gradually, in the coming days and weeks, we introduce new technology, new dimension, new understanding. And with you, as those numbers who became groups, are coming to Austria. Those of you who joined us in one short session with Rick, and then another session with Rick, with many of you online, without you knowing, (:18). we were testing huge technological development. Which we're going to share with you, part of it today, and gradually in the coming weeks. In the process of past weeks, as you were with us, as you came here, as you became Mobile, and whatever to be part of.

We continuously tested things in the background, to understand the process of transferring and understanding the process of the completion of the cosmic rays. With some of you knowing and unknowingly became part of that process. You gave us the information we were looking for. The guy who tasted the mango, we set it up to see exactly how it does. Because I set the system to feed and he got the food. I asked him, try to eat something. We tested this with a lot of other things.

One of the major points which has been for us, one of the major stumbling blocks to release the health technology of the Keshe Foundation, was that we had to rely on what we call, the diagnosis. Diagnosis on the physical dimension (D). In the Keshe Foundation, we don't touch health, we process the life. The health, hospitals, and the rest is the work of what I call, physicians, and what I call, for pharmaceuticals to supply.

We have entered a new dimension. (:20). We have entered, as we have in a very simple way, in the past we explained to those who came in touch with us, the doctors and the scientists. When I gave clear what I call, explanation to Naturopathica, of the Belgium years ago, what this technology means. Maybe now you understand it more.

In the process of any change in the body of the man, be it a cancer, be it an ulcer, be it a heart problem, be it ligaments of your leg, or be it a cell in your brain, all have, and all receive, and all work through the Soul of the Man (STM). The interaction of the STM

with the Soul of the Physicality (STP) of the man, creates the emotion, which that emotion transfers it's what we call, fields, to every part of the body, which has the strength field of absorbing it, receiving it. You'll feel cold, every hair on your body stands. You feel love, it shakes every cell in your body, that it feels love. You feel hunger, every cell feels it, and it's shared by the STP and the STM. In this process, we have come to the point that now we understand, and we have tested through the Enhancement Unit, and all of you who came to us in the past few months, and those who we work with. (:22). The process of completed.

One of the main problems, or one of the last hurdles, or last understanding that our technology is perfect, was that, you came to us saying you have Parkinson's. You came to us saying, that you had Alzheimer's. You came to us you had a brain tumor. You came to us having cancer, or whatever. The solution sits within the STM. The solution sits within the strengthening, the expansion of the STM. As I said, it's no use repairing a car all the time after accident, when you have not changed the brake.

The whole structure and the work of the Keshe Foundation in past few months, with you being happy to go to the Moon, with you happy to go to see your uncle, or god knows go somewhere else, was for us to see the path the way our system was setting, and where it's going, and how it goes, and how it sets, and how we can get there.

Interesting, as I said many times, you didn't go to see the uncle most of the time, or you didn't go till we instructed you. You were waiting for the instruction, which plane to catch. So, it became clear for us, that the technology we developed was 100% Correct. We could reach, we could in a way, set the path. Not dictate but create condition of. And one of the major problems with the whole of the work of the Keshe Foundation, (:24). has been to pinpoint diagnosis.

As I said, if you are doctors and you work with us, in any country, usually the patients come with a blood test, blood pressure, size of the cell, everything else, but the truth about the construction of the man. In a way, they show you the damaged car, but they don't show you where the fault is, that this damage you see on the paper sits.

We introduced the condition of a new type of blood tests for the doctors who work with us. We ask for the elements of the body of the man, which means the copper, zinc, the Nitrogen. Interaction of the ?? and how they interact, where they interact, leads to the blood results the doctor gave you. This is what the world of medicine have not understood.

But now we go one step further, the composition of these elements in the blood report of the Zinc, and the copper, and whatever, is dictated by the interaction of the Soul, with its environment, with its spirit, or the STP. So, up to now, we brought you, the doctors and the people who work with us understood, that now we work with what we call, what led to the car crash. But for pastimes, we worked with what was the principal. (:26). Now we gone to see who actually made the brakes, that was faulty, that led to the accident, that then you get the repairs.

Now, we have seen strange achievements with just that elements. Now going to the what I call, the guy who made it, and led to the creation and work of that brake, which in his component have the zinc, and the copper, and the rest, which led to the accident, has become the target. This is where we call working with the soul, the essence of the Creation of the physicality of the man. We could not work with that side, if we would not understand how it's fed, who was supplying it. Where does its energy come from, where does materials come from? What kind of material reaches it, that in interaction with the spirit of the man, creates that elements, which creates that blood ??

The missing part for us was to create that field, that source of energy, we call, the cosmic rays, that feeds the soul. That in interaction with the spirit and M field of earth lead to creation of the elements, which their interaction leads to the creation of the blood, and the man.

In a way, as I always said, physics starts with magnetic fields, the interaction of the fields creates what we call, the world of plasma. And then interaction of the plasma leads to creation of physics, which is the elements and the interaction of the elements gives us chemistry. And the interaction of the chemistry, which gave us a blood, gives us the physicality of the Man, which is the matter state, which is us.

So, we had to bring you in past 10 to 20 years, to get to the source, where the cosmic rays are, how they come, and how much the Soul gets. Go back to my teachings, for past decade, I always said, we have to come to the point, that to feed the Soul, that the Soul feeds the physicality, that man shall not kill, not only himself by psychosomatic conditions of the cancer from a prostate cancer, to God knows every other thing.

So, the whole structure of completion was to achieve the cosmic ray, that we can feed the Soul, and now we have achieved it. Now that we have translated it into the energy fields in the MaGrav condition of the fields of the universe, man is free.

How this is going to build us. How this is going to touch humanity in the coming time, all depends from today onwards. I explained to you why is from today onwards. We have built the what we call, the Head Units, to create condition of feeling the what we call, the Soul. (:30). And in that process we have come to the point, that we can replicate the source of essence of the creation of cosmic rays, and a power system that can maintain it. Which means, we will, and we shall, what we call, continue with expansion of the fields to the STM.

With the new technology, as of today, the process of feeding the man, the process of helping the man with his needs on the, what we call, level of the physicality, becomes simple. We have built the systems, and we have seen the production of the Gans's, and the gases, and the cosmic rays, as I call, that white bright light.

Now we reach a pivotal point, we will change from today the history of the man. You will understand why. We have parallels, and we understand this fully, because it's a

working parallel. Today we have opened computer centers, we have opened service centers, where we go to, as a Google, or something else, to get knowledge, to get access, to get information. (:32). In a way we have created farms of, what we call, information banks. But none of us knows where they are. Nobody has or can access them, except you have the access code. They can be anywhere on this planet. Some of us we call it, the cloud. Some of us we call it, hard servers and server houses. But in fact they're there, and we can reach them at any time.

With what we have gathered today, with the knowledge we have, and what we've done, we create, what we call, "cosmic centers," where it will be like the hospitals, it will be like the supermarkets, and it'll be like many other things, which the man needs. Which means you can tap into it and receive energies, which are needed by the Soul to feed the Physicality anywhere on this planet. What we call, "wellness farm centers will become a reality in a very rapid way. You tap into and you get diagnosed, what you call, in the past few minutes. You tap into and you receive the energy and information, which will change a given a specific fields, in the Soul strength, that will change the STP and the Physicality. (:34).

The biggest problem, it will be the transition time. How we go and reverse the cancers through the Soul. How we go and reverse the Alzheimer's, the Parkinson's. Then we bring in, what I call, balance. We come to the point, that once we get to the balancing point by going to this, what we call, cosmic centers, through the phone line, through Satellites, or whatever. On a regular basis, as we get fed for what is short, there'll be no more diseases for us to cure, for us to process. Because we, what we call, we take the disease out of its source at the point of the Soul.

When you are not happy with your son, which leads to the cancer of your prostate, 7, 10 years, 20 years down the line, by receiving the love which you wanted, by the energy you required, that the son does not give you, never create that cancer. So, pre-empting or, in a way, creating condition of balancing over a time, will get rid of the disease of the man. All what we know will not be there, prevention by feeding will stop the catching and creating the diseases of the future. (:36).

In a way, prevention by allowing thus, what we call, the cosmic centers will allow man to tap into at any time. The beauty of it is that, no pharmaceutical can lock it up. No government can stop you receiving food. No government can block you from gas and electricity. As Keshe Foundation technology becomes a process of a free access to all. Nobody can sell you a better version, a luxury version, and God knows, a poor version. We all get access to the same energies as we are fed through our Soul.

With this process, man will become independent of the Earth and allows us to become the passengers of the Universe, because in progressive development and understanding of the technology, we tap into the universal cosmic rays from the source, the Moon strength, the Mars strength, another galaxy strength. It'll be instantaneous, as many of you have tasted and tested in the Enhancement Centers, you went to the Moon, you didn't wait for three days, four days, for the rocket to take you, you're instantly there.

The new, what I call, MaGrav Cosmic Centers for man, will come into operation in next 24 hours, 48 hours, the first units we already have in Linz. Our team are just putting the last touches to it. As I said to them this morning, give me the good news, that you achieved what the target was, (:38). then you can put it out and we can show it.

In a way we have achieved, now we can miniaturize it to millimeters, embed it even in the body of the man, that if you are somewhere out of the reach of your cosmic, what we call, farm, you feed yourself. You hold it in your hand and you possess what you need. You carry it within the structure of your body, it's everywhere in the Universe to feed you. You will never go short of energies or, what we call, human hunger. The cornerstone of this is set. We are going through tests. We need to test more, and we develop this technology in a very rapidly way.

In so many ways, what you were thinking, and what we asked you for remote and Mobile transmutation and everything else, we have been testing in the background with a number of people on the health, and on the food, and on the connection exactly where we want, to diagnose without the present man knowledge of diagnosis, we diagnose the essence of the emotion. We diagnose the, where the Soul with the Soul of Physicality have come to a misunderstanding or creation of cancer.

You've been waiting to become the Mobile people to transmute. We have been testing the Mobile systems on real cases, diagnostic, (:40). delivery, extended of it, and seeing how it changes. We see people walk into unit, bent over, and walk out different. If you do it three or four times, which every cell has time to repair, you will see no, what we call, mis-physicality.

One of the biggest completion for us was diagnosis. Now, the process is developed, and it can be diagnosed. In a way we don't look at your physical shaking, as am Epileptic, we don't look at you for getting as Alzheimer's, we don't look at you with cancer in your prostate. We look, we feed where in the brain we see the problem. You call it a pain, I have a pain in my head. You call it a pain, I feel heat in my brain. It wasn't there till we introduced it, till we interacted with it and it was diagnosed, this is what it is, that's where the damage is, that's where the repair comes from. Then this will create the emotions, how to handle it, how these emotions will come to be complete.

It's very interesting to see how in the coming time Knowledge Seekers will go through. You remember four or five months ago, we came to you and we asked you to come to Linz, to perfect the system. (:42). Thank you for all of you who came, the system is complete. But that was for transmutation. Now the Keshe Foundation as of today, is ready to complete the process of processing your conditions.

What does this mean? You came to Linz to see what you can dream, where you can go, and teach us, and for us to learn, which part of the technology we developed is perfect. We started with three chairs, we went to one unit, two units, and two more new units, and two more other units are getting developed on the back of what you brought us, and our

people could build. Now we come to you in a different way. We are putting it to you in a very, very simple way.

We are looking for those of you who have cancer of prostate. We are looking for those of you who suffers from Epileptic attack. We are looking for those of you who suffer from MS. We are looking for you who suffer from ILS (means ALS). We are looking for those of you who suffer from, what we call, ADHD, Fibromyalgia. We are looking for those of you who have and you come to suffer from what we call, (:44). a specific syndrome through the lack of oxygen at the point of birth, which affects the brain of the children, ??. We are looking for those of you who have come to us asking how we can help with the process of, what we call, depression.

The Keshe Foundation processing team doctors are ready to handle from today. Go back to the conditions which I explained. We are not handling pharmaceuticals. We are putting you in touch with the doctors, who through understanding of the process of Keshe Foundation technology will be able to process these things back. Keshe Foundation does not go into health business, as we are a knowledgeable processing system, which means we do not come across pharmaceutical. We've got nothing to do, as we don't touch.

We go through the process of the energy of the Creation. Those of you, as I explained, listen to them, get in touch with us today. As last time many of you came to Linz to go through the process, we don't need you to move from your home. The changes will be brought to you, in your chairs, in your beds, in your homes. The Mobile, what I call, cosmic ray process will start from next week. (:46).

The way you came to us to help us to develop, to understand, to confirm the process of the manufacturing our system. Now, the Mobile, what I call, processing of the conditions through the work of the Foundation, is at reach of everyone of you. As I said to a mother yesterday, you do not need to travel from Brazil. As I said to another man, you do not need to come from Texas. And I said to another person, you don't need to leave China. The technology is complete that you can get processed by the farms, nobody knows where the systems are, and you receive the help.

We have 20 spaces available for next week. The way you came to us to test, send your request directly to health@spaceshipinstitute.org. You can do it now. We have conditions you have to meet. We go through your process, and then from then on we'll see how we can do, and we'll bring you in next week.

Just one second, please.
Sorry about the, you cannot stop the postman.
Just one second, please. (:48).

R: Just as a reminder, here's the email address that Mr. Keshe was talking about, health@spaceshipinstitute.org.

K- We have just received the message that, one of members of Universal Council, due to an accident has passed away. Dor Naim as a member of Hebrew Universal Council, (:50). we just have been informed, has passed away due to an accident yesterday, and this brings us sadness. His funeral is this afternoon at 3:30. I worked in the background with him in the understanding of working with the Israeli Government to bring peace to Middle East. We wish for the elevation of his Soul, and I'm sure he has achieved what he came here. A beautiful man.

Universal Council members are the connection between the man, and Universal Community and the Creator. (:52). He did everything possible to bring understanding to the Israeli Government about the technology and the things it could do. Yesterday morning, in my communication with the Israeli connections of our, what we call, structure with the new government by the turning of Netanyahu back into power to start dialogue. He was supposed to establish the first lines of the talk between Keshe Foundation and the Israeli government. There's always a reason. And I hope, he still keeps his line of connection to bring what was his wish, in the direction of physicality to the nation of Israel.

I would like to go for a silence. Then we come back.

(Silence :56)

The strangest thing is, that yesterday morning at about 10 o'clock, talking to the Israeli officials and our go between, (:58). Naim was supposed to start meeting with the Israelis in Tel Aviv to lay down the transfer of technology in the space level to the Israeli scientists. That we could bring the Iranians and Israelis to work together in the space, the new space era.

I'm sure after the teaching when I inform the negotiating go between, of this, will bring us a lot of what we call, re-organization to see where we can go, how we can do. He was a military man who became suddenly devoted to peace. He was to spearhead the peace negotiations. Transfer of technology and the ethos of Keshe Foundation to what we call, his nation.

Sorry to hear him passing and I hope he finds peace and elevation in all levels. (1:00). He was working very close to do things, to bring that change. Thank you very much, I hope he receives all the blessings. He has a very young family. Can we go for a break and come back? Just put one of the small teachings about the Soul and come back.

<< BREAK 1 >> 459 KSW (1:10).

K- Yes, sorry about that. Thank you very much, Rick. My condolences to the whole of the Keshe Foundation family, and I'm sure we'll find somewhere for peace, and to understand, and let's see what comes, and what brings, we go to the next step. And why this has happening now? ..

There is a reason for it. And I'm sure, somewhere down the line, we'll see, you'll understand, (1:12). and we'll come to comprehend why it had to happen this, yesterday.

Going back to the teaching. As I said, we have now achieved a position to do the whole of the operation of the processing through remote. We need to do this and to understand the Totality of it, that as we are completing the transmutation systems, we can make any adjustments or anything that it might need to be added to the systems before they are literally completed and going to operation.

What does this mean is that, those of you who understand the process, you can join us, the link is given above to join the process, it will go to the team of doctors, they look at it and they see if the case is approval for them, then we start the process. Everything is ready for, to start next week, the first part of it. So, we just received a couple of people sending emails and making, what you call it, inquiries, which will go to the doctors, and then they will decide, and you will be contacted in next few days, that we can start the process like we did with the others on Tuesdays and Wednesdays, and see as we succeeded in the completion of the flight system. We complete the, what we call, the processing side, (1:14). and then we can go to the next step.

That when we go for, what we call, the space test early next year, will be complete, will be completely there to, what we call, have a complete process of transmutation. Not only the physicality, the process of the feed, and the process of, what we call, being able to correct and adjust everything which needed.

The most important thing for the whole adding this together is that, we have a full comprehensive flight system. As I said always, while you're in that process as we tested with some, many of you have been there, understand the process, and for us completes the next step.

With this process of, what we call, the working of the body of the man, the physical condition, and understanding what will change and how it will change, will give us an opportunity to understand how others change in interaction with us. What effect we have on the environment we live in. What we change, what we need to change to receive the other 20%, that we shall not do what we've done up to now.

Mankind is ready for that change, and we are there to learn, and support it, and go further. We learned a lot from your visits, and on your support with the EU. Now in next four or five weeks, (1:16). through this process we complete, adjust all our systems, that the new systems are, what we call, a cosmic system.

You made the MaGravs, and I kept on explaining many times, don't look at the physicality of it, look at the fields they create. If you remember, Jon showed how you walked amongst them, and how they could turn up their fluorescent light tubes in some of their tests, and how they could measure the fields distance away from the collection of MaGravs.

Now with the achieving, what we call, the Gans's and Cosmic Rays, you can see the whole thing complete, the whole structure complete. Producing a cosmic MaGravs System, which creates that field dimension, was the ultimate goal of teaching and everything else. Bringing the Gans, the emotion of the Gans, the fields of the Gans's, is in conjunction with the power generation system, which creates.

This is how the stars work. They create their own energy, they create the combination of interaction of the fields, and with it they create a M field, which the interaction of M field leads back to the generation of the energy, which is a, what we call, a self-sustaining condition. This is how planetary work, how the stars work, our solar systems work.

Now we have achieved it, the systems are complete, and they are going through the test. In that process, we see more changes. The new in EU, as I said, you feel the strength of the Cosmic Rays (CR), the fields of, what we call, the magnetic fields. You'll feel it when you enter the zone, when you enter the system. (1:18). Because now the two systems are built, they are next to each other, they are getting fitted. The, what we call, the energy units have already been built in, and we feel it.

With the Creation of cosmic rays, and now adding up the energy unit, they become independent, we don't need to charge them, because they receive the fields they need from the system themselves, and they create that as they need. The new Enhancement Unit MaGrav, what we call, Cosmic Rays, you'll see, you'll feel the light, you'll feel the energies. This is the energy which we were short of. This is what we grab from bits from our Soul, what we call, through the dimension of our Soul, the central energy of our body, from the Cosmos.

Now we don't need to grab, it's there, we take what we need, and this allows no deviation, doesn't allow any fault, doesn't allow the process of, what we call, Soul of the Physicality (STP), or what we call, the spirit, or what we call, the interaction of the blood field flows in the body to be short of.

Then we do not see diseases. We do not see anything else, because everything is fed and it's balanced. We saw this when we had the people in the flight test. When you ask them to go to a place, if it's in balance and we put a partner on the other side, they feel each other. We've seen, as one partner explained, sitting on the lap of the other. We've seen when one partner in one system shakes with the legs, the other partner shakes in the other system as a passenger, the same emotions as the other partner is on the lap. (1:20).

Now, this is a lot of things which is added up to the completion of the system today. So, we have come to understand through the process of the MaGrav system, through the process of the Gans system, through the process of everything else, the creation of Cosmic Rays, which is the backbone, is that 80% energy which is missing, and the lack of it leads to all sorts of defects in the condition of physicality, as it goes through the brain of the man, as it cannot be fed. So, in Totality, now, the systems are more or less complete.

We are, and most probably, we can completely go through the process of the new "Tokomak" system. What it means, what was hoping to be a cold fusion to lead to energy production. What was hoping to be the new fusion centers to create that energy fields that you can tap into, now we can do in a simple system, with, what we call, "Cosmic Systems," which we have developed.

They can be as small as a battery, they can fit into anything as we dimension it. It can be as big as a gas cylinder. But you create now energy at the point of need and for permanent. These systems do not run out of energy, unless there's a leak or some misbalance. You can set them, that they work. You can set them, that they create energy from interaction of their own fields, and you create the condition for the fields to interact the way you want. (1:22).

This will change a lot of things. I was hoping that we could show the systems today, our team has a little bit more to do. We most probably will show you the first, what we call, "Cosmic Plasma MaGrav Systems" in a matter of days. Maybe even if they complete today, we might show you tomorrow. It's not completing it, it's just, what you call, testing it, because they already achieved. They already achieved the micro amps and voltage. We have achieved condition of the, what we call, creation of cosmic rays.

This is the final system, or beginning of a new systems, that is the new generators. It's what we came here originally for. We had to feed the MaGrav systems with the current, that they could work. Now, the current from the process, they create their own, with the Gans's, creates that process, what we call, perpetual production of energy, and depends on where we want to tap into it, and how we want to tap into it.

As I said a couple of years ago, the Enhancement Unit (EU) will be self-sufficient, which means they will not have any connection. Now we have achieved that point. That process can be miniaturized to micro, and mille-watts, to megawatts and whatever is needed.

We saw the preparation of this in Sanya (China). The same process in a different structure was tested in Sanya. It was done, it was built and it was tested for that time for us to see its work, (1:24). and how it will. How it released massive amount of energy, that lead to the, what we call, damages in Sonya, to a lot of things. But now we have managed to control it, it's a controlled way, it's done in a beautiful way. I saw Chan Ling, he is here, he was here a few minutes ago and he's gone. Chan Ling was one of the guys who built the physical structure of these, what we call, energy units in China for us. He was here, I just saw him a few minutes ago.

But, what we build in China compared to what we have now, it's a dinosaur of that time. The technology has moved forward quite a lot. Now we can create, and we can deliver a complete system, which is energy production, self-sufficient to produce that elusive, what we call, Cosmic Rays, the background fields that all of our creation, all of our life depends on it. The new, what we call, structure, the new Enhancement Units have already got this built in it, they are actually physically this, what you call it, Cosmic Plasma Units, are already built in. So, we've seen it, it's not something to be done.

In a way, what you saw as the Gas Production unit, and what you saw as the (Plasma) Energy Power units, some weeks ago, we showed live, has moved to the next step, to a higher order, to a higher understanding, totally different in a way, but part of the same knowledge. (1:26). The MaGrav systems, which we many times explained to you, to look at the fields of it, and not the, what we call, physical system of it, we had to connect it to a power supply, that it could bring that cycle of release of plasma. Now through the Cosmic Ray production generation, we have created that power source, that we don't need to plug in anymore. This has changed the game, and it's a beautiful system.

Hopefully, if we can show it in the coming days, you will see it at its work. It is tested, pre-tested in another laboratory of the Keshe Foundation in past two or three months. This one here is an accumulation of more understanding of what we tested in another position. So different parts of the research has come together, and we can deliver the, what we call, Cosmic Ray System, which…

In a way, if I can go back, as I was explaining to our people earlier on today, if you remember, and many of you, you sat in those, what we call, headphones, what you call, like Head Units. The Head Units stand free. If now we place the, what we call, the Cosmic Systems, to the foot of this unit, the Head unit, you walk in now directly into a total new environment, and into, what we call, a Cosmic field environment, which this will change everything else. (1:28). Where now you only interact with, what we call, the Head units, when you go in it, as you've seen the pictures of the units from Linz.

Now we're allowing the, what we call, the Cosmic Rays, Cosmic Units to come into operation and interact with the Head unit. This will allow us to deliver a complete, what we call, environment. The phase will be very rapid, because it's instantaneous. We can achieve everything, which we really wanted in a matter of seconds, not waiting that you might enter that zone of, what I call, the bubble. We pre-create the bubble, and we allow the next phase to come in, and what it is needed to be done, that we can reach the position of the rapid transmutation.

We need this bubble, then waiting for you to create it by the work of the Head units. Now we preempt it, it is already there, it's already set and allows us to go in. The Jalal team was trying to create a remote power supply. This will be that remote power supply and will allow us to extend to the next step of the research and development. It will change a lot of things in the production for creation of the, what we call, flight system. For Body Enhancement Units, the whole thing with this will go ahead in a much faster way. We

can achieve what we could not imagine, (1:30). maybe another two or three years with this development, it's just been brought forward.

We can develop this to become the next step for zones where you can walk in with diseases and walk out without diseases. You can walk in hungry, and you walk out fulfilled. This new, what we call, MaGrav Cosmic units will bring us a new dimension of operation and completion of the work.

What it will do, it allows the transmutation, it allows the transportation, and it allows the, what I call, the process of understanding for the whole cycle in a much faster way. We don't wait for your Soul to expand, the way you could see the bubble. It's already there, you walk into it, and you interact immediately, and you can become part of it. You will create that condition of, what we call, transmutation instantaneously, because you're already in it, you're already part of it.

This will allow us to bring forward a much, much needed, what we call, speeding of the technology to come out. This allows us to bring in the farming, what we call, the "Enhancement Unit farms," or we can, even like in Arizona, anywhere in the world place these, and any of you can join in, into it. (1:32). It will change a lot of the work which Keshe Foundation has done, and it will bring in a lot of new dimensions of work, which you Knowledge Seekers, in a coming time, will bring forward.

We always given you the first step and you have built on it. Now we bring you the whole understanding, a new way, and more or less what you saw in the system, these Head units with, what we call, the Cosmic MaGrav units in the base of it will become an independent unit, you can… This development of the Cosmic Rays through the work of the Enhancement Unit, through the work of the understanding of the MaGrav technology in a plasma state, not in a matter state, allows us to even have these at home.

These units you go in, you sit in, you're fed. You go in, you want to go somewhere, you're there. You go in, you feel sick, it's there. I can envisage this to be, now it has become a practical unit to be. But in the EU which we are building, that, it brings a dimension of protection, which here you don't have, you need to you need to be protected in a different way, and establishment of the big Enhancement Unit, it's necessary for what we are doing for protecting, and everything else. With this as a household unit, you can do everything with it.

In a way, you don't have to worry what will happen with the electricity. Would there be a food? What happened, can I afford the health cost? (1:34). This will change the pharmaceutical world. Would the pharmaceutical exist with this technology rapidly goes.

As I said, we set out to create, to bring huge amount of finances, that we could make the technology reachable by everyone. We got cheated. We lost a lot of money, we found out this week. It stepped us back.

In that process now, once we secure the technology completely, the way we did with the MaGrav system, we'll teach you freely across the world. This is the property of humanity and not the Keshe Foundation, we are the developers of it. The way we taught you to do the MaGravs, the way we taught everything else. Now we planned a lot of things, that once we get to this point we can give you everything, but now we lost millions, .. everything. We accepted this week, that whatever we invested in the past year, we have been cheated out of.

Now we go back to the same way, we bring this in, to be taught internationally freely. That from China, to Brazil, to United States, to Iran, to Africa, anybody can build these systems, can feed themselves, can have the medical application available to them, can have, what we call, transmutation to them. A man in Africa will not be confined to the jungles of Africa, or the jungles of Brazil. He can come to the west, he can be there, the governments have no restriction on it.

We will go through this, we will… Once completed in next few weeks, we'll put a green, what we call, the Blueprint Day, and we'll teach you how to do it. Because I came with nothing, I go with nothing, I have no claim over anything. But the knowledge is there to be given. (1:36). We taught you a step by step how to make the Gans's, how to make the MaGravs, how to make everything else. Now this is the next step.

I've been waiting for this for 40 years, and now it's completed. Maybe we lost what we lost. (We were) trusting another Knowledge Seekers to bring us to a point, we got cheated by, and everything else. This way, at least it brought us this waiting of a year, to the position that we can deliver, we developed it, and together we brought it to where it is.

In a way, if you learned how to make a car, you can make a car anywhere. Once we complete, as I said to all of you, the way you supported us with the testing past four or five months, support us, and we have a lot of things to do from next week to come in for processing of your whatever conditions, which I explained at the beginning. We need, we specifically asked and specified certain conditions that our doctors can process. Because this will complete the part of what we want to do, with the completion of this, what we call, transmutation system.

Go through the list. Get in touch with the Keshe Foundation, and our doctors will come back to you, explain the conditions, what needs to be done, whatever. Like the other time, we bring you. You don't need to come to Linz, we come to you. We tested this with the headphones with a lot of you in past two or three months in couple of tests. But this time instead of doing the transmutation, (1:38). we bring you the, what we call, direct Mobile system into your homes.

We have tested it, both for diagnosis and for processing, and it works, it works beautifully. We can literally pinpoint where the Soul interacts with the Soul of the Physicality, where the emotion is, you feel that emotion. It's not us telling you, you tell us where you felt it. Then you'll see the change, and then you'll see the, what we call, the

processing. Then you come to understand how much we have gone forward. How much we have, what we call, moved on. How much the technology has moved forward.

You registered to support us with the, what we call, the flight system, now register yourself. You have any kind of condition. We are not curing, our doctors understand the process of the field transmutation and transportation, and they will help with the help of the, what we call, new technology to bring that change .. Parkinson, Epilepsy, CVS, clinical fatigue, FMS, Fibromyalgia, children with a brain damage defect during the birth. (1:40). You have a handicapped child, our doctors will ??.

These are not going to be free, it's cost a lot of time and money for us to get these things sorted. So, we have to recuperate our costs, and it will be put in that way. The way you paid for flight unit, you have to pay for these things too. When it's completed, then as part of what we developed, we share. You suffer from prostate cancer. Prostate cancer is very important for us, because we have a target for it, we have to understand, we are 100% correct in processing it with our doctors. You suffer from depression, our doctors would like to understand and then they process the whole thing. You suffer from anything else. Maybe there are conditions we are not aware of, our doctors will look at it.

We are not, as Keshe Foundation, in the health game. As Keshe Foundation we are in the space program. A space program is complete when all needs of the man are met. Not just getting him there, feeding him, looking after his condition, his health, looking after him to be fit. Other part of the exercises which will come to you, is how to keep you fit in space. How to be ready for the next step.

It's no use you landing on Earth like a zombie. You have to be in a condition that your Soul and the Soul of Physicality accept to be in this condition to be ?? healthy, to be to be part of the society, (1:42). not to appear as a handicap to be a sucker on the society. The whole structure has to be correct. It has to be.

If you come in with, say, I got, I can do part of the financial thing, we try to find another part, but the costs of the Keshe Foundation has to be met. We've been there, we always supported, we support where we can. But we are ready to accept through our doctors, from next week, the conditions which they see fit to process. As I said, health@spaceshipinstitute.org is been opened, send your request.

Don't tell us I have a brother, I have a sister. They have to understand what they're doing. You have to be able to, just not to bring them, and then you can't drag them in, because it will work. Because mentally they are not set for it, they will not accept it, and you'll say, it doesn't work. Bring or come into the condition that it brings that position. Then we, as I said, we'll put you on through the doctors. The doctors could be, as we said, everything which ??. You could be going to Germany, you could be going to Italy, we can send you to United States, or to Brazil, where we will place these, what we call, Enhancement farms. It makes it easier for us to do, and it makes it easier for more people to reach.

As usual, at the beginning it looks and is expensive, (1:44). but when it goes and develops, the structure will become more common, then it becomes easier to do. Have a look how much it costs the Americans to put this rocket into space yesterday, estimated 30 billion. Many of you Knowledge Seekers went to the Moon, went to the other places, you felt the sand, you walked on the sand, you went to see what NASA cannot take it to, your grandmother, your mother who passed years ago. And you contributed 1,000 or 2,000 Euros, we learned from it, now the other people are in you're going to enjoy it.

You went to the Moon on the cheap side. You felt it, not somebody else. You met the mother, NASA has not reached that point yet. They're hoping still to get physicality, or one or two to the Moon. Many of you through the space instantaneously, many of you felt the warmth, the cuddle of the mother, and the father, and the friends which you lost, and the ones who were far you could not reach. Now we're going to the next step.

If in the space, you run out of food in 2025, with NASA flight, or the fuel tank goes something wrong, you're not coming back, because we did not calculate the loss of food, we did not calculate the loss of fuel. With this technology, you go fed, because you are the center you absorb the energies of the Universe.

So with the new Enhancement Unit, with the new system, which we have brought out, we move to the next step. (1:46). We move to the direction of correct conduct to be. You suffer from any condition that, don't tell us, I have a headache or a pain, because, sorry, at the moment we are "out of aspirin system." With the conditions which is a challenge for us, what we understand that we can extend the work for the next generation.

We are interested to expand the technology. We are interested to bring the technology to the next level. As we always done with you, you have to feed us back, to be able to do. Bring forward the knowledge, which we need to learn with your conditions. Then we move forward to bring that next step in.

It doesn't mean that we can process everything the first time, and it doesn't mean that it will be 100% successful. But if we can bring small changes, or many changes, then we can understand there is a next step we can do. Join, the Keshe Foundation we'll put it on as a prevention unit. You come in, we set you up for prevention, which means you most probably take three to six sessions in the system, remote, you don't need to be in Austria, (1:48). and it prevents you from the future problems.

In a way we give an insurance policy. If you come up with a condition in five years, in ten years time, you come back to the system. The "prevention package," which we'll put out, is, what we call, "universal insurance policy." It’s not the cheap way out of it. But it's a way that you come to us healthy, we try to keep you, maybe we might even want you once a year, to the system to adjust, in a way strengthen the Soul of you, till the Universal systems are everywhere. That in a way we offer you insurance policy for, what we call, processing of your well being.

In the next 24 or 48 hours, our team will put these on the Keshe Foundation website. We are not selling insurance policy, we just put the sources. You can come in every few months, I would like to use one hour, or one session, just to top up, just to gather energy, and for next 10 or 20 years, once or twice a year and you do that.

This means preventing a lot of things. You suffer from the pain of the, what it call, "betrayal of the husband or the wife," instead of ending up with a cancer, or you cannot handle the son, you end up with a cancer. You top it up. It didn't happen two years ago, it happen today. Why should we get a cancer in five years down the line? You understand, gradually the implication and application of this technology. What it means, what it will bring, and how it prevents the future problems. How it will bring the future forward. (1:50).

Go at the Keshe Foundation website, the way you supported us, hundreds of you, with the test flight, this time it's for you. We don't give any kind of guarantees, there are doctors who will go through it. They will assess the process, and we'll see how the next step can be. You don't need to travel halfway around the world anymore. The remote system, Mobile system, now it's tested, it works, and we do our own diagnosis. Then we'll see how the next step will be. Our doctors will take over, and as they're physicians they direct you.

Now go for a break, if you can, and then we'll come back and answer any of your questions. (1:51).

<< BREAK 2 >> 459 KSW (1:58).

Q: .. It's about world population. It was estimated to have exceeded 8 billion in November of 2022. (2:00). It took over 200,000 years of human prehistory and history for the human population to reach 1 billion, and only 219 years more to grow to 8 billion. What is our orientation regarding this event in relation to the Universal Community, and the planet? Thanks for the guidance.

K- Not much. It's in figure, very small to what this planet can support. In reality, it's just another number man has made for himself. What happened, how many ants are on this planet? How many flies are on this on this planet? How many trees are? Do we count their population? They still consume matters, whatever, in their own proportion. We make these figures to feel we are important or we progress. Compared to some of the animals on this planet, we're not even near to their numbers, but they sustain life, they became to live with what the environment in that position gives them.

So, I always look, I know yesterday, I think it was the 15th of November, when was the milestone of passing 8 billion and then they said another 15 years, I think, if I'm correct, we'll get to 9 billion. India is supposed to take over China next year, as the most populous nation. There some years ago, we were about 6, 7 billion. (2:02). They estimated if you stand all the man with the size of their feet. Isle of White, in South of England will fit all of them. What are we going to do with the rest of the population on this planet, ?? left of the space we have on this planet.

When you travel vast fields are still empty, nobody lives in it. We didn't live in them because they couldn't get water, now with the new technology we can have the all resources for life. We'll move into places we could never imagine we live. Central populations now are based by the rivers and water resources from, what we call, sweet water.

With the new technology there is no such a limitation, they can live in space and come to Earth, you go to your office and go back to space. There's no high quality purpose positions anymore, the way we buy a piece of land for millions of dollars. All gone, all gone. And go more, the pharmaceutical business, once we start releasing this technology will go through the floor. The way we seen in past few weeks with Bitcoins and the currencies man tried to make on the Internet, they couldn't have enough gold to make them in the banks. There's not going to be much change, it's just more of us and we always have found how to feed us. We going to feed 1 million, we are 8 billion and we are still feeding. (2:04). Walk in some of the supermarkets in the West, walk in some of the supermarkets in China, walk in some of the supermarkets in around the world, we throw millions of tons of food away, because we have nobody to eat. There's no shortage. They like to make it, because they get more something in their bank account, which I don't know what they do with it.

But essentially, this planet can support another maybe 20 to 40 billion. By that time, as even now started, we become passenger of the Universe, numbers don't count.

R: I was looking at that report, and it actually mentions that the population is starting to level off on the planet. And that, for example, because China's now recording its lowest birth rate in history. And India's just dropped below the replacement rate for its birth rate. That's about over a third of the global population, right there between those two countries. And they're not replacing people at their replacement level birth rates, as most developed countries are in the same situation. In Canada here, if we didn't have immigration, we'd have a negative birth rate.

K- Yeah, but you've got to remember, it's an instinct of survival? I want to have a life, can I afford giving that life to my child, if I can't, I don't create. Most of the humans work that way. I'm a peasant, and I have so much land, and I cannot grow more than what I can feed two children, I don't want to create children. You'll find some Asians, they do. But the majority of common sense people don't do. (2:06). This is how we control our population. .. Meeting the needs of our children, our offspring's. ?? is control.

R: Mr. Keshe, how's it work in countries like Africa who have. They traditionally have had a birth rate of around six and a half children per woman, and now it's down, it's actually decreased a lot. It's like to four and a half or four now. But they have a large families, they have large number of children. Yet apparently they… How do they support that, compared to developing countries …

K- The land does that. .. Africa up to now has a structure that in the West we have changed with Social Security. Children, as you have, are part of a bigger family. So, the whole family becomes responsible for the family, if you understand it.

This is, when we used to work in Gambia years ago. I don't know if I've said this to you or not. I asked my driver, what do you do with the wages we give you? Because it was a complaint from the other companies around us, we pay our .. too good, .. to our staff, the way we did in Ghana, and we run into problem with the government. He said, most of the majority of the money I get from you, goes in the 50 kilo sack of rice. I said, how do you eat 50 kilos in one month? He said, no, when I didn't have a job, for years, other members of my family who worked, they bought rice, whatever they bought, (2:08). We all take a couple months, what we need for a month, then that's what it is, we live.

So it's a family collection. That's how life in Africa is. And most of the families who can't afford any more, they don't have any more children, and what the land can give you. We don't have that system in Europe. In Europe you call it Social Security, go get something from the government to eat. The bigger family looks after in Africa. And they always bring limitations. Now that is connected gradually to monetary values, you'll see less and less children to be born. Because now they have to go to school, now they have to have some clothing, or whatever, and the family strives, I can't afford this, so I don't create the children. Gradually we see the balance.

China one child policy damaged the nation beyond. Psychological damages of the one child policy will show in the coming time, it's not the right way. All the one child families they have to find somebody, to call a brother, to have somebody to know what love is, what they mean, because they didn't have the cycle to love someone. They were left with the grandparents, and the mother and father came once a year. They left to build the nation.

There is a huge problem in that one child family of China. The population has dropped, but we have a huge psychological problems, which is coming up now in the forties, fifties, thirties generation of one child families. We have to reach balance, and somewhere some families will have one, some families will not have one, some families have three, but in a way economical condition are forcing the numbers. (2:10).

What would happen now that we move to the next cycle, once people understand, children of the Soul. Not very easy to be a parents, and live through the children of the Soul. It's much more difficult than children of the physicality, much, much more, much more. It's not difficult, it's more pleasure to be with than spending time away with. When you hold the child of the Soul, it's not a feeling of holding, it's a feeling of touching

emotion, and it's a different things. It's different level of understanding. So, population will dictate now financially, and then in the future the strength of the emotion. Don't worry about it, they can go to about 30 or 40 billion, this planet can still support.

R: And you mentioned before, we're going to need that those numbers of people in order to have the engineers, and scientists, and so on, to support the new plasma technology and to go to space.

K- Look at it this way, you said about the Canada if you haven't have the immigration it would be negative. Go back to the statement of the Canadian government, around early 2000, that the number of engineers, and experts, and technologists, and doctors they received during the Iranian revolution it would've taken the nation 20 years to get these numbers. Immigration to Canada has brought mainly the wealthy and educated, which the other nations have lost. (2:12). We don't see beggars off the plane with a backpack on them begging on the runway, do we? We see them all smart, dressed up and come out. So we have these things.

But, as I said, would the guy work in Canada, and go back and live in, what you call it, Africa for lunch, and come back home. Today I saw, this week I saw a beautiful news from Dr. ??Paravisch, in Dubai, been awarded one of the top, what you call it, awards of the nation for his work in the field of the holistic level. As our doctors move to that level, to become holistic, means to cover all the Soul and physicality.

When the Soul is satisfied, which does not create the illnesses of physicality, do we need the hospitals? I think there's, what they call, holistic, like Dr Paravish are getting recognized, and with the support of technologies like ours, to feed that technologically, will bring a lot of changes. As I said, it was amazing to see an Iranian, now with the situation in Emirates, to be given such an award. It shows knowledge wins over politics, as I said, and that, what we call, it's beautiful to see that these things are achieved. These things are achievable by, what we call, our scientists who understand both dimensions. It is fantastic to see that borders, (2:14). knowledge doesn't know any borders. It is beautiful to see, politic doesn't come into it, science stands on its own. It's an, what we call, achievement on it's own level of what it is, what we call, understanding of this. These are the next levels. When, what we call, understanding of the work of the Soul brings the conditions in to, what we call, improvement in the physical dimension.

Any other question?

Q: .. Can you give us a detailed explanation of the Cosmic Rays, please, in a plasma science understanding? ..

K- Cosmic Rays are the rays, the fields, (2:16). which have not found the matching balance to interact with, or are on the path to reach the fields or environment, that can interact with the field.

In a way, they are like a lover looking for the love they have, to meet, to interact, to create life. In the world of physical creation, we have a man and a woman lead to creation of a child, a life. Cosmic Rays are the rays which are on motion till they come to interaction to lead to a new cycle. Some of it could be fraction of lights, some of it can lead to creation of new condition of life. But they're the energies, they're the magnetic fields in motion, that have not interacted, and are free, and I called, available for the next phase. Become part of your body if yours, of the same strength interaction in the, with the body of the physical matter planet, or whatever, or with another fields that the interaction leads to a fraction of other new fields of the Cosmic Rays, that might lead to creation of the new cycle of life, or a new plasma. They belong to the Cosmos, they're not still have a name tag on them, that they become part of the human body or an entity.

They have a strength which is very much connected in one end to much powerful energy source. (2:18). They're not usually, the Cosmic Rays, a bandwidth, a cut piece. They always have connection to their source, the majority of them. Because once you establish a point of contact, and they go to the point of break, and division, they start a new cycle, so they always have. It's like when we look at a star, it's always that light which comes to us, it's always connected to that star, to that point. They always have a point of reference, we can find out where that point of reference is. And if you can travel at the strength of, of what I call, rivers of these fields, we can end up in most beautiful places in the Universe. But it's instantaneous, this is what most of you done in the EU. You instantaneously go somewhere.

Any other question?

Q: Dean .. Mr. Keshe, I'd like to first of all, celebrate and give to Dor's beautiful life. Condolences to his family and thank him for all the beauty that he's brought forward, and his wonderful Soul that is out, it's now present in a condition where he can bring about the change, can connect and be the beauty that he is, or was in this moment. (2:20).

Mr. Keshe, how does it change or bring about a condition when situations and conditions take a life, however it's taken? Is there a ramifications, does this affect further on down the chain of the Soul? How does the Souls involves?

K- It's a maturity, it's a maturity, it's a point of cut. When we die natural death, we call it, the end. Everything is prepared for it, all the cells deliver their energy, all the Souls of the cells deliver their energy to where it's supposed to go.

In a way, when you die a natural death it's just like when you, you know when you are traveling, traditionally you go from, let's say, England to America, family comes, each one gives a gift, or something to take with you, you're going there you're not coming back, to remember us. The Soul of the Physicality at the strength of the Soul of the Man, they give all their energy as a gift to the Soul to move on. Then you still have the Soul, the physical Soul of the body, which stays behind.

But what we call, at the point of death, the Soul of physicality becomes part of the Soul of the Man. It delivers whatever it carries. Then you have the Soul of physical cells which stay behind, the physical body of the man.

It's progressive, it's like, we know you're going, we give you everything, gradually ready to go, and it comes to the point of tipping point. I cannot hold on anymore, you close your eyes, the field goes. That's all we do in the machines (EU). (2:22). Your Soul strength ?? begins ?? the Soul of the physicality.

At the point of accident that cuts off. The Soul has not reached maturity, and STP does not deliver everything which he has. If the STP is much stronger in a field, than the STM, the STP sometimes remains till it gives that energy to the Soul. Separation is too fast. We see this, we call it, ghosts. It's the STP has not completed its transition. We have it till it just delivers, till they find, it's like become like a twin star, the other one has to match up whatever is to be given. It cannot go anywhere till it's done.

This process is… not much you can do, we sometimes, we can give from our Soul to the STP to get that bridge, to get that match up with the Soul. There are a lot of things we can explain what happens, physically you say, you see ghosts, you see shadows, whatever. These are this, what we call, the Spirit, the STP, which has not delivered totality what was supposed to be delivered to the STM for its elevation, for its move. What I call, it wasn't a smooth handle, something was left behind. The Soul travels. The Souls finds his position according to their strength, where it should be. (2:24) It might have been another 20 years, it would have gathered more. It would be in a different position.

Q: So Mr. Keshe, was Dor Soul aware of this, was his STP aware?

K- There are different ways of life. STP bring us to a position of the handover, or the physicality moves, that other things create that condition of the separation, like accidents. Some of the accidents are predestined by the Soul. They have completed, doesn't mean something is left behind. Otherwise, all of us die in a natural cause. There is a very clear separation.

Q: .. So, if Dor's Soul, obviously was involved with his physicality soul, his body, everything that he was, is, was involved with the Foundation? He was about to bring about a very beautiful condition for the whole of humanity, that could have brought about many, many beautiful experiences for many people in physicality and beyond. So, if that is now been taken away in the physicality, how does that get dispersed amongst all the Souls? How does that change within the fields?
K- What do you mean? Explain.

Q: Dor is now taken another position, he was put in a place, or his Soul took him into a position, to serve and give to humanity, that's been taken away, (2:26) in whichever shape or form. So, how will the Souls involved around, or the physicality's around the Soul of Dor that have been involved, how do they get accommodated?

K- It’s something, partially it's preordered, partially is to be done. We can be, accidentally we can come to an accident, but if the Soul is not ready to go, you come out of that accident. But if the accident is there as part of the process of the transition, the Soul will do their jobs.

Q: So, let's take it to another position Mr. Keshe. So, when you have another person that is on, let's say, .. in a conflict zone, and they stand before another and they take that life with an aim directly, is this the same? Or if it's done indirectly through somewhere else? Is it the same?

K- No, not really. No, no, no.

There is, you and I can come up with a lot of examples of it. When you target deliberate to take a life, you're responsible for that life, you pay, you have to find a balance with your Soul. This is how we see with a lot of soldiers, when they come from war zones. It’s not the gun and the blood, (2:28). it’s the guilt of what they've done, and what they've taken. That they have to pay for it all, they have to release for the balance of what they've taken.

And that brings a psychological condition. They say, we've been to conditions, horrible places, and we've seen things and then we are psychologically damaged. Ask a question, did you take a life? Were you the cause of a life to be taken, that everybody down the line pays? Yes. Then you're responsible for it, you pay for it, you have to balance the books. It’s that magnet, as I always say, Rick puts, and everything has to come to balance.

Q: .. There are many ways that… I've been in that position, there're psychological positions that to cause many distress and for them to lose their physicality. So, this happens in many different ways, it's not just in a war zone, it can be in many situations in normal life. This happens.

K- Many, many, all the time, 7 billion different ways. It’s not the same all the time. 7 billion different ways. And plus all the animals come to an end in different ways. It's not just exclusivity of man.

Q: So, the soul of an animal that goes through a conflict, that doesn't have the same intellectual understanding that we believe..

K- It has, it has.

Q: Of course it has, I know, I know it has.

K- I'm going in there to become the top dog, so I do anything. So if I do that, it’s not instinct, it’s my decision. You understand? It's a very, very simple… (2:30). We call them animals, but have a look at them, they eat, they have an eating pattern, they know where to sleep, they know how to show affection to another one. So, it's not just an

animal just, because it suits them, they don't talk. They have everything as we have. They feel sorrow, they feel pain, they feel joy. Yeah?

So, it's our imagination to justify that the man is better, is the king of animals, and you can do this and that, but they have the same. You see when a whale dies, what the other whales do. You see when a dog dies, what the other dogs do.

Q: And this is the same Mr. Keshe, for our vertical friends? .. and all souls present?

K- Everything, of course. All Souls, even in deep space. Even in the cosmos. It's not the exclusivity of man, because man makes it exclusivity, that he is something special. The only specialty of the man is, he thinks he is special, that's all. There's not much, there's not much more to it. Maybe we would like to think more, we would like…

In the past few days I had to encounter a lot of emotions, which I never wanted to. But I woke up this morning, I said, why did I have to go through this? What was there for me to learn, and what was I supposed to bring for the others? You were there. We battled for a year to get things moved. I said, there's something wrong, I'm pushing it too much. I've come to agree that. this is going to go somewhere, and I have to walk away from it, because it's taken too much.

And we opened the door of the knowledge back in the way it should be. (2:32). I said, okay, we open this side, what we've done today.

Q: That will be a beauty Mr. Keshe, when you give it this way. I think humanity can utilize it and bring it into manifestation with their thoughts and intentions, it's bringing it .. down to a level that they can grasp.

K- You see, we did our best to bring this change, which I thought it should be there. Maybe it will be there, but the time is not for it. In a few weeks, a few days, whatever. We put every effort to it. And trying to get that done, we directionalized the research to, when it comes, the research will be complete. Now the research is complete.

The research is the asset, not what we try to do financially. Do you understand? What we were pushed in past 12 months, to push the technology to where it is now. I'm sure if I would haven't done that decision, we would have been somewhere else, opening another factory, the way we were going. But now the knowledge is complete. Now the Totality is complete.

Now, the wealth sits with the knowledge, not with what we invested. I know, through the knowledge, the wealth will come, independent of others. Because if we would have got. I mean if we would have, what we brought up, they would have attached us to different organizations. "You see, this is what they've done, they were always behind them. They just .. " Now the knowledge, the technology, the wealth is Keshe Foundation. (2:34).

I cannot, most probably, most of you don't see what is come out of the knowledge. When we produce these Cosmic Rays. We did this years ago in the flight system, in Iran. Every time I saw the Cosmic Rays, the light coming in and starting, it was just gorgeous to see it. These Cosmic Rays is not something new. Years ago, years ago, when I used to do the research in the lab in Belgium. I used to create these lights.

We used to be on a hill. So the other hill across and the lights used to go out. They could see these lights I was creating. What we did, we put black bags with the cellophane, and another black bag on top of it, to block these lights, that people couldn't see. The light was a space light, it's a Cosmic Ray, it's a dusty white, silverish, at a high intensity.

I used to work in it, I became part, I could see myself part of it. If you go back to the unit I used to do the flight system test, original flight system tests, which then it came out of Iran, before Iran I produced it in Belgium. If they haven't destroyed the garage, you see windows are all blacked out, totally blacked out. Because of the lights, I used to create Cosmic lights. So, what is just achieve, getting achieved in our labs today, it's already been done 10 years ago.

Q: Mr. Keshe, isn't there 7 million plus Cosmic Rays already walking around the planet Earth?
K- No, seven trillions. (2:36). What about the animals.
Q: Exactly, yeah.

K- So, we'll see what it comes. So, it's nice to see now it's shared, it's a common knowledge, and then it will become more common knowledge.

Would you take hundreds of tablets a week, which some people do, 20, 30 tablets a day, one side effect of the other one, the side effect of another one. Where you're repairing the shakes and damages of the physical condition, not walking, where the actual thing sits in your brain? And if you provide the facilities for the brain to absorb what it needs, there'll be no more shakes. So, do I need the medicine?

This, what I call, Cosmic centers farms will change the history of the medicine. When we place lets' say 50, 60, 100 of them in Canada, 50, 100 in US, 1,000 here, and a 1,000 there. You just dial a number and you'll get access to it.

The system through the fields of energy will diagnose your illness, what it is, your condition, and again knows this needs this combination, so, you sit there. People who start these processes with us, it's exactly as you are in the flight system. We don't sing you a song down the line, you hear absolute silence. It's the fields of your Soul interacting with the fields of our system, and they find a balance. Ours is powerful, so yours raises, so you say, I've (been) helped, I don't have the condition anymore. That's all we done. (2:38).

Q: So, Cosmic Ray Mr. Keshe, is a Soul that interacts with the physicality?

K- Cosmic Ray is a Soul from the Universe, if you put it that way. Connection to the Soul of the Universe, we call it, a Cosmic Ray. If you look at Cosmic and you want to change it, see what you can come up with.

Q: So you can't change a Cosmic Rays, or you can?

K- No, you can. You can interact with it. Cosmic Ray is not one ray, it's an amalgamation and collection of many rays.

I think I explained this in, I think this was one of the papers, or in the book, I can't remember exactly where, I talk about Translucent Light. Translucent Light is created by interaction of Cosmic Rays. It's what we see through the sky, we see other planets, but still is a light, it's not black that you don't see. It's translucent, through it we see other stars, other planets.

R: I think sometimes that's called the clear light as well, right?

K- Yeah, some people, it depends on what you call it, yeah.

R: So, these would be, these rays would be the primary rays, it's what you're talking about, from source?

K- Some of them, yeah. But not, because they already interacted with something, somewhere. It cannot be, that some of it, very remote part of it, yes. But don't forget, part of the rays we have in our Universe comes from the Unicose, which is interaction with other Universes. (2:40).

You know the way our Sun shines in interaction with the fields of .. our Earth and become the daylight. Our Universe fields interacts with other Universes, that their interaction creates, what I call, Universal light.

We are not aware of this knowledge yet, it is impossible. We call it Cosmic, because of Cosmos, but when you speak about the Universal lights, the Universal lights, some of it comes from the Creator. Because those Universal lights are where the Universe is lived within. We all need to speak about the Cosmos, what is within us, within our Universe.

When you go to Universal lights, then we talk about some of the lights coming from the Source. And some of these lights, if they get through a Universe, become part of, what we call, Universal, or a Cosmic light. When you look at the back of Book three, you might just grasp some of it, we haven't gone to the source yet. We're still taking crumbs in our Universe.

Q: Mankind seems to be, .. its position of where it is in these moments, the crumbs seem enough, Mr. Keshe.

K- The crumbs of the crumbs, of the crumbs, of the crumbs, of the crumbs, yes ??.

Q: He's happy with the crumbs.
R: We take what we can get.

K- Yeah, in a way, we take what we can get, yeah. Here we take what might be on the table. This is part of the whole Totality.

We hope our team can show the, what you call, (2:42). the units in next few days, the, what we call, Cosmic Energy Units. This will change the history of man. This will bring something beyond the imagination of mankind. Because we will start a new path, we'll start a new way. We will go through a condition of new understanding.

Because, with these Cosmic Rays, Cosmic lights, from the units we have, we receive higher order fields, you will be enlightened. I always remember something, which has a lot of meaning, depends where you stand with it, I spoke with this long time ago. Go in the, what we call, music channel. There used to be in nineteen seventies, eighties, a band called, Hot Chocolate, black guy. One of the first black gays who came into the scene, very popular. When you read about his biography, he says that, I think he came in from Jamaica with the mother, mother managed to borrow money, or whatever, she was working to the mortgage and bought, what they call, "Two up and Two down" in London, which is a working house. The mine owners used to build for the workers, when you lost your job, they kick you out of the house. She said, he says, he writes his biography, I went to school, a public school, I wanted to be a plumber, a cook and a chef. (2:44). The mother decides, this boy is more talented to be a cook or what do you call it, bricklayer, or whatever. She rents one of the rooms, and from the rent of that room, pays for him to go to a public educated. So, she works harder, the money from the room he changes his school from what we call, public school into private school education.

He said, by going to the new school, now I wanted to become a doctor, an engineer and professor. Books and educations were the same, the environment changed and the eye opened to differently things. It’s the same with the man. The knowledge is there, it depends how, what we see ourselves to be fit in.

Cosmic Rays have always been there, now we learn the knowledge. What do we become, would like to be? Do we still want to be man to kill and do whatever we do, and get in the back of a donkey, and get on the rocket 100 meter tall, to burn? Or we use the Cosmic Rays and we travel the span of the Universe?

It's just that the enlightenment it brings, and that enlightenment comes by availability of understanding of what we could not understand that was made available. Bananas today are in every shop and on every table, 50 years ago was an exotic fruit, a few could afford. It's the same with the knowledge.

Now the knowledge of the Universe, with the completion of this Cosmic Ray Unit, and what we call, Cosmic MaGrav Unit, it is abundance of the new knowledge, man needs a lot to do. So I said, (2:46). why do these nations fight for nuclear disarmament and somebody not to have, when knowledge above it is years, and hundreds of years above it,

is available to the man? What are you fighting for, unless you're trying to prove nothing. We still treat each other the way we see, and the way we see each other. It doesn't matter what level we are. ?? humiliation is not just for ordinary man. Humiliation for top levels of world leaders is worse, it hits harder to the whole nation. We need to understand this.

An example of it, if you listen to the daily news, everyday comes and goes, it's, as you know, there was a meeting, a meeting of the world leaders G20 and environmental, or whatever, together. President Biden goes to Hanoi, last few days, I think, for a meeting. The Russian foreign Secretary arrives around the same time, out of humiliation the Foreign Secretary gets a red carpet. President Biden had to walk without the red carpet, because 40 years ago they brought this nation to smithereens ?? and ?? lesson. So, in a way it was a humiliation. You destroyed everything, you walk on what you destroyed. And the Russians walk in the red carpet. These are the things we learned, how much, what we do and what we take from it.

Q: Is it ?? trying to forget them Mr. Keshe, to remembering something that happened a long time ago, no matter how bad is that, is that bringing it forward in the right way?

K- (2:48). Maybe they were waiting 50 years to do this. You understand? What we call, revenge.
Q: ?? intention…

K- But in the level of the Soul there is no humiliation, it's accommodation, and what we see, and what we do. It's a different ballgame.

Mankind this morning, with what I explained to you today, if you understand it, has opened his eyes to a new cycle of knowledge, and technology, and life. If you understand it. If you don't understand, it's still like, the workshop number tada, tada. Some of you go to that workshop tada, tada, tada, after so many ?? days, say, "oh this is what he said there, now I understand." Some people understand the teaching of today.

What we announced, what is to come, it's a beginning, it's actually opening of a new cycle for man. Now you're opened up that creation of the fields and energy the way it's done, this is on the hand of ?? everyone, last week I spoke about the Micro, what you call it, batteries. We slowly, slowly opening it.

I have to make our team to understand, we cannot drop everything else and they can't see it. They make mistakes, they do explosions, they do everything. But step by step we need to understand it the correct way. We have brought one Knowledge Seeker, and a bunch of people who have no knowledge about the knowledge, technology, but they all have become better than you Knowledge Seekers. Because they started feeling it, they started understanding it.

Q: .. So being around these systems Mr. Keshe, brings that change, conditions that Cosmic Rays touch in their very essence?

K- Of course, of course it does. It feeds knowledge. (2:50).

Q: So, if anybody that comes into contact with these kinds of Cosmic Rays are going to receive this elevation to this…

K- Depends, if it's at the strength that you need. I walked in there last week, and I could see exactly what it ??, and sometimes I tell them what's going to happen in advance, they just hear it as a voice, and then it comes to them few days, and then they think back, "oh, you said that, at that time." This is what it is.

I see a very clear line. Keshe Foundation is going to come under a huge attack in the next week, two weeks. We are waiting for it. To be taken off the lines, to be called a terrorist organization. They're working on it very heavy. They haven't stopped. Then we'll see how we come out, we'll see how things take shape. We'll see how the knowledge will take over.

We will launch everything to the best of our abilities to be at the hand of people. We tried, we tried to stop it, but there are forces they think Keshe Foundation has not to be there, because the knowledge has become too available. Doesn't suit. But it's there, it has to be.

This is what I tell you, any diseases you have, anything, to sign in today, meet our demands, meet our requirements, and we will step up. We have accommodation for about 20, 30 people next week, to go through the cycle, and you can start straight from home. If it means I have to work 12, 18 hours a day to bring as many as you through the line, that we can have a full knowledge by our system to be complete, we'll do it.

Q: Will the system Mr. Keshe, receive the information, it's like the flight room? (2:52). It receive the knowledge of the individual coming into the system?

K- In a way, yes. Yes, yes.

Q: So you add in to the knowledge.

K- Yeah, to knowledge. I saw it in past two weeks, three weeks, past few days, how things are, how things are take shape. How things will be. We don't have, what you call it, limitation, we work on what is available.

Unfortunately Dean, these people are all remote, you can't video them, maybe you can record them for what they do or what they change. As I said, if you have any condition go on the health@spaceshipinstitute.org, and within 24 hours, 48 hours, we'll get back in touch with you. If we see your case is something interesting for our development. We are looking specifically for the conditions we asked. It's important for us, (2:54). because then we can handle the whole operation of the body of the man.

We need the prostate cancer, which is a physicality, extremity of the, what we call it, dynamic part of the body of the man. With the emotion to the brain, we need the structure of the depression. If you have a condition of the Parkinson's, Alzheimer's, we have a requirement of the payment, has to be met. Sometimes Foundation can support part of it, and everything else which goes with it. It won't be people, "this is my condition," we ask people. We are not asking for volunteers, you volunteer for this, and you have to cover everything else which you need.

We'll take about 20, 40 people, 20 people, 30 people in next week, two weeks, and then as the other centers come into operation, like Arizona, and Germany, we increase the numbers to hundreds. Because now it becomes a Blueprint standard locking. The, what we call, Universal cover on the wellness, we put it up, it's there's, it's going to be a decision what we see to cost, how much you can use it. You cannot come with a illness and then come, "oh, I got it this way." It has to be the way we bring it to a position, and then maybe once a year, twice a year, you use the facilities to upgrade or, what you call it, bring everything in balance in your body.

As I said, we start governing, but we govern in every aspects, that everything ?? is done. Then we'll see how it takes shape. To put this, what I call, Cosmic farms in position that everybody can access, will take 10, 20 years, it won't happen overnight. It has to be done the right way. (2:56). You see when we put the Health Enhancement Unit, they came up with the "Medbeds." I wonder what else they'll come up, Medbed this time. It has to come, when it comes from us, it has to come from the Keshe Foundation, you will see what it gives you, what it covers you. It's the next step to it.

But the way you responded to the, what you call it, to the Enhancement Flights, this time, if you need that support of the wellness, you will be handled by the doctors, not by the Keshe Foundation. We keep a central position in the Spaceship Institute that, as I said, we'll open a center that all the information, all the doctors will go through this health link. It doesn't matter which part of the world you come (from). Then we drop you off to the country you come from, to Brazil, to Germany, or whatever, and the doctors will take it up. But one central position from the beginning through the health@spaceshipinstitue.org is setup for this purpose.

We are not individualizing it to countries and everything, this is a .. we start the centralization from the beginning, and we keep it that way. But if you send an email, this is my condition, if our doctors are interested, we'll respond back immediately. Parkinson, depression, Alzheimer's, specific cancers. Our doctors are interested in the, what you call it, the depression, the, what we call, ADHD, Fibromyalgia, ALS, FMS. We want to see how we can change the direction through the Soul in the physicality. Don't forget, we've done the physicality to reach the Soul for 10 or 15 years, and we've been successful. So now we ??go the reverse, which is much easier. (2:58).

Most of you, if you like, you can. We'll give you a date, when your situation will start next month, next week. But for the first ones we choose next week, we can take about 20 people for Tuesday and Wednesday, and you don't need to travel anywhere, you just stay

at home. It’s the beginning of the Mobile transmutation, when we said we start the Mobile now, we have to complete the health side of our system, that we can support everything else.

Any other question?

Anyone, anything with auto immune system we will not respond to. There's a reason for it. Auto immune system is a physical condition, which is a complication of the interaction of the STP with the physical body of the man. More or less, has not much to do with the condition of the operation in the Soul and the brain. Auto immune systems are a different kettle of fish in our understanding of the work of the body.

Q: .. If the animals and fish quit eating, will that not disrupt the natural cycles of nature and create imbalances, before the rebalancing occurs to the new state of planetary plasma balance?

K- Always has be, always will be. (3:00). How many of them have done this? How many of them animals, we brought them through our work, into that ?? and they found their way, and they are fighting back?

There is a question here, somebody. I just noticed, posted something. It says, "Fibromyalgia is autoimmune often." Not a way. Fibromyalgia is the most psychosomatic effective process in the body of the man. Fibromyalgia comes from abuse, psychological, physical abuse. Manifests itself in total disability and some people cannot even move, because they are too tired, because the brain, Soul and STP are consuming everything in the brain, that is nothing left for the physicality to have. That's why you feel drained, you cannot work, you're tired.

Teach you something, learn something, according to research, what you call it, a scientist who works in the lab uses more energy, consumes more energy than a face miner, the one who's got a chisel and hammers to the wall whole day. Calorie wise.

Now we can understand how Fibromyalgia touches you, when the brain is engaged in acceptance of the submission, of the abuse, that it has no time to feed the physicality. (3:02). And when you balance that, there is no ?? physicality (problem). We've seen so many of the change in Fibromyalgia, and we are 100% correct in that position.

Fibromyalgia, CVS are one of the most horrendous psychosomatic conditions created by abuse, when the abuser accepts, he is the guilty party. And it's all done in the brain, not in the physicality. When you sort that out in the brain, physicality just walks.

If you go to teachings, many times I referred to people who have used the technology for this, especially in Holland. They call it a Lyme disease, some people, which actually has no meaning. It just changes name. You go to Holland it’s called Lyme disease, you come to other countries is known as Fibromyalgia. They're associate it with an animal, that they can ?? justify it.

One of the most horrendous psychosomatic conditions of abuse, known as Fibromyalgia. This technology is prepared for it, because it sets the whole structure the right way. You look at the person with a Fibromyalgia, they walk bent, they cannot even stand up properly. They accept, already the submission. It comes from abuse, before age of puberty, when it happens in a hierarchy, we know it as a CVS. It's more horrendous because you have no energy left. (3:04). These are research base data, which we have gathered over years, and it's not just random. You can do.

This technology is absolutely perfect for these things. and we see their effect on the brain and the expansion of their Soul. We see to the expansion of physicality and everything else. Many of you suffer from joint pains, joint damages, ligaments or, what you call it, ?? carpal (tunnel). Keshe Foundation has already developed a technology for this, and tested it, and it works perfectly. Very soon we'll release it like other Gans's, (which) you buy from the Foundation.

But if you have any of these conditions. You meet our condition, you can start in the next 24 (hours) or next week, we are ready. Because the systems are free now. We don't do any more flight tests, we have adjusted it. The system is, what you call, total test for, what you call, the systems we ready with the doctors to take over.

Any other question?

R: .. We have a couple of questions on the prerequisites for the universal flight tests.
Q: .. From our part is there primarily an attunement needed to connect to the Cosmic Rays or fields, or at least an openness to allow the fields to be felt, to access the infinite Soul power based on freewill. (3:06). And I would combine that with the other question from Cristiano, from Brazil, do the 12 people who apply for the universal flight test need to meet some prerequisites?

K- No, none. None ??.

R: And he's concerned about what will change in their lives? Will they continue their ordinary life and family and work?

K- More or less yes, should be. It's like Armstrong, what does it change? Just become somebody who's done it, and then become natural, everybody else does it. How many more people have been to space and come back, and do we know every single one of them. Only their families and their community. The rest we forgot, or don't want to remember. There is Armstrong, he was the first one who done it. It's like the first one person who went in the Enhancement Unit, was a Bulgarian, one of our Knowledge Seekers. The first couple will go through the Keshe Foundation Space Technology to Moon will be a Russian and the German, husband and wife. We'll remember them, because they are the people who took the first ?? flight. But the rest just come naturally. But we need to complete that.

R: And certainly the people, or at least many of the people that have come to this system, have been profoundly effected by it. And that will change them from that point going forward. They might make some different changes, or different choices, rather than they would have without that experience. So, certainly that could change things but…

K- Oh yes. It changes you.

R: Doesn't necessarily effect all his life, and family, and work, and so on, (3:08). Depending. Some people it might, I suppose.

K- It changes in a way, but you accept it to be part of life. You don't connect it to what you did, that brought that change.

You know, it was like we immigrate to a country and we live the life there. That's what we have to live with, because it becomes part of us. That's what it is. We immigrated to a new condition, we accepted it and everybody else lives with it.

I remember a few years ago, in Holland, we came across a lady with a COPD, which is the lung disease, she couldn't walk meters without taking 10 minutes rest. After, the husband said, this is all fake. This is something where, you know, you're just grabbing people who need to do something and the technology was… She said, I am the one who's suffers with (it). I can't walk one meter without standing 10 minutes to recover. She went through the process. And about two or three months later, she went cycling, and she started walking around and she started living. The guy invited, they invited us to their home. The guy said, apologies, I didn't know, it is now, that we have a wife, we have a mother at home.

This is how life is, we bring the change, because we understand it. But it's for the others, that they brought that change to them to understand what is to happen. The technology is a revolution in the science.

At least we are lucky, up to now, they haven't hang us, like in Pisa, (from) the church tower, yet. (3:10). It's the next step in technology. It cannot be stopped. A lot of you will come up with, a lot of scientists are coming with different conditions and positions.

Any other question?

Q: .. Can you comment on the conversation humans are having about some people's belief that the universe is a hologram? And that this reality is holographic?

K- That depends on you, how holographic life you live. It depends what you call holographic. What is holographic to you and to us. What I call it, life is a mirage.

R: In some cultures, the dream state is what they call reality, and what we normally call reality they believe is the illusion. So in that sense, the things that we do in our waking

state, running around and doing things, just as to the knowledge of the dream state, which to them is more important than the daytime, walking and doing stuff.

K- Yeah. (3:12). It depends in what, on how we do things, hum? How we see things, and how we appreciate what we see?

Any other question? Or shall we call it the day?

Q: .. In a city of approximately 800,000 people, what should the government do to absorb all Corona fields from the environment in order to protect the human population and the other living beings? And what guidance would you give to Knowledge Seekers who are in contact with these governments?

K- Governments will do what they like. Now we hear from, since what happened in the European Community, that nobody believes about the Corona, and what we got to know about the Corona. A lot of governments don't even consider to be serious.

We were expecting a lot of things this year from the governments, regarding the Corona, and we have not seen it. Is there a condition? We know in China they're still extremely working on it, and, what you call it, (3:14). we see European governments don't pay any attention to it, and some governments have totally abandoned this thing. So, it depends how and where your community and your government sits, and who sits where.

Any other question? Shall we call it the day? I have to go to a meeting.

R: We have a question to carry on till next week. You can think about thorium as an element that might be used instead of uranium
K- What?
R: Thorium as a radioactive element that could be used instead of uranium and plutonium for a reactor, or some kind of energy situation.

K- We don't work in that level. I don't see any need for that step of work. When you work in the Cosmic Rays, the Cosmic Rays are the creator of whatever plutonium, uranium, you call. We're dealing with the mother, why do you want to go into it?
R: Why deal with the middleman?
K- Yeah. Why deal with the foot soldier when you work with the generals, as I call it?

The Cosmic Rays interaction leads to creation of stars and life. Why do you go down the road? We can do everything.

R: A perfect explanation in a very short sentence there actually. Yes.
K- So it is, there is no need for that kind of things. There is no need for it.
R: Okay, we'll leave it at that for now Mr. Keshe, I know you have leave.

K- Ok. Thank you very much for today. Please support, what we call, (3:16). it's for your benefit this time, than the Foundation, but the Foundation benefits by it with

gathering the knowledge. If you suffer from any kind of condition, and you think we can do, especially what we asked, and you can meet our .. medical requirements, you can start from Monday, Tuesday. Doesn't matter wherever you are in the world, you don't need to come to us, and we can sort it out. Or we can talk it to see, we might be able to support it through our engineers, and through our doctors and technicians, that we can bring that change.

Thank you very much. Hopefully we see you next time. I give from my best parts of my Soul to Dor, that passed away the physical life yesterday. And I'm sure he has found the beautiful places to be in, and start a new life with. Thank you very much.

459 KSW November 17, 2022

460th Knowledge Seekers Workshop; November 24, 2022

(Transcription Proofed)
(Auto transcription from Elias)

ENGLISH TRANSCRIPTION

(:20).
K- Yes, good morning, good day to you. As usual, wherever you listen to these series of Knowledge Seekers of the Keshe Foundation Spaceship Institute. As for usual to gather some more knowledge. And to understand a little bit more, as we never understood as we discussed. This Intro, if one day mankind understand, that part of it, mankind will bring universal revolution, not industrial revolution. And this universal revolution working through the energy fields of the universe, then the matter state will change a lot of things. It will bring a lot of joy. It will bring a lot of new conditions. It will bring a better understanding of the work of the Creator and its created, and generally universal work.

In the last couple of weeks, we made a number of points, we made a number of some announcements, and we like to divide today's teaching into three parts. First part is to do with what we announced last week and the week before. In respect to the wellness side of the Keshe Foundation work. (:22). As we are a space technology based. And many of you came to Linz to see how you can take the flight of fancy. Some of you with a couple of Rick's sessions, we came to you, what we call, the remote control through Mobile systems.

We are still expanding the work of Keshe Foundation, Spaceship Institute working in different nations. We opened the door to test what we call, prelude, the section before we go into transmutation, Mobile systems. What this Mobile system will have, what effects will have on you while you're traveling? If you have a Parkinson, if you have Alzheimer's, if you have a cancer. When you're traveling from New York to London, within a few milliseconds, or a few seconds, what would happen to you? What would we get the outcome? We cannot go without it, we have to understand it. We have to understand what we deliver. Would you get in with a cancer, and come out with a no cancer? Would you get in with Alzheimer's and you see reduction of Alzheimer's? What does this technology brings?

When we start transmutation? What do we do? Do you go from Earth with one leg missing and you arrive on the Moon with three legs, four legs, three arms? We have to understand. How do we control it? Are you comfortable with it? Can you handle it? As part of this work, we announced what we call, the process, that we look at the conditions. We look at in how things go. And we have had tremendous response.

To this response, we respond back to the following. We have the Keshe Foundation, divided the operation of the controlling the wellness. (:24). Now, instantaneously and automatically into 4 sections. European, Asian, and South American, which means now automatically those of you who get in touch with us for any condition, you will be assessed and sent back to your centers. You are from Brazil, you will be handled by doctors in Brazil. You are from Iran. The doctors in Tehran will handle you. You are from China. The Chinese doctor will intervene, work with the Keshe Foundation and introduce new technology.

What does this mean? The same system will effect a Brazilian, will it effect the same the Chinese, as will do with citizen's of Tehran, and the rest of the world? We need to know and to this effect, we have started the process. The Centers will handle directly their citizens. This way, your doctors are responsible for you. Keshe Foundation is to bring this technology across.

In the process of receiving so many emails, people with cancer, people with Alzheimer's, with Parkinson, with the most strangest diseases and conditions. Some of them brings us joy, because we know we can make that change, and we handed over to doctors in that national, in that land. Some of them bring us pain. We try to sort out. There is a cost involved in everything we do. The machine you come and sit in and you paid the 1,000 Euro, for one session. The center is there, the staff is there, the running expenses, the center is there. The building, the structure, the research, and the background is all there, and it has to be covered. So we have put a price per hour, per use of the systems. (:26). What would it take? How long would it take, and what we see? What percentage our specialists allow? We have 30% success, we have 40% success.

So our doctors team decide in the Centers, what hour of the center and system will be needed. In most of the cases, you will pay back to your own national companies, which we have set up. This does not go back to nowhere, except your own position. You work

out of Europe, your illness, you're a citizen of Europe, you handle by the companies, which are set there for that purpose. You go right across the same in China. The same in Brazil, the same in Tehran. And you deal with the doctors who understand you, understand the culture, understand how to deal with, but they're trained as what we call, Keshe Foundation Scientists. They look at it through the what we call, science of plasma.

As I said, we started this Satellite business, of changing people at the point. We build it up. We can build up to a few hundred in the coming weeks. And then, as the centers open up as we are completing the development of the new systems, we go to the next step, what we call, rooms, as you will seen before with the servers, rooms with the systems. With the different diseases, with the cases different conditions, which we'll handle by the doctors, and they know which system they have to do. When is the next step, what they do.

We do not interact, we do not get involved in the medical side. This is not our job. Our job is technological backup. And in these processes, we see how we can support. We've had many of you, writing to us expecting help. We go through it, we pass it on to your doctors. We pass it on to the centers we set up. The team of doctors behind. Now we are adding step by step, number of doctors to each center. Doctors which can help us to understand more, and they can decipher the technology back to us.

In this process, as I said, we centralize everything, and then the center keeps hold of all the data. You all go to, as we gave before, health at, the condition, the email which are given. And then, once it's processed, you'll be contacted through the center, in your center, not by us. Because we hand it over to doctors, and we keep a track of how you change.

Many of the emails we received has brought us joy. Some of them brings us pain, some of them brings us, to know the reality about mankind, and how they are. In the process of the past week, a number of people have gone through the hand of the doctors, and are going through the hand of the doctors, to be set up for the conditions and the rest.

We have to stay always neutral. We are providers of the technology. We are not doctors. We don't get involved with a medical part or what we call, whatever is needed to be done. In this way, as we receive more and more emails, our eyes opens up to more conditions, that we have to change our system to accommodate those which are there.

Our doctors and our advisors. Now we see we can handle a number of cancers. In the process of past few weeks, and the tests was done during the time when many of you came to Linz. Many of you for flight tests we gathered information, we gathered the knowledge. What we need to do. (:30). We can handle Parkinson's, Alzheimer's, we see a lot of people, a lot of people asking. We looked at different things. Keshe Foundation has done a lot of work with immune system. Keshe Foundation in the background has done a lot of work with genetic defects. And we now open those doors.

In a way, we see everything to be controlled by the brain of the man. So when you have a genetic defect it's set out through the brain. We understand a lot, we don't disclose how we see it, and we have put it to test. And it seems to respond drastically. And it seems to respond immediately. Over past years we tested this technically very softly, and see what it is.

Now, we are going full blast. We would like. we look at, our doctors are prepared to consider genetic deformation. And as we received requests for this, we've seen a number of people who have asked us for help for their children, for their family, for all sorts of conditions. Conditions never existed. The first generation of this but ?? Fibromyalgia. The conditions which left in the families, and they said it was inherited. It's part of the gene, that's a defect, that we all born to be blind, all born to be that way in this family. All these now can be looked at by the Keshe Foundation doctors.

In this process of receiving emails, we received communication from a young mother, healthy, balanced, with two boys. (:32). Little boys are very young age. One is more advanced in genetic defect, than others due to the age. We have seen this in some families three or four are effected. From two brothers, the two children, the siblings are effected, which shows the grandfather, or grandmother had the defect in the gene.

We see a whole family, uncles and aunts having the same effect, but it was accepted, it was in the genes. Now, ?? which way into scientifically, what we've done in the past and you understand why we've consider it, and we consider it to be correct. In receiving an email from the two, about the dear youngsters, our doctors, we decided we'll handle it. We assessed it, and we wanted to see with ourselves, do we have an effect, can we bring that change.

We brought these two boys into Austria and into the Center. One it is in a wheelchair already progressed. One will be in the wheelchair in the next couple of years. Lifespan will not be beyond teenager, or by that time the disability will be so devastating, that these children will die of it. (:34).

The mother is young, and combination of the mother, and ?? upon the X chromosomes has led to this condition. And all children with this condition, go exactly precisely to the time, year, through the same changes and to death.

The Keshe Foundation has decided to take this challenge up. By allowing the boys with the parents to go through the flight system and observing the changes in a short time by being there. It gives us a conclusive effect, that we have to try. We estimate the Keshe Foundation with these two boys, will be engaged over two years. It's a genetic. Success rates, we don't know. But the most important thing is that we are prepared to challenge, to try. We don't use medication. We don't use our Centers. We use what we call, remote control Satellite system. We can operate these now from any center around the world.

In this process, it is done, what you do at home. It's you who decides to put the headphones on. We release the fields across this planet, it's you who's there to receive it.

This does not get involved in any shape, or form, in health and medical application. It's like a television, it releases the waves of the video, of a song. It's you who has to tune to it, and to listen to it.

In this process, we have started to allocate two units confirmed conditions by the Keshe Foundation, to support this to understand more. (:36). Because we've done genetic modification before. I'll explain to you how, and how it's been done. It goes back to the early ages, early days of the Keshe Foundation. In this process with these two children, and we are now considering what we saw with the parents in the system, we can change the condition of the mother, possibly the what we call, the defect. This will cost the Keshe Foundation, something around 1.7 million to maybe 2.5 million Euros. We cannot sustain this, and we have come with the permission of the parents to public. We would like to raise the funds to save the two child, the two children.

The beauty with it is, that the mother has allowed us to go public with, because she wants to save the life of the two boys. It is important for us to be able to save the life, or try to test to save the life of these two boys. One is standing behind and soon he'll be in the same position in two years time. The boy in the front could walk six months ago.

It's the responsibility of the KF with the technology we have, and with the knowledge we have to reach. (:38). And in a first trial we did, we have reached, so it can interact. It's there to do. We can allow, to announce, that all the people with this condition around the world, to ?? tune, to lock into a condition, and the whole private citizens at the same time to benefit from the same what we call, "change of," what we call, "X chromosomes."

No one can stop the Keshe Foundation to do such a thing. And we need your support immediately, to be able to finance this, as of today. Two lives and many children like this. And many of you suffer from what we call, genetic defects. It's done on the international basis. We tell you what time to be there with your child, or yourself, and you tune into.

The Keshe Foundation has decided on a ?? parallel work, that majority of you will benefit by it. We will do the same. We will announce a standard like the teaching of today. A number, that you as the Knowledge Seekers (KS) and the rest of the system of this planet, can go to and walk away from addictions. If you're a heroin addict, if you're a cocaine addict, if you're addicted to sex, if you're addicted to alcohol, if you're addicted to anything, which has brought misery to your life.

Keshe Foundation will run this channel freely. Which means there is no setback. There is no pains of interaction. It's your brain which sets you to walk away from addiction. Will be transmitted on a regular time, that you do not know when your addiction hits you, but the minute you feel it, you tune, you listen. Silent. (:40). But you change your emotion. You change your direction of life. Then it's on you, how you support the KF.

If you have children with addiction? You have the most "beautiful people" with addiction? Any kind of addiction. We'll start transmitting in the next few weeks on a

continuous basis, what we call, the "addiction line." In a way, it's a Blueprint Day. The technology has to be at the reach. But the technology has to be reached the correct way.

In a way, if you're an addict in New York, or you're addict in Los Angeles on cocaine, or you're a addict in heroin and amphetamines in Tehran, in Istanbul, or in China. All you need to do at a given time, listen to the silence, and see what it does for you. But the beauty with this is, that once the addiction is overcome, it does not come back. Because the brain has set itself to match. The brain has done the repair. The brain doesn't work. No government, no officials, no authority has power over the Keshe Foundation to stop this process.

We spread the systems across the planet, that cannot be attacked by drug traffickers, and those who benefit from drugs. In a way, we don't fight. We give you the solution that there are no customers. (:42). American authorities and many other authorities have been fighting drug trafficking. I used to work with the British drug trafficking units. We disposed of the cars and vehicles and everything else, which carried drugs in and out of the United Kingdom, for years. Those who are close to me, they know exactly what I'm talking about. Cars which are built to carry heroin and cocaine. Cars and furniture's, which came from South America with cocaine built in as part of the arms of the ?? clock.

I flew to Dover with the instruction of the British government to inspect a truck of frozen doughnuts, because it wasn't sugar spread on the donut. It was cocaine. I used to work as one of the top guys with the British government for drug control. Well known people worked around me. One of my companies is highly geared up with this work, to make sure that addiction does not reach the way it was going in UK.

I respected the British government for their support, and what we did for years with them. So now what the government's could not stop, the Keshe Foundation creates the condition of "no customer." You are from Brazil, addicted. You are from China, addicted. You're an addict in Sydney, or you're an addict in Tehran. Our technology knows no language, knows no border.

Our purpose today, as I said is in 3 sections. The section is about the life of these two boys. I want the change. Maybe we are too late for these two, but the knowledge we gain, will bring comfort to the others and the parents. That most of the genetic defects can be eradicated primarily through plasma Technology. (:44). Genetic defects, we have confirmed majority of it, comes directly through emotion, which means is connected to our ancestor's emotion.

Why do we go paralyzed with the leg? With these two boys we have pinpointed exactly in which part of the ancestors, has come in. So we know where we sit, and why they are here, and why the gene has changed, the chromosomes has changed. And we can change it very much like a Parkinson's, very much like ILS (means ALS). It's the shape of ILS (ALS). But the wishes was done by the grandfathers, and the forefathers, and the grandmothers. And these boys now carry these emotions of the grandfather, which is touched the chromosome, to do, to bring that change. So most of what we call, "inherited

diseases we carry," genetic defects comes from the emotion of our parents, forefathers. We have to understand that emotion. And with the new technology with the plasma, we reach it, as we reach many of your emotions. The way we can reach Parkinson's, the way we can reach Alzheimer's, the way we can reach our ALS.

Now we understand, Keshe Foundation stands solid on its ground. I stood 5 years of persecution by what I call, "damnation" of the government of Belgium, not to spread this technology. The muffle is off, and the technology is so advanced, that now no nation can touch, no one. Let those who in Belgium are addicts, pedophiles, the habit of raping children, now go through the system and change them. (:46). I hope the Kingdom of Belgium changes through this technology, those who understand what they done wrong, and what they do wrong. The technology and the knowledge belongs to humanity, and not control by those who are born in the damnation of Belgium. We have no problem with. We handle every governments on the basis of, let a judge tell us, you cannot bring help to the people. This time they cannot come into court with guns and submachine guns and threat.

It's the responsibility of our Knowledge Seekers to save the life of these two boys. It's our responsibility to understand and bring the change in genetic defects, and how it can be done. And how can be layered ?? on orange, what I call, the onion rings of this disease.

In early 2000, when I was invited by the Belgian government to assess the technology. The Belgian ?? atomic authorities allocated to understand what I do. I told them, you don't understand anything. But I can give you things, that you understand the work of the Universe. The teaching of what you just read, heard before as an Intro. I gave three bottles of liquid. If you remember that time, they were baffled by the Coca Cola bottle, that made, what we called, the mysterious liquid, which was creating Nano coating and energy, as many of you have done that.

I provided three bottles, about 1.5 liter of each to SEK and the scientists in research centers of atomic Nuclear Research Center of Belgium, in ?? Malta. (:48). I told them one bottle is the energy of the man. One bottle is the energy of the Earth. And one bottle is the energy of the universe, cosmos. They, through all the technology they had, went through the liquids. And they came back and they said, can you supply us with some more liquid, because we run out of the material testing. One and half liters consumed in a matter of two or three weeks. Raman spectroscopy, every other things they could do. And then, repetition was given. Then I was asked to go to SEK for a direct research in the center.

Days were allocated, where I spent in the what you call, one of their top secret laboratories. We did a test. We opened up to see how we can produce nuclear material level, as that's what the only thing they were interested. In a vacuum of glass container of 1 cubic meter. The rule before that day, was that any nuclear material transported from one building in the research center to another, had to be registered? You cannot move anything without registering, if it goes from building one to two. That day they after the

test, they immediately changed the rules. No material can move from one room to another without authorization.

They realized nuclear technology has changed. We can create nuclear material and Cosmic Rays (CR) on demand. Conversion of the cosmic rays into what we call, "field needed for everything." That was the time the Belgians, and the Kingdom of Belgium, and the king of Belgium understood, (:50). that one of the most powerful technologies on Earth is sitting in their laboratories, but they could not understand.

Today, in the Intro of today, some 15 years later, you hear about Cosmic Rays. These rays were produced in a very simple way, 15 to 20 years ago. I produced the first of Cosmic Rays as a student in Queen Mary College on top of the nuclear reactors, testing site. My doctor Weil ?? Shore told me, Mehran you shine, what you carry with you. I said, it's the knowledge you don't understand.

Now you understand. What we teach today, what we do today is not just coincidence. It's just, I have to find a way that ordinary man on the street understand. Not for elite. Mr. ?? Graba, the bastard son of the king of Belgium, in the first meeting of us in ?? IMEC, most advanced Nanotechnology Center in Europe at that time, walking down the room up and down, say, Mr. Keshe, you're writing your paper and knowledge in such a simple way that everybody can understand, this has to be written in a more complicated, that becomes valuable. I said, I write that every peasant in the back of the villages of Africa understand that the white man like you cannot abuse them like you did in Congo.

Now the knowledge is in the hands of the man in the back villages of Africa, from Senegal to Ghana, from Kinshasa to sitting in the back villages of Brazil. Now it's time to change the position of the knowledge. (:52). Now it's time to bring that change. Those of you, your mothers, and you've been crying, and writing to us, and the parents, and you an addict, help me, I have addiction. I gave you the gift of life today.

Like the teaching of today, we open Zoom channels, that you all come and listen to silence, the silence of the elevation of the soul and building up the layers of the brain of the man, that you will never touch a single cocaine and addiction.

Many of our Knowledge Seekers are suffering with this. Those in Los Angeles who are close to us, those who are in different part of Austria, Belgium, Tehran and the rest. We have responded as One Nation.

In a very near future, we will open this channel for all of those of you who are addicts. To amphetamines, to tablets, to sex, to any kind of addiction. Elevation of the soul brings the limitation of, what we call, need. You will not get those craving, and you will not get all the bends and the pains with addiction. Like today, you come every Thursday morning to listen, we allocate a certain time and date to start with, that you can ask your son, your daughter, your child, yourself, just to listen to the silence of the elevation of the Soul of the Man (STM), and walk away from addiction, and many, many other diseases and conditions while you do it. (:54).

We run as One Nation, and the bandwidth, and the Mobile phones, and the Satellites is our "government." We administer, we cover and we give freely to all of you. What we have, as we done up to now.

The whole point goes back, once we can confirm the genetic modification, then we can move on. Then we go for the immune system at the same time. So, Thursdays you come here to listen for, what we call, the teaching. Fridays you tune for addiction. Mondays you go, if you've got a gene defect. Tuesday, you go if you've got immune system problems. You can repeat this, and change it, and see the change.

Going back to how we know the genetic modification can be done. It goes back again to the nation of Belgium. Now, you start talking about Gans and agriculture, in past four or five years. In 2009, after I returned from Tehran, and we had a successful flight testing with the creation of gravity, with a friend, a close friend, a good friend Belgian, who is an agriculturist and worked in Africa, in a number of discussions, we agreed to finance a seed research. Where we took seed, registered seed of wheat, from the agriculture center, (:56). in round the city of ?? Varahan, where they do agricultural tests.

Some of you might remember, if you ever still go back to early time of the Keshe Foundation, on the Internet, we said, we want people to grow seeds for us across the world. If you remember, you all received the seed, round about March, and on 21st of March you all seeded. We watched how the seeds grew over the time. We tested ?? Diller and the others. With our scientist agriculturalist, in Belgium, we gave him a green house, we paid for all the water system needed to run a very systematic research.

We tested different conditions. In those days nobody knew about Gans's, but I created the Gans's that the seeds were pre-prepared in, what we call, packages, and packages were sent in different time, that they don't interact, and we evaluated how we see, we can bring that change in genetic, modified genes in the crop. We knew the seeds we carry was genetically modified. We observed how some people in America, some in Europe, some in Australia, and different parts of the world received the seed, and I'm sure some of you here were part of that, the trials some 15 years ago.

In the trial in Belgium, with a scientist, (:58). with the process of specific processing of the seed, this documented, this full report, it used to be on the Keshe Foundation website, you most probably know where it is, some of you can dig it up. We saw that the wheat went back to its origin, genetically modified, and became grass. We could even decide in which level of the evolution of the grass to weed we want to watch, we want to observe.

When it became to the original grass, where it came from. We didn't see one stem with the flower. We saw a spread like a grass, and we saw 10 - 20 stems coming up, like grass. Then we understood genetically we can enter. We reported this back to the people who were concerned and doing this, that with this technology we can change the GMO.

In the process in China, in during my stay of 2 or 3 years, and some things we did with the Chinese authorities, we've proven that GMO can be changed. To this effect, we have received collaboration call from the Chinese government to enter into the building of the factories in the coming months, to change the GMO and harvesting increase in China. In next few days this contract will be signed by our team in Beijing.

So, we know genetically we can interact. As humans and the seeds all use the same protein based from the atmosphere, so it has to be the same as we have seen with some other tests of ours. (1:00).

So, in a way, in next couple of years, you will see massive industrial operation in China, for changing of GMO, which forces the people who create the GMO to give up. Or, you make it, we reverse it, we are back in where we want to be. The reason for change of GMO is important to China. Is that China is buying seeds which they cannot re-grow. So, they always stay consumer.

We've seen hundreds of thousands of farmers in India committing suicide, because in the past the seed used to give flowers and they can use the seed for next harvest. Now every time they have to buy the gene.

So in a way, what we see, genetic modification can be done the same as what we do with your, with drug addiction. Farmers will be given the facilities remotely in the corners of this planet, to put the seeds in a specific position and condition, again, using plasma technology to re-modify and start using it. No farmer in India can be committing suicide, because he has a GMO. Because they have the pure seed in their hand.

Now you understand why we did the test, why we asked you to become Satellites, and why we asked you to enter into Mobile, what we call, transmutation and transportation. In this way, we end up with the diseases and we end up with, what we call, hunger. Where no farmer shall kill itself.

We allocate a specific times for the farmers to place the sacks of the rice they buy with GMO, to non GMO and plant it. If it's good for the goose, it's good for the gander, as we say in English. If it's good for the male duck, it's good for the female duck. (1:02). If it's good for the Chinese government to benefit by it, it should be beneficial to the Iranian, to the Indian, and to the African the same. We take charge by bringing a balance into humanity as of today, and it's very simple.

Our system sits across this planet, and many of you with all those Gans waters you did, you set the scene for us. Those of you who volunteered to become Satellite you have already joined in. All of you who became, and come, and came to Linz to be, you brought us the data from different cultures and nations. That's why we can link into it so fast.

Today, we bring that change, and I ask the Keshe Foundation to raise the 2 million to help these two boys, because it brings, it gives us a lot of knowledge to bring the change for the rest of us in the next few weeks. One of our richest people listeners lost a daughter

to drug addiction, with all the millions could not do anything. Now they understand the importance of this. She took her life two years ago, and all the wealth of one of the richest people did not help. Talking to her on a continuous basis, I feel the pain and how has changed the family. This should not be the pattern. We should not lose our children to addiction and all the psychological damages which it brings.

We ask the Keshe Foundation Knowledge Seekers, (1:04). and those of you who will listen across this planet to respond to this request. It allows us to run the channels for addiction, allows us to run and see what happens, and there is no limit, because the Keshe Foundation belongs to you.

R: Mr. Keshe, I was sent a link to the seed experiment. I can show that briefly here.
K- Would you like to after the teach, just after this session, please.

Now, you can see we don't talk out of line. Within minutes Knowledge Seekers in the background, know what this knowledge has been stored over years, and they can call up on it.

Can we change with this technology the condition of the pedophiles, that no child can be touched? We saw Vatican this week releasing the report on 2021, only, of the priests who have abused children, and they don't dare to go beyond, because it's so messy. And even 2021 report is shameful. How many priests are abusing systematically children in the church today? Can we give a headphone as a gift to the priest and say, you go to Sunday mass, on Saturday listen half an hour to the silence of your own Soul and change. The changes are fundamental. Many of you have been through it.

Our doctors tested a person with Parkinson 10 weeks ago, and yesterday it's finished with the whole process, with no shaking, with no Parkinson. (1:06). They are gradually reducing the medication in the background, that there'll be no sign of Parkinson in his life. The same they are doing with Alzheimer's, the same is done with other cases around.

We cannot do it with Gans's. You cannot do it with (Gans) Patches. It needs the understanding, the complication, and completion of, what we call, the knowledge of understanding the universe, universal work.

In the next few months, once we start this processes, if you have anyone in coma, buy him a headphone, they walk out of the coma, they'll awaken. In the next few days we will be giving an interview to a prestigious international broadcast for the first time in years, and the new space technologies on the agenda. This program is totally and completely concerned with the space technology, and nothing else. We'll ?? find more in this program, and the programs which come after.

I ask the Keshe Foundation to respond to our request for the funds to be set up, to be start adding up in the next days, as we cannot ??do these children. Every day more cells converts to more proximity and closeness for, to lose them. (1:08).

When they were in the system this week, it was such a joy. The boy in the front, I asked him to go to the Moon. He said, I went to the Moon, he felt the Moon. I said, now I want you to walk. That simple. The parents report how even the sleep changed so fast in one session. We can reach, we can really change.

We don't need any government to tell us how to travel the span of the Universe. There are no governments above one kilometers, or even 100 meters, because it can't reach. We need 1.8 million to run this project for these two boys. It's you who decides, and with it we'll come back to you to support the Keshe Foundation for addiction. You pay thousands for cocaine, you traveled to Tijuana to buy cocaine, and to put Keshe Foundation to shame. You go to the other places as Knowledge Seekers, you are ?? addict, you walk away, but you go back to the addiction again.

All this has to stop, all this has to come to total understanding that we cannot, and we will not allow the governments, and, what we call, (1:10). ?? self-serving pharmaceuticals to stop the system.

They cannot reach it. It's not on computer line, that they can block it, or they can jam it, or they can hack it. I received the threat from a Jewish lady, that we are connected to Mossad and we're going to bring everything of the Keshe Foundation down. Making threats against the work of the Keshe Foundation, when they defrauded the Keshe Foundation. In the past week I announced that we lost millions, because of the fraud by a Knowledge Seeker who came close to the Keshe Foundation. The Knowledge Seeker is not from Europe, and is not European. He lives in Europe, but he's not European. He set out to defraud us, and we've been defaulted heavily, and we stand by it.

Those of you who supported us, we'll try somehow, we return back in next few weeks and months, what you gave to the Foundation, because it was my responsibility and I stand my position. I don't walk away from it. It creates some hardship for some of you, but we still stand. The finances from the projects will not be allocated for the loss. We always have made our way through our technology in different ways.

I request from the Keshe Foundation Knowledge Seekers, two ways. If you're a drug addict, give what you use for your addiction to the Foundation, that we can run our projects, and others don't become addict. (1:12). From 20 dollars a shot, to thousands a year. Those of you who know, and you have the wealth and you sit on it, does your wealth matches the life of 2 of these boys and many others. These two boys, two happy brothers, they could walk and run together six months ago, will not be here through genetic defects of the wishes of the ancestors, in next few years. We don't use any medicine, we don't use anything. We just reach the STM. We need 1.8 million, and we need much more to be able to stop the addiction.

This is the change. You asked us to bring the change, you came to Keshe Foundation to see the change. Now we start implementing it. There is no Centers, there is no where they can attack, there is no way they can shut down, there is no way they can hack it. Hack the

Satellites, and break down whatever you like. The knowledge not to be an addict, becomes assets of every man around the world.

The only people who will suffer from this, will be the kingdom of United Kingdom, where the royal family made his living on drug trafficking for years and centuries. The biggest, what we call, (1:14). drug cartel sits within the, what we call, British monarchy. How they brought China with addictions to knees, and how they tried in Iran and the Middle East, even in a hump of a camel, to traffic.

I bring this session to an end, and then we go to the teaching in the next session. But we need, I don't need, you need to bring that change. We are here just those who support and has the knowledge to support. We need to raise millions. I used to do it on my own, and with what we've done with the Knowledge Seeker to stole so many millions from us, we have to come back to you. We need it today. Every second, a cell in this body of these two, changes preparing the body to die. The father was holding the elder son in the system, he said, he never seen his son so relaxed. He never felt him so comfortable and relaxed, as he was going through the process. The mother writes, every night one or two times a night we have to get up and take him to go to toilet, (1:16). this night he did not even wake up.

Now we know, and now it's your problem. I provide the technology and knowledge of Creation, it's for you to run the structure, that can benefit all of us. No millions in the bank will bring the daughter, which commits suicide from drugs.

Rick, if you like to show the modification, genetic modification of what you found on the internet. Then we take a break and we come back to the teaching. As we announced last week, all the health matters has to go to health@spaceshipinstitute.org, and will be handled from there as a center. Go ahead, please.

R: Okay, this is the link to the webpage from the Keshe Foundation website. And I put the link in our chats as well, so people can access it directly. We can scroll down and it's shows it's the 9th of August, 2012 seed experiment with agriculture. There's a bunch of information here. Do you want me to read that, or do we have time for that Mr. Keshe?
K- Just show it as it is, people can go on read the link.
R: I'll make it a bit bigger so they can see easier online. And just talks about the proposal, and tests that were done, and it shows a series of pictures, and seed packets, and the letter that was sent to people with the seed packs, and the Gans water, the Gans that's used as part of the program. You see some weighing of materials.

K- Because there were sent the liquid, at that time, we couldn't teach about Gans's. They were sent a package of liquid, how to do, what to do as well, or how to make a liquid, different people, did different structures, and different instructions. That's why they show that liquid in the pack, and what they have to do, and how they make their own liquid, and the rest.

R: Everything has to be sterile, and proper…

K- This is done by one of our Knowledge Seekers this way, he was very systematic. This is not the original trial with the seeds in Belgium. This is one of the Knowledge Seekers when they received the packages from the Keshe Foundation, he went through the process.

As you can see the color of the seed (red color) it shows it is GMO. (1:20). These are the chemicals they put on the seed to control it. Normal seed when you get you see it. GMO's are usually coated with materials, that actually affects the genes of the seed, controls it. That's why they are these colors. These comes from the experimental seed center in the city of ??, or, what we call, the ?? Anaheim area, the ?? experimental area which they test different corn, and wheat, and everything else it was taken from them, they gave it to us. So all the characteristics of the seed was know. Go back to the bottom where they grow. yeah there ..

R: Lots of detailed pictures.

K- Very, very detailed, yeah. We did this in China with the "Tiger Nuts." They ran the two next to each other. The Tiger Nuts, if you go back, you'll find it somewhere. It'll take 30 or 23 days before you see the first shoot, and the division. (1:22). With the Gans technology we see it within six days. And the harvest is much more.

You see, those days we couldn't tell you about the Gans's, but the Gans's were already, 10 years ago, 12 years ago was that, it was given to the Knowledge Seekers without them knowing what it is.

The whole purpose, if I remember correctly, we allowed the two seeds to grow separately. Then one without and one with the Gans's, then to compare, and to see. It was set out exactly what they have to do. Like now you volunteer to come to Linz to test the system, Knowledge Seekers at that time, volunteered to do the seed trials.

I used to do a lot of teaching with NASA, what we call, and then they banned us, because we were teaching to freely, and the NASA scientists. We did the same here, Knowledge Seekers in those days started growing testing to show what it can do, and how it can be done. And you can see it. We literally .. changes. The name or address of the Knowledge Seekers are on the envelopes, given back to it. This is done the same.

Now it's at the reach of you. You've seen it, we've (the wheat has) gone back to grass. If you go to the last picture, what do you see in the growth you can see that specifically certain, what you call, (1:24). wheat take actually natural, they go back to grasses, as they were not ever wheat.

So, genetically we can interfere, genetically we can change the situation back to the origin. It's the same with the boys. They go back before the emotion of the father, or the grandfathers, or the grandmothers. This is the way the technology has to be.

We pay for it through our own free will, and we use it at the time of need with our own free will.

Thank you very much Rick. We go for a small break and we come back, and we go back into teaching and then we'll go ahead. (1:25).

Proofed to here >>

<<< **BREAK** >> 460 KSW November 24, 2022 (1:30).

K- Yes, willing able and I hope we can do. In the teaching of the past few weeks and months, we always spoke about the STM and STP, and in that process, we always spoke with how the two would interact, and the two will what we call, work together. In a way if you understood that, the STM is in the center of the body of the mind, in the brain of the man. And the, what we call, the STP, surrounded it, (1:32). this will come from the extremities and different parts of your body, how you touch, it feels. How you felt when you touch your partner's skin, how you felt when you cuddle the dog, creates the emotion, and that emotion in sense from this to this, creates at certain position an emotion.

Let me make this bigger, then you might understand it much easier. This is your Soul in the center of your brain. Then this is your blood circulation, around it. We don't see any blood vessels inside the brain. The Soul does not allow nothing to work and distract it. You want to contain me, sit around me, not inside me. This goes your arms, and legs, and everything else, depends where you are. What it brings in interaction with the environment, in sharing it with the Soul, and in what comes out of the Soul in saying what the Soul feels, this gives you the point of emotion.

Which with the conversion inside the brain of the Man will become different emotions in respect to different parts. When this blood transfers its emotion at this point, (1:34). when it comes to do what it wants to do, and it goes to it, and transfers it. At this point to go to the Soul, here this becomes a joy, where here becomes the pain.

So the intermediary is the tissue cell of the body of the Man, which sits in this manner across. That's why when we open a brain we see different textures, different densities, absorbing the rays from the Soul. Very much, as I always said, you cannot have a Solar System if it's Sun does not sit in the center of it. You can't have a Solar System with a

Sun sitting outside somewhere here and not being in the center, does not work. The whole system will turn towards it, and become it.

It is the same, the Soul of the Man sits within the structure. The proximity we saw, the size of the Solar System, the Earth, the Moon and rest, becomes the kidney, the liver and the shape of the Man. Do you need .. an intermediary between the Sun and the Earth to tell what the Earth needs to do, and to put the Sun in a position of work with Earth? (1:36). Does the Sun negotiate, talk to someone to teach Earth how to rotate, how to move, how to become that emotion of being there? Or, as now, he has the control and understanding of his physical structure, it communicates with it direct, with the understanding of other fields and the environment. So, the Soul of the Solar System, the Sun, you call it, the Soul in the body of the Man, does not need any intermediaries, as it interacts. Now he has his dimension, he has his parameters, and he works.

The biggest question now for you as a human race is this, if you understood this, that the Sun, and the Solar System, and interplanetary system, where it does not need an intermediary negotiators, how do you as human race allow Mullahs and Ayatollahs to tell you how to feel between your Soul, and the STP, and your physical life? But now you understand you're responsible for it. This brings an end to the abuse of religions, if you understand the principle of the knowledge.

Ayatollah Khomeini of Iran, walk away from that. Otherwise, I bring you to a shame. You abused enough Iranians. Walk away from the office of Ayatollah Khomeini of Iran, and the Sepah and the military advisors. We don't need any intermediaries, as we as Zoroastrians, we know, (1:38). we don't need to be, between our Souls, and physicality, to stand, to be correct.

The same goes with the office of the Pope in Vatican, and the Jews in Jerusalem, and the rest. Mankind has matured, that it does not need abuse by false intermediaries, as the Man now has a direct connection between the Soul, the Soul of Creator and STP of the Man. Bring the Koran and I challenge you sentence by sentence to show, that the time of Messiah has come, and he's amongst us as a Soul of every individual of. Now we understand it. This come to an end to the religions.

If, as I said to the other, what I call, diplomats, the only way to stop the wars is to show the fallacy of the religion, as Man now is mature, that does not need intermediaries. If there is no intermediary between the Sun and the Earth, there is no need for intermediary to control the emotion of the Man between the Physicality of the Man, and the STM, who lives by the ethos of Zoroaster and Mitra, the ethos of the Creator.

Now we understand, that the Man is matured to the point, that in the depths of the Universe, when you have no dimension of Physicality (P), but the Physicality sits within the structure of the energy of the STM, the conduct has to be the same. (1:40).

Why do we need to entrap the Physicality within the Soul for it to conduct good, where we allow it to abuse, when the Physicality takes over the Soul, or encages the Soul? This

brings us a lot of understanding. This brings an end to the religions. This brings an end to the abuses in the name of the Creator, that not even single ray of the lights, of the Cosmic lights of Universal lights or rays of the Creator haven't reach Ayatollah Khomeini of Iran. How can they claim to be of it. The same with the Vatican. I put my life at risk, but I've been here for thousands of years. I just changed the frock, and we get you.

The challenge was that they're the protector of the faith, the protector of the God's will, the God is here, answer to it. Otherwise ?? you will never end. The God is amalgamation of the Souls of the humanity.

This is a call for all the religions to end, and you challenge, we'll show, we'll stand. My direct call goes to those who are setting Iran to protect the return on Methi. He has arrived, disarm, it's your own Soul, you have to walk away with it. (1:42).

Ayatollah Khomeini of Iran, I have a direct call to you, open the Koran verses by verses, and we answer scientifically, knowledge verse by verse. The time of Methi has come, and the Methi is amongst us, as is us.

Now, when the Creator hasn't got intermediaries, but the people who inform of the knowledge, he does not need intermediaries in the name of the Mullahs, Ayatollahs, Vatican with their report of abuse, Jerusalem priests, and, what we call, rabbis, with the misleading of the conflict between the two nations and, what I call, one nation of the Palestine. The same goes to the, what we call, Buddhist and the rest of it.

Religions become one, when Man understand religion means the conduct of the Soul, and not a way to, what I call, put it through as the faces of abuse. If you understand this process, if you understand how you can connect, and how you are connected back, like the Earth to the Sun without intermediaries, then you should understand there is a bigger scale of work. The Universe, the Unicose, and other levels in between, which Man is not aware of, and finally the Totality of the Creator.

We've come from this end by knowledge, and our job is to come to and go back to. (1:44). To you the cycle of coming and going back to, maybe 50 or 80 years, to us is billions of years, we have plenty of time.

As I said very interestingly, very recently, if you go to Tehran, there is a district where they have built in a military base in central, now Tehran used to be in the north of Tehran, out of the city years ago, a religious center with a dome, which they gather for big events. Where Ayatollahs give talks and whatever. Ayatollah Khomeini of Iran. The center dome, where you have built in ?? Aposavah, you know exactly what I'm talking about, right in the center of the dome is where I was brought up, and where I lived. You have already built a place to protect the Soul of the Creators work. It's not accidental.

I went there, I saw it. I said, I knew what I'll be at the age of 8 in this place, and you have already built a dome over it, to protect it. Right in the center of the dome is where I was brought up, and I became to understand what is to come.

Mankind has to become to understand that the time for intermediaries is over, (1:46). as when you are in the deep space, there are no intermediaries, and your children will understand about the behavior, the truth of the message of Christ, not about the fallacy about the Man who did not exist, and the Man has created to believe in.

You have to understand it, you have to come to realize that it's you who's your Savior, it's you who has to be the giver, it's you who has to expect none. I told you few minutes ago, we give the knowledge to you if you're an addict freely to walk away from it. We make it now possible, that we don't need to go in the systematic ways of Alzheimer's and Parkinson's. There'll be sessions in the coming time when we ?? eradicate the whole process, that anybody that suffers from the Parkinson locks into the system at a given time. Hundreds of thousands of you (will) walk away without Parkinson.

You support me, I support you. You betray me, you betrayed yourself.

Now you understand why I went for you as Satellite. The Soul of those who become, and became Satellites is already aware of the change to come, and they will be part of it. (1:48).

The understanding of the transmutation of the fields of the Universe will become the new occupation of the Man. In a way, up to now we looked into the skies to see the UFO's. Mankind will look into the skies with the eye of the Soul, not with the eye of the Man, and Universe and Unicose is its oyster. You've got to understand that with the new understanding of the fields of the Universe, fields of the Universe in motion, what you call, energy, fields of the Universe in the uniformality of the motion you call, plasma, now has to be understood, now has to be integrated into the structure of, what we call, life of the Man in the space.

We need to bring this change in, as now mankind has matured enough in numbers to be able to bring that burden of the change for the rest. You will be amazed, in next few weeks and months, how the drug traffickers will dump and try to make the dogs and the cats addicts, because they can't reach their bosses. You do the same with your cats and dogs, just buy them a headphone. Put them on the line, (1:50). the hours that is transmuted.

We have set our system that there is no hacking. Now you have to understand how to bring the two fields of your STP, you call it, a spirit, and the STM to work together, that does not need the brain itself. But it works without it, the way you shall do when you become the passengers of the Universe, as your brain in its amino acid cannot exist. We don't have a brain between the Earth and the Sun.

It's got to be part of the knowledge of Man in the space, that sooner or later, mankind will come to understand that the totality of the knowledge shared belongs not only to Man, and is the right of every citizens of this planet. It's the right of all of us to have access to it. We don't make a game of it, we make a life of it. (1:52).

Keshe Foundation is set to bring that change through the technology, and we will have many enemies, those who want us not to be there, and how they can bring that condition for us not to be there.

Try to understand, what the emotion is. Try to understand, how you create that emotion. Try to understand, in what condition of Physicality you create the strength with the interaction of the field of the Souls, that gives you that emotion. Then go to your Soul and create the same field strength, that interaction with STP creates the same emotion. Then if you become mature to this, then doesn't matter if the Soul is the protector of the Physicality, or the Physicality is protection of the Soul. They work in synchronized manner, because they're both aware of everything.

When you work in that strength, all the other Souls of Physicality's work on the same strength, then Man shall not lie, Man shall not cheat, Man shall not kill. Because, I'm hungry, I need fields and I'm given fields.

It's got to be understood by majority of the people, and gradually by all from the point of the first education, (1:54). what it means to live with the Soul, and what it means the existence of the spirit, or the dimension of physicality. Our children will be educated to the knowledge of the Universe from birth, the way they inherited the X chromosome, and became paralyzed, and become all the diseases we call it. It's just an energy and emotion which is brought that change.

So the same shall be when the Man understand this in his childhood within the fathers and the mothers energy fields that has no X chromosome, or Y. ?? When the children of Man are created from the fields of the STM, Man shall bring no imperfect child to this world. That time has come, and that time is amongst us. It’s the time for us to bring it.

In the coming time, in a very, very short time, as we are working in the background in development of technologies, as our team have to understand it, there'll be no room for vaccination. We transfer the energy of, what we call, the virus, which your body of dimension of Physicality, could be a virus on this planet, but another planet, or position in the Universe is your food, to understand the transmutation from position to position. So, you will come to the point, that if you want to have measles protection for your child, this channel, this time allows this to be received as an energy.

There'll be no ADHD, there will be no autism because of the mixture of the viruses. (1:56). The injections are fake ways they do, deliberately to damage. Now, gradually your eye is opening up, the capability and the possibilities, which is now, is open to mankind.

You go on channel 24, you can have as much apple as you like. But you won't put an apple, you won't kill an apple. You want to have a lamb, you go on channel 26, you get the taste, the food, and everything of it. You don't need to slaughter an animal. Now you

understand how extensive this will touch you, and how Satellites are needed. Because the electronic satellites have the limitation of physicality.

We need the Soul Satellites, which is of same, and transmute the same. I am there to give and to exist. I made Man in the image of Myself. Is our Creator ADHD, or is He a drug addict? None. So should be the Man, now the Man has the knowledge. This is the cornerstones of the teaching, this is the cornerstones of understanding the embodiment of the Cosmic Rays, the Soul, the Gans's and everything else which goes with it.

What will be the next step for you to understand the strength of the Cosmic Rays? Which one you need? Which one you don't need? (1:58). How do you attract it to yourself and how you reject some, because you don't need it, even though they're are target?

Very soon, very soon, once we start these systems to go public, for you to tap into. You will tell us how you feel. You will tell us, today I didn't eat, I'm not interested, because today I received what I need as energy through the, what we call, the channels which is set by Keshe Foundation.

We govern the planet, not pieces of land. We govern through the Soul, and technology, and knowledge, not by the gun policy, and whatever sits with it. We need your support to be able to bring that change scientifically, correctly, and with the process, and understanding of the whole lot, that we do not bring the change by wars, we bring change by love and creation of new condition.

I hope you understand what's on the table today, and what is the part of the teaching. The main target, the main objective of today is, you do not need intermediaries. Nobody can protect the right of the Creator, when themselves are abusers of the name of the Creator, in the name of Ayatollah and the rest of it. (2:00). I hope you understood the teaching of today. Has come to an end, and you understand scientifically why, through the abuse of the Man by the religion. Unless you enjoy an intermediary, because you still think, I have found a leader, so I double in weaknesses of my own lack of understanding.

Look to understand, try to find out the knowledge, and at the same time try to be precise, that you don't need another intermediary. You understand the knowledge, that there is no need for an intermediary anywhere in the Universe.

I always said, my message hasn't changed, it's for you to understand and mature to. When I said to the professors in Jeddah University in early 2012 – 13, when they wanted to send their students to the KFSSI, which direction do you get your student to pray and bend, when is traveling in the span of Universe, and the Earth is rotating, and they're upside down, and they are in different parts of the Universe which rotate itself? Where do you find your God to pray to? Unless your God is within you. Understanding the conduct. The message has not changed. And the technology and the knowledge has not changed, we just explain more of it, that you understand it more freely. (2:02).

Questions:

Are there any questions? Or do you have any questions or doubts in what your capabilities are?

R: .. I have a question. How are you going to get a headphones onto a cat?
K- Easy, put it on his ear.
R: Yeah. Okay, well, I'll let you try that one first.

K- The cats have ways to be done to. Don't forget, you don't need to put the headphones, you can put them in an environment, even in their box, that they are entrapped in it. You understand?
R: Sure, you can just… It doesn't have to be a headphone necessarily. .. a speaker or something.

K- Yeah, how many of you had a headphone the first time we tried it? How many of you just listen to it?

The reason we go for the headphone, because we understood in our trials, people who come and sit in the units, they have problem with everything else. Seat is not comfortable, this, that, that, it's too short, too high, whatever you want. A reason to distract themselves. When we put the headphones on it's amazing. The efficiency goes up by 10 times more. You understand? So, that's why we go for the headphones, (2:04). because it directly sits. Your ear, the two ear holes literally crosses the Soul.

We'll teach you slowly, slowly, how even when you have ear phones, the things you can do physically, to move the fields to different parts of the body. It's no use fixing your head, your brain, I call it, with the position where there is, let's say a, Parkinson damage, or you have a disability. Without actually ?? which disability you're talking about.

There is much more to this technology than just thinking, "oh, it's a headphone, I can make things." As I said, you will find a lot of people, very soon, will bring stations for food, or whatever. But you'll find out none will be able to deliver, because there are hidden technologies which is a space technology, Universal knowledge, which has been put into Keshe Foundation systems. We don't allow interference, that then these people can abuse it.

Even our own people don't understand when they make things, why they are making it, because it's made in a way materials, and their conditions, that creates the effect we want, and that effect stays as it is.

Now try your cat in a box. How do you get a headphone over the fish, which is always anxious. You can't ?? buy a headphone on the fish can you. How would you reach the lion not to kill? How do you elevate the Soul, you can't put a headphone on the ear of the lion. (2:06).

Any other question?

R: Okay, thank you.
K- Now, have you sorted out your position with your cat?
R: I don't think I'll ever sort out my position with the cat that visits me. It's usually due to come in right about this time 2 - 3 o'clock in the morning. It hangs off my windowsill until I open the window and it can jump in.
K- It's the neighbor's cat paying you a visit?
R: Yes.
K- The food must be delicious, yep.
R: Yes, better, and that's the end of it.

K- It's amazing how people behave towards their cat. In our factory in Austria, the people are very kind, and very generous, and whatever. They start feeding a cat, which was stray around there, we thought. After a while, the owner came and said, can you stop feeding this cat, he is not eating at home. But I think the cat gets a better food at the factory, and the lab, than it gets at home. So, he always comes for the food. And they tried to feed him. So it depends where he enjoys more.
R: Steffania says in the chat, cats choose their owner.
K- The whole of Keshe Foundation is a cat owner, is the cat .. owner of a cat, it's gorgeous. They always hangs around there. I think it takes from the fields coming from the Center.

Q: .. You said in the 458 Knowledge Seekers Workshop teachings, (2:08). that there is the same structure of life as on planet Earth throughout the Universe and even in the Solar System, but without the dimension of the matter state. So, the question is, two questions. One, is that system where we go when we dream?

K- Not really, because when you dream you still got the physicality left behind. You become aware of its existence, but you're not, in a way, you left the totality, because the body still left behind.

In some cases, you can replicate the, what you call it, we can create the physicality. But the physicality is a different Physicality than you actually have on here. Many people have done it over centuries.

I think if we teach the beautiful people how to do it, we will see individuals, as they want to be. Maybe .. we can free them from the shackles of four or five of them in one house, as I call it. We'll run, we'll run a test for the schizophrenic.

One of the Knowledge Seekers right on the top of the Keshe Foundation, not there anymore, is a schizophrenic, with four different characters, and responds to different names to each character. If you call this name, the behavior is this, if you call that name, the behavior is like that. (2:10). Would we gave four physicality's, to four of them and free the shackles of it? One always lies, and one is always aggressive. They don't interact, they are aware of each other, but they never, they don't like talking to each other or doing anything. Maybe by giving them different physicality in the dimension of Soul we see the

true beauty of each one of them. And you have to call the right name, the right Soul will appear, and Physicality even then changes in that dimension. Some of them a lot of you know.

Any other question?

Q: .. The second part of the question, do people who disembodied or die, go to these places and continue their lives there in this dimension?

K- We always said, the Soul has a field strength, that it gathers position for that. One of the beauties with the STM, it's one of its contributes, is that it's created by interaction of the multiplicity of matters state field Gans's. So, it fits, more or less, anywhere in the Universe. It's not mono-energetic, it's not monocycle life.

When you look at your body you have, (2:12). every element that there is in the periodic table, is in the body of the Man. It cannot be, because if it is part of this planet has become part of the Man. We've lived here for centuries, thousands, millions of years, we have taken it in, doesn't matter what it is. And there are still parts of the Universal Cosmic fields, which converted to the matter state in the body of the Man, which the scientists up to now, have not even understood. So, we carry parts of the fields of the structure of the Universe too within us. Just because we don't understand it, it doesn't exist. As we never knew there is a uranium and plutonium, then we found out there are. Then when we tested, they said, "oh, it is in the body of the Man too." All of us carry good amounts of uranium, and plutonium, and all sorts of things.

But there are other elements, just because we couldn't understand, we knew our chart was up to, let's say, gold or silver, we could never imagine the material of plutonium, uranium exists. Now, we know what it exists, and we checked it's in the body of the Man. The same is the spectrum of the fields of the matter states, or what we call, energy fields as a Gans's of the Universe is within the Man.

And Man will adapt to it, when it comes to it, when he approaches, and then reaches, or when arrives at the given position, because on Earth you need very little uranium, but on planet Zeus you need tons of it, for you to confirm ?? existence. But because you have the essence of it in the source of your life, you can call upon it, to extract the fields of the Universe, to confirm your existence.

So, when you look at the body of the Man, and you say, you got so much gold, or so much silver, (2:14). there are more materials the Man hasn't understood which belongs to Universe, belongs to beyond the Cosmos, and we are part of it. We came through that cycle. So it's part of us, but we haven't found that yet.

Many materials the scientists imagine will exist, or exist, or it could exist in the Universe through the, whatever you call, blah, blah, atomic mass, atomic weight, or whatever. You have imagined that, why you're looking to find it in the mines of the. Look within the body of the Man in the right way, you'll find it. Then you don't need to call it imaginary

or something exotic. The exoticness is the lack of understanding of the Man, was not understood the process of Creation, that's all.

Any other question?

Q: .. Monday, you visited my great granddaughter with autism. For her to participate in the treatment, she needs to have treatment, but we don't have possession of the 15 to 20,000 Euros costs. Is there anything we can do so she can get the treatment?

K- First of all, we don't treat. The doctors were online when you spoke to them. (2:16). We assess if the plasma can work on your granddaughter, or whatever. The cost has to be met, because we have a cost to meet. We are a NGO. We don't make profit, whatever we make we put (back) in, and for years I put millions into it.

We have come to this point, because we were defrauded by a Knowledge Seeker, so called Knowledge Seekers, so called. They are not Europeans. Because we heard some of these. Somebody wrote in the German chat, Mr. Klaus has defrauded the Keshe Foundation. Mr. Klaus has put his life on Keshe Foundation. You dream to be him. Again propaganda by the pedophiles in Germany.

We have to meet our costs, we have to cover our costs. It costs thousands every day to keep that place, you come for half an hour, as a Exhibition Center. None of you have ever paid for it. The factories, we paid, we lost the money. We gave to people in America to open factories and do things for us, millions of it. We never spoke (about it). Now, maybe it was a good thing in the hindsight, that this guy came, and with the team, he brought the team defrauded for millions. When we asked for our money, they threatened us with everything. You'll be amazed, we'll release these documents, because now it's in the hands of the banks. That how threats I received to my life, (2:18). and the Keshe Foundation, everything else, once we asked for our funds back. So, I covered it for 10 or 15 years. We're still covering it. We're still here. But you want to use the knowledge and the facilities, at this moment of time, we have to cover extensive costs.

R: So one thing people might do is, you can start, what they call, a "GoFundMe,' or other similar fund and allow people to support you in.

K- Support each case, yes. This is the way. We did it with these two children. Keshe Foundation came out, because we know the implication of it. And all the doctors you see in the background. It wasn't just, I come there to assess, scientifically we can change such a thing. It's the doctors who make the decision. We don't come online on our own, we're there with two or three doctors in the background in the setting. All these in the long run has to be run. When a doctor puts his lifetime on serving you, he has to be served.

The same with operation in the Centers. Our expenses run into double digits every day sometimes. Put thousands in front of it. You have to cover the costs. I did for years. Most of what I put in was stolen by deceiving Knowledge Seekers, (2:20). in Europe, but not

from Europe, they're still playing innocent. So now you have to carry the burden, otherwise you lose everything. Because it's not there to support. I have done for 20 years.

It costs, .. when we charged you 2,000 Euros for half an hour, that will cost, for to run the center. It has to be covered, if the systems around the world are there to serve. It's like the (computer) servers you use, you have to pay for it. You rent a car. You pay for that house, by the house you use. Simple as that.

At a moment we are in that stage. We try to bring the changes. This process of addiction, it's going to cost the Foundation, once we complete it, about 2 to 3 billion dollars. This is the money you don't pay for, to drug traffickers, for cocaine and the rest of it.

You know, now in Europe, it's tradition in America, they grow harvest wheat, or whatever, and they throw it away to keep the (price) control. Very soon, the way we're going, the drug traffickers will throw all their goods into the, on the streets, because nobody needs it. Even in the street you don't want to touch it, because you have a cure for it.

Actually, in a way, this fraud has brought us, in a way, you want to help yourself, you have to set up in a way, that the Foundation can survive to do it. I would like to see, because of the. A lot of scientific results for our team and doctors, the change in these two boys, and I'd like to raise 1.8 million. (2:22). That's for us, it can be down. We need at least 150,000 to start with, immediately. We're not coming to sell you anything, it's your responsibility to safeguard the, what we call, the technology and the next generation to understand it, and to share it.

As the gentleman says, for granddaughter. We have something, most probably 1 billion grandfathers and grandmothers wanting to see their grandchildren healthy, and their children. You pay National Insurance, you pay to your governments and at the end of it you get nothing. It's the process of we do it. Sometime in the future will not cost anything, because it's just a structure of people putting it.

Many people came to us as volunteers to Keshe Foundation and then they asked for payment. Then when we cannot do, they were volunteers, now the wages, and they go, and that's it. They didn't come to KF (to serve). People like Rick have been here for years, and there are others. We didn't come for the money of it. We came to bring that change. Somehow we support it. We find a way to run our lives in the background. I lost my son because of the Foundation, but I'm still there to serve. (2:24).

The best thing happened to me was, my divorce was completed months ago, and I could physically separate my Soul. It's just that you understand what you do is for betterment of the millions and the changes they bring. A marriage has a soul and the STP. The point of divorce separates that STP and you're free.

The same is with you, you have to decide where you want to bring that Soul with the grandchild with the others. We are here, we try to create a mass delivery, and sometimes

we have to do things, which fits that the mass can receive it. It's your job to create ways to fund it. We cannot do, I cannot tell the guy, you come to the Center, how many of you come there, hundreds of you? Yesterday, there were 10 - 20 people visiting, going for the tour. Did they pay a cent, did they do anything. They just came, they learned, they got, uh, a new knowledge, and they left. There is a light, there's a person who teaches you, we had two people yesterday teaching, the facilities, the cleaner, the rent on the property, where does it come from? It doesn't follow from the sky.

Mr. Keshe paid for 20 odd years, 30 years for it. Now, we got defrauded by one of you deliberately, so, we all have to cover it. So, if you ask how can you pay for what is there, (2:26). this what we ask is, what is there to keep the system running. And you pay not to the Keshe Foundation, you pay to the doctors, to the offices and everything else, not to us. It's set up to benefit your own community, and it's set up to benefit your own process and then we get paid for the services we provide, as a service provider. Technology, knowledge, know-how, and the rest of it.

Any other question?

Sorry, the thing is, what we get paid, we invest back in you. So you're investing in your own life and your own future. Just to run this Wednesday teachings and everything you see in the background, it costs nearly 10,000 - 15,000 a month. And you come just for three hour session and you walk away, I learned something, or it was this, or it was that. Carry on.

Q: .. Have you considered having the clients work with a bank to extend, some kind of credit facility?
K- Pardon?
Q: Have you considered working with a bank where the clients can be extended some credit facility?
K- That's not our job. (2:28). We are scientific people, that's not our job. You go to bank and borrow, not us.
Q: No, what I'm saying. In fact, if the clients work with the bank.

K- You see, we are international organization, which bank do you want us to talk to, which country? You know, the financial arrangement, you have to be the citizen, you have to have a bank account, you have to have everything else to be able even to consider, you have to have the assets, you have to have collateral, and the rest of it.

Q: That's part of it. That's what I'm trying to say, maybe you don't understand. I'll give you a scenario. I have a client willing to get qualified in his country by his bank. They will give you a guarantee that they will continue the payment, but in installments ?? payments. They give you a deposit. They go through the process, but the bank gives you .. like a guarantee.

K- We are not in this kind of game. This is not our problem. This is something we don't want to get involved in. We are a scientific organization, we listen to some people if the case is interesting for us.

You brought the guy from Nigeria this week, and you sat with them, yeah? The family has spent thousands and ten of thousands on their child, taking them all over the world. What happened? They already tell you, they use the Gans's, they believe in it, and whatever. Then what accusation they made, when we did not give their way? We became the worse. They have to live with that child, not me. They have to wash him, they have to feed him, he cannot walk, for the rest of his life. (2:30). It's not my burden, it's their burden.

We are there to see the possibilities that we can help, one we help, we can do the others. We are not bankers and I don't want to get involved in this kind of things. It's a straightforward, you go to the bakery and says, give me a loaf of bread, I go to my bank, I pay you in installments every day for part of it.

It's you who needs it, it's you who has got to sort it out. And secondly, it's the decision of the structure in each area which they see. Maybe in Tehran you cannot pay 25,000, but you pay ??, but the decision is made by the doctors and the people ?? at the point, not by us.

And when they don't get it, they accuse you of everything. I have a very simple, simple straightforward mindset. I don't have to live with the disability and the pain, why do you make it my pain and my disability? Because you are too greedy with everything else. They live in a Mansion of hundreds of thousands, millions, and they do everything else, but they just want to say, we are trying to do just for internal satisfaction.

Q: They accused me of stuff too.

K- Exactly. We don't need it, it's there. If you're there, and you believe in it, you'll find a way to do it. These two children we saw, and I know the family was not expecting, everything they had they bought the wheelchair, they bought the car to be able to put the wheelchair in now. They have to change the car now to be able to two wheelchairs very soon in it. They have to install the lift in the house, (2:32). every cent of the these two young parents is going to foresee for next, maybe after the day the two die, what happens to the car, what happens to all this time, what happen, they invested the love, and care and the emotion they left behind. That's what we are responsible for, that emotion. They're trying to stop that.

We all die, we all go through the process. We're prepared to spend on ourselves, but not for the others, because, I always say, when you think of giving to the others, you're taken from. You've got to make it available, that it is there to be done. Now in two calls we see.

We are we're literally getting bombarded by people who need help. But before you call us for help, understand there's massive expenses in the background with all these things. We

have very few people who work, or being around the Foundation, like Rick and the others, who put their time freely for years to come. Anybody else you've seen they come and gone, it's because they wanted to be paid. Come sweet the first few months, and I did this, then I need to be paid, because I'm doing this. If you have be paid. One time when we fell for this people, Foundation was paying 350,000 a month, wages and expenses. Then we watched the Zoom private conferences, that we are cheating Mr. Keshe, he is stupid, he is paying us, we just sit there. I watched their videos. They're so stupid, that they put them on the Zoom recording. Now it's yours. We've done everything we can. (2:34). Now you want to help yourself, you have to cover the expenses of it, because now it's real. The Microsoft doesn't wait for, there was a three, four thousand bills every month for the software you use, the Zoom does not. All these Zooms, all of you use private Zoom of the Keshe Foundation. We pay for it. Sometimes it shocks me to see how much I pay to Microsoft, to Zoom, and all these providers of services, which you just sit there and enjoy.

Any other question?

Q: .. Are there still spaces left for the "All Purpose Simulation Flight Experience"?
K- What does that mean?
R: Well, I think it's advertised in the KF store as the "All Purpose Flight Simulation Experience."
K- Yeah, that's the first one, we still exist. People come up, still see one or two, but then it has to be organized to fit into the other times.
R: So, they can still apply for that, then?
K- Yes, he can still apply.

Q: Salomea … I'm very happy to inform you that I had a urine test and it's alkaline, because I use only natural Gans, I mean, the leaves. (2:36). I drink for one month only juice of the leaves, only small. But I need distilled water. And for this reason, I am kindly asking you, how I can make myself this distilled water? Because in my urine was crystal or phosphate. And I think that I have to use distilled water with the Plasmatic technology. If you can help me I will be grateful. Thank you.

K- You cannot create a distilled water as you boil it, and take all minerals out unless you have a specific, what you call it, systems. You can kill the germs, you can take elements out of the water. But the way you distil water by evaporation, it is possible, it can be done, but it's too expensive at the moment, too expensive. So, you still have to boil the water and collect the steams. As a friends of mine said, the best distilled water, is the salt of your own sweat.

Any other question?

Q: .. I've noticed that having Gans's in the same room with people I know, that have never seen it before, (2:38). changed the way we talked and what we talked. We talked in a more lovely and open way, could that be a possibility?

K- 100%. 100%, not 99. We use Gans's for change of emotion in families. We make a specific Gans's. I've done that many, many times, you just place in the house, where there's a conflict, and anger, and whatever between the family, and you wait. And you keep on seeing the Gans's reduces, and you top it up, a few days. Because when it goes (Gans reduces) it means those are the energies which you use. The leftover (in the jar) is not what the family needs. So you keep on toping it up, and then you see the changes.

We had a strange relationship, (fighting) like cats and dogs, as we call in English, husband or wife. Nowadays, the house is absolute silent. People stop fighting. Because they don't need to take energy from the others. When you fight, you're trying to prove, they try to take get energy. When you receive that energy without fighting, you don't need it.

The point is that, the amazing thing with the new Wellness Centers is, there'll be rows of systems, but you won't see anybody in the systems, and somebody around the world somewhere is getting benefited by that system, being in that Wellness Center. (2:40). That could be you, that could be a Chinese guy, whatever. Instantaneously. We are watching how instantaneous this system works, and it's amazing.

Now, when we said we are going to the Mobile system to move you, we have to do all this tests, just like what we move, what we don't move, and how you'll feel, or whatever. We are seeing an amazing, amazing data and realities which are coming up. How people feel, instantaneously they change.

We had a case, I'm sure the person is on the line, it's one of the old Knowledge Seekers, when you come on line with us, and when you talk to us, like the way we did with you with the first trial with Rick, you don't switch off your microphone. Whenever you're in these processes anywhere in the world, you have to leave your (microphone on). Because people think they put a headphones on, and they switch off their microphone, as they cannot be heard. It's like one way traffic. You hear my Soul, but I can't hear yours. How can I feed you back?

So, when people come with the process with the Keshe Foundation in all the Centers which are coming up and they are ?? running. You leave your microphone open. We tested this in a very funny way recently that, by the Knowledge Seekers switching off their microphone, as they don't want to hear, they might fall asleep, they don't want you to hear them snoring and the rest of it.

We realize now, we know about it, we just tell you, can you switch on your microphone, otherwise it's just one way traffic, you get nothing from us. And immediately they switch on their microphone, they see the changes. (2:42). This shows the system is interactive, this shows the system works so fast.

This is how it will be built up. We are looking, if you have any kind of. Don't come up with us, I have a sausages they are .. We get these things from people, I had two eggs, I

got poisoned, can you help me with my things, because I can't? We've got more other things to look at, and the rest.

Before you get in touch with us, look at your financial situation, what it can do, because expenses has to be paid. When you go to the doctor, you carry your money with you. You have, when you approach us, you have doctors on the line, it's their time, and the facilities used. When you go to a doctor to use the MRI, you have to pay for it. You facilitate it before you go out. I remember Dr. Kostova used to tell me, people come to my surgery, they're sick, and they come with a chicken, or eggs, or vegetables, that's my payment. I go home with a sack of fruits for the whole day, and they go home being cured. Unfortunately we can't accept eggs and raw potatoes down the line at the moment.

So, when you approach us, when you come in, when you send it, look at your financial background, Foundation has costs to cover. At the moment, as we increase the numbers, the expenses go colossally higher. The thing is, when the doctors in Keshe Foundation handle you, it's for life, it's not for, what you call it, for a few hours. The change is fundamental, the changes in all your body, everything. (2:44). Because we don't go to your body, we only handle the fields of Universe in your body.

Whatever your body does to it, it's how it balances itself. We are not in the field of medicine, we are in the fields of, what we call, energies of the Universe, and that's how it works. Any other questions.

I said to one of Knowledge Seekers as a joke few days ago, I wonder if somebody get sick in planet Zeus, what would he like to pay to the Foundation? What they have there, is no use here. So be prepared. It's there. We're there to respond, we're there to do things. But, it's like you go, you actually go to doctors now without a destination without an appointment, and they have to be paid. If you go nowadays on the line, there's a credit card, you pay the credit card, you can speak to the doctor. Now, this is facility, doctors around the world are providing their wages, the centers, all the machinery put in there has to be compensated.

Any other question?

R: .. Jefferson put a question in the chat here regarding buying your ebooks from Amazon, or even from the KF store that directs to Amazon books. In Brazil, he says they're not able to buy your books, that are from Amazon.

K- That's a limitation .. which Amazon puts on which countries we can sell. There is nothing… I'll ask the question, but I know. (2:46). we had again another Knowledge Seeker who is with us, introduced a guy in London who was supposed to promote us, he sold thousands and thousands of our books, we haven't seen a cent. He took 10,000 Euro from the Keshe Foundation. They all came sweetie, witty from Greece to rob us, and they disappeared when they started robbing. We know he put the Keshe Foundation on Amazon in a separate way. Now we're trying to even block that one. We trusted the

Knowledge Seekers a lot, when they came in, we found out that they're the worst ones who come to deceive and to cheat. We'll wait and see.

But it depends, Amazon decides which countries, or our team has decided in which countries we want to sell things. But, I will ask them to be checked. A number of Keshe Foundation at the center if you come, books have been signed, because a lot of people asked for signed books, they are there and we put as a special thing to be put, a very few books are kept there signed. But we stopped selling for example, the signed books and you only could buy it in two or three countries the signed books. Because a lot of the signed books were blocked and stolen by the Belgian government and ?? they were kept there. And they were not delivered. So, you'll have to speak to Amazon Brazil, or we check and see why you don't ?? get them.

Any other question?

Q: .. (2:48). Recently you told us about worsening depression associated with Corona. This week I accompanied an infected Knowledge Seeker who started the protocol and recovered very quickly. But she reported that her emotional state was severely shaken and she had strange thoughts. Could this be a new mutation of the virus?

K- It is a new mutation. We've seen it. This is the new virus mutation. It's not a mutation, it's a stronger, it has moved from the physical strength to the emotional strength. Yes, they feel suicidal, they feel tired, they don't want to live, they get sick very quickly. Some of these new versions brings down their immune system lower.

We see now when the Chinese government has brought the enforced two or three weeks ban (lockdown) right across China, for next 2 or 3 weeks. Each district decides on how they handle it, and what restriction is. Many, many areas of China is running to problem because of this. Many, many places in China have a problem, people cannot move, they're becoming aggressive, we've seen problems even in, god knows. Local areas people have been literally locked down. They want to get over this new version.

But actually it has a solution very easily. If you get the emotional condition with the new Corona, you just need to add a little bit of Magnesium and increase the Zinc, with the AA of it. It takes a few weeks to get rid of it, but it's horrendous from what people we've seen, they've been through it. (2:50). Many of them are becoming suicidal. This is what we've seen, and yes, it's a new version ??

The only problem, or the only solution we see if this Corona gets on a stronger length or a strength, what would it do? Would it move more, because your brain works in a very different way, then what we are used to.

We see, this is the brain of the Man (makes drawing), this area outside is the blood circulation, then you have the physical part of the brain, which this part on the top layer is to do with your Physicality, your ears, your fingers, your arm, all sit in this area on the extremities.

So, the strength of this field, as it goes in and increases, in contact with the Soul, then it creates different emotions in different layers. You have this as the layer of the emotions.

Then you have layers here (close to center), which Mankind has not even understood. These are the interactions and emotion with the Universal Community. We already have it built in our brain. Then you have the, what we call, number of layers here, which brings disabilities, it brings, what we call, separation of the physical life. Then you have a very, very subtle extreme layer here, which is the layer of death. When this weakens, which becomes, in a way, equal to this one, it's how you go dreaming at night. (2:52).

Then when this layer there, completely balances off with the outside, this opens up and you die, your Soul leaves. The death layer is a very specific field strength. So, as you go through the body, you have the emotion and, more or less, the emotions goes in this manner, in the both sides, left, or right, or whatever. Then you have the other layers which sits in the body of the Man.

We have a layer which has been, and work has been ?? it's something which now we have, we come to understand it. It's the layer of the visible, or what you call, the STM with the dimension of Physicality in the space, Universal level. It's a very specific ?? layer. And it has actually, what you call it, sections. In which you have one which sits most ?? outer to do with, for example, the Earth, and then you have the Solar System, then you have the Galaxy, and different strengths ?? allows, as you go deeper you go, and somewhere in here at the end of it, before contact of the, what we call, the "death cover," is the level of the strength of the Soul of the Creator. We all carry that.

With what we do with the EU we weaken this (red line erased = blood flow around brain). This is what we take out. And our system takes, in a way, condition of it (takes over blood flow fields). That's why now the Soul is free to move. (2:54).

It was very interesting when we were talking to the boy who you saw him standing in the stand, upright wheelchair. We asked him, we said, did you go to the Moon? Because he wanted to go to the Moon. He said, no, but I felt the Moon. I said, this is beautiful. It means that the Soul has already moved, the Physicality doesn't matter. He has already said goodbye to his Physicality, because of the pain he's going through, he doesn't want to be with it.

Any other question?

Q: .. How can we best communicate with other Souls?

K- Very easy. Find their strength. How do you tune to a channel on the ?? wave (length)? You find the strength in your machine that you tunes. It's the same with the Soul. But with the Soul it's not the frequency, it's the strength of this ?? field of the Soul. I have this with a guy, I especially nowadays do a lot of it with people around me, actually more or less continuously when somebody talks us, "oh, this is what I was just about to do, I'm

doing or thinking .. what is it. Because I don't need to talk anymore. Communication doesn't need to be there. Because the Souls ?? know.

Any other question?

Q: .. (2:56). .. I'll get off the subject of today and ask about dreams, which is, actually is coming into today's subject. Days ago, I dreamed of seeing myself as a boy and I remember saying, "I like you." I felt a very good emotion and it was very happy at dawn. But what brings me here is about a dream that recurs throughout my adult life. Someone steals our car. It's been this dream many times. I don't understand why that. Thank you. And lots of light to all.

K- Two things. Because when you have such a repetitive situation, it means somewhere down the line you're associated with it. Find out where and how. Did the Father say, they're going to steal our car if you don't sit in it? Did something happen, the car was stolen, your car, and you have the fear of losing it.

You don't remember the incident, but in the interaction of the fields of your brain, does. That's all it is. You have to go to find the incident, and then you find the solution. Then you'll never dream it again. Of that car. It's the fear of loss and somebody has triggered in.

It’s like with the children, never, ever frighten children of the dark. They see darkness as a light, and they enjoy it. Some children when you don't bring that fear into them, they like to play more in the darkness, because in darkness there is a mystery. (2:58). Where is the hand, what is moving? Where is the toy that I can pick? Am I correct in picking it? Once you put that fear, that becomes part of psychological pattern.

Any other question?

Q: .. Recently I dream military entities quite a lot. It is related with your Soul teachings. I need to know if there is a good way to raise the Soul of them, to allow human beings to evolve freely?

K- Soldier, military, it's just the way you have to. You have to change how you can give. When you become a Satellite this is one of your jobs, to reach out, to inform through the Soul, not by posting an email.

It’s amazing what you can go on, and what you can see, and what is come up. A lot of us today talk here with Knowledge Seekers, but many of our Knowledge Seekers are not with us today, those who live in Ukraine. They bombed their power stations, the substations, they bombed their power supply, water supply, and they are going through in the winter time, more or less, through hell. These damages will take years to repair. (3:00). Russia is doing its maximum best to bring the nation to, what we call, starvation and whatever. One hundred rockets yesterday, targeted only for power supplies, and water supplies, dams, and everything else.
